ACCESSION NUMBERS A69-10001 to A69-43818

INTERNATIONAL AEROSPACE ABSTRACTS is prepared and published semimonthly (except March, June, September, and December, which have three issues) by the Technical Information Service, American Institute of Aeronautics and Astronautics, Inc., for the Institute and the National Aeronautics and Space Administration under Contract No. NSR 33-003-009. Editorial and Subscription Offices: 750 Third Avenue, New York, N. Y. 10017. Copyright © 1969 by the American Institute of Aeronautics and Astronautics, Inc.
Telephone: 212 TN-7-8300 TWX: 212 867-7265

SUBSCRIPTION INFORMATION. Semimonthly issues: United States and Possessions, 1 year, \$54 postpaid; Foreign Countries, 1 year, \$68.25 postpaid. Cumulated Index Volumes: United States and Possessions, 1 year, \$30 postpaid; Foreign Countries, 1 year, \$35 postpaid. Second-class postage paid at Phillipsburg, N.J.

STAFF, AIAA Administrator—Technical Information Programs, Robert R. Dexter

ACCESSION NUMBER INDEX

INTRODUCTION

INTERNATIONAL AEROSPACE ABSTRACTS (IAA) is an abstracting and indexing service covering the world's published literature in the field of aeronautics and space science and technology. IAA is issued semimonthly, on the 1st and 15th of each month (except March, June, September, and December, which have three issues).

Coverage of Published Literature

The following types of publications are covered in IAA:

- Periodicals (including government-sponsored journals) and books.
- Meeting papers and conference proceedings issued by professional societies and academic organizations.
- Translations of journals and journal articles.

Coverage of Reports ("Unpublished" Literature)

Abstracts and indexes of report literature are issued in SCIENTIFIC AND TECHNICAL AEROSPACE REPORTS (STAR), which is published by the Scientific and Technical Information Division, National Aeronautics and Space Administration.

By special arrangement between NASA and the American Institute of Aeronautics and Astronautics, IAA is issued in coordination with the twice-monthly schedule of STAR, which appears on the 8th and 23rd of each month.

IAA and STAR both utilize identical subject categories and indexes, which are described below.

Thus the two services provide comprehensive access to the national and international unclassified report and published literature of current significance to aerospace science and technology.

Arrangement of the Semimonthly Issues

IAA is arranged in two major sections:

- (1) Abstracts Section. This section contains complete bibliographic citations with informative abstracts, arranged by appropriate subject categories to facilitate scanning. The subject categories are numbered from 01 to 34, and the scope of each category is outlined in the Table of Contents and again at the beginning of each category in the Abstracts Section. Each abstract is prefixed by the IAA accession number.
- (2) Index Section. Five indexes are contained in this section: Subject, Personal Author, Contract Number, Meeting Paper and Report Number, and Accession Number. Each index is prefaced by explanatory notes to guide the user to the desired abstract.

Cumulated Indexes

Cumulated indexes are prepared and issued promptly at the end of each quarter year, with the 4th quarterly being the Annual Index.

Each cumulated index contains the following sections: A—Subject Index, B—Personal Author Index, C—Contract Number Index, D—Meeting Paper and Report Number Index, and E—Accession Number Index.

Indexing Vocabulary

The Preliminary Edition of the NASA THESAURUS (December 1967) (NASA SP-7030) is the authority for the indexing vocabulary that appears in the subject indexes to STAR and IAA. The NASA Thesaurus should be consulted for a total picture of the current indexing vocabulary and associated cross-reference structure. Copies of the NASA Thesaurus may be obtained from the Clearinghouse for Federal Scientific and Technical Information or the U.S. Government Printing Office at a price of \$8.50 for the three-volume set.

Information regarding SCIENTIFIC AND TECHNICAL AEROSPACE REPORTS and the availability of INTERNATIONAL AEROSPACE ABSTRACTS to organizations having contractual arrangements with NASA may be obtained from the following address:

National Aeronautics and Space Administration
Scientific and Technical Information Division
Attention: Code USI
Washington, D.C. 20546

how to obtain publications abstracted

All documents abstracted are available from the AIAA Technical Information Service as follows:

- Paper copies of accessions announced in IAA and of other published articles in the TIS library are available at \$3.00 per document up to a maximum of 20 pages. The charge for each additional page is \$0.25.
- Paper copies of accessions announced in *Scientific and Technical Aerospace Reports* (STAR) and of similar unpublished reports in the TIS library are available at the rate of \$0.25 per page, minimum order \$3.00.
- Microfiche of documents announced in IAA are available at the rate of \$0.50 per microfiche on demand. Documents available in this manner are identified by the symbol # following the accession number in the Abstracts Section and in the Meeting Paper and Report Number and the Accession Number Indexes.
- Minimum air-mail postage to foreign countries is \$1.00.
- A number of publications, because of their special characteristics, are available only for reference in the library.

PLEASE REFER TO THE ACCESSION NUMBER WHEN REQUESTING PUBLICATIONS

Address all inquiries and requests to:

Technical Information Service
American Institute of Aeronautics
and Astronautics, Inc.
750 Third Avenue, New York, N. Y. 10017

Telephone: 212 TN-7-8300
TWX: 212 867-7265

CROSS REFERENCES

The subject index includes two types of cross references to aid the user of the index in locating the material being sought:

1. "USE" references (U) direct the user to alternate headings under which material on the subject will be found, for example

COLUMBIUM
U NIOBIUM

2. "NARROWER TERM" references (NT) refer the user to more specific headings in the same subject area, for example

LUMINESCENCE
NT ELECTROLUMINESCENCE

VOLUME 9

A Notation of Content, rather than the title of the publication, appears under each subject heading; it is listed under several subject headings which provide multiple access to the subject content of each accession. The IAA accession number is located under and to the right of the Notation of Content. It is preceded by numbers identifying the issue and page of *International Aerospace Abstracts* where the abstract is located.

To illustrate:

Issue Number	Page Number	Accession Number
01	p0006	A69-11016
M		

M WINGS

U VARIABLE SWEEP WINGS

M-1 ENGINE

Scale models of M-1 rocket engine oxygen and hydrogen pump driven two stage turbines used to determine performance and compact inlet manifolds problems
[AIAA PAPER 69-553] 16 p2840 A69-32678

M-2 LIFTING BODY

Lifting body type M2-F1 and M2-F2 aircraft enabling astronauts to make own landings at choice airport
03 p0366 A69-13367

M-2F2 LIFTING BODY

Lifting Body Test Program at Edwards AFB compared with flight testing standards of high performance aircraft, discussing testing philosophy
06 p1017 A69-17671

MACH CONES

Conical flow past cruciform wing-body and tail-body systems, considering various positions of leading edges with respect to Mach cone
15 p2548 A69-31002

Supersonic combustible gas mixture flow around circular cone, discussing ignition by shock wave and flow modification by conical flame front
15 p2548 A69-31007

Mach disk and Riemann wave location, size and strength in underexpanded jet flows, proposing model for conservation equation satisfaction
[AIAA PAPER 69-665] 17 p2954 A69-33460

MACH INERTIA PRINCIPLE

Mach principle in scalar-tensor gravitation theory, discussing self energy calculations in canonical formalism for solitary neutral and charged point particles
01 p0120 A69-10858

Cosmological model based on inertia and relativity principles, considering scalar gravitational and electrostatic potential, light velocity, gravitational interaction and observed galactic red shift
18 p3206 A69-35470

MACH NUMBER

Reynolds and Mach numbers influence on loss coefficient magnitude at straight airfoil lattice
03 p0364 A69-13788

Axially symmetric bodies shape for static pressure at location independent of Mach number
04 p0542 A69-14738

Wall temperature and Mach number effect on heat

flux distribution at spreading line of flow for supersonic gas on ellipsoid of revolution
06 p0858 A69-17331

Mach number effects on pattern of vortex flow past delta wing and circular cones at various Reynolds numbers
06 p0858 A69-17339

High enthalpy, Mach and Reynolds number flight studies on ballistic ranges, describing launchers, flight simulation, measuring and recording techniques
06 p0860 A69-17632

MHD shock discontinuities above critical Alfvén-Mach numbers in two fluid plasma
06 p0970 A69-17954

Mixture Mach number defined for collisionless plasma flow about solid body by extending cold-ion theory
[AIAA PAPER 69-78] 06 p0971 A69-18128

Air intakes for fixed exhaust throat hypersonic ramjet engines, discussing configuration dependence on Mach number at beginning of combustion
[ONERA-TP-658] 07 p1203 A69-18418

Pressure distribution on star-shaped bodies in wind tunnel at Mach 4 and Reynolds number .000006
07 p1050 A69-18703

Mach number distribution along axes of underexpanded supersonic jets measured in wind tunnel experiments
07 p1050 A69-18922

Mach number values and propagation rates of wear disturbances in interplanetary medium obtained from Mariner 2 data during low solar activity
09 p1575 A69-21523

Compressor inlet Mach number choice to control high performance variable stator compressors geometry
[ASME PAPER 69-GT-14] 09 p1571 A69-22502

Oblique shock wave properties with free stream Mach number and flow deflection angle as independent variables, noting explicit solution
11 p1819 A69-25378

Mach numbers effect on pressure distribution and friction moment in nonisothermal layer of gas lubricant, using power series
15 p2629 A69-31021

Mach reflection shock-shock locus in shock tube implosions generation by area change
16 p2766 A69-31919

Hydrodynamic parameters of annular Couette flow in longitudinal magnetic field for variable Reynolds and Mach numbers
16 p2821 A69-31953

Gas ducted flow at subsonic inlet velocity and critical outlet Reynolds numbers, proposing surface friction relation to Mach number
16 p2771 A69-31956

Shock polar equation in polar coordinates, showing shock polar shape dependence on Mach number
16 p2772 A69-32178

Mach number values and propagation rates of weak disturbances in interplanetary medium obtained from Mariner 2 data during low solar activity
16 p2851 A69-32518

Supersonic blowdown wind tunnel noting cylindrical diffusers efficiency in starting supersonic nozzles increased in proportion to Mach number
17 p2890 A69-33125

Mach number, cone angle, bluntness and wall to recovery temperature ratio effects on slender cones boundary layer transition measurements at hypersonic speeds
17 p2890 A69-33250

Plane shock wave interaction with plane rigid net-like wall, obtaining Mach numbers for reflected and penetrating shock waves
17 p2957 A69-33719

Large scale axisymmetric inlet systems performance capabilities, reviewing theoretical and experimental programs
[AIAA PAPER 68-580] 17 p3022 A69-34018

Flow viscosity and heat conduction effects on shock wave propagation in bent channel with weak Mach reflection
18 p3124 A69-35326

Flow velocity, flow Mach number and weak

disturbance velocity behind shock wave measured for nitrogen, oxygen and carbon dioxide
19 p3298 A69-36362

Global properties of solution of inverse detached shock problem analyzed by characteristic coordinates at low Mach number
19 p3301 A69-36788

Low density free jet properties, discussing velocity distribution perpendicular to axis and correlation of all terminal parallel Mach numbers for monatomic gases
20 p3514 A69-37206

Aerodynamic skin heating at high Mach numbers affecting structural design, noting use of high temperature materials, insulation systems and shell construction method
21 p3646 A69-38460

Detonation driven shocks of high Mach number obtained in improved membrane shock tube by heating and compressing driver gas
23 p4198 A69-41545

MACH-ZEHNDER INTERFEROMETERS

Mach-Zehnder interferometer for studying temperature distribution and heat transfer in turbulent jets, noting temperature dependence on jet thickness at different angles of attack
01 p0005 A69-10101

Electron density measurement in rapidly varying plasma, using improved Mach-Zehnder interferometer
05 p0760 A69-15613

Plane shock wave propagation around cylinders of various radii recorded with shadowgrams and Mach-Zehnder interferograms, discussing wave diffraction mechanics
18 p3120 A69-34472

High electron density in transient mercury vapor plasma determined using He-Ne laser interferometer measurements
18 p3153 A69-35307

Mach-Zehnder laser interferometer for measurements of electron density in transient Hg vapor plasma, noting agreement with microwave measurements
22 p3965 A69-40924

MACHINE TOOLS

NT BORING MACHINES

Laser application to machine tool accuracy and alignment

[ASTME PAPER MR68-407] 02 p0252 A69-11797

Thin film lubricant effect on machine dynamic performance, proposing inclusion with machine structure for reducing vibration effect

03 p0435 A69-13948

Laser interferometer gauges for machine tool accuracy, discussing operation, application, manufacture, cost and closed loop numerical control systems

04 p0606 A69-14880

Electron beam process application to welding, machining and assembling in automobile mass production

04 p0608 A69-15484

Clearing and blocking control over frequently overadjusted automatic equipment in precision machine and device construction

06 p0931 A69-17692

Book on machinability and producibility of metals, plastics, nonmetallic materials and composites, emphasizing machine tools and tool holders

06 p0931 A69-17782

Machine cutting tool for cutting and splicing endless magnetic tape 30 microns thick, noting film safety feature and nonmagnetic steel scissors

08 p1321 A69-20876

Tape placement machines to fabricate composite high modulus filamentary tape reinforced aerospace structures, anticipating future generations evolution into automatic control

19 p3323 A69-35584

Machine tools design for performing cutting operations within acceptable vibration limits

22 p3928 A69-40672

Electrochemical dimensional machining of metals and alloys with rotating cathode in parts manufacture from mechanically intractable materials

23 p4168 A69-41309

Holo-diagram device for making and evaluating holograms for small deformations measurement in large machine tool parts

24 p4317 A69-43760

MACHINE TRANSLATION

Soviet book on automated information retrieval systems covering computer languages, search in complex ordered codes, translation from Russian into computer language, etc

13 p2225 A69-27933

Algorithm for programming language grammars conversion into pushdown store automata translators

21 p3679 A69-39607

MACHINERY

Matrix-harmonic method for vibration study of mechanisms and machines

03 p0468 A69-13860

Matrix-harmonic method of vibration study extended to include autonomous vibrations of single degree of freedom machines

03 p0468 A69-13861

Soviet collection of papers on dynamics and strength of machines

06 p1026 A69-18013

Lubrication systems for high speed machinery, discussing wet and dry sump arrangements, gearbox heat rejection, oil flow requirements, X-22A aircraft, etc

[ASME PAPER 69-DE-65] 14 p2454 A69-28845

Collection of soviet articles on vibrations and stability of devices, machines and control system elements

14 p2536 A69-29741

Independent operations optimum performing sequence determined for parallel machines differing in

technological characteristics and with assigned time using algorithm

16 p2763 A69-31626

Rotating machinery fracture and design approach based on effect of detailed stress and strain duty on imperfect materials metallurgical behavior

17 p3060 A69-33561

Soviet papers on dynamics and strength of machines covering oscillations of shells and impeller blades, stress concentration at shallow shell holes, thermoclasticity, etc

19 p3435 A69-35841

MACHINING

NT CHEMICAL MACHINING

NT ELECTROCHEMICAL MACHINING

NT HOT MACHINING

NT MILLING [MACHINING]

NT SPARK MACHINING

Laser applications in metal working including dissimilar metal welding, hole drilling, material removal and dynamic balancing

[ASTME PAPER MR68-406] 02 p0252 A69-11796

Surface smoothness of laser beam holes, discussing possible damage and technology recommendations

04 p0606 A69-14607

Plastic deformation, aging, heat treatment and machining effect on structure of thin films of AMg11 alloy

05 p0783 A69-16814

Book on machinability and producibility of metals, plastics, nonmetallic materials and composites, emphasizing machine tools and tool holders

06 p0931 A69-17782

Micromachining with laser beam, choosing mirrors and lenses of optical system to provide uniform energy distribution for microwelding or hole boring

08 p1324 A69-19980

Pulsed ruby laser of small output for hole drilling, studying correlation of vaporization, hole diameter and depth with laser output

09 p1504 A69-22247

Oxide ceramics finishing processes, discussing leaching, machining, surface finishing, strengthening by compressive surface layers and joining

09 p1510 A69-22350

Fiber reinforced materials shear and tensile strength effect on stress-strain state of composite materials machine parts, considering design requirements

11 p1907 A69-25680

Electrical discharge machining effect on heat resistant alloys surface finish, noting volt-ampere characteristics

18 p3147 A69-34547

Machining processes effect on surface integrity of machine parts and effects on product quality

18 p3149 A69-35129

Precision of gas turbine compressor blade positioning devices during machining, analyzing causes of inaccuracies

21 p3731 A69-38880

Two machining processes for eliminating unbalanced state of machine parts, using eccentric cutting and adjustment of part CG for coincidence with spindle axis

21 p3732 A69-39097

He-Nc laser system for micromachining thin film photolithographic masks, describing computer controlled coordinate table and product quality

22 p3954 A69-40236

Digital computer systems for automating machine parts design main metal cutting operations, emphasizing optimal instrument usage, reliability, digital algorithm language and economics

23 p4169 A69-41952

MACROCLIMATE

U CLIMATE

MACROSCOPIC EQUATIONS

Macroscopic quasi-linear theory of HF radiation in cold electron-proton plasma allowing direct use of plasma and Maxwell equations

16 p2819 A69-31684

Earth bow shock electrical conductivity estimation from macroscopic equations without knowing microscopic dissipation processes

18 p3131 A69-35191

MACULAR VISION

U VISION

MAGIC TEES

Tunable ferrimagnetic bandpass filter using magic T configuration to permit low magnetic field strength and retain nonstacked configuration advantages

04 p0573 A69-14343

MAGMA

Lunar relief mechanism based on experimental cratering by pasty projectiles, proposing terrestrial magma genesis

15 p2698 A69-31373

MAGNESIUM

Shear accommodation kinking at second order twin bands in critically deformed magnesium investigated for dislocation mechanism

01 p0093 A69-10063

Radiation, Stark and van der Waals level broadening constants for Mg I and Si I calculated to interpret solar and stellar spectral line widths

02 p0310 A69-11454

Migration and penetration of vacancies in quenched magnesium analyzed by electrical resistivity measurements and electron microscopy

02 p0267 A69-12187

Interaction between point defects and magnesium atoms in aluminum irradiated by neutrons, analyzing magnesium concentration effect on recovery

05 p0781 A69-16613

Temperature distribution in low pressure magnesium vapor-oxygen diffusion flames, discussing environmental conditions and visible radiation

07 p1241 A69-18367

Titanium tetrachloride reduction to titanium by magnesium, showing autocatalytic process

07 p1163 A69-18784

Magnesium boron composite fabrication by diffusion bonding and liquid metal infiltration, obtaining minimized property variations and high strength to density ratios

09 p1507 A69-22332

Vegetable diet including 210 g of dry Chlorella biomass decreases effect on calcium and magnesium assimilation to produce insignificant negative balance of K and Mn

10 p1647 A69-23590

Solar spectra of Mg II doublet lines during September 22, 1968 eclipse, considering chromospheric activity effects on emission peaks

11 p1958 A69-24591

Spectral line formation in nonlinear multilevel atom line transfer problems, considering radiation transfer through plane parallel atmospheres of H and Mg atoms

12 p2133 A69-26967

Stannate immersion process for reduction of magnesium-steel couples galvanic corrosion, discussing bath operating limits

14 p2466 A69-29933

MAGNESIUM ALLOYS

Aluminum-Zn-Mg alloys weldability, discussing base metal composition and heat treatment influence during gas-shielded arc welding

01 p0086 A69-10536

Long term atmospheric corrosion test program for aluminum and magnesium base alloys, comparing tensile strength of exposed and control specimens

01 p0100 A69-11353

Al-Mg-Si alloy strain aging, noting effect of deformation stresses on kinetics and aging mechanism for prior and concurrent deformation

04 p0614 A69-14575

Effective slip systems in hexagonal close packed magnesium alloy under static and hydroexplosive loading, examining flow mechanism for fine structure formation

04 p0615 A69-14639

Aging and recovery effect on structure and hardness of Ag and Be doped Al-Mg alloys

05 p0783 A69-16811

Plastic deformation, aging, heat treatment and machining effect on structure of thin films of AMg11 alloy

05 p0783 A69-16814

Microstructure of diffusion zone during contact fusion in magnesium-nickel system at high temperatures

06 p0945 A69-17895

Plastic deformation of internally oxidized dispersion strengthened silver magnesium alloys, noting hardening effect dependence on oxidation temperature

07 p1159 A69-18627

Polycrystalline Mg-Ti-Zr alloy precipitation hardening investigated by tensile and hardness tests and transmission electron microscopy

07 p1167 A69-19265

Low temperature low cost dip brazing technique for light weight magnesium alloy electronic packaging structures, noting distortion

09 p1509 A69-22346

Transgranular stress corrosion crack propagation in thin sheet single phase magnesium-aluminum alloy

10 p1710 A69-23086

- Thermal and microstructural analyses to determine phase interactions nature in Mg alloys of Mg-Nd-Al system
11 p1902 A69-24271
- Solid solution decomposition effect on binary Mg alloys recrystallization temperature containing Al and Nd, using X ray and microstructural analysis
11 p1902 A69-24272
- Al-Mg-Si alloy strain aging, noting effect of deformation stresses on kinetics and aging mechanism for prior and concurrent deformation
15 p2638 A69-30276
- Lattice components of heat conductivity and chemical composition relations of magnesium alloy solid solutions
16 p2824 A69-31567
- Creep rate and temperature effect on creep resistance shown in direct correlation with Al-Mg alloys strength by long term high temperature tests
16 p2801 A69-31782
- Mg alloys applications to construction, discussing strength-to-weight ratio of cast and wrought alloys
16 p2801 A69-31787
- Creep experiments on Mg alloys, discussing dispersed phases influence on creep cavitation and grain boundaries mobility
17 p2985 A69-32907
- Crystal twinning directional effect on Mg alloys tensile yield strength degradation, investigating recovery methods
19 p3341 A69-35583
- Aluminum 7 percent Mg alloys stress corrosion cracking, presenting aging kinetics and depletion zone dislocations at grain boundaries
19 p3350 A69-36896
- Shrinkage cavity volume formulas for alloy castings with wide liquidus to solidus range, considering effects of diffused porosity and clustering for Mg alloy
20 p3548 A69-37329
- Al and Mg alloys as ultrasonic wave acoustic lines, considering sound velocity, damping factor, grain size, chemical composition, etc
20 p3564 A69-38290
- Age hardening response of Mg-Th-Zr alloy at 60-450 C, discussing peak strengthening, superlattice formation, precipitation processes, etc
21 p3743 A69-38735
- Seam welding processes and power supply effects on control efficacy based on electrode displacement for Al-Mg alloys
24 p4319 A69-42919
- Stored energy of cold work and electrical resistivity of Ag-Mg solid solution alloys measured as functions of strain, Mg concentration and initial state of order
24 p4332 A69-43029
- Lap-shear strengths of Mg-Al alloy bonded with nylon-epoxy adhesive, including anodized coating rolling schedule and honeycomb core fabrication
24 p4323 A69-43417
- MAGNESIUM CHLORIDES**
Metallographic analysis of stress corrosion cracking of Ti alloys of Al and Sn in aqueous magnesium chloride solutions, noting cleavage process
19 p3352 A69-36903
- MAGNESIUM COMPOUNDS**
NT CHLOROPHYLLS
NT CORDIERITE
NT DOLOMITE [MINERAL]
NT ENSTATITE
NT HEXAHEDRITE
Spectra of hydrides of Mg 25 and Mg 26 in photosphere, searching for weak lines on basis of isotope shifts
03 p0515 A69-14035
Magnesium silicate crystal structure, discussing transformations under high pressure, crystallochemistry and implications for physics of earth mantle
08 p1267 A69-19904
Low temperature specific heat of praseodymium magnesium nitrate
12 p2026 A69-25784
Structural formula of slowly cooled Mg and Al-Mg microvapor ferrites, noting ion mobility during cooling
15 p2670 A69-31184
- MAGNESIUM ISOTOPES**
Threshold photonuclear cross section for Mg 26, discussing resonances as primary production mechanism for stellar neutrons
21 p3788 A69-38599
- MAGNESIUM OXIDES**
Reflection indicatrices of aluminum oxide, MgO, Au and Pt surfaces for normal irradiation noting temperature and surface treatment effects
03 p0534 A69-14161
- Surface UV irradiated MgO powder catalytic activity for hydrogen-deuterium exchange reaction
07 p1073 A69-18374
- Vaporizer temperature and collision efficiency correlation data for magnesium oxide-argon dilute diffusion flames studied for determining inverse temperature dependence
13 p2380 A69-28461
- CaO and MgO reflectance spectra measurements at high resolution and at low temperature including exciton spectra at 25 K, obtaining fine structure
18 p3181 A69-34274
- Chromium composites mechanical properties, studying effects of alloying with spinel and magnesium oxides
23 p4177 A69-41672
- MAGNESIUM PERCHLORATES**
Ammonium and magnesium perchlorate mixture thermal stability study with differential scanning calorimetry, noting exothermic decomposition of AP [AIAA PAPER 69-500]
16 p2833 A69-32661
- MAGNESIUM SULFATES**
U HEXAHEDRITE
MAGNESYN [TRADEMARK]
U SERVOMOTORS
- MAGNET COILS**
NT FIELD COILS
Min B magnetic trap, discussing induction coils, ponderomotive forces and mechanical stresses sustained by coils
04 p0634 A69-14299
Active magnetic coils for attitude control of synchronous satellites by computer simulation and laboratory tests
06 p1017 A69-17944
Electromagnetic vibration exciters based on permanent magnet and AC coil interaction
16 p2790 A69-32077
- MAGNETIC ABSORPTION**
U ELECTROMAGNETIC ABSORPTION
MAGNETIC ANNULAR SHOCK TUBES
Flow analysis in magnetic annular shock tube in magnetic field varying with time
08 p1366 A69-20787
Shock and current sheet separation in magnetic shock tubes, determining electron temperature behind shock and within current layer
20 p3511 A69-38241
- MAGNETIC ANOMALIES**
NT GEOMAGNETIC HOLLOW
F 2 layer equatorial anomaly at local noon, discussing position of trough center in latitudinal distribution of ionization
03 p0422 A69-13515
Aeromagnetic profiles across Reykjanes ridge southwest of Iceland, noting magnetic anomalies symmetry and ocean floor spreading since Mesozoic
04 p0592 A69-14660
Global geomagnetic anomalies influence on longitudinal pattern of solar quiet day variations and in phases of second harmonics of components
06 p0920 A69-17734
Spatial structure of residual anomalous magnetic field, determining parameters of eccentric horizontal dipole as main source of geomagnetic field
06 p0922 A69-17755
Anomalous magnetic field energy spectrum obtained from aeromagnetic survey and approximation valid for earth crust and upper mantle
09 p1487 A69-21554
Quasi-integral operator applicability to analytical continuation of potential field into complex region arising during gravitational and magnetic anomalies interpretation
10 p1689 A69-24082
Magnetic anomalies off Cape Hatteras explained as possible edge effect, discussing ocean and continental magnetic crusts and igneous and magnetic rocks
11 p1879 A69-25405
Statistical method for calculating upper bound heights of sources responsible for magnetic anomalies
12 p2071 A69-26696
Onboard magnetic anomaly detection system for Canadian helicopter, discussing magnetometer location, boom design and testing and equipment installation
[AIAA PAPER 68-487]
12 p2094 A69-26771
Sea tides and ionospheric effects on lunar variation of geomagnetic field vertical component
12 p2161 A69-26957
Anomalous magnetic field energy spectrum obtained from aeromagnetic survey and approximation valid for earth crust and upper mantle
16 p2784 A69-32549
- Lower ionospheric electron concentration and collision frequency measurements by Nike-Apache rockets suggesting geomagnetic anomaly in D region
18 p3127 A69-34799
- Solar wind plasma effects on lunar wake umbral and penumbral interplanetary magnetic field anomalies, evaluating roles of electrons and ions
20 p3609 A69-38095
- Ionospheric F region equatorial anomaly in electron density showing high correlation with equatorial electrojet range and poor correlation with Fugue range
23 p4160 A69-42432
- Equatorial anomaly during declining solar activity, treating seasonal and daily variations, longitude dependence and geomagnetic storm-time distortions
23 p4161 A69-42436
- MAGNETIC CIRCUITS**
Circuits with magnetic coupling, describing digital computer algorithms for assembly of loop circuit equations
01 p0036 A69-10745
Magnetic core logic circuit system for bidirectional stepping motor drive voltage power supply control in proper phase and time sequence
01 p0047 A69-11000
Square loop magnetic core model for computer aided circuit transient analysis
06 p0899 A69-16888
O shaped magnetic systems using unsaturated steel magnetic circuit to produce strong uniform magnetic fields for MHD machines
10 p1636 A69-23102
Time dependences of retardation effect, reversible magnetic permeability and magnetic viscosity during pulse magnetization of ferrite cores
13 p2319 A69-27993
Ferrite parameters measurement in alternating fields based on continuous analysis of magnetic, magnetizing and measuring circuits for assessing errors
13 p2320 A69-27996
Lumped element circuit producing directional coupling by electric and magnetic coupling of reactance quadrupoles, discussing insufficient coverage of calculated frequency range
16 p2763 A69-32581
Book on digital magnetic logic, considering digital magnetic core circuits consisting of magnetic components and interconnecting conductors
20 p3498 A69-37144
Ultrasonic oscillations effects on magnetic permeability of ferrite circuit components
23 p4138 A69-41873
- MAGNETIC COILS**
NT FIELD COILS
Proton spin maser oscillator with emission coils coupled by prepolarized liquid, discussing tuning and detuning
08 p1324 A69-20231
High homogeneity sixth order superconducting solenoids with coil inner surface notch correction, describing graphical design techniques
10 p1665 A69-23857
Cryogenic solenoids with pure Al conductor for production of strong magnetic fields, discussing softness and strain resistivity problems
12 p2016 A69-26497
Horseshoe electromagnet sensors above ferromagnetic plate, analyzing electromagnetic properties of plate and coil impedance
12 p2094 A69-26719
Sealed and unsealed relay coils temperature rise at simulated outer space air pressure levels
13 p2231 A69-28048
Shield facility and Helmholtz coil system used to investigate chronic effects on man of zero magnetic field regulated to cancel geomagnetic field variations
15 p2586 A69-30382
Book on solenoid magnet design covering magnetic and mechanical aspects of resistive and superconducting systems
20 p3464 A69-37145
Choke coil magnetoelastic sensors thermal stability found decreasing proportionally to measurement range decrease /below 100 newtons/
23 p4166 A69-41995
- MAGNETIC COMPASSES**
Book on magnetic compasses and magnetometers covering pivoted needle instruments, surveying, transmitting and gyromagnetic compasses, inductor instruments and compass testing
08 p1315 A69-20444
Quartz compasses designed for orientation of electronic devices with respect to magnetic meridians at low horizontal component values
23 p4166 A69-41869

MAGNETIC CONTROL

Magnetic orientation and attitude control of spin stabilized satellites, synthesizing control circuits and calculating power requirements

03 p0521 A69-13644

Book on Hall generators /magnetically controllable semiconductor elements/, discussing principles of operation, design, manufacture and applications

03 p0406 A69-13954

Automatic closed loop distortionless control of magnetic field modulation using light sensitive resistor as one leg of attenuator

06 p0897 A69-17708

Magnetic attitude detection and control system for Radio Astronomy Explorer satellite [AIAA PAPER 68-855]

12 p2174 A69-26779

Spatial harmonics of harmonic frequency instabilities of cyclotron half frequency in system of two symmetrical electron beams confined by magnetic field

13 p2314 A69-28364

Permanent magnets optimal design and properties for attitude control of German research satellite Azur, considering environmental influences

16 p2868 A69-31936

Diademe satellites stabilization system to measure station-to-satellite distance by laser pulse, discussing reflector, magnet for attitude control, damping device, etc

17 p3046 A69-33224

MAGNETIC CORES

Delayed response in threshold switching from reset state in ferrite memory cores consisting of magnesium compounds [IEEE PAPER 16.4]

01 p0045 A69-10719

Ferrite core temporary storage unit with 500 nsec cycle time

04 p0564 A69-15222

Square loop magnetic core model for computer aided circuit transient analysis

06 p0899 A69-16888

Transformer inrush transients control by selection of core material, primary turn number and trigger circuitry

06 p0894 A69-17221

Neutron irradiation and temperature effects on ferrite and Permalloy memory cores hysteresis loops

12 p2142 A69-26259

Model for perturbations in earth rotation and geomagnetic core-mantle coupling, discussing electromagnetic restoring torque

12 p2077 A69-27110

E shaped cores for miniaturized transformers and inductors from high permeability plastic bonded materials

13 p2237 A69-28586

Time logarithmic switching to explain anomalous delay in threshold response of MgMnZn ferrite memory cores

15 p2668 A69-30688

Magnetic core material and process technologies for space power electronic applications noting pulse transformers, nonlinear reactors and tapes

19 p3319 A69-35543

Computer memory with digit wire magnetic circuit /torus/, discussing capacity, access and output

20 p3503 A69-37402

Stored program decommutation techniques involving small core storage elements insertion into data path between decommutator equipment and computer

23 p4133 A69-41749

MAGNETIC DIFFUSION

Liquid copper electrical conductivity temperature dependence at very high temperatures from magnetic diffusion and flux penetration measurements, noting exploding wires role

01 p0119 A69-10673

Gas dynamic shock wave entry into magnetic field, discussing field distribution behind shock front and diffusion and medium motion effects on penetration depths

07 p1192 A69-19022

Diffusion times for saturated region in Hipernorm tubes measured for various exciting magnetic fields and pulse duration

23 p4141 A69-42222

MAGNETIC DIPOLES

Effect of steady flow of incompressible conducting fluid on magnetic dipole at center of sphere

01 p0128 A69-10363

Planetary magnetic field measurements near Venus, Mars, and moon, noting magnetic dipole comparison with earth and solar wind interactions [AAS PAPER 68-186]

02 p0311 A69-11471

Magnetosphere boundary determined in two dipole model approximation, taking into account current layer in tail

02 p0236 A69-11655

Dipole models of geomagnetism at earth surface used to calculate magnetic field in outer space

02 p0238 A69-11673

Magnetotopometer for measuring torque /proportional to magnetic dipole moment/ exerted on object by earth magnetic field

02 p0248 A69-11768

Algorithm computing spherical harmonic coefficients for eccentric geomagnetic dipole potential

02 p0245 A69-12735

Plasma slab acceleration along magnetic dipole guard field null, noting lack of equilibrium and no decrease of plasma losses

03 p0475 A69-13157

Mathematical dipole model for geomagnetic field to provide main magnetic field source distribution within earth

03 p0424 A69-13543

Dipole model of geomagnetic field in terms of spatial distribution of vertical component, discussing computer program for calculating rectangular components

03 p0424 A69-13544

Flow development around impulsively rotating dipole magnetized sphere in viscous incompressible conducting fluid, noting diffusing Alfvén waves and induced field

03 p0477 A69-13793

Outer magnetosphere average magnetic field configuration between 5 and 18 earth radii, noting various maps in equatorial plane

03 p0425 A69-14012

Stormer problem of charged particle motion in magnetic dipole field, discussing analytical method for high and low energy particles

03 p0504 A69-14127

Capture of electrically charged micrometeorites and corpuscles in magnetic field of gravitating dipole, noting necessary condition on particle motion

04 p0659 A69-14962

Supersonic plasma flow interaction with two dimensional magnetic dipole

06 p0967 A69-17738

Spatial structure of residual anomalous magnetic field, determining parameters of eccentric horizontal dipole as main source of geomagnetic field

06 p0922 A69-17755

Damping boom flutter and magnetic dipoles effects on attitude stability of gravity gradient satellites with three axis stabilization

07 p1227 A69-18332

Charged particle motion in electromagnetic field from basic equation of motion for magnetosphere, discussing dipolar magnetic field, Stormer trapped particle theory, etc

07 p1208 A69-19355

Magnetic energy relationships in magnetosphere, discussing confinement energy of magnetic dipole field, energy of transient compression and zero order energy of trapped particles

07 p1128 A69-19359

Magnetohydrostatic cavity formed round magnetic field of line dipole-line current combination by infinitely conducting plasma at uniform pressure

08 p1369 A69-20998

Power radiated by oscillating magnetic and electric dipoles in cold streaming plasma calculated by Poynting vector method

09 p1544 A69-21329

Pulsars rotating neutron star model analyzed on basis of magnetic dipole rotating in vacuum

09 p1592 A69-21463

Captured particles magnetic drift envelopes in magnetosphere calculated by model considering perpendicular geomagnetic dipole to solar wind

09 p1574 A69-21521

Charged particles motion in geomagnetic field from analyzing spatial distribution within framework of two dipole magnetosphere model

10 p1756 A69-22818

Dipole magnetosphere model with cylindrical or spherical forbidden band for studying plasma motion in quasi-hydrodynamic approximation

10 p1769 A69-23901

Magnetosphere boundary configuration calculated with allowance for geomagnetic dipole inclination to geographic axis and nondipole section of geomagnetic field

10 p1686 A69-23902

Plasma distribution and Alfvén wave velocity field in magnetosphere, discussing distortion of dipole magnetic field, ring current and wave propagation

10 p1742 A69-24205

Reflection and absorption characteristics of two dimensional array of magnetic dipoles for microwaves, considering element orientation and distribution

12 p2035 A69-25901

Geomagnetic field dipole model by extrapolating vertical Z component for 1955 to heights between 500 and 25,000 km

12 p2071 A69-26695

Model for self consistent time independent ring current of charged particle distribution under combined field of earth dipole and particle motion current

12 p2151 A69-26948

Radiation pattern of electric and magnetic dipole on flat semiinfinite impedance system edge found similar

13 p2236 A69-28546

Magnetosphere boundary determined in two dipole model approximation, taking into account current layer in tail

13 p2256 A69-28686

Dipole models of geomagnetism at earth surface used to calculate magnetic field in outer space

13 p2257 A69-28704

Boundary conditions for equilibrium diamagnetic plasma in magnetic dipole having constant and isotropic pressure in system

14 p2489 A69-28910

Geomagnetic field secular variations relation to variations of magnetic field of optimum dipoles, noting earth core role

14 p2436 A69-29061

Geomagnetic ring current study, giving exact kinetic description based on Vlasov equation of plasma ring current in dipolar field

15 p2598 A69-31218

Self consistent ring current of radiation belt under combined influence of earth dipole field and field due to currents of particle motions

16 p2776 A69-32096

Captured particles magnetic drift envelopes in magnetosphere calculated by model, considering perpendicular geomagnetic dipole to solar wind

16 p2851 A69-32516

Capture of electrically charged micrometeorites and corpuscles in magnetic field of gravitating dipole, noting necessary condition on particle motion

18 p3197 A69-34725

Chapman-Ferraro approximation for magnetic interior field line configuration in plasma flow around two dimensional dipole, allowing for tail formation and neutral sheet

18 p3129 A69-34955

Spectral lines due to magnetic dipole transitions in fine structure levels in collisionally excited neutral H clouds, discussing theoretical difficulties in interpretation

19 p3379 A69-36225

Geomagnetic field model /POGO/ to confirm eccentric dipole westward velocity secular decrease predicted by day length changes

20 p3523 A69-37490

Electromagnetic radiation in moving uniaxially anisotropic medium, obtaining time dependent solutions for oriented magnetic dipole current distribution density

20 p3576 A69-37578

Equilibrium plasma configurations in magnetic field of two dimensional dipole analyzed under similar conditions to magnetospheric tail formation with neutral hot plasma layer

23 p4205 A69-41835

Successive approximations convergence analyzed in solving supersonic collisionless plasma flow past magnetic dipole

23 p4156 A69-41853

Single dipole field approximation of geomagnetic field, minimizing sum of squares of differences between dipole field and geomagnetic field

23 p4158 A69-42173

Two and three dipole approximation of main geomagnetic field based on minimization of sum of squares of differences between dipole and geomagnetic fields

23 p4158 A69-42174

MHD disturbances in earth core produced by sudden introduction of magnetic dipole with axis positioned perpendicular to earth mantle and toroidal excitation fields

23 p4158 A69-42176

Pulsar model with seat as rotating neutron star having dipolar magnetic field not parallel to rotation axis

24 p4377 A69-42666

MAGNETIC DISPERSION

Hydromagnetic radiation characteristics of electric and magnetic dipoles in homogeneous anisotropic cold plasma, obtaining field components and wave propagation modes

24 p4307 A69-42905

Magnetic dipole field variations effects on planetary atmosphere erosion by solar wind, discussing Mars and Venus atmospheres above ionosphere

24 p4385 A69-43224

MAGNETIC DISPERSION

Dispersion measurements and spectrum variations analysis to study pearl micropulsations frequency variation during sudden deformation of magnetosphere by magnetic storms

02 p0240 A69-11697

Solar flares and plagues free energy origin in magnetic field dissipation

06 p0996 A69-17446

Dispersion measurements and spectrum variations analysis to study pearl micropulsations frequency variation during sudden deformation of magnetosphere by magnetic storms

13 p2258 A69-28728

Dispersoids and temperature effect on coercive force of 19 Co base and 10 Fe plus 27 percent Co base

15 p2669 A69-30689

Polycrystalline ferroelectrics dielectric dispersion region in decimeter-centimeter wavelength range using waveguide resonance method employing wideband strip line

22 p3997 A69-41167

MAGNETIC DISTURBANCES

Differential Faraday technique to determine electron content latitude dependence in Northern Hemisphere during magnetically disturbed periods in March 1966

01 p0146 A69-11128

Sudden magnetic field increase associated with July 8, 1966 sudden commencement observed by OGO 3 satellite in magnetotail

01 p0075 A69-11226

Whistler dynamic spectra variation studies, emphasizing distorted magnetospheric geomagnetic field structure effect

02 p0238 A69-11671

Polar geomagnetic disturbance development and decay during solar quiet and moderately disturbed periods

02 p0240 A69-11724

Electron concentration profile change in ionospheric F region in auroral zone during negative magnetic bay disturbances

03 p0423 A69-13530

Helicon waves in nonresistive cylindrical and spherical plasmas

03 p0479 A69-13961

Equatorial semiaxis of magnetospheric tail at distances between 10 and 80 earth radii for various intensities of polar magnetic disturbances

05 p0753 A69-16050

Magnetic disturbance vector distribution during polar magnetic substorm

05 p0755 A69-16271

Cut-off boundary latitude and electron flux changes in midnight sector of outer radiation belt during magnetic bay periods from Injun 4 satellite data

07 p1204 A69-18836

Hourly N/h/ profiles of F region calculated from nomograms by normal integral method during magnetic disturbance, measuring region temperature

10 p1687 A69-23928

Polar geomagnetic disturbances global current systems representation by prototypes of equivalent current systems

10 p1688 A69-23937

Ionospheric irregularities drift and anisotropy parameters variation with true reflection height during magnetically disturbed conditions

10 p1659 A69-24062

Recurrent geophysical disturbances associated with solar active regions and low latitude background field pattern on solar surface magnetic fields

11 p1964 A69-25415

Auroral cosmic noise absorption relationship to auroral geomagnetic disturbances, investigating absorption diurnal distribution

12 p2071 A69-26706

Solar control of day-to-day variability in phase of solar diurnal variation of horizontal magnetic intensity on quiet days

12 p2073 A69-26954

Magnetospheric ring current model from ground stations data to interpret observed magnetic field disturbances

13 p2253 A69-27699

Whistler dynamic spectra variation studies, emphasizing distorted magnetospheric geomagnetic field structure effect

13 p2257 A69-28702

High latitude ionization spikes observed by POGO spacecraft, noting frequency correlation with magnetic disturbances and development by high energy electron injections

14 p2511 A69-28950

Tangential solar wind discontinuity observed by Vela 2A satellite, producing ground magnetic disturbances conjunctively with magnetospheric, ground and ionospheric currents

14 p2512 A69-29041

Radio waves propagation along polar auroras region, obtaining ionospheric parameters for magnetic disturbances based on penetration probability

14 p2436 A69-29058

Polar auroral region displacement ascribed to distant magnetic field disturbances, proposing calculation method

14 p2436 A69-29059

Sporadic electron flux contribution to high latitude geomagnetic disturbances at outer radiation belt boundary estimated from Elektron 1 and 2 observations

14 p2438 A69-29079

Rocket measured electron densities of nighttime auroral E region over Canada at different magnetic activity levels, noting frequency and plasma density relations

14 p2439 A69-29117

Magnetic field variations in magnetosphere and interplanetary space correlated with polar magnetic disturbances from dynamic morphology data

14 p2441 A69-29387

Corpuscular radiation intensity during geomagnetic disturbances measured during rocket flights at 50-100 km, discussing effects on lower ionospheric radio absorption

15 p2677 A69-31327

Ion-neutral air motion in F region under time dependent electric and constant magnetic field effect, using partial differential equations

16 p2777 A69-32181

Equatorial electrojet north-south cross sections in Pacific observed by airborne equipment during magnetically quiet day, moderately disturbed day and solar eclipse

16 p2777 A69-32182

Latitude variations of delays between spread F and magnetic activity shown to be different at various parts of solar cycle

16 p2779 A69-32194

Synoptic observations of F 2 region in magnetically conjugate regions of Kerguelen and Archangel, comparing critical frequencies during magnetic and ionospheric disturbances

16 p2784 A69-32612

Polar auroral zone boundaries from C-180 camera photographs related to magnetic disturbance level, noting evening-morning asymmetry

17 p2963 A69-33951

High latitude geomagnetic disturbances, incoming electron fluxes and riometric absorption relationship in lower ionosphere studied by X ray bremsstrahlung with sounding balloons

17 p2964 A69-33961

Daytime magnetoionospheric disturbances in auroral zone, discussing time lag of perturbations for absorption and geomagnetic field bays

17 p2964 A69-33962

Geomagnetic disturbances intensity spatiotemporal distribution at Northern Hemisphere high latitudes during IGY and IQSY

17 p2965 A69-33966

Auroral absorption maximum frequency correlation with years of solar activity reduction and magnetic activity from riometric data long term variations

17 p2968 A69-33991

Correlation between disturbances in troposphere and in geomagnetic field observed after widespread high winds and magnetic storms, using superposed epoch method

18 p3127 A69-34648

Antarctic VLF emissions observations at 12 kHz, showing dependence on geomagnetic disturbances, auroras and radio absorption in ionosphere

18 p3102 A69-34964

Earth ionosphere and magnetosphere electrodynamic state analyzed as function of neutral gas small scale motions, considering magnetic disturbances and ionospheric discontinuities

20 p3519 A69-37026

Ionospheric and magnetic disturbances at midlatitudes related, noting individual and simultaneous disturbances

20 p3527 A69-37673

Equatorial semiaxis of magnetospheric tail at distances between 10 and 80 earth radii for various intensities of polar magnetic disturbances

20 p3532 A69-37959

High latitude magnetospheric convection patterns determined from ionospheric current distribution using magnetic disturbance plots

21 p3709 A69-38503

Auroral electric current system model to explain magnetic disturbances associated with auroral breakups

21 p3710 A69-38505

Long time scale magnetodynamic noise in geomagnetic tail, discussing hourly ranges of fluctuations measured by IMP 1 satellite and planetary K index correlation

22 p3935 A69-39967

Distinction between faint and bright sources of slowly varying solar microwave emission components applied to geomagnetic activity statistics

22 p4020 A69-40306

Short lived Forbush decreases, discussing phase differences between stations due to asymptotic directions changed by geomagnetic field and spatial anisotropy

23 p4204 A69-41480

Geomagnetic disturbances relations to cosmic ray diurnal variation phase and amplitude, including Forbush decreases

23 p4204 A69-41483

MAGNETIC DOMAINS

Domain structure of barium titanate single crystals during polarization reversal by sinusoidal AC field

06 p0981 A69-17893

Magnetic domain structure in supercritical ferromagnetic films with perpendicular anisotropy

12 p2143 A69-26458

Flux grown magnetic garnet crystal internal defects analyzed by etching and Lang X ray transmission topography, revealing tubular structural deviations

16 p2825 A69-31692

MAGNETIC EFFECTS

Light scattering from plasmas embedded in homogeneous magnetic field, discussing solid state and high temperature gas plasmas

01 p0125 A69-10015

Density gradient measurement method for plasma column with propagation and electric field perpendicular to external magnetic field

01 p0128 A69-10390

Axial magnetic field effect on exploding wire phenomenon, studying direct interaction

01 p0118 A69-10660

Current/field characteristic of n-type GaAs, using high power microwave techniques in presence and absence of transverse magnetic field

01 p0139 A69-10819

Electromagnetic wave path emitted by artificial satellites across anisotropic ionosphere due to geomagnetic field determined by computer program

01 p0068 A69-11115

Laminar natural convection of electrically conducting fluid under magnetic field, noting temperature profiles

01 p0134 A69-11407

Solar eclipse effect on geomagnetic field at and near dip equator observed at Huancayo Observatory, Peru

02 p0241 A69-11727

Solar eclipse effects on ionospheric conductivity and geomagnetic field at and near dip equator observed at Huancayo, Peru

02 p0241 A69-11728

Laser produced sparks in 200 kG magnetic field in air, butane and helium at atmospheric pressure

02 p0260 A69-12659

Magnetic field effect on amplitude, frequency and form of LF oscillations in Gunn diodes

02 p0222 A69-12684

Magnetic shear effect on stability of electron-neutral collision dominated plasma, noting helical perturbations onset

03 p0473 A69-12925

Galactic cosmic ray modulation by interplanetary magnetic fields, discussing compatibility of several models with experimental data

03 p0498 A69-12933

Existence and stability of periodic waves in cold collisionless plasma in magnetic field

03 p0474 A69-13143

Diurnal, magnetic and solar cycle dependences of auroral emission variations and auroral occurrence

03 p0420 A69-13325

Magnetic retuning of resonator with helical electron flux /gyromonotron/ in starting and prestarting modes

03 p0407 A69-13979

Midlatitude nighttime total ionospheric electron content during magnetically disturbed periods from geostationary satellites Canary Bird and ATS 3

03 p0426 A69-14030

Nonlinear mechanism for solar surge involving rapid acceleration of high electrical conductivity and macroscopic dimension plasma regions

03 p0516 A69-14044

Uniform external magnetic field effect on electric potential distribution within ion-electron beams near planar emitting surface

03 p0482 A69-14214

Cosmic ray time variation and anisotropies near earth, discussing galactic and solar cosmic rays, trajectories in geomagnetic field, etc

03 p0504 A69-14236

Magnetic field dependences of Josephson critical current in high and low current Josephson junctions, discussing influence of induced self field

04 p0640 A69-14437

Magnetic field effects on heat transfer between Ar plasma flow and channel wall, noting effects of temperature and Reynolds number

04 p0636 A69-14989

Transverse magnetic field effect on three dimensional nonisothermal lubrication layer of conducting gas at small magnetic Reynolds number

04 p0607 A69-14990

Dispersion of solute in electrically conducting fluid flowing between two parallel plates in magnetic field

04 p0638 A69-15194

Spherical shock wave propagation in polytrope with poloidal magnetic field, noting application to shock waves in magnetic stars

04 p0664 A69-15438

Stabilizing influence of axial magnetic field on confined vortex flow of aqueous electrolytic conductor generated by two dimensional wall jets

05 p0798 A69-15611

Electron cyclotron instability and HF ionization in beam-plasma experiment using electron beam guided by magnetic field through He gas

05 p0798 A69-15612

Charged particle motion in constant direction magnetic field varying exponentially with time, discussing electric field effect on particle motion

05 p0801 A69-15744

Polar aurora incident energetic particles spectroscopic analysis, showing system of lines and bands intensity dependence on particle energy spectrum and magnetic activity

05 p0752 A69-15799

Linc broadening possibility for Q switched iodine laser with aid of magnetic effect/Zecman effect/, noting energy storage capability increase

05 p0773 A69-16288

Time independent solar wind equations applied to spherical symmetry and radial magnetic field at solar surface, noting thermal conductivity anisotropy

05 p0817 A69-16703

Magnetoplasticity induced in metal by high magnetic fields, examining stationary flow in two dimensional deformation

05 p0844 A69-16804

High Q magnetically tunable microwave filters using magnetodynamic modes in ferrite spheres

06 p0892 A69-16831

Transverse magnetic field effect on ohmic plasma heating in Tuman apparatus

06 p0963 A69-16906

Solar flare eruptions due to current disruption, leading to magnetic energy transfer from whole current circuit to very small volume

06 p0995 A69-17444

Alternated magnetic field effects on lasing in ionized Ar

06 p0934 A69-17467

Plasma flute instability in magnetic trap with wall/plasma interface, using system of sensors and amplifiers

06 p0966 A69-17544

Ion laser emission cessation with increasing pressure, magnetic field and current strength due to lower transition level lifetime increase

06 p0934 A69-17682

VLF radiation bursts /July-October 1966/ in U.S.S.R., noting detection probability increase with increasing magnetic activity

06 p0920 A69-17731

Magnetic activity dependence of VLF emission properties at magnetically conjugate points

06 p0920 A69-17735

Damping boom flutter and magnetic dipoles effects on attitude stability of gravity gradient satellites with three axis stabilization

07 p1227 A69-18332

Output polarization rotation sensitivity to axial magnetic field varied by variable angle quartz flat inside He-Ne laser resonator

07 p1198 A69-18646

Equatorial hourly storm time part of disturbances field for 1958, discussing magnetic storm effects

07 p1124 A69-18822

Hot plasma containment by magnetic field, presenting results from stellarator for toroidal sheared magnetic field properties

07 p1190 A69-18929

Axisymmetric turbulent conducting fluid jet propagation in longitudinal magnetic field without induction

07 p1192 A69-19019

Kelvin-Helmholtz instability for interface between two uniform superposed fluids with constant densities and velocities in horizontal motion in oblique magnetic field

07 p1182 A69-19274

Rayleigh-Taylor instability for interface between two uniform superposed fluids under combined effect of horizontal and vertical magnetic fields

07 p1182 A69-19275

Electron plasma and magnetic field effects on polaritons in semiconducting GaAs studied by Raman scattering of light at small angles

07 p1200 A69-19401

Gas breakdown in HF uniform electric field with/without steady transverse magnetic field

07 p1194 A69-19415

Unsteady MHD convective flow with suction of viscous incompressible electrically conducting fluid above vertical porous wall, noting horizontal magnetic field effect

07 p1195 A69-19477

Turbulent incompressible MHD flow between two parallel smooth plates in transverse magnetic field, determining magnetic Reynolds number

07 p1195 A69-19736

Electron anomalous magnetic moment effect on nonlinear Lagrangian of electromagnetic field, deriving additional nonlinear corrective term

08 p1353 A69-19781

Stability of plane vortex sheet in magnetic fields, noting stabilization effect of compressibility for nonmagnetic case

08 p1358 A69-19797

Primordial magnetic field effects on spatially homogeneous cosmological models with anisotropic Euclidean metric

08 p1383 A69-20049

Earth internal magnetic field effects on cosmic ray measurements, dipole approximation and effect of external sources

08 p1378 A69-20219

Behavior of bounded and free arc discharges under action of transverse magnetic fields and gas flows

08 p1366 A69-20767

Impurity elimination from hydrogen plasma jets injected from coaxial source normal to octupole magnetic field

08 p1370 A69-21016

Longitudinal polarization behind front of plasma flow interacting with transverse magnetic field, showing electric potential and magnetic field exhibit structural fluctuations

08 p1370 A69-21018

Ion-acoustic wave excitation in plasma layer affected by incident p-polarized magnetic wave, deriving expressions for reflection, transmission and energy absorption coefficients

08 p1370 A69-21025

MGD stagnation point flow, discussing relaxation region influenced by magnetic field

09 p1543 A69-21300

Eleven year cyclicity of geomagnetic activity from Sverdlovsk Observatory data, noting possible relation with structural features of solar activity cycles

09 p1486 A69-21552

Antiferromagnetic semiconductor transformation into metal in magnetic field

09 p1556 A69-21672

Stark broadening of Balmer H alpha, H beta, H gamma and H delta lines in plasma region in strong magnetic fields

09 p1542 A69-22248

Plasma cavity shape formed by magnetic field effect due to several parallel line currents

09 p1553 A69-22569

HF magnetic field effect on oscillations and instabilities of plasma confined by fixed magnetic field

10 p1739 A69-23623

Fe-Fe interactions influence on increase in thermoelectric power with applied magnetic field at low temperatures for dilute alloys of Fe in Au

10 p1639 A69-23861

Coupling coefficients for integral charged component of cosmic rays determined from measuring azimuthal geomagnetic effect on rays observed in crossed telescopes

10 p1770 A69-23925

Velocity profiles of turbulent plasma flow in circular tube during application of longitudinal homogeneous magnetic field

11 p1922 A69-24234

He-Ne laser radiation frequency spectrum as function of transverse magnetic field determined by photoheterodyne method

11 p1894 A69-24622

Auroral infrasonic waves morphology related to temporal and spatial distributions of supersonic auroral motions during polar magnetic storms

11 p1878 A69-25152

MHD free convection from horizontal isothermal plate in vertical uniform magnetic field, considering boundary layer thickness

11 p1930 A69-25277

Magnetic field effects on rotational MHD flow in container, noting Taylor-Proudman theorem, Ekman layers and vertical Stewartson boundary layers

11 p1930 A69-25279

Magnetic anomalies off Cape Hatteras explained as possible edge effect, discussing ocean and continental magnetic crusts and igneous and magnetic rocks

11 p1879 A69-25405

Magnetically selective microwave filters using magnetodynamic natural oscillations in premagnetized ferrite sphere at cavity center

11 p1855 A69-25626

Electromagnetic wave propagation cut-off in slightly noncompensated electron hole plasma, discussing wave evanescence above critical magnetic field value

12 p2133 A69-25926

Power output of He-Ne laser as function of transverse magnetic field strength

12 p2104 A69-26023

Laser diode output efficiency increased in presence of transverse magnetic field suppressing higher order TE and TM modes

12 p2039 A69-26353

Ion cloud ambipolar diffusion and motion dependence on initial configuration and close magnetic field alignment above 95 km, discussing observations of meteor trains

12 p2074 A69-26961

Coherent radio emission mechanism in quasars and supernova remnants, discussing magnetic effects

12 p2168 A69-27050

MHD Stokes flow for rotating disk in parallel magnetic field, showing Lorentz force inhibiting effect on fluid motion

13 p2305 A69-27325

Magnetic curvature effect on collisionless plasma density gradient drift instabilities, covering mean ion larmor radius and Alfvén modes

13 p2305 A69-27375

Stationary magnetic field effect on sum and difference frequency generation due to nonuniform RF electric fields applied externally to plasma

13 p2305 A69-27376

Electron gas behavior in nondegenerate envelope of magnetic white dwarf, discussing increased opacity due to magnetic fields

13 p2343 A69-27624

Applied magnetic field effects on longitudinally magnetized reciprocal ferrite phase shifters, showing shift type dependence on guide electrical thickness

13 p2229 A69-27673

Local stability of rotating stars in toroidal and poloidal magnetic fields, using linear stability analysis

13 p2346 A69-27707

Cadmium arsenide carriers effective mass under strong transverse magnetic field, noting restricted role of thermal EMF and Hall coefficients

13 p2318 A69-27897

Soviet monograph on design and theory of linear induction pumps for liquid metals covering electromagnetic phenomena, optimized dimensions, etc

13 p2209 A69-27926

Fluctuations in electric field induced by plasma flow in constant magnetic field, performing spectral analysis of voltage and current fluctuations in plasma

13 p2310 A69-28029

Deuterium plasma jets passage through pulsed magnetic field by means of thermal and diamagnetic probes, noting magnetic field strength effect
13 p2311 A69-28107

Plasma jets tangential injection into toroidal magnetic field, discussing polarization interaction and depolarization effect
13 p2311 A69-28108

High pressure AC arc heater system design criteria, discussing magnetic field, chamber gas flow, stabilizing elements, etc
[AIAA PAPER 69-348] 13 p2243 A69-28283

Magnetized plasma waveguide dispersion characteristics using Maxwell equations, stressing interaction of electron beam with wave modes
13 p2315 A69-28571

Magnetic and electric field effects on undamped electron-hole LF frequency plasma oscillations in spatially homogeneous nonpolar semiconductor
13 p2323 A69-28581

Biological effects of low magnetic field environments studied by physiological, visual and psychological tests on animal, plant and human subjects
13 p2211 A69-28596

Superconductivity methods to neutralize ambient magnetic field by free electrons motion for nonmagnetic environments
13 p2244 A69-28604

Magnetic damping of homogeneous cylindrical satellite rotation about transverse axis
14 p2530 A69-29065

Potential distribution between point in interelectrode gap and thermionic converter cathode in collisionless mode under transverse magnetic field
14 p2401 A69-29235

Peltier measurements below 4 K capable of measuring low Seebeck coefficient on high resistivity alloys and in presence of magnetic field
14 p2449 A69-29563

Longitudinal electric field penetration into plasma slab in constant magnetic field
14 p2493 A69-29665

Magnetic field effect on heat and mass transfer in incompressible fluid MHD flow
14 p2500 A69-29901

Pressure drop fluctuations amplitude and frequency effect on channel resistance and magnetic field effect on fluctuations intensity in laminar conducting fluid flow
14 p2501 A69-29909

Longitudinal pressure distribution in MHD channel with electrodes parallel to applied transverse magnetic field
14 p2501 A69-29918

Conductivity tensor of collisional plasma in magnetic field, basing method on iterative procedure
14 p2503 A69-29999

Electrical conductivity tensor of many component collisional relativistic plasma in magnetic field and near equilibrium, expressing collisional part as momentum integral
14 p2503 A69-30000

Ambipolar to free diffusion transition in magnetized slab plasmas, discussing basic equations, iterative numerical procedure, characteristic parameters and H plasma
15 p2657 A69-30023

Electron densities measurement in plasmas in magnetic fields from profiles of spectral lines, noting Stark and Zeeman effect
15 p2657 A69-30027

Disaccommodation component of magnetic aftereffect causing dynamic absorption of HF magnetic energy in ferrites
15 p2665 A69-30038

Shield facility and Helmholtz coil system used to investigate chromic effects on man of zero magnetic field regulated to cancel geomagnetic field variations
15 p2586 A69-30382

Stagnation flow of viscous fluid against rotating magnetized disk, determining effects on magnetic and velocity fields, currents and shear stresses
15 p2659 A69-30674

X pocket Fermi surface of ferromagnetic Ni, considering magnetic breakdown effects
15 p2668 A69-30687

Magnetic field effect on neutron beta decay rate, considering calculations applicability to elementary particle production
15 p2690 A69-30694

Temperature and density models for coronal green line enhancements with and without magnetic field effects, using graded height spectrograms
15 p2693 A69-30782

MHD stability and equilibrium of toroidal high beta configurations achieved by superimposing oscillating magnetic field on linear plasma column
15 p2660 A69-30877

Atmospheric density dependence on solar and geomagnetic activity at low latitudes, discussing atmospheric expansion
15 p2605 A69-31441

Lattice component of heat conductivity in n-type cadmium arsenide at low temperatures by suppressing electron component of conductivity with strong transverse magnetic field
16 p2824 A69-31568

Magnetic field effect on thermal convection onset in compressible polytropic atmosphere compared with results from thin layer approximation
16 p2855 A69-31658

Radar Thomson scatter from nonthermal steady state level of plasma waves in ionosphere measured, studying role of angle between wave vector and magnetic field
16 p2818 A69-31678

Physics of solids in intense magnetic fields - Conference, Chania, Crete, July 1967
16 p2826 A69-31819

Magnetoquantum-electric effect, analyzing center motion of cyclotron orbit during photon and phonon absorption and current quantity
16 p2826 A69-31823

External magnetic force and internal Coulomb force influence on carriers in conduction or valence band of semiconductor, considering H atom spectra
16 p2826 A69-31824

Magnetic field effects on ultrasonic propagation in high field superconductors
16 p2826 A69-31825

Hydrodynamic parameters of annular Couette flow in longitudinal magnetic field for variable Reynolds and Mach numbers
16 p2821 A69-31953

Auroral absorption occurrence patterns mappable onto magnetotail developed as function of magnetic activity, discussing magnetotail neutral sheet source width changes
16 p2848 A69-31968

Self consistent ring current of radiation belt under combined influence of earth dipole field and field due to currents of particle motions
16 p2776 A69-32096

Plasma cluster interaction with axially symmetric magnetic field, deriving plasma diamagnetic current, inductance and resistance from measured coil flux dependence on distance
16 p2823 A69-32365

Eleven year cyclicity of geomagnetic activity from Sverdlovsk Observatory data, noting possible relation with structural features of solar activity cycles
16 p2784 A69-32547

Nonequilibrium ionized gas flow past insulated wall with corners under magnetic field, discussing flow characteristics
17 p3010 A69-32865

Geomagnetic field effects on microwave noise spectrum in earth-ionosphere resonator, calculating field energy spectrum near resonance maximum, discussing excitation by lightning
17 p2918 A69-33034

Splintering loop prominences, noting 7 October 1967 prominence interpretable as ejected prominence streamer capture by transverse magnetic fields of loop
17 p3029 A69-33052

Earth quadrupole moment effects on precession of gyroscope in satellite in equatorial orbit
17 p2972 A69-33072

Flywheels desaturated by magnetic action for optimizing stabilization system of satellite in circular orbit [ONERA-TP-732] 17 p3049 A69-33241

Magnetic field effects on rotating cone compressible boundary layer at zero angle of attack, describing changes in drag coefficient, torque and velocity profiles [AIAA PAPER 69-721] 17 p2892 A69-33484

Transverse magnetic field effect on shear turbulence structure of magneto-fluid-mechanic pipe flow with and without heat transfer [AIAA PAPER 69-723] 17 p3012 A69-33497

Ta type I and II wire resistance in transverse magnetic field during superconducting to normal transition, discussing strain and impurity effects
17 p3016 A69-33791

Collisionless plasma heating mechanisms from current layer turbulence in theta pinch experiment and shock wave front structure as function of initial magnetic field
17 p3013 A69-33824

Wave propagation in plasma filled cylindrical waveguide in axial magnetic field, approximating plasma density profile by WKB method
17 p2926 A69-33848

Magnetic activity influence on polar auroras height
17 p2963 A69-33953

Diurnal sporadic E layer height variations analyzed for singularities in height peak behavior as function of geography, season and magnetic activity
17 p2968 A69-33996

Geomagnetic field latitudinal variation effect on cutoff frequencies of proton whistlers, discussing LF electromagnetic wave propagation in cold multicomponent plasma
18 p3100 A69-34253

Magnetic declination effect on F 2 layer critical frequency diurnal variations attributed to vertical ionospheric drift due to neutral air winds
18 p3126 A69-34256

Quiet solar wind model with magnetic field numerically calculated, obtaining coronal electron densities and angular momentum near earth
18 p3186 A69-34301

Elastic beam-plate vibration natural frequency and dynamic instability in transverse static or oscillating magnetic field [ASME PAPER 69-APM-B] 18 p3215 A69-34400

Microwave reflection and noise emission from cylindrical rare gas afterglow plasmas in axial magnetic field measured near electron cyclotron resonance
18 p3127 A69-34436

Trapped particle acceleration by random bimodal diffusion in inhomogeneous magnetic field accounting for high energy particles trapped in earth radiation belts
18 p3186 A69-34808

Whistler vertical propagation downwards through inhomogeneous ionosphere in vertical magnetic field, deriving wave equation, calculating transmission and reflection coefficients
18 p3130 A69-34972

Magnetic field effect on Gunn diode vibrations and LF oscillations, noting increase in threshold field and decrease in threshold current
18 p3183 A69-35267

Equilibrium state of diamagnetic plasma configuration in inhomogeneous magnetic fields with complex potential near neutral point, noting solar flares and magnetic traps
19 p3380 A69-36467

Gravitational stability of infinite conducting fluid cylinder in axial magnetic field and surrounded by fluid of different density
19 p3380 A69-36483

Magnetic field effects on emission line shift, threshold current and power output of GaAs injection laser, discussing spontaneous radiation in magnetic field
19 p3387 A69-36529

GaSb p-n injection laser output at 4.2 K in strong transverse magnetic field, deducing effective mass and g-factor from stimulated emission peak shift
19 p3387 A69-36530

Anomalous phenomenon in resistance and magnetoresistance of cleaved InAs surface, plotting temperature and magnetic field variation effects, proposing explanation of anomaly
19 p3388 A69-36543

Hot electron behavior in n-type InSb under magnetic fields at 4.2 and 1.7 K, plotting current-voltage and current-Hall voltage characteristics, etc
19 p3388 A69-36544

Unsteady laminar MHD flow of electrically conducting viscous fluid between porous coaxial circular cylinders under radial magnetic field
20 p3581 A69-36912

Structure of isolated MHD shock wave in viscous heat-conducting radiating gas finite electrical conductivity and transverse magnetic field
20 p3581 A69-37189

He-Ne laser output intensity saturations in presence of axial magnetic field, noting moving and fixed minima
20 p3553 A69-37433

Plasma ion and electron concentration perturbations in wake of body moving at high velocity in collisionless plasma under steady magnetic field
20 p3459 A69-37659

F zero layer occurrence relation to solar, magnetic and ionospheric activity levels variations from Ashkhabad observations /1958- 1964/ 20 p3527 A69-37671

Alternated magnetic field effects on lasing in ionized Ar
20 p3555 A69-37950

Flares and fast processes interrelation with active region stationary filaments, filament field magnetic envelope explosion stimulation of surges, plasma stream ascents, etc

20 p3591 A69-38042

Radial diffusion coefficient calculation in presence of magnetic shell splitting in magnetosphere

20 p3534 A69-38094

Polarized radiation resonance scattering in weak uniform magnetic field, using Monte Carlo method to trace and count photons

20 p3577 A69-38157

Incompressible electrically conducting fluid in presence of magnetic field and Coriolis forces, analyzing Rayleigh-Taylor instability by variational principles

20 p3577 A69-38195

Luminous tenuous collimated electron beam from plume of MPD arc in fiberglass vacuum tank, examining beam trajectory in geomagnetic fields

20 p3582 A69-38236

Normal ionizing shock waves in H, analyzing shock velocities as function of drive magnetic field using Chapman-Jouguet hypothesis

21 p3691 A69-38332

Momentum and energy equations for fluctuating flow of viscous incompressible conducting fluid past flat plate with time dependent suction under transverse magnetic field

21 p3691 A69-38445

Magnetic activity effects on horizontal drifts, anisotropy and random change characteristics of E region ionization irregularities

21 p3715 A69-38561

Parameters of DC discharge between concentric cylinders calculated for plasma probes by pressure theory, noting ion neutral collisions and magnetic field effects

21 p3776 A69-38712

Electromagnetic wave reflection and transmission from boundary between semiinfinite plasma and air by applying static magnetic field

21 p3672 A69-38743

Current carrier concentration and magnetic field as factors influencing laser frequency resonance mixing in semiconductors with narrow forbidden bands

21 p3737 A69-38998

Plane electromagnetic waves penetration into ferromagnetic medium with permeability increasing with magnetic field, showing nonlinearity effect

21 p3771 A69-39109

Multimode He-Ne laser radiation polarization modulation as function of magnetic field, cavity anisotropy and frequency, using Macaluso-Corbino effect

21 p3739 A69-39447

Uniformly and differentially rotating stars taking into account magnetic fields effects, discussing radiative and hydrostatic equilibrium in nonspherical configurations, stellar atmospheres, etc

21 p3812 A69-39519

Microwave absorption by Ar plasma of positive column discharge in waveguide under inhomogeneous magnetic field

21 p3778 A69-39547

Magnetic declination effect on altitude of top of F 2 ionospheric layer at midlatitudes using M/3000/F 2 transmission factor

21 p3717 A69-39577

MHD pivoted slider bearing with convex pad surface under azimuthal magnetic field

21 p3733 A69-39744

Geomagnetic field and aerodynamic perturbation effects on satellite motion about center of mass, using asymptotic methods of nonlinear oscillation theory

21 p3830 A69-39835

Manned relativistic space flight limitations dependence on biomagnetic levitation of human body in inhomogeneous magnetic field to compensate inertial forces during acceleration

22 p3889 A69-39906

Magnetoplasma with Maxwellian velocity distribution, investigating quantitatively longitudinal dielectric function

22 p3988 A69-40066

Turbulent Hartmann flow between rough walls in transverse magnetic field, determining field influence on resistance coefficient

22 p3989 A69-40255

Laminar MHD flow in porous walled channel in transverse magnetic field, determining velocity distributions, induced fields and current over channel cross section

22 p3989 A69-40256

Magnetic field inhomogeneities effect on line contours and magnetographic measurements, constructing

two stream models using Unno solution of transfer equations

22 p4019 A69-40288

Variable magnetic field effect on rotation of solar outer layers, applying to spectroscopic observations of rotation velocity at solar limb

22 p4019 A69-40293

Hypersonic flow for low Reynolds number, including magnetic field and wall temperature effects on heat transfer and skin friction for blunt shapes

22 p3860 A69-40540

Pitch angle distribution of cosmic ray electrons in decreasing magnetic field for waves in ionized plasma, noting anisotropy due to synchrotron radiation

22 p4006 A69-40642

Aligned uniform magnetic field effect on hydromagnetic stability of two dimensional incompressible electrically conducting jet flow with large Reynolds number

22 p3931 A69-40687

Pulsar magnetic models, coherent radio emission mechanisms, radiation polarization, data summary and astrophysical nature

22 p4030 A69-40905

Primordial He 3 and deuterium production from magnetic effects during nucleosynthesis epoch of big bang cosmologies

22 p4035 A69-41210

Hydrodynamic stability of conducting fluid in external magnetic field subject to attraction of external spherically symmetric gravitational field

23 p4213 A69-41717

Equilibrium plasma configurations in magnetic field of two dimensional dipole analyzed under similar conditions to magnetospheric tail formation with neutral hot plasma layer

23 p4205 A69-41835

Magnetic activity effect on electron density in topside ionospheres determined from Alouette 1 data statistical analysis

23 p4156 A69-41856

Day-to-day changes of cosmic ray diurnal variation measured on meson and neutron components, showing relationship with interplanetary magnetic field

23 p4206 A69-42012

Homogeneous axisymmetric anisotropic cosmological models, analyzing magnetic fields and initial anisotropies effect on 3K radiation and primordial He production

23 p4222 A69-42402

Time dependent unsteady flow of incompressible and electrically conducting fluid between two infinite disks rotating in uniform axial magnetic field

23 p4153 A69-42410

Parallel magnetic field effect on free boundary layer type flows stability of low Reynolds number between parallel streams of viscous incompressible conducting fluid

24 p4298 A69-42596

Magnetic dipole field variations effects on planetary atmosphere erosion by solar wind, discussing Mars and Venus atmospheres above ionosphere

24 p4385 A69-43224

Magnetic and electron temperature interaction effects in fast MHD shock waves in slightly ionized plasma

24 p4356 A69-43361

Self induced magnetic field influence on plasma positive column stability in longitudinal magnetic field

24 p4356 A69-43366

Moving plasma partial capture in transverse magnetic field in experimental plasma source, noting influence of repulsion effect of plasma polarization volume charge

24 p4357 A69-43469

Drift characteristics of hydrogen plasma partially captured by transverse magnetic field, finding drift rate dependence on magnetic field level

24 p4357 A69-43470

Polarization induced oscillations in forward portion of plasma flux crossing magnetic field, showing variations in maximum longitudinal potential of plasmoid

24 p4358 A69-43471

Hydrogen plasmoids in axisymmetric magnetic field with acute angle geometry produced by opposing coils, measuring induction current field and plasmoid density distribution

24 p4358 A69-43473

Time-variable pulsed transverse magnetic field used to cut off tails of plasmoids ejected from conical Plexiglas plasma gun into curvilinear magnetic field

24 p4358 A69-43476

Magnetic field energy supply to solar flares from consideration of energies in solar active regions

24 p4370 A69-43606

MAGNETIC EQUATOR

North-south ionospheric drift velocities near magnetic equator, noting marked seasonal characteristics and diurnal variations

01 p0062 A69-10138

Explorer 26 observations of solar proton penetration inside trapped radiation near geomagnetic equator

01 p0146 A69-11122

Solar eclipse effects on ionospheric conductivity and geomagnetic field at and near dip equator observed at Huancayo, Peru

02 p0241 A69-11728

F 2 layer equatorial anomaly at local noon, discussing position of trough center in latitudinal distribution of ionization

03 p0422 A69-13515

Diurnal variations of neutral and charged particle temperatures in equatorial F region

05 p0755 A69-16270

Vertical ionospheric motions near magnetic equator measured by Doppler shifts of incoherent scatter frequency spectra

09 p1489 A69-21704

Nighttime electric fields and vertical ionospheric drifts near magnetic equator concurrent measurements

09 p1489 A69-21705

Geomagnetic pulsations recorded in equatorial regions of Africa found continuous and not pearl modulated

09 p1491 A69-22051

Equatorial electrojet role in electromagnetic induction at magnetic dip equator, applying Price theory for space gradients

13 p2252 A69-27519

Diurnal variation of cosmic ray muon intensity near geomagnetic equator and primary anisotropy monitored by cubical counter telescope

14 p2512 A69-28966

Lunar tidal variations of electron concentration in F 2 region near magnetic equator showing large latitudinal dependence

16 p2776 A69-32090

Lower ionosphere electric fields and currents vertical profiles above geomagnetic equator under quiet geomagnetic conditions from rocket data

20 p3521 A69-37053

Lower ionosphere over geomagnetic equator during evening twilight characterized by solar disturbances, using rocket-borne Langmuir and plasma noise probes

21 p3702 A69-38353

Primary H nuclei flux and spectrum near geomagnetic equator, discussing emulsion stack exposure

22 p4005 A69-40520

Equatorial E sub sq and daytime blanketing sporadic E occurrence frequencies compared in magnetic equatorial zone, considering diurnal, seasonal, latitudinal and vertical variations

23 p4160 A69-42426

Magnetic dip equator position at E layer and gradient with time and altitude, using geomagnetic field models

23 p4160 A69-42428

VHF radio propagation over transequatorial circuit related to equatorial anomaly in F layer, suggesting F2/F2 propagation mode role

23 p4127 A69-42431

Ionospheric heating and velocity dependence of collision cross sections on transversely propagated equatorial hydromagnetic waves, discussing ordinary and extraordinary modes

23 p4161 A69-42437

NT TRAPPED MAGNETIC FIELDS

Gas laser amplifier nonlinear behavior in axial magnetic fields and operating with two polarized light signals of strong or weak intensities

01 p0088 A69-10010

Megagauss magnetic field generation methods, discussing high explosives, initial field, flux compression, capacitor discharges and applications

01 p0115 A69-10049

Viscous electrically conducting fluid with aligned magnetic field flowing past flat plate at nonzero angle of attack

01 p0126 A69-10163

Electromagnetic wave propagation in superconductors, noting transmission line structure variation with magnetic fields and current and suitability for parametric amplifiers

01 p0135 A69-10176

Couette flow stability in axial magnetic field, considering time bounded perturbation energy during increasing angular velocity in radial direction

01 p0059 A69-10233

Nonlinear hydromagnetic solitary wave propagation at angle to magnetic field in fully ionized quasi-neutral collisionless warm plasma, noting isotropic pressure effect

01 p0127 A69-10336

Symmetrically truncated right angle E-plane corner, placing electric and magnetic walls in symmetry plane, solving resulting boundary value problems

01 p0044 A69-10624

Axial magnetic field effect on exploding wire phenomenon, studying direct interaction

01 p0118 A69-10660

MHD equations describing interactions between gases and magnetic fields solved by finite difference method

01 p0129 A69-10722

Particle moving in circular orbit perpendicular to axis of cylindrically symmetric magnetic field

01 p0120 A69-10816

Magnetic field data from OGO-2 spacecraft and surface magnetic observatories, noting magnetic storm occurrence and magnetospheric inflation and detection of polar ionospheric currents

01 p0069 A69-11125

MHD flow through circular, elliptic and rectangular straight channels with external magnetic field transverse to flow direction

01 p0132 A69-11209

Resistive spherical plasma expansion into external magnetic field noting magnetic stream function

01 p0132 A69-11211

Ion acoustic wave dispersion in highly ionized Ar plasma in longitudinal magnetic field, noting effects of several phenomena

01 p0133 A69-11216

Ring current particle energy density distribution for symmetric portion of magnetic storm derived from current magnetic field profile measurements

01 p0147 A69-11227

Electromagnetic wave propagation across magnetic field under relative streaming motion, noting plasma frequency cut-off

01 p0134 A69-11247

Transverse plasma velocity component effect on boundary layer structure between cold plasma and confined magnetic field

02 p0235 A69-11424

Electric discharge in gas flow with magnetic field, showing varying charged particle density as function of argon-caesium pressure

02 p0285 A69-11570

Charged particle motion caused by ELF electromagnetic waves in presence of constant magnetic field, noting earth ionosphere application

02 p0240 A69-11712

Instability of longitudinal plasma waves propagating across magnetic field in plasma with electrons and ions drifting with different velocities across field

02 p0286 A69-11830

Hydromagnetic stability of free boundary layer between two uniform streams in presence of aligned uniform magnetic field at large Reynolds number

02 p0287 A69-11832

General structure of magnetic surfaces of 3-turn helical magnetic field with axial current flow, noting closed magnetic trap production

02 p0288 A69-12168

Equations for studying plasma stability in sheared magnetic field examined for normal mode and wave packet perturbations

02 p0289 A69-12173

Electromagnetic wave scattering by turbulent plasma pulsations in external magnetic field

02 p0289 A69-12174

Current carrying curved plasma column flute instability analysis, noting effect of increasing divergence from axial symmetry on Q values

02 p0289 A69-12175

Wave measurements of normal electric field and tangential magnetic field over microwave disk antenna surfaces

02 p0219 A69-12342

Criterion for magnetic plasma stability near magnetic axis, noting parameters for deriving criterion integrand

02 p0290 A69-12355

Characteristic time on motion of magnetic lines of force in medium with Hall effect

02 p0290 A69-12399

Plasma stability under anisotropic pressure in axisymmetric magnetic fields determined by quasi-hydrodynamic approximation

02 p0291 A69-12552

Plasma diagnostics in magnetic field with thin cylindrical probe based on Langmuir method

02 p0292 A69-12556

Plasma jet motion in time constant and time variable magnetic fields noting particle deflection, polarization loss, capture and cut-off

02 p0292 A69-12558

Electromagnetic wave propagation in metals in magnetic field, noting helicon waves, magnetoplasma waves, waves with discrete spectrum or near cyclotron resonance and quantum phenomena

02 p0299 A69-12565

Magnetic field effect on amplitude, frequency and form of LF oscillations in Gunn diodes

02 p0222 A69-12684

Transverse magnetic field influence on power and polarization of helium-neon laser emission

02 p0260 A69-12844

Magnetic shear effect on stability of electron-neutral collision dominated plasma, noting helical perturbations onset

03 p0473 A69-12925

Transport phenomena in crossed electric and strong magnetic fields, developing semiclassical and quantum treatments

03 p0473 A69-12926

Axial magnetic field effect on steady linear Ekman boundary layer

03 p0474 A69-13141

Cylindrical jet stability of perfectly conducting, incompressible and inviscid fluid in presence of axial magnetic field

03 p0474 A69-13142

Ion-ion velocity space instability due to difference between ion temperatures perpendicular and parallel to magnetic field

03 p0475 A69-13154

Electric effect in ruby, discussing resonance magnetic field and transition

03 p0485 A69-13320

Nonlinear interaction of steady state circularly polarized electromagnetic wave with cold plasma in constant longitudinal magnetic field

03 p0476 A69-13381

Electromagnetic wave propagation in nonlinear media with permittivity dependent on modulus of magnetic field

03 p0396 A69-13707

Two band model for determining linear and nonlinear electromagnetic responses of small band gap semiconductors in magnetic field

03 p0487 A69-13753

Space charge plasma acceleration in axially nonuniform magnetic field

03 p0477 A69-13760

Boundary layer equations for uniform motion of semiinfinite flat plate through incompressible conducting fluid at rest and in magnetic field, using numerical method

03 p0477 A69-13794

Plasma transverse injection into toroidal magnetic field created by linear current leads to plasma confinement along magnetic force lines

03 p0478 A69-13837

Diffusion across magnetic field of unstable plasma with highly inhomogeneous density

03 p0478 A69-13840

Magnetoelastic vibrations of fluid filled cylindrical cavity in infinite solid medium in presence of uniform axial magnetic field

03 p0528 A69-13927

Upper bound for free energy of nonlocal superconductor in magnetic field, using variational method and perturbation theory

03 p0491 A69-13971

Acceleration of charged particles in strong DC magnetic field by electrostatic waves with spatially varying phase velocities integrated numerically on IBM 360/65

03 p0479 A69-14028

Electron viscosity coefficient in weakly turbulent plasma in strong magnetic field, noting electrical and thermal conductivity

03 p0480 A69-14136

Uniform external magnetic field effect on electric potential distribution within ion-electron beams near planar emitting surface

03 p0482 A69-14214

Charged particles motion in spatially modulated magnetic field solved using modification of Krylov-Bogoliubov asymptotic method

04 p0633 A69-14297

Asymptotic method for studying charged particle motion in spatially modulated magnetic field

04 p0634 A69-14298

Discontinuities in plasma situated in magnetic field, noting drift of quasi-neutral inhomogeneities of electron and ion density

04 p0634 A69-14431

MHD instability in current discharges in magnetic field stabilized by current frequency modulation higher than perturbation increment of plasma column

04 p0635 A69-14549

Magnetic field effects on heat transfer between Ar plasma flow and channel wall, noting effects of temperature and Reynolds number

04 p0636 A69-14989

Transverse magnetic field effect on three dimensional nonisothermal lubrication layer of conducting gas at small magnetic Reynolds number

04 p0607 A69-14990

Electromagnetic wave propagation in uniform anisotropic plasma, considering wave vectors perpendicular to magnetic field

04 p0637 A69-15048

Collapsing cylindrical ionizing shock in axial magnetic field, solving governing equations numerically

04 p0637 A69-15049

Transverse ionizing MHD shock waves, discussing jump conditions with magnetic field in shock plane

04 p0637 A69-15052

Magnetic lines curvature behind pseudostationary hydromagnetic shock determined, assuming parallel magnetic field and velocity vectors

04 p0638 A69-15092

Local hydromagnetic mechanism to increase magnetic fields and shape into bipolar sunspot group configuration, discussing applicability to solar atmosphere

04 p0662 A69-15243

Longitudinal and transverse magnetoresistance in n-type InSb single crystals in magnetic fields, noting preparation effect on existence magnetophonon oscillations

04 p0643 A69-15262

Vector potentials for Dirac equation derived assuming time independent external magnetic field without scalar potential

04 p0638 A69-15273

Space-time function for joint probability distribution of velocity and magnetic fields from hydromagnetic turbulence equations

04 p0638 A69-15277

Spherical shock wave propagation in polytrope with poloidal magnetic field, noting application to shock waves in magnetic stars

04 p0664 A69-15438

Magnetic field confinement of plasma produced by focusing Q switched laser output on solid deuterium pellet

05 p0798 A69-15585

Flow of two conducting immiscible liquids between parallel porous moving plates under transverse magnetic field

05 p0743 A69-15600

Boltzmann equation for weakly ionized gas electron component, solved by transformation to integral equation, applied to Lorentz gas in alternating electric field

05 p0795 A69-15619

Weak magnetic fields effect on molecular oscillator frequency taking into account Zeeman sublevels

05 p0727 A69-15643

MHD flow in square cross sectional channel in transverse magnetic field with conducting walls parallel to magnetic field

05 p0799 A69-15697

Fermi surface topology effects on Nernst-Ettingshausen coefficient from measurements in magnetic fields to 3.3 tesla and 1.2-4.2 K temperatures in metallic tin

05 p0808 A69-16357

Collision induced instability of partially ionized gases having large Ramsauer effect in external magnetic field, analyzing nonlinear characteristics

05 p0804 A69-16441

Effective collision frequency deduced from ratio of microwave conductivity to electron density in PIG discharge plasma

05 p0804 A69-16442

RF electron heating by beam-plasma interaction in uniform magnetic field

05 p0804 A69-16458

Viscous electrically conducting liquid flow through insulating porous medium in presence of transverse magnetic field in region of validity of Darcy law

05 p0805 A69-16603

Magnetic fields role in neuropsychiatric and physiological experiments, noting effect on phagocyte activity

05 p0715 A69-16627

Critical electron drift velocity threshold in surface wave amplification in semiconductor in magnetic field, noting partial effect of diffusion

05 p0810 A69-16648

Optimum magnetic field axial component and plasma gun discharge voltage for high velocity plasma injection into symmetrical cusp field

05 p0805 A69-16655

Electron plasma interaction with transverse EM wave propagating along magnetic field, calculating permittivity, density, field strength and applied frequency

05 p0805 A69-16699

Coaxial Hall plasma accelerator, noting interaction between radial applied magnetic field and axial applied electric field

05 p0806 A69-16734

Relationship between microhardness of niobium and other variables characterizing superconductivity

05 p0810 A69-16805

Spatial dispersion of electromagnetic waves reflection from moving plasma layer in magnetic field, determining transmission and energy absorption coefficients

06 p0886 A69-16895

Hydrodynamic and lattice vibrations equations for coupled waves in ion semiconductors in external electric and magnetic fields, observing sound amplification

06 p0978 A69-16897

Bounded and spatially separated plasmas wave oscillations stability in magnetic field, observing hydrodynamic slipping and drift instability

06 p0963 A69-16903

Transverse magnetic field effect on ohmic plasma heating in Tuman apparatus

06 p0963 A69-16906

Plasma confined in transverse magnetic field analyzed for drift rates, noting role of injection direction

06 p0963 A69-16907

Zeman effect in He-Ne lasers during simultaneous emissions at various gas pressures and currents in magnetic fields

06 p0932 A69-16912

Molecular and atomic beam focusing in electric and magnetic fields with helical symmetry of specified type

06 p0959 A69-16917

Hall effect and magnetoresistance for compensated n-InP samples, discussing dependence on magnetic field

06 p0978 A69-16987

Soviet satellite exploration of space magnetic fields and charged particles, noting Proton satellites and protons and carbon nuclei inelastic interactions

[UN PAPER 68-95768] 06 p0986 A69-17031

Magnetobremstrahlung /synchrotron/ and Cerenkov radiation of ultrarelativistic particles, radiation reabsorption and magnetic field measurement

06 p0962 A69-17245

Radio spectrum and cosmic ray electron data evaluated concerning conditions in Galaxy, deducing mean magnetic fields

06 p0991 A69-17309

Particle radiations and magnetic fields in metagalaxy, discussing galactic injection spectrum problems

06 p0991 A69-17310

Ionized plasma electrical conductivity in magnetic field calculated by supplementing BGK collision terms with Vlasov equation

06 p0965 A69-17482

Cusp magnetic field stabilizing superimposition on toroidal plasma discharge in polytron machine, noting role of Hall acceleration mechanism

06 p0965 A69-17514

Resonance particle effects on flute oscillation kinetic stability when resonance particles drift under influence of magnetic field inhomogeneity

06 p0965 A69-17516

Closed analytic expressions for vector potential and magnetic field generated by axisymmetric multipole line currents

06 p0965 A69-17518

Department of Defense Gravity Experiment /DODGE/ attitude stabilization simulation with time-lag magnetic damping

06 p1014 A69-17584

Ion laser emission cessation with increasing pressure, magnetic field and current strength due to lower transition level lifetime increase

06 p0934 A69-17682

Automatic closed loop distortionless control of magnetic field modulation using light sensitive resistor as one leg of attenuator

06 p0897 A69-17708

Enhanced microwave scattering by plasma instability in magnetic field, using microwave interferometer with horn antenna system

06 p0967 A69-17717

Laminar constant pressure gradient flow of viscous incompressible conducting fluid through rotating straight circular pipe with perpendicular magnetic field

06 p0967 A69-17718

Resonance in fundamental harmonic identified with Pc4 and in second harmonic with Pc3 geomagnetic pulsations

06 p0921 A69-17737

Supersonic plasma flow interaction with two dimensional magnetic dipole

06 p0967 A69-17738

Oscillating electric dipole in cold plasma with ideal conductivity along lines of force of external magnetic field

06 p0921 A69-17743

Trapped mode wave propagation for cold uniform magnetoplasma cylinder in free space, studying dipole modes and one-wave approximation

06 p0967 A69-17756

Electrostatic waves in inhomogeneous plasma in finite magnetic field, noting dispersion relation for cold plasma and stabilization of instability

06 p0967 A69-17761

Resonant frequencies and fields in circular cylindrical microwave cavity containing cold uniform magnetoplasma dielectric

06 p0968 A69-17763

Nonlinear interaction between cyclotron harmonic waves propagating perpendicular to static magnetic field in warm magnetoplasma, noting parametric amplification and mode conversion

06 p0968 A69-17766

Magnetic field generation in nonuniformly rotating plasma by current density from electron drift relative to positive ion gases due to viscous forces

06 p1009 A69-17966

Retrograde motion of electric arcs in transverse magnetic fields, using multifluid equation to predict inclination and properties

[AIAA PAPER 69-45] 06 p0971 A69-18091

Electromagnetic ion acceleration in steady electric and magnetic fields chosen to match fields of Alkali Plasma Hall Accelerator /ALPHA/

[AIAA PAPER 69-111] 06 p0985 A69-18175

Electromagnetic thrust equations for coaxial MPD accelerator, noting role of externally applied magnetic field

[AIAA PAPER 69-108] 06 p0972 A69-18197

High efficiency ion lasers without additional axial magnetic field

06 p0938 A69-18221

Axisymmetric poloidal vacuum magnetic fields in low pressure plasmas in MHD equilibrium

06 p0972 A69-18230

Three axis gravity gradient stabilization system to minimize stray magnetic fields

07 p1226 A69-18329

Magnetic field at synchronous equatorial orbit by analyzing magnetometer data recorded by ATS 1 satellite during magnetic storms, geomagnetic substorms and quiet times

07 p1123 A69-18343

Structure of plane shock wave of arbitrary force propagating across magnetic field in hot rarefied plasma

07 p1190 A69-18692

Steady rotation of insulating body of revolution in unbounded electrically conducting fluid permeated by applied axial magnetic field

07 p1190 A69-18814

Hot plasma containment by magnetic field, presenting results from stellarator for toroidal sheared magnetic field properties

07 p1190 A69-18929

Monocenergetic relativistic electrons stream gyrating along cold magnetoactive plasma with pitch angle radiatively unstable with respect to synchrotron radiation

07 p1191 A69-18958

Solar type 4 bursts characteristics accounted for by cyclotron mechanism, assuming models of spot magnetic field configuration and electron density distribution

07 p1205 A69-18959

Stabilization of plasma filament with alternating current by quadrupole magnetic field

07 p1191 A69-18987

Interaction between shock wave and magnetic field of current carrying grid for ideal gas with constant coefficients, discussing dissipation, ionization and Joule heat

07 p1120 A69-18998

Laminar conducting wall jet injected in transverse magnetic field, analyzing partial differential equations obtained

07 p1192 A69-19020

Pulsation energy balance of turbulent jet of conducting fluid expanding in longitudinal magnetic field

07 p1192 A69-19021

Gas dynamic shock wave entry into magnetic field, discussing field distribution behind shock front and diffusion and medium motion effects on penetration depths

07 p1192 A69-19022

Longitudinal and transverse conductivities and anisotropy tangent for noncharged plasma in magnetic field

07 p1193 A69-19025

Maxwell equations solution for linear induction MHD machine coil area field components, allowing for finiteness of magnetic permeability of iron

07 p1059 A69-19028

He-Ne and He-Xe laser lines in IR tuned by axial magnetic field, observing Stark patterns of organic molecules

[IEEE PAPER C-5] 07 p1150 A69-19050

Statistical theory of ionization for magnetoactive plasma with nonequilibrium concentration level and nonequilibrium energy distribution

07 p1193 A69-19142

Kelvin-Helmholtz instability for interface between two uniform superposed fluids with constant densities and velocities in horizontal motion in oblique magnetic field

07 p1182 A69-19274

Rayleigh-Taylor instability for interface between two uniform superposed fluids under combined effect of horizontal and vertical magnetic fields

07 p1182 A69-19275

Hydromagnetic wave propagation and generation in magnetosphere, discussing hydromagnetic waves in uniform and axisymmetric magnetic fields

07 p1208 A69-19356

Electron plasma and magnetic field effects on polaritons in semiconducting GaAs studied by Raman scattering of light at small angles

07 p1200 A69-19401

Plasma heating dynamics by straight turbulent discharge current influenced by initial plasma parameters

07 p1195 A69-19592

High energy particles obtained by accelerating plasma with frozen-in magnetic field to relativistic velocities during scattering of fast electron beam

08 p1358 A69-19805

Plasma instability with isotropic ion or electron velocity distribution function /nonMaxwellian/, discussing magnetic field and particle energy distribution functions

08 p1359 A69-19949

Steady shock discontinuity in perfectly conducting gas flow in arbitrarily oriented magnetic field for various Mach numbers

08 p1360 A69-19988

Antenna impedances in cold plasma with perpendicular static magnetic field

08 p1281 A69-20029

Nuclear fusion reactor development, discussing magnetic field confinement of hot dense plasmas and electric power production economic possibilities

08 p1361 A69-20124

Magnetic field distribution and resistance of homogeneous type 2 superconductor cylinder at transition under effect of axial current

08 p1371 A69-20202

Positive column in longitudinal magnetic field in helium and neon, noting agreement with collision diffusion theory and Kadomtsev perturbation theory

08 p1361 A69-20212

Solution of equations of motion of charged particles in constant magnetic field and variable electric field

08 p1361 A69-20213

Ambipolar diffusion in electron concentration inhomogeneities of weakly ionized plasma in magnetic field analyzed by linearized quasi-hydrodynamic equations

08 p1362 A69-20426

HF electromagnetic wave scattering at small scale plasma turbulence in magnetic fields, discussing interactions in frequent collisions region
08 p1275 A69-20435

Spatial distribution and temporal variation measurements of magnetic fields in plasma, emphasizing pulsed discharges
08 p1364 A69-20472

Viscous stress tensor for collisionless plasma with anisotropic pressure in magnetic field
08 p1365 A69-20522

Inhomogeneous collision plasma drift instabilities in strong magnetic field analyzed by solving nonlinear equations
08 p1365 A69-20549

Slow distribution function of magnetoactive plasma, deriving kinetic equation in quasi-linear approximation for analyzing particle-HF electromagnetic wave interactions
08 p1365 A69-20550

Analog study of periodic permanent magnet focusing, considering ray equation, beam radius dependence on distance, amplitude variations, etc
08 p1285 A69-20555

Wave behavior in warm inhomogeneous plasma with magnetic field perpendicular to density gradients of unperturbed plasma, solving Maxwell-Vlasov equations by perturbation methods
08 p1365 A69-20744

Nondispersive LF mode in magnetized plasma with frequencies lower than ion cyclotron frequency, discussing plasma stability in presence of electron drift
08 p1366 A69-20750

Magnetophonon oscillations of transverse magnetoresistance of n-type epitaxial GaAs in pulsed magnetic field
08 p1373 A69-20760

Behavior of bounded and free arc discharges under action of transverse magnetic fields and gas flows
08 p1366 A69-20767

Flow analysis in magnetic annular shock tube in magnetic field varying with time
08 p1366 A69-20787

Vorticity behind shock waves in conducting gases when magnetic field is tangential or normal to shock surface using momentum equation
08 p1367 A69-20789

Plasma oscillation modes perpendicular to magnetic field used to study energy conversion by wave coupling across density discontinuity
08 p1367 A69-20795

Electromagnetic microinstabilities of plasmas associated with transverse waves propagating perpendicular to external uniform magnetic induction, noting allowable frequencies
08 p1368 A69-20804

Fast electron diffusion in stochastic magnetic field, obtaining diffusion coefficient as function of ratio of correlation time to Larmor period
08 p1368 A69-20807

Plasma stream behavior emerging from magnetic field, noting transverse velocity imparted to electrons by field
08 p1368 A69-20808

Double adiabatic MHD fluid equations for electrons and ions with pressure gradients for collisionless plasma in magnetic field
08 p1369 A69-20815

Loss cones effect of anisotropic Maxwellian velocity distribution on EM waves propagating perpendicular to magnetic field in infinite plasma
08 p1369 A69-20820

Flute instabilities in rarefied plasma with intrinsic electric field, discussing plasma density profile and uncompensation degree effects on plasma magnetic field stability
08 p1370 A69-21013

Plasma flow motion and polarizing interaction in multipole magnetic field
08 p1370 A69-21015

Hall current influence on plasma jet interaction with space periodic magnetic field created by system of coaxial coils with alternating current directions
08 p1370 A69-21017

Plasma flow from hot cathode discharge in magnetic field increases ion flux intensity and prevents flow divergence in vacuum
08 p1370 A69-21075

Electromagnetic wave attenuation propagating along external magnetic field ascribed to cyclotron wave energy absorption by resonant plasma particles
08 p1277 A69-21077

Cyclotron waves interaction when propagating in solid state plasma in magnetic field, determining amplification zones and factors
08 p1374 A69-21078

Lithium vapor fueled applied field MPD arc jet performance using open end heat pipe vaporizer and hollow cathode
08 p1561 A69-21222

Rotating plasma disturbances onset in MPD arc, determining magnetic field dependence on mass flow, background pressure and propellant
08 p1562 A69-21225

Coaxial electrodes with electric and magnetic fields to study instability in MPD arcs
08 p1563 A69-21231

Background pressure and magnetic field shape effect on MPD thruster performance, testing radiation cooled thrusters
08 p1564 A69-21239

Electron multiplication during ionized H plasma exposure to annular electric field and magnetic field, including microwave diagnostics
08 p1543 A69-21299

Amplitude modulated radio wave interaction with rarefied plasma in magnetic field, considering possible ionospheric heating by mechanism
08 p1543 A69-21543

Zero reference field for quiet day solar variations, considering magnetic field levels and errors
08 p1575 A69-21551

Ferroelectric Li niobate single crystals internal magnetic field analysis by acoustic EPF, establishing field induced hypersound resonance absorption in spin systems
08 p1556 A69-21563

Inhomogeneous collisionless plasma drift-oscillation stability in magnetic field augmented by E wave HF field
08 p1546 A69-21564

Plasma conductivity tensor components in crossed fields calculated by Boltzmann kinetic equation, noting influence of magnetic field presence
08 p1546 A69-21565

Magnetoactive plasma containing fast monoenergetic ions noting stability at drift frequencies and in terms of Alfvén wave buildup
08 p1546 A69-21566

Electromagnetic wave fluctuations and scattering in plasma in strong electric and magnetic fields at magnetoacoustic frequencies
08 p1543 A69-21569

Self focusing of plasma whistler wave along magnetic field at small threshold power
08 p1546 A69-21577

Discharge plasmas produced from solid materials at low pressures and temperatures and compressed against wall by magnetic field
08 p1547 A69-21594

Steady state currents effect on hydrodynamic waves propagated normal to magnetic field
08 p1547 A69-21662

Nonlinearity of Hall voltage induced in plasma by external magnetic field under various assumptions
08 p1548 A69-21683

Irregular regions in Antarctic ionosphere from Polar Ionosphere Beacon Satellite S-66 recordings, obtaining irregularities density from nulls clarity
08 p1490 A69-21716

Near cathode magnetic field effect on instability in linear Hall current accelerators, using geometry of field extending from anode to cathode region
08 p1568 A69-21731

Kaufman thruster performance dependence on transmission of ion extraction optics and magnetic field shape
08 p1569 A69-21878

Electrothermal instabilities of ionization region of nonequilibrium MHD generator in presence of magnetic field
08 p1548 A69-21919

Kinetic theory of electromagnetic wave passage through magnetoactive plasma, discussing dispersion and specular and diffuse reflection
08 p1550 A69-22022

Resonant interaction between traveling charge with superimposed magnetic field and Alfvén wave in plasma cylinder, showing cyclotron orbit variations
08 p1551 A69-22035

Phase characteristics and magnetic mirrors effect on charge motion in spatially periodic magnetic field
08 p1551 A69-22036

Magnetic masses of differentiating or integrating floating gyroscope effect on gyro moment sensor per-

formance, examining utilization of multipole permanent magnet
09 p1497 A69-22102

Centering force and initial rigidity of magnetically suspended bearings of integrating floating gyroscope with allowance for mutual inductance of exciting coils
09 p1497 A69-22104

Cometary magnetic fields by measuring depolarization of molecular resonance fluorescence
09 p1603 A69-22234

Plasma ion heating by external stochastic HF field, noting avoidance of special thermalization processes
09 p1553 A69-22527

Weak discontinuities in wave propagation, studying ionized gas nonsteady flow having electrical conductivity in magnetic field
10 p1727 A69-22916

Three dimensional MHD flow near forward stagnation point magnetic fields with large induction values described by differential equations, showing tendency towards two dimensional flow
10 p1727 A69-23100

Busbar effect on interaction between conducting fluid flow and traveling wave magnetic field created by long line with concentrated inductance and capacitance, deriving line gain
10 p1727 A69-23101

MHD flow and heat transfer between coaxial rotating disks under axial magnetic field, using powers expansion of Reynolds number
10 p1728 A69-23234

Transverse magnetic field and shock strength effects on curvature ratio of attached shock waves and wedge
10 p1728 A69-23238

Induced magnetic fields determination in linear DC MHD generators with ferromagnetic and nonmagnetic walls, using Fredholm equation
10 p1636 A69-23454

Conductivity and electron temperature in coaxial MHD generator plasma with magnetic field, studying Joule heating effect on performance
10 p1735 A69-23463

Closed cycle MPD experiments with applied electric and magnetic fields emphasizing current leakage, segmentation, relaxation and aerodynamic effects
10 p1738 A69-23479

Dynamic mode electromagnetic surface waves on axially magnetized single crystalline YIG and polycrystalline ferrite rods
10 p1746 A69-23513

Earth currents and magnetic field variations recording in period range 10-200 sec, computing power density spectra on analog computer
10 p1682 A69-23593

HF magnetic field effect on oscillations and instabilities of plasma confined by fixed magnetic field
10 p1739 A69-23623

Boundary conditions for nonlinear equations of MHD for vicinity of zero magnetic field line, considering plasma pinch and current density
10 p1739 A69-23626

Slow electromagnetic wave propagation along cold collisionless cylindrical plasma in axial magnetic field, noting surface wave metamorphosis into bulk waves
10 p1739 A69-23659

Spontaneous magnetic field excitation in turbulent plasma noting possible instability
10 p1740 A69-23715

Beam displacement at plasma under magnetic field connected with polarized electromagnetic wave reflections
10 p1740 A69-23724

High homogeneity sixth order superconducting solenoids with coil inner surface notch correction, describing graphical design techniques
10 p1665 A69-23857

Electromagnetic wave propagation along longitudinally magnetized plasma column surrounded by isotropic dielectric medium, without making quasi-static assumption
10 p1658 A69-24061

Linear MHD generator power characteristics at large magnetic Reynolds numbers, analyzing magnetic field distribution for sectioned and solid electrodes
11 p1824 A69-24224

Weak magnetic field dynamics in bounded conducting medium having turbulent motion induced under zero boundary conditions
11 p1922 A69-24240

Plasma wave conversion into electromagnetic waves in strong magnetic field, studying nonlinear coalescence and scattering on thermal and epithermal ions
11 p1922 A69-24245

Rotational discontinuity in plasma, noting behavior for particle reflection off front side or back side of MHD wave

11 p1923 A69-24293

Electric shock tube for measurement of plasma magnetic fields induced by shock plasma moving through DC magnetic field transverse to flow

11 p1925 A69-24311

Pfirsch-Schluter factor calculation for stationary toroidal plasma diffusion enhancement due to current along magnetic field over diffusion over that associated with diamagnetic current

11 p1925 A69-24312

Turbulence formation in conducting liquid at increasing Reynolds numbers, discussing cause of spontaneous magnetic field appearance

11 p1955 A69-24392

Dispersion relation for internal gravity wave propagation across exponentially decreasing magnetic field in conducting fluid, noting atmospheric wave propagation in ionosphere

11 p1877 A69-24564

Hydromagnetic instability onset in dissipative flow of electrically conducting fluid between rotating permeable perfectly conducting cylinders, noting oscillatory axisymmetric critical modes

11 p1926 A69-24895

HF instability of low pressure discharge in magnetic field, discussing plasma diffusion and oscillations

11 p1927 A69-24912

Excitation of plane plasma layer in magnetic field perpendicular to wave vector of excitation wave in gyrotropic waveguide

11 p1927 A69-24916

Plasma confinement experiments with Tokamak type magnetic configuration device, giving schematics for thermonuclear reactor

11 p1927 A69-25099

Thermodynamic approach to equation of state of magnetized Fermi gas, deriving energy eigenvalues of free electron in magnetic field

11 p1961 A69-25107

Hall type electromagnetic plasma accelerator, with thrust affected only by Lorentz forces in external magnetic field, compared to pure Hall accelerator

11 p1866 A69-25214

Linear interaction of electron beam and plasma in magnetic field noting convective wave instability, wave dispersion and properties behavior

11 p1929 A69-25267

Magnetic field effects on rotational MHD flow in container, noting Taylor-Proudman theorem, Ekman layers and vertical Stewartson boundary layers

11 p1930 A69-25279

Nonlinear DC magnetic fields for nonhomogeneous isotropic current free regions in presence of ferromagnetic materials, discussing analytic solutions of boundary value problems

11 p1888 A69-25311

HF electrostatic waves propagation in nonuniform plasma in uniform magnetic field, obtaining solutions of dispersion relation

11 p1931 A69-25360

Synchrotron radiation amplification by monoenergetic electron stream helically gyrating in static magnetic field of cold plasma, discussing amplification rate frequency dependence

11 p1931 A69-25361

HF electrostatic waves propagation excited by electron beam in hot inhomogeneous plasma in magnetic field, studying wave transformation and absorption

11 p1931 A69-25364

Faraday type MHD energy converters in nonequilibrium conduction mode, analyzing two dimensional current and potential distributions in plane normal to magnetic field

11 p1826 A69-25397

Constant and traveling magnetic fields MHD converters induction and finite dimensions influence analyzed by conformal mapping, separation, Fourier and finite difference methods

11 p1827 A69-25399

Motion equations for conducting paramagnetic fluid in magnetic field derived, including MHD equations and equation determining magnetic moment variation rates

11 p1932 A69-25465

Natural oscillations excitation in magnetoactive plasma by modulated electron beam ascribed to Doppler or Cerenkov effects

11 p1932 A69-25535

Natural oscillations excitation instabilities by modulated ion beams in magnetoactive plasma ascribed to anomalous Doppler effect

11 p1932 A69-25536

Low power gradient uniform electric arc column in cross flow and transverse magnetic field, analyzing temperature, velocity, pressure and magnetic field distribution

11 p1933 A69-25556

Thermal conductivity of hydrogen plasma in transverse magnetic field at high temperatures

12 p2133 A69-25765

Angle-to-code converter designed on basis of quantum magnetometers frequency sensors, transforming vector sum of bias magnetic fields into pulse repetition rates

12 p2016 A69-25963

Dynamic characteristics of plasma fluxes across magnetic field of diverter inside plasma cylinder formed during injection

12 p2134 A69-25977

Double focalization in atomic hydrogen maser by hexapolar magnets selecting hyperfine energy transitions

12 p2105 A69-26050

Hydromagnetic fluid flow between flat plates oscillating with phase difference, same frequency and different amplitudes

12 p2135 A69-26273

Viscous incompressible conducting fluid flow through porous coaxial nonconducting cylinders under radial magnetic field with pressure gradients functions of time

12 p2062 A69-26275

Hydromagnetic flow of viscous conducting fluids through porous coaxial cylinders in radial magnetic field solved by Laplace transform

12 p2135 A69-26276

Plasma instability in magnetic and HF electric fields, observing aperiodic short wave and oscillatory instabilities

12 p2136 A69-26526

Low pressure arc discharge plasma, studying ion-acoustic oscillations development in magnetic field

12 p2136 A69-26527

Quantitative magnetic field models of magnetosphere for analyzing field configuration variations and adiabatic particle motion

12 p2072 A69-26738

Boundary layer between cold plasma and vacuum magnetic field, considering transverse velocity component perpendicular to field

12 p2139 A69-26944

Polarization and structure of magnetic fields of quasars, E galaxies, normal galaxies and other extragalactic radio sources

12 p2165 A69-27034

Inhomogeneous and anisotropic cold plasma filled plane capacitor resonance in steady magnetic field applied to plasma diagnostics, using calculus of variations

13 p2304 A69-27240

Infinitely long journal bearing using ionized gas lubricant with magnetic field applied axially and electric field applied transversely to fluid film [ASME PAPER 68-LUBS-30]

13 p2267 A69-27287

Magnetic and electric fields influence on gas lubrication of bearings [ASME PAPER 68-LUBS-26]

13 p2267 A69-27288

Nonlinear periodic wave propagation at angle to magnetic field in collisionless plasma studied by two fluid plasma equations

13 p2304 A69-27297

Current, magnetic field, flow velocity and plasmatron dimensions effects on arc voltage in coaxial plasmatron

13 p2306 A69-27388

Zeeman laser with one end mirror exhibiting x-y-type loss anisotropy, considering resonance condition for round trip pass and self consistent field equations

13 p2271 A69-27398

Incompressible conducting fluid turbulent flow velocity distribution in transverse magnetic field at small magnetic Reynolds numbers and constant MHD interaction frequency

13 p2246 A69-27498

MHD channel mercury flow with hydraulic shock in transverse magnetic field, determining characteristic values distribution over range of principal parameters

13 p2307 A69-27499

Variable fluid and field velocity HF induction generator, determining interaction between fluid dynamic forces and magnetic field and kinetic energy

13 p2207 A69-27502

Transient response in liquid-metal conduction MHD generators, analyzing constant magnetic field using differential equation

13 p2207 A69-27506

Sodium liquid-metal jet MHD generators tested under constant and rising magnetic fields and off and on loads

13 p2208 A69-27511

Cosmic ray propagation theory for steady streaming along magnetic field and down cosmic ray density gradient, noting MHD wave generation by anisotropy

13 p2326 A69-27569

Surface resistivity oscillatory dependence on magnetic field in single crystal metals, examining electron trajectories, energy levels and wave functions

13 p2316 A69-27641

Dispersion relations in semiconductors in magnetic field indicating current anisotropic instability association with excessive noise

13 p2317 A69-27876

Ferrites dynamic characteristics in alternating magnetization pulse with variable amplitude indicating linearity loss in strong fields

13 p2320 A69-27994

Electric relays requirements for spacecraft with magnetic field constraints

13 p2231 A69-28046

Deuterium plasma jets passage through pulsed magnetic field by means of thermal and diamagnetic probes, noting magnetic field strength effect

13 p2311 A69-28107

Plasma jets tangential injection into toroidal magnetic field, discussing polarization interaction and depolarization effect

13 p2311 A69-28108

Tensor analysis of four photon interaction in rarefied plasma in magnetic field, determining cubic current of plasma wave self action

13 p2314 A69-28444

Transverse particle and energy fluxes in toroidal magnetic traps magnetic fields with ionized plasmas, discussing particle diffusion coefficient and thermal conductivity

13 p2314 A69-28446

Screw instability in glowing discharge plasma column in longitudinal magnetic field generalized to instabilities in low pressure arc, Penning and high current discharges

13 p2315 A69-28526

Biological effects of low magnetic field environments studied by physiological, visual and psychological tests on animal, plant and human subjects

13 p2211 A69-28596

Large amplitude pulsations in magnetic field magnitude and proton fluxes observed by satellite during magnetic storm compared with various models

14 p2434 A69-28947

Reflection and absorption coefficients analyzed for obliquely incident electromagnetic wave from magnetoactive plasma in constant parallel magnetic field

14 p2411 A69-28997

Magnetic field intensity, plasma pressure and energy density relations for macroscopic plasma motion inside neutral sheet from two dimensional model

14 p2440 A69-29119

Kelvin-Helmholtz instability noting effects of oblique magnetic field and rotation, deriving dispersion relation

14 p2491 A69-29335

Linear polarization achieved in He-Ne laser by applying external transverse magnetic field to plasma discharge

14 p2459 A69-29569

Amplitude modulation of electromagnetic waves by modulated magnetic fields for communications through rocket exhausts and reentry plasma sheaths during blackout

14 p2417 A69-29591

Three level He-Ne laser, showing nonlinear interference effects on gain line shape and use in magnetic field and frequency stabilization

14 p2460 A69-29671

Low beta fusion research in open end magnetic mirrors covering scope, end losses, fusion economics, flute instability, stabilization, etc

14 p2498 A69-29843

Electron and ion mobility in multiple cusp magnetic fields related to Polytron experiment

14 p2499 A69-29852

Two piston flow stability separated by thin wall in traveling magnetic field, finding piston inertia centers velocity equal to field velocity

14 p2500 A69-29903

Compressible gas MHD steady one dimensional flow in electric and magnetic fields

14 p2500 A69-29905

MHD mercury flow in rotating torus with little friction investigated for Reynolds numbers, considering induction pump forces and magnetic field influences
14 p2500 A69-29907

Turbulent Hartmann flow between planes in perpendicular magnetic field including flow velocity profile measurements
14 p2500 A69-29908

One dimensional approximation for free jet nozzle flow in perpendicular magnetic field, calculating velocity distributions
14 p2501 A69-29910

Plane linear induction pump design optimization without short circuiting bus bars, allowing for MHD effects induced by traveling magnetic field
14 p2405 A69-29913

MHD interaction between plasma and transverse magnetic field in shock tube, noting unsteady shock wave propagation in interaction zone
14 p2501 A69-29919

Detached MHD shock wave formation in front of magnetic field acting as piston moving collisionless plasma, discussing time dependence, Alfvén speed and plasma parameters
14 p2502 A69-29958

Vector magnetograph to measure magnetic field vector components, obtaining field direction azimuth by servo circuit
14 p2453 A69-29972

Josephson current density distribution in thin film superconductors, determining relation between tunneling density and magnetic field for films with/without current
15 p2667 A69-30196

Hydromagnetic fast shock strength and direction in inhomogeneous gravitational atmosphere with uniform magnetic field, discussing heating in solar corona
15 p2680 A69-30202

Plasma stability under anisotropic pressure in axisymmetric magnetic fields determined by quasi-hydrodynamic approximation
15 p2658 A69-30249

Plasma diagnostics in magnetic field with thin cylindrical probe based on Langmuir method
15 p2658 A69-30253

Plasma jet motion in time constant and time variable magnetic fields noting particle deflection, polarization loss, capture and cut-off
15 p2658 A69-30255

Criterion for magnetic plasma stability near magnetic axis, noting parameters for deriving criterion integrand
15 p2658 A69-30265

Electron energy distribution determination from electron synchrotron radiation spectrum for various magnetic field configurations within radio source
15 p2655 A69-30546

Particle drift velocity distribution of fully ionized plasma in magnetic field calculated by integration of Boltzmann equation
15 p2659 A69-30707

Continuous supersonic plasma wind tunnel obtained using magnetic Laval nozzle made by modification of Q device normal magnetic field configuration
15 p2589 A69-30909

Nonlinear effects and turbulent behavior in beam plasma instability, studying interactions in magnetic field
15 p2660 A69-30917

Self consistent solutions for collisionless plasma penetration across magnetic field, showing electrons ability to accompany ions across field
15 p2661 A69-30923

Nonlinear boundary value problems for isotropic plasma with known magnetic field, examining electromagnetic waves scattering at magnetic fluctuations
15 p2569 A69-30938

Molecular beam behavior in constant electric and magnetic fields, applying laser frequency dependence on magnetic field orientation to resonator
15 p2655 A69-30943

Regulating setup for controlling AC voltage surrounding polarization of magnetic electrode in plasma
15 p2664 A69-31094

Atomic beam for H maser operation prepared by using nonadiabatically changing magnetic field in transition region
15 p2635 A69-31103

Inversion coefficient for two orientations of ruby crystal with respect to external magnetic field perpendicular and push-pull orientations
16 p2795 A69-31570

Magnetic field lines curvature effect on plasma instabilities due to ion temperature gradient, noting frictional gravitation field simulation
16 p2816 A69-31636

Nonlinear interaction between three monochromatic waves propagating parallel to magnetic field in plasma, considering relativistic drift motions of particles
16 p2816 A69-31640

Charged particle motion in superposed Heliotron and biconical cusp magnetic fields, considering particle confinement
16 p2817 A69-31643

Transverse instabilities in collisionless electron plasma in absence of permanent magnetic field with spheroidal velocity distribution, noting application to shock theory
16 p2817 A69-31645

Exact solution for motion of conducting solid of revolution rotating in infinite conducting viscous fluid, describing magnetic field
16 p2817 A69-31666

Wide argon plasma column by axial current density measurements, confirming existence of instability and determining critical magnetic field
16 p2819 A69-31680

High beta theta pinch stability against tearing modes, determining necessary magnetic field conditions for slab and cylindrical cases
16 p2819 A69-31681

Nonlinear theory of $E \times B$ instability for weakly ionized plasma in presence of density gradient and parallel electric field perpendicular to magnetic field
16 p2819 A69-31682

Traveling wave tube amplifier for wideband radio in SHF range containing periodically integrated magnetized system, discussing output power variation range
16 p2759 A69-31863

Screw pinch stability explained by strong force free current carried by magnetic field around central plasma column
16 p2821 A69-32037

Plasma magnetic field and electron density measured by Faraday rotation using resonant gas laser radiation
16 p2822 A69-32041

Plasma wave echoes concept extended to transverse electromagnetic wave excitation propagating parallel to external magnetic field
16 p2823 A69-32467

Weak magnetic fields effect on molecular oscillator frequency taking into account Zeeman sublevels
16 p2762 A69-32500

Amplitude modulated radio wave interaction with rarefied plasma in magnetic field, considering possible ionospheric heating by mechanism
16 p2754 A69-32538

Zero reference field for quiet day solar variations, considering magnetic field levels and errors
16 p2851 A69-32546

MHD of interstellar gas-dust medium, analyzing gas-dust flow and gas-dust shock waves in magnetic fields
16 p2823 A69-32590

Cavity linear phase anisotropy and axial magnetic field effect on single mode Zeeman gas laser
16 p2798 A69-32606

Boltzmann equation for Lorentzian plasma in elliptic magnetic field solved by expanding distribution function in Legendre polynomials
17 p3009 A69-32827

Linearized motion equations for conducting gas in magnetic and electric field solved for coaxial channel and free jet, assuming small Reynolds number and parallel flow
17 p3010 A69-33016

Steady state flux jumping for thin walled tubular superconducting NbTi subjected to coaxial superimposed AC and DC magnetic fields, discussing effective resistivity
17 p3016 A69-33787

Magnetized solar wind model to evaluate temperature, density, velocity and magnetic field for various boundary conditions
17 p3041 A69-33812

Electromagnetic fields theory simultaneously determining vector electric and magnetic field aspects in terms of operator Green functions
17 p2924 A69-33833

Magnetic field susceptibility testing method as defined in DOD Electromagnetic Compatibility Control documents MIL-STD-461 and MIL-STD-462
17 p2947 A69-34133

Level crossing signal obtained by magnetic/electric field modulation, tabulating corrections to widths and centers for distortions
17 p3009 A69-34155

Electromagnetic wave propagation in unbounded compressible plasma under drift velocity and magnetic field, obtaining dispersion equation for current density
18 p3179 A69-34261

Whistlers propagation in cold plasma in uniform magnetic field, considering amplitude dispersion effect
18 p3179 A69-34437

Drift waves parametric excitation in resistive plasma derived from fluid equations, assuming plane geometry with periodic boundary conditions in magnetic field and azimuthal directions
18 p3179 A69-34440

Severe magnetosphere distortions in north-south direction with parallel/antiparallel magnetosheath to magnetospheric field ascribed to solar wind property changes from Explorer 12 observations
18 p3128 A69-34947

Chapman-Ferraro approximation for magnetic interior field line configuration in plasma flow around two dimensional dipole, allowing for tail formation and neutral sheet
18 p3129 A69-34955

Microfluctuations frequency and wavelength of electromagnetic, electric and magnetic field distributions in plasma shock wave front found consistent with ion-acoustic origin hypothesis
18 p3180 A69-35017

Electromagnetic and cyclotron waves interaction across opaque boundary in moving plasma in one dimensional approximation
18 p3181 A69-35027

Magnetic field effect on Gunn diode vibrations and LF oscillations, noting increase in threshold field and decrease in threshold current
18 p3183 A69-35267

Electromagnetic shaping of metallic parts using equations describing magnetic and electric field intensity as function of blank profile and cylindrical blank wall thickness
18 p3151 A69-35456

Self excited vibration of flowing medium and infinite cylindrical duct wall in primary magnetic field, discussing vibration stability and critical speeds
18 p3226 A69-35462

Electromagnetic wave effect on electron in homogeneous magnetic field, noting relativistic momenta of dragged electrons
18 p3181 A69-35497

Gas ionizing shock waves structure in arbitrary magnetic field, considering greater magnetic viscosity than dissipative coefficients
19 p3381 A69-36773

Turbulent boundary layer of conducting fluids on dielectric plate in transverse magnetic field in presence and absence of pressure gradient
20 p3513 A69-37092

Electric field correlation to magnetic fields in quantum theory of coherence, deriving dynamical equations governing space-time development of correlation matrix
20 p3575 A69-37304

VLF electric and magnetic fields observed in auroral zone with Javelin 8.46 sounding rocket, noting HF electrostatic noise bursts
20 p3533 A69-38080

Twenty year wave in diurnal anisotropy component of galactic cosmic rays arriving at earth from asymptotic direction east of sun interpreted as magnetic reconnection
20 p3592 A69-38098

Equilibrium and stability of axisymmetric gaseous polytropes in toroidal magnetic fields, calculating harmonic oscillations by virial tensor method
21 p3797 A69-38534

Ferromagnetism stable state in degenerate electron gas and magnetic fields in gravitationally collapsed bodies based on total microscopic magnetic moments associated with Landau level electrons
21 p3798 A69-38600

Two dimensional numerical solution for Faraday DC MHD generators with variable conductivity, velocity and magnetic field
21 p3649 A69-39027

Dispersion relations in semiconductors in magnetic field indicating current anisotropic instability association with excessive noise
21 p3782 A69-39142

Jupiter magnetospheric radio emissions, discussing magnetic field and plasma-magnetic interactions
21 p3812 A69-39517

Extragalactic radio sources linear polarized radiation distribution at 1418 MHz indicating ordered magnetic fields often oriented differently
22 p4015 A69-40155

Kinematic dynamo waves, discussing excitation and maintenance of magnetic field by assumed motion of uniformly conducting fluid using small parameter and numerical methods

22 p3989 A69-40195

Injun 5 satellite VLF electric and magnetic fields observations, discussing antenna operation, Poynting flux and noise band measurements

22 p3938 A69-40503

Differential rotation of incompressible inviscid fluid of infinite electrical conductivity in spherical shell, noting toroidal magnetic field for sun

22 p4027 A69-40658

Diffuse reflection of electromagnetic longitudinal wave from magnetoactive plasma in oblique incidence

22 p3990 A69-40788

Theory for current magnetic field characteristics of Penning discharge valid to extinction point

22 p3991 A69-40865

Supercritical frequencies horizontal gradient ducting effects on backscatter sounding of F region magnetic field aligned irregularities

22 p3941 A69-40913

Conductor material thermal conductivity contribution to self similar explosion in strong magnetic field, determining critical field strength

22 p3982 A69-41019

Ionizing shock wave propagation and reflection in transverse magnetic field based on MHD theory, assuming gas thermal equilibrium

22 p3992 A69-41176

Multiple strip H guide field distribution and low loss wave mode analysis, obtaining approximate thin layer equations

22 p3917 A69-41254

Dirac equation in external electromagnetic fields, deriving solution for constant orthogonal electric and magnetic fields encountered in plasma transport

23 p4190 A69-41357

Nonlinear interaction between extraordinary waves propagating perpendicular to static magnetic field in cold homogeneous magnetoplasma

23 p4195 A69-41538

Conducting fluid flow in spherical container in rotating magnetic field, calculating induced field velocity and inside and outside components

23 p4196 A69-41609

Eddy current plasmoids formation in potential magnetokinematic plasma flux found economical in terms of energy requirements

23 p4214 A69-41834

Force acting on multipole in external magnetic field, noting dependence on multipole axes

23 p4158 A69-42172

Boundary layer separating collisionless plasma from one dimensional magnetic field for anisotropic particle velocity distribution functions, preserving charge neutrality in boundary layer

23 p4197 A69-42415

Transverse plasma waves propagating along parallel static electric and magnetic fields may lead to instabilities regardless of carriers sign

24 p4355 A69-42923

Sounding rocket measurements of electric and magnetic fields near auroral electrojet

24 p4310 A69-43188

Self induced magnetic field influence on plasma positive column stability in longitudinal magnetic field

24 p4356 A69-43366

Hydrogen plasma-axisymmetric magnetic field interaction, studying plasmoid motions during exit from field

24 p4358 A69-43472

Electric arc stabilization in crossed convective and magnetic fields, discussing column slanting relationship to widening near downstream electrode

[AIAA PAPER 68-709] 24 p4359 A69-43572

Low pressure arc discharge motion between concentric electrodes in transverse magnetic field, noting Lorentz, stationary and retrograde modes due to temperature nonequilibrium

[AIAA PAPER 68-708] 24 p4359 A69-43644

Steady state interaction between collisionless plasma flow and immersed stationary magnetized or unmagnetized objects by inserting Cs ion accelerator into plasma wind tunnel

24 p4359 A69-43646

Turbulence formation in conducting liquid at increasing Reynolds numbers, discussing cause of spontaneous magnetic field appearance

24 p4390 A69-43782

MAGNETIC FILMS

Kerr magneto-optic camera for 10 nsec exposures of dynamic magnetization configuration in magnetic thin film during high speed flux reversal

17 p2970 A69-32853

MAGNETIC FLUX

Megagauss magnetic field generation methods, discussing high explosives, initial field, flux compression, capacitor discharges and applications

01 p0115 A69-10049

Stable fluxgate magnetometer sensor for exploration of space magnetic fields, discussing equipment specifications and performance tests

[IEEE PAPER 10.2] 01 p0081 A69-10715

Quasi-static Kerr magneto-optic observation and procedure to predict results of dynamic flux reversal in thin Ni-Fe films

[IEEE PAPER 11.7] 01 p0138 A69-10716

Electromagnetic waves parametric interactions during unsteady Josephson effect as function of wavelength ratio, magnetic field penetration and contact dimensions

02 p0293 A69-11464

Magnetic paleointensity studies in basalts from Flagstaff, Arizona, noting oxidation effect on magnetic strength after heating

02 p0244 A69-12018

Critical state model of type 2 superconductor taking account of critical current on magnetic field and surface sheath currents, evaluating flux penetration, hysteresis, AC losses, etc

02 p0298 A69-12030

Dipole model of geomagnetic field in terms of spatial distribution of vertical component, discussing computer program for calculating rectangular components

03 p0424 A69-13544

Thermal EMF in indium phosphide crystals as function of temperature, electron concentration and magnetic field strength, determining effective mass of electrons

03 p0489 A69-13889

Interplanetary magnetic field fluctuations obtained by IMP 2

05 p0824 A69-16264

Magnetoplasticity induced in metal by high magnetic fields, examining stationary flow in two dimensional deformation

05 p0844 A69-16804

Plasma column radial density profile measurement by electron plasma waves propagation in presence of strong magnetic field

07 p1194 A69-19323

Geomagnetic field strength in early Precambrian, discussing thermoremanent normal remnant and saturation inverse remnant magnetization studies of Botswana Modipe gabbro

08 p1309 A69-20580

Magnetic field decay modes due to nonuniform rotation having angular velocity as increasing function of distance from axis in infinite circular conducting fluid cylinder

08 p1369 A69-20999

Type two superconductors physical properties, discussing magnetic flux lines interaction with structural defects

09 p1555 A69-21490

Anomalous magnetic field energy spectrum obtained from aeromagnetic survey and approximation valid for earth crust and upper mantle

09 p1487 A69-21554

Static ferromagnetic frequency doubler graphic design, considering magnetic field strength and flux density, energy cycle and energy transfer

10 p1663 A69-23566

Auroral oval and ring current in magnetosphere, analyzing boundaries of lines of force on night side of earth

10 p1689 A69-24203

Thermal EMF in indium phosphide crystals as function of temperature, electron concentration and magnetic field strength, determining effective mass of electrons

11 p1939 A69-25690

Power output of He-Ne laser as function of transverse magnetic field strength

12 p2104 A69-26023

Solar photosphere and sunspot magnetic fields structure and strength dependence on sunspot area

14 p2528 A69-29965

Type 3 radio bursts time profile for estimating magnetic field strength in solar corona

15 p2675 A69-30554

Galactic magnetic field structure and strength, considering cosmic ray flux, continuum radio emission, starlight polarization, star formation, etc

15 p2694 A69-30857

Similarity concepts extended to shock initiated flux compression devices for magnetic flux concentration

16 p2768 A69-31665

Plasma cluster interaction with axially symmetric magnetic field, deriving plasma diamagnetic current, inductance and resistance from measured coil flux dependence on distance

16 p2823 A69-32365

Anomalous magnetic field energy spectrum obtained from aeromagnetic survey and approximation valid for earth crust and upper mantle

16 p2784 A69-32549

Magnetic analysis by successive double heat treatment of miocene lava cooled during geomagnetic polarity reversal for determining field intensity

16 p2788 A69-32646

Kerr magneto-optic camera for 10 nsec exposures of dynamic magnetization configuration in magnetic thin film during high speed flux reversal

17 p2970 A69-32853

Pulsar emission and magnetic field in Crab Nebula, discussing magnetic flux amplification, gravitational to magnetic energy conversion and pulsars as pulsed signals

17 p3026 A69-32859

Steady state flux jumping for thin wall tubular superconducting NbTi subjected to coaxial superimposed AC and DC magnetic fields, discussing effective resistivity

17 p3016 A69-33787

Dynamic Kerr observations of high speed flux reversal and relaxation process in permalloy thin films by magneto-optical camera with Q switched ruby laser

19 p3383 A69-36446

Proton concentrations, magnetic field strength and temperatures distribution in interplanetary plasma flows as function of latitudinal distance from center of active region

20 p3594 A69-37020

Time-invariant magnetic fields at planetary surfaces resulting from permanent magnetic bodies or distorting effect of inhomogeneous permeability on main field, computing components

20 p3609 A69-38105

Radiation sources fields and propagation in homogeneous lossy magnetoplasma, deducing wave equations for electric and magnetic current electron flux and mechanical body force sources

21 p3775 A69-38434

Galactic radio emission and magnetic field strength and structure, using radio surveys to obtain information on cosmic rays

21 p3790 A69-38820

Analyzing conditions for variable magnetic and electric noise occurrence at input of nuclear precession magnetometer used in field strengths measurements

23 p4165 A69-41852

Weak magnetic field amplification in turbulent flow with velocity field as random function of space and time

24 p4375 A69-42657

MAGNETIC FORMING

Electromagnetic forming principles and applications describing large capacitor bank facility design for multipurpose research

[ASTME PAPER MR68-418] 02 p0252 A69-11798

Decoupling force exerted by magnetic forming Be coil assembly on metallic plate during forming

11 p1888 A69-25310

MAGNETIC INDUCTION

Vacuum deposited n-type InAs films magnetoresistance coefficient dependences on length-to-width ratio, homogeneity moving carriers size and magnetic inductance

01 p0136 A69-10254

Small metallic sphere detection by electromagnetic induction method, emphasizing masking effect of resistive half space below scatterer

01 p0047 A69-10974

Electromagnetic induction theory for spherical earth model involving conducting core with radial conductivity variation and concentric nonconducting mantle

03 p0423 A69-13523

Mathematical theory of electromagnetic induction for spherical model of earth with conductivity distribution given by sine function

06 p0921 A69-17739

Matched asymptotic expansions method applied to magnetic field induction in thin toroidal wire and flow past circular cylinder at small Reynolds number
07 p1180 A69-18811

Electromagnetic microinstabilities of plasmas associated with transverse waves propagating perpendicular to external uniform magnetic induction, noting allowable frequencies
08 p1368 A69-20804

Magnetic pinch effect in thermal RF induction plasma in argon, developing theory for calculating excess magnetic pressure
09 p1544 A69-21341

Vacuum deposited n-type InAs films magnetoresistance coefficient dependences on length-to-width ratio, homogeneity, moving carriers size and magnetic inductance
09 p1559 A69-22647

Striated flow induction synchronous MHD generator, producing striated flow by nonthermal ionization of inert seeded gas in electric field
10 p1638 A69-23487

Static ferromagnetic frequency doubler graphic design, considering magnetic field strength and flux density, energy cycle and energy transfer
10 p1663 A69-23566

Magnetic field induced nonequilibrium argon plasma ionization relaxation processes obtained with allowance for flow parameters change in relaxation zone
11 p1922 A69-24225

External modulated currents induced electromagnetic field effect on density distribution of bounded plasma, discussing fluctuations in various configurations
11 p1927 A69-24910

Induced EMF method for calculation of antenna impedance, discussing effects of approximations in calculation
11 p1851 A69-24997

Transient processes in conduction type MHD generators due to external circuits induction distribution
12 p2017 A69-26545

One dimensional calculations of finite length MHD uniform traveling wave induction generator, discussing magnetic field distribution, electrical impedance and conversion efficiency
13 p2206 A69-27494

Three phase high temperature liquid metal induction MHD generator performance, noting velocity profile nonuniformity influence
13 p2208 A69-27513

Equatorial electrojet role in electromagnetic induction at magnetic dip equator, applying Price theory for space gradients
13 p2252 A69-27519

Ideal MHD induction converter pressure and generator cycles compared for calculating maximum output and pressure, considering current-conducting walls effects
14 p2393 A69-28887

Time dependent magnetic field induced inside rotating spherical conductor by external sources applied to moon
14 p2518 A69-29121

MHD mercury flow in rotating torus with little friction investigated for Reynolds numbers, considering induction pump forces and magnetic field influences
14 p2500 A69-29907

Free surface in supercritical regime downstream of valve submerged in MHD flow, noting effects of horizontal and vertical magnetic induction fields
15 p2659 A69-30299

Space charge formation in MHD generator channels ascribed to gas parameters nonuniformity and magnetic induction vector presence, assuming steady flow
15 p2659 A69-30635

Entrainment of viscous electrically conducting liquid in long duct with narrow rectangular cross section and movable walls in magnetic induction field
16 p2816 A69-31606

Electromagnetic induction in concentric thin shell-enclosed solid conducting sphere immersed in varying electromagnetic field
[AFRL-69-0082]
18 p3101 A69-34803

Self induction of conical electrode type plasma accelerator with and without allowance for magnetic scattering field, investigating acceleration process
19 p3379 A69-35821

Inductively coupled RF excited toroidal Ar ion laser, confining current discharge by strong axial magnetic field to reduce wall losses
19 p3338 A69-36690

Herzenberg geomagnetic dynamo model extensions including rigid rotors calculus, laminated rotors, induction problem and fluid rotors in rigid conductor
22 p3989 A69-40193

Conducting fluid flow in spherical container in rotating magnetic field, calculating induced field velocity and inside and outside components
23 p4196 A69-41609

Conical induction plasma accelerator design for studying acceleration process characteristics
24 p4357 A69-43468

MAGNETIC MATERIALS

NT FERRIMAGNETIC MATERIALS

NT FERROMAGNETIC FILMS

NT FERROMAGNETIC MATERIALS

NT MAGNETITE

NT PERMALLOYS [TRADEMARK]

Magnetic experiment on Surveyor 5 revealing magnetic material presence in Mare Tranquillitatis, discussing analogy to powdered basalt
02 p3231 A69-12226

Ground state energy for single magnetic impurity dissolved in nonmagnetic metal, applying cluster variation method to s-d interaction Hamiltonian
03 p0485 A69-13298

Soft magnetic materials, ferrites and magnetic particle composites as two layer laminates for shielding in audio and microwave frequencies
09 p1500 A69-22310

Magnetism and magnetic materials - IEEE and AIP Conference, New York, November 1968
15 p2668 A69-30683

Time dependent Green function method for premature saturation due to parametric amplification of nonuniform spin wave modes by one and two magnon processes
15 p2668 A69-30685

Magnetic materials simulation for satellite stabilization device based on magnetic hysteresis, using mathematical models and direct magnetic measurements
17 p2945 A69-33235

Diffusion times for saturated region in Hipernom tubes measured for various exciting magnetic fields and pulse duration
23 p4141 A69-42222

MAGNETIC MEASUREMENT

Vector helium magnetometer for Mariner 4 /Mars 1964/ and Mariner 5 /Venus 1967/, discussing efforts to reduce spacecraft stray fields
[IEEE PAPER 10.1]
01 p0081 A69-10714

Planetary magnetic field measurements near Venus, Mars, and moon, noting magnetic dipole comparison with earth and solar wind interactions
[AAS PAPER 68-186]
02 p0311 A69-11471

Geomagnetic field components measurements from moving object, investigating astronomical orientation applicability for three component geomagnetometer
02 p0277 A69-11674

Magnetotropometer for measuring torque /proportional to magnetic dipole moment/ exerted on object by earth magnetic field
02 p0248 A69-11768

Surveyor 6 magnet experiment following lunar landing, noting presence of magnetic material in Sinus Medii indicating basaltic composition
02 p0317 A69-12015

Surveyor 5 alpha particle backscattering instrument measurement, TV pictures of lunar surface elemental composition and magnetic and mechanical measurements
02 p0317 A69-12023

Elektron 2 satellite magnetic measurement of high latitude nocturnal magnetosphere, discussing variations, antisolar effect and elongation of magnetic field
03 p0422 A69-13505

Earth magnetic field measurements, attributing field origin to random mechanism
03 p0426 A69-14061

Error distribution maps for measurements of parameters epsilon, F and E of geomagnetic potential in Northern and Southern Hemispheres
04 p0627 A69-15031

Neutral sheet structure and orientation in geomagnetic tail, computing field lines on basis of Explorer 14 magnetic field measurements
05 p0753 A69-16256

Geomagnetic field strength in early Precambrian, discussing thermomagnetic normal remnant and saturation inverse remnant magnetization studies of Botswana Modipe gabbro
08 p1309 A69-20580

Atmospheric humidity effect on efficiency of geomagnetic field scales with taut-strip suspension and temperature fluctuation
09 p1494 A69-21518

Geomagnetic secular variations calculated by comparison of satellite, oceanic and aeromagnetic surveys
09 p1485 A69-21534

Separation of normal geomagnetic field component from limited length measurements by moving averages, considering error and inhomogeneity of anomalous field
09 p1486 A69-21537

Magnetic declination from moving objects measured by geomagnetic vector projection in solar direction
09 p1486 A69-21538

Solar flare energetic electron access to polar zones from measurements made by nine channel magnetic spectrometer on polar orbiting vehicle
09 p1577 A69-21709

InAs thin film sensors using Hall effect to measure magnetic fields at cryogenic temperatures
10 p1696 A69-23717

Stationary Babinet compensator for measuring longitudinal solar magnetic fields by means of fringes introduced in spectroheliograms
11 p1880 A69-24433

Geomagnetic field vertical and horizontal intensities measured using proton magnetometer with coil theodolite
11 p1889 A69-25435

Solar and lunar/solar harmonics determination, noting effects of moon on values of horizontal magnetic component
11 p1965 A69-25555

Airborne magnetometer application for remote measurement of ocean wave spectra, obtaining wave noise power spectra and wave height profile
12 p2075 A69-26998

Geomagnetic field components measurements from moving object, investigating astronomical orientation applicability for three component geomagnetometer
13 p2257 A69-28705

Magnetosensitive quartz element with suspended magnet and two mirrors for recording magnetic variations
14 p2446 A69-29084

Crystallographic classes of ferrites for microwave devices, discussing magnetic properties, applications and work on polycrystalline yttrium-calcium iron-vanadium-indium garnet
15 p2670 A69-31208

Magnetic anisotropy and porosity from approach to saturation of polycrystalline ferrites based on magnetization measurement
16 p2825 A69-31700

Plasma magnetic field and electron density measured by Faraday rotation using resonant gas laser radiation
16 p2822 A69-32041

Geomagnetic secular variations calculated by comparison of satellite, oceanic and aeromagnetic surveys
16 p2783 A69-32529

Separation of normal geomagnetic field component from limited length measurements by moving averages, considering error and inhomogeneity of anomalous field
16 p2783 A69-32532

Magnetic declination from moving objects measured by geomagnetic vector projection in solar direction
16 p2783 A69-32533

Magnetic materials simulation for satellite stabilization device based on magnetic hysteresis, using mathematical models and direct magnetic measurements
17 p2945 A69-33235

Zeeman effect measurement revealing magnetic fields in interstellar neutral H clouds
18 p3190 A69-34291

AC technique using lock-in power amplifier SNR for measuring galvanomagnetic and Shubnikov-de Haas effects, noting error reduction
19 p3312 A69-36375

Geomagnetic field total vector modulus secular variations from airborne measurements
20 p3522 A69-37061

Magnetic measurements of active regions at various levels of solar atmosphere, discussing chromospheric cold and hot region, faculae magnetic fields, etc
22 p4010 A69-39991

Shock discontinuities in solar wind measured by magnetic field and plasma instruments on Explorer 34, applying Rankine-Hugoniot relations
22 p4020 A69-40304

Impedance of inhomogeneous earth from magnetic and electric fields and geomagnetic potential measurements
23 p4157 A69-41867

Performance test of German MPD plasma rocket engine with augmented magnetic field and 5-10 kw output, describing integral measurement procedure and observed phenomena
[DGLR-69-024D]
23 p4202 A69-41927

Error sources in magnetic field measurements using magnetic probes in high temperature plasmas, discussing detection, correction and elimination [AIAA PAPER 68-727] 24 p4316 A69-43571

MAGNETIC METALS

U METALS

MAGNETIC MIRRORS

Penning discharge in inhomogeneous magnetic mirror field, observing high burning voltage at low current in rarefied hydrogen plasma 01 p0133 A69-11218

Thermalization of kinetic energy of plasma flow by shock phenomena produced by magnetic mirror field 02 p0289 A69-12176

Ion cyclotron wave generation in RF self sustained mode improved by installing grid structures in plasma near magnetic mirrors 03 p0474 A69-13113

Two dimensional equilibria for high beta mirror devices found by solving Vlasov equation and Ampere law, including particle loss 03 p0475 A69-13152

Polynomial representations of mirror cusp fields produced by combination of mirror coils and loffe /multipole/ bars 06 p0966 A69-17522

Longitudinal electrostatic oscillations in plasma with Fermi distribution of energies, noting oscillation frequency dependence on electron density 08 p1359 A69-19985

Nonadiabatic and stochastic mechanisms for cyclotron resonance trapping and heating in magnetic mirror geometries 08 p1364 A69-20518

Electron cyclotron resonance absorption of injected radiation magnetic mirror, noting effect of RF heating on plasma electron distribution 08 p1364 A69-20519

Heating of collisionless plasma in magnetic mirror by random electric field transverse to magnetic field 08 p1368 A69-20805

Phase characteristics and magnetic mirrors effect on charge motion in spatially periodic magnetic field 09 p1551 A69-22036

Stochastic model of electron cyclotron heating, calculating energy gain during transit of magnetic mirror field in presence of microwave electric field 09 p1551 A69-22038

Rotating plasma behavior in magnetic mirror trap, using radial electric field 10 p1740 A69-23716

Longitudinal electric field distribution and charged particle density in magnetic mirror under potential difference between magnetic equator and plane 10 p1689 A69-24204

Electron confinement in magnetic mirror geometry supplemented with RF quasi-potential barriers, considering gas scattering 11 p1924 A69-24306

Centrifugal instability of plasma column generated by cyclotron absorption of microwave power in magnetic mirror field 11 p1931 A69-25366

Low beta fusion research in open end magnetic mirrors covering scope, end losses, fusion economics, flute instability, stabilization, etc 14 p2498 A69-29843

Magnetic mirrors, Doppler and relativistic effects, wave attenuation and radiation pressure during gyroresonant particle acceleration in nonuniform magnetostatic and HF fields 14 p2499 A69-29845

Charged particle motion in magnetic mirror trap, observing time dependence with respect to orbital magnetic moment conservation 15 p2659 A69-30724

Axially symmetric magnetic fields for constant radius annular electron beams reflection, applying results to design of reflex klystron millimeter oscillator 19 p3267 A69-35930

MAGNETIC MOMENTS

Lunar magnetic moment and surface field, discussing Explorer 35 field measurements 03 p0514 A69-14005

Electron anomalous magnetic moment effect on nonlinear Lagrangian of electromagnetic field, deriving additional nonlinear corrective term 08 p1353 A69-19781

Quantum theory of electron gas with anomalous magnetic moments in intense magnetic fields, noting pair creation from thermodynamic energy in system 08 p1353 A69-19782

Magnetic sublattices interactions in gadolinium ferrite garnet, estimating magnetization level temperature dependence 08 p1374 A69-21186

Motion equations for conducting paramagnetic fluid in magnetic field derived, including MHD equations and equation determining magnetic moment variation rates 11 p1932 A69-25465

Magnetic sublattices interactions in gadolinium ferrite garnet, estimating magnetization level temperature dependence 18 p3183 A69-35155

Plasma acceleration away from rotating magnetized astrophysical objects analyzed and applied to pulsar NP 0532 for magnetic moment and mass loss rate calculations 20 p3598 A69-37419

Contactless correcting devices based on magnetic moments for automatic control 21 p3685 A69-38453

Ferromagnetism stable state in degenerate electron gas and magnetic fields in gravitationally collapsed bodies based on total microscopic magnetic moments associated with Landau level electrons 21 p3798 A69-38600

Satellite stabilization by earth magnetic field through conservative magnetic moments application 21 p3830 A69-39834

Spin compensated state of localized magnetic impurity moment in space, calculating size range of magnetic impurity spin/conduction electron spin correlation function 22 p3983 A69-40061

MAGNETIC PERMEABILITY

Second order susceptibilities of III-V and II-VI compounds using Phillips model, discussing second optical harmonic in III-V compounds with tetrahedral bonds 01 p0138 A69-10365

Vanadium-gallide alloys critical temperature of transition into superconducting state determined by measuring cast alloy samples magnetic permeability 03 p0483 A69-13023

Room temperature lattice spacings of PdIn, PtIn and PtSn alloys including magnetic susceptibility 05 p0779 A69-15832

Magnetic susceptibility of InP-GaAs solid solutions at various temperatures and for varying GaP content 07 p1200 A69-19013

Maxwell equations solution for linear induction MHD machine coil area field components, allowing for finiteness of magnetic permeability of iron 07 p1059 A69-19028

Lunar depth profiles of conductivity, dielectric constant and magnetic permeability from radar, radiothermic and magnetic measurements, discussing lunar models 07 p1216 A69-19221

Steady state operation of atomic hydrogen maser by analogy with electronic circuits, calculating atomic magnetic susceptibility using density matrix and deriving equivalent circuits 09 p1517 A69-22093

Input admittance response characteristics and input susceptance and input conductance of resonant reactive modulator with varactors and nonlinear losses 10 p1665 A69-24066

Field equations for plane-parallel induction MHD machines with allowance for winding zone thickness and magnetic permeability of iron 14 p2405 A69-29914

Magnetic field susceptibility testing method as defined in DOD Electromagnetic Compatibility Control documents MIL-STD-461 and MIL-STD-462 17 p2947 A69-34133

High field susceptibility in Fe and Ni and high field Mossbauer study in Fe relating results to band structure and models of ferromagnetism 19 p3383 A69-36050

Magnetic properties of stone, stony-iron and iron meteorites, discussing natural remanent magnetization origin in parent bodies and magnetic susceptibility 19 p3415 A69-36122

Melting points, electrical conductivity, Hall constants, magnetic susceptibility, density, bending strength, microhardness and elastic modulus of zirconium nitride in homogeneity range 20 p3558 A69-37014

Time-invariant magnetic fields at planetary surfaces resulting from permanent magnetic bodies or distorting effect of inhomogeneous permeability on main field, computing components 20 p3609 A69-38105

Ultrasonic oscillations effects on magnetic permeability of ferrite circuit components 23 p4138 A69-41873

MAGNETIC PISTONS

Detached MHD shock wave formation in front of magnetic field acting as piston moving collisionless plasma, discussing time dependence, Alfvén speed and plasma parameters 14 p2502 A69-29958

MAGNETIC POLES

Micropulsations at magnetoconjugate points in Arctic and Antarctic, noting diurnal and seasonal variations and latitude dependence 01 p0068 A69-11112

Earth pole coordinates calculated from latitude variations at Pulkovo, Greenwich and Washington, giving components of earth motion 03 p0420 A69-13094

High energy pure photon showers in cosmic ray emulsions in relation to production of magnetic pole-antipole pairs 06 p0996 A69-17883

Earth dipole magnetic field effect on bearing deviation in HF transionospheric propagation analyzed by computer ray tracing 07 p1086 A69-19224

Earth pole coordinates calculated from latitude variations at Pulkovo, Greenwich and Washington, giving components of earth motion 14 p2433 A69-28776

Remanent magnetization properties in alkalic igneous complexes at Magnet Cove and Potash Suphur Spring, Ark., calculating paleomagnetic pole during Cretaceous 14 p2445 A69-29884

Altitude asymmetry of instantaneous auroral oval plotted for geomagnetic pole and earth surface 20 p3522 A69-37056

Cosmic X ray background spectral measurement from rocket flight near geomagnetic pole 21 p3787 A69-38351

Magnetic monopole search using synchrotrons and cosmic radiation to destroy ferromagnetic materials binding in rocks, meteorites and deep sea sediments 22 p3981 A69-40197

MAGNETIC PROBES

Small metallic sphere detection by electromagnetic induction method, emphasizing masking effect of resistive half space below scatterer 01 p0047 A69-10974

Magnetic probes characteristics measurement for frequency range from 10 kc to 50 mc, using quenching resistors 08 p1313 A69-20120

Analytic investigation of spectrum of electrical signals induced by spherical defects in ferroprobe sensors 10 p1675 A69-24072

Magnetovariational sounding procedure for determining vertical distribution of earth mean electrical conductivity using geomagnetic field spatial derivatives for spherical earth 14 p2438 A69-29081

Magnetic monopole search using synchrotrons and cosmic radiation to destroy ferromagnetic materials binding in rocks, meteorites and deep sea sediments 22 p3981 A69-40197

High temperature magnetic analysis of metallurgical structure of high strength steels and composites, including phase transformation and matrix grain structure 01 p0093 A69-10111

Applied magnetics - IEEE Conference, Washington, D.C., April 1968 01 p0045 A69-10712

Wall streaming, creeping and parade motion in Ni-Fe films excited by hard axis pulses
[IEEE PAPER 11.8] 01 p0138 A69-10717

Electrical, optical, magnetic and structural properties of titanium oxide, stressing transition difference with vanadium oxide 03 p0490 A69-13923

Ferrite materials characteristics related to choice for use in waveguide devices, noting importance of low HF magnetic losses and thermal stability 05 p0810 A69-16792

Magnetic and semiconducting properties of samarium boride, noting effect of decreasing temperature 07 p1200 A69-19403

Warm plasma magnetic interactions, discussing density waves, pair correlation function and transport coefficients 08 p1366 A69-20749

Meteoritic materials structure, composition and magnetic properties, supporting theory for solar system formation from supernova outbursts 09 p1593 A69-21581

High temperature magnetic testing and analysis of structure sensitive hysteresis properties 09 p1512 A69-22375

Stochastic and ergodic aspects of magnetic lines of force, discussing cosmic ray diffusion in interplanetary magnetic field 10 p1770 A69-24111

Force-free magnetic field integral properties, obtaining rate of decrease limitation via virial theorem 11 p1951 A69-24239

Electrical resistivity and magnetization saturation in cobalt alloys during formation of modulated structures 11 p1904 A69-24707

Magnetic crystallographic anisotropy of Li-Ga ferrite single crystals at temperature range measured by ferromagnetic resonance techniques 12 p2144 A69-26721

Magnetic models of pulsars and rotating neutron stars to explain narrowness of radiation beam in polar diagram 12 p2172 A69-27168

Phase composition and Co content effect in WC-Co and WC-TiC-Co alloys on magnetic properties behavior 13 p2275 A69-27343

Exchange interactions in lithium ferrite aluminates, measuring spontaneous magnetization by ballistic technique from 77 K to Curie point 13 p2320 A69-27995

Polycrystalline Ca-V garnets and Mg-Cr ferrites magnetic properties after adding rare earth elements 13 p2320 A69-27999

Substituted lithium ferrites analyzed to obtain materials with small initial magnetic losses at different microwave ranges 13 p2320 A69-28000

Magnetic properties of ferrites with garnet structure, discussing temperature effect on magnetic states of Gd, Li, Y and Lu sublattices 13 p2323 A69-28564

Equation system for asynchronous MHD generator operating in self oscillating mode derived and solved 14 p2405 A69-29457

Solar corona magnetic field and polar rays, emphasizing field topology and local magnetic structure 14 p2525 A69-29718

Rare earth niobates magnetic properties measured in pulsed magnetic fields 15 p2667 A69-30195

Magnetism and magnetic materials - IEEE and AIP Conference, New York, November 1968 15 p2668 A69-30683

Faraday effect for magnetic properties of chromium tribromide along various isotherms near critical point, confirming scaling laws 15 p2668 A69-30686

Crystallographic classes of ferrites for microwave devices, discussing magnetic properties, applications and work on polycrystalline yttrium-calcium iron-vanadium-indium garnet 15 p2670 A69-31208

Double shock method for detecting pressure limits in magnetic phase transition of solids 16 p2825 A69-31696

Gravity gradient satellite stabilization and magnetic hysteresis damping systems, outlining energy dissipation device involving torques 17 p3047 A69-33231

Directionally solidified Co-Nb eutectic alloys mechanical properties and magnetic performance for elevated temperature space applications 19 p3341 A69-35542

Transverse electromagnetic wave propagation in cylindrically stratified axially magnetized plasma, obtaining plasma properties profiles from method for isotropic media 19 p3266 A69-35619

Magnetic test facilities at ESTEC consisting of system for geomagnetic field compensation and facility for magnetization and demagnetization, testing ERSO satellite models 20 p3512 A69-38279

Magnetic ordering in dysprosium phosphate observed by high resolution spectral line intensity measurements, finding Neel temperature 21 p3773 A69-38331

Magnetic crystallographic anisotropy of Li-Ga ferrite single crystals measured by ferromagnetic resonance techniques 21 p3781 A69-39134

Magnetic hysteresis dynamic model suitable for digital computer simulation of near-earth satellite attitude motions damping compared with experimentally generated loops [AIAA PAPER 69-833] 21 p3821 A69-39364

Phase diagram, dielectric and magnetic properties of Bi manganate/Pb titanate solid solutions of perovskite structure, showing dependence on composition and temperature 22 p3996 A69-41163

Al-Ni-Co alloys precipitation mechanism effect on magnetic properties, including heat treatment and Ti alloying effects 23 p4175 A69-41298

MAGNETIC PUMPING

Heating of nonuniform plasma cylinder in constant magnetic field by magnetic pumping with oscillating magnetic field, determining energy absorption 02 p0288 A69-12167

Quantum paramagnetic amplifier using natural andalusite single crystal and operating with four level pumping 04 p0577 A69-14781

Plasma ion heating by external stochastic HF field, noting avoidance of special thermalization processes 09 p1553 A69-22527

Parametric excitation of spin waves during parallel pumping of rubidium nickel fluoride ferrite, relating relaxation time and temperature 21 p3781 A69-39069

MAGNETIC RECORDING

Rotary head units used in telemetry magnetic recorders, explaining concepts and advantages of rotary scanning 07 p1077 A69-18826

Effects, measurement and analysis of flutter in instrumentation recorders 07 p1133 A69-19118

Computer simulation of unbiased digital recording composed of sequential computations intended for various bit densities [IEEE PAPER 3.3] 09 p1461 A69-22562

Dual inertia magnetic tape recorder/reproducer combining low wideband flutter and low time base errors 10 p1693 A69-23289

Signal to noise ratio in spectral composition of FM signals in magnetic recorder channels, taking into account parasitic FM and AM 11 p1834 A69-24612

Thermistor instrument for remote sensing, magnetic synchronous recording and linear display of temperature 14 p2449 A69-29562

Recording technique for measuring short period variations of radio signal reflections altitudes from ionosphere applicable to fast ionospheric processes 20 p3521 A69-37054

Wideband telemetry recording error compensator for reducing flutter and interchannel time-base error in magnetic tape instrumentation 23 p4137 A69-41775

MAGNETIC RELAXATION

U SPIN-LATTICE RELAXATION

MAGNETIC RESONANCE

NT ELECTRON PARAMAGNETIC RESONANCE
NT FERROMAGNETIC RESONANCE
NT NUCLEAR MAGNETIC RESONANCE
NT PARAMAGNETIC RESONANCE
NT PROTON MAGNETIC RESONANCE

Standing Alfvén wave resonances in liquid sodium 01 p0131 A69-10820

Cold plasma magnetoacoustic resonance, showing nonlinear exciting magnetic field dependence on polarity and energy 09 p1548 A69-21668

Geomagnetic field Pc 3 and Pc 4 pulsation generation mechanism explained by resonance of MHD waves in force tubes adjoining radiation belt maximum 10 p1689 A69-24206

Magnetoelastic resonant interaction of microwave longitudinal phonons propagating at right angles to magnetic bias applied to YIG rod axis 15 p2565 A69-30184

MAGNETIC RIGIDITY

Oriented nuclear emulsion stack for determining differential rigidity spectrum of primary He nuclei between 12 and 35 bv 06 p0988 A69-17276

Permanent magnet and nuclear emulsion for measuring He nuclei momentum spectra up to 100 gv rigidity 06 p0989 A69-17277

Rigidity spectra of total primary cosmic radiation by ascending or descending balloon-borne detectors in atmosphere, with changing mean response energy 06 p0989 A69-17279

Proton and alpha particle fluxes above specified vertical geomagnetic cut-off rigidity measured by balloon-borne Cerenkov scintillation counter telescope 14 p2511 A69-28951

MAGNETIC SHIELDING

Soft magnetic materials, ferrites and magnetic particle composites as two layer laminates for shielding in audio and microwave frequencies 09 p1500 A69-22310

Superconductivity methods to neutralize ambient magnetic field by free electrons motion for nonmagnetic environments 13 p2244 A69-28604

Residual field in inner airspace of magnetostatic shielding thin walled stretched ellipsoids of revolution 13 p2237 A69-28610

Earth core conductivity effects on ionospheric shielding against geomagnetic changes from external sources, noting earth-ionosphere coupling 17 p2959 A69-32925

MAGNETIC SIGNATURES

Flares and chromospheric absorption features locations compared with H alpha magnetograms, noting double emission ribbons development 09 p1579 A69-22179

F region during earth passage through solar corpuscular stream, analyzing critical frequencies, virtual height, magnetogram H component and ionospheric storm effects attributed to downward drift 17 p2967 A69-33989

MAGNETIC SPECTROSCOPY

Magnetic electron multiplier used as particle detector in time-of-flight (TOF) mass spectrometers can introduce mass discrimination effects 04 p0599 A69-15014

Permanent magnet and nuclear emulsion for measuring He nuclei momentum spectra up to 100 gv rigidity 06 p0989 A69-17277

Gas laser application to magnetospectroscopy of graphite, Bi, As and pyrolytic graphite single crystals 16 p2796 A69-31822

Spectroscopic azimuthal and axial measurement of jet velocity in MPD X9 rocket engine by spectrograph and Fabry-Perot interferometer [DGLR-69-024B] 23 p4202 A69-41925

MAGNETIC STARS

Plasma acceleration away from rotating magnetized astrophysical objects analyzed and applied to pulsar NP 0532 for magnetic moment and mass loss rate calculations 20 p3598 A69-37419

MAGNETIC STORAGE

Reading amplifier for thin magnetic film memory stores permitting tunnel diode register positioning 04 p0579 A69-15319

Magnetic reversible phase holograms on thin film Mn-Bi by Curie-point writing technique 10 p1706 A69-24007

Time logarithmic switching to explain anomalous delay in threshold response of MgMnZn ferrite memory cores 15 p2668 A69-30688

Computer memory with digit wire magnetic circuit /torus/, discussing capacity, access and output 20 p3503 A69-37402

CRT display system coupling interface with magnetic storage determined from algorithms and time diagrams, describing character storage and system logic design 22 p3908 A69-40936

MAGNETIC STORMS

- Low latitude m arcs in 6300 angstrom emission during intense geomagnetic storm related to auroral red oxygen emission peak
01 p0062 A69-10136
- Geomagnetic disturbance activity forecasting method using solar coronal streams, noting reliability of test forecasts
01 p0150 A69-10372
- Magnetic storm principal phase explained by interaction between quasi-trapped particles stream and magnetosphere
01 p0144 A69-10573
- Equatorial enhancement of storm sudden commencements and sudden impulses in horizontal component in American Zone during IGY/IGC
01 p0068 A69-11116
- Solar and geophysical activity during February 1965 and March 1966 indicating geomagnetic activity on 27-day recurrence diagram
01 p0068 A69-11118
- Solar X-ray high activity level during spring 1966 connected with gamma type magnetic solar regions and correlated with ionospheric effects
01 p0146 A69-11119
- Solar, interplanetary and magnetospheric electromagnetic events before and during magnetic storm from ground observatory and earth satellite data
01 p0156 A69-11120
- Solar proton event generating sudden commencement magnetic storm, discussing effects on outer belt electrons as observed by Explorer 26 and time delay
01 p0146 A69-11124
- Magnetic field data from OGO-2 spacecraft and surface magnetic observatories, noting magnetic storm occurrence and magnetospheric inflation and detection of polar ionospheric currents
01 p0069 A69-11125
- Latitudinal variations in auroral and subauroral region F layer diurnal and magnetic storm pattern shown by scintillation measurements
01 p0069 A69-11127
- Magnetic field behavior at synchronous orbit during magnetospheric substorms, interpreting satellite observed data in terms of partial ring currents
01 p0075 A69-11225
- Ring current particle energy density distribution for symmetric portion of magnetic storm derived from current magnetic field profile measurements
01 p0147 A69-11227
- Solar plasma observations during magnetic storms, discussing shocks and tangential discontinuities, geomagnetic variations and He
01 p0076 A69-11234
- Upper atmosphere oxygen emission and heating during geomagnetic disturbances
02 p0235 A69-11421
- Polar ionosphere heating by spill-over electron energy during strong geomagnetic disturbances, giving mathematical representation
02 p0237 A69-11664
- Perturbed geomagnetic field structure during magnetic storm recovery phase calculated by magnetosphere magnetic field model, accounting for various external field sources
02 p0237 A69-11666
- Relationship between polar geomagnetic disturbances and DR variations value of geomagnetic field
02 p0238 A69-11672
- Dispersion measurements and spectrum variations analysis to study pearl micropulsations frequency variation during sudden deformation of magnetosphere by magnetic storms
02 p0240 A69-11697
- Vertical and horizontal components of geomagnetic storm main phase magnetic variations applied to vertical electromagnetic soundings of earth
02 p0240 A69-11700
- Characteristics of electrovortices and auroral electrojets of polar disturbance field, discussing dynamics during geomagnetic storms
02 p0240 A69-11723
- Parameters of solar wind responsible for geomagnetic activity, relating magnetic storm features to physical structure of interplanetary space and solar wind bubbles
02 p0240 A69-11725
- Hydromagnetic emissions observed at Antarctic auroral zone, discussing relation to sudden storm commencement
02 p0241 A69-11726
- Geomagnetic and interplanetary field variation measurements from Mariners 2, 4 and 5, noting correlation between solar phenomena and geomagnetic storms
02 p0241 A69-11737
- Magnetic storm of January 1967 due to 3B solar flare noting spacecraft observations, intensity, magnetospheric distortions and solar wind dynamics
03 p0500 A69-13430
- Ionospheric F 2 layer following SSC magnetic storm, noting similarity with polar aurora region
03 p0423 A69-13531
- Ionospheric parameters variation during SC effect as function of solar and magnetic activities
03 p0423 A69-13534
- Sudden acceleration of electrons in magnetosphere and magnetic tail related to magnetic bays, noting acceleration occurrence first in magnetosphere during polar substorm
04 p0594 A69-15122
- East-West aligned fast auroral waves, suggesting origin in hydromagnetic processes occurring near equatorial plane
04 p0594 A69-15123
- Charged particles injection into captured radiation zone of Van Allen belts during main phase of magnetic storm indicated by proton data analysis
05 p0815 A69-16057
- Elektron satellite recorded sporadic radio emission noting relationship to geomagnetic disturbances and dependence on satellite position
05 p0824 A69-16059
- F region seasonal and magnetic storm behavior from region daily behavior showing global upper atmospheric circulation
05 p0757 A69-16404
- Ionospheric electron content and slab thickness changes during magnetic storm in June 1965 using Faraday rotation and critical frequencies
05 p0759 A69-16420
- Book on polar and magnetospheric substorms including daily variation data, satellite observations, etc
06 p0915 A69-16832
- Vertically moving ionized formations relation to solar and magnetic activity
06 p0920 A69-17730
- Magnetospheric ring current effect on main phase of geomagnetic storms, calculating diurnal storm-time portion of perturbation field
07 p1122 A69-18296
- Equatorial hourly storm time part of disturbances field for 1958, discussing magnetic storm effects
07 p1124 A69-18822
- Magnetospheric magnetic field ring current asymmetry during different phases of geomagnetic storm observed by Explorer 26 and Vela 2 satellites
07 p1129 A69-19611
- Trapped electron belts formation and storm time behavior assuming presence of bimodal diffusion from low energy source at magnetosphere outer edge
08 p1307 A69-20184
- Midday enhancement of sudden commencements and sudden impulses in H and Z at equatorial stations in Indian zone during IGY
08 p1307 A69-20187
- Geomagnetic storms, substorms and auroral displays as functions of processes in solar wind and upper atmosphere
08 p1307 A69-20188
- Auroral zone X ray measurements emphasizing temporal intensity variations, energy spectra changes and source region movements during magnetospheric substorms
08 p1379 A69-20534
- Auroral oval boundary and median line variations with increasing magnetic storm time intensity, noting ring current effect on polar aurora location
09 p1485 A69-21532
- Charged particles equations of motion in earth magnetosphere in polar storms, considering auroral zone, diurnal variations and electron and proton velocities
09 p1485 A69-21535
- Aeronomical parameters effect on ionospheric effect of SC magnetic storm, calculating maximum ionization levels, F layer ionization and vertical ionization profile parameters
09 p1486 A69-21546
- Upper atmospheric density relation to AE indices sum and solar radio flux during geomagnetic disturbances
09 p1488 A69-21657
- Low energy solar cosmic ray proton flux characteristics observed by Injun 1 satellite after July 1961 sudden commencement magnetic storm
09 p1576 A69-21707
- Average geomagnetic storm ranges as function of latitude, noting disturbances caused by ring and ionospheric currents
09 p1489 A69-21715
- Sudden commencement associated discontinuities in interplanetary magnetic field observed by IMP 3 satellite, stressing shocks and tangential and rotational discontinuities
09 p1598 A69-22183
- Auroral electrojet precursors and geomagnetic variations before onset of bays, noting satellite observations
10 p1681 A69-22804
- Simultaneous interplanetary magnetic field measurements by geocentric satellites Explorer 33 and IMP 3 of MHD shock wave associated with July 8, 1966 sudden storm commencement
10 p1783 A69-23773
- Topside ionospheric electron density profiles compared for magnetically quiet and disturbed periods surrounding December 17, 1962 magnetic storm
10 p1685 A69-23835
- Magnetic lines of force penetration into magnetosphere accompanied by plasma insertion generating ring current responsible for main phase of magnetic storm
10 p1687 A69-23923
- Midlatitude ionospheric disturbances accompanied by auroral type radio absorption observed by radio astronomy and probes during May 26, 1967 storm
10 p1688 A69-23935
- Harmonic analysis of magnetic storms initial phases having steep leading edges and distinct steady portions, showing homogeneity in first approximation
10 p1688 A69-23938
- Outer radiation zone electron intensities during magnetic storms for morphology of zone electron acceleration mechanisms
11 p1950 A69-25147
- Auroral infrasonic waves morphology related to temporal and spatial distributions of supersonic auroral motions during polar magnetic storms
11 p1878 A69-25152
- Solar flare and magnetic storm signals from ATS 1 geostationary satellite on May 28, 1967, deriving total electron content
11 p1951 A69-25161
- Magnetospheric substorm as discharge process of associated electric current system, discussing relaxation processes, explosive release of energy, etc
11 p1879 A69-25249
- Auroral arcs drift as function of polar storm initial phase, noting agreement with satellite data on plasma motion in magnetosphere
12 p2071 A69-26694
- Auroras and polar magnetic substorm observations limited comparison due to magnetospheric models inability to interpret daytime precipitation zones and particle energy spectra
12 p2072 A69-26740
- Solar wind induced magnetospheric convection for interpretation of geomagnetic storms, aurora and trapped particle belts, noting electric fields
12 p2073 A69-26749
- Solar-terrestrial environment, discussing mathematical development of solar wind, satellite measurement, magnetic storms, aurora and cosmic rays
12 p2161 A69-26941
- Satellite observation of intensity and distribution of VLF emission at medium latitude during magnetic storm interpreted by transverse resonance plasma instability
12 p2073 A69-26947
- Polar ionosphere heating by spill-over electron energy during strong geomagnetic disturbances, giving mathematical representation
13 p2257 A69-28695
- Perturbed geomagnetic field structure during magnetic storm recovery phase calculated by magnetosphere magnetic field model, accounting for various external field sources
13 p2257 A69-28697
- Relationship between polar geomagnetic disturbances and DR variations value of geomagnetic field
13 p2257 A69-28703
- Dispersion measurements and spectrum variations analysis to study pearl micropulsations frequency variation during sudden deformation of magnetosphere by magnetic storms
13 p2258 A69-28728
- Vertical and horizontal components of geomagnetic storm main phase magnetic variations applied to vertical electromagnetic soundings of earth
13 p2258 A69-28731
- Magnetic storm time variations of electron concentrations in upper ionosphere near north geomagnetic pole, discussing magnetic time, altitude and latitude dependence
14 p2510 A69-28939

MAGNETIC SURVEYS

Large amplitude pulsations in magnetic field magnitude and proton fluxes observed by satellite during magnetic storm compared with various models
14 p2434 A69-28947

Auroral electrojet index in relation to magnetic storm sudden commencements, ring current main phase and energetic solar protons
14 p2511 A69-28954

Ionospheric effect sudden commencement parameters of magnetic storm related to distance from origin in polar regions
14 p2435 A69-29051

Oscillations intervals with diminishing period observed during magnetic storms, noting relationship to midlatitude disturbances in F region
14 p2436 A69-29060

September 14, 1966 magnetic storm observation by Explorer 33 in geomagnetic tail and by polar stations, studying relation in magnetosphere and on earth
14 p2438 A69-29078

Nonuniform ring current belt growth, discussing associated magnetospheric substorms
14 p2513 A69-29123

Frequency time dispersion of storm sudden commencement micropulsations, noting polarization effects
14 p2440 A69-29129

Geomagnetic storm induced temporary radiation zones located by determining Explorer 30 attitude and spin axis orientation
14 p2514 A69-29384

Geomagnetic storms caused by plasma streams impinging on earth related to preceding cosmic flares, discussing polar cap absorption and ground level effects
14 p2514 A69-29416

Amplitude and frequency spectra for Ipc pulsations during geomagnetic storms
14 p2441 A69-29417

Statistical analysis of data for 18-19 June 1936, estimating expressions involving external and internal components of geomagnetic field at storm time disturbances
14 p2444 A69-29883

Auroral substorms concept extended to include associated effects at all local times throughout magnetosphere, considering particle precipitation influence on substorms in midnight sector
15 p2593 A69-30008

Auroral substorm westward traveling surge and poleward, eastward and equatorward motion analyzed from all sky photographs
15 p2595 A69-30214

Auroral displays observed in combined field of view of polar all sky camera networks, considering simultaneous geomagnetic disturbances over Alaska
15 p2595 A69-30215

Magnetic storm principal phase explained by interaction between quasi-trapped particles stream and magnetosphere
15 p2675 A69-30743

Magnetic storm effects on electrons and protons in outer belt, using satellite data for intensity and differential energy spectra
15 p2676 A69-31314

Gravity waves in thermospheric heating during magnetic storm, discussing electron density and temperature and ion velocity variations
15 p2605 A69-31435

Worldwide changes in geomagnetic field, determining causes by examining magnetic field and plasma data from solar wind and classifying as SSC or SI
16 p2847 A69-31963

Simultaneous solution of continuity and heat conduction equations for ionospheric electrons, ions and neutral species for studying F region magnetic storm behavior
16 p2775 A69-32083

Radio wave emission bursts at 28 MHz at onset of nighttime absorption dip and close to auroral zone from riometer recordings, noting relation to geomagnetic storms
16 p2775 A69-32085

Geomagnetic storms generation interpreted using solar coronal arrangements above central meridian
16 p2777 A69-32100

Low latitude asymmetric disturbance field analyzed using equivalent current vectors during magnetic storms, allowing for solar quiet day variation and declination
16 p2778 A69-32184

Low latitude sporadic E layer associated with geomagnetic activity studied in Hong Kong using proton precession magnetometer and standard ionosonde
16 p2779 A69-32195

Infrasonic waves identified with supersonic auroral electrojets crossing zenith from northwest during substorm activity
16 p2780 A69-32303

Interplanetary magnetic fields from Explorer 33 magnetometer relationship to surface geomagnetic variations emphasizing unified view
16 p2862 A69-32309

Auroral oval boundary and median line variations with increasing magnetic storm time intensity, noting ring current effect on polar aurora location
16 p2783 A69-32527

Charged particles equations of motion in earth magnetosphere in polar storms, considering auroral zone diurnal variations and electron and proton velocities
16 p2783 A69-32530

Aeronomical parameter effect on ionospheric effect of SC magnetic storm, calculating maximum ionization levels, F layer ionization and vertical ionization profile parameters
16 p2783 A69-32541

Polar substorms resulting from interaction between magnetized plasma stream and geomagnetic field in magnetosphere
16 p2852 A69-32620

Electromagnetic /ULF, VLF/ and light emissions development during magnetic substorms, discussing varied pulsations present in development phases
16 p2788 A69-32648

Magnetic storm energy balance, assessing solar corpuscular flux energy consumption in and beyond magnetosphere
17 p2964 A69-33959

Planetary ionospheric effect of 15 July 1959 sudden commencement magnetic storm based on N/h profiles of earth day and night sides
17 p2967 A69-33987

Initial phases of ionospheric and magnetic storms compared from data, noting good correlation due to ionospheric fields influence
17 p2967 A69-33988

Geomagnetic storms and Forbush decreases accounted for by interplanetary solar corpuscular streams effects described by interplanetary magnetic field structure, noting independence of flares
18 p3187 A69-34937

Electron temperature, density and magnetic disturbances measurements at 1000 km compared with visual observations during 25-26 May 1967 magnetic storm and aurora
18 p3129 A69-34954

Whistlers occurrence and dispersion rate variations from data obtained at lower latitudes during magnetic storms
18 p3102 A69-34967

Ionospheric electric current systems dynamics in polar latitude in relation to 1966 geomagnetic storms
18 p3130 A69-35188

Geomagnetic storms data compilation /1957-1964/, showing solar activity effect on solar corpuscular stream velocity
20 p3587 A69-37036

Magnetic field variation rates characteristics during magnetic storms investigated for longitudinal dependence and influence of equatorial electric current
20 p3520 A69-37037

Gokhberg magnetovariational sounding method for single location analysis of magnetic storms early phases, comparing ground station network observations
20 p3521 A69-37040

Upper ionosphere Thomson scatter, electron number density measurements and topside sounding results during geomagnetic storms using electrodynamic drift theory
20 p3530 A69-37872

Charged particles injection into captured radiation zone of Van Allen belts during main phase of magnetic storm indicated by proton data analysis
20 p3591 A69-37967

Elektron satellite recorded sporadic radio emission noting relationship to geomagnetic disturbances and dependence on satellite position
20 p3606 A69-37969

Three dimensional current systems constructed semiquantitatively for polar magnetic substorms based on magnetic field distribution on earth surface
20 p3533 A69-38085

Doppler broadened atomic O emission line measurement providing indication of exospheric temperature storm-time variations
20 p3546 A69-38099

Auroral zone geomagnetic pulsations on nightside and dayside of earth related to magnetospheric substorm and particle precipitation
21 p3708 A69-38497

Polar upper atmospheric phenomena interpreted as magnetospheric substorm manifestations, discussing role of asymmetric ring current formation
21 p3710 A69-38504

Charged particle acceleration in interplanetary plasma from analysis of cosmic ray intensity increases accompanied by SC magnetic storms and Forbush effects
21 p3788 A69-38587

Explorer 34 observations of hydrogen and He ions in solar wind, noting number density variations and tentative association with geomagnetic storms
22 p4004 A69-40305

Geomagnetic disturbances and cosmic ray storm of 25-26 May 1967 caused by McMath plage region 8818, noting Forbush decreases and ring current effect
22 p4004 A69-40307

Cosmic ray proton cut-off increase at high latitudes during magnetospheric substorms, using balloon time observations of nuclear gamma ray flux
22 p4005 A69-40509

Corpuscular radiation intensity measurements in upper atmosphere at midlatitudes by meteorological probe during geomagnetic storm, noting radio wave absorption
22 p4008 A69-41104

Sudden and gradually developing geomagnetic storms with 27 day recurrence period and relation to 11 year solar activity cycle
23 p4156 A69-41849

Geomagnetic ring current effect on position of auroral absorption zone in northern polar region, noting storm time part of disturbance
23 p4157 A69-41859

Topside ionosphere response to magnetic storms, using Explorer 22 satellite electron concentration and temperature measurements
23 p4161 A69-42438

Electron intensities and substorm drift effects in outer radiation belt using two satellite technique
24 p4309 A69-43172

Magnetospheric electron sudden intensity increases correlated with magnetic substorms occurrence at midnight meridian from ATS 1 observation
24 p4367 A69-43173

Thermosphere dynamic response to low altitude geomagnetic disturbances, showing time lag dependence on perturbation intensity
24 p4310 A69-43180

MAGNETIC SURVEYS

Aeromagnetic profiles across Reykjanes ridge southwest of Iceland, noting magnetic anomalies symmetry and ocean floor spreading since Mesozoic
04 p0592 A69-14660

Structure, temporal behavior, shape and length of earth magnetic tail via satellite mapping
07 p1208 A69-19363

Secular variations distribution on earth surface, plotting isopore charts from mean annual values of magnetic elements /1960-1965/
10 p1687 A69-23920

Interplanetary magnetic fields from Explorer 33 magnetometer relationship to surface geomagnetic variations emphasizing unified view
16 p2862 A69-32309

MAGNETIC SUSPENSION

Multichannel telemetering device for magnetically suspended or free flight wind tunnel models noting strain gage pickups, switching and auxiliary circuits [ONERA-TP-643]
02 p0226 A69-11623

Low g accelerometers including air-film, electrically suspended, vibrating string, semiconductor and ONERA [ONERA-TP-449]
05 p0766 A69-16749

Atmospheric humidity effect on efficiency of geomagnetic field scales with taut-strip suspension and temperature fluctuation
09 p1494 A69-21518

Centering force and initial rigidity of magnetically suspended bearings of integrating floating gyroscope with allowance for mutual inductance of exciting coils
09 p1497 A69-22104

Rational shape selection for magnetoelectroconductors of centering elements of magnetically suspended bearings, studying effects on initial rigidity
09 p1497 A69-22105

Magnetic suspension device replacing mechanical bearings of inertial guidance systems gyro rotors, evaluating device strength and stability
14 p2479 A69-29492

Rocket sled incorporating magnetic suspension system
15 p2585 A69-30361

Lift and drag determination for moving rectangular coils over infinite plane sheet for magnetic suspension and guidance for rocket sleds

17 p2946 A69-33789

Magnetic suspension system used as dynamic balance for wind tunnel models, discussing delta wing test results

19 p3292 A69-35738

Wind tunnel model one component magnetic support and balance system for sphere drag investigation at subsonic Mach numbers
[AIAA PAPER 68-401]

24 p4298 A69-43714

MAGNETIC SWITCHING

Time logarithmic switching to explain anomalous delay in threshold response of MgMnZn ferrite memory cores

15 p2668 A69-30688

Dynamic Kerr observations of high speed flux reversal and relaxation process in permalloy thin films by magnetooptical camera with Q switched ruby laser

19 p3383 A69-36446

MAGNETIC TAPE RECORDERS

U TAPE RECORDERS

MAGNETIC TAPES

Time coding system for recording balloon measurements on magnetic tape

05 p0762 A69-15825

Root mean square time delay error with respect to playback time and autocorrelation function of tape recorded sine wave for studying jitter spectra

07 p1132 A69-18827

High reliability magnetic tape recorders for satellite, aircraft and drone applications

07 p1133 A69-19104

Magnetic tape recording of ultrasonic test information with oscilloscope used for playback

07 p1117 A69-19697

Machine cutting tool for cutting and splicing endless magnetic tape 30 microns thick, noting film safety feature and nonmagnetic steel scissors

08 p1321 A69-20876

Magnetic tape recorder/reproducer for FM analog test data

10 p1691 A69-23233

Stiction friction on magnetic tape and contact surfaces noting effect of binders, plasticizers, humidity and temperature

19 p3312 A69-36285

MAGNETIC TRANSDUCERS

Pressure transducers with variable reluctance and magnetic signal transmission techniques

10 p1690 A69-23226

Signal conditioning for transducers covering piezoelectric devices, thermocouples, resistance transducers, reluctance and differential transformer sensors

10 p1691 A69-23228

MAGNETIC TRAPS

U PLASMA CONTROL

MAGNETIC VARIATIONS

NT GEOMAGNETIC MICROPULSATIONS

NT GEOMAGNETIC PULSATIONS

26-month periodicity in quiet day range of geomagnetic field horizontal force, noting similar periodicity in sunspot number and 16-month oscillation in both phenomena

01 p0063 A69-10427

Microstructure analysis and relationship between microvariations and macroscopic events, using magnetic variations recordings of IGY network

01 p0069 A69-11126

Solar plasma observations during magnetic storms, discussing shocks and tangential discontinuities, geomagnetic variations and He

01 p0076 A69-11234

Secular change examination in cislunar geomagnetic tail field gradient during summers of 1966 and 1967, using Explorer 33 and 35 results

01 p0077 A69-11237

Relationship between polar geomagnetic disturbances and DR variations value of geomagnetic field

02 p0238 A69-11672

Vertical and horizontal components of geomagnetic storm main phase magnetic variations applied to vertical electromagnetic soundings of earth

02 p0240 A69-11700

Numerical calculations for oscillatory solutions of system of nonlinear differential equations, noting circularly polarized magnetic oscillations observed near earth bow shock front

02 p0241 A69-11729

Charts summarizing daily solar phenomena, cosmic rays, geomagnetic variation, ionosphere, radiowave propagation and airglow observations in Japan

02 p0315 A69-11732

Geomagnetic and interplanetary field variation measurements from Mariners 2, 4 and 5, noting correlation between solar phenomena and geomagnetic storms

02 p0241 A69-11737

World maps highlighting differences in geomagnetic field at conjugate localities

02 p0245 A69-12737

Earth magnetic field variations, discussing source of field, dynamo theory and paleomagnetic evidence for polarity reversals

03 p0420 A69-12935

Elektron 2 satellite magnetic measurement of high latitude nocturnal magnetosphere, discussing variations, antisolar effect and elongation of magnetic field

03 p0422 A69-13505

Geomagnetic field quiet day solar variations current system calculated, using 2000 LT as zero level basis

03 p0424 A69-13541

Time dependent variations in magnetic fields of active sunspot clusters in photosphere observed by magnetograph

04 p0651 A69-14369

Dissipation time of sunspot magnetic field determined as function of minimum spot value

04 p0660 A69-15039

Interplanetary magnetic field fluctuations obtained by IMP 2

05 p0824 A69-16264

Global geomagnetic anomalies influence on longitudinal pattern of solar quiet day variations and in phases of second harmonics of components

06 p0920 A69-17734

Lunar core electrical conductivity determination based on induced magnetic field arising from time varying interplanetary magnetic field associated with solar wind plasma

07 p1215 A69-18832

Equatorial counter-electrojet and inverse quiet day solar diurnal variation current layers, noting regular diurnal variation horizontal component and latitude effect

08 p1306 A69-19884

Midday enhancement of sudden commencements and sudden impulses in H and Z at equatorial stations in Indian zone during IGY

08 p1307 A69-20187

Geomagnetic secular variations calculated by comparison of satellite, oceanic and aeromagnetic surveys

09 p1485 A69-21534

Mariner 2 data on large scale variations in magnetic field, solar wind density and temperature in interplanetary plasma

09 p1592 A69-21540

Geomagnetic field mean hourly values continuous smoothing from recordings at drifting arctic stations for determining time variations

09 p1487 A69-21553

Radial velocity, light and magnetic variations of HD 10783 from concurrent UVB photometric and Zeeman spectroscopic observations

09 p1600 A69-22197

VLF polar chorus emission and geomagnetic variations caused by compressions or expansions of magnetosphere

10 p1681 A69-22803

Auroral electrojet precursors and geomagnetic variations before onset of bays, noting satellite observations

10 p1681 A69-22804

Asymmetrical solar wind volume variations of magnetic inhomogeneities and cosmic ray absorption in earth atmosphere, including barometric coefficients of neutron component

10 p1760 A69-22844

Magnetic field decay in sunspot group 21034 during July 7, 1966 proton flare

10 p1766 A69-23759

Geomagnetic field variations in middle and high latitudes during proton flare event, discussing UV radiation and period and energy spectra

10 p1683 A69-23780

Lunar diurnal variation parameters at Irkutsk determined from IGY data concerning geomagnetic field components

10 p1687 A69-23918

Secular variations distribution on earth surface, plotting isopor charts from mean annual values of magnetic elements /1960-1965/

10 p1687 A69-23920

Microscale fluctuations in interplanetary magnetic field, considering proton thermal energy and magnetic field energy densities

10 p1785 A69-24100

Quantitative magnetic field models of magnetosphere for analyzing field configuration variations and adiabatic particle motion

12 p2072 A69-26738

Drift velocity of earth magnetic field based on spherical harmonic analysis of geomagnetic secular variation

12 p2077 A69-27111

Geomagnetic field daily variations, discussing observational techniques, observation analysis, S-field seasonal changes, equatorial electrojet, solar wind effects, dynamo theory, etc

12 p2077 A69-27143

Relationship between polar geomagnetic disturbances and DR variations value of geomagnetic field

13 p2257 A69-28703

Vertical and horizontal components of geomagnetic storm main phase magnetic variations applied to vertical electromagnetic soundings of earth

13 p2258 A69-28731

Electron concentration enhancement in upper atmosphere at polar latitudes, noting three independent zones and relation to magnetic local time

14 p2510 A69-28938

Power spectrum analysis and linear filtering for 27 day variation amplitude of geomagnetic disturbance subject to semiannual amplitude modulation

14 p2434 A69-28955

Magnetic field fluctuations of interplanetary plasma, considering anisotropic temperature instabilities

14 p2517 A69-29064

Magnetosensitive quartz element with suspended magnet and two mirrors for recording magnetic variations

14 p2446 A69-29084

Magnetic field variations in magnetosphere and interplanetary space correlated with polar magnetic disturbances from dynamic morphology data

14 p2441 A69-29387

Short period pulsations in solar magnetic fields and chromosphere, determining optimum conditions for formation of standing oscillations

15 p2688 A69-30556

Zeeman spectroscopy and UVB photometry of 17 Com and kappa Cnc, observing periodic magnetic and light variations

15 p2692 A69-30774

Nonlinear boundary value problems for isotropic plasma with known magnetic field, examining electromagnetic waves scattering at magnetic fluctuations

15 p2569 A69-30938

Solar cycle effect on high latitude magnetic activity, discussing annual variations and Lassen auroral zone model confirmation

15 p2598 A69-31207

ESRO 2 satellite observations of solar proton event of 9 June 1968, comparing flux profile variations across polar cap with magnetic changes at earth surface

15 p2677 A69-31347

Interplanetary magnetic field radial dependence from Mariner 4 measurements between earth and Mars, indicating fluctuations produced by dynamic processes in solar wind

16 p2856 A69-31964

Horizontal magnetic variation peak at eight degree dip latitude, noting F region contribution to magnetic tubes of force integrated transverse conductance

16 p2778 A69-32189

Satellite radio signal scintillation variations association with sporadic E and spread F and dependence on magnetic activity in Southern Hemisphere during sunspot minimum

16 p2780 A69-32307

Solar quiet day geomagnetic variations harmonic analysis with respect to time intervals centered around noon, defining parameters responsible for modulated Sq

16 p2781 A69-32452

Equations of transformation for hourly data harmonic terms used in computation and representation of solar and lunar daily magnetic variations

16 p2782 A69-32457

Semiannual variation in amplitude of solar daily quiet geomagnetic variation, discussing sunspot dependence of seasonal secondary minimum and maxima

16 p2782 A69-32459

Upper atmospheric winds to produce solar quiet day magnetic variations based on dynamo theory, illustrating solenoidal, irrotational and mixed winds

16 p2782 A69-32460

Geomagnetic secular variations calculated by comparison of satellite, oceanic and aeromagnetic surveys

16 p2783 A69-32529

Mariner 2 data on large scale variations in magnetic field, solar wind density and temperature in interplanetary plasma

16 p2864 A69-32535

- Geomagnetic field mean hourly values continuous smoothing from recordings at drifting arctic stations for determining time variations 16 p2784 A69-32548
- Solar magnetic field strength distribution in active region during proton flares, using statistical analysis 17 p3025 A69-34225
- Attitude stabilized rocket-released magnetometer for detection of earth field magnitude and direction changes 19 p3309 A69-35994
- OGO triaxial search coil magnetometer for measuring earth magnetic fluctuations, discussing design rationale and observation results 19 p3284 A69-36675
- Reversal rate of earth magnetic field deduced from observed and theoretical polarity interval length using hydrolic transmission line theory 19 p3304 A69-36869
- Magnetic field variation rates characteristics during magnetic storms investigated for longitudinal dependence and influence of equatorial electric current 20 p3520 A69-37037
- Geomagnetic field total vector modulus secular variations from airborne measurements 20 p3522 A69-37061
- Geomagnetic field model (POGO) to confirm eccentric dipole westward velocity secular decrease predicted by day length changes 20 p3523 A69-37490
- HD 188041 magnetic field variations from Zeeman measurements correlated to spectral variations 20 p3611 A69-38156
- Morphology of discrete polar cap and polar glow auroras, noting diurnal variations correlation with magnetic activity changes at low latitude 21 p3707 A69-38487
- Geomagnetic field horizontal component daily variations in relation to solar wind, noting effects of ambient field night side decrease 21 p3714 A69-38549
- Spatial gradient and amount of auroral radio absorption measured by riometers at magnetically conjugate and closely spaced stations 22 p3934 A69-39966
- Homogeneous conducting moon-solar wind interactions, describing time dependent lunar magnetic and electric fields induced by interplanetary magnetic field variations 22 p4023 A69-40518
- Disagreement between Mariner 2 and IMP 1 data concerning interrelation between solar wind velocity and geomagnetism ascribed to instrumental errors and changes in magnetospheric properties 23 p4205 A69-41848
- Magnetic activity effect on electron density in topside ionospheres determined from Alouette 1 data statistical analysis 23 p4156 A69-41856
- Noncyclic daily solar quiet variation in mean hourly geomagnetic field by including noncyclic variation term in regression model 23 p4158 A69-42170
- Geomagnetic activity hourly and daily variations during solar cycle at Huancayo 23 p4162 A69-42442
- Pulsating aurora diurnal variations and dependence on latitude and magnetic activity, photometric observations 24 p4308 A69-43004
- Saturn F-1 rocket engine as generator of infrasonic waves and magnetic fluctuations, noting ignition and cut-off signal characteristics 24 p4365 A69-43415
- MAGNETICALLY TRAPPED PARTICLES**
- NT ARTIFICIAL RADIATION BELTS
- NT INNER RADIATION BELT
- NT OUTER RADIATION BELT
- NT PROTON BELTS
- NT RADIATION BELTS
- Trapped particles drift velocity in time dependent meridional magnetic and perpendicular electric field 08 p1368 A69-20809
- Magnetohydrostatic cavity formed round magnetic field of line dipole-line current combination by infinitely conducting plasma at uniform pressure 08 p1369 A69-20998
- Captured particles magnetic drift envelopes in magnetosphere calculated by model considering perpendicular geomagnetic dipole to solar wind 09 p1574 A69-21521
- Increased energy losses and microwave emission at cyclotron frequency harmonics during plasma electron heating at cut-off plasma concentrations in magnetic trap 10 p1728 A69-23130
- Energy loss during turbulent plasma heating by current in open magnetic trap, attributing heating to ion-acoustic instability in plasma 11 p1935 A69-25753
- Trapping of plasmoids injected from two coaxial plasma sources through magnetic gaps of diverter, discussing alternate and simultaneous injection 12 p2133 A69-25976
- Charged particles influx from cusp shaped regions of stagnant plasma trapped in vicinity of two magnetic cusps on polar magnetopause 12 p2151 A69-26945
- RF synchrotron radiation emitted by electrons from geomagnetic fields above auroral zones, discussing electron flux and cosmic background 12 p2151 A69-26949
- ESRO 1 satellite measuring proton intensities and energy spectra of precipitated and magnetically trapped electrons 13 p2327 A69-27754
- Transverse particle and energy fluxes in toroidal magnetic traps magnetic fields with ionized plasmas, discussing particle diffusion coefficient and thermal conductivity 13 p2314 A69-28446
- Time dependent convection electric fields as agents for diffusing trapped magnetospheric radiation inward toward earth, discussing one dimensional diffusion equation 14 p2510 A69-28936
- Electron and ion mobility in multiple cusp magnetic fields related to Polytron experiment 14 p2499 A69-29852
- Fermi acceleration of energetic electrons trapped within dipole magnetic field analyzed to obtain quantitative results for wave-particle interaction within complex magnetospheric configuration 15 p2594 A69-30095
- Captured particles magnetic drift envelopes in magnetosphere calculated by model, considering perpendicular geomagnetic dipole to solar wind 16 p2851 A69-32516
- Corpuscular radiation distribution function with trapped particles maximum density fixed in equatorial plane and reflection points vicinity of magnetic force line 19 p3396 A69-36630
- Radial motion of trapped electrons caused by pitch angle scattering in distorted geomagnetic field, noting diffusion coefficient 20 p3593 A69-38104
- Solar flare energy source derived from energetic protons trapped in sunspot magnetic field prior to flare occurrence 24 p4374 A69-43623
- MAGNETITE**
- Magnetite content of type I carbonaceous meteorite from quantitative X ray diffractometry of Orgueil meteorite 02 p0328 A69-12729
- Magnetite morphological variations of type I carbonaceous meteorites, discussing isometric crystals, spheres, spherulites, platelets and filaments 08 p1406 A69-20932
- Black magnetite spherules electromagnetically separated from residue of Permian rock salt, determining content and properties of extraterrestrial material 12 p2154 A69-25821
- Black magnetite bearing spherules extracted from tektites, and magnetic fractions of impact glasses, determined by reflecting microscope and electron microprobe 23 p4210 A69-41349
- MAGNETIZATION**
- Pressure and magnetostriction effects on magnetization curves of type 2 superconducting In-Tl alloy, noting Ginzburg-Landau parameter stress dependence 02 p0294 A69-11776
- Yttrium iron garnet sublattice magnetization calculation using Oguchi method 03 p0485 A69-13297
- Dispersive properties of axial and annular longitudinally magnetized plasma waveguides 05 p0802 A69-15925
- Quantum oscillations of magnetization, undamped magnetoplasma waves development and sound amplification by electron drift in crossed fields observed in semimetals 09 p1556 A69-21615
- Dislocations effect on magnetization process in YIG crystals, using polarization optical method 09 p1559 A69-22532
- Polycrystalline Fe-Ni, Fe-Ni-Co ferrites structure, magnetostriction, magnetization curves and hysteresis prior and after thermomagnetic treatment 13 p2319 A69-27992
- Ferrites dynamic characteristics in alternating magnetization pulse with variable amplitude indicating linearity loss in strong fields 13 p2320 A69-27994
- Exchange interactions in lithium ferrite aluminates, measuring spontaneous magnetization by ballistic technique from 77 K to Curie point 13 p2320 A69-27995
- Remanent magnetization properties in alkalic igneous complexes at Magnet Cove and Potash Suphur Spring, Ark., calculating paleomagnetic pole during Cretaceous 14 p2445 A69-29884
- Rare earth niobates magnetic properties measured in pulsed magnetic fields 15 p2667 A69-30195
- Nuclear magnetic resonance flowmeter operating from outside pipe walls, discussing operating principles and applications 15 p2616 A69-31290
- Magnetized minerals studied to investigate space-time structure and reversal of main geomagnetic field 16 p2782 A69-32462
- Kerr magneto-optic camera for 10 nsec exposures of dynamic magnetization configuration in magnetic thin film during high speed flux reversal 17 p2970 A69-32853
- MAGNETO-OPTICS**
- Electro-optical and magneto-optical effects in solids, noting high sensitivity and resolution in application to spectroscopic investigation of absolute spectra 08 p1371 A69-20217
- Free carrier magnetoplasma effect used for far IR phase matched difference frequency generation in semiconductors, discussing carbon dioxide laser transitions 09 p1556 A69-21578
- Magnetic reversible phase holograms on thin film Mn-Bi by Curie-point writing technique 10 p1706 A69-24007
- Coulomb interaction during optical transitions between Landau subbands of Ge semiconductor valence and conduction bands in magnetic field, observing diamagnetic excitons 11 p1936 A69-24640
- Near IR radiation magneto-optic light modulators using Faraday effect in yttrium-iron garnet and in related compounds 11 p1886 A69-25057
- RLC integrated low inductance circuit for magneto-optical high speed camera shutters, Q switched ruby laser and short light pulses in spark gap 12 p2084 A69-26149
- Magneto-optical oscillation of absorption coefficient in semiconductors during direct electron transitions 16 p2824 A69-31574
- Normal modes of electrons-electromagnetic field coupled system for many valley semiconductors, calculating dielectric constant for electron gas for ellipsoidal energy surfaces 16 p2826 A69-31821
- Optical mixing and harmonic generation in semiconductors, discussing magnetoconductivity tensors and magneto-optical phenomena due to free carriers 19 p3385 A69-36519
- Electroreflection study of inversion asymmetry and warping induced interband magneto-optical transitions in InSb, employing low temperature electric field modulation technique 19 p3386 A69-36521
- Magneto-optical constants and conduction band parameters of GaAs by coherent radiation at high temperatures, measuring Faraday rotation 19 p3386 A69-36522
- Optical pumping and selective population applications, considering double magneto-optic resonance and inelastic interatomic collisions 21 p3735 A69-38454
- MAGNETOACOUSTIC WAVES**
- Alfven and magnetoacoustic waves propagation in inhomogeneous stable plasma situated in field with helical lines of forces 01 p0130 A69-10742
- Stationary and nonstationary weak discontinuity surfaces propagation for ideal and viscous compressible conductive atmosphere with regard to heat flux, using Hadamard method 03 p0422 A69-13511
- Magnetosonic wave propagation across magnetic field in warm collisionless Maxwellian multicomponent

plasma studied for small electron cyclotron and ion cyclotron radii

03 p0479 A69-14020

MHD waves, Landau damping and magnetosonic waves in homogeneous relativistic Vlasov plasma

04 p0636 A69-15043

Plasma instability in inhomogeneous magnetic field noting wavefront structure role

09 p1546 A69-21571

MHD first order partial differential equations used to investigate wave front between perturbed and unperturbed flow regions in magnetosonic propagation through homogeneous medium

10 p1727 A69-23090

Conical refraction of magnetosonic waves occurring when Alfvén waves propagate at speed of sound in conducting fluid in presence of constant uniform magnetic field

10 p1727 A69-23091

Unstabilizing effect of inhomogeneities on magnetosonic waves in slightly ionized gases with current perpendicular to magnetic field

10 p1734 A69-23459

Magnetoacoustic waves generated by Cerenkov radiation from corpuscular fluxes due to star interaction with stellar wind, determining deceleration forces on star

11 p1955 A69-24385

Plasma properties when carrying periodic magnetoacoustic wave expressed in terms of periodic functions, discussing small perturbation propagation

12 p2138 A69-26708

Alfvén and slow and fast magnetoacoustic waves excited during decay instability of initial Alfvén wave, noting dissipation effect on stability

14 p2489 A69-28735

Coupled magnetoacoustic waves in conducting paramagnetic fluid in resonance region due to mechanical and magnetic motions, considering dissipation

14 p2492 A69-29609

Hydrogen plasma heating by fast large amplitude magnetoacoustic wave, measuring resonance excitation and absorption of wave

14 p2493 A69-29643

Magnetoacoustic waves generated by Cerenkov radiation from corpuscular fluxes due to star interaction with stellar wind, determining deceleration forces on star

24 p4390 A69-43775

MAGNETOACOUSTICS

Cold plasma magnetoacoustic resonance, showing nonlinear exciting magnetic field dependence on polarity and energy

09 p1548 A69-21668

Single particle and collective excitations of plasmas in solids and interactions with acoustic and electromagnetic waves in magnetic field

16 p2821 A69-31820

Amplitude equations for magnetoacoustic and entropy waves diverging from normal MHD shock, obtaining energy flux ratios associated with incident and transmitted waves

20 p3582 A69-38242

MAGNETOACTIVITY

NT MAGNETORESISTIVITY

Polarization tensor variation due to Faraday effect and differential absorption of ordinary and extraordinary waves for radiation propagating in magnetoactive cosmic plasma

05 p0805 A69-16650

Quasi-static theory of antenna in magnetoactive plasma subjected to resonance, solving boundary value problem

07 p1099 A69-18522

Penfield-Haus solution to magnetodynamic effect problem as inertial effect of orbital angular momentum, deriving Bohr magneton formula from Einstein equivalence principle

11 p1919 A69-25098

Propagation and linear transformation of HF electrostatic waves in hot magnetoactive radially inhomogeneous plasma, noting wavelength shortening

16 p2816 A69-31638

Radiation fields from energetic electron moving in helical orbit in magnetoactive plasma, using Maxwell equations

22 p4008 A69-39965

MAGNETOELASTIC WAVES

NT MAGNETOACOUSTIC WAVES

Dispersive two port components for application to microwave pulse compression, coupling YIG crystal magnetoelastic spin wave mode to acoustic transducer

02 p0217 A69-12149

Magnetoelastic coupling constant b measured by propagating microwave signals in pure and substituted YIG

02 p0299 A69-12243

Magnetoelastic vibrations of fluid filled cylindrical cavity in infinite solid medium in presence of uniform axial magnetic field

03 p0528 A69-13927

Magnetosonic waves absorption in plasmas, studying collisions leading to HF energy resonant absorption at lower hybrid frequency

06 p0963 A69-16904

Magnetosonic wave evolution in inhomogeneous dispersive plasma created by magnetic piston, discussing equation solution

07 p1181 A69-19001

Stresses and waves in highly conducting magnetoplastic metals as analogy of MHD processes in plasma

09 p1551 A69-22033

Microwave magnetoelastic wave propagation in ferromagnet subjected to pulsed magnetic field using coupled mode approach

10 p1746 A69-23655

Heat propagation in discharge plasma heated by magnetosonic wave, constructing transverse temperature profile

10 p1741 A69-23896

Saturation and distortion effects on magnetoelastic wave excitation in yttrium garnet single crystals by large amplitude microwave frequency field

12 p2145 A69-26725

Plasma turbulence effect on magnetosonic wave attenuation, noting increased electron and ion collision frequency and appearance of anomalous resistance

16 p2820 A69-31794

Stochastic heating of protons by random magnetosonic wave propagating normal to magnetic field to explain proton energy excess in magnetotail plasma sheet

16 p2848 A69-31969

Saturation and distortion effects on magnetoelastic wave excitation in yttrium garnet single crystals by large amplitude microwave frequency field

21 p3782 A69-39138

MAGNETOELASTICITY

U MAGNETOSTRICTION

MAGNETOELECTRIC MEDIA

Magnetolectric characteristics of inversion layers below gate region in transistors, noting Hall mobility

08 p1372 A69-20460

Electrostatic electron bombardment ion thruster with magneto-electrostatically contained plasma

[AIAA PAPER 69-260] 09 p1567 A69-21262

MOS transistor Hall voltage, mobility and constant verified by magnetolectric measurements of Si p-inversion layer

13 p3232 A69-28331

Electromagnetic wave propagation through magnetolectric media in circular waveguide

14 p2416 A69-29540

Reflection and transmission coefficient matrices for stratified magnetoionic medium determined by thin film optical technique and iteration procedure

17 p2927 A69-33863

MAGNETOGASDYNAMICS

MAGNETOHYDRODYNAMIC FLOW

Viscous electrically conducting fluid with aligned magnetic field flowing past flat plate at nonzero angle of attack

01 p0126 A69-10163

Boundary value problems for steady, three dimensional MHD flow of viscous incompressible conducting fluid past various bodies, proving existence of solutions

01 p0126 A69-10164

Dense plasma with plasma frequency greater than cyclotron frequency, discussing flow past slender bodies

01 p0126 A69-10226

Heat transfer situations in plasma flow indicates very high heat fluxes per unit area on surfaces with electric current

[ASME PAPER 68-HT-38] 01 p0175 A69-10314

MHD boundary layer equations in Blasius problem reduced to differential equations and solved by Laplace transform

01 p0127 A69-10337

Effect of steady flow of incompressible conducting fluid on magnetic dipole at center of sphere

01 p0128 A69-10363

High temperature plasmas generation by exploding gold wires in vacuum, using time of flight technique for plasma densities and flow velocities

01 p0129 A69-10667

Two dimensional ionized plasma flow in coaxial channels calculated using differential equations

01 p0130 A69-10723

Semiempirical theory of turbulent MHD tube flow at small Reynolds numbers taking into account magnetic field presence

01 p0130 A69-10769

Stabilization of plane parallel MHD flow at inlet and outlet of flat rectangular tube with transverse magnetic field

01 p0130 A69-10770

Boundary layer of MHD flow past semifinite plate, using Navier-Stokes equations

01 p0130 A69-10771

Axisymmetric MHD flow in turbulence chamber at large Hartmann numbers studied for flow boundary layer effects

01 p0130 A69-10772

Steady state three dimensional MHD flow in variable profile channels calculated by reducing problem to two dimensional approximation using curvilinear coordinate system

01 p0131 A69-10776

Electromagnetic fields effect on turbulent boundary layer characteristics of compressible fluid on insulating wall of MGD channel

01 p0131 A69-10777

Hall effect in unperturbed flow of fluids near thin profiles at infinity

01 p0132 A69-11133

MHD flow through circular, elliptic and rectangular straight channels with external magnetic field transverse to flow direction

01 p0132 A69-11209

Resistive spherical plasma expansion into external magnetic field noting magnetic stream function

01 p0132 A69-11211

Polar wind, describing upward plasma expansion of topside polar ionosphere and acceleration of positive H and He ions

01 p0077 A69-11239

Helium isotopes escape mechanism from earth atmosphere related to polar wind ionospheric plasma flow from earth

01 p0077 A69-11240

Rarefied plasma flow interactions with conductors having cross sections equal to Debye radius, noting production of self consistent electrostatic potential

01 p0134 A69-11307

Wake structure behind spherical bodies in rarefied plasma flow by measuring plasma parameters and disturbances with probes

01 p0134 A69-11308

Laminar natural convection of electrically conducting fluid under magnetic field, noting temperature profiles

01 p0134 A69-11407

Thermal radiation effects on two dimensional steady MHD jet of conducting ionized gas confined by magnetic field

02 p0287 A69-11831

Plate temperature oscillation effects on forced convection laminar viscous incompressible MHD boundary layer flow from semiinfinite flat plate

02 p0288 A69-12143

Two dimensional unsteady Rayleigh flow velocity of conducting and nonconducting viscous fluid past porous plate, analyzing suction and magnetic field effects

02 p0232 A69-12156

Thermalization of kinetic energy of plasma flow by shock phenomena produced by magnetic mirror field

02 p0289 A69-12176

Heat transfer of steady laminar flow of incompressible, viscous and electrically conducting fluid between parallel porous plates

02 p0289 A69-12235

Accelerated plate motion effect on flow of electrically conducting viscous incompressible fluid past infinite flat plate in uniform magnetic field

02 p0289 A69-12237

Electric field, current density and magnetic induction of plasma flow measured, obtaining plasma con-

MAGNETOHYDRODYNAMIC FLOW

- ductivity and flow velocity for electron temperature and density
[ONERA-TP-649] 03 p0473 A69-12877
- Axial magnetic field effect on steady linear Ekman boundary layer
03 p0474 A69-13141
- Heat transfer in crossed field MHD Couette flow for incompressible fluid, assuming linear wall temperature in flow direction
03 p0476 A69-13306
- Cold plasma motion caused by electromagnetic wave pressure propagating along uniform magnetic field
03 p0477 A69-13413
- Plasma drift global distribution due to neutral gas motion in F 2 region, noting effect on electron concentration distributions
03 p0422 A69-13513
- Flow development around impulsively rotating dipole magnetized sphere in viscous incompressible conducting fluid, noting diffusing Alfvén waves and induced field
03 p0477 A69-13793
- Boundary layer equations for uniform motion of semiinfinite flat plate through incompressible conducting fluid at rest and in magnetic field, using numerical method
03 p0477 A69-13794
- Coefficient of friction variations for MHD flow of electrically conducting liquid across porous medium under transverse magnetic field
03 p0480 A69-14112
- Nozzle geometry influence on argon plasma flow parameters in shock tube, discussing measurement data behind shock wave front
03 p0481 A69-14160
- Wave number frequency dependent spectral function and space-time correlation function in turbulent plasma, noting utility for probes and scattering analysis
03 p0483 A69-14255
- Electromotive force along magnetic field induced by liquid metal flow /alpha effect/, giving foundation for self excitation of electromagnetic field
04 p0635 A69-14547
- Steady state plasma flows stability equations, using variational principle for analyzing toroidal plasmas
04 p0635 A69-14556
- Series solutions for compressible and incompressible flows at low Reynolds number, including axisymmetric and MHD Stokes flow
04 p0587 A69-14609
- Average energy dissipation in MHD duct flow of arbitrary cross sectional shape, evaluating bulk temperature, net wall heat flux and pressure gradient
04 p0635 A69-14724
- MHD channel flow temperature distributions with Hall effect, using formulation for momentum and energy equations
04 p0635 A69-14746
- Magnetic field effects on heat transfer between Ar plasma flow and channel wall, noting effects of temperature and Reynolds number
04 p0636 A69-14989
- Perfect magnetofluid model to study laminar flow stability along magnetic field, considering time dependences and rigid and free boundaries
04 p0637 A69-15045
- Unsteady hydromagnetic flow of viscous electrically conducting incompressible liquid over infinite conducting harmonically oscillating plate
04 p0638 A69-15093
- LF electrical resonance oscillations in nonisothermal plasma jet flow, noting pressure and magnetic field effects on amplitude and frequency
04 p0638 A69-15174
- Dispersion of solute in electrically conducting fluid flowing between two parallel plates in magnetic field
04 p0638 A69-15194
- MHD flow in square cross sectional channel in transverse magnetic field with conducting walls parallel to magnetic field
05 p0799 A69-15697
- Deceleration of conducting plasmas moving in channels in nonuniform magnetic field
05 p0801 A69-15781
- Evolutionarity of equations of MHD with Hall effect allowance for nondissipative plasma two dimensional flow
05 p0801 A69-15788
- Unsteady motion of ideally conducting gas flow in transverse magnetic field with allowance for gravitational forces
05 p0802 A69-15789
- Perturbed wake behind spherical models in rarefied plasma flow, noting effects of electron temperature and electric potential of models
05 p0803 A69-16048
- Mathematical problem of MHD thermal entrance regions for parallel plate channel solved by Galerkin method
[ASME PAPER 68-WA/HT-10] 05 p0803 A69-16118
- Detached lunar compression wave, noting positive evidence from solar wind flux and direction measurements near lunar wake
05 p0824 A69-16251
- Field aligned Birkeland currents generation at auroral latitudes
05 p0755 A69-16266
- Viscous electrically conducting liquid flow through insulating porous medium in presence of transverse magnetic field in region of validity of Darcy law
05 p0805 A69-16603
- Two dimensional aligned field MGD flows analyzed using corresponding basic equations
05 p0806 A69-16735
- Steady two dimensional MHD flow of perfectly conducting fluid past nonconducting wedge with magnetic field orthogonal to flow velocity
06 p0964 A69-17244
- Viscous MGD channel flow in boundary layer approximation with heat conduction, transforming resultant partial differential equations set to system of ordinary differential equations
06 p0966 A69-17523
- Shock formation in supersonic plasma flow guided by magnetic channel up to magnetic barrier
06 p0966 A69-17524
- Three dimensional steady/unsteady flows of conducting inviscid gas in magnetic field, in absence of electric field, solving related Cauchy problem
06 p0966 A69-17541
- Finite conductivity or ohmic resistance effect on stationary axisymmetric self constricting MHD flow
06 p0966 A69-17548
- Laminar heat transfer in electrically conducting fluids flowing in parallel plate channels
[JPL-TR-32-1335] 06 p1033 A69-17555
- Plasma impedance effect on time variation of inverse pinch
06 p0967 A69-17716
- Laminar constant pressure gradient flow of viscous incompressible conducting fluid through rotating straight circular pipe with perpendicular magnetic field
06 p0967 A69-17718
- MHD aligned flow of compressible fluid past slender body in wind tunnel
06 p0861 A69-17719
- Supersonic plasma flow interaction with two dimensional magnetic dipole
06 p0967 A69-17738
- Plasma flow in electromagnetic shock tube with various pressures and speeds, noting turbulence onset in shock layer
06 p0968 A69-17764
- Surface wave propagation on circular plasma column moving in axial direction in free space region
06 p0968 A69-17775
- MHD flows in channels of MHD devices, emphasizing two and three dimensional problems
06 p0969 A69-17913
- Approximate solution of equations for boundary layer flow of conducting medium on insulating and electrode walls of MHD generator channel
06 p0871 A69-17914
- Unsteady flow of viscous incompressible conducting fluid in MHD generator channel, discussing external circuit inductance and flow velocity during start-up
06 p0969 A69-17915
- Optimal flow conditions in linear conduction type MHD generators for obtaining maximum power per unit channel length or volume
06 p0871 A69-17916
- Channel parameters, magnetic field level, electrical potential and channel output pressure for optimal integral characteristic of MHD system selected by variational method
06 p0969 A69-17917
- Electromagnetic field induced energy and momentum changes effects on pressure, temperature and particle velocity of flows behind propagating gaseous detonation waves
[AIAA PAPER 69-44] 06 p0970 A69-18084
- Velocities of neutral and ionic species in MPD flow determined from Doppler shift of selected spectral lines
[AIAA PAPER 69-109] 06 p0971 A69-18116
- Mixture Mach number defined for collisionless plasma flow about solid body by extending cold-ion theory
[AIAA PAPER 69-78] 06 p0971 A69-18128
- Steady two dimensional MHD flow in finite region of aligned fields
07 p1188 A69-18274
- Two fluid approximation of one dimensional steady state flow of inviscid plasma with thermal gradients, considering ionization and recombination processes
07 p1189 A69-18691
- Plasma diagnostics by spectroscopic techniques, measuring polarity dependences of temperature and charged particle concentration for flows with shock wave and periodic structure
07 p1190 A69-18695
- Uniqueness theorem for laminar MHD duct flows
07 p1190 A69-18813
- Model experiment on plasma flow about obstacle to simulate solar wind interaction with moon
07 p1205 A69-18851
- Pulse broadening in MHD copper vapor laser
07 p1149 A69-18904
- Comparative models of magnetoplasma, discussing wave propagation in cold plasma, warm plasma and microscopic model
07 p1190 A69-18919
- Conducting gas acceleration in strong unsteady electromagnetic field, discussing channel flow in relation to time and pressure gradient
07 p1191 A69-18988
- One dimensional flow of conducting inviscid compressible fluid in channel in presence of transverse fields, discussing steady velocity flows
07 p1191 A69-19014
- Two dimensional flow of conducting fluid in channels with longitudinal transverse magnetic field and Hall effect, discussing gas motion equations linearization
07 p1192 A69-19015
- MHD flow in channels with abruptly widening sections and finned walls under transverse magnetic field, discussing effects on drag
07 p1192 A69-19016
- Hydraulic drag coefficient in MHD fluid flows in traveling magnetic field from motion equations for turbulent flows, considering velocity profiles
07 p1192 A69-19017
- Laminar flow of viscous conducting fluid between parallel walls in traveling magnetic field, using Hartmann number expansion
07 p1192 A69-19023
- MHD flow of compressible conducting fluid around cylindrical body with quasi-aligned magnetic field and velocity
07 p1194 A69-19350
- Periodic pulling mechanism for explaining transition to turbulence in bounded plasma with weakly unstable drift modes
07 p1194 A69-19400
- Periodic asymptotically stable MHD motions, proving uniqueness and existence theorems
07 p1194 A69-19437
- Unsteady MHD convective flow with suction of viscous incompressible electrically conducting fluid above vertical porous wall, noting horizontal magnetic field effect
07 p1195 A69-19477
- Turbulent incompressible MHD flow between two parallel smooth plates in transverse magnetic field, determining magnetic Reynolds number
07 p1195 A69-19736
- Steady shock discontinuity in perfectly conducting gas flow in arbitrarily oriented magnetic field for various Mach numbers
08 p1360 A69-19988
- Free surface of electrically conducting liquid in gradually varied supercritical regime in horizontal rectangular channel
08 p1362 A69-20273
- Analytical model for compressible MHD boundary layers formulated by transport equations for turbulent fluctuations of species mass density, velocity and temperature
08 p1366 A69-20786
- Plasma stream behavior emerging from magnetic field, noting transverse velocity imparted to electrons by field
08 p1368 A69-20808
- Partially ionized argon plasma stagnation flow past blunt body using multifluid theory, obtaining flow profiles
08 p1369 A69-20817

Hydromagnetic steady forced flow against porous rotating disk, integrating equations of motion by Karman-Pohlhausen and series methods

08 p1370 A69-21005

Longitudinal polarization behind front of plasma flow interacting with transverse magnetic field, showing electric potential and magnetic field exhibit structural fluctuations

08 p1370 A69-21018

Plasma flow from hot cathode discharge in magnetic field increases ion flux intensity and prevents flow divergence in vacuum

08 p1370 A69-21075

Hall effect and mass flow influence on MPD arc jet radial pressure profile calculated as function of pressure and magnetic field

[AIAA PAPER 69-246] 09 p1562 A69-21226

MPD engine plasma flow investigated by Langmuir probe measurement of ion saturation current

[AIAA PAPER 69-233] 09 p1567 A69-21266

MGD stagnation point flow, discussing relaxation region influenced by magnetic field

09 p1543 A69-21300

Magnetospheric gusts of streaming positive ions in equatorial plane detected by ATS 1 synchronous satellite

09 p1574 A69-21309

Power radiated by oscillating magnetic and electric dipoles in cold streaming plasma calculated by Poynting vector method

09 p1544 A69-21329

Transverse density nonuniformity effect on electromagnetic wave propagation in cylindrical plasma waveguide immersed in magnetic field, noting frequency increase

09 p1545 A69-21348

Convective MHD channel flow in vertical channel subjected to temperature and pressure gradients, discussing wall conductance effects on flow rate and heat transfer

09 p1545 A69-21441

High time resolution electrical conductivity measurement of ionized plasma gas flow, using changes in Q of circuit

09 p1546 A69-21585

MHD oscillatory flow along infinite plane porous wall with variable suction velocity, obtaining expressions for velocity and magnetic fields in boundary layer

09 p1547 A69-21607

Electron drainage currents from dilute streaming plasmas to positively biased silicon and cadmium sulfide solar cell arrays

[AIAA PAPER 69-262] 09 p1436 A69-21726

Interplanetary plasma flow simulation around earth magnetosphere and planets not considering initial conditions influence

09 p1577 A69-21768

Lagrangian evolution criterion for electromagnetohydrodynamic fluid and MHD flow, defining generalized fluxes and forces

10 p1727 A69-22904

Magnetically aligned flows between sunspots, considering Evershed effect on umbrae and penumbrae

10 p1772 A69-22907

Numerical solution of MHD equations for boundary layer electrically conducting gas flow near flat plate when velocity distribution of external flow obeys power law

10 p1727 A69-23093

General solutions of MHD equations for linear nonsteady and plane steady motions of ideally conducting gas

10 p1727 A69-23096

Laminar turbulent transition conditions in MHD channel flow

10 p1727 A69-23097

MHD fluid flow in rectangular duct with allowance for finite wall conductivity

10 p1727 A69-23098

Rotating disk induced viscous conducting fluid motion in axial magnetic field

10 p1727 A69-23099

Three dimensional MHD flow near forward stagnation point magnetic fields with large induction values described by differential equations, showing tendency towards two dimensional flow

10 p1727 A69-23100

MHD flow and heat transfer between coaxial rotating disks under axial magnetic field, using powers expansion of Reynolds number

10 p1728 A69-23234

Hydromagnetic laminar natural convection flow and heat transfer of nonNewtonian fluid between parallel electrically conducting walls

10 p1728 A69-23237

Transverse magnetic field and shock strength effects on curvature ratio of attached shock waves and wedge

10 p1728 A69-23238

Moving conducting media velocity measurement using Reynolds number and electrical conductivity values, based on magnetic field distortion

10 p1731 A69-23435

Velocity and temperature influence on discharge characteristics of K seeded argon plasma flow at 1 atm pressure

10 p1733 A69-23449

MHD flows in MHD generator channel under magnetic field, analyzing steady laminar flow during entry and Hall effect on conductivity temperature dependence

10 p1734 A69-23455

Current-voltage characteristics of combustion driven shock tube generated argon plasma

10 p1737 A69-23466

Quasi-neutral plasma formation in hydrodynamic channel flow, discussing ignition and breakdown processes in preionized gaseous flow

10 p1737 A69-23467

Shock front propagation in argon with electrode-drawn induced EMF, using shock tube with induced transverse magnetic field

10 p1737 A69-23469

Toshiba blowdown MHD test facility experiments on nonequilibrium ionization, using K seeded He for working gas

10 p1673 A69-23477

Boundary conditions for nonlinear equations of MHD for vicinity of zero magnetic field line, considering plasma pinch and current density

10 p1739 A69-23626

Dipole magnetosphere model with cylindrical or spherical forbidden band for studying plasma motion in quasi-hydrodynamic approximation

10 p1769 A69-23901

Velocity profiles of turbulent plasma flow in circular tube during application of longitudinal homogeneous magnetic field

11 p1922 A69-24234

Heat transfer in MHD parallel plate channel flow in entrance regions analyzed by Galerkin method, noting Hall current effect

11 p1923 A69-24290

Electric shock tube for measurement of plasma magnetic fields induced by shock plasma moving through DC magnetic field transverse to flow

11 p1925 A69-24311

Hartmann problem for motion of electroconductive fluid in homogeneous porous medium, modifying classical MHD equations by introduction of velocity of filtration

11 p1925 A69-24324

Hydromagnetic instability onset in dissipative flow of electrically conducting fluid between rotating permeable perfectly conducting cylinders, noting oscillatory axisymmetric critical modes

11 p1926 A69-24895

Hot wire and hot film anemometers for measuring turbulence in MHD flow noting applications in flowing mercury

11 p1886 A69-25087

Pressure distribution measurement over sphere with cylindrical afterbody in magnetofluid dynamic flow, showing drag decrease at large magnetic field

11 p1873 A69-25136

Small scale oscillations stability in quasi one dimensional conducting gas flow with longitudinal superimposed magnetic field, noting radiation role in transverse oscillations development

11 p1928 A69-25222

MHD free convection from horizontal isothermal plate in vertical uniform magnetic field, considering boundary layer thickness

11 p1930 A69-25277

Steady linearized aligned fields flow of collisionless plasma past slender body, noting effect of tensor conductivity

11 p1930 A69-25278

Magnetic field effects on rotational MHD flow in container, noting Taylor-Proudman theorem, Ekman layers and vertical Stewartson boundary layers

11 p1930 A69-25279

Boundary layer calculation during laminar MHD channel flow under crossed magnetic and electric fields using successive approximation method

11 p1932 A69-25491

Plasma flow from Penning discharge with incandescent cathode in vacuum controllable by varying voltage, pressure and magnetic field strength

11 p1933 A69-25543

Correlation functions and spectral density of current fluctuations in weakly ionized plasma flows

11 p1934 A69-25715

Flow in linear MHD channel with two permeable electrodes, solving Riemann boundary value problem for electric field in channel

11 p1934 A69-25727

Electrical breakdown between cold electrodes in contact with flowing plasma produced by electromagnetic shock tube

12 p2134 A69-26098

Hydromagnetic fluid flow between flat plates oscillating with phase difference, same frequency and different amplitudes

12 p2135 A69-26273

Hydromagnetic flow of viscous conducting fluids through porous coaxial cylinders in radial magnetic field solved by Laplace transform

12 p2135 A69-26276

Dense plasma flow across transverse inhomogeneous magnetic field, proving adiabatic nature of motion

12 p2137 A69-26528

Rarefied Ar plasma flow current-voltage characteristics in discharge tube, noting plasma boundary layer thickness influence on saturation current

12 p2137 A69-26532

Steady state flow of viscous conducting liquid in inlet of channel with or without transverse magnetic field, emphasizing approach to Hartmann-Poiseuille patterns downstream

12 p2138 A69-26626

Neutral gas motions causing plasma motions in F region, obtaining vertical plasma velocity component pronounced diurnal variations

12 p2070 A69-26684

Interplanetary plasma flow directional velocity distribution from solar atmosphere active regions found inhomogeneous

12 p2149 A69-26698

Solar plasma flow around magnetosphere, discussing plasma velocity, density and temperature and magnetic field space and time variations

12 p2150 A69-26736

MHD Stokes flow for rotating disk in parallel magnetic field, showing Lorentz force inhibiting effect on fluid motion

13 p2305 A69-27325

Two dimensional flow of conducting gas dynamic and electrical parameters in MGD generator channel, considering magnetic field and plasma conductivity

13 p2305 A69-27386

Nonconducting vanes end effects on electrical characteristics of MHD channels, analyzing current density, Joule losses and finite length vanes

13 p2306 A69-27497

Laminar-turbulent transition in MHD channel in transverse and longitudinal magnetic fields, discussing Reynolds equation for large Hartmann numbers

13 p2307 A69-27500

Velocity profiles of MHD flow through electrically insulated circular channel in transverse magnetic field

13 p2307 A69-27501

Transient heat transfer in formation of steady crossed fields MHD plane Couette flow for walls, giving momentum, induction and energy equations

13 p2375 A69-27791

Radiative thermal losses of K in gases for MHD flow

13 p2308 A69-28022

Temperature measurement of plasma consisting of combustion products in MHD duct, measuring spectral line contours by Fabry-Perot interferometer for accuracies

13 p2309 A69-28023

Shear stress and velocity profile in MHD duct, examining turbulence damping by electromagnetic coupling

13 p2309 A69-28024

Boundary value problem for one dimensional unsteady equations for inviscid conducting gas during transition processes in MHD duct

13 p2309 A69-28027

Fluctuations in electric field induced by plasma flow in constant magnetic field, performing spectral analysis of voltage and current fluctuations in plasma

13 p2310 A69-28029

Current distribution in MHD duct with permeable electrodes with tensor conductivity, obtaining Riemann-Hilbert heterogeneous boundary value problem solution by finding electric field

13 p2310 A69-28030

Geomagnetic storms caused by plasma streams impinging on earth related to preceding cosmic flares, discussing polar cap absorption and ground level effects

14 p2514 A69-29416

MAGNETOHYDRODYNAMIC FLOW

MHD equations system in intrinsic form, establishing conditions of integrability 14 p2492 A69-29593

Convective and nonconvective two stream instability for hot plasmas, approximating equilibrium distribution function for given temperature by resonance functions 14 p2499 A69-29844

Ionospheric models for motion of slightly ionized homogeneous cold plasma influenced by electrostatic field and neutral particles flow, considering geomagnetic effects 14 p2499 A69-29863

Ionospheric inhomogeneity model for motion of infinite elliptical cylinder of cold plasma in neutral particle flow and ambient electrostatic and magnetostatic fields 14 p2500 A69-29864

Ionospheric inhomogeneities models for plasma motions, considering electron-ion collisions 14 p2443 A69-29865

Magnetic field effect on heat and mass transfer in incompressible fluid MHD flow 14 p2500 A69-29901

MHD quantities in linear wave and small intensity shock wave dissipation and structure determinable by right and left eigenvectors of matrix MHD flow equation 14 p2500 A69-29902

MHD channel flow calculations by quasi one dimensional approximation, considering potential drops at electrodes 14 p2500 A69-29904

Compressible gas MHD steady one dimensional flow in electric and magnetic fields 14 p2500 A69-29905

MHD mercury flow in rotating torus with little friction investigated for Reynolds numbers, considering induction pump forces and magnetic field influences 14 p2500 A69-29907

Shunting effect of conducting channel walls in induction MHD machines, discussing wall effects on pressures during pumping and generating operation modes 14 p2405 A69-29912

Velocity distribution effect on electric field at walls for axisymmetric flow of electrolyte in circular channel in magnetic field of E shaped inductor 14 p2501 A69-29915

Flow phenomena associated with electrically conducting boundary layer jet injection through slot into uniform slipstream in presence of transverse magnetic field 14 p2501 A69-29917

Longitudinal pressure distribution in MHD channel with electrodes parallel to applied transverse magnetic field 14 p2501 A69-29918

Free surface in supercritical regime downstream of valve submerged in MHD flow, noting effects of horizontal and vertical magnetic induction fields 15 p2659 A69-30299

Space charge formation in MHD generator channels ascribed to gas parameters nonuniformity and magnetic induction vector presence, assuming steady flow 15 p2659 A69-30635

Stagnation flow of viscous fluid against rotating magnetized disk, determining effects on magnetic and velocity fields, currents and shear stresses 15 p2659 A69-30674

Continuous supersonic plasma wind tunnel obtained using magnetic Laval nozzle made by modification of Q device normal magnetic field configuration 15 p2589 A69-30909

Hamiltonian variational principle for stationary bounded MHD flows, choosing suitable functions and rigid conducting boundary location 15 p2660 A69-30910

Self consistent solutions for collisionless plasma penetration across magnetic field, showing electrons ability to accompany ions across field 15 p2661 A69-30923

Hydrogen plasmas motions in multipole magnetic fields, discussing plasma polarization, double vortex flow patterns and field line configurations 15 p2661 A69-30924

Steady incompressible MHD laminar flow between parallel porous disks solved for large Reynolds and Hartmann numbers 15 p2662 A69-30968

Single and two phase subsonic plasma jets temperature and velocity distribution, noting reduction by condensed phase and use of Schlichting curves 15 p2663 A69-30989

Plasma parameters, except ion temperature, obtained from current-voltage characteristics of flowing

plasma measured by electrostatic probes in low density wind tunnel 16 p2816 A69-31637

High temperature ionized turbulent argon jet gasdynamics noting electron density 16 p2770 A69-31889

Plasma flow pattern in twilight regions of earth magnetosheath from positive ion observations of twin Vela 3 satellites 16 p2773 A69-31961

Micropulsation records for full moon effect on hydromagnetic emission activity of magnetosphere, noting W and Kp indices 16 p2774 A69-31979

Diagonal conducting wall /DCW/ MHD generator channel flows in formulation including Hall effect, electrode drop and electrode wall angle 16 p2736 A69-32172

MHD of interstellar gas-dust medium, analyzing gas-dust flow and gas-dust shock waves in magnetic fields 16 p2823 A69-32590

Polar substorms resulting from interaction between magnetized plasma stream and geomagnetic field in magnetosphere 16 p2852 A69-32620

Linearized motion equations for conducting gas in magnetic and electric field solved for coaxial channel and free jet, assuming small Reynolds number and parallel flow 17 p3010 A69-33016

Conducting fluid and plasma rotation between concentric cylinders due to crossed fields, determining velocity distribution, induced magnetic field and kinetic energy [AIAA PAPER 69-726] 17 p3011 A69-33472

Fluid dynamic simulation of gas core nuclear rocket chamber for separating light and heavy gas via centrifugal force produced by MHD-driven rotational flow [AIAA PAPER 69-727] 17 p3004 A69-33483

One dimensional viscous magnetofluidynamic flow in annulus formed by concentric cylindrical electrodes, reducing problem to linear partial differential equation set [AIAA PAPER 69-725] 17 p3012 A69-33493

MGD hypersonic shock layer at spherically blunted body analyzed by utilizing induction equation including Hall effect [AIAA PAPER 69-722] 17 p3012 A69-33494

Transverse magnetic field effect on shear turbulence structure of magneto-fluid-mechanic pipe flow with and without heat transfer [AIAA PAPER 69-723] 17 p3012 A69-33497

LF electrical resonance oscillations in nonisothermal plasma jet flow, noting pressure and magnetic field effects on amplitude and frequency 18 p3180 A69-34716

Chapman-Ferraro approximation for magnetic interior field line configuration in plasma flow around two dimensional dipole, allowing for tail formation and neutral sheet 18 p3129 A69-34955

Deceleration of conducting plasmoids moving in channels in nonuniform magnetic field 18 p3181 A69-35033

Evolutionarity of equations of MHD with Hall effect allowance for nondissipative plasma two dimensional flow 18 p3181 A69-35039

Unsteady motion of ideally conducting gas flow in transverse magnetic field with allowance for gravitational forces 18 p3181 A69-35040

MHD flow, deriving equation system and boundary conditions for gas dynamic process 18 p3181 A69-35054

Small continuum electrostatic probes calibration and operation in ionized plasma flow with sheath dimensions larger than boundary layer dimensions 19 p3304 A69-35719

Magnetic fields and electrically conducting fluids interaction with emphasis on magnetodynamics equations, investigating rectilinear flows in pipes and nozzles, shock waves, etc 19 p3379 A69-35804

Combined free and forced convection hydromagnetic flow and heat transfer of electrically conducting fluid subjected to temperature variations in vertical channel 19 p3380 A69-36304

Multiple electrode probe characteristics in rarefied plasma flow created by ion source, noting electrode potential role 19 p3314 A69-36622

Conducting gas flow parameters in coaxial duct, considering magnetic nonuniformity, Hall currents and fields distortion near electrodes 19 p3381 A69-36772

Unsteady laminar MHD flow of electrically conducting viscous fluid between porous coaxial circular cylinders under radial magnetic field 20 p3581 A69-36912

Plasma flow structure near frontal point in earth magnetosphere, using quasi-hydrodynamic two dimensional model to obtain power series solution 20 p3594 A69-37019

Proton concentrations, magnetic field strength and temperatures distribution in interplanetary plasma flows as function of latitudinal distance from center of active region 20 p3594 A69-37020

Turbulent boundary layer of conducting fluids on dielectric plate in transverse magnetic field in presence and absence of pressure gradient 20 p3513 A69-37092

Homogeneous compressible fluid sphere with axisymmetric magnetic field, analyzing oscillations and stability using variational principle 20 p3605 A69-37822

Perturbed wake behind spherical models in rarefied plasma flow, noting effects of electron temperature and electric potential of models 20 p3581 A69-37957

Low energy plasma escape flow from polar region /polar wind/, examining H, He and O ions participation in expansion 21 p3713 A69-38528

Boundary layer equations solved for MHD version of Falkner-Skan problem, using Laplace transform and steepest descent technique 21 p3693 A69-38750

MHD energy converters electric fields and current distributions, analyzing MHD flow problems 21 p3777 A69-39480

Shock waves in closed cycle MHD with gaseous working fluids, investigating MHD channel flow 21 p3778 A69-39482

MHD losses in liquid metal converters due to nonideal magnetic field profile and to flow hydraulics 21 p3649 A69-39483

Drag effect on plasma motion in high current pulsed plasma accelerators of Marshall type, calculating current variations, voltage, particle velocity, efficiency and impulse 21 p3778 A69-39548

Turbulent Hartmann flow between rough walls in transverse magnetic field, determining field influence on resistance coefficient 22 p3989 A69-40255

Laminar MHD flow in porous walled channel in transverse magnetic field, determining velocity distributions, induced fields and current over channel cross section 22 p3989 A69-40256

Homogeneous, viscous and electrically conducting fluid bounded at one end by infinite plane surface of rigid body vibrating relative to fluid body 22 p3991 A69-41036

Plasma pause form in equatorial plane in presence of magnetospheric tail subsonic potential convective flow 22 p3942 A69-41103

Dirac equation in external electromagnetic fields, deriving solution for constant orthogonal electric and magnetic fields encountered in plasma transport 23 p4190 A69-41357

Distribution function of output energies of polycrystalline metal surface used as plasma probe, considering homogeneous plasma flow and isotropic particle velocity distribution 23 p4196 A69-41696

Eddy current plasmoids formation in potential magnetokinematic plasma flux found economical in terms of energy requirements 23 p4214 A69-41834

Successive approximations convergence analyzed in solving supersonic collisionless plasma flow past magnetic dipole 23 p4156 A69-41853

Rotational arc motion in MPD accelerators with strong axial fields predicted by plasma physics equations 23 p4201 A69-41909

Time dependent unsteady flow of incompressible and electrically conducting fluid between two infinite disks rotating in uniform axial magnetic field 23 p4153 A69-42410

MHD flow of incompressible viscous fluid between rotating electrical insulator disks 24 p4354 A69-42599

Electromagnetic scattering by small plasma ellipsoid moving in vacuum through external steady magnetic field, analyzing resonance phenomena

24 p4282 A69-42979

Moving plasma partial capture in transverse magnetic field in experimental plasma source, noting influence of repulsion effect of plasma polarization volume charge

24 p4357 A69-43469

Crossed inhomogeneous electric and magnetic fields effect on H plasma fluxes dynamic behavior, deriving plasma motion formula

24 p4358 A69-43475

Actuator disk model for study of azimuthally nonuniform MPD arc plasma dynamics [AIAA PAPER 68-714]

24 p4359 A69-43570

Steady state interaction between collisionless plasma flow and immersed stationary magnetized or unmagnetized objects by inserting Cs ion accelerator into plasma wind tunnel

24 p4359 A69-43646

MAGNETOHYDRODYNAMIC GENERATORS

MHD technology applications to industry and cost and performance of MHD generators

01 p0013 A69-11394

Condensing injector cycles internal efficiency for high velocity liquid metal flows in closed cycle MHD power plants

02 p0194 A69-11582

Inert gas nonequilibrium MHD power generation in shock tube

02 p0196 A69-12425

MHD generator two dimensional analysis for studying edge effect, taking into account Hall effect

03 p0480 A69-14099

MHD generator and compressor Joule losses effect on thermoelectric energy conversion closed cycle efficiency with electrical conductivity maintained by nonequilibrium ionization

03 p0369 A69-14152

Thermodynamic comparison of MHD generators using Brayton and Rankine cycles, showing Rankine cycle conversion at higher channel Mach numbers for nonequilibrium ionization

03 p0369 A69-14154

Temperature drop in combustion chamber of open cycle MHD power plant due to added potassium carbonate as function of various parameters

03 p0369 A69-14162

Soviet collection of papers on MHD method of obtaining electrical energy, noting plasma properties in MHD generators

06 p0870 A69-17905

Potassium seeded argon plasma conductivity in induced electric field at static gas temperature for MHD generator model

06 p0871 A69-17909

MHD generators with nonequilibrium conductivity, taking into account ionization instability of plasma

06 p0871 A69-17912

Optimal flow conditions in linear conduction type MHD generators for obtaining maximum power per unit channel length or volume

06 p0871 A69-17916

Channel parameters, magnetic field level, electrical potential and channel output pressure for optimal integral characteristic of MHD system selected by variational method

06 p0969 A69-17917

Doppler shift measurements of axial and rotational velocities in MPD arc, using reference lines from iron arc [AIAA PAPER 69-110]

06 p0972 A69-18171

Current load distribution for optimizing MHD generator efficiency determined by variational method, noting dependence on relative length

07 p1058 A69-19012

Transfer coefficients for inhomogeneous systems characterized by constant density, mean free path and activation energy of carriers at each point

07 p1193 A69-19024

Linear induction MHD generator using Rankine cycle with K-Na working fluid noting longitudinal edge effect compensation

07 p1058 A69-19026

Longitudinal edge effect in primary circuit of open loop linear MHD induction machines, determining forward, reverse and zero sequence currents and voltages

07 p1058 A69-19027

Maxwell equations solution for linear induction MHD machine coil area field components, allowing for finiteness of magnetic permeability of iron

07 p1059 A69-19028

Electrical characteristics of linear Faraday generator using binary mixture of noble gases with nonequilibrium ionization

08 p1359 A69-19880

Rotating spoke in unstable pulsed MPD arc, noting rotation frequency and resemblance to plasma rotation [AIAA PAPER 69-234]

09 p1561 A69-21219

Thermodynamic cycle and optimum conditions of electric power source of MHD generator in combination with thermocompressor

09 p1435 A69-21592

Electrothermal instabilities of ionization region of nonequilibrium MHD generator in presence of magnetic field

09 p1548 A69-21919

Optimum operation modes of MHD converter

10 p1636 A69-23095

O shaped magnetic systems using unsaturated steel magnetic circuit to produce strong uniform magnetic fields for MHD machines

10 p1636 A69-23102

Effect of degree of expansion of ionized gas in nozzle on specific power of MHD generator

10 p1636 A69-23103

MHD electrical power generation - Conference, Warsaw, July 1968, Volume 1, Closed cycle MHD with gaseous working fluids

10 p1729 A69-23433

Low temperature optically thick boundary layers influence on spectroscopic temperature measurements in plasma MHD channels

10 p1731 A69-23434

Two temperature plasma model applicability in analyzing nonequilibrium MHD generator

10 p1731 A69-23438

Ar-K plasma studied as possible MHD generator working fluid by investigating influence of emission and external magnetic field on nonequilibrium electrical conductivity

10 p1732 A69-23441

Momentum transfer cross sections, recombination coefficients and ionization coefficients of working gases for MHD energy converter

10 p1733 A69-23446

Argon discharges in metal capillary cathodes noting effects of electron density, flow velocity, electrode phenomena and gas temperature

10 p1733 A69-23450

Rare gas-alkali plasma electrical conductivity dependence on gas temperature and preionization to determine optimum operating conditions for MHD generator

10 p1733 A69-23451

Electron temperature distributions in Ar-K plasma of simulated Faraday type MHD generator for current distributions, determining current density distribution experimentally

10 p1734 A69-23453

Induced magnetic fields determination in linear DC MHD generators with ferromagnetic and nonmagnetic walls, using Fredholm equation

10 p1636 A69-23454

MHD flows in MHD generator channel under magnetic field, analyzing steady laminar flow during entry and Hall effect on conductivity temperature dependence

10 p1734 A69-23455

Electrothermal instabilities in small magnetic Reynolds number limit and ionization equilibrium at electron temperature using quasi-linear plane wave analysis

10 p1734 A69-23456

Instabilities in K seeded Ar plasma in crossed electric and magnetic fields and with nonequilibrium ionization, noting effects on MHD generator characteristics

10 p1734 A69-23457

Mercury cesium plasma in crossed electric and magnetic fields as working fluid of MHD generators based on Rankine cycle

10 p1636 A69-23458

Unstabilizing effect of inhomogeneities on magnetoacoustic waves in slightly ionized gases with current perpendicular to magnetic field

10 p1734 A69-23459

Turbulent plasma near stability limit in MHD generator with constant load coefficients, noting effective conductivity and effects of gas temperature

10 p1735 A69-23460

Effective Ohm law for inhomogeneous weakly ionized gas and Hartmann flow analysis, noting electron density fluctuation effect on conductivity

10 p1735 A69-23462

Conductivity and electron temperature in coaxial MHD generator plasma with magnetic field, studying Joule heating effect on performance

10 p1735 A69-23463

MHD electrical power generation - Conference, Warsaw, July 1968, Volume 2, Closed cycle MHD with gaseous working fluid

10 p1735 A69-23464

Linear nonequilibrium MHD generator operating at Mach 2 and Hall parameter of 3 using cesium seeded helium as working fluid

10 p1636 A69-23471

Power conversion efficiency of diverging channel nonequilibrium MHD generator with small electrode losses, examining influence of channel design

10 p1637 A69-23472

Large disk MHD generator operating at high Hall coefficient and driven by cesium seeded argon or molecular gases

10 p1637 A69-23473

Blowdown wind tunnel designed for studying closed cycle MHD converters, describing subsystems

10 p1673 A69-23474

MHD conversion experiments using rare gas, considering Typhee loop, electron heating and correction effects

10 p1738 A69-23475

MHD generators with segmented electrodes at high Hall parameters, noting electron density, conductivity and Hall field reduction factor

10 p1637 A69-23476

Argas test loop as model for MHD power plant study, discussing component testing including channel preionization and relaxation experiments

10 p1673 A69-23478

Closed cycle MPD experiments with applied electric and magnetic fields emphasizing current leakage, segmentation, relaxation and aerodynamic effects

10 p1738 A69-23479

MHD generator performance operating on nonequilibrium Ar plasma with K additions in presence of electric fields

10 p1637 A69-23480

Nonequilibrium ionization effects on performance of subsonic constant area MHD generator, using closed cycle blowdown loop facility

10 p1637 A69-23481

MHD blowdown loop facility for alkali seeded noble gas MHD energy conversion, noting performance and plasma insulation from ground

10 p1674 A69-23482

Closed loop magnetoplasmadynamic energy conversion system design, operation and duct section

10 p1638 A69-23483

Impulse induction MHD generator with cylindrical channel, finding differential equations for velocity and current

10 p1638 A69-23484

Engineering and reactor parameters associated with ionization of gas passing through nuclear reactor used as closed cycle MHD system working fluid

10 p1723 A69-23485

Two dimensional flow of unipolar medium in electrodynamic power generation channel, discussing stationary model, electric field and ion density distributions

10 p1638 A69-23486

Striated flow induction synchronous MHD generator, producing striated flow by nonthermal ionization of inert seeded gas in electric field

10 p1638 A69-23487

Power generating equipment operating with high temperature plasma as working medium requiring reactors with plasmized nuclear fuel coupled to MPD generators

10 p1738 A69-23489

Experimental arrangement consisting of closed cycle system, ionization duct and inductive MPD converter with traveling wave component, using Hg as working medium

10 p1638 A69-23490

Gaseous suspensions of thermionic emitting particles assessed as MHD working fluids in large scale MHD electric power generators

10 p1738 A69-23491

Properties of superdense NaCl plasmas as model working substance for MHD generator, discussing ion concentration and collisions, charge reversal and conductivities

10 p1739 A69-23493

Boundary layers influence on external electrical characteristics of MHD generator

11 p1824 A69-24221

MAGNETOHYDRODYNAMIC GENERATORS

Throttling effect on thermodynamic efficiency of MHD generator Rankine cycle with various working fluids
11 p1824 A69-24222

Closed loop cycle converter, composed of MHD generator and compressor consuming thermal energy, exhibiting moderate cycle efficiency decreases
11 p1824 A69-24223

Linear MHD generator power characteristics at large magnetic Reynolds numbers, analyzing magnetic field distribution for sectioned and solid electrodes
11 p1824 A69-24224

Magnetic field induced nonequilibrium argon plasma ionization relaxation processes obtained with allowance for flow parameters change in relaxation zone
11 p1922 A69-24225

MHD generator plasma anisotropic instability caused by amplified magnetosonic waves propagating normal to current
11 p1922 A69-24227

MHD power plant research and development, discussing shock wave electric power generators and modulated systems
11 p1925 A69-24469

Supersonic nozzle cross section and diffuser throat in MHD generator calculated by continuity equation
11 p1826 A69-25348

Current and voltage distribution around normal shock in MHD duct using conformal transformation, considering continuous and segmented electrode boundary conditions
11 p1931 A69-25359

Faraday type MHD energy converters in nonequilibrium conduction mode, analyzing two dimensional current and potential distributions in plane normal to magnetic field
11 p1826 A69-25397

Constant and traveling magnetic fields MHD converters induction and finite dimensions influence analyzed by conformal mapping, separation, Fourier and finite difference methods
11 p1827 A69-25399

Transient processes in conduction type MHD generators due to external circuits induction distribution
12 p2017 A69-26545

Voltage characteristics in MHD generator with water cooled segmented electrodes using potential probes, considering forced convection heat transfer
12 p2017 A69-27178

Two dimensional flow of conducting gas dynamic and electrical parameters in MGD generator channel, considering magnetic field and plasma conductivity
13 p2305 A69-27386

Electricity from MHD - Conference, Warsaw, July 1968, Volume 5, Open-cycle MHD
13 p2284 A69-27468

Chemical corrosion of zirconia-based refractories in MHD generators, considering thermal cycling and shock, seed migration and prevention
13 p2284 A69-27469

Oxide and carbide high-melting-point materials for MHD generator electrode walls
13 p2284 A69-27471

MHD generators semihot wall duct, discussing structural design, ceramic insulation elements brazing, temperature control, electrodes, working fluid, etc
13 p2372 A69-27473

Electricity from MHD - Conference, Warsaw, July 1968, Volume 3, Closed cycle MHD with liquid-metal working fluids
13 p2203 A69-27474

Speed of sound and shock waves in two phase flows of liquid metal MHD generators, considering droplets uniformly dispersed in gaseous phase
13 p2245 A69-27475

Laser Doppler method for measuring local particle velocities in two phase flows of liquid-metal MHD generators
13 p2260 A69-27476

High velocity liquid lithium effect on structural materials for MHD power generators, discussing material loss
13 p2278 A69-27478

Two phase MHD generator with gas in liquid metal emulsions, discussing loops efficiency
13 p2306 A69-27479

Energy conversion with liquid metal working fluids in MHD generators, discussing single stage fully Carnotized process
13 p2372 A69-27482

Thermal efficiencies of liquid-metal MHD generator cycles, analyzing optimum parameters, working fluid and partial irreversibilities
13 p2205 A69-27484

Liquid metal two phase flow MHD generators efficiency prediction, discussing end losses and flow velocity
13 p2205 A69-27485

Thermodynamic efficiency of MHD cycles for liquid Na with multistage injection and injection condensation
13 p2205 A69-27487

Optimal cycle parameters for liquid metal single component MHD cycle, employing condensing ejector in front of generator
13 p2205 A69-27488

Liquid metal MHD generator cycles thermodynamic analysis, considering multicycle operation improvement with heat regeneration
13 p2372 A69-27489

Piston-like laminar liquid metal flow in MHD generator to increase thermodynamic efficiency of cycle and to generate electricity by synchronous principle
13 p2206 A69-27491

Liquid-metal MHD space power generation system using intermittent vaporization slugs shooting at 2700 R peak temperature
13 p2206 A69-27492

Electrical end losses in liquid-metal MHD generators with variable conductivity, noting working fluids and aspect ratios
13 p2206 A69-27493

One dimensional calculations of finite length MHD uniform traveling wave induction generator, discussing magnetic field distribution, electrical impedance and conversion efficiency
13 p2206 A69-27494

Liquid flow MHD alternating current generator design, considering induced current in rotor and resulting magnetic field in pole gap
13 p2206 A69-27495

MHD induction converters operational characteristics calculations with simultaneous considerations for finite length and channel width
13 p2207 A69-27496

MHD channel mercury flow with hydraulic shock in transverse magnetic field, determining characteristic values distribution over range of principal parameters
13 p2307 A69-27499

Variable fluid and field velocity HF induction generator, determining interaction between fluid dynamic forces and magnetic field and kinetic energy
13 p2207 A69-27502

Liquid metal MHD induction generators design and performance, considering effect of geometry, operating conditions, fluid properties and power level on efficiency
13 p2207 A69-27503

Single wavelength design with compensation compared to multiwavelength design without compensation for liquid metal MHD induction converter, discussing optimization
13 p2207 A69-27504

Linear inductive MHD converters, reducing effects of losses due to finite length of converter by cylindrical construction
13 p2207 A69-27505

Transient response in liquid-metal conduction MHD generators, analyzing constant magnetic field using differential equation
13 p2207 A69-27506

Optimal mean radius and half height of channel of liquid metal coaxial linear induction MHD generator with unilateral and bilateral excitation
13 p2207 A69-27507

Rayleigh-Taylor instability in synchronous liquid metal MHD generators, showing stabilization by channel positioning and threshold power rating
13 p2307 A69-27508

Liquid metal induction MHD generator I-V characteristics at no load permitting self excitation with capacitors
13 p2208 A69-27509

Liquid metal MHD power plant system tested under open and closed loop conditions for liquid circulation
13 p2208 A69-27510

Sodium liquid-metal jet MHD generators tested under constant and rising magnetic fields and off and on loads
13 p2208 A69-27511

Induction, helical and straight through liquid metal MHD generators tested under independent and self excitation conditions
13 p2208 A69-27512

Three phase high temperature liquid metal induction MHD generator performance, noting velocity profile nonuniformity influence
13 p2208 A69-27513

MHD generator analysis, formulating boundary value problem for ion diffusion and Fourier series solution for end effect of electrodes pair
13 p2208 A69-27613

Electricity from MHD - Conference, Warsaw, July 1968, Volume 4, Open cycle MHD
13 p2308 A69-28021

Tensor conductivity measured and analyzed for MHD generator duct with electric and magnetic fields
13 p2309 A69-28026

Conducting liquid boundary layer flow and heat flux on electrodes of MHD generator, including one dimensional flow outside boundary layer
13 p2309 A69-28028

Segmented-electrode and Hall ducts tested on supersonic magnetoaerodynamic conversion rig, defining electrical model for boundary layer losses at electrode surfaces
13 p2311 A69-28034

Ideal MHD induction converter pressure and generator cycles compared for calculating maximum output and pressure, considering current-conducting walls effects
14 p2393 A69-28887

MHD generator design using shock wave kinetic energy produced by explosion in shock tube with superconducting magnetic system
14 p2393 A69-28911

Equation system for asynchronous MHD generator operating in self oscillating mode derived and solved
14 p2405 A69-29457

Boundary problems solution for electromagnetic field two dimensional distributions in MHD channels at arbitrary magnetic Reynolds numbers, considering longitudinal terminal effects
14 p2500 A69-29906

MHD generator design with electric conductivity waveform at small magnetic Reynolds numbers
14 p2405 A69-29911

Shunting effect of conducting channel walls in induction MHD machines, discussing wall effects on pressures during pumping and generating operation modes
14 p2405 A69-29912

Field equations for plane-parallel induction MHD machines with allowance for winding zone thickness and magnetic permeability of iron
14 p2405 A69-29914

Space charge formation in MHD generator channels ascribed to gas parameters nonuniformity and magnetic induction vector presence, assuming steady flow
15 p2659 A69-30635

Integral charge neutrality effect on local space charge density of MHD generator channel, examining electrode couple for Faraday generators
15 p2664 A69-31055

Nuclear energy conversion for long space missions, comparing dynamic Brayton, liquid metal MHD gas, dynamic Rankine and LMMHD Rankine cycles
16 p2810 A69-31748

Thermodynamic parameters of MHD cycle employing supercritical Hg, indicating need for more suitable fluids
16 p2736 A69-31914

Fringing effects on electric efficiency variation with slip for cylindrical induction MHD device operable as accelerator, generator or Joule heater [AIAA PAPER 67-714]
16 p2736 A69-32152

Diagonal conducting wall /DCW/ MHD generator channel flows in formulation including Hall effect, electrode drop and electrode wall angle
16 p2736 A69-32172

Conducting fluid incompressible flow in entrance of MHD channel by momentum integral method, permitting edge stress existence at boundary layer free stream interface [AIAA PAPER 69-724]
17 p2952 A69-33436

Thermal cycle for direct flow supersonic compressorless MHD generator without heat regeneration and high temperature exchange
18 p3093 A69-34714

High temperature combustion chamber as high velocity gas generator, noting application to MHD power generator research
18 p3184 A69-34931

Conducting and insulating construction materials at high temperatures for MHD conversion nozzles, noting lifetimes
21 p3751 A69-38456

Two dimensional numerical solution for Faraday DC MHD generators with variable conductivity, velocity and magnetic field
21 p3649 A69-39027

DC MHD generator using gas plasma as working fluid, discussing fundamental principle, components interactions and energy conversion

21 p3777 A69-39165

Superconducting magnets for MHD generators, discussing design, construction and operation problems

21 p3782 A69-39478

MHD energy converters electric fields and current distributions, analyzing MHD flow problems

21 p3777 A69-39480

Plasma instabilities in closed cycle MHD generator with gaseous working fluids, discussing effective Hall parameters

21 p3777 A69-39481

MPD converters in pulsed and continuous modes, discussing inductive propulsion system

22 p3999 A69-39905

Interaction between two temperature plasma flux and electrodes in MHD channel with crossed electric and magnetic fields, studying boundary layer dynamics

22 p3991 A69-41022

Optimization of Faraday MHD generators with nonequilibrium ionization and plasma turbulence, assuming electrons at Saha equilibrium at elevated temperatures

24 p4256 A69-43682

MAGNETOHYDRODYNAMIC STABILITY

Collection of papers on physics, Volume 31, Part 1, covering stellar evolution, electron transport in semiconductors, plasma microstability, etc

01 p0115 A69-10045

Microinstabilities of plasma confined by magnetic trap, discussing stabilization, drift waves and anomalous diffusion of plasma by turbulence

01 p0125 A69-10048

Inhomogeneous magnetically confined plasma stability, examining dissipative effects on spectra of drift oscillations with kinetic theory

01 p0126 A69-10187

Plasma stability criterion for universal mode, discussing cusp curvature stability

01 p0127 A69-10279

Stability of gravitating fluid layer of infinite extent but finite thickness including Hall effect

01 p0128 A69-10342

Asymptotic method for analyzing small long wave perturbations in plasma, showing instability with respect to perturbations propagating at angles to ion-acoustic wave

01 p0131 A69-10788

Thermonuclear fusion program, discussing plasma instabilities suppression, toroidal installations, magnetic trap systems, plasma heating and dynamic stabilization

01 p0156 A69-11065

Cross field plasma instability resulting in charge density irregularities shown to meet requirements for ionospheric irregularities model

01 p0073 A69-11178

Ionospheric irregularities and cross field plasma instability, analyzing nonlinear behavior of latter with two dimensional model

01 p0073 A69-11179

Stability of weakly inhomogeneous plasmas with free energy available for nonlinear resonant three wave interactions

01 p0133 A69-11212

Garden hose instability quasi-linear stabilization employing macroscopic viewpoint, discussing fluid model

01 p0133 A69-11217

Steady one dimensional motion of current sheets in plasma accelerators, noting condition of zero initial conductivity

01 p0133 A69-11220

Electrostatic plasma wave instabilities in ionosphere along auroral field lines, noting critical electron flux and subsequent acceleration of electrons

01 p0075 A69-11222

Formation mechanism for heterogeneous structure of interplanetary plasma based on plasma instability from temperature anisotropy

02 p0314 A69-11638

Polar auroral fine scale structure interpretation based on plasma instabilities characteristics

02 p0239 A69-11693

Instability of longitudinal plasma waves propagating across magnetic field in plasma with electrons and ions drifting with different velocities across field

02 p0286 A69-11830

Hydromagnetic stability of free boundary layer between two uniform streams in presence of aligned uniform magnetic field at large Reynolds number

02 p0287 A69-11832

Overheated semiconductor plasma instability in crossed electric and magnetic fields, deriving condition for occurrence

02 p0298 A69-12099

Ion cyclotron drift loss cone instability for cases of steep particle density gradients, magnetic field gradients and finite plasma dimensions

02 p0288 A69-12169

Equations for studying plasma stability in sheared magnetic field examined for normal mode and wave packet perturbations

02 p0289 A69-12173

Current carrying curved plasma column flute instability analysis, noting effect of increasing divergence from axial symmetry on Q values

02 p0289 A69-12175

Shear instability in unbounded collisionless cold plasma in external uniform magnetic field in current free case, noting dispersion relations

02 p0289 A69-12177

Criterion for magnetic plasma stability near magnetic axis, noting parameters for deriving criterion integrand

02 p0290 A69-12355

Plasma stability under anisotropic pressure in axisymmetric magnetic fields determined by quasi-hydrodynamic approximation

02 p0291 A69-12552

Free fluid hydrodynamics equations applied to weakly ionized plasma stability, considering drift oscillations excitation

02 p0291 A69-12553

Anisotropic plasma cyclotron instability in magnetic trap with cold ion background and isotropic Maxwellian velocity distribution

02 p0292 A69-12554

Thermodynamic stability of plasma with strong interaction, discussing relationship to simultaneous oscillation forms

02 p0292 A69-12635

Wave analysis for energy propagation in plasma, discussing excitation spectrum and stability properties

02 p0293 A69-12782

Plasma instabilities covering astrophysical phenomena, Rayleigh-Taylor instability, anisotropic and LF MHD, electrostatic and electromagnetics, warm plasmas, etc

02 p0293 A69-12783

Magnetic shear effect on stability of electron-neutral collision dominated plasma, noting helical perturbations onset

03 p0473 A69-12925

Relationship between instabilities and turbulence in plasma, using spectrum of plasma fluctuations

03 p0474 A69-13115

Existence and stability of periodic waves in cold collisionless plasma in magnetic field

03 p0474 A69-13143

Scattering of energetic charged particles in weakly unstable plasma for integrated spectrum of plasma electric field autocorrelation function

03 p0475 A69-13151

Two dimensional equilibria for high beta mirror devices found by solving Vlasov equation and Ampere law, including particle loss

03 p0475 A69-13152

Ion-ion velocity space instability due to difference between ion temperatures perpendicular and parallel to magnetic field

03 p0475 A69-13154

Critical pressure in mean magnetic well with closed lines, noting longitudinal resistivity annihilation of stabilizing effect of toroidal shear

03 p0476 A69-13382

Cone instability role in auroral electron and proton dynamics, discussing plasma instability control of maximum captured particle densities in various magnetosphere regions

03 p0501 A69-13526

Plasma gravitational stability problem with Hall effect, noting relevance to astrophysical systems

03 p0478 A69-13803

Hall effect destabilization influence in Kelvin-Helmholtz problem for ideal plasma, noting instability growth rate

03 p0478 A69-13804

Cyclotron drift instabilities of low pressure plasma containing charged impurities

03 p0478 A69-13834

Diffusion across magnetic field of unstable plasma with highly inhomogeneous density

03 p0478 A69-13840

Transverse perturbation influence on helical instability in oscillator

03 p0488 A69-13886

Langmuir wave disintegration, analyzing instability criterion and growth rate

03 p0480 A69-14057

Aperiodic hydrodynamic beam instability development and energy losses, discussing plasma oscillation enhancement and nonlinearities

03 p0480 A69-14137

Ion beam interaction with plasma in presence of charge exchange and zero external magnetic field, studying stability of system

03 p0481 A69-14200

MHD instability in current discharges in magnetic field stabilized by current frequency modulation higher than perturbation increment of plasma column

04 p0635 A69-14549

Nonlinear electron oscillations in plasma, deriving asymptotic expression for plasma perturbation

04 p0635 A69-14552

Steady state plasma flows stability equations, using variational principle for analyzing toroidal plasmas

04 p0635 A69-14556

Equilibrium and stability of strong current discharge in dense optically transparent plasma, determining cause of instability

04 p0636 A69-14983

Perfect magnetofluid model to study laminar flow stability along magnetic field, considering time dependences and rigid and free boundaries

04 p0637 A69-15045

Hydromagnetic analogs calculated for Rayleigh-Taylor problem with Hall effect, confirming introduction of plasma instabilities

04 p0637 A69-15050

Stabilizing influence of axial magnetic field on confined vortex flow of aqueous electrolytic conductor generated by two dimensional wall jets

05 p0798 A69-15611

Tearing mode instability in Bessel function model preliminary to study of tearing mode in diffuse pinches

05 p0799 A69-15615

Nondegenerate dense plasma thermodynamic stability by nonclassical methods, discussing atomic concentration dependence on ionic concentration

05 p0802 A69-15892

Plasma instabilities produced by beam plasma discharge in mirror magnetic trap

05 p0803 A69-16212

Gravitational instability of rotating anisotropic plasma for longitudinal wave propagation mode, obtaining dispersion by using modified Chew-Goldberger-Low equation

05 p0827 A69-16596

Bounded and spatially separated plasmas wave oscillations stability in magnetic field, observing hydrodynamic slipping and drift instability

06 p0963 A69-16903

Plasma confined in transverse magnetic field analyzed for drift rates, noting role of injection direction

06 p0963 A69-16907

Temperature distribution for static stellar corona in presence of magnetic field, noting energy flow process

06 p1002 A69-17316

Cusp magnetic field stabilizing superimposition on toroidal plasma discharge in polytron machine, noting role of Hall acceleration mechanism

06 p0965 A69-17514

Moment equations of Vlasov plasma used for pressure effects on gravitational flute instability of nonuniform plasma

06 p0965 A69-17515

Resonance particle effects on flute oscillation kinetic stability when resonance particles drift under influence of magnetic field inhomogeneity

06 p0965 A69-17516

Hydromagnetic plasma stability in infinite electrical conductivity approximation applied to smooth closed systems, discussing ballooning instability mode

06 p0965 A69-17519

Integrodifferential equation for plasma oscillations solved for effect of ion Larmor radius size and intrinsic electric field on flute instability of axially symmetric plasma

06 p0966 A69-17520

Plasma flute instability in magnetic trap with wall/plasma interface, using system of sensors and amplifiers

06 p0966 A69-17544

Enhanced microwave scattering by plasma instability in magnetic field, using microwave interferometer with horn antenna system

06 p0967 A69-17717

Linear approximation of ionization instability in disk channel of nonequilibrium MHD generator, calculating

MAGNETOHYDRODYNAMIC STABILITY

interatomic collisions frequency as function of temperature
06 p0871 A69-17911

MHD generators with nonequilibrium conductivity, taking into account ionization instability of plasma
06 p0871 A69-17912

Ion-cyclotron instabilities in hot-ion cold-electron plasma resulting from left-hand circularly polarized wave propagating parallel to magnetic field
06 p0969 A69-17951

Plasma instability role in radiant energy release from astronomical objects, noting plasma instabilities in solar system, cosmic rays, galactic and extragalactic objects
06 p1009 A69-17967

Electromagnetic waves excitation during interaction between density modulated beam and plasma in magnetic field, analyzing instabilities
07 p1189 A69-18508

Kinetic model describing collisions in nonequilibrium multicomponent plasma, studying pair collisions effect on stability of plasma-beam system
07 p1189 A69-18539

MHD models for analysis of nonhomogeneous magnetized plasma stability with regard to perturbations having electrical field as potential field
07 p1190 A69-18694

Stabilization of plasma filament with alternating current by quadrupole magnetic field
07 p1191 A69-18987

Transverse waves instability in relativistic plasma, noting condition of isotropy and existence of electromagnetic waves
07 p1193 A69-19032

Wave propagation and instabilities in rotating anisotropic collisionless plasma, analyzing plane and cylindrical perturbations
07 p1195 A69-19438

Cold plasma stability during traversing by electron beams in presence of external magnetic field, obtaining dispersion relations for longitudinal and transverse modes
07 p1195 A69-19465

Nonlinear interactions of positive and negative energy electrostatic modes of plasma immersed in magnetic field, discussing instability criterion and Landau damping
[IAEA PAPER CN-24/E-13]
07 p1196 A69-19768

Plasma instability with isotropic ion or electron velocity distribution function /nonMaxwellian/, discussing magnetic field and particle energy distribution functions
08 p1359 A69-19949

High density plasma dynamic stability in magnetic containment using variational calculations
08 p1359 A69-19984

Ionospheric plasma flute instability considered as possible cause of occurrence of elongated small scale inhomogeneities in F2 layer
08 p1309 A69-20425

Inhomogeneous collision plasma drift instabilities in strong magnetic field analyzed by solving nonlinear equations
08 p1365 A69-20549

Nondispersive LF mode in magnetized plasma with frequencies lower than ion cyclotron frequency, discussing plasma stability in presence of electron drift
08 p1366 A69-20750

Discharge structure and stability of nonequilibrium plasma undergoing supersonic flow through linear MHD channel
08 p1366 A69-20788

Fluid equations for collisionless plasma including finite ion Larmor radius and finite beta effects
08 p1368 A69-20802

Electromagnetic microinstabilities of plasmas associated with transverse waves propagating perpendicular to external uniform magnetic induction, noting allowable frequencies
08 p1368 A69-20804

Time rates for growth and damping of resistive instability in gaseous plasma in crossed electric and magnetic fields
08 p1369 A69-20886

Flute instabilities in rarefied plasma with intrinsic electric field, discussing plasma density profile and uncompensation degree effects on plasma magnetic field stability
08 p1370 A69-21013

LF electric potential oscillation of discharge plasma, describing oscillation behavior by theory of dissipative drift instability of weakly ionized plasma
08 p1370 A69-21020

Rotating plasma disturbances onset in MPD arc, determining magnetic field dependence on mass flow, background pressure and propellant
[AIAA PAPER 69-232]
09 p1562 A69-21225

Coaxial electrodes with electric and magnetic fields to study instability in MPD arcs
[AIAA PAPER 69-230]
09 p1563 A69-21231

Inhomogeneous collisionless plasma drift-oscillation stability in magnetic field augmented by E wave HF field
09 p1546 A69-21564

Magnetoactive plasma containing fast monoenergetic ions noting stability at drift frequencies and in terms of Alfvén wave buildup
09 p1546 A69-21566

Plasma instability in inhomogeneous magnetic field noting wavefront structure role
09 p1546 A69-21571

MHD stability of straight multipoles with shear, considering scalar-pressure perfectly conducting two dimensional MHD equilibria
09 p1546 A69-21576

Plasma mixed ion heating by small scale HF turbulent electron sound pulsations
09 p1548 A69-21673

Near cathode magnetic field effect on instability in linear Hall current accelerators, using geometry of field extending from anode to cathode region
[AIAA PAPER 69-381]
09 p1568 A69-21731

Electrothermal instabilities of ionization region of nonequilibrium MHD generator in presence of magnetic field
09 p1548 A69-21919

Plasma dissipative drift instability and nonlinear wave interaction from discharge with oscillating electrodes, investigating LF plasma oscillations
09 p1550 A69-22019

Alfvén oscillations in inhomogeneous decaying plasma from pulsed discharge with oscillating electrons
09 p1550 A69-22020

Raman microwave scattering with low frequency oscillations caused by plasma drift instabilities
09 p1550 A69-22021

Warm plasma addition to mirror confined hot plasma stabilizing convective loss cone mode
09 p1551 A69-22040

Electrons velocity-space instability in plasma column, analyzing unstable wave and dispersion characteristics
09 p1552 A69-22041

Rotating plasma gravitational instability during discharge as function of centrifugal acceleration, noting Coriolis and Larmor effects
09 p1552 A69-22043

Asymptotic toroidal equilibrium for guiding center plasma model based on stellarator expansion, considering toroidal curvature, helical currents and plasma pressures
09 p1552 A69-22044

Current instability in H plasma in electric field of large amplitude fast magnetosonic wave, noting plasma heating
09 p1552 A69-22526

Quasi-linear relaxation of electron beam in magnetoactive plasma, noting instability of plateau in velocity distribution function
09 p1553 A69-22659

Two dimensional flat geometry for initial solar flare development stage, discussing tearing mode energy source for solar flares and plasma compressibility effects
09 p1583 A69-22757

Asymptotic method for analyzing small long wave perturbations in plasma, showing instability with respect to perturbations propagating at angles to ion-acoustic wave
09 p1653 A69-23107

Increased energy losses and microwave emission at cyclotron frequency harmonics during plasma electron heating at cut-off plasma concentrations in magnetic trap
09 p1728 A69-23130

Plasma ions turbulent heating during electron-acoustic instability in field of circularly polarized electromagnetic wave at ion cyclotron frequency
09 p1728 A69-23137

Finite Larmor radius, finite conductivity, rotation and Hall current effects on Jeans criterion for gravitational instability of plasma
09 p1729 A69-23408

Nonequilibrium ionization in central regions of low temperature plasma, describing charged particle drift by using diffusion time concept
09 p1732 A69-23440

MHD boundary layer nonlinear instability, treating laminar to turbulent flow transition as reversible process
10 p1734 A69-23452

Electrothermal instabilities in small magnetic Reynolds number limit and ionization equilibrium at electron temperature using quasi-linear plane wave analysis
10 p1734 A69-23456

Instabilities in K seeded Ar plasma in crossed electric and magnetic fields and with nonequilibrium ionization, noting effects on MHD generator characteristics
10 p1734 A69-23457

Unstabilizing effect of inhomogeneities on magnetoacoustic waves in slightly ionized gases with current perpendicular to magnetic field
10 p1734 A69-23459

Turbulent plasma near stability limit in MHD generator with constant load coefficients, noting effective conductivity and effects of gas temperature
10 p1735 A69-23460

Plasma ionization instability linear growth problem analyzed in bounded region
10 p1735 A69-23461

Equilibrium loss in closed cycle MHD generator using rare gases binary mixtures as working fluid
10 p1737 A69-23468

HF magnetic field effect on oscillations and instabilities of plasma confined by fixed magnetic field
10 p1739 A69-23623

Discharge plasma ionized waves, determining mechanism of wave propagation and instabilities
10 p1740 A69-23699

Spontaneous magnetic field excitation in turbulent plasma noting possible instability
10 p1740 A69-23715

Transport of matter in nonisothermal weakly ionized plasma due to traveling ion-acoustic wave propagation, noting plasma oscillations and instability
10 p1741 A69-23945

Density modulated charged particle beam interaction with plasma under paramagnetic resonance, analyzing longitudinal oscillations and parametric instability zone
10 p1741 A69-23947

One dimensional nonlinear model of anisotropic plasma instability with respect to Alfvén waves growth, noting applicability to solar wind processes
10 p1741 A69-23961

Ionization instability in low temperature magnetized plasma, analyzing electron concentration perturbation caused by Joule heating during electron-ion collisions
10 p1741 A69-23962

MHD generator plasma anisotropic instability caused by amplified magnetosonic waves propagating normal to current
11 p1922 A69-24227

Thermodynamic stability of dense plasma consisting of electrons and charged ions, plotting ionization potential as function of electron density and temperature
11 p1922 A69-24232

One dimensional electrostatic plasma oscillations in alternating external electric field, noting plasma stability and electron-electron two stream instability
11 p1924 A69-24298

Explosive and reversible onset of helical instability in weakly ionized discharge plasmas, noting ambient noise level role
11 p1924 A69-24299

Electric field fluctuations in inhomogeneous plasma calculated by test particle method, interpreting results in convective modes terms in plasma control and stability
11 p1924 A69-24301

Dynamics, stability and approach to equilibrium of bounded one dimensional collisionless plasma representing minimum energy states with nonlinear Vlasov equation solutions
11 p1924 A69-24305

Toroidal plasma radial drift suppression on curved theta pinch axis through introduction of transverse conducting ring inside vacuum tube
11 p1925 A69-24313

Hydromagnetic instability onset in dissipative flow of electrically conducting fluid between rotating permeable perfectly conducting cylinders, noting oscillatory axisymmetric critical modes
11 p1926 A69-24895

HF instability of low pressure discharge in magnetic field, discussing plasma diffusion and oscillations
11 p1927 A69-24912

Charge bunching approach for gravitational hydrodynamic instability of infinite uniform self

gravitating system in translational motion, using conservation laws

11 p1961 A69-25105

Spectrum space-time characteristics of electrically produced plasma discharges magnetically compressed to discharge tube wall, using spectrochromograph and spectrographs

11 p1927 A69-25217

Dense gas equilibrium plasma thermodynamic stability in case of high electrostatic interaction energy of charged particles, analyzing phase transition possibility

11 p1928 A69-25234

Linear interaction of electron beam and plasma in magnetic field noting convective wave instability, wave dispersion and properties behavior

11 p1929 A69-25267

LF waves and instabilities on positive column in axial magnetic field, noting axisymmetric and asymmetric ion acoustic and electron wave modes and current convective instability

11 p1929 A69-25268

Kink type instability of rotating linear theta pinch plasma, calculating perturbation behavior with bounce model

11 p1929 A69-25270

Unstable ion sound wave propagation across magnetic field in collisionless shock waves, noting drift instability

11 p1930 A69-25273

Asymptotic solution for Fokker-Planck equation at low collision frequency, studying electron-ion collisions effect on universal instability in inhomogeneous plasma

11 p1930 A69-25358

LF electromagnetic waves stability and propagation conditions in plasma confined in central-conductor configuration measured, noting agreement with wave equation solution

11 p1931 A69-25362

Critical condition for electromagnetic radiation generation by energetic electrons gyrating in dense magnetized plasma, proposing plasma instability mechanism

11 p1931 A69-25363

Surface instabilities at tangential discontinuity between media caused by beam-plasma interaction, deriving dispersion relation

11 p1931 A69-25365

Centrifugal instability of plasma column generated by cyclotron absorption of microwave power in magnetic mirror field

11 p1931 A69-25366

Natural oscillations excitation instabilities by modulated ion beams in magnetoactive plasma ascribed to anomalous Doppler effect

11 p1932 A69-25536

Current carrying inhomogeneous dense plasma instabilities confined in magnetic field, deriving dispersion relations in geometric optics approximation

11 p1932 A69-25537

Convective drift and flute instabilities of plasma stabilized by exerting HF forces on electrons, determining required HF field amplitudes

11 p1932 A69-25538

Convective wave instability resulting from modulated electron beam injection into plasma, noting amplitude restraint due to collisional damping effect

11 p1934 A69-25576

Electrostatic drift wave dissipative instability in framework of macroscopic theory, accounting for resistivity and viscosity using WKB method

11 p1934 A69-25655

Transverse perturbation influence on helical instability in oscillator

11 p1939 A69-25687

Flute oscillation instability of dense plasma cylinder under nonuniform electric field, analyzing oscillation spectrum properties

11 p1934 A69-25707

Energy loss during turbulent plasma heating by current in open magnetic trap, attributing heating to ion-acoustic instability in plasma

11 p1935 A69-25753

Ionization instability in plasma enclosed by two infinitely segmented and ideally emitting electrode walls and two insulator walls

12 p2134 A69-26095

Finite ion Larmor radius effect on gravitational instability of two superposed fluids in uniform rotation, analyzing interchange perturbations and vortex sheet

12 p2062 A69-26461

Plasma instability in magnetic and HF electric fields, observing aperiodic short wave and oscillatory instabilities

12 p2136 A69-26526

Transient processes in conduction type MHD generators due to external circuits induction distribution

12 p2017 A69-26545

Plasma properties when carrying periodic magnetoacoustic wave expressed in terms of periodic functions, discussing small perturbation propagation

12 p2138 A69-26708

Surface dissipation effect induced by end electrodes on drift instabilities in cold ion plasma column described by differential equation with constant coefficient

12 p2138 A69-26710

Rarefied plasma potential fluctuations when bounded by surface having complex conductivity and dispersing properties

12 p2139 A69-26712

Magnetospheric plasma instabilities, discussing pitch angle diffusion instabilities, auroral precipitation boundary location, radial diffusion and maximum dissipation limit

12 p2072 A69-26748

Satellite observation of intensity and distribution of VLF emission at medium latitude during magnetic storm interpreted by transverse resonance plasma instability

12 p2073 A69-26947

Steady helical discharges /skin effect/ in air and Ar under high pressure without gas injection, discussing discharge stability factors

12 p2140 A69-27122

Electrodynamics model applicability to HF flame discharge for case of flame discharge stabilization by axial air injection

12 p2140 A69-27126

Instabilities related to particles transit time in system of two counterstreaming electron beams of finite length, noting wave dispersion

12 p2141 A69-27179

Magnetic curvature effect on collisionless plasma density gradient drift instabilities, covering mean ion Larmor radius and Alfvén modes

13 p2305 A69-27375

Finite Larmor radius effects on gravitational instability of rotating anisotropic plasma for transverse wave propagation mode

13 p2346 A69-27704

Hydromagnetic stability of spiral arm embedded in gravitating medium from analysis of instability of self gravitating incompressible cylinder

13 p2346 A69-27705

Finite Larmor radius and collision with neutral atoms simultaneous effects on plasma gravitational instability

13 p2346 A69-27708

Dissipative drift instability due to electron density gradient and dissipative mechanism /neutral-electron and ion-electron collisions/ in plasma in constant magnetic field

13 p2308 A69-27979

Rayleigh-Taylor instabilities in two fluid hydraulic model, noting perturbation direction and Lorentz forces effects on instabilities growth time

13 p2310 A69-28033

Current carrying cylindrical plasma column oscillations surrounded by electric excitation with multiple feedback radio, discussing stabilization possibility

13 p2311 A69-28106

Unstable weakly ionized HF magnetoplasma fluctuations with no axial drift, noting phase velocity parametric dependence

13 p2312 A69-28197

Alternating current plasma arc coaxial flow stabilization [AIAA PAPER 68-706]

13 p2313 A69-28232

Variational method for time invariant states of collisionless plasma in oscillating electromagnetic field

13 p2314 A69-28365

Convective-current instability in finite length plasma column, analyzing spectrum of unstable harmonics

13 p2314 A69-28441

Langmuir HF turbulence effect on anisotropic plasma oscillation spectra, determining instability conditions

13 p2315 A69-28448

Axisymmetric instabilities by Z-pinch and reverse axial current discharges in plasmas of arbitrary conductivity

13 p2315 A69-28449

Screw instability in glowing discharge plasma column in longitudinal magnetic field generalized to instabilities in low pressure arc, Penning and high current discharges

13 p2315 A69-28526

Polar auroral fine scale structure interpretation based on plasma instabilities characteristics

13 p2258 A69-28724

Alfvén and slow and fast magnetoacoustic waves excited during decay instability of initial Alfvén wave, noting dissipation effect on stability

14 p2489 A69-28735

Potassium plasma drift instability suppression by applied external HF electric field, noting plasma diffusion decrease toward container wall

14 p2489 A69-28740

Boundary conditions for equilibrium diamagnetic plasma in magnetic dipole having constant and isotropic pressure in system

14 p2489 A69-28910

Equatorial jet stream excitation of longitudinal waves, analyzing plasma beam instability and spectrum of short wave inhomogeneities by quasi-hydrodynamic equations

14 p2437 A69-29073

Kelvin-Helmholtz instability noting effects of oblique magnetic field and rotation, deriving dispersion relation

14 p2491 A69-29335

Radiative effect on rotating gaseous magnetic mass stability in thermodynamic equilibrium, including small oscillations stability

14 p2522 A69-29596

Low beta fusion research in open end magnetic mirrors covering scope, end losses, fusion economics, flute instability, stabilization, etc

14 p2498 A69-29843

Collisionless Ce and K plasmas measurements to determine steady state parameters and LF oscillations, noting noise relationship to drift instability

14 p2499 A69-29849

General algorithm for eruptive plasma instabilities in fusion plasmas, flares and novae, yielding time behavior and dissipative effects

14 p2499 A69-29850

Collisionless plasma slab drift mode stabilization at uniform temperature by oscillating electromagnetic field

14 p2499 A69-29851

Synthesized plasma from neutralized mercury ion beam ejected from electron bombardment source, analyzing temperature, plasma sheath and stability

14 p2502 A69-29956

LF electrostatic oscillations of inhomogeneous solid state plasma with small number of current carriers in parallel external electric and magnetic fields

15 p2665 A69-30042

Drift wave instability due to particle number density gradient of plasmopause, considering velocity shear modification

15 p2595 A69-30096

Plasma stability under anisotropic pressure in axisymmetric magnetic fields determined by quasi-hydrodynamic approximation

15 p2658 A69-30249

Free fluid hydrodynamics equations applied to weakly ionized plasma stability, considering drift oscillations excitation

15 p2658 A69-30250

Anisotropic plasma cyclotron instability in magnetic trap with cold ion background and isotropic Maxwellian velocity distribution

15 p2658 A69-30251

Criterion for magnetic plasma stability near magnetic axis, noting parameters for deriving criterion integrand

15 p2658 A69-30265

Hall generator electrical characteristics, discussing plasma homogeneity, stability and shock tube priming

15 p2658 A69-30298

Hydromagnetic stability calculations applied to umbral models, showing overstable oscillations relation to thermal hydromagnetic wave generation occurrence in sunspots

15 p2693 A69-30780

MHD stability and equilibrium of toroidal high beta configurations achieved by superimposing oscillating magnetic field on linear plasma column

15 p2660 A69-30877

Nonlinear effects and turbulent behavior in beam plasma instability, studying interactions in magnetic field

15 p2660 A69-30917

Plasma instabilities due to anisotropic velocity distributions computer analyzed to study nonlinear phenomena and validity limits of linear theory

15 p2661 A69-30920

Turbulent diffusion and ion heating in plasmas in presence of current instability

15 p2662 A69-30959

Radial self focusing of low density electron beam by interaction with plasma in presence of beam plasma instability

15 p2662 A69-30964

Nonlinear wave scattering at plasma particles and weak plasma inhomogeneity effects on plasma current instability

15 p2662 A69-30965

Eigenfrequency spectrum and stability of perfectly conducting inviscid incompressible fluids in cylindrical channels and twisted magnetic fields, noting flowfields and critical wavelengths

15 p2664 A69-31063

Interchange stability and drift motion of plasma with loss from ends of axisymmetric magnetic bottle, using hydromagnetic equations

15 p2664 A69-31100

Low density cold plasma effect on stability of cylindrical layer of charged particles against electrostatic perturbations in uniform magnetic field

16 p2816 A69-31635

Magnetic field lines curvature effect on plasma instabilities due to ion temperature gradient, noting frictional gravitation field simulation

16 p2816 A69-31636

Transverse instabilities in collisionless electron plasma in absence of permanent magnetic field with spheroidal velocity distribution, noting application to shock theory

16 p2817 A69-31645

Quasi-linear theory of waves in collisionless plasma in absence of external fields, relating wave energy growth and decay to plasma stability

16 p2817 A69-31646

Wide argon plasma column by axial current density measurements, confirming existence of instability and determining critical magnetic field

16 p2819 A69-31680

High beta theta pinch stability against tearing modes, determining necessary magnetic field conditions for slab and cylindrical cases

16 p2819 A69-31681

Nonlinear theory of $E \times B$ instability for weakly ionized plasma in presence of density gradient and parallel electric field perpendicular to magnetic field

16 p2819 A69-31682

Temperature gradients effect on ion flute mode in low beta plasma having density gradients in x direction, obtaining instability condition

16 p2819 A69-31689

Collisionless drift plasma wave instability growth rate calculation noting destabilization from resonant electrons

16 p2820 A69-31691

Plasma experiments with TM-3 apparatus under stable discharge conditions in H, discussing energy loss mechanisms, transport coefficients, reciprocal lifetime, etc

16 p2820 A69-31795

Charge density irregularities of midlatitude ionospheric E region related to cross field plasma instability noting turbulence

16 p2773 A69-31972

Energy principle applied to Astron type device stability based on model with rigid E layer electrons, finding critical pressure expression for ballooning modes

16 p2821 A69-32035

Screw pinch stability explained by strong force free current carried by magnetic field around central plasma column

16 p2821 A69-32037

Electromagnetic wave propagation in plasmas and plasma instabilities due to oscillations, deriving equations for frequency distributions in various plasma compositions

16 p2823 A69-32243

Multipole configuration toroidal plasma confinement device MHD equilibrium and stability from measured data

16 p2823 A69-32563

Time resolved beam distribution functions resulting from cyclotron instability and harmonics in electron injection machine during beam-plasma experiment

17 p3014 A69-33829

Semiconductor plasma DC overheating instability in electric and magnetic fields, determining growth increments of oscillation amplitude

18 p3182 A69-35022

Waves in auroral ionosphere due to particle precipitation, indicating ionospheric plasma instabilities

18 p3130 A69-35187

Equilibrium state of diamagnetic plasma configuration in inhomogeneous magnetic fields with complex potential near neutral point, noting solar flares and magnetic traps

19 p3380 A69-36467

Gravitational stability of infinite conducting fluid cylinder in axial magnetic field and surrounded by fluid of different density

19 p3380 A69-36483

Solar wind velocity cycles from fluid MHD viewpoint, applying Kelvin theorem on circulation stability in closed fluid system

20 p3587 A69-37041

Plasma instabilities produced by beam plasma discharge in mirror magnetic trap

20 p3581 A69-37784

Homogeneous compressible fluid sphere with axisymmetric magnetic field, analyzing oscillations and stability using variational principle

20 p3605 A69-37822

Asymptotic method for analyzing small long wave perturbations in plasma, showing instability with respect to perturbations propagating at angles to ion-acoustic wave

20 p3582 A69-38005

Electron ejections from nuclei of radio galaxies and quasars explained on basis of plasma stability, discussing role of relativistic electrons and resulting unstable pinch

20 p3606 A69-38032

Lower E region field-aligned plasma instability arising from neutral wind driving ionization across magnetic field

20 p3534 A69-38091

Kinetic model describing collisions in nonequilibrium multicomponent plasma, studying pair collisions effect on stability of plasma-beam system

21 p3776 A69-38691

Scalar conductivity as governing parameter in determining current sheet diffusion and energy dissipation in MHD shock producing devices

21 p3776 A69-38708

Temperature gradient effect on plasma stability in maximum J configuration

21 p3776 A69-38711

Closed cycle MHD with gaseous working fluids and steady state nonequilibrium ionization

21 p3777 A69-39479

Plasma instabilities in closed cycle MHD generator with gaseous working fluids, discussing effective Hall parameters

21 p3777 A69-39481

Shock wave effect on ionization of detonation waves in propane-O mixtures producing stable high velocity plasma, measured by double probe method

21 p3853 A69-39745

Aligned uniform magnetic field effect on hydromagnetic stability of two dimensional incompressible electrically conducting jet flow with large Reynolds number

22 p3931 A69-40687

Homogeneous magnetoactive plasma longitudinal oscillations stability with fast monoenergetic ions addition, noting ion temperature increase stabilizing effect

22 p3990 A69-40789

Type II and type III solar radio burst relation to plasma instability associated with coherent synchrotron deceleration of electrons, discussing resonant power exchange

22 p4007 A69-40898

Electromagnetic wave propagation instabilities in semiconductor magnetoplasmas not diffusion limited to LF, using dispersion equation

22 p3902 A69-41223

Hydrodynamic stability of conducting fluid in external magnetic field subject to attraction of external spherically symmetric gravitational field

23 p4213 A69-41717

Equilibrium plasma configurations in magnetic field of two dimensional dipole analyzed under similar conditions to magnetospheric tail formation with neutral hot plasma layer

23 p4205 A69-41835

Pearl type geomagnetic micropulsation development by studying Alfvén waves cyclotron instability in plasma with hot protons anisotropic distribution

23 p4206 A69-41850

Instability theory of baroclinic vortices in incompressible and inviscid fluid, investigating symmetric meridional motions time evolution by numerical integration of hydrodynamic equations

23 p4153 A69-42346

Short term frequency fluctuations of CW HCN masers reduced to 10 kHz by improving plasma stability

24 p4327 A69-42614

Fire hose instability growth rate in relativistic plasma with anisotropic pressure, discussing importance to cosmic ray liberation and isotropization at galactic halo

24 p4376 A69-42660

Plasma instabilities in astrophysics - Conference, Monterey, October 1968

24 p4377 A69-42681

LF instability in plasmas and hydromagnetic fluids, discussing MHD equations, Rayleigh-Taylor instability, interchange mode, Kelvin-Helmholtz instability, etc

24 p4355 A69-42683

MHD tearing mode, considering most unstable wavelength, energetics and stability in two dimensional equilibria

24 p4355 A69-42684

Two stream instabilities, considering uniform infinite collisionless plasma with stream of electrons passing through ion-electron medium

24 p4355 A69-42685

Plasma microinstabilities due to ion and electron anisotropic velocity distributions, considering frequencies near harmonics of ion cyclotron frequency

24 p4355 A69-42686

Solar corona instabilities and shock waves indicated by type 3 and 2 bursts, considering electrons ejection

24 p4378 A69-42689

Transverse plasma waves propagating along parallel static electric and magnetic fields may lead to instabilities regardless of carriers sign

24 p4355 A69-42923

Two stream plasma instability in equatorial electrojet extended to nonlinear domain by nonlinear treatment of ion kinetic equation

24 p4310 A69-43182

Stationary equilibrium of two dimensional plasmas with motion perpendicular to uniform magnetic field and gravitational field, considering resistive diffusion role

24 p4356 A69-43365

Self induced magnetic field influence on plasma positive column stability in longitudinal magnetic field

24 p4356 A69-43366

Electrothermal waves in nonequilibrium electrical discharge in potassium seeded argon plasma

24 p4359 A69-43645

Unsteady MHD conducting fluid flow in arbitrary ducts under transverse magnetic field, studying effects of pressure gradient impulsive change

24 p4359 A69-43678

Plasma-dynamic forces used to suppress fuel-propellant interface turbulence in coaxial jet gas core reactors

24 p4349 A69-43679

MAGNETOHYDRODYNAMIC TURBULENCE

Space-time function for joint probability distribution of velocity and magnetic fields from hydromagnetic turbulence equations

04 p0638 A69-15277

Plasma mixed ion heating by small scale HF turbulent electron sound pulsations

09 p1548 A69-21673

Sun-like alternating field generators, discussing dynamo theory of stellar and planetary magnetic fields based on nonmirror symmetrical turbulent motion in conducting fluid

10 p1782 A69-23703

Dynamo action origin of stellar and planetary magnetic fields, considering turbulent helical motions of H convection zone of sun

22 p4011 A69-39998

MHD disturbances in earth core produced by sudden introduction of magnetic dipole with axis positioned perpendicular to earth mantle and toroidal excitation fields

23 p4158 A69-42176

MAGNETOHYDRODYNAMIC WAVES

NT ELECTROSTATIC WAVES

NT PLASMA WAVES

Electron cyclotron harmonic waves in magnetoplasma irradiated by external microwaves

01 p0127 A69-10335

Nonlinear hydromagnetic solitary wave propagation at angle to magnetic field in fully ionized quasi-neutral collisionless warm plasma, noting isotropic pressure effect

01 p0127 A69-10336

Alfvén and magnetoacoustic waves propagation in inhomogeneous stable plasma situated in field with helical lines of forces

01 p0130 A69-10742

Standing Alfvén wave resonances in liquid sodium

01 p0131 A69-10820

Hydromagnetic wave propagation in current carrying regions of ionosphere and magnetosphere using macroscopic equations, deriving dispersion relation

01 p0067 A69-10972

- MHD waves and toroidal mode existence by mathematical approximation
02 p0236 A69-11430
- Alfven wave propagation in nonhomogeneous systems for relativistic MHD, discussing magnetic and velocity perturbations
02 p0290 A69-12254
- Geomagnetic micropulsations mechanism, discussing hydromagnetic waves transmission generated by interface instability between solar wind and magnetosphere, noting transmission path role
02 p0244 A69-12395
- Geomagnetic micropulsation theory, discussing mechanisms responsible for amplitude spectrum at earth surface and power spectral density
02 p0244 A69-12396
- Alfven wave propagation designations in terms of polarization and propagation velocity, resolving contradictory aspects
02 p0290 A69-12400
- Collisionless plasma heating by hydromagnetic waves in solar wind
02 p0309 A69-12714
- Electrostatic acoustic wave mode with plasma motion in magnetic surfaces perpendicular to field in toroidal systems with geodesic curvature
03 p0475 A69-13147
- Geomagnetic field topology of nighttime magnetosphere, showing pi 2 pulsations excitation mechanism in terms of Alfven waves resonance in external cavity
03 p0423 A69-13524
- LF hydromagnetic waves propagation in ionospheric waveguide duct resulting from minimum in Alfven speed near F 2 ionization peak
03 p0399 A69-14023
- MHD waves, Landau damping and magnetosonic waves in homogeneous relativistic Vlasov plasma
04 p0636 A69-15043
- Transverse ionizing MHD shock waves, discussing jump conditions with magnetic field in shock plane
04 p0637 A69-15052
- Two fluid MHD equations in form of nonlinear ion waves with magnetic vector
04 p0662 A69-15244
- Pc 1 micropulsation and magnetosonic amplification of hydromagnetic waves
05 p0754 A69-16263
- Alfven waves observed propagating along lines of force in inhomogeneous plasma in presence of homogeneous gravitational field
05 p0805 A69-16706
- MHD shock wave decay in one dimensional unsteady flow of ideal inviscid perfectly conducting compressible fluid subjected to transverse magnetic field
05 p0806 A69-16736
- MHD shock discontinuities above critical Alfven-Mach numbers in two fluid plasma
06 p0970 A69-17954
- Thickness of resistivity controlled hydromagnetic shock wave, using classical one fluid equations and generalized Ohm law
06 p0970 A69-17956
- Transverse LF oscillations in geomagnetic field observed during January 1967, noting possibility of being second harmonic of magnetospheric standing Alfven waves
07 p1124 A69-18835
- Jump conditions across MHD shock waves, reducing relations to identities applicable to nonequilibrium situations
07 p1193 A69-19242
- Hydromagnetic wave propagation and generation in magnetosphere, discussing hydromagnetic waves in uniform and axisymmetric magnetic fields
07 p1208 A69-19356
- Fluid motion and MHD disturbances in viscous incompressible fluid of finite electrical conductivity, studying axis of oscillating dipole perpendicular to exciting field
07 p1195 A69-19451
- Steady shock discontinuity in perfectly conducting gas flow in arbitrarily oriented magnetic field for various Mach numbers
08 p1360 A69-19988
- Symmetric Alfven waves propagation in hydrogen plasma with nonuniform density distribution, deriving dispersion relations for fully ionized plasma
08 p1367 A69-20794
- Quasi-linear theory of hydromagnetic waves in non-relativistic collisionless plasma, noting resonant diffusion effect on plasma heating mode
08 p1367 A69-20797
- Steady state currents effect on hydrodynamic waves propagated normal to magnetic field
09 p1547 A69-21662
- Singular shock waves formation during pulsed forward motion of conducting piston in MHD medium
09 p1551 A69-22034
- Resonant interaction between traveling charge with superimposed magnetic field and Alfven wave in plasma cylinder, showing cyclotron orbit variations
09 p1551 A69-22035
- Switch-on ionizing shock waves structure, analyzing condition of downstream state and effect on hydromagnetic wave speed
09 p1552 A69-22045
- Collisionless plasma heating by damping hydromagnetic waves applied to solar wind qualitative model, discussing magnetoacoustic wave energy
09 p1607 A69-22426
- Conical refraction of magnetosonic waves occurring when Alfven waves propagate at speed of sound in conducting fluid in presence of constant uniform magnetic field
10 p1727 A69-23091
- Electron density and collision frequency of MHD plasma determined directly by measuring phase shift and attenuation of propagating laser microwave signal
10 p1731 A69-23436
- Simultaneous interplanetary magnetic field measurements by geocentric satellites Explorer 33 and IMP 3 of MHD shock wave associated with July 8, 1966 sudden storm commencement
10 p1783 A69-23773
- Geomagnetic field directed hydromagnetic waves propagation in lower ionosphere, noting inhomogeneous conductivity, Hall effect and lines of forces role
10 p1687 A69-23926
- Plasma concentration diagnostics in magnetosphere based on hydromagnetic whistlers/pearls/dispersion
10 p1688 A69-23934
- Plasma distribution and Alfven wave velocity field in magnetosphere, discussing distortion of dipole magnetic field, ring current and wave propagation
10 p1742 A69-24205
- Geomagnetic field Pc 3 and Pc 4 pulsation generation mechanism explained by resonance of MHD waves in force tubes adjoining radiation belt maximum
10 p1689 A69-24206
- Nonuniformity of magnetic field effect on steady flow of incompressible inviscid electrically conducting fluid in duct, considering Reynolds and Alfven numbers
11 p1923 A69-24291
- [JPL-TR-32-1376]
- Rotational discontinuity in plasma, noting behavior for particle reflection off front side or back side of MHD wave
11 p1923 A69-24293
- Geomagnetically trapped particle loss processes and equilibrium distribution resulting from MHD wave field interaction described using sandbox model
11 p1948 A69-24856
- LF waves and instabilities on positive column in axial magnetic field, noting axisymmetric and asymmetric ion acoustic and electron wave modes and current convective instability
11 p1929 A69-25268
- Cyclotron harmonic waves/CHW/ nonlinear decay instability and parametric amplification, considering applicability to practical amplifiers
12 p2135 A69-26314
- Nonuniform two dimensional hydromagnetic waves incident on idealized lower ionosphere, discussing validity of various models
12 p2074 A69-26960
- Solar chromosphere and corona heat intensity above 1000 km attributed to tongues of turbulence, considering convective zone exciting MHD waves mechanism
13 p2337 A69-27549
- Cosmic ray propagation theory for steady streaming along magnetic field and down cosmic ray density gradient, noting MHD wave generation by anisotropy
13 p2326 A69-27569
- Geomagnetic pulsations and hydromagnetic wave propagation in magnetosphere, using geometric optics approximation
13 p2254 A69-28176
- MHD waves and oscillations in cylindrical plasma column contained by longitudinal magnetic field, noting dispersion equations
14 p2489 A69-28732
- Alfven and slow and fast magnetoacoustic waves excited during decay instability of initial Alfven wave, noting dissipation effect on stability
14 p2489 A69-28735
- Correlation coefficients between radial components of interplanetary magnetic field and solar wind velocity from Mariner 5 data due to Alfven waves
14 p2510 A69-28949
- Hydromagnetic waves propagation in finitely conducting fluid mass immersed in nonuniform magnetic field, using curvilinear coordinates based on lines of force
14 p2491 A69-29336
- Magnetospheric plasma motion associated with Alfven mode time fluctuations of magnetic field in solar wind
14 p2521 A69-29382
- Detached MHD shock wave formation in front of magnetic field acting as piston moving collisionless plasma, discussing time dependence, Alfven speed and plasma parameters
14 p2502 A69-29958
- Hydromagnetic fast shock strength and direction in inhomogeneous gravitational atmosphere with uniform magnetic field, discussing heating in solar corona
15 p2680 A69-30202
- Galactic cosmic rays and Alfven waves interaction, considering gyration frequency resonance, wave growth, Fokker-Planck equation and diffusion model
15 p2675 A69-30761
- Hydromagnetic stability calculations applied to umbral models, showing overstable oscillations relation to thermal hydromagnetic wave generation occurrence in sunspots
15 p2693 A69-30780
- Interstellar hydromagnetic waves due to streaming cosmic rays indicated by pulsar scintillations studies
15 p2676 A69-30889
- Final states of density, velocity and pressure in gas, comparing states reached after transition through single oblique hydromagnetic shock and two successive shocks
15 p2664 A69-31217
- Transmission of Alfven waves through earth bow shock based on hydromagnetic shocks theory, discussing amplitude amplification
16 p2777 A69-32099
- Weak nonlinear hydromagnetic waves in cold collisionless plasma, using nonlinear perturbation method
17 p3010 A69-32866
- Active solar centers interactions above photospheric level and through corona linkages, noting MHD shock waves and magnetic field lines
17 p3040 A69-33801
- Oblique hydromagnetic shock waves in magnetized hydrogen plasma enclosed in pyrex chamber by oscillatory zeta discharge, probing for front development and structure
17 p3013 A69-33823
- Hydromagnetic whistlers propagation mechanism in magnetosphere determined by wave theory, assuming Gaussian radial density distribution and estimating duct width necessary for trapping
18 p3102 A69-34966
- Hydromagnetic wave-charged particle resonant interaction described by diffusion equation in momentum space, deriving diffusion coefficients and time evolution ultrarelativistic particle energy spectrum
19 p3424 A69-36335
- Structure of isolated MHD shock wave in viscous heat-conducting radiating gas finite electrical conductivity and transverse magnetic field
20 p3581 A69-37189
- Doppler observations of ionospheric motions associated with magnetic micropulsations, noting hydromagnetic and neutral gas waves
20 p3535 A69-38194
- Amplitude equations for magnetoacoustic and entropy waves diverging from normal MHD shock, obtaining energy flux ratios associated with incident and transmitted waves
20 p3582 A69-38242
- Hydromagnetic waves equations of motion for non-relativistic case, discussing particle and fluid flow models
20 p3616 A69-38317
- Collisional shocks in inverse pinch MHD shock producing device, discussing position in current sheet and effect on conductivity and diffusion
21 p3776 A69-38709
- Propagation, damping, power coupling and plasma heating characteristics of harmonic ion cyclotron waves, noting temperature effects
21 p3777 A69-39455
- Shock waves in closed cycle MHD with gaseous working fluids, investigating MHD channel flow
21 p3778 A69-39482
- Auroral zone Birkeland currents in magnetosphere, analyzing particle trajectories for plasma sheet energy distribution and Alfven layer position
21 p3792 A69-39567

Chromospheric heating above sunspots by analyzing MHD wave generation and propagation in sunspots and solar atmosphere

22 p4010 A69-39992

Coherent MHD waves propagation in presence of plasma density fluctuations, applying perturbation technique to solve stochastic wave equation

22 p3990 A69-40529

MHD waves attenuation in ionosphere due to gyrorelaxation, reducing analysis to determination of anomalous absorption of acoustic waves

23 p4155 A69-41841

H and He atoms escape from atmosphere under MHD waves action at exosphere boundary

23 p4156 A69-41847

Pearl type geomagnetic micropulsation development by studying Alfvén waves cyclotron instability in plasma with hot protons anisotropic distribution

23 p4206 A69-41850

LF hydromagnetic waves propagation along geomagnetic field lines in gyrotropic ionosphere model taking Hall effect into account

23 p4157 A69-41864

Guiding center Vlasov equation derived dielectric tensor of collisionless plasma, obtaining dispersion relation of Alfvén waves in warm plasma

23 p4197 A69-42416

Ionospheric heating and velocity dependence of collision cross sections on transversely propagated equatorial hydromagnetic waves, discussing ordinary and extraordinary modes

23 p4161 A69-42437

Gravitational field structure effects on Alfvén waves propagation in inhomogeneous medium

23 p4223 A69-42478

Fluctuating electric fields relations to MHD bow shock structure, using LF fluxgate magnetometer aboard OGO 5

24 p4306 A69-42693

Hydromagnetic radiation characteristics of electric and magnetic dipoles in homogeneous anisotropic cold plasma, obtaining field components and wave propagation modes

24 p4307 A69-42905

Magnetic and electron temperature interaction effects in fast MHD shock waves in slightly ionized plasma

24 p4356 A69-43361

MAGNETOHYDRODYNAMICS

MHD equations describing interactions between gases and magnetic fields solved by finite difference method

01 p0129 A69-10722

Plane MHD jets with variable conductivity, showing effective mixing length as function of distance

01 p0130 A69-10773

Structure of shock waves from MHD jet injected into zero viscosity, finite thermal and electrical conductivity medium analyzed by nonlinear differential equation system

01 p0130 A69-10774

Electrohydrodynamic analogies to known MHD effects studied by differential equations for hydrodynamic and electric field energy relations

01 p0131 A69-10775

MHD technology applications to industry and cost and performance of MHD generators

01 p0013 A69-11394

Hydromagnetic emissions observed at Antarctic auroral zone, discussing relation to sudden storm commencement

02 p0241 A69-11726

Quasi-one dimensional analysis of MPD arcs with nonequilibrium ionization taking into account finite rate processes and variable area

[AIAA PAPER 68-87]

02 p0291 A69-12505

Cosmic MHD, discussing mechanisms responsible for solar phenomena and dynamics of interstellar medium

02 p0293 A69-12789

Exact solutions with helical symmetry for hydromagnetic dynamo problem steady state equations

03 p0476 A69-13380

Plasma equation of motion in external electromagnetic field analyzed as generalization of Bernoulli equation in relativistic MHD

03 p0476 A69-13385

Electrodynamics of turbulent conducting media based on nonrelativistic MHD

03 p0479 A69-13972

Adiabatic motion of hydromagnetic fluid behind spherical fast shock wave for Parker solar wind model

04 p0660 A69-15126

Steady longitudinal motion of insulating cylinder in conducting fluid, discussing analog between steady MHD and acoustic scattering

04 p0638 A69-15192

Local hydromagnetic mechanism to increase magnetic fields and shape into bipolar sunspot group configuration, discussing applicability to solar atmosphere

04 p0662 A69-15243

MHD quasar model consisting of galaxy with supermassive plasma nucleus moving in magnetic field

05 p0822 A69-15853

Injector vaporizer performance in liquid metal MHD system, using model for total and static pressure distribution

06 p0871 A69-17918

Injector design based on MHD injector components performance, establishing minimum diffuser nozzle area

06 p0872 A69-17920

Liquid metal MHD systems efficiency when operating with pressure jump in diffuser nozzle

06 p0872 A69-17921

Nonsimilar MHD channels boundary layers on insulating walls noting influence of loading factor, wall temperature and Hall effect on separation

[AIAA PAPER 69-46]

06 p0972 A69-18192

Prigogine evolution criterion extended to MHD, considering Hartmann flow

07 p1188 A69-18267

Group analysis of MHD equations, determining group properties of motion equations of compressible fluid, obtaining invariant solutions

07 p1191 A69-18994

Current and voltage distribution in electromagnetic compressor channel with solid electrodes of finite resistance, noting error analysis

07 p1059 A69-19029

Power losses in MHD channel due to longitudinal end effects related to finite dimensions of electrodes and terminal insulators

07 p1193 A69-19030

Montardi circuit with sectioned electrodes to simulate isotropically conducting still liquid for application in MHD pump, discussing potentials distribution

07 p1059 A69-19031

Two dimensional unsteady wave motion in shallow water using MHD theory

08 p1362 A69-20354

Double adiabatic MHD fluid equations for electrons and ions with pressure gradients for collisionless plasma in magnetic field

08 p1369 A69-20815

Two dimensional steady flow of finitely conducting compressible fluid subjected to magnetic field with two zero components

08 p1369 A69-20843

Magnetic field decay modes due to nonuniform rotation having angular velocity as increasing function of distance from axis in infinite circular conducting fluid cylinder

08 p1369 A69-20999

MPD plasma acceleration in West Germany, discussing Hall acceleration, electrodeless plasma acceleration by electromagnetic waves and space charge neutralized Hall ion thruster

[AIAA PAPER 69-279]

09 p1564 A69-21238

Radiation cooled MPD arc thruster design and performance, noting specific impulse relation to arc spoke rotation frequencies

[AIAA PAPER 69-245]

09 p1566 A69-21259

Power series solutions of MHD boundary layer equations for flat plate with transverse magnetic field and arbitrary pressure gradient, discussing skin friction

09 p1545 A69-21396

Angular inertia of lubricant in MHD hydrostatic thrust bearings, obtaining critical angular speed of rotor

09 p1503 A69-21443

Lifetime and radial oscillations of magnetically confined laser produced plasma, solving hydrodynamical equations

09 p1545 A69-21493

Turbulent heat transfer in conducting fluid flow through circular tube in longitudinal magnetic field and constant wall heat flux, using Lyon relation

09 p1621 A69-21590

Singular surface theory combined with ray theory for propagation of weak discontinuities in nonlinear anisotropic media applied to MGD

09 p1547 A69-21613

Stresses and waves in highly conducting magnetoplastic metals as analogy of MHD processes in plasma

09 p1551 A69-22033

Topology of solar magnetic field differential rotation, using hydromagnetic equations

09 p1606 A69-22425

Transverse waves induced by disk oscillations about state of steady rotation in MHD, revealing circularly polarized waves with different phase velocities

10 p1728 A69-23239

Plasma and magnetic field measurements of tangential discontinuities in solar wind by Pioneer 6, considering velocity shears and rotation of sun

11 p1946 A69-24430

Degree of knottedness of tangled vortex lines, discussing vorticity distribution for inviscid flow and MHD invariants

11 p1872 A69-25126

Space-time hypersurfaces representations of shock waves of relativistic MHD, discussing compressibility role in proving consistency with relativistic theory

11 p1928 A69-25246

Motion equations for conducting paramagnetic fluid in magnetic field derived, including MHD equations and equation determining magnetic moment variation rates

11 p1932 A69-25465

Thermodynamic atomization in MHD energy conversion through convergent-divergent nozzles, noting nozzle efficiency and droplet size

13 p2245 A69-27477

Coupled magnetoacoustic waves in conducting paramagnetic fluid in resonance region due to mechanical and magnetic motions, considering dissipation

14 p2492 A69-29609

MHD properties of velocity measurement method using cylindrical glass filament probe and Pitot and Prandtl tubes

14 p2453 A69-29920

Entrainment of viscous electrically conducting liquid in long duct with narrow rectangular cross section and movable walls in magnetic induction field

16 p2816 A69-31606

Hydrodynamic parameters of annular Couette flow in longitudinal magnetic field for variable Reynolds and Mach numbers

16 p2821 A69-31953

Hydrodynamics of gas flow due to solar flares using point explosion model, determining shock wave travel time to earth orbit

18 p3189 A69-35397

Magnetospheric electromagnetic phenomena explained by equations of motion for particle acceleration, forbidden regions and MHD processes

21 p3707 A69-38485

Electricity from MHD - Conference, Warsaw, July 1968, Volume 6

21 p3777 A69-39477

MHD pivoted slider bearing with convex pad surface under azimuthal magnetic field

21 p3733 A69-39744

Solar physics and hydromagnetics - Conference, Sopot, Poland, September 1966

22 p4009 A69-39982

MHD dynamo construction with emphasis on fluid motion effect on magnetic field, considering spatially periodic dynamo derivation from kinematic considerations

22 p3989 A69-40196

MHD of ideal charged gravitating fluid by variational principle, considering Einstein general relativity theory

22 p3992 A69-41056

Ionizing shock wave propagation and reflection in transverse magnetic field based on MHD theory, assuming gas thermal equilibrium

22 p3992 A69-41176

Rumanian book on MHD covering electromagnetic field theory, motion equations, laminar flow, MHD generators, fluid motion past thin airfoils, shock waves, etc

23 p4195 A69-41363

MHD Rankine-Hugoniot equations for ion density, thermal pressure and convective velocity magnitude and orientation during Pioneer 6 traversal of earth bow shock

23 p4222 A69-42417

Circular arm with elliptical cross section used as magnetohydrodynamical model of helical magnetic field in spiral arms to demonstrate interstellar gas flow path

24 p4388 A69-43640

MAGNETOHYDROSTATICS

Magnetohydrostatic cavity formed round magnetic field of line dipole-line current combination by infinitely conducting plasma at uniform pressure

08 p1369 A69-20998

Axisymmetric solutions of magnetohydrostatic equations for large conductivity media satisfying second order partial differential equation containing two arbitrary functions
21 p3778 A69-39498

MAGNETOIONIC PLASMA
U PLASMAS [PHYSICS]

MAGNETOIONICS

Magnetoionic propagation of signals in magnetosphere using Maxwell equations and tensor quantities, linking to Hall, transverse and longitudinal conductivities
[ONERA-TP-593] 02 p0236 A69-11617

Algorithm for N/h/ ionospheric profiles calculations using both x and o magnetoionic components, taking into account interlayer and underlying ionization influence
02 p0239 A69-11687

Statistical characteristics of magnetoionic components of obliquely incident waves, obtaining envelope distribution of signal reflected from F 2 layer
02 p0314 A69-11691

Power radiated in magnetoionic mode by electron spiraling in magnetoplasma
02 p0309 A69-12720

Radiation resistance of short dipole immersed in cold magnetoionic medium, using polarized wave modes
07 p1107 A69-19226

Conjugate echoes in Alouette 2 topside sounder ionograms explained by multiple reflections between conjugate points of field line, noting magnetospheric waveguides role
08 p1274 A69-20045

Magnetoionic formulas similarity in ionospheric radio propagation and atmospheric acoustic gravity wave propagation above electron gyrofrequency
10 p1655 A69-23419

Ground wave propagation attainment of electron plasma resonance of F region, stressing need of wave vector orientation toward magnetic north
10 p1684 A69-23828

Algorithm for N/h/ ionospheric profiles calculations using both x and o magnetoionic components, taking into account interlayer and underlying ionization influence
13 p2258 A69-28718

Statistical characteristics of magnetoionic components of obliquely incidence waves, obtaining envelope distribution of signal reflected from F 2 layer
13 p2355 A69-28722

Thin film optical method generalization accounting for intermode coupling and oblique incidence in plane stratified magnetoionic medium applied to ionospheric LF and hydromagnetic propagation
16 p2753 A69-32393

Electromagnetic field eigenvalues along conductive circular cylinder in magnetoionic medium, assuming lossless medium and field frequency not equal to cyclotron frequency
16 p2754 A69-32568

Reflection and transmission coefficient matrices for stratified magnetoionic medium determined by thin film optical technique and iteration procedure
17 p2927 A69-33863

Ion and temperature effects on lower ionosphere refractive index for VLF radio wave propagation
18 p3102 A69-34971

Propagation characteristic model study of kinked Z trace observed on topside ionograms and explained by magnetoionic theory
20 p3531 A69-37893

Polarization measurement of slowly varying component of sun by pencil-beam antenna at 8.6 mm, analyzing data by magnetoionic theory
22 p4027 A69-40660

Approximate expressions derived from Appleton-Hartree magnetoionics formula tested for validity in computation of radio wave absorption in model ionospheric layers
23 p4126 A69-42354

MAGNETOMETERS
NT VARIOMETERS

Magnetometric equipment on board Luna 10 and Venera 4 space stations for studying magnetic field in interplanetary space, describing circuit and metrological characteristics
01 p0080 A69-10582

Vector helium magnetometer for Mariner 4 /Mars 1964/ and Mariner 5 /Venus 1967/, discussing efforts to reduce spacecraft stray fields
[IEEE PAPER 10.1] 01 p0081 A69-10714

Stable fluxgate magnetometer sensor for exploration of space magnetic fields, discussing equipment specifications and performance tests
[IEEE PAPER 10.2] 01 p0081 A69-10715

Three axis magnetometers to determine nonoriented satellite axial orientation in absolute coordinates
01 p0163 A69-11303

Magnetometer experiment for Apollo project to measure lunar surface magnetic field, describing mission requirements and instrumentation
[AAS PAPER 68-206] 02 p0312 A69-11481

Geomagnetic field H and Z components measured by proton magnetometer, applying supplementary field method for error correction
02 p0238 A69-11675

Rubidium self oscillating magnetometer long term stability, noting changes affecting accuracy and sensitivity
02 p0250 A69-12394

High resolution magnetograph study of solar magnetic field, showing magnetic asymmetry and fluctuations
04 p0651 A69-14367

Spatial distribution of background magnetic fields of quiet sun from photoelectric magnetograph observations, noting relation to supergranulation
04 p0663 A69-15396

Large scale pattern in solar magnetic field correlated with interplanetary magnetic field
04 p0665 A69-15532

Book on magnetic compasses and magnetometers covering pivoted needle instruments, surveying, transmitting and gyromagnetic compasses, inductor instruments and compass testing
08 p1315 A69-20444

Z magnetometer with quartz sensitive element suspended by thread in silicone oil design and operation
09 p1494 A69-21539

Magnetograph in Italian observatory for weak solar magnetic field longitudinal components avoiding differential amplifier by electronic compensation
10 p1693 A69-23311

Interplanetary magnetic field near Venus, analyzing data by magnetometer onboard Venera 4
10 p1791 A69-24199

Geomagnetic field vertical and horizontal intensities measured using proton magnetometer with coil theodolite
11 p1889 A69-25435

Angle-to-code converter designed on basis of quantum magnetometers frequency sensors, transforming vector sum of bias magnetic fields into pulse repetition rates
12 p2016 A69-25963

Onboard magnetic anomaly detection system for Canadian helicopter, discussing magnetometer location, boom design and testing and equipment installation
[AIAA PAPER 68-487] 12 p2094 A69-26771

Airborne magnetometer application for remote measurement of ocean wave spectra, obtaining wave noise power spectra and wave height profile
12 p2075 A69-26998

Soviet satellite and probe studies of earth, moon, Venus and Mars magnetic fields, noting automatic magnetometer
13 p2336 A69-27352

Geomagnetic field H and Z components measured by proton magnetometer, applying supplementary field method for error correction
13 p2257 A69-28706

Deep freezing of nuclear precession magnetometer elements for improving instrument characteristics
14 p2446 A69-29083

Vectormagnetograph to measure magnetic field vector components, obtaining field direction azimuth by servo circuit
14 p2453 A69-29972

Magnetometric equipment on board Luna 10 and Venera 4 space stations for studying magnetic field in interplanetary space, describing circuit and metrological characteristics
15 p2610 A69-30752

Magnetometers role in Aurorae satellite attitude stabilization, discussing operation principle, characteristics and performances
15 p2611 A69-31087

Z magnetometer with quartz sensitive element suspended by thread in silicone oil design and operation
16 p2792 A69-32534

Interplanetary and photospheric magnetic fields polarities observed by Mariner 4 and with solar magnetograph, noting noncorrelated data along latitudinal strip
18 p3205 A69-35399

Attitude stabilized rocket-released magnetometer for detection of earth field magnitude and direction changes
19 p3309 A69-35994

Rocket-released magnetometer probe for upper atmospheric measurements, discussing construction, flight, sensitivity and ionosphere current detection
19 p3309 A69-35995

OGO triaxial search coil magnetometer for measuring earth magnetic fluctuations, discussing design rationale and observation results
19 p3284 A69-36675

Radial velocities recording inaccuracies by solar magnetographs caused by dissimilarity between photomultipliers characteristics, describing photometer designs to eliminate errors
20 p3547 A69-38308

Magnetic field inhomogeneities effect on line contours and magnetographic measurements, constructing two stream models using Unno solution of transfer equations
22 p4019 A69-40288

Low noise nuclear precession magnetometer noise rejection optimization design specifications for measuring geomagnetic field components
23 p4165 A69-41868

MAGNETOMETRY
U MAGNETIC MEASUREMENT

MAGNETOPOUSE

Bow shock and magnetopause boundary observations with IMP 2 plasma detector
07 p1129 A69-19372

Magnetopause, magnetosheath, bow shock and adjoining interplanetary domain study by IMP-1 satellite, discussing macroscopic plasma variables and fluid model for solar wind
07 p1129 A69-19374

Boundary layer between cold plasma and vacuum magnetic field, considering transverse velocity component perpendicular to field
12 p2139 A69-26944

Charged particles influx from cusp shaped regions of stagnant plasma trapped in vicinity of two magnetic cusps on polar magnetopause
12 p2151 A69-26945

MAGNETOPLASMAS
U PLASMAS [PHYSICS]

MAGNETORESISTANCE
U MAGNETORESISTIVITY

MAGNETORESISTIVITY

Vacuum deposited n-type InAs films magnetoresistance coefficient dependences on length-to-width ratio, homogeneity moving carriers size and magnetic inductance
01 p0136 A69-10254

Magnetoconductance of nonequilibrium plasmas in indium antimonides, noting anisotropy effect of electric and magnetic field orientation
03 p0486 A69-13463

CdS Hall coefficient, Hall mobility and magnetoresistance coefficient dependence on electric field, magnetic field and scattering mechanisms
03 p0490 A69-13945

N-type GaAs single crystal magnetoresistivity, noting charge carrier scattering mechanisms
03 p0492 A69-14177

P-type GaSb crystals with various impurity concentrations noting conductivity, transverse magnetoresistance, Hall effect and acceptor band width and conductivity
04 p0643 A69-15259

Longitudinal and transverse magnetoresistance in n-type InSb single crystals in magnetic fields, noting preparation effect on existence magnetophonon oscillations
04 p0643 A69-15262

Magnetoresistance of tellurium single crystals with various current carrier concentration at liquid helium temperatures
06 p0978 A69-16986

Hall effect and magnetoresistance for compensated n-InP samples, discussing dependence on magnetic field
06 p0978 A69-16987

Magnetophonon oscillations of transverse magnetoresistance of n-type epitaxial GaAs in pulsed magnetic field
08 p1373 A69-20760

Vacuum deposited n-type InAs films magnetoresistance coefficient dependences on length-to-width ratio, homogeneity, moving carriers size and magnetic inductance
09 p1559 A69-22647

MAGNETOSONIC RESONANCE

Hall effect theory and devices, noting application to measurement of several physical quantities and sources of errors in devices
09 p1541 A69-22698

Longitudinal magnetoresistance oscillations in n-type GaSb single crystals associated with electron concentrations minima
13 p2319 A69-27900

N-type InSb single crystals with high dislocation density, investigating anisotropy of mobility, Hall effect and transverse and longitudinal magnetoresistance
14 p2503 A69-28734

Shubnikov-de Haas effect and quantum limit phenomena concerning oscillatory magnetoresistance in semiconductors
16 p2827 A69-31826

Anomalous phenomenon in resistance and magnetoresistance of cleaved InAs surface, plotting temperature and magnetic field variation effects, proposing explanation of anomaly
19 p3388 A69-36543

Nernst effect in pyrolytic graphite at low temperatures including thermal EMF, electrical conductivity, thermal conductivity and magnetoresistance coefficients
21 p3753 A69-39562

MAGNETOSONIC RESONANCE

Bounce resonant scattering of auroral zone electrons, noting contribution to microbursts and mirror point diffusion
05 p0754 A69-16260

Electromagnetic wave scattering in ferromagnetic crystals with anisotropy, discussing correlation functions of characteristics fluctuations and magnetoacoustic resonance
05 p0809 A69-16547

Magnetosonic waves absorption in plasmas, studying collisions leading to HF energy resonant absorption at lower hybrid frequency
06 p0963 A69-16904

MHD generator plasma anisotropic instability caused by amplified magnetosonic waves propagating normal to current
11 p1922 A69-24227

MAGNETOSPHERE

NT GEOMAGNETIC TAIL NT MAGNETOPAUSE

Artificial visible plasma clouds in space interacting with electric and magnetic fields around earth
01 p0151 A69-10533

Magnetic storm principal phase explained by interaction between quasi-trapped particles stream and magnetosphere
01 p0144 A69-10573

Hydromagnetic wave propagation in current carrying regions of ionosphere and magnetosphere using macroscopic equations, deriving dispersion relation
01 p0067 A69-10972

Solar, interplanetary and magnetospheric electromagnetic events before and during magnetic storm from ground observatory and earth satellite data
01 p0156 A69-11120

Magnetic field behavior at synchronous orbit during magnetospheric substorms, interpreting satellite observed data in terms of partial ring currents
01 p0075 A69-11225

Magnetospheric plasma distribution determination based on analysis of structured elements in micropulsations
01 p0076 A69-11229

Amplification process for VLF whistler mode radio signals observed in study of magnetosphere frequency shifting mechanism
01 p0077 A69-11241

Partial differential equation for distribution function in transport of charged particles in earth magnetosphere
01 p0147 A69-11320

Magnetoionic propagation of signals in magnetosphere using Maxwell equations and tensor quantities, linking to Hall, transverse and longitudinal conductivities [ONERA-TP-593]
02 p0236 A69-11617

Magnetosphere boundary determined in two dipole model approximation, taking into account current layer in tail
02 p0236 A69-11655

Whistler dynamic spectra variation studies, emphasizing distorted magnetospheric geomagnetic field structure effect
02 p0238 A69-11671

Soviet book on dynamics of radiation belts of earth covering theories concerning magnetosphere, magnetic fields and plasma and electromagnetic pulsations
02 p0307 A69-11799

Magnetosphere studies in France noting magnetosphere characteristics, wave propagation, charged particles, particle precipitation mechanisms in auroral zones and polar caps
02 p0242 A69-11904

Subsolar magnetosphere dimensions from ground observations of geomagnetic micropulsation period changes during magnetosphere deformations caused by solar wind inhomogeneities
02 p0244 A69-12356

Geomagnetic micropulsations mechanism, discussing hydromagnetic waves transmission generated by interface instability between solar wind and magnetosphere, noting transmission path role
02 p0244 A69-12395

Spatial variations in particle intensity near and inside magnetosphere during September 1966 solar cosmic ray events, noting magnetosphere screening effectiveness
02 p0309 A69-12740

Aurora displays distribution over earth, analyzing magnetosphere dependence on astronomical orientation of geomagnetic field in relation to solar wind
02 p0247 A69-12772

Magnetic storm of January 1967 due to 3B solar flare noting spacecraft observations, intensity, magnetospheric distortions and solar wind dynamics
03 p0500 A69-13430

Elektron 2 satellite magnetic measurement of high latitude nocturnal magnetosphere, discussing variations, antisolar effect and elongation of magnetic field
03 p0422 A69-13505

Polar auroral region cosmic radio noise absorption bays diurnal variations attributed to drift of electrons captured in magnetosphere
03 p0423 A69-13520

Cone instability role in auroral electron and proton dynamics, discussing plasma instability control of maximum captured particle densities in various magnetosphere regions
03 p0501 A69-13526

High latitude electrons boundary dependent on geomagnetic axis orientation, noting role of coupling between solar wind and magnetosphere
03 p0502 A69-14003

Two dimensional magnetosphere with tail and neutral sheet, using Chapman-Ferraro approximation by mapping in potential plane
03 p0425 A69-14011

Outer magnetosphere average magnetic field configuration between 5 and 18 earth radii, noting various maps in equatorial plane
03 p0425 A69-14012

Energetic electron fluxes measured at 2000 km over auroral and polar regions and at 17 earth radii in magnetotail plasma sheet
03 p0503 A69-14013

Low energy electrons on day side of magnetosphere observed with MIT electron detector onOGO 3 satellite
03 p0503 A69-14027

Sudden acceleration of electrons in magnetosphere and magnetic tail related to magnetic bays, noting acceleration occurrence first in magnetosphere during polar substorm
04 p0594 A69-15122

Small scale filament structure of current systems in earth magnetosphere, noting coherence of magnetic disturbances in conjugate regions
05 p0753 A69-16049

Equatorial semiaxis of magnetospheric tail at distances between 10 and 80 earth radii for various intensities of polar magnetic disturbances
05 p0753 A69-16050

Pc 1 micropulsation and magnetospheric amplification of hydromagnetic waves
05 p0754 A69-16263

Cross field energy transfer in collisionless plasma across earth magnetospheric boundary, using computer and one dimensional sheet model simulation [ISAS-429]
06 p0916 A69-17023

Plasma physics in space research, discussing solar wind, planetary atmosphere bow shock and convective motions of magnetosphere plasma [ISAS-431]
06 p1000 A69-17026

Packet of finite amplitude VLF whistler waves, examining cyclotron resonance interaction with high energy electrons and development in magnetosphere
06 p0917 A69-17378

Seasonal variations in auroral absorption zone position interpreted as consequence of asymmetric shape of magnetosphere
06 p0920 A69-17728

Induced and combination scattering of high HF radio waves in ionosphere and magnetosphere
07 p1076 A69-18521

Magnetospheric ELF noise, discussingOGO 3 spectrum analysis
07 p1124 A69-18834

Transverse LF oscillations in geomagnetic field observed during January 1967, noting possibility of being second harmonic of magnetospheric standing Alfvén waves
07 p1124 A69-18835

Magnetosphere - Conference, Boston College, June 1967
07 p1207 A69-19351

Magnetosphere dynamical properties, discussing atmosphere, ionosphere, magnetopause, magnetosheath, bow shock, solar wind, collisionless plasmas, etc
07 p1127 A69-19352

Solar wind and magnetosphere, discussing hydrodynamic expansion of solar corona
07 p1207 A69-19353

Charged particle motion in electromagnetic field from basic equation of motion for magnetosphere, discussing dipolar magnetic field, Stormer trapped particle theory, etc
07 p1208 A69-19355

Hydromagnetic wave propagation and generation in magnetosphere, discussing hydromagnetic waves in uniform and axisymmetric magnetic fields
07 p1208 A69-19356

Geomagnetic field line stretching outward due to energy entry in form of large number of charged particles or increase in particle temperature /inflation/
07 p1127 A69-19357

Low energy charged particles in earth magnetosphere observed byOGO satellite
07 p1208 A69-19358

Solar wind flow past earth and magnetosphere correspondence to external aerodynamics of round nosed bodies in supersonic stream
07 p1128 A69-19360

Solar wind, bow shock and magnetosheath observations by charged particle analyzers on Vela satellites
07 p1208 A69-19361

Particle measurements by Vela nuclear test detection satellites /2A and 2B/ noting plasma sheet in center of magnetotail
07 p1208 A69-19362

Structure, temporal behavior, shape and length of earth magnetic tail via satellite mapping
07 p1208 A69-19363

Magnetospheric plasma probe results with Pioneer 6 and 7, discussing plasma fluctuations and solar wind interaction with geomagnetic field
07 p1128 A69-19364

Geomagnetic tail topology, reconnection and interaction with moon from Explorer 33 satellite data
07 p1128 A69-19365

Low energy electrons in magnetosphere fromOGO-1 andOGO-3 observations, discussing plasma sheet, magnetic bay activity, electron pressure, temperature and density gradient
07 p1209 A69-19373

Magnetospheric magnetic field ring current asymmetry during different phases of geomagnetic storm observed by Explorer 26 and Vela 2 satellites
07 p1129 A69-19611

VLF wave electromagnetic properties in magnetosphere, noting whistler mode propagation and refractive index and electron density of medium
08 p1306 A69-20180

Synchrotron radiation from relativistic electrons in magnetosphere, calculating variation with frequency and height of lines of force
08 p1306 A69-20182

Bimodal diffusion mechanism for acceleration of trapped particles in earth magnetosphere, noting particle intensity profiles and energy spectra
08 p1307 A69-20183

Magnetospheric gusts of streaming positive ions in equatorial plane detected by ATS 1 synchronous satellite
09 p1574 A69-21309

Charged particles equations of motion in earth magnetosphere in polar storms, considering auroral zone, diurnal variations and electron and proton velocities
09 p1485 A69-21535

Modified first order theory of magnetosphere boundary shape incorporating effects of neutral sheet currents of extended geomagnetic tail
09 p1488 A69-21661

Solar protons in magnetospheric tail after flare of July 7, 1966 with isotropic pitch angle distribution, expressing energy spectrum as exponential in rigidity
09 p1576 A69-21699

DC electrical resistance of magnetosphere between two satellites with sheaths and current voltage relation of satellite sheath
09 p1489 A69-21710

Solar wind-magnetosphere pressure balance and proton density of solar wind
09 p1577 A69-21711

Reflected particle acceleration at magnetospheric bow shock front attributed to interplanetary electric field
09 p1577 A69-21714

Interplanetary plasma flow simulation around earth magnetosphere and planets not considering initial conditions influence
09 p1577 A69-21768

Satellite data on galactic cosmic ray variations near magnetosphere and in interplanetary space, discussing Forbush decreases
10 p1756 A69-22819

Earth thermal plasmasphere contraction subsequent to solar flare obtained from ion mass spectrometers on OGO satellites
10 p1683 A69-23777

Low energy particles during solar proton flare and effects on magnetosphere, cosmic ray intensity, ionosphere and geomagnetic activity
10 p1768 A69-23786

Dynamo action produced magnetospheric currents in ionosphere computable without knowing real horizontal ionospheric current system
10 p1685 A69-23836

Mariner 2 measurements of geomagnetic field and interplanetary plasma parameters for analyzing interaction between interplanetary medium and magnetosphere during decreased solar activity
10 p1769 A69-23900

Dipole magnetosphere model with cylindrical or spherical forbidden band for studying plasma motion in quasi-hydrodynamic approximation
10 p1769 A69-23901

Magnetosphere boundary configuration calculated with allowance for geomagnetic dipole inclination to geographic axis and nondipole section of geomagnetic field
10 p1686 A69-23902

Magnetic lines of force penetration into magnetosphere accompanied by plasma insertion generating ring current responsible for main phase of magnetic storm
10 p1687 A69-23923

Plasma concentration diagnostics in magnetosphere based on hydromagnetic whistlers/pearls/dispersion
10 p1688 A69-23934

Auroral oval and ring current in magnetosphere, analyzing boundaries of lines of force on night side of earth
10 p1689 A69-24203

Plasma distribution and Alfvén wave velocity field in magnetosphere, discussing distortion of dipole magnetic field, ring current and wave propagation
10 p1742 A69-24205

Stable particle trapping zone in magnetosphere, discussing results of adiabatic theory application to charged particle motion in earth magnetic field
11 p1948 A69-24858

Anisotropic fluxes of energetic particles in and near distant trapping region encountered by Explorer 33 satellite in outer magnetosphere
11 p1950 A69-25146

Magnetospheric plasma heating by magnetosheath generated electromagnetic waves
11 p1950 A69-25149

Plasmapause position measurements by ion mass spectrometers and broadband VLF receivers on OGO 1 and OGO 3 and by broadband recordings at Antarctica
11 p1878 A69-25153

Artificial triggering of VLF magnetospheric noise by NAA Morse code transmission during whistler duct drift across magnetic shells on 17 June 1965
11 p1878 A69-25154

Artificial magnetospheric VLF noise triggering by Morse code dots at 14.7 kHz from NAA verified at Antarctica
11 p1878 A69-25155

Transmitter frequency increase effect on production of artificial stimulated VLF emissions in magnetosphere
11 p1878 A69-25156

Light ion abundance measurements of OGO satellites and field aligned diffusive equilibrium theory with temperature and concentration latitudinal variations
11 p1879 A69-25157

Potential mechanisms of electron acceleration inside magnetosphere, measuring power spectrum of X rays by electron braking in upper atmosphere
12 p2066 A69-26295

Auroral arcs drift as function of polar storm initial phase, noting agreement with satellite data on plasma motion in magnetosphere
12 p2071 A69-26694

Physics of magnetosphere - Conference, Washington, D.C., September 1968
12 p2071 A69-26734

Solar wind interaction with geomagnetic field, considering bow shock, field confinement in magnetosphere and stretching out of lines of force
12 p2072 A69-26735

Solar plasma flow around magnetosphere, discussing plasma velocity, density and temperature and magnetic field space and time variations
12 p2150 A69-26736

Laboratory models for solar wind and magnetosphere interactions with similarity laws of Vlasov theory as reference system
12 p2150 A69-26737

Quantitative magnetic field models of magnetosphere for analyzing field configuration variations and adiabatic particle motion
12 p2072 A69-26738

Satellite observations of geomagnetic tail in magnetosphere near midnight meridian plane, discussing formation, shape, plasma sheet and models
12 p2072 A69-26739

Auroras and polar magnetic substorm observations limited comparison due to magnetospheric models inability to interpret daytime precipitation zones and particle energy spectra
12 p2072 A69-26740

Dynamics of magnetosphere, discussing auroral oval position, ring currents, plasma density and magnetic field variations in near polar region
12 p2072 A69-26741

Earth radiation belts formation as function of particle injection into trapped radiation zones or proton and electron leakage
12 p2150 A69-26742

Charged particle population dynamics in outer radiation zone of magnetosphere, discussing ring current particles, protons, electrons, alpha particles and electric field
12 p2150 A69-26743

Particle fluxes in outer radiation belt and unstable radiation zone of outer geomagnetic field, discussing electron diffusion into magnetosphere and magnetic disturbances
12 p2150 A69-26744

LF wave propagation and emission in magnetosphere, discussing steady noise and discrete emissions
12 p2072 A69-26745

Low energy plasma fluxes in magnetosphere, discussing plasmapause position dependence on geomagnetic activity
12 p2150 A69-26747

Magnetospheric plasma instabilities, discussing pitch angle diffusion instabilities, auroral precipitation boundary location, radial diffusion and maximum dissipation limit
12 p2072 A69-26748

Solar wind induced magnetospheric convection for interpretation of geomagnetic storms, aurora and trapped particle belts, noting electric fields
12 p2073 A69-26749

Solar wind plasma observations in geomagnetospheric wake compared at 1000 and 500 earth radii, considering ion energy spectra and geomagnetic tail
12 p2151 A69-26943

Energy exchange between LF waves and magnetospheric energetic particle population by bounce resonant interaction
12 p2073 A69-26946

Magnetosphere model for plasma pressure by solar wind, discussing plasma drift from neutral sheet into geomagnetic tail
12 p2076 A69-27106

Magnetospheric field configuration in midnight meridian, considering cavity boundary surface and trapping region currents and tail sheet current
13 p2252 A69-27532

Io as unipolar inductor, analyzing interaction with Jupiter magnetosphere and decimetric synchrotron radiation
13 p2337 A69-27552

Magnetospheric ring current model from ground stations data to interpret observed magnetic field disturbances
13 p2253 A69-27699

VLF morning and evening magnetosphere emission distinction by studying spectrum width as function of variations in K index
13 p2253 A69-27740

Geomagnetic pulsations and hydromagnetic wave propagation in magnetosphere, using geometric optics approximation
13 p2254 A69-28176

Magnetospheric corpuscular fluxes night ionization role in E and D region, considering precipitation from outside, trapped and dumped particles of radiation belts
13 p2254 A69-28333

Diurnal hemisphere auroras assuming origins in magnetosphere tail with pressure responsible for tail formation, discussing tentative model and implications
13 p2256 A69-28654

Magnetosphere boundary determined in two dipole model approximation, taking into account current layer in tail
13 p2256 A69-28686

Whistler dynamic spectra variation studies, emphasizing distorted magnetospheric geomagnetic field structure effect
13 p2257 A69-28702

Time dependent convection electric fields as agents for diffusing trapped magnetospheric radiation inward toward earth, discussing one dimensional diffusion equation
14 p2510 A69-28936

Low energy charged particle motion parallel with magnetic force lines analyzed in magnetosphere model with constant electric field
14 p2512 A69-29040

Pc 2-4 geomagnetic pulsations abrupt disappearance on global scale ascribed to magnetosphere boundary stabilization, noting interplanetary magnetic field role
14 p2438 A69-29080

Geomagnetic cut-off influence on charged particle dynamics in geomagnetic field, applying charged particle motion theories to magnetosphere fields
14 p2513 A69-29099

Magnetic field intensity, plasma pressure and energy density relations for macroscopic plasma motion inside neutral sheet from two dimensional model
14 p2440 A69-29119

Magnetic field variations in magnetosphere and interplanetary space correlated with polar magnetic disturbances from dynamic morphology data
14 p2441 A69-29387

Auroral substorms concept extended to include associated effects at all local times throughout magnetosphere, considering particle precipitation influence on substorms in midnight sector
15 p2593 A69-30008

Fermi acceleration of energetic electrons trapped within dipole magnetic field analyzed to obtain quantitative results for wave-particle interaction within complex magnetospheric configuration
15 p2594 A69-30095

Drift wave instability due to particle number density gradient of plasmapause, considering velocity shear modification
15 p2595 A69-30096

Magnetic storm principal phase explained by interaction between quasi-trapped particles stream and magnetosphere
15 p2675 A69-30743

Neutral point theory applied to solar wind and magnetospheric physics, discussing magnetic field reconstructions
16 p2846 A69-31596

Plasma flow pattern in twilight regions of earth magnetosheath from positive ion observations of twin Vela 3 satellites
16 p2773 A69-31961

Solar energetic proton penetration into magnetotail from proton data collected by Vela 4 energetic particle telescopes, comparing proton fluxes inside and outside magnetotail
16 p2847 A69-31966

Auroral absorption occurrence patterns mappable onto magnetotail developed as function of magnetic activity, discussing magnetotail neutral sheet source width changes
16 p2848 A69-31968

Micropulsation records for full moon effect on hydromagnetic emission activity of magnetosphere, noting W and Kp indices
16 p2774 A69-31979

Banded chorus, VLF discrete emissions in magnetosphere in single variable frequency band with frequency depending on equatorial electron gyrofrequency
16 p2774 A69-31981

Low energy solar protons entry into magnetosphere on 26 May 1967 showing diffusion control
16 p2849 A69-31984

Noise signals in earth magnetosheath interpreted as electromagnetic waves propagating in whistler mode
16 p2774 A69-31985

Charged particles equations of motion in earth magnetosphere in polar storms, considering auroral zone diurnal variations and electron and proton velocities
16 p2783 A69-32530

Trapped protons acceleration through bimodal diffusion in magnetosphere, noting spatial patterns and temporal behavior of proton and electron belts
16 p2851 A69-32618

Polar substorms resulting from interaction between magnetized plasma stream and geomagnetic field in magnetosphere
16 p2852 A69-32620

Heliosphere boundary location significance for Jovian magnetosphere configuration, considering inverse correlation between sunspot number and Jovian decametric radio emission
17 p3033 A69-33379

VLF and ULF whistler propagation in magnetosphere for remote sensing magnetospheric plasma parameters, exhibiting characteristic patterns and interaction with plasma
17 p2962 A69-33712

Physical model for IGY radio aurora data correlated with Brice magnetospheric convection model
18 p3125 A69-34231

Dawn-dusk electric field in outer radiation zone associated with magnetospheric plasma convection, comparing electron densities for magnetically quiet periods
18 p3128 A69-34942

Hydromagnetic whistlers propagation mechanism in magnetosphere determined by wave theory, assuming Gaussian radial density distribution and estimating duct width necessary for trapping
18 p3102 A69-34966

Relationship between micropulsation periods and size of magnetosphere expressed in power law form and interpreted with wave propagation
18 p3131 A69-35193

Plasma density in magnetosphere by measuring geomagnetic pi 2 micropulsations in direction related to polar aurora oval southern boundary, determining period of pi 2 oscillations
19 p3303 A69-36205

Geomagnetic field micropulsation observations by U.S.S.R. and possible applications to diagnostics of magnetosphere
19 p3304 A69-36642

Plasma flow structure near frontal point in earth magnetosphere, using quasi-hydrodynamic two dimensional model to obtain power series solution
20 p3594 A69-37019

Earth ionosphere and magnetosphere electrodynamic state analyzed as function of neutral gas small scale motions, considering magnetic disturbances and ionospheric discontinuities
20 p3519 A69-37026

Plasma concentration in nondipole magnetosphere model from pc 5 pulsations periods for high geomagnetic latitudes, noting solar winds effect
20 p3521 A69-37043

Small scale filament structure of current systems in earth magnetosphere, noting coherence of magnetic disturbances in conjugate regions
20 p3532 A69-37958

Equatorial semiaxis of magnetospheric tail at distances between 10 and 80 earth radii for various intensities of polar magnetic disturbances
20 p3532 A69-37959

Radial diffusion coefficient calculation in presence of magnetic shell splitting in magnetosphere
20 p3534 A69-38094

Venus magnetosphere induced by piling up magnetic field from solar wind due to ionospheric conductivity and collisions with planetary atmospheric particles
21 p3794 A69-38381

Magnetospheric electromagnetic phenomena explained by equations of motion for particle acceleration, forbidden regions and MHD processes
21 p3707 A69-38485

Auroral zone geomagnetic pulsations on nightside and dayside of earth related to magnetospheric substorm and particle precipitation
21 p3708 A69-38497

High latitude magnetospheric convection patterns determined from ionospheric current distribution using magnetic disturbance plots
21 p3709 A69-38503

Dungey reconnection model of magnetosphere with daytime current sheet and pseudotrapping region compared with dayside observations of precipitation regions
21 p3711 A69-38511

Jupiter magnetospheric radio emissions, discussing magnetic field and plasma-magnetic interactions
21 p3812 A69-39517

Auroral zone Birkeland currents in magnetosphere, analyzing particle trajectories for plasma sheet energy distribution and Alfvén layer position
21 p3792 A69-39567

Drift shell splitting in nondipolar distorted magnetosphere tested with data from electron spectrometer on ATS 1 and OGO 3 satellites
22 p4005 A69-40508

Cosmic ray proton cut-off increase at high latitudes during magnetospheric substorms, using balloon time observations of nuclear gamma ray flux
22 p4005 A69-40509

Daily variation of trajectory derived high latitude vertical cut-off rigidities in magnetospheric model consistent with proton and electron experiments
22 p4005 A69-40513

Horizontal and vertical magnetospheric electric fields measured by balloon, determining average field strength for quiet and active periods
22 p3939 A69-40514

Disagreement between Mariner 2 and IMP 1 data concerning interrelation between solar wind velocity and geomagnetism ascribed to instrumental errors and changes in magnetospheric properties
23 p4205 A69-41848

Magnetospheric stable charged particle beams for pearl pulsations and discrete VLF radiation in geomagnetic field, attributing synchronization to space charge
23 p4206 A69-41851

Magnetospheric natural toroidal oscillation periods solved by expression from perturbation method given by Landau and Lifshits where WKB method inapplicable
23 p4157 A69-41863

Interplanetary magnetic field role in interaction between terrestrial magnetosphere, solar plasma and solar flux energy transfer
23 p4214 A69-41865

Concurrent geomagnetic micropulsations at equatorial and high latitude stations, discussing magnetospheric sources of Pi and Pc types
23 p4161 A69-42439

Polar cap ionospheric response to solar cosmic ray events observed by Mariners 2 and 4 solar proton measurements used to test magnetosphere models
24 p4373 A69-43621

MAGNETOSPHERIC ELECTRON DENSITY

Atmospheric whistlers trajectories in magnetosphere calculated, assuming electron concentration as exponential function of altitude
08 p1309 A69-20429

Plasmapause, plasma sheet and energetic trapped electrons in earth magnetosphere, considering slot, peak intensity and trapping boundary
12 p2151 A69-26953

Van Allen radiation belts proton and electron components recorded by Soviet lunar probes and Cosmos and Elektron satellites
13 p2326 A69-27350

Diffusion of equatorial particles in outer radiation zone caused by expansions and contractions of permanently compressed magnetosphere, obtaining electric fields
14 p2510 A69-28937

Magnetospheric equatorial electron density profile estimated from midlatitude whistler observations, determining paths from dispersion data
15 p2677 A69-31357

Diurnal, seasonal and spatial variations in height and occurrence frequency of low electron density region below 3000 km
20 p3532 A69-37959

Electron intensities and substorm drift effects in outer radiation belt using two satellite technique
24 p4309 A69-43172

Magnetospheric electron sudden intensity increases correlated with magnetic substorms occurrence at midnight meridian from ATS 1 observation
24 p4367 A69-43173

Nighttime protonosphere thermal balance from Alouette 2 electrostatic probe measurements of electron temperature and concentration in magnetosphere
24 p4310 A69-43181

MAGNETOSPHERIC INSTABILITY

Plasma waves and particle interaction in nonuniform magnetic waves, considering propagation across sheets of steep density gradient and auroral precipitation
02 p0235 A69-11429

Perturbed geomagnetic field structure during magnetic storm recovery phase calculated by magnetosphere magnetic field model, accounting for various external field sources
02 p0237 A69-11666

Dispersion measurements and spectrum variations analysis to study pearl micropulsations frequency variation during sudden deformation of magnetosphere by magnetic storms
02 p0240 A69-11697

Geomagnetic field topology of nighttime magnetosphere, showing pi 2 pulsations excitation mechanism in terms of Alfvén waves resonance in external cavity
03 p0423 A69-13524

Drift periodic echoes in outer zone electron flux due to magnetospheric disturbance
05 p0815 A69-16259

Book on polar and magnetospheric substorms including daily variation data, satellite observations, etc.
06 p0915 A69-16832

Magnetospheric and high latitude ionospheric disturbances, bulk motion/convective/flow pattern and electric field distribution
07 p1128 A69-19370

VLF emissions intensity and spectra variations compared with energetic electron fluxes variations during magnetosphere storm periods
09 p1488 A69-21698

Real configuration effect of magnetic field in moderately perturbed magnetosphere on whistlers dynamic spectra, stressing geomagnetic perturbation detection
09 p1490 A69-21766

VLF polar chorus emission and geomagnetic variations caused by compressions or expansions of magnetosphere
10 p1681 A69-22803

Magnetospheric perturbations as aftermath of proton flare discovered by whistlers, noting plasmapause movement toward earth
10 p1683 A69-23776

Magnetospheric substorm as discharge process of associated electric current system, discussing relaxation processes, explosive release of energy, etc.
11 p1879 A69-25249

Perturbed geomagnetic field structure during magnetic storm recovery phase calculated by magnetosphere magnetic field model, accounting for various external field sources
13 p2257 A69-28697

Dispersion measurements and spectrum variations analysis to study pearl micropulsations frequency variation during sudden deformation of magnetosphere by magnetic storms
13 p2258 A69-28728

Magnetospheric plasma motion associated with Alfvén mode time fluctuations of magnetic field in solar wind
14 p2521 A69-29382

Severe magnetosphere distortions in north-south direction with parallel/antiparallel magnetosheath to magnetospheric field ascribed to solar wind property changes from Explorer 12 observations
18 p3128 A69-34947

Magnetospheric disturbances effect on radio wave propagation, discussing wave-particle interactions, VLF emissions and electrostatic waves
19 p3303 A69-36429

Transverse wave propagation and instabilities within magnetosphere, noting loss cone limited velocity-space distribution function
20 p3533 A69-38081

Polar upper atmospheric phenomena interpreted as magnetospheric substorm manifestations, discussing role of asymmetric ring current formation
21 p3710 A69-38504

Long time scale magnetodynamic noise in geomagnetic tail, discussing hourly ranges of fluctuations measured by IMP 1 satellite and planetary K index correlation
22 p3935 A69-39967

Magnetospheric instabilities and whistler mode turbulence relationship to loss of high energy electrons from Van Allen belts
24 p4306 A69-42692

MAGNETOSPHERIC PROTON DENSITY

Solar protons in magnetospheric tail after flare of July 7, 1966 with isotropic pitch angle distribution, expressing energy spectrum as exponential in rigidity
09 p1576 A69-21699

Pitch angle distribution function of thermal protons in magnetosphere taking into account earth gravitational field
12 p2067 A69-26354

Van Allen radiation belts proton and electron components recorded by Soviet lunar probes and Cosmos and Elektron satellites
13 p2326 A69-27350

MAGNETOSTATIC FIELDS

Electromagnetic fields and magnetic and dielectric constants in fiberglass reinforced polymers determined by treating polymers as ideal dielectrics

08 p1336 A69-20336

Unstable transverse potential oscillations in plasma with beam anisotropy and initial density modulation and analogy with known electrostatic oscillations

10 p1727 A69-23092

Cerenkov radiation from point charge uniformly moving along external magnetostatic field in warm anisotropic plasma, noting excitation modes and propagation frequencies

13 p2307 A69-27964

Plane TM surface waves supported by plane ungrounded magnetoplasma slab with magnetostatic field parallel to two parallel interfaces and perpendicular to propagation direction

13 p2308 A69-27966

Residual field in inner airspace of magnetostatic shielding thin walled stretched ellipsoids of revolution

13 p2237 A69-28610

Magnetic mirrors, Doppler and relativistic effects, wave attenuation and radiation pressure during gyroresonant particle acceleration in nonuniform magnetostatic and HF fields

14 p2499 A69-29845

Transverse wave-beam interaction propagation in fast wave structure in finite homogeneous magnetostatic field, deriving wave-beam equation for non-relativistic beams

21 p3672 A69-38435

Axisymmetric solutions of magnetohydrostatic equations for large conductivity media satisfying second order partial differential equation containing two arbitrary functions

21 p3778 A69-39498

MAGNETOSTATICS

Nonlinear DC magnetic fields for nonhomogeneous isotropic current free regions in presence of ferromagnetic materials, discussing analytic solutions of boundary value problems

11 p1888 A69-25311

YIG single crystal disk instability, noting dispersion of magnetostatic and plane spin waves from supplementary absorption and LF oscillations recording

21 p3783 A69-39561

MAGNETOSTRICTION

Pressure and magnetostriction effects on magnetization curves of type 2 superconducting In-Tl alloy, noting Ginzburg-Landau parameter stress dependence

02 p0294 A69-11776

Noncontacting torqueimeters using magnetoelastic properties of steel shafts, discussing gas turbine and industrial applications

[ASME PAPER 69-GT-64] 09 p1500 A69-22480

Flow instability of incompressible nonconducting fluid in thin cylindrical conducting elastic pipe in constant uniform magnetic field

10 p1798 A69-23094

Polycrystalline Fe-Ni, Fe-Ni-Co ferrites structure, magnetostriction, magnetization curves and hysteresis prior and after thermomagnetic treatment

13 p2319 A69-27992

Magnetothermoelasticity equations, uniqueness and reciprocity theorems and solutions emphasizing moving media

15 p2715 A69-31215

Choke coil magnetoelastic sensors thermal stability found decreasing proportionally to measurement range decrease /below 100 newtons/

23 p4166 A69-41995

MAGNETOTELLURIC PROFILING

U GEOMAGNETISM

U MAGNETIC SURVEYS

MAGNETOVARIOMETERS

U VARIOMETERS

MAGNETRONS

Magnetron ionization gauge in helium for low pressure measurement, discussing striking characteristics and time lags

01 p0012 A69-10606

Voltage tunable magnetron used in conjunction with ferrite circulator as phase locked amplifier

01 p0045 A69-10632

Permanent magnets used in conjunction with magnetrons, crossed-field amplifiers, klystrons, traveling wave tubes and microwave ferrite devices

[IEEE PAPER 2.3] 01 p0045 A69-10713

Linear analysis of operation of multistage magnetron amplifiers using injected electron flux and stepwise varying dimensions of interaction space

03 p0407 A69-13977

Output power, efficiency and gain of two stage magnetron-type cascade amplifier

03 p0407 A69-13978

Back bombardment of magnetron cathode as single surface multipactor, noting effects of cathode grooves and output loading

07 p1101 A69-18656

X band internal cavity voltage tunable magnetron operating in theta mode, solving output loading, interaction limitations and cavity dimensions

07 p1102 A69-18670

High power voltage tunable magnetron, discussing operating characteristics, life and applications

13 p2232 A69-28056

Frequency distribution and statistical characteristics of high level RF noise produced by high permeance electron beam of magnetron injection gun/MIG/

14 p2449 A69-29558

Bent beam ionization gage linearity from calibrated nude Modulated Bayard-Alpert /MBA/ gage, discussing buried collector and tabulated magnetron gages

22 p3950 A69-41216

MAGNETS

NT CRYOGENIC MAGNETS

NT ELECTROMAGNETS

NT HIGH FIELD MAGNETS

NT SUPERCONDUCTING MAGNETS

Permanent magnets used in conjunction with magnetrons, crossed-field amplifiers, klystrons, traveling wave tubes and microwave ferrite devices

[IEEE PAPER 2.3] 01 p0045 A69-10713

Permanent magnets optimal design and properties for attitude control of German research satellite Azur, considering environmental influences

16 p2868 A69-31936

Electromagnetic vibration exciters based on permanent magnet and AC coil interaction

16 p2790 A69-32077

MAGNITUDE

Radio galaxies radio luminosity function expressed by means of power dependence, assuming three absolute visual magnitudes for each galaxy

02 p0325 A69-12563

Magnitude data for Saturn satellites compiled and analyzed, noting discrepancy for Iapetus

08 p1394 A69-20619

Cepheid variable stars light curves analyzed to determine radii and absolute magnitudes

10 p1775 A69-23200

Improved extraatmospheric wideband sensor nominal S-4 magnitudes of bright stars observed with narrowband UVBRI filter-sensor combinations

11 p1960 A69-24853

Quasi-stellar objects anomalous Hubble plot, suggesting explanation for steeper plot under assumption on red shift vs apparent magnitude relation

15 p2701 A69-31536

MAGNONS

Magnon density of states of ferromagnetic gadolinium trichloride in magnetic field, using high resolution optical spectroscopy

03 p0494 A69-14257

Anisotropic Heisenberg antiferromagnetism in spin wave approximation, calculating thermodynamic quantities in terms of elliptic integrals

12 p2144 A69-26500

Electron magnon interaction in ferromagnetic and antiferromagnetic semiconductors, showing conduction band and electron effective mass and magnetic moment dependences on temperature and spin direction

14 p2504 A69-28991

Theory of temperature dependent magnon energies in antiferromagnets based on spin wave operator expansion of Hamiltonian, taking into account dynamical interaction between waves

15 p2668 A69-30684

Time dependent Green function method for pre-mature saturation due to parametric amplification of nonuniform spin wave modes by one and two magnon processes

15 p2668 A69-30685

Parametric excitation of spin waves during parallel pumping of rubidium nickel fluoride ferrite, relating relaxation time and temperature

21 p3781 A69-39069

YIG single crystal disk instability, noting dispersion of magnetostatic and plane spin waves from supplementary absorption and LF oscillations recording

21 p3783 A69-39561

MAGNUS EFFECT

Normal and negative Magnus force experienced by rotating cylinder in air flow, discussing wind tunnel tests, laminar and turbulent boundary layers separation, pressure distribution, etc

17 p2958 A69-34213

Stability conditions determination for spinning projectile based on ballistic equations, discussing role of Magnus effect

21 p3772 A69-39294

MAIN SEQUENCE STARS

Stellar evolution, discussing stellar structure, pre- and post-main sequence evolution, solar system origin, supernovae, white dwarfs, variable stars and close binaries

01 p0148 A69-10046

Late type stars, discussing main sequence for Population I and Population 2 stars and ages and chemical composition of old galactic clusters and globular clusters

01 p0158 A69-11325

Revision of RCU photometry fundamental data, noting main sequence curve position of O-B5 and distinction between zero age main sequence and class V

03 p0514 A69-13963

Empirical relation between /B-V/ color and radiation temperature by observing eclipsing variables undergoing total eclipses

03 p0469 A69-13964

Mass exchange and evolution of close binaries /Main Sequence stars/

04 p0653 A69-14614

Spectrum of accelerated particles on surface of stars revealed by observation of photospheric lithium and beryllium

05 p0817 A69-16711

Homogeneous main sequence star models with convective cores, considering core chemical composition, size and energy generation ratio mechanism

05 p0829 A69-16777

Stellar element abundance ratios determination using relative strengths of molecular lines or bands

06 p1003 A69-17320

Dynamical stability in premain sequence stars, discussing adiabatic models for pure hydrogen composition and collapse initiation by low opacity

07 p1220 A69-19388

Rapid differential rotation effect on massive main sequence O and B stars, discussing bolometric magnitude deficiencies and shifted position in Hertzsprung-Russell diagram

07 p1220 A69-19390

Curve-of-growth abundance analysis for main sequence lambda Bootis stars, suggesting type Ap star characteristics

08 p1385 A69-20062

Convection inhibition effects on premain sequence evolution of solar mass star, discussing largely radiative models

08 p1386 A69-20088

Binary stars systems with same total mass calculated for evolution from main sequence stage through mass exchange to white dwarfs

08 p1393 A69-20569

Atmospheric models for metal deficient stars of K and G spectral type, studying reduced metal abundance effect on atmospheric structure

09 p1596 A69-22055

Distance of bright stars in Cepheus OB2 region by MK spectral classification and UVB photometry, noting early main sequence and supergiant stars

09 p1599 A69-22194

Stellar models for Population II lower main sequence stars, discussing uncertainties in radii and bolometric magnitude

09 p1601 A69-22214

Absolute dimensions of 34 eclipsing variables having both components near main sequence, comparing mass luminosity and mass spectrum to homogeneous model stars

11 p1952 A69-24248

Physical structure of convective envelopes of population II main sequence stellar models by mixing length theory, emphasizing hydrogen molecule formation and pressure ionization

11 p1961 A69-25109

Statistical data for visual binary systems with known spectral classes or colors and one component near main sequence

12 p2159 A69-26666

Linear oscillation modes of premain sequence star model of pure hydrogen composition with variable specific heats ratio, discussing dynamic instability of polytropes

13 p2336 A69-27449

Line absorption effect on opacity and main sequence model stars noting luminosity, radius and mass of convective core

13 p2340 A69-27578

Flare star astrometric study to determine possible variable proper motion

13 p2348 A69-27810

Lithium depletion in main sequence stars of one solar mass, suggesting e-folding time scale indicated by Coma Cluster data

14 p2517 A69-29089

Optical depths of convection related to metal deficiency for main sequence and giant stars

14 p2527 A69-29946

Photoelectric index of main sequence stars in F5 to G2 spectral range, as indicator of atmospheric microturbulent velocities

15 p2695 A69-30999

Equilibrium models reliability for main sequence stars estimated from systematic applications of physical assumption sets and numerical methods

16 p2859 A69-32219

Microturbulent velocities of A and F stars observed for reciprocal effective temperature range

17 p3039 A69-33729

Masses of visual binaries above main sequence with published orbits determined as function of position in H-R diagram, using spectroscopic parallaxes

18 p3195 A69-34429

Balmer line spectrum formation in extended atmospheres of Be and shell stars, noting influence of angle of inclination to observer

18 p3204 A69-35349

Fluxes and luminous efficiencies tabulated for main sequence and subgiant stars within reflection effect problem in eclipsing binaries and Chandrasekhar non-gray atmospheric models

20 p3600 A69-37479

Stellar mass loss in gravitational contraction and variation of rotation law during transition to main sequence

20 p3607 A69-38041

Main sequence star models for diverse solar masses, covering hydrogen burning phase in core and conditions for dynamic instability and mass exchange

23 p4208 A69-41286

Eclipsing binaries spectroscopic and photometric data compared to Iben and Horn models of main sequence stars, noting stellar mass effects

23 p4208 A69-41287

MAINTAINABILITY

Weightless simulators effectiveness for obtaining space systems maintainability criteria, using non-parametric experimental design for performance data

06 p0882 A69-17648

Spacecraft onboard checkout systems and design of ground support equipment and software, noting adaptive dynamic analysis and maintenance /ADAM/ concept

[AIAA PAPER 69-307] • 09 p1478 A69-22382

Digital computer simulation as maintainability design and prediction tools, discussing fault localization in complex electronics systems

10 p1668 A69-22974

Probability of completing countdown in single malfunction encounters, considering development of industry and government guidelines

10 p1792 A69-22979

Saturn 5 holddown and service arm electrical system design program optimized by integrating reliability and maintainability at initial design phase

[AIAA PAPER 69-309] 10 p1670 A69-23043

Automatic support systems for advanced maintainability - IEEE Conference, St. Louis, November 1968

11 p1863 A69-25059

Military systems trouble documentation and evaluation, emphasizing computerized monitoring of reliability and maintainability

15 p2722 A69-31121

Computerized Markov effectiveness models of repairable and nonrepairable complex aerospace systems

18 p3195 A69-34527

Equipment maintainability demonstration technique, discussing simulation, repair time rates mathematical distribution, range and limits

18 p3117 A69-34530

Strapdown inertial reference unit system for inflight reliability and maintainability, discussing design and components

19 p3370 A69-35803

Reliability and maintainability - Conference, Denver, July 1969

19 p3324 A69-35999

FAA ARTS-III terminal air traffic control system reliability and maintainability, discussing module addition

19 p3370 A69-36000

Microelectronics role in maintenance and maintainability of subminiature solid state components, emphasizing functional packaging at module level

19 p3283 A69-36021

Maintainability and maintenance analysis in managing integrated logistic support /ILS/ system

19 p3455 A69-36035

System effectiveness for reliability and maintainability achievement, analyzing people, organizations, value systems and accomplishment criteria in development program

19 p3455 A69-36044

Maintainability as design requirement in system specifications and contracts, noting MIL-STD-471 program of maintainability demonstration tests

20 p3551 A69-38268

Book on maintainability principles and implementation methods covering program implementation, quantitative factors, maintenance concept, tradeoff techniques, design liaison, etc

21 p3734 A69-39815

DC-10 aircraft CF6 engine thrust reverser and spoiler design features impacting operational characteristics, maintainability, noise reduction, structural concept, control and actuation system

[SAE PAPER 690411] 23 p4200 A69-41639

Monitoring devices and modular construction features of Rolls-Royce RB.211 three shaft turbofan engine, discussing maintainability

24 p4321 A69-43112

MAINTENANCE

NT AIRCRAFT MAINTENANCE

NT SPACE MAINTENANCE

Mathematical model constructed for behavior of multicomponent system subject to cannibalization

01 p0086 A69-10651

Maintenance practices for rigid concrete pavement of runways including joint and crack sealing and patching, considering necessary surface preparation and equipment

01 p0057 A69-11277

Reliability of operational satellite systems consisting of two single purpose satellites in interchangeable orbits, discussing outage and replacement

02 p0333 A69-11805

Automatic preventive maintenance program for hybrid computer system by checking individual units

04 p0568 A69-15359

Diagnostic techniques development to test and perform preventive maintenance on hybrid system

04 p0568 A69-15360

Nonreplicative self repairing control, describing prototype computer construction for testing feasibility

04 p0569 A69-15457

Resin bonded glass cloth for large airframe structures rectification

06 p0931 A69-17713

Maintenance process simulation for engine and major components to provide routine material usage forecast and policies

09 p1503 A69-21802

Group relative values for system criteria, showing application to illustrative maintenance criteria

10 p1668 A69-22973

Maintenance van loading technique for number of spares and test equipment in Minuteman weapon system for uncommissioned launch facilities at minimum cost

10 p1669 A69-22980

Spare kit evaluation model for problems with constraints on spare parts quantities, considering optimization and simulation routines for weapon system maintenance

10 p1669 A69-22981

High speed automatic test sets and rapid repair procedures under adverse conditions for individuals of relatively low technical skill

11 p1851 A69-25063

Modular designed automatic test system consisting of central computer controlled system with multiplexed remote test stations for depot level maintenance

11 p1864 A69-25067

Single purpose, multipurpose and multistation automatic test systems for production and maintenance

11 p1864 A69-25068

USAF Logistics Command /AFLC/ Missile Fleet Status Tool /MSFT/ for monitoring and control of Minuteman guidance and control system

11 p1865 A69-25073

Reliability improvement influence on life cycle costs of high volume piece of military/commercial equipment

12 p2101 A69-25848

Models for cognitive behavior and psychomotor behavior for maintenance tasks

12 p2025 A69-27086

Value engineering proposal costs sustained by maintenance and overhaul industry in government contract negotiations, discussing reimbursement and proposed central agency

13 p3283 A69-28099

Long life repairable equipment reliability and mean time between failure with limited life components and material in normal life maintenance environment

15 p2581 A69-31134

Equipment life cycle costs computer simulation for design and changes evaluation, including maintenance analysis example

15 p2723 A69-31138

Automated patching system design for analog and hybrid computers to reduce number of switches required

16 p2756 A69-32551

Life cycle maintenance costs reduction in aerospace industry by computers, describing on-line and off-line test systems

17 p2979 A69-33649

Airborne electric power systems maintenance aids, describing design and operation of annunciator for establishment and display of system failure causes

17 p2905 A69-34112

Steady state availability of system with limited repairable spares for online units, considering statistical dependence among similar units

18 p3144 A69-34493

Mean-time-to-repair of complex systems with consideration for repair policies and number of repairmen, noting application to systems reliability engineering

18 p3144 A69-34494

Reliability measurements based on maintenance records, considering human factor and life limiting and random chance design

19 p3327 A69-36013

Microelectronics role in maintenance and maintainability of subminiature solid state components, emphasizing functional packaging at module level

19 p3283 A69-36021

Availability measure defined in terms of maintenance demand rate and mean downtime for cost prediction involving various parameters

19 p3327 A69-36036

Electron beam welding for repair and production, discussing application to Ti VHF antennas, Concorde switchgears and nuclear reactor loading tubes [SBAC PAPER 14]

20 p3550 A69-37451

Probability theory applied to age and block replacement models in preventive maintenance of parts, noting inspection cost distribution

20 p3551 A69-38267

Bayesian estimate of individual truck maintenance costs based on optimum replacement maintenance age

23 p4241 A69-41577

Gas turbine engine problem causing component failures, considering alternative replacement strategies

24 p4318 A69-42774

Damage repair techniques of polyimide honeycomb sandwich panels constructed with polyimide and T face sheets, using precured plugs, prepreg disks, sealants, etc

24 p4323 A69-43420

MAJORITY CARRIERS

Photoluminescence measurement of distribution of majority carrier concentration in GaAs

03 p0489 A69-13893

Majority and minority carrier trapping in neutron irradiated Si diodes, measuring transient junction capacitance recovery

06 p0975 A69-18869

Majority carrier concentration changes in P-doped n-type Si during fast electron bombardment, discussing relative effect of A and E centers

07 p1199 A69-18684

Photoluminescence measurement of distribution of majority carrier concentration in GaAs

11 p1939 A69-25694

Majority carrier lifetime temperature dependence obtained from photoconductivity measurements of p-type GaAs crystals doped with Ge

15 p2666 A69-30056

MALES

Space flight hypokinesia simulation experiments to study oxygen balance in man

10 p1646 A69-23507

MALFUNCTIONS

- Reliable computation in computing systems designed from unreliable components, considering two models for component malfunctions
04 p0569 A69-15456
- Jet aircraft engines condition monitoring system for detecting malfunctions without engine disassembly [ASME PAPER 69-GT-66]
09 p1501 A69-22518
- Probability of completing countdown in single malfunction encounters, considering development of industry and government guidelines
10 p1792 A69-22979
- Reliability functions and cycles number before breakdown of finite automaton with account of randomness of malfunctions, structure and input signal distribution
13 p2224 A69-27250
- Finite automaton malfunctions, discussing input sequences construction and output sequences analysis for malfunction subsets recognition
13 p2239 A69-28536
- Electronic systems packaging substitution method for optimized malfunction isolation at succeeding levels to final discard-at-failure
14 p2420 A69-29494

MALKUS THEORY

- Minimum Reynolds number and Malkus theory of turbulent channel flow, discussing stability, equilibrium flow, and stationary turbulence via variational theorem
17 p2957 A69-33764

MAMMALS

- NT BABOONS
- NT CATS
- NT CHIMPANZEES
- NT DOGS
- NT GROUND SQUIRRELS
- NT GUINEA PIGS
- NT HAMSTERS
- NT HUMAN BEINGS
- NT MICE
- NT MONKEYS
- NT POCKET MICE
- NT RABBITS
- NT RATS
- NT RODENTS
- Pharmacological tools in autonomic nervous system research, discussing norepinephrine biosynthesis, storage, release and inactivation in mammals
02 p0200 A69-12722
- Mammalian radiobiological studies of effects of heavy particles, discussing therapeutically advantageous characteristics
03 p0374 A69-13499
- Uptake, metabolism and enzymatic synthesis of adrenaline in mammalian brain
07 p1066 A69-19260
- Noble gases effect at low pressures on O consumption by mammalian tissue, noting Xe, Kr, N and nitrous oxides effect on rat liver
19 p3258 A69-36454
- Electrophysiological data for directionally sensitive units in optic tectum of mammals, indicating midbrain as site for rotating spiral motion aftereffects
20 p3480 A69-38264
- Mammalian pineal gland as neuroendocrine transducer, studying melatonin role in ovulation, gonadal growth, etc
20 p3480 A69-38284
- Mammalian brain epinephrine metabolism data after isotonic saline perfusion into cranial vasculature
21 p3650 A69-38323
- Carbon monoxide displacement rate of oxygen from combination with oxyhemoglobin solutions from human adult and fetal, horse, goat, dog, cat and rabbit
21 p3650 A69-38384
- Cytoplasmic and ciliary connections between inner and outer segments of mammalian visual receptors
22 p3881 A69-40857

MAN

U HUMAN BEINGS

MAN MACHINE SYSTEMS

- Man machine relationship in V/STOL control display, discussing inflight simulators, emphasizing NASA X-14 and CH-3C programs
01 p0010 A69-10452
- Probabilistic Information Processing System using men and machines to perform diagnostic information processing and to guide decision making
01 p0037 A69-10954
- Manual control using matched manipulator technique, noting control task complexity decrease and improved performance
02 p0202 A69-11951

- Large scale information displays for group sharing in air traffic control, military operations and organization management
02 p0250 A69-12159
- Research center for investigating man/computer interaction, discussing display systems, computers, languages and data entities
04 p0566 A69-15342
- Multilevel modeling structure for interactive computer graphic design, discussing conversational display manipulation program and interconnection with analysis program
05 p0724 A69-16381
- Computer graphics and manufacturing, discussing man computer system for transformation of blueprint to numerically controlled machine tape with no time delay
07 p1089 A69-19741
- Computer aided design methods for electronic and mechanical materials, discussing basic concepts and problems
08 p1278 A69-19971
- Human engineering program at early design phase of SST aircraft to achieve maximum human efficiency and man machine compatibility
09 p1447 A69-22546
- Roll-motion cues for man-vehicle control in compensatory tracking task with disturbance input
10 p1650 A69-23879
- VTOL aircraft flight control systems, considering computerization and automation approach with human pilot serving as monitor and emergency system
11 p1823 A69-25387
- Man machine integration, detailing sensory input and motor /or output/ systems, control loop and social structure impact
11 p1831 A69-25656
- Human operators instrument-monitoring behavior noting optimal control, information processing, physical limitations, etc
12 p2022 A69-25929
- Polarity coincidence correlation method due to random processes state characterization applied to man machine systems
12 p2022 A69-25931
- Traditional flight crew organization relevance to current and developing flight systems, discussing inadequacies, anachronisms and safety threats
12 p2023 A69-26555
- Man machine model for prediction of human control behavior, generating model from analysis of helicopter pilot tasks
12 p2025 A69-27082
- Complex piloting simulation including fatigue for optimizing man machine synergy, emphasizing human adaptability and computer precision and speed
12 p2025 A69-27083
- Mathematical models of human performance in man machine systems, discussing operations research, maintainability and real time computer simulation for command and control systems
12 p2025 A69-27085
- Computer simulation models for prediction of individual and crew performance in man machine environments
12 p2026 A69-27087
- Man machine interactive structural analysis using digital computer with CRT display, detailing design
12 p2035 A69-27098
- Ergonomics and aviation medicine, discussing biotechnological aspects of information in man machine systems and observation tasks
17 p2915 A69-33770
- Problem-oriented languages in man-computer intercommunication
18 p3106 A69-34658
- Man-computer speech communication, discussing model and aspects of acoustics, phonetics, linguistics, language training, physiology, psychology, bionics, etc
18 p3107 A69-35099
- Tremographic studies of central nervous system during supersonic flight as engineering psychology application to man machine relations in aircraft-spacecraft industries
19 p3259 A69-35834
- Man machine interface problems in C-5 equipment and system design
19 p3261 A69-36024
- Man machine modeling technique for establishing personnel performance requirements, discussing field tests
19 p3261 A69-36025

- Controlled-variable prediction display based on Taylor series computation, describing acceleration system simulator and human operator performance
19 p3313 A69-36414
- Human operator decision making in vehicle manual control, considering success likelihood and possible outcome costs based on signal detection model
20 p3482 A69-37720
- Computer aided data interpretation system converting ionograms to vertical electron density profiles
20 p3504 A69-37866
- Multistable logic circuitry with 10 stability levels based on phased pulse principle, noting efficiency and complexity in man machine interface
21 p3686 A69-39065
- Man-computer interactive Terminal Interface System /ITIS/ compatible for programming graphics, character scopes and typewriter using FORTRAN [AIAA PAPER 69-955]
22 p3905 A69-40337
- SST flight crew operational requirements to achieve maximum human efficiency and man/machine compatibility, discussing pilot role, advanced flight instrumentation, etc
23 p4107 A69-41820
- Flight indicators monitoring by pilots, describing physiological and psychotechnical criteria for dials and clocks arrangement to improve efficiency
23 p4108 A69-41827
- Head-Up Display /HUD/ incorporated with autopilot for human participation in flight control for all-weather operation
23 p4109 A69-41871
- Man-machine /semiautomatic/ control for optimal decision making, discussing automatic control disadvantages and limitations, multilevel system hierarchical structures, three level models, etc
23 p4112 A69-42443
- Man machine systems - IEEE Conference, Cambridge, England, September 1969
24 p4273 A69-43014
- Human sciences contribution to man-computer interaction based on review of relevant human factors literature
24 p4273 A69-43015
- Man-computer interaction problems for human factors research, considering conversational languages development and evaluation, use patterns and interaction modeling
24 p4274 A69-43016
- Decision process model for man-machine decision task structuring by system designers
24 p4274 A69-43018
- Basic task archetypes in man-computer problem solving including detection, planning, optimization, designing, etc
24 p4274 A69-43019
- Manual vehicle control analysis based on feedback systems analysis and mathematical models for human operators engaged in control tasks
24 p4274 A69-43021
- Adaptive manual control rapid variation determined by input, controlled element, task and programmed adaptation systems, discussing human strategy changes
24 p4274 A69-43022
- Ergonomic study of experimental tests design for comparing equipments efficiency with man
24 p4275 A69-43023

MANAGEMENT

- NT CONFIGURATION MANAGEMENT
- NT CONTRACT MANAGEMENT
- NT PROJECT MANAGEMENT
- NT WEAPON SYSTEM MANAGEMENT
- Industrial loyalty and trade secrets, discussing preservation of forms of intellectual property posed by mobile employee and management policies
01 p0180 A69-10991
- Adaptation process of management systems from point of view of control system philosophy [AIAA PAPER 68-807]
08 p1422 A69-20197
- Structure and scoring method for judging alternatives in contract selection
20 p3640 A69-38023
- Programmatic constraints on onboard processing of data collected by payload sensors [AIAA PAPER 69-942]
22 p3904 A69-40325

MANAGEMENT PLANNING

- Human factors in aircraft systems, discussing personnel selection throughout design and manufacturing phases
01 p0019 A69-10449
- National space program management, discussing NACA and NASA, lunar mission planning, procedures and program flexibility and responsibility
01 p0178 A69-10468

Cost prediction equations used in perturbed environment of learning curves subjected to design change in industry

01 p0180 A69-10652

Systematic approach to standard launch vehicle based on governmental expenditure minimization while attaining mission goals

01 p0162 A69-11096

Long range management forecasting by Delphi technique, describing expert panel selection, composite group replies and successive revisions

01 p0180 A69-11250

Survival of PERT/Cost technique without government impetus noting advantages for planning, monitoring and controlling technical performance objectives

01 p0180 A69-11251

Aerospace management technology transferability to problems of society and government

02 p0355 A69-11754

Large scale information displays for group sharing in air traffic control, military operations and organization management

02 p0250 A69-12159

Project management in complex research, discussing incentive contracting decision model and resources allocation

02 p0356 A69-12476

Aerospace research and development projects selection and planning for success in manufacturing competition

03 p0393 A69-13252

Aerospace company engineering administration criteria and functions for chief project engineer [SAE PAPER 680682]

03 p0535 A69-13447

Aerospace manufacturing contribution to engineering function in design development [SAE PAPER 680668]

03 p0433 A69-13451

Research and development project selection and planning, outlining system to identify capabilities contributing to increasing success probability

03 p0535 A69-13552

Book on economic management of research and engineering covering project plan impact, projects control and evaluation of research and engineering structure

04 p0688 A69-14530

Elasticity of demand theory applied to fare changes effect on passenger volume, noting interdependence of aircraft size and fare formulation

04 p0689 A69-14805

Cost dependent utility characteristics in mathematical model for optimum research and development resource allocation, computing optimum fund distribution with Lagrange multipliers

04 p0689 A69-14807

Predictive model for risk in technological research and development

04 p0689 A69-14980

Graphical evaluation and review technique /GERT/ in R and D project planning processes

04 p0689 A69-15100

Product development process diagram, systems engineering checklists and program plankit as devices to assist product manager [ASME PAPER 68-WA/MGT-3]

05 p0850 A69-16146

Statistical analysis of aircraft programs engineering man hours, aircraft performance and weight, avionics systems, schedules, etc, as estimating standards

05 p0769 A69-16239

Computer use evaluation, discussing standards for automatic data processing /ADP/ investment and operations

05 p0850 A69-16299

Cost and schedule planning and control /CSPC/ project progress reporting technique

05 p0850 A69-16300

Technological forecasting role in company growth planning via Delphi technique

06 p1044 A69-17871

Electromagnetic interference /EMI/ created by noise coupling through conductive paths, discussing responsibility for control within systems management

07 p1079 A69-18944

Management control systems, discussing malfunction, inefficiency and needs of human elements

07 p1244 A69-18963

Organization behavior models compared in theory of scientific and professional personnel management, noting compromise between excess restrictions and freedom [AIAA PAPER 68-805]

08 p1422 A69-20196

Transport aircraft fleet management and handling of mechanical and avionic machine defects using operations research

08 p1422 A69-20626

Defense project management and discrepancies between estimates and final costs

08 p1423 A69-20628

Cost control for project management based on detailed programming

08 p1423 A69-20629

Project control cycle, cost monitoring and reporting to management

08 p1423 A69-20630

Decision oriented automatic data processing systems design, noting quantity and quality of upward directed information to management

08 p1423 A69-20733

U.S. Army Materiel Command R and D planning structure and technical planning processes influence on decisions improvement

08 p1423 A69-21153

Organization and manpower utilization in R and D, determining criteria for organizational form selection

08 p1423 A69-21155

Statistical approach to design and management, discussing multiple regression analysis, attributes, intuition, probability, simulation and applications

08 p1344 A69-21162

NASA long range planning of primary electric propulsion for automated space program [AIAA PAPER 69-247]

09 p1565 A69-21251

Incentive provisions used by mutual agreement between purchaser and contractor for project management covering planning, control, financial, technical and personnel functions

09 p1626 A69-22777

Maintenance van loading technique for number of spares and test equipment in Minuteman weapon system for uncommissioned launch facilities at minimum cost

10 p1669 A69-22980

Federal Government budgeting, discussing systems analysis, planning-programming, etc

10 p1811 A69-23351

Federal Government policies analysis, discussing advantages of planning-programming-budgeting system /PPBS/

10 p1811 A69-23353

Potential hazards of government sponsored technology, examining SST and fluoridation projects and weather problems

10 p1811 A69-23392

Airport operation and administration, discussing supply, costs, tariffs, etc

10 p1811 A69-23602

Statistical, economic and psychological aspects of aeronautical and astronautical profitable reliability in relation to operation, using mathematical model

10 p1700 A69-23839

Design management in next century covering computer methods, market needs, etc

11 p2004 A69-24371

Operational research applications to management problems, discussing specific airlines operations cases

11 p1822 A69-24377

Management training goals and methods for executive development, comparing effective and ineffective programs

11 p2005 A69-25305

Reliability planning role in directing business functions to quality efforts integration in engineering, production and testing of electronic equipment

12 p2102 A69-25971

Research and development organizations under pressure of corporate assessment and systems management approach, suggesting core-technology structure and training

12 p2192 A69-26732

Intracompany research and development, noting separate philosophies approach

12 p2192 A69-26733

Financial, political and engineering considerations influencing space flight programs implementation, including nuclear systems examination for propulsion and power capability

13 p2334 A69-27296

Air Canada flight safety system including company philosophy, safety activities, incident and accident handling and information schemes

13 p2201 A69-27541

Value engineering ultimate objectives in industry, discussing engineering and procurement role in prorating goal to applicable departments

13 p2383 A69-28101

Management and control techniques for aircraft product engineering changes [ASME PAPER 69-DE-67]

14 p2540 A69-28850

Urban noise control over transportation systems including aircraft and highway traffic operating beyond local noise ordinance purview

14 p2541 A69-29157

Cost estimates of R and D, considering planned profit and loss following products introduction to market

14 p2541 A69-29280

Capital budgeting for R and D, discussing control of rising costs

14 p2541 A69-29281

Procurement procedures in management planning, discussing document flow charts, contract negotiation, etc

15 p2719 A69-30314

Independent testing laboratory management, outlining requirements specialized to fit continued growth conditions

15 p2720 A69-30402

Defense integrated management engineering system at California Naval Air Rework Facility

15 p2588 A69-30427

MACRO /methodology for allocating corporate resources to objectives/ for R and D, discussing program for optimal budget management

15 p2720 A69-30958

Heuristic methods to determine scientific activities planning emphasizing problem definition, purposes, possibilities of solution and difficulties

15 p2720 A69-30969

Research and development planning and control models based on subjective probability estimates for failing projects identification

15 p2721 A69-31072

Behavioral differences between engineers and scientists with reference to work environment

15 p2721 A69-31073

Characteristics, incentive and promotional patterns and work adjustment of engineering technicians

15 p2723 A69-31242

Book on space age management, considering large scale approach

16 p2881 A69-31766

Civil aircraft requirements from 1975 onward, discussing classes, categories and R and D

16 p2882 A69-32022

Motivation and performance increase in R and D by incentive plans, discussing prestige, power, responsibility, recognition, work, salary, comfort, etc

17 p3075 A69-32963

Research productivity in large organizations stressing interface problem minimization, recommending deferred bonus system

17 p3075 A69-32964

Research management differences between European and American corporate structures, discussing cultural differences, cost comparisons, social mobility, etc

17 p3075 A69-32965

Space program design, discussing NASA centers and NASA R and D life sciences, technological developments and federal action

17 p3076 A69-34042

R and D for economic growth, discussing interaction between management, planning, engineering, marketing, production, customers and competitors

17 p3077 A69-34126

Technology or Research Quantitative Utility Evaluation /TORQUE/ system genesis and operation, with implications affecting R and D

17 p3077 A69-34130

Technical and operational planning activities of airline resulting from airport restrictions in terms of congestion, performance and noise and runway strength

17 p2948 A69-34206

All-weather operations, aircraft size, air traffic and noise as airport design factors, discussing financing priorities for runway construction, facilities and personnel

17 p3004 A69-34207

Reliability tasks vs product reliability, discussing differences in effectiveness and management programming

18 p3143 A69-34484

Apollo project by-products, emphasizing NASA project management methods application to large R and D projects

18 p3233 A69-34649

Cost risk management procedure in defense industry contracting, including risk percent limits and identification in proposals, specifications relief, escalation clauses, etc

18 p3233 A69-34655

Expected occurrences mathematical model for flight system availability under uncertainty

18 p3210 A69-35083

Aerospace management technology transfer, discussing conceptual contributions, planning, administrative and evaluation methods 18 p3236 A69-35086

System approach to reliability demonstration, discussing design and impact on levels, risks, requirements, testing, cost and incentives 19 p3327 A69-36003

Optimized contracting for systems engineering management, discussing industry views, scope, application, depth, procurement and performance measurement 19 p3454 A69-36005

Systems effectiveness function from project and organization management viewpoint 19 p3454 A69-36006

R and D program risk evaluation methodology in density functions form for program goals probabilities, noting random variables as parameters 19 p3455 A69-36008

Maintainability and maintenance analysis in managing integrated logistic support /ILS/ system 19 p3455 A69-36035

System effectiveness for reliability and maintainability achievement, analyzing people, organizations, value systems and accomplishment criteria in development program 19 p3455 A69-36044

Stochastic model for estimating manufacturing costs, discussing Mellin and Laplace transforms and Gram-Charlier series approximations 20 p3633 A69-36924

Delphy technique of technological forecasting used for R and D planning 20 p3639 A69-37353

In-house research on R and D management in government agencies, discussing manning, training, center programs, case studies, etc 20 p3640 A69-38022

U.S. space program since establishment in 1958, NASA mission successes and management systems for future projects 20 p3641 A69-38116

Launch vehicle cost reduction by minimizing software, fabricating in commercial shops and avoiding sophistication, parts and acts of man 21 p3857 A69-39688

Book on maintainability principles and implementation methods covering program implementation, quantitative factors, maintenance concept, tradeoff techniques, design liaison, etc 21 p3734 A69-39815

Civil cargo aircraft characteristics and development trends, discussing cargo and passenger traffic management, communications network, etc 22 p3863 A69-40427

Complex program management emphasizing systems engineering management, noting applications to aeronautical systems [RAES PAPER 9] 22 p4053 A69-40489

Airline management service to cockpit team for safe operation providing safety information sources and transmission channels and undesirable trend detection and correction 22 p4054 A69-41149

Airline economics long term trends requiring management tools for cost control, operations simulation and monitoring, computer use and information data processing [SAE PAPER 690414] 23 p4241 A69-41641

Management activities related to economics of failure in aerospace industry 24 p4416 A69-42777

Management role in ensuring products and components quality and reliability, analyzing failure reasons 24 p4416 A69-42778

Commercial aircraft environmental compatibility planning, considering problems of airport traffic growth and restrictive air traffic control regulations [AAS PAPER 69-326] 24 p4252 A69-42808

Logistics management developed for Apollo Applications Program of NASA Manned Spacecraft Center [AAS PAPER 69-204] 24 p4417 A69-42812

Technological forecasting as aid to aerospace planner in optimizing R and D resources allocation [AAS PAPER 69-105] 24 p4417 A69-42819

Space program planning, noting market requirements, acceptability and future characteristics [AAS PAPER 69-083] 24 p4418 A69-42820

Communication in large organizations, describing internal communication model 24 p4419 A69-42930

Space flight programs management cooperation and limited competition advantages, emphasizing single

management team responsibility for effective multi-lateral activities 24 p4419 A69-43043

MANDELSTAM REPRESENTATION
 Ruby laser to study stimulated Mandelstam-Brillouin scattering in liquids and in various crystals in UV 03 p0438 A69-13053
 Laser power increase noting influence of Mandelstam-Brillouin induced backscattering 04 p0612 A69-15414

MANEUVERABILITY
 Hovercraft handling characteristics, seakeeping and maneuverability during English Channel operation 02 p0277 A69-11592
 Differential games method solving pursuit problem for pursuer with greater maneuverability than pursued 09 p1476 A69-22671
 Visual simulation for critical maneuvers of aircraft takeoff and landing, noting method based on limited corridor simulation and maneuver freedom [AIAA PAPER 68-255] 11 p1866 A69-25376
 Maneuverability domains optimization with semilinear boundaries, noting application to orbital transfer 19 p3399 A69-35668

MANEUVERABLE SATELLITES
 U SATELLITES

MANEUVERABLE SPACECRAFT
 NT AEROSPACEPLANES
 NT APOLLO SPACECRAFT
 NT FERRY SPACECRAFT
 NT HL-10 REENTRY VEHICLE
 NT LIFTING REENTRY VEHICLES
 NT RENDEZVOUS SPACECRAFT
 Rendezvous maneuver with minimum fuel in circular orbit solved without restrictive conditions for accelerations due to approach thrust 16 p2852 A69-31558
 Human operator decision making in vehicle manual control, considering success likelihood and possible outcome costs based on signal detection model 20 p3482 A69-37720
 Mission and planetary vehicles characteristics affecting design of solid propellant motors and thrust vector control systems in planetary orbiters and landers [AIAA PAPER 68-815] 21 p3819 A69-39031

MANEUVERS
 NT ORBITAL RENDEZVOUS
 NT SIDESLIP
 NT SPACECRAFT DOCKING
 NT SPACECRAFT MANEUVERS
 Situation/command system displays and maneuvers for collision avoidance systems, discussing pilot preferences 17 p3002 A69-34096
 Additional yawing by gyroscopic moment of power plant and effect on aircraft maneuver during curvilinear flight, noting compensation by automatic control 18 p3092 A69-34973
 Flight training using digital simulators, including maneuver analysis for TWA 707 program 22 p3928 A69-41137
 Unstabilized astronaut, hand-held and integrated life support EVA maneuvering units tested in gimbaled six degree of freedom servo driven moving base simulator [AAS PAPER 69-516] 24 p4272 A69-42850

MANGANESE
 Temperature dependence of Hall coefficient, conductivity and carrier mobility in manganese doped indium antimonides 04 p0643 A69-15257
 Manganese catalyst photoreactivation in photosynthetic oxygen evolution in Mn deficient alga *Anacystis nidulans* cells 13 p2210 A69-28257
 Chondritic Cr and Mn content studied by X ray fluorescence, noting positive correlation in H and L groups and negative correlation in carbonaceous chondrites 15 p2681 A69-30416
 Manganese deficiency effect on growth and chlorophyll content of algae with and without hydrogenase 15 p2558 A69-31551
 Effective temperature and gravity values for Mn Ap stars by comparing spectrum scans and H line profiles with predictions from atmospheric models 17 p3038 A69-33724
 Colorimetric method to determine small amounts of Mn in metallic Ti by potassium periodate solution 20 p3544 A69-37813

MANGANESE ALLOYS
 NT MANGANIN [TRADEMARK]

Structural stability of manganese austenitic steels at high temperatures, discussing phase transformations and carbide precipitation changes 01 p0100 A69-11294

Low carbon maraging steel, studying age hardening behavior of iron-manganese-nickel alloys with titanium additions 05 p0781 A69-16541

Heat treatment effect on Ti-Mn alloy microstructure, discussing fcc martensite transformation into alpha, beta and intermediate phases as function of aging 11 p1906 A69-25578

Al-Mn-V ternary system equilibrium diagram at various aluminum concentrations determined by magnetic and microhardness measurements, microstructural observations and X ray analysis 24 p4330 A69-42601

MANGANESE COMPOUNDS
 Chemical analysis and paragenesis of manganous ilmenite from Sierran adamellite using electron microprobe 19 p3302 A69-35977

MANGANESE ISOTOPES
 Neutron activation method for Mn 53 in meteoritic Fe by X ray and gamma counters, noting extraction of Mn 54 free reference source 20 p3601 A69-37504

MANGANESE OXIDES
 Pyrolusite samples high dielectric and ferroelectric properties value ascribed to parasitic effects occurring in commonly used contacts 05 p0809 A69-16374

MANGANIN [TRADEMARK]
 Etched manganin gauge for shock pressure measurement in high noise environments containing radiation and electromagnetic effects 04 p0603 A69-15431

MANIFOLDS
 Local cross sections method for optimal control, considering control plant with variable control range and constraints on phase coordinates 07 p1115 A69-19003
 Sobolev type boundary value problems for elliptic operators using manifold theory 08 p1344 A69-21157
 Elliptic complexes over compact manifolds without boundary, discussing general theory of elliptic operators in vector bundles 09 p1532 A69-21733
 Frequency characteristics of flexible compensated manifolds for aircraft engines, considering axial force 11 p1826 A69-25332
 Pressure and flow rate variations at any point of manifold with control units calculated using transfer functions 11 p1942 A69-25335
 Sobolev type boundary value problems for elliptic operators using manifold theory 15 p2645 A69-31250
 Scale models of M-1 rocket engine oxygen and hydrogen pump driven two stage turbines used to determine performance and compact inlet manifolds problems [AIAA PAPER 69-553] 16 p2840 A69-32678

MANIFOLDS [MATHEMATICS]
 Differential equations of steady motion construction from integral manifold 15 p2654 A69-31260
 Stability criteria for integral manifold formed by intersection of hypersurfaces in Euclidean n-dimensional space 21 p3770 A69-38850

MANIPULATION
 U MANIPULATORS

MANIPULATORS
 Remote manipulators applications in space, discussing joint configurations, master-slave systems design, control systems, etc 15 p2558 A69-30187
 Ground controlled remote manipulator spacecraft system to perform unmanned satellite orbital maintenance, discussing refurbishment, laboratory simulation, system cost effectiveness and feasibility 19 p3430 A69-36001
 Remote manipulator spacecraft system for refurbishing synchronous communication satellite, emphasizing compatibility with standard shroud Titan 3C launch vehicle 24 p4297 A69-43041

MANNED ORBITAL LABORATORIES
 Geophysical investigations on manned orbital space laboratories, discussing space photography, spectrophotometry, terrain pictures and aerosol layers 05 p0759 A69-16633

Earth-orbiting manned space station as single facility base for power, volume, logistics, experimental equipment and data communications

19 p3431 A69-36464

MANNED ORBITAL RESEARCH LABORATORIES

Bio waste propelled resistojet control systems selection criteria based on NASA Manned Orbital Research Laboratory with six man crew

[AIAA PAPER 68-121] 04 p0554 A69-15506

Orbital biomedical laboratory for in-flight measurement to assure human safety and optimize astronauts performance in extended space mission

23 p4223 A69-41801

MANNED ORBITAL SPACE STATIONS

U ORBITAL SPACE STATIONS

MANNED ORBITAL TELESCOPES

Optical space astronomy, discussing Large Space Telescope, intermediate scale telescopes and lunar systems

[AAS PAPER 68-218] 02 p0313 A69-11484

Apollo telescope mount (ATM) for solar experiments conducted from manned earth orbiting laboratory

10 p1791 A69-22871

Equations of motion computerized simulation for attitude stabilization of orbiting telescope coupled to crew compartment

13 p2261 A69-27952

Attitude control system for Apollo Telescope Mount, discussing selection features based on manned orbital space platform requirements

18 p3168 A69-34683

MANNED REENTRY

Apollo spacecraft command module aerodynamic characteristics during entry compared with wind tunnel test predictions

[AIAA PAPER 68-1008] 12 p2012 A69-26789

MANNED SPACE FLIGHT

NT APOLLO FLIGHTS

NT APOLLO 10 FLIGHT

NT APOLLO 11 FLIGHT

NT APOLLO 7 FLIGHT

NT APOLLO 8 FLIGHT

NT APOLLO 9 FLIGHT

NT GEMINI FLIGHTS

NT GEMINI 11 FLIGHT

Cardiac output during space flight based on rebreathing method for estimation of gas tension in mixed venous blood and Fick equation

[UN PAPER 68-95746] 01 p0151 A69-10527

Cosmic radiation genetic, cytological and histological changes, particularly of pathological nature, on ecological systems employed in long duration Soviet manned flights

01 p0016 A69-10948

Biological problems in prolonged space voyages including oxygen replacement, water supply and food regeneration

01 p0020 A69-11075

Soviet book on human movements coordination during space flight covering space walks, lunar surface photographs, space docking, weightlessness, etc

01 p0018 A69-11180

French applied and basic research in space biology including manned space flight, deep space problems, weightlessness and cosmic heavy ion radiation effects

02 p0199 A69-11909

Weightlessness effects research during Soviet and U.S. manned space flights

02 p0199 A69-12120

Manned Mars and Venus missions role in overall planetary exploration program

02 p0324 A69-12304

Future space programs as governed by cost limitations, suggesting development of economical launch vehicle for shuttling between earth and orbital space stations

02 p0326 A69-12680

Manned reusable space transportation systems development, discussing requirements for future space mission planning

03 p0519 A69-13395

Interplanetary transportation network involving numerous spacecraft on various planetary flyby trajectories, discussing integration of gravity thrust, braking and scramjet concept

03 p0511 A69-13402

Parametric analysis of life support systems developing scaling laws adapted to computer solutions, discussing manned orbital missions

[SAE PAPER 680746] 03 p0379 A69-13438

Microbiology of water management subsystem for manned space flight, discussing sterilization by heat and tests inside Integrated Life Support System (ILSS)

[SAE PAPER 680718] 03 p0379 A69-13441

Wet oxidation process for management of organic waste products in closed ecologies of long term multimanned space missions

[SAE PAPER 680714] 03 p0380 A69-13443

Heavy cosmic ray particles effect in manned space flight, noting results of deuteron microbeam experiment

03 p0373 A69-13494

Weightlessness effect on blood circulation system of human beings and animals during suborbital/orbital space flight

03 p0376 A69-14194

Cardiovascular system, respiratory system and metabolism of cosmonauts on three man flight of Voskhod, noting physiological and biochemical studies

03 p0377 A69-14195

Biological space research, discussing microecology and weightlessness effects on human space flight

[DVL-847] 04 p0553 A69-14811

German analysis of preparatory technology of U.S. space programs, noting effects of hardware development for manned space travel on future planning

05 p0849 A69-15576

Mars contamination with terrestrial microorganisms, considering possibility of waste materials ejection from manned orbital vehicles

05 p0714 A69-15951

Manned spacecraft systems design optimization for extended space missions replacement modules

05 p0830 A69-16380

Orthostatic intolerance, with assessment of circulatory problem of weightlessness in prolonged space flight

06 p0873 A69-17016

Biological aspects of space exploration, analyzing human response to artificial environment in prolonged space missions

[UN PAPER 68-95715] 06 p0873 A69-17035

Manned space flight programs, discussing U.S. technological, scientific and practical contributions

06 p1001 A69-17074

Ground based guidance systems for supplementing onboard guidance of manned space vehicles

06 p0955 A69-17580

Systems engineering activities in manned space flight involving design, development, manufacture, test and operation of Mercury, Gemini and Apollo flight systems

06 p1016 A69-17602

Manned space flight safety, discussing astronaut exposure to danger on ground, in training and in space mission

06 p0882 A69-17650

Manned orbital space stations design, purposes and applications, balancing costs against benefits

06 p1019 A69-18237

Rules for selecting Soviet cosmonauts and physiological studies concerning heart and respiratory reactions to accelerations and weightlessness during preparation

07 p1060 A69-18569

Physiological aspects of weightlessness

07 p1060 A69-18573

Statistical correlation between cardiovascular activity and respiration dynamics of cosmonauts during orbital flight, discussing heart beat and respiration rates

07 p1061 A69-18584

Pneumograms and EKG used to determine heart beat, respiration rates and systolic index of cosmonauts during Voskhod 2 flight

07 p1062 A69-18585

Human perception in space as function of nervous relationships involving optic, kinesthetic, vestibular and other analyzers

08 p1263 A69-19938

Resistojet control system combined with control moment gyro payload capability for long duration manned orbital spacecraft missions

[AIAA PAPER 69-255] 09 p1561 A69-21220

Space biological tests performed on lower animals and vegetables relating to higher organisms reactions during prolonged manned space flights, reviewing Nasa experiments

12 p2019 A69-26494

Human ecology in space flight - USN-NASA Conference, Princeton, October 1965, Volume 3

13 p2213 A69-27266

Hardware limitations on communications, instrumentation and data handling for manned deep space missions

13 p2219 A69-27666

Human expansion in space, discussing moon landing and exploitation

13 p2352 A69-27901

Space travel and lunar exploration medical problems

13 p2210 A69-27909

Earth orbital manned space astronomy, discussing long range program, instruments, facilities and data processing

13 p2240 A69-27947

Pharmacology for long term manned space flights

13 p2211 A69-28613

Circadian rhythms characteristics in humans, animals and plants, noting possible effects of rhythm disturbances on astronauts

13 p2211 A69-28614

Sweet potatoes productivity and nutritive value as carbohydrates source in manned spaceflights

13 p2216 A69-28619

Thermal vacuum /TV/ manned test operations related to Apollo lunar module in simulated space environment

15 p2558 A69-30394

Calcium mobilization control by adequate calcium intake and programmed exercise during space flight suggested from metabolic balance data

15 p2557 A69-31468

Design philosophy for cost reductions on future space transportation systems, exemplifying application to booster system for earth orbital logistics

[AIAA PAPER 69-439] 16 p2882 A69-32654

Visual perception of three dimensional objects under simulated solar illumination in space considered in relation to manned spaceflight maneuvers

17 p2913 A69-33174

Manned space telescope attitude stabilization using counter-rotational triaxial gyro system

18 p3206 A69-34371

AIAA view on Post-Apollo space program, considering multiple goals, unmanned application satellites and manned space flight objectives

18 p3236 A69-35136

Medical and biological laboratory ground experiments role in development of life support systems and suitable environments for prolonged manned space flights

18 p3098 A69-35165

Future combined environment space simulation tests duplicating environment interaction encountered during earth orbits, deep space probes and manned flights

19 p3288 A69-35531

Navigation, guidance and control developments for manned space missions, discussing earth orbital exploration bases

19 p3369 A69-35801

Amendments considered for international law regarding earth and space rescue services as result of contemporary U.S. manned space flight programs

20 p3637 A69-37115

Infectious diseases in space flight, considering environment role in infection transmission, occurrence and severity

20 p3479 A69-37973

Propulsion system performance relationship to manned planetary mission capability, discussing anticipated performance of advanced propulsion concepts

20 p3586 A69-38118

Communications, instrumentation and data handling for manned planetary missions, discussing data rate limitations

21 p3674 A69-39018

Somatic radiation effects on human organism related to manned space flights

21 p3660 A69-39172

Mineral dynamics during hibernation and disuse atrophy in connection with organismal homeostasis and chronic-term manned space flight, noting skeletal effect of immobility

21 p3660 A69-39175

Periodic orbits for interplanetary flight, using patched conic analysis for determining inclined elliptic free fall trajectory shuttling between earth and Venus

[AAS PAPER 68-102] 21 p3804 A69-39203

Reducing cost of space transportation - AAS Conference, Washington, D.C., March 1969

21 p3856 A69-39686

Space transportation cost factors, discussing payload characteristics, carrier utilization, program duration, government participation and control, carrier design, hardware costs, launch costs, etc

21 p3857 A69-39687

Crew and passenger transportation to and from space station orbits, discussing cost reduction possibilities with current or future technology

21 p3827 A69-39691

Reusable Crew Module, Reusable Orbital System and Reusable All Systems options for low cost space transportation system

21 p3827 A69-39693

Manned transport into orbit and manned orbital operations systems, considering systems selection factors and mission and cost influences

21 p3857 A69-39696

Manned relativistic space flight limitations dependence on biomagnetic levitation of human body in inhomogeneous magnetic field to compensate inertial forces during acceleration

22 p3889 A69-39906

Real time digital computer hardware simulation of Apollo Telescope Mount /ATM/ mission [AIAA PAPER 69-940]

22 p3919 A69-40323

Electric power system selection for long duration manned space station [AIAA PAPER 68-1034]

22 p3869 A69-40549

Photogrammetric camera system developed from NASA requirements to document lunar surface environment during manned space flight exploration

22 p3948 A69-40989

Astronaut weight loss during space flight related to mission duration, noting dehydration and catabolism roles

23 p4100 A69-41303

Manned lunar exploration programs and site evaluation concerning volcanic processes, chemical and mineralogical differentiation, atmosphere and protobiological materials

23 p4216 A69-42200

Manned flyby/orbiter of Mars providing scientific information at low incremental cost [AAS PAPER 69-180]

24 p4379 A69-42813

Space research in past and expected scientific knowledge from manned and automated earth orbital science missions [AAS PAPER 69-036]

24 p4379 A69-42825

Manned flyby and stopover missions to Mars and Venus with chemical propulsion and Saturn 5 launch vehicles, noting short duration low energy missions [AAS PAPER 69-492]

24 p4380 A69-42839

Technology flow for future manned earth orbit and lunar operations and planetary exploration [AAS PAPER 69-494]

24 p4380 A69-42840

Management system for safety in NASA Manned Space Flight Program, discussing hazard analyses and reduction precedence sequence [AAS PAPER 69-522]

24 p4418 A69-42851

Manned space flight history and spacecraft development [AAS PAPER 69-501]

24 p4380 A69-42852

Material recovery from metabolic and other wastes for long duration manned space missions, discussing carbon dioxide removal, bioregenerative food systems, etc [AAS PAPER 69-143]

24 p4272 A69-42876

Meteorological satellite research program, including unmanned satellite observations and possibilities with meteorologist on board manned spacecraft [UN PAPER 68-95350]

01 p0109 A69-10483

Man as main component of future spacecraft or planetary station closed ecological system, discussing spacecrew physiological monitoring for biological cycles optimization

01 p0020 A69-11076

Handheld optical range finder for manned spacecraft orbital rendezvous, discussing target shapes and range errors

02 p0250 A69-12366

Lifting body type M2-F1 and M2-F2 aircraft enabling astronauts to make own landings at choice airport

03 p0366 A69-13367

Occupant restraint systems for automobiles, aircraft and manned space vehicles, discussing cost, practicability, ease of use, acceptability and possible improvements

03 p0380 A69-13459

Photographic control system requirements for Project Apollo manned launches, considering extreme heat, vibration and sound pressure environment [SMPT PAPER 104-20]

04 p0596 A69-14360

Manned spacecraft systems design optimization for extended space missions replacement modules

05 p0830 A69-16380

Life in spacecraft - Conference, Belgrade, September 1967

06 p0881 A69-17642

System designs for manned spacecraft gravity gradient stabilization of Saturn S-4B stage at 400 km and lunar module at synchronous altitude

07 p1228 A69-18338

Communications for Apollo Applications Program, considering extended duration manned missions in low earth orbit and Gemini, Saturn and Apollo hardware

07 p1083 A69-19124

Displays and controls requirements in manned spacecraft to integrate man into vehicle system, noting man capability for task diversity

08 p1312 A69-19968

Manned spacecraft electrical power systems requirements, noting Gemini and Apollo fuel cell system design and configuration

08 p1259 A69-21035

Common nuclear propulsion modules for wide spectrum of manned planetary missions, discussing payload, mission and program flexibility [AIAA PAPER 68-590]

09 p1539 A69-21984

Manned spacecraft developments, considering Apollo Applications Program, space station establishment, space shuttle operations and payload cost

10 p1791 A69-22866

Reaction control rocket engines for manned spacecraft, discussing operating and cycle life, thrust response, specific impulse and reliability

16 p2867 A69-31746

Dim astronomical sources observability from sunlit spacecraft, considering coma of micron sized ice crystals influence on scattering by condensation model

16 p2861 A69-32301

Weight estimation and forecast in manned spacecraft design, noting size and weight relationship [SAWE PAPER 793]

18 p3208 A69-35058

Manned spacecraft earth resource sensing, discussing advantages and applications in agriculture, forestry, geography, hydrology, oceanography and geology

18 p3208 A69-35058

Kennedy Space Center Vehicle Assembly Building construction, capacity and operation for manned spacecraft

19 p3288 A69-35500

Low cost rate transportation as mandatory goal for future space program, discussing recovery and reuse, launch system costs, hardware development, etc

20 p3618 A69-38117

Cone-conical-frustum configurations meeting center of gravity requirements for higher hypersonic lift-drag ratios in axisymmetric manned spacecraft

21 p3644 A69-39237

Ground based guidance for land-landing manned spacecraft with low velocity descent systems, discussing high and low altitude glide path intercept and spiral

[AIAA PAPER 69-864]

21 p3762 A69-39390

Statistical error analysis of autonomous manned spacecraft navigation in long duration eccentric Mars orbits

[AIAA PAPER 69-880]

21 p3763 A69-39406

Seals leak testing for complex manned spacecraft structures [AIAA PAPER 69-1030]

22 p3924 A69-40399

Nuclear reactor/thermoelectric power system design for manned orbiting space station, discussing station integration and operation

23 p4187 A69-42256

Dynamic power and life support systems electrical/thermal integration for manned spacecraft using low temperature Rankine cycle generator

23 p4189 A69-42269

Adaptive control function technique to design lateral stability augmentation system for hypothetical manned, lifting body entry vehicle

24 p4394 A69-43301

Flexible parawing lifting decelerator research data from wind tunnel and flight tests, noting manned space vehicle recovery and aircraft escape systems [AIAA PAPER 68-967]

24 p4254 A69-43715

MANOMETERS

Noiseproof ionization manometer with ion current dual modulation for ultrahigh vacuum measurement in magnetic field with extraneous charged particles interference

03 p0429 A69-13263

Multichannel optical interference fluid manometer, using laser light source for fringe pattern photographic record

13 p2263 A69-28190

Monograph on investigation of rarefied gas flows by means of miniature pressure probes in transition region between molecular and continuum flows

14 p2430 A69-29289

Ionization manometer flange transducer with axial cathode and collector for high vacuum measurements, describing air resistant yttrium oxide coated cathode with Ir core

21 p3724 A69-39077

MANPOWER

NT SCIENTISTS

Organization and manpower utilization in R and D, determining criteria for organizational form selection

08 p1423 A69-21155

MANTLE [EARTH STRUCTURE]

U EARTH MANTLE

MANUAL CONTROL

NT VISUAL CONTROL

Manual control using matched manipulator technique, noting control task complexity decrease and improved performance

02 p0202 A69-11951

Manual optimal guidance schemes for space vehicles to minimize computational and display requirements for pilot task loading

02 p0279 A69-12365

Flight test evaluation of small one man lunar flying device /POGO/, discussing vehicle control, pressure suit factors and piloting differences [AIAA PAPER 68-240]

02 p0229 A69-12379

Advance indication based on extrapolation for aiding manual attitude control of VTOL aircraft in hovering flight, noting results on flight simulator

03 p0366 A69-13645

Hand operated visual signaling devices, discussing Mini Signals and cartridge load aerial signals

06 p0878 A69-16962

Manual and automatic spacecraft rendezvous and docking, discussing docking of Cosmos 186 and 188 in 1967 [UN PAPER 68-95764]

06 p1013 A69-17057

Predictive display technique for remote manual control of roving lunar and planetary surface vehicles

06 p0928 A69-17925

Manual performance of aircraft pilots under sustained acceleration using measurements of hand-writing pressure

06 p0884 A69-18030

Finger dexterity in JMG-1 pressure gloves with regard to efficiency associated with fine adjustments

06 p0884 A69-18032

Minimal angle of resolution /MAR/ between point and extended circular source and between point source and simulated horizon, studying irradiation effects on manual navigation

07 p1177 A69-19208

Human operator manual control of spacecraft under accelerations up to 18 g, noting performance and efficiency of males

08 p1265 A69-19936

Operational reliability of manual and automatic flight control systems and components and current safety standards

08 p1255 A69-20720

Manual onboard computation procedures and devices for determination of maneuvers for orbital navigation and guidance

08 p1348 A69-21184

Control operation time found dependent on gloves, physical characteristics of control and type of required operation

10 p1648 A69-23180

Glove characteristics effects on manipulability, finding operation time differences between gloved and banded operation dependent on type of required control operation

10 p1648 A69-23181

Manual control displays for instrument landing approach of large subsonic jet transport, evaluating closed loop system performance and scanning workload

10 p1650 A69-23877

Roll-motion cues for man-vehicle control in compensatory tracking task with disturbance input

10 p1650 A69-23879

Semiautomatic and automatic off-line module testing machines, comparing costs for different test populations

11 p1865 A69-25076

- Human operators instrument-monitoring behavior noting optimal control, information processing, physical limitations, etc
12 p2022 A69-25929
- Lunar visual environment effects on astronaut control manipulation task performance, discussing solar illumination simulation facility
12 p2059 A69-26554
- Analog correction method to suppress pilot maneuver effects during analysis of aircraft accelerations induced by atmospheric turbulence
[ICAS PAPER 68-39] 17 p2901 A69-33590
- Manual procedures for midcourse and terminal guidance, discussing onboard optical measurements and calculations
19 p3368 A69-35792
- Earth orbit estimation by manual stadimeter, space sextant and small data processor, discussing orbital parameter errors due to instrument and environment uncertainties
19 p3369 A69-35793
- Human operator decision making in vehicle manual control, considering success likelihood and possible outcome costs based on signal detection model
20 p3482 A69-37720
- Adaptive compensation to minimize human task in continuous manual control system using various models
20 p3482 A69-37721
- Manual guidance and control of Saturn launch vehicles, considering feasibility, reliability and hardware implementation
[AIAA PAPER 69-876] 21 p3824 A69-39402
- Manual attitude control for Lunar Module employing directional stability, coordinated turn and attitude command
[AIAA PAPER 69-892] 21 p3824 A69-39417
- Biological model describing spacecraft operator sensorimotor activity in response to various spacecraft control stimuli, outlining computer algorithm
22 p3892 A69-40281
- Manual vehicle control analysis based on feedback systems analysis and mathematical models for human operators engaged in control tasks
24 p4274 A69-43021
- Adaptive manual control rapid variation determined by input, controlled element, task and programmed adaptation systems, discussing human strategy changes
24 p4274 A69-43022
- Manual method for navigating and guiding spacecraft to rendezvous with orbiting target, using hand-held unpowered optical instruments and manual computations
[AIAA PAPER 68-859] 24 p4348 A69-43243
- Gliding cargo airdrop system including automatic homing and manual control
[AIAA PAPER 68-958] 24 p4254 A69-43723
- ### MANUALS
- Instruction manual for maintenance personnel and pilots regarding clear vision and window integrity of Convair aircraft, discussing windshield installation and replacement
14 p2391 A69-28932
- Documentation aspects of computer programs use in civil engineering, describing maintenance, users and operators manuals
22 p3904 A69-40140
- ### MANUFACTURING
- Integrated circuit manufacturing status, discussing raw materials, crystal imperfections, surface damage, epitaxy and diffusion techniques
01 p0045 A69-10650
- Aerospace research and development projects selection and planning for success in manufacturing competition
03 p0393 A69-13252
- Aerospace manufacturing contribution to engineering function in design development
[SAE PAPER 680668] 03 p0433 A69-13451
- Quality control in welding from design through experimental manufacture, product testing, large scale production and improvements
04 p0608 A69-15485
- Book on machinability and producibility of metals, plastics, nonmetallic materials and composites, emphasizing machine tools and tool holders
06 p0931 A69-17782
- Plain and rolling metal bearings manufacture and use, discussing materials structure and properties, operating conditions, lubrication, etc
11 p1903 A69-24517
- Systems design value analysis including alternate solutions to cost effectiveness for design development and production phases
13 p2383 A69-28097
- Reliability control of 1/4-W resistors of tin oxide on glass substrate manufactured in quantity
15 p2627 A69-30837
- Highly concentrated hydrogen peroxide production, handling and storage, discussing crystallization process, equilibrium diagram, decomposition reduction and stabilizers
17 p3017 A69-33353
- Development, manufacturing and logistic costs of reliability improvement in electronic equipment design
18 p3231 A69-34485
- Scientific satellites structural design problems, considering limitations imposed by weight, layout, environmental conditions, mission and manufacture
18 p3208 A69-34792
- Manufacturing in space based on nongravity and hard vacuum environment, considering crystal growth and refinement, perfectly shaped bodies, refractory metals ultrapurification, etc
18 p3234 A69-35066
- Space manufacturing operations program, discussing zero gravity effect during earth orbit flight, Apollo Applications Program Orbital Workshop Flight 2, etc
18 p3208 A69-35067
- Technological possibilities of gravity free production in space environment, discussing containerless manufacture of glass, liquid metal manipulation and defect free fibers
18 p3206 A69-35490
- Materials and products fluid state processing in space, discussing g, zero-g and induced forces effect on fluid matter and process, cost and operational effectiveness
19 p3324 A69-35588
- Materials processing in space, suggesting electronic single crystals preparation, materials melting and utilization of low g earth orbit environment
19 p3324 A69-35589
- Stochastic model for estimating manufacturing costs, discussing Mellin and Laplace transforms and Gram-Charlier series approximations
20 p3633 A69-36924
- Carbon materials manufacture, properties and applications in space technology, discussing carbon fibers, textiles, graphite, pyrolytic carbon, composites and vitreous carbon
23 p4180 A69-42160
- Space manufacturing processes for orbital low and zero gravity environment, discussing buoyancy and thermal convection sensitive and molecular forces controlled methods
[AAS PAPER 69-486] 24 p4380 A69-42844
- ### MANY BODY PROBLEM
- N-body problem in celestial mechanics, using differential equations, reduced to quadratures
[UN PAPER 68-95268] 01 p0150 A69-10476
- N body gravitational problem - Conference, Paris, August 1967
02 p0322 A69-12267
- Numerical regularization of single binary collision in n body gravitational problem
02 p0322 A69-12268
- N body systems with/without external field, noting galactic field effect on system flattening
02 p0322 A69-12270
- Computer study of collisionless self gravitating system using two dimensional model, obtaining gravitational field by solving Poisson equation
02 p0322 A69-12272
- Spacecraft trajectories computation from initial conditions by techniques involving construction of N body reference orbit
03 p0518 A69-14248
- Natural longitudinal single frequency oscillations of system of n material points connected in series by non-linear elastic threads and with energy dissipation
05 p0832 A69-15687
- Atomic Li photoionization cross sections calculated with Brueckner-Goldstone many body perturbation theory
06 p0961 A69-17134
- Approximate solution of celestial mechanics differential equations by reducing to quadratures for n body problems
06 p1006 A69-17566
- Trajectory error propagation upper bounds in many body field for impulsive initial error, relating error to mission tolerances
09 p1595 A69-21937
- Clouds-in-clouds and clouds-in-cells method /CIC/ for many body nonlinear plasma problems, calculating density and force of particles
12 p2138 A69-26625
- Three and n body problems solution by reduction of independent variables and maximum principle
15 p2652 A69-30448
- Oscillator strengths calculated for transitions in Si III using dipole length and velocity matrix elements, comparing many electron correlation problem approximations
15 p2656 A69-31158
- Ground state energy inequalities for N particle non-relativistic quantum mechanical system, showing non-saturating gravitational forces and increasing binding energy per particle
17 p3028 A69-32900
- Quasi-periodic solutions for canonical systems of differential equations in plane n-body problem
17 p3035 A69-33620
- Grobner method of Lie series applied to numerical integration of spacecraft trajectories and n-body problems
23 p4223 A69-42476
- Collective rotational motion separation from internal motion in system of n point masses based on wave mechanics, emphasizing three body problem
24 p4349 A69-42650
- Density matrices of symmetry projected single determinant wave functions for finite groups, considering many particle system
24 p4351 A69-43810
- Many body perturbation theory with time dependent perturbations applied to frequency dependent polarization of atomic oxygen
24 p4354 A69-43816
- ### MAP MATCHING GUIDANCE
- Airborne radar navigation with emphasis on semiautomatic fixing, describing beacon mode, map matching and airborne weather radar
18 p3169 A69-34851
- ### MAPPING
- Satellite photography applications to geography and cartography based on Gemini 7 photographs
[UN PAPER 68-95401] 01 p0178 A69-10489
- Error analysis of orientation methods for extraterrestrial stereophotogrammetric mapping
[JPL-TR-32-1344] 03 p0429 A69-13299
- Optimal circular satellite orbits for planetary surface mapping mission minimizing overlap
03 p0518 A69-14247
- One to one mappings of Fourier series of analytic almost periodic functions and Dirichlet series, discussing satisfaction of functional equation
05 p0786 A69-15882
- Horizontal aerotriangulation by independent models using photogrammetric extension of horizontal control for small scale superwide angle photography, horizon photography and B 8 plotter
06 p0925 A69-17468
- Mars imaging mission and astrodynamical interaction, discussing arrival geometry and orbit size effects
[AIAA PAPER 69-127] 06 p1011 A69-18169
- Low latitudes observations of 21 cm line of H I in galactic center direction, giving contours maps of brightness temperature
08 p1392 A69-20562
- Hertzian radiometric antennas and signal processing techniques for aerial mapping project for sun
08 p1290 A69-20976
- Relative heights on moon, tabulating lunar topography and comparing micrometrical measurements and map data
10 p1782 A69-23697
- B, L coordinates for mapping geomagnetically trapped particles distribution computed by perturbation method, using perfect dipole as zero order approximation
11 p1949 A69-24861
- Cartographic representation methods in climatological regional charts, discussing topographical elements, scale, screen patterns and area color
12 p2124 A69-25893
- Electro-optical scanning device and electro-optical matrix for mechanization of difference measurements in automatic photointerpretation of surveillance maps
12 p2090 A69-26302
- Radiophase mapping utilizing VLF radio signals to detect conductive sheets and surface impedance of earth
12 p2075 A69-26982
- Geographic and cartographic mapping applications of remote sensor data from orbital heights, discussing hardware, instrumentation, NASA role in data selection, etc
12 p2192 A69-26984
- Cartographic interpretation of TV cloud pictures transmitted by Molniya 1 satellite
13 p2292 A69-27730
- Side-looking radar and thermal IR photography as mapping system, discussing resolution and distortion
15 p2612 A69-31162

Visual mapping and photometric scanning of Saturn with rings from earth, noting ring brightness edgewise linear dependence on rings opening

15 p2697 A69-31256

Survey of six year period of satellite observed tropical Pacific cloud mapping

17 p2996 A69-33001

Topographic mapping by high altitude jet aircraft photography

18 p3134 A69-34339

Satellite photography for snow cover mapping and depth estimation

18 p3167 A69-35084

Solar radio emission during quiet sun years 1964-1965 mapped using Stanford spectroheliograph, attributing slowly varying component to electron density enhancement

18 p3188 A69-35395

Color coded area sensitivity maps of photomultiplier tubes by multicolor display technique, noting focus electrode voltage

19 p3305 A69-35724

Side-looking radar and IR line scanning as method for simultaneous stereo height mapping, using images produced from same vantage point

20 p3536 A69-36929

Aerial photography in geomorphological interpretations, noting advantages over conventional maps in slope microreliefs, soil erosion network and karst, glacial, aeolian and shore features

20 p3539 A69-37512

Normalized hodographic mapping for constrained trajectory families, discussing mapping concepts, information content and applications

[AIAA PAPER 69-924] 21 p3809 A69-39362

Orbit selection rules for planetary cartographic spacecraft derived from relations connecting camera angle, view field and imaging resolution

[AIAA PAPER 69-879] 21 p3763 A69-39405

Point mapping in optimal control, describing maximum principle, dynamic programming and substitution of variables

21 p3688 A69-39860

Hyperlatitude photographs for geological mapping from Gemini spacecraft, noting remote sensing imagery

22 p3935 A69-40040

Orthophoto maps production, discussing scales, aerial photography, control points, orthoprojection, cartography and printing

22 p3951 A69-41246

Spherical trajectories control by star height maintenance, analyzing resulting cycloid and cartographic representations

23 p4186 A69-42023

MAPS

NT ASTRONOMICAL MAPS
NT LUNAR MAPS
NT METEOROLOGICAL CHARTS
NT RADAR CLUTTER MAPS
NT RADAR MAPS
NT RELIEF MAPS

World maps highlighting differences in geomagnetic field at conjugate localities

02 p0245 A69-12737

Map information display methods comparison for tactical image interpreters

06 p0924 A69-17212

Numerical decile value maps of sporadic E layer ionization critical frequency for each month of solar cycle minimum and maximum year

10 p1682 A69-23418

Moving map pictorial display system for on board capability of area navigation, noting crew reaction

[SAE PAPER 690393] 23 p4186 A69-41663

MARAGING STEELS

Structural transformations of quenched Fe-Ni-Nb austenitic alloy from X ray diffraction microstructure examination and hardness measurements

01 p0095 A69-10603

Maraging steels ductile and strength characteristics with increased Co and Mo as function of Ni content, tempering method and aging

01 p0098 A69-10731

Shot peening effect on fatigue properties of maraging and Al-Zn-Mg alloy steel welds, using repeated tensile tests

02 p0253 A69-12061

Butt weld fatigue properties improvement in maraging steels, using shot peening and prestretching

03 p0434 A69-13762

Fracture toughness of Ni maraging steel weldments, using bending tests

[AIAA PAPER 68-507] 03 p0450 A69-13910

Experimental high strength maraging steel mechanical properties optimization, discussing heat treatment, quenching, aging and reducing conditions

04 p0615 A69-14645

Overheated maraging steel mechanical properties improvement by heat treatment

04 p0615 A69-14646

Brittle fracture resistance of low carbon maraging and martensitic steels with cracks established by crack growth measurements during tensile and impact tests

04 p0615 A69-14647

Alpha to gamma transformation kinetics in maraging steel during heating, studying alloying elements redistribution

04 p0616 A69-14648

Cobalt concentration reduction in maraging steels by Cr replacement and increased Mo and Ti additions

04 p0616 A69-14649

Maraging steel with reduced Co, establishing optimal temperature range for short aging

04 p0616 A69-14650

Low carbon maraging steel, studying age hardening behavior of iron-manganese-nickel alloys with titanium additions

05 p0781 A69-16541

Maraging stainless steel for manufacturing liquid rocket propellant tanks, discussing composition determination and mechanical properties

07 p1166 A69-19236

High strength 18 percent nickel maraging steel with 350 ksi yield strength

08 p1330 A69-20009

Fabrication welding with maraging steels with emphasis on minimizing heat input

08 p1320 A69-20407

Weldability of maraging steels, suggesting factors for weld toughness and reliability

08 p1320 A69-20408

Plain strain fracture toughness tests on two inch thick maraging steel plates of various strengths, using bend and compact tension tests

10 p1795 A69-23057

Molybdenum, titanium and cobalt effects on nickel maraging steel strength and ductility

11 p1904 A69-24643

Highly alloyed steels weldability, considering nickel maraging and precipitation hardening stainless steels

12 p2111 A69-25829

Plane strain fracture toughness tests on maraging steel plates for various yield strengths and large dimensions

12 p2114 A69-26496

Homogenization of martensite formation in nickel 300 grade maraging steel, analyzing anisotropic transformation strains during thermal cycling

13 p2278 A69-27410

Reversion and drawing techniques for ultrahigh strength ductile maraging steel wire without excessive deformation

13 p2278 A69-27412

Plastic deformation effects by hydrostatic fluid extrusion on mechanical properties of Ni maraging steels

13 p2278 A69-27414

Thin walled maraging steel tube toughness determined by Charpy prcrack testing of transverse and longitudinal impact properties

13 p2269 A69-28183

Nickel maraging steel polarization behavior in acidic solutions, noting corrosion potential dependence on pH

13 p2282 A69-28188

Stress corrosion in smooth and prenotched maraging steels exposed to sodium chloride solution and natural sea water

14 p2467 A69-29940

Maraging steel weldability, discussing residual stresses, hydrogen cold cracking, age hardening and hot cracking

15 p2617 A69-30098

Maraging steel tensile strength increased, plasticity and toughness properties decreased with Ti content increase

15 p2639 A69-30630

Chemical composition effect on Cr-Ni-Mo-Ti stainless maraging steels mechanical properties

15 p2640 A69-30631

Cumulative rapid thermal cycling influence on progressive disappearance martensitic transformation in 18 percent nickel maraging steel

18 p3155 A69-34650

Nickel maraging steel weld metal impact strength and fracture toughness improved by heat treatment

18 p3151 A69-35430

Ni-Ti maraging steel hardness impact strength and thermal EMF changes during quenching

19 p3345 A69-36154

Extrastrong maraging steel based on 18 percent Ni, noting alloying elements percentages, mechanical properties and applications

22 p3971 A69-40833

Forming techniques to overcome pressing behavior of maraging steels, noting tendency to thin during stretching and reluctance to stretch

23 p4170 A69-42157

Rotational bending fatigue strength of plain and notched conventional and maraging steels, evaluating gas nitriding effects

24 p4335 A69-43802

MARIA

U LUNAR MARIA

MARINE NAVIGATION

U SURFACE NAVIGATION

MARINE PROPULSION

NT UNDERWATER PROPULSION

Semiamphibious Vosper VT 1 hovercraft for passengers and cars, discussing design, water contact propulsion, peripheral skirt, supercavitating propellers, structure, performance, etc

04 p0549 A69-15187

UK hovercraft research covering internal/external dynamics, propulsion systems and full scale tests

05 p0702 A69-16393

MARINER SPACE PROBES

Vector helium magnetometer for Mariner 4 /Mars 1964/ and Mariner 5 /Venus 1967/, discussing efforts to reduce spacecraft stray fields

[IEEE PAPER 10.1] 01 p0081 A69-10714

Geomagnetic and interplanetary field variation measurements from Mariners 2, 4 and 5, noting correlation between solar phenomena and geomagnetic storms

02 p0241 A69-11737

Unmanned planetary exploration using Mariner class spacecraft for solar system and life origin

02 p0334 A69-12302

Geomagnetic variability relations to interplanetary magnetic field transverse fluctuations, discussing data from Mariner flights

14 p2510 A69-28948

Venus atmosphere physical properties and chemical composition, considering Venera 4 and Mariner 5 data

18 p3201 A69-35164

Mariner Mars 1969 flyby missions objectives, experiments, spacecraft configuration, trajectory design, sterilization, flight path control and photographic imaging

[AAS PAPER 68-134] 19 p3402 A69-35938

Orbital Experimental Capsule /OEC/ as subsatellite concept for Martian fields and particles measurements, noting Voyager exploring vehicle applications

21 p3805 A69-39215

Mariner Mars 1969 TV system environmental test and calibration program

22 p3920 A69-40372

Friction tests for Mariner Mars 1969 spacecraft mechanisms in ultrahigh vacuum molecular sink chamber, noting increased friction attributed to vacuum environment

[AIAA PAPER 69-996] 22 p3920 A69-40374

Mars atmosphere study by Mariner 6 and 7 spacecraft, discussing instrumentation on board

[AAS PAPER 69-091] 24 p4393 A69-42881

Mars thermal energy emission measurement by Mariner 1969 IR radiometer, indicating frozen carbon dioxide cap and minimum temperature

24 p4384 A69-43196

MARINER SPACECRAFT

Design of interface between Mariner Mars spacecraft and Mars planetary entry/landing capsule

[AIAA PAPER 68-1162] 03 p0521 A69-13671

Mars unmanned spacecraft mission profiles for surface imaging, noting influence of lighting requirements

[SMPT PAPER 104-21] 04 p0650 A69-14361

Mariner 1969 high rate telemetry system portions pertinent to combinatorial mathematicians, discussing coding and encoding

06 p0890 A69-17862

Mariner 1969 multimission high rate deep space telemetry system design, hardware and application

07 p1083 A69-19125

Lightweight double walled meteoroid shield for Mariner Mars 1971, considering Teflon impregnated glass fabric outer sheet and multilayer thermal insulation

[AIAA PAPER 69-377] 13 p2357 A69-28307

MARINER 1 SPACE PROBE

Comparisons and combinations of geodetic parameters from dynamic and geometric satellite solutions and Mariner flights

15 p2600 A69-31362

Two channel IR radiometer for 1969 Mariner mission measuring equivalent black body surface temperature

17 p2972 A69-33085

Acoustic spectrum averager for Mariner spacecraft environmental tests, calculating rms average 1/3 octave spectrum bands in real time

[JPL-TR-32-1442] 17 p2946 A69-33658

Mariner Mars 1969 flyby missions objectives, experiments, spacecraft configuration, trajectory design, sterilization, flight path control and photographic imaging

[AAS PAPER 68-134] 19 p3402 A69-35938

Mariner attitude control system limit cycle operation during cruise, noting variation from ideal case to single side operation

[AIAA PAPER 69-844] 21 p3822 A69-39374

Targeting technique for Atlas/Centaur Mariner Mars 1969 mission, noting suitability to flyby, orbiter or landing interplanetary missions

[AIAA PAPER 69-881] 21 p3764 A69-39407

Mariner Mars 1969 spacecraft real time test support system and recorded data analysis including routing to printers, CRT displays and incremental plotters

[AIAA PAPER 69-982] 22 p3907 A69-40362

Mars landers impactable power subsystems, considering thermoelectric generators, batteries, conversion equipment, Mars environment, etc

23 p4069 A69-42253

Manned flyby and stopover missions to Mars and Venus with chemical propulsion and Saturn 5 launch vehicles, noting short duration low energy missions

[AAS PAPER 69-492] 24 p4380 A69-42839

MARINER 1 SPACE PROBE

Computer program reliability enhancement, discussing significance of underestimation

08 p1278 A69-19845

MARINER 2 SPACE PROBE

Zodiacal dust density in interplanetary space

08 p1407 A69-20938

MARINER 4 SPACE PROBE

Martian upper atmosphere and ionosphere, considering Mariner 4 occultation results and various atmospheric models

02 p0320 A69-12112

Mariner 4 Martian ionospheric data interpreted in terms of E, F1 and F2 regions

02 p0320 A69-12113

Mariner 4 ionospheric densities to deduce Martian atmospheric modes, discussing validity of using ionospheric properties to discriminate between models

02 p0320 A69-12114

Radio amplitude and phase measurements during Mariner-Mars encounter, providing evidence for Martian atmospheric models

• 02 p0320 A69-12116

Annular and linear Martian surface formations nature and origin from analysis of Mariner 4 photographs

03 p0506 A69-13087

Mars surface features identification from comparison of Mariner 4 and ground bases telescopic photographs

07 p1213 A69-18605

Zodiacal dust density in interplanetary space

08 p1407 A69-20938

Martian crater density determined by comparison of statistical counts from Mariner 4 photographs

12 p2157 A69-26309

Martian canals nature based on high contrast photographs obtained by Mariner 4 space probe

12 p2171 A69-27133

Annular and linear Martian surface formations nature and origin from analysis of Mariner 4 photographs

14 p2515 A69-28769

Interplanetary magnetic field radial dependence from Mariner 4 measurements between earth and Mars, indicating fluctuations produced by dynamic processes in solar wind

16 p2856 A69-31964

Lunar magnetic field measurements by Mariner 4 near sun-moon line extension, discussing search for lunar wake

16 p2856 A69-31986

Mars internal structure and composition modeling, considering core, mantle and temperature via earth analogy and Mariner 4 data

17 p3037 A69-33652

Interplanetary and photospheric magnetic fields polarities observed by Mariner 4 and with solar mag-

netograph, noting noncorrelated data along latitudinal strip

18 p3205 A69-35399

MARINER 5 SPACE PROBE

Venus atmospheric structure from surface to 20,000 km radial distance from Mariner 5 radio experiments, noting large mass-2 hydrogen component in upper atmosphere

02 p0330 A69-12802

Venus radius determined by planetary radar and Mariner 5 radio tracking data

03 p0508 A69-13348

Venus and Mars atmosphere structure, comparing Venus atmosphere model with Mariner 5 observations

05 p0824 A69-16248

Lyman-alpha observations of Venus by Mariner 5 analyzed, assuming resonance scattering of flux by hydrogen or deuterium atoms in Venus atmosphere

05 p0815 A69-16255

Translational forces on Mariner 5 stemming from attitude control system studied to determine trajectory for scientific and operational purposes

[AIAA PAPER 69-114] 06 p1018 A69-18108

Venus research, discussing Mariner 5 and Venera, 4 data, radar tracking, orbit, diameter, gravity, density distribution, etc

08 p1391 A69-20456

Venus atmosphere structure determined from Mariner 5 flyby S band radio occultation measurements of ionosphere and atmosphere at illuminated and dark sides

21 p3794 A69-38380

Translational forces on Mariner 5 stemming from attitude control system, determining trajectory for scientific and operational purposes

[AIAA PAPER 69-114] 24 p4394 A69-43256

MARINER 6 SPACE PROBE

Mariner 6 and 7 Mars probes, describing mission profile, basic structure, trajectory design and scientific experiments

18 p3198 A69-34795

Mars exploration by 1969 Mariner 6 and 7 flyby, discussing mission and instrumentation

18 p3201 A69-35141

Narrow angle high resolution TV camera design and testing for Mariner 6 and 7 Mars flyby missions, noting computer drawn spot diagrams

19 p3307 A69-35808

Mariner 6 TV pictures with description of craters and south polar cap, noting moon-like crater abundance, form, arrangement and crater sizes

21 p3803 A69-38981

Mars upper atmosphere ionized carbon dioxide and CO emission spectra in 1900-4300 A region measured by Mariner 6, observing atomic hydrogen and oxygen lines

22 p4023 A69-40568

MARINER 7 SPACE PROBE

Mariner 6 and 7 Mars probes, describing mission profile, basic structure, trajectory design and scientific experiments

18 p3198 A69-34795

Mars exploration by 1969 Mariner 6 and 7 flyby, discussing mission and instrumentation

18 p3201 A69-35141

Narrow angle high resolution TV camera design and testing for Mariner 6 and 7 Mars flyby missions, noting computer drawn spot diagrams

19 p3307 A69-35808

Mars TV pictures from Mariner 7, describing prominent surface features

21 p3806 A69-39330

MARINER-MERCURY 1973

Mariner-Mercury 1973 flyby mission using Atlas-Centaur rocket and gravity-assisted maneuvers, discussing encounter geometries, spacecraft configuration and Venus probe considerations

[AAS PAPER 69-288] 24 p4381 A69-42862

MARINER PROGRAM

NT MARINER-MERCURY 1973

Deep space network system for radio navigation of Mariner mission in 1969, discussing objectives, spacecraft, tracking and data system, mission accuracy, etc

16 p2749 A69-31725

MARKETING

Air cargo transportation in 1970s, discussing Boeing 747 and Lockheed 500 super airfreighters, terminals, rates, marketing, etc

13 p2381 A69-27336

Internationalized defense marketing, suggesting formation of international consortia of industrial companies to design and produce defense systems

14 p2540 A69-28933

Ti alloys commercial applications and properties, discussing alloying elements influence, deformability, weldability, stress corrosion and market trends

16 p2801 A69-31784

R and D for economic growth, discussing interaction between management, planning, engineering, marketing, production, customers and competitors

17 p3077 A69-34126

Aerospace R and D marketing decisions, considering capability identification, business opportunities, strategies and independent program funding

17 p3077 A69-34127

Soviet efforts to market civil aviation equipment in West

18 p3232 A69-34538

Cargo handling systems for worldwide door to door service from marketing systems viewpoint

[RAES PAPER 1] 22 p4053 A69-40482

Space program planning, noting market requirements, acceptability and future characteristics

[AAS PAPER 69-083] 24 p4418 A69-42820

MARKING

NT ISOTOPIC LABELING

Electrolytic marking process for aircraft component identification without use of stamping or engraving

02 p0253 A69-12065

Cross hatching on various body surfaces due to periodic surface pressure fluctuations, discussing origin from counterrotating longitudinal vortices in boundary layer

[AIAA PAPER 69-11] 06 p0915 A69-18213

MARKOV CHAINS

Exponential distributions in Markov chain models for communication channels, considering error free runs of tropospheric systems

01 p0027 A69-10267

Monte Carlo method used to construct optimal algorithms for simulating homogeneous Markov chains whose trajectories reach absorbing state with probability of one

01 p0105 A69-10726

Noise resistance investigation of period synchronization systems described by Markov chains, determining phasing error for circuits

01 p0031 A69-10881

Optimal control problems for Markov chains solved by iterative method, using nonlinear finite difference equations to approximate degenerate elliptic functions

02 p0224 A69-11963

Delay method of finite ergodic Markov chains, analyzing first moments of state probabilities with aid of asymptotic equation

04 p0624 A69-15002

Time dependent statistical equilibrium equations solutions for describing time development of atomic populations by means of ergodic Markov chain

09 p1542 A69-22218

Iterative algorithm to determine transition probability final distribution in Markov extremal systems

11 p1861 A69-25712

Noise resistance of period synchronization systems described by Markov chains, determining phasing error for circuits

12 p2031 A69-26645

Optimal control of variational problem for Markov chain, discussing convexity and concavity of loss function

14 p2470 A69-28903

Moving targets trajectories determination from radar data, using posteriori probability distribution represented by Markov chain

15 p2566 A69-30334

Target trajectories determination based on radar data with allowance for association between neighboring readings, using statistical characteristics obtained with Markov chains

15 p2566 A69-30335

Markov chain applications to avionics weapons system reliability specifications starting with mission profile, failure rates, success probabilities, etc

15 p2581 A69-31136

Existence theorem for Markov chain finite state stochastic games applied to saddle point and optimal strategy or epsilon-optimal strategy pairs

22 p3975 A69-41010

Group interaction finite Markov chain model, analyzing changes in interpersonal relationships based on balanced dyadic states

23 p4110 A69-42017

MARKOV PROCESSES

Optimal distribution of search effort for moving target location, suggesting Markovian decision models

01 p0104 A69-10653

Sequential probability ratio test for detecting changes in Gauss-Markov process characteristics, noting application to fault detection in gyro navigational system
01 p0083 A69-11002

Ideal gas spectra and density fluctuations correlations calculated during Markovian and nonMarkovian wandering of particles
03 p0477 A69-13414

Finite state finite-action-space Markovian decision process, discussing optimal policies set in discrete dynamic programming
04 p0624 A69-14951

Markov extremum drift dual compensation in optimal systems with learning experiments
05 p0741 A69-16671

Secondary acquisition systems analysis by semi-Markov process model, defining minimum average acquisition time
08 p1270 A69-19852

Continuous variate duration estimates by Markov process, giving example of surface air temperature conditional probability distribution
08 p1346 A69-20731

Confidence limits determined for damping parameter of complex stationary Gaussian Markov process
11 p1910 A69-25700

WSEIAC /Weapon System Effectiveness Industry Advisory Committee/ formula, analyzing correctness within Markovian limitations and reward systems extension
12 p2102 A69-26570

Optimal direction finding systems based on bearing angle representation in multidimensional Markov process, considering white and interference noise
13 p2219 A69-27254

Heat transfer and temperature distribution in thin fins with stochastic root temperature due to excitation by stochastic and Markov processes [ASME PAPER 68-HT-35]
13 p2374 A69-27780

Computerized Markov effectiveness models of repairable and nonrepairable complex aerospace systems
18 p3195 A69-34527

Homogeneous Markovian sum of sequence of random quantities series, deriving limiting theorem for sum density
21 p3757 A69-39538

Random processes integration and differentiation and spectral density determination, examining Markov, Gaussian and point processes
22 p3975 A69-40777

Fokker-Planck plasma collision equation derived from Boltzmann equation, Markov process and Liouville equation
23 p4195 A69-41516

MARROW

Bone marrow cell division disturbance in rats after proton irradiation
07 p1064 A69-18973

Bone marrow cell division disturbance in rats after proton irradiation
20 p3479 A69-38221

MARS [PLANET]

Extraterrestrial life possibility in solar system, noting Martian atmosphere and terrestrial life adaption to Mars simulations
02 p0198 A69-11770

Manned Mars and Venus missions role in overall planetary exploration program
02 p0324 A69-12304

Jupiter, Venus and Mars 8.6 mm radio emission, obtaining average disk brightness temperatures
02 p0327 A69-12716

Entry and terminal deceleration systems for unmanned Martian landers, discussing parachute landing and lifting entry vehicles [AIAA PAPER 68-1147]
03 p0521 A69-13670

Mars biological exploration, discussing life detection, chemical and biological experimental strategy [AIAA PAPER 68-1122]
03 p0375 A69-13700

Microorganism viability in rocket engine combustion environments used to determine probability of biological contamination of Mars by Voyager missions
05 p0714 A69-15949

Mars contamination with terrestrial microorganisms, considering possibility of waste materials ejection from manned orbital vehicles
05 p0714 A69-15951

Meteorological observations of Mars northern polar cap and Southern Hemisphere from northern summer solstice to early autumn
05 p0825 A69-16302

Mars polar cap ice cap and dry ice theories, discussing dark wave and cloud distribution meteorological observations
07 p1212 A69-18603

Lunar opposition effect theory applied to Mars opposition effect on brightness
07 p1214 A69-18616

Martian structure theory, comparing mathematical model based on earth long term evolution and ad hoc models
08 p1387 A69-20092

Maximum capacity estimation for one way transportation systems to moon and Mars, analyzing technical and economic aspects
09 p1586 A69-21297

Spectral reflectivity curves for bright and dark areas of Mars noting seasonal crossings
09 p1587 A69-21308

Bioorganic comparative analysis of desert soils, Precambrian shales and meteorites by automated pyrolysis-gas chromatography-mass spectrometry system for future Mars soil analysis [JPL-TR-32-1368]
11 p1832 A69-25640

Limits for Martian surface materials established by comparing visible and IR spectra with laboratory spectra
12 p2156 A69-26225

Photometric and polarimetric properties of Mars, discussing powder covering, chemical composition and particle size of bright and dark areas and blue haze
12 p2171 A69-27145

Chemical composition of earth, Venus, Mars, Mercury and moon calculated from mathematical models, constructing approximate equations of state at high pressure
14 p2526 A69-29878

Fluid controlled solid rocket motors design for Mars mission with acceleration level as parameter, discussing mission specifications, system design and component considerations [AIAA PAPER 69-446]
16 p2841 A69-32687

Photographic observations of Mars position and surrounding stars, correcting coordinates for Mars phase by local desensitization of plate
17 p3027 A69-32873

Mars internal structure and composition modeling, considering core, mantle and temperature via earth analogy and Mariner 4 data
17 p3037 A69-33652

Mars 1969 opposition observations, discussing extremes in north and south hemispherical polar cap behavior, frosty deposit colorings and polar vapor/clouds
17 p3043 A69-34141

Mars autonomous entry navigation, discussing flight path angle control with onboard sensors using realistic sun, Canopus and planet line of sight tracker accuracies
19 p3368 A69-35790

Moon composition and similarities to Mars explained by silicates in solar system raw material
20 p3604 A69-37563

Abort capability mission selection criterion, evaluating energy requirements, Mars flyby and velocity contours [AAS PAPER 68-139]
21 p3805 A69-39209

Statistical error analysis of autonomous manned spacecraft navigation in long duration eccentric Mars orbits [AIAA PAPER 69-880]
21 p3763 A69-39406

Mars positions determined from photographic observations by zone astrophot, establishing rms errors and objective centering error
22 p4025 A69-40613

Spectral reflectivity curves for Mars light and dark areas and seasonal changes of dark area simulated in laboratory
23 p4209 A69-41319

Mars exploration for life by Mariner flybys and orbiters and 1973 Viking landers
23 p4212 A69-41611

Life on Mars, past and future missions, possibilities of metabolic system and analysis methods
23 p4212 A69-41612

Mars landing site topography reconstructed via stereoscopic pictures returned by surface-based imaging systems
23 p4164 A69-41618

Manned flyby/orbiter of Mars providing scientific information at low incremental cost [AAS PAPER 69-180]
24 p3379 A69-42813

Mariner 6 and 7 TV data, discussing implications for Mars present state, past history and biological status
24 p4384 A69-43195

MARS ATMOSPHERE

Ebert spectrometric experiment during Mars flyby aimed at detecting upper atmosphere atoms, ions and molecules in 1100-4300 angstrom spectral range [AAS PAPER 68-184]
02 p0311 A69-11469

S-band radio occultation for probing atmospheres of Mars and Venus [AAS PAPER 68-185]
02 p0311 A69-11470

Direct planetary atmosphere measurement by vehicles entering atmosphere, using Mars and Venus model atmospheres for accuracy expectation [AAS PAPER 68-187]
02 p0311 A69-11472

Active control system augmentation of inherent aerodynamic damping assuring acceptable limits on oscillatory rotational motion during hypersonic Martian atmospheric entry
02 p0333 A69-11742

Ablative heat shield materials for Mars and Venus atmospheric entries
02 p0333 A69-11750

Extraterrestrial life possibility in solar system, noting Martian atmosphere and terrestrial life adaption to Mars simulations
02 p0198 A69-11770

Collection of papers on atmospheres of Venus and Mars covering atmospheric models, light scattering, radio occultation experiments, etc
02 p0318 A69-12101

Mars and Venus atmospheres, Martian atmosphere dynamics, Mars ionosphere and use of space probes
02 p0318 A69-12102

Mars lower atmospheric pressure, temperature and composition, noting consistency between photometric, spectroscopic and occultation techniques
02 p0319 A69-12104

Atmospheric circulation on rotating and nonrotating planets with shallow atmospheres applied to Mars and Venus atmospheres
02 p0320 A69-12110

Martian upper atmosphere and ionosphere, considering Mariner 4 occultation results and various atmospheric models
02 p0320 A69-12112

Mariner 4 Martian ionospheric data interpreted in terms of E, F1 and F2 regions
02 p0320 A69-12113

Mariner 4 ionospheric densities to deduce Martian atmospheric modes, discussing validity of using ionospheric properties to discriminate between models
02 p0320 A69-12114

Radio occultation measurements of Venus and Mars atmospheres using Mariner spacecraft
02 p0320 A69-12115

Radio amplitude and phase measurements during Mariner-Mars encounter, providing evidence for Martian atmospheric models
02 p0320 A69-12116

Martian upper atmospheric ionization process analogous to cometary material ionization in solar wind
02 p0320 A69-12117

Photoelectron energy loss mechanisms in planetary atmospheres, considering possible constituents in Mars and Venus upper atmospheres
02 p0321 A69-12118

Planetary atmosphere determination error analysis using Kalman filter, noting results of simulated Martian atmosphere entry
02 p0331 A69-12806

Deceleration control system for aerobraking and skipout to orbit at Mars [AIAA PAPER 68-1146]
03 p0520 A69-13564

Aeroshell structural development for Mars flyby and entry landing mission compatible with Atlas/Centaur launch vehicle [AIAA PAPER 68-1159]
03 p0521 A69-13667

Venus and Mars atmosphere structure, comparing Venus atmosphere model with Mariner 5 observations
05 p0824 A69-16248

Terrestrial and Martian aerosols estimation based on carbon dioxide spectral and Mariner 4 RF occultation measurements [AIAA PAPER 69-52]
06 p1011 A69-18199

Dynamic stability derivatives of large angle blunted conical spacecraft near transonic speed in simulated Mars environment for various angles of attack [AIAA PAPER 69-104]
06 p1019 A69-18210

Mars polar cap ice cap and dry ice theories, discussing dark wave and cloud distribution meteorological observations
07 p1212 A69-18603

Mars lower ionosphere ionization from spectroscopic and Mariner 4 occultation data, discussing various ionization sources
07 p1213 A69-18607

MARS ENVIRONMENT

Recombination mechanism between CO and O produced by photodissociation of carbon dioxide in upper atmosphere of Venus and Mars
07 p1214 A69-18615

Monte Carlo method for calculating atomic hydrogen escape rate from carbon dioxide atmosphere, considering Mars and Venus atmospheres
08 p1386 A69-20076

Mars and Earth atmospheric carbon dioxide simulation and spectroscopic measurement for developing planetary surface pressure estimating procedures from IR transmission measurements
08 p1354 A69-20151

Mars and Venus atmospheric properties, noting influence of biosphere and human activity on earth atmosphere
08 p1408 A69-21160

Gamma ray scattering gauge design optimum parameters to measure Mars atmospheric density
09 p1495 A69-21842

Aerothermoelasticity problems for Mars entry vehicles, discussing deceleration loads, separated hot gas flow, shield thermal gradients and oscillatory body motion
[AIAA PAPER 68-283] 09 p1610 A69-21991

Carbon dioxide abundance in Mars atmosphere measured with three etalon Fabry-Perot spectrometer
09 p1607 A69-22427

Optical characteristics of Martian atmosphere from photometric data for continent-mare contrasts, discussing transmittance and optical thickness
11 p1959 A69-24727

Venus and Mars atmospheric braking entry and associated equipment, discussing potential cost savings
11 p1968 A69-25722

Mars higher atmospheric transparency and changes in surface colors
12 p2154 A69-25823

Atmospheric models for exospheric temperatures of Mars and Venus based on photoionization heating efficiency
12 p2155 A69-26020

Planet Mars stellar magnitude found dependent on processes occurring in atmosphere and at surface
15 p2689 A69-30565

Radio wave absorption by water vapor in Venusian and Martian atmospheres, constructing model from Venera 4 data
15 p2569 A69-30952

Mars surface and atmospheric properties from polarization degree measurements, discussing optical properties of soil and detection of veils, mists and clouds
16 p2854 A69-31655

Martian surface features and climate with emphasis on atmospheric surface layers, assessing Mariner 4 data
17 p3029 A69-33040

Shock layer properties, radiative and convective heat transfer about two hypersonic blunt bodies at zero angle of attack in assumed Martian atmosphere
[AIAA PAPER 69-634] 17 p2891 A69-33281

Earth ecosystem chemical composition compared with Mars and Venus ecosystems to determine presence of life
18 p3193 A69-34361

UV solar radiation variation effects on Mars and Venus upper atmosphere temperatures
20 p3595 A69-37136

Adaptive control for Mars entry based on sensitivity analysis
[AIAA PAPER 68-8355] 20 p3573 A69-37193

Colpoda maupasis resistance to Martian atmospheric pressure and oxygen partial pressure noting adaptation, reproduction and existence
20 p3478 A69-37627

Mayeda flare observed on Mars on 4 June 1937, suggesting oriented reflection of solar rays from ice crystals cloud or Martian surface feature
20 p3608 A69-38049

Martian surface and atmosphere interpretation through polarimetric and photometric simulation
20 p3614 A69-38253

Venus, Mars and Jupiter lower atmospheric motions, considering atmospheres thermal and chemical composition
21 p3811 A69-39511

Martian atmosphere circulation compared to terrestrial, considering absence of oceans, radiative coupling and planetary scale motions
21 p3814 A69-39569

Deceleration control system for aerobraking and skipout to orbit at Mars
[AIAA PAPER 68-1146] 21 p3828 A69-39761

Water vapor abundance in Mars atmosphere determined from spectrograms, noting restricted existence on surface
22 p4018 A69-40268

Dynamic stability derivatives of large angle blunted conical spacecraft near transonic speed in simulated Mars environment for various angles of attack
22 p4036 A69-40550

Mars upper atmosphere ionized carbon dioxide and CO emission spectra in 1900-4300 A region measured by Mariner 6, observing atomic hydrogen and oxygen lines
22 p4023 A69-40568

Mars atmosphere response to surface temperature changes by radiative and convective heating, noting strong solar control of mean wind distribution
23 p4212 A69-41614

Mars light polarization observations noting unsatisfactory surface pressure determinations
23 p4212 A69-41615

Mars atmospheric features from measurements during entry and after landing, discussing atmospheric state properties, diurnal variability, clouds and winds
23 p4212 A69-41617

Carbon monoxide presence in Martian atmosphere from Mars line spectra, giving content, surface pressure and concentration
23 p4220 A69-42379

Mars atmosphere study by Mariner 6 and 7 spacecraft, discussing instrumentation on board
[AAS PAPER 69-091] 24 p4393 A69-42881

Vector matrix second order sensitivity equation application to Mars entry guidance, performing numerical simulation of second order sensitivity guidance and tabulating results
24 p4388 A69-43690

MARS ENVIRONMENT

Soil, moisture and other requirements for microorganism survival in simulated Martian environment
01 p0018 A69-11091

Enzymes in simulated Martian environment exhibit higher resistance than in earth atmosphere at 4 C
07 p1065 A69-18974

Martian entry test facility for real size entry systems, discussing design, fabrication and operation
15 p2587 A69-30390

Mars lander thermal control system design parameters including environment, power duty cycle and lander size and weight
[AIAA PAPER 69-610] 17 p3072 A69-33274

Mars exploration by 1969 Mariner 6 and 7 flybys, discussing mission and instrumentation
18 p3201 A69-35141

Enzymes in simulated Martian environment exhibit higher resistance than in earth atmosphere at 4 C
20 p3479 A69-38222

Physical and life supporting properties of hypothetical Martian biosphere, considering organism adaptation theories
22 p3876 A69-40271

Mars thermal energy emission measurement by Mariner 1969 IR radiometer, indicating frozen carbon dioxide cap and minimum temperature
24 p4384 A69-43196

MARS EXCURSION MODULE

Impact limiter system design for Mars landing vehicle noting balsa wood or phenolic honeycomb construction
[AIAA PAPER 68-161] 21 p3820 A69-39228

MARS PROBES

NT MARINER 4 SPACE PROBE

NT VIKING LANDER SPACECRAFT

Soviet lunar and planetary probes, reviewing payload characteristics, principal mission features and photographs associated with Luna, Mars, Venera and Zond series
01 p0162 A69-10938

Multieengine Martian soft lander guidance and control system design with single engine failure accommodation based on six degrees of freedom computer simulation
02 p0277 A69-11740

Mars planetary entry and landing model tests, demonstrating technological feasibility of mission
02 p0333 A69-11746

Mars capsule feasibility model terminal dry heat thermal sterilization cycle determined from microbial data
02 p1201 A69-11772

Longitudinal range dispersion of unmanned Mars landers using VM-8 and VM-9 atmospheric models, discussing Syrtis Major as possible landing site
02 p0324 A69-12390

Mars and Venus probes antenna problems in environments of near earth space, deep space and nonearth planetary atmospheres
02 p0223 A69-12811

Mission capability differences between direct and orbital Mars missions as to launch period selection, targeting capability and error analysis
02 p0331 A69-12821

Mission mode and delivery method influence on payload maximization for Mars capsule system
02 p0335 A69-12822

Mars unmanned spacecraft mission profiles for surface imaging, noting influence of lighting requirements
[SMPT PAPER 104-21] 04 p0650 A69-14361

Suboptimal guidance corrections for continuous thrust vehicle disturbances during minimum fuel rendezvous in Martian orbit, discussing physical and modified cost functional
[AIAA PAPER 69-76] 06 p0956 A69-18081

Mars imaging mission and astrodynamic interaction, discussing arrival geometry and orbit size effects
[AIAA PAPER 69-127] 06 p1011 A69-18169

NERVA rocket engine with 200,000-250,000 lb thrust to replace Saturn 5 upper stage for manned interplanetary flights, discussing Mars flight
08 p1410 A69-21029

Mars planetary landing program schedule, COSPAR quarantine policy and biological losses from failures to collect data and from contamination
11 p1828 A69-25459

Reliability and maintainability analysis of two year spacecraft mission combining earth orbits and Mars program, using computerized mathematical model
[AIAA PAPER 68-1059] 12 p2174 A69-26797

Exploding bridgwire /EBW/ systems compared to hot-wire initiators for Mars space probe
17 p2905 A69-34108

Scientific space research program /1968-1978/ outlining advanced lunar orbiter and Mars, Venus and Mercury probes
18 p3193 A69-34360

Mariner Mars 1969 flyby missions objectives, experiments, spacecraft configuration, trajectory design, sterilization, flight path control and photographic imaging
[AAS PAPER 68-134] 19 p3402 A69-35938

Friction tests for Mariner Mars 1969 spacecraft mechanisms in ultrahigh vacuum molecular sink chamber, noting increased friction attributed to vacuum environment
[AIAA PAPER 69-996] 22 p3920 A69-40374

Mars exploration for life by Mariner flybys and orbiters and 1973 Viking landers
23 p4212 A69-41611

Mars atmospheric features from measurements during entry and after landing, discussing atmospheric state properties, diurnal variability, clouds and winds
23 p4212 A69-41617

MARS SPACECRAFT

U MARINER SPACECRAFT

MARS SURFACE

Wolf Trap life detector design to sample and culture Martian surface dirt for microorganism growth
02 p0201 A69-11769

Annular and linear Martian surface formations nature and origin from analysis of Mariner 4 photographs
03 p0506 A69-13087

Martian surface properties, discussing limonites prevalence and dust layer evidence as causes for reddish color
03 p0509 A69-13357

Mars unmanned spacecraft mission profiles for surface imaging, noting influence of lighting requirements
[SMPT PAPER 104-21] 04 p0650 A69-14361

Lunar and Martian annular formations and structures, discussing classification, morphological characteristics, incidence frequencies and area sizes
04 p0658 A69-14959

Mars surface photometric and spectrophotometric measurements, relating opposition effect details with corresponding laboratory sample measurements
07 p1212 A69-18601

Mars surface features identification from comparison of Mariner 4 and ground bases telescopic photographs
07 p1213 A69-18605

Spectral reflectivity curves for bright and dark areas of Mars noting seasonal crossings
09 p1587 A69-21308

Martian polar caps dimensions as function of planet heliocentric longitude examined from photographic observations, noting compatibility with spectroscopic data
11 p1959 A69-24728

Mars photographic and radar data correlation indicating smoothness of dark areas and roughness of desert areas
11 p1964 A69-25406

Mars higher atmospheric transparency and changes in surface colors
12 p2154 A69-25823

Martian crater density determined by comparison of statistical counts from Mariner 4 photographs
12 p2157 A69-26309

Martian canals nature based on high contrast photographs obtained by Mariner 4 space probe
12 p2171 A69-27133

Martian diagonal and longitudinal-meridional canals mapped into grid systems, noting differences between Martian and lunar crusts tectonic activity
13 p2337 A69-27533

Spectral reflectivity differences of selected dark and bright regions of Mars observed with double beam photometer
13 p2338 A69-27553

Annular and linear Martian surface formations nature and origin from analysis of Mariner 4 photographs
14 p2515 A69-28769

Planet Mars stellar magnitude found dependent on processes occurring in atmosphere and at surface
15 p2689 A69-30565

Mars surface and atmospheric properties from polarization degree measurements, discussing optical properties of soil and detection of veils, mists and clouds
16 p2854 A69-31655

Martian bright surface areas identified as homogeneous powder having opaque grains, discussing hydrated iron oxides contributions to observed optical properties
16 p2855 A69-31660

Martian topography during rotation observed using radar round trip echo delay at 7840 MHz, discussing dark areas relation to elevation
16 p2860 A69-32238

Martian surface features and climate with emphasis on atmospheric surface layers, assessing Mariner 4 data
17 p3029 A69-33040

Thermal design of landed vehicle on Mars surface, discussing instrument package covering inside surface coating and battery insulation
[AIAA PAPER 69-611] 17 p3049 A69-33295

Mars surface temperature calculated by applying Humphrey formula for planetary radiation energy, finding mean annual values of temperature for different albedo
17 p3034 A69-33412

Subsurface Martian temperature from sinusoidal temperature variation theory for semiinfinite homogeneous medium, plotting amplitude, mean surface and diurnal soil temperature curves
17 p3034 A69-33413

Lunar and Martian annular formations and structures, discussing classification, morphological characteristics, incidence frequencies and area sizes
18 p3197 A69-34722

Mars photographs from various observatories taken during 1969
20 p3598 A69-37424

Adenosine triphosphate /ATP/ content of terrestrial soils, based on firefly bioluminescent reaction, for Mars soil problems
20 p3473 A69-37567

Mayeda flare observed on Mars on 4 June 1937, suggesting oriented reflection of solar rays from ice crystals cloud or Martian surface feature
20 p3608 A69-38049

Optical parameters of Martian surface and temperature, discussing brightness distribution along diameter in red spectral region, based on photoelectric cross sections
20 p3608 A69-38050

Martian surface and atmosphere interpretation through polarimetric and photometric simulation
20 p3614 A69-38253

Mariner 6 TV pictures with description of craters and south polar cap, noting moon-like crater abundance, form, arrangement and crater sizes
21 p3803 A69-38981

Mars TV pictures from Mariner 7, describing prominent surface features
21 p3806 A69-39330

Computer system functional requirements for autonomous Martian surface roving vehicle, emphasizing vehicle motion control system
[AIAA PAPER 69-980] 22 p3907 A69-40360

Mars atmosphere response to surface temperature changes by radiative and convective heating, noting strong solar control of mean wind distribution
23 p4212 A69-41614

Mars light polarization observations noting unsatisfactory surface pressure determinations
23 p4212 A69-41615

Martian surface mineralogical study of present state and past processes from rock analyses by unmanned spacecraft instruments to test planetary models
23 p4212 A69-41619

Solar array configurations and performance on Martian surface, including hard lander design and surviving shock levels
23 p4073 A69-42289

Mariner 6 and 7 TV data, discussing implications for Mars present state, past history and biological status
24 p4384 A69-43195

Design criteria for antenna control equipment for earth tracking from landing site on Martian surface
[AIAA PAPER 68-868] 24 p4348 A69-43246

Average meteorite flux at Martian surface estimated by generating flux distribution for Martian atmosphere top and adjusting for mass loss and deceleration
24 p4387 A69-43351

Martian seasonal darkening attributed to windblown dust
24 p4389 A69-43742

MARS 69 PROJECT

Targeting technique for Atlas/Centaur Mariner Mars 1969 mission, noting suitability to flyby, orbiter or landing interplanetary missions
[AIAA PAPER 69-881] 21 p3764 A69-39407

Mariner Mars 1969 TV system environmental test and calibration program
22 p3920 A69-40372

MARTENSITE

Martensite transformation by simple shear in equiatomic Ni-Ti alloy, using transmission electron microscopy
02 p0265 A69-12024

Metal/alumina interfaces strength, examining correlation with wetting and bonding and martensitic transformations
03 p0447 A69-13612

Martensitic transformation in Ti-Al-Mo alloys, noting specific features and effects of Mo content
04 p0617 A69-14940

Electron microscopic study of structural changes occurring during aging of martensite in Fe-Ni-Ti alloy
05 p0783 A69-16813

Titanium vanadium martensite decomposition kinetics during heating, showing shearing process and dependence on temperature during quenching
07 p1163 A69-18778

Spontaneous martensite phase transformation in Ti-Cr alloy thin foils formed electrolytically
10 p1708 A69-22994

Monograph on effect of boron, zirconium and titanium on austenite transformation of CrMo steels bainite and martensite covering carbides, nitrides, mechanical properties, etc
11 p1903 A69-24634

Lattice defects in annealed and plastically deformed cobalt, showing increase with increasing martensite transformations
12 p2113 A69-26042

Martensite transformation in Ti-Cr binary alloys by thin foil electron microscopy, noting crystallographic theory
13 p2276 A69-27369

Structural features of Fe-Ni massive martensite observed by light, electron and hot stage microscopies showing parallel block packet
13 p2276 A69-27401

Homogenization of martensite formation in nickel 300 grade maraging steel, analyzing anisotropic transformation strains during thermal cycling
13 p2278 A69-27410

Precipitation influence on martensite formation kinetics and structure of Fe-Ni-Ti alloys
13 p2279 A69-27765

Tishomingo iron meteorite metallography, noting nickel content and martensitic microstructure evolution
13 p2353 A69-28159

Nital etchant and sodium bisulfite stain for morphology of quenched dilute alloy Fe-Ni martensite
13 p2282 A69-28166

Martensite transformation with fcc lattice in Ti alloys containing 5.9 percent Fe analyzed as function of cooling rate using X ray analysis
15 p2636 A69-30105

Titanium alloy martensites crystallography by electron microscope, discussing lattice parameters and spontaneous transformation
18 p3154 A69-34245

Cumulative rapid thermal cycling influence on progressive disappearance martensitic transformation in 18 percent nickel maraging steel
18 p3155 A69-34650

Martensite transformation, C content and work hardening relations in stainless steels studied for magnetic detection of embrittlement during deformation
18 p3138 A69-35117

Phase shape deformation and austenite stabilization in Fe-Ni and Fe-Ni-Ti alloys following secondary alpha phase of reversed martensite-austenite transformation
18 p3159 A69-35448

Isothermal and thermal martensite transformations on polished surfaces of Fe-Ni-Mo alloys
19 p3344 A69-35983

Quench rate effect on martensite start temperature and fine structure of Fe-C and Fe-C-Ni steel, using transmission electron microscopy
20 p3557 A69-36956

Crystallographic relations between mother gamma phase and bulk martensitic structure of Fe-Ni alloys with less than 20 percent Ni, using radioisotopes
20 p3562 A69-37781

Ti-V martensite decay during heating, noting temperature dependence of elastic moduli and electrical conductivity
21 p3746 A69-39160

MARTENSITIC STAINLESS STEELS

High pressure hydrogen environment on tensile properties of stainless steel with and without strain induced martensite
01 p0093 A69-10062

Kinetic features of martensitic transformation of nickel steels dependent on plastic deformation degree at 525 C
02 p0267 A69-12190

Aging of iron-nickel-titanium alloys during heating in reverse martensitic alpha to gamma transformation process, investigating phase parameter changes
04 p0613 A69-14558

High strength martensitic aging steels alloying effects, phase transformation and aging
04 p0615 A69-14644

Brittle fracture resistance of low carbon maraging and martensitic steels with cracks established by crack growth measurements during tensile and impact tests
04 p0615 A69-14647

Retained austenite content control, strain aging and ausforming to improve toughness of high strength martensitic stainless steel without strength loss
08 p1330 A69-20010

Austenite to martensite strain induced transformation effect on energy absorption during crack propagation
10 p1709 A69-23074

Thermal fatigue testing system for martensitic steels using fluidized bed heating and cooling, specimen manipulation means, cycle control, data evaluation, etc
10 p1714 A69-23979

Stainless steels stress corrosion susceptibility, detecting chromium carbide in martensitic matrix by galvanic nondestructive test method
14 p2466 A69-29935

Alloying elements effect on low temperature notch-bend fracture toughness of martensitic high strength steels, noting transition temperature
20 p3556 A69-36952

Precipitation hardening stainless steels applications in aerospace industry, discussing steel selection and heat treatment
20 p3563 A69-37931

MARTIN MILITARY AIRCRAFT
U MILITARY AIRCRAFT

MASCONS

Lunar geophysical features origin, noting mascons influence and surface rigidity
13 p2352 A69-27903

Convection within moon as explanation of maria on near side, presence of mascons, etc
20 p3603 A69-37561

Lunar mascons and maria isostasy, discussing time requirements
20 p3604 A69-37564

Lunar Orbiter data for existence of unequal mass distributions in lunar interior confirmed by manned Apollo 8 and 10 flights, discussing origin
20 p3606 A69-37933

Figure and inhomogeneities relationship for moon, Mercury, Venus, Mars and earth, discussing circular basins and mascons
21 p3803 A69-38980

Variations in gravity, plotting results for U.S., with tables for Alaska, Mexico, India, Africa, etc
21 p3718 A69-39735

Lunar gravitational field data from Lunar Orbiter spacecraft reprocessed, discussing mascon effects on moon structure and evolution theories
24 p4379 A69-42785

MASER OUTPUTS

Hydrogen maser oscillations with external gain, noting frequency stability
04 p0611 A69-14443

Molecular interactions in ammonia maser beam, discussing influence on oscillation extinction beyond given flow rate
07 p1145 A69-18478

Rate equation analysis for internally optically pumped millimeter wave maser operating in laser crystal
07 p1146 A69-18480

Trivalent iron doped andalusite crystals dielectric and maser properties, investigating spin-lattice relaxation, cross relaxation times and inversion ratio [IEEE PAPER C-2]
07 p1150 A69-19049

Upper and lower frequency stability bounds using hydrogen masers, studying signal power and relaxation rate as function of resonator effective field
08 p1327 A69-20715

Transition probabilities in repetitively Q modulated HCN maser radiation dependent on gas discharge current
09 p1516 A69-21626

Cavity system for constructing paramagnetic masers with different active materials
09 p1519 A69-22288

Electron density and collision frequency of MHD plasma determined directly by measuring phase shift and attenuation of propagating laser microwave signal
10 p1731 A69-23436

Condensation sources of maser radiation observed in W3 hydroxyl lines, discussing polarization and designation as protostars
11 p1954 A69-24379

Maser emission in interstellar OH ground state produced by IR pumping, noting population inversion mechanism
15 p2691 A69-30762

Maser amplification of 9.5 GHz longitudinal elastic waves in divalent nickel impurity ions doped sapphire by stimulated emission from inverted spin population
16 p2795 A69-31554

Quantum mechanical microwave frequency doubling in ruby, discussing output power variation with orientation
17 p3015 A69-33024

Q switching of CW 337 mu maser, gain factor measurements for pulse discharges and data on saturation and time dependence
17 p2981 A69-33088

Lambda doublet maser emission from excited OH rotational level, discussing conditions necessary for microwave radiation
18 p3185 A69-34292

Maser submillimeter emission lines used to determine atmospheric and water vapor absorption, noting role of pressure
20 p3553 A69-37296

Protostar chemical processes responsibility for population inversion and properties in OH and water masers
22 p4018 A69-40267

Condensation sources of maser radiation observed in W3 hydroxyl lines, discussing polarization and designation as protostars
24 p4389 A69-43769

MASER RESONATORS

U MASERS

MASERS

NT GAS MASERS

NT PROTON MASERS

NT TRAVELING WAVE MASERS

Partial maser effect in recombination lines of hydrogen atoms in nebular plasma due to overpopulation of energy levels at thermodynamic equilibrium
01 p0148 A69-10042

Parallel and coplanar Brewster angle grinding of maser tube ends
03 p0440 A69-13302

Radiation intensity from system of monoenergetic relativistic electrons in plasma, discussing maser effect in coherent synchrotron radiation
03 p0500 A69-13407

Interstellar gas masers account for properties of 18 cm emission lines from OH molecules
03 p0511 A69-13465

Maser model of single mode field coupled to N identical two level atoms, deriving threshold, stable and unstable steady states, relaxation oscillations, etc
03 p0441 A69-14108

Quantum paramagnetic amplifier using andalusite single crystal and operating with three level pumping system
04 p0577 A69-14780

Pulsed radar quantum paramagnetic amplifier protection from driving pulse leakage power by transient processes
05 p0728 A69-15644

Cyclotron resonance measurements of quantum effects in Ge valence bands by CW molecular gas laser, developing tunable submillimeter maser [IEEE PAPER C-6]
07 p1150 A69-19051

Amplitude modulation of radiation pulses of two level paramagnetic maser as affected by inhomogeneous broadening and spinning of resonance line
07 p1158 A69-19751

Molecule reorientation and transition probability in molecular beam maser using formaldehyde
07 p1158 A69-19760

Quantum paramagnetic amplifier saturating power dependence on input pulses length and frequency determined by kinetic equations solution
08 p1325 A69-20436

Cavity system for constructing paramagnetic masers with different active materials
09 p1519 A69-22288

Atomic clocks frequency standards, discussing masers, atomic beam resonators and gas cells and various applications
09 p1501 A69-22598

Cyclotron harmonic waves /CHW/ nonlinear decay instability and parametric amplification, considering applicability to practical amplifiers
12 p2135 A69-26314

Pulse radar quantum paramagnetic amplifier protection from saturation by transmitter power, using linear electrical bias of EPR line
15 p2579 A69-30956

Pulsed radar quantum paramagnetic amplifier protection from driving pulse leakage power by transient processes
16 p2762 A69-32501

Wide tuning range S band low noise maser amplifier system, discussing bandwidth, gain and packaging for antenna mounting
17 p2979 A69-32914

Quantum electronics, Volume 2, Maser amplifiers and oscillators
17 p2982 A69-33687

Gas and solid state microwave quantum generators and amplifiers, discussing radiation characteristics
18 p3153 A69-35407

Andalusite crystals as active media in paramagnetic quantum amplifiers, discussing design and performance
19 p3333 A69-35881

Lasers and maser devices in radio quantum electronics, discussing optical parametric and microwave devices including transistors, diodes, magnetrons, etc
19 p3284 A69-36433

Accuracy and frequency stability of H masers in terms of wall collision effect and cavity resonator tuning
21 p3741 A69-39685

MASKING

Refractory metal silicon device technology noting high temperature diffusion masking properties for possible use in MOSFET technology
06 p0930 A69-17152

Auditory temporal masking of tonal signal by narrow band noise and perception of temporal order noting effects of intensity, frequency and time
11 p1830 A69-24795

Visual retroactive perceptual masking effect in monkeys pretrained in visual discrimination task, interpreting electrical potentials recorded along optic pathways
22 p3876 A69-40265

Visual backward masking experiment for studying overlapping and nonoverlapping contours of target and masking stimuli straight line
22 p3879 A69-40843

MASKS

NT OXYGEN MASKS

Radio telemetry system for evaluating protective masks dynamic performance by remote simultaneous monitoring of respiration, acceleration and temperature data generated by human subjects
23 p4121 A69-41765

MASS

NT CRITICAL MASS

NT ELECTRON MASS

NT MASCONS

NT PARTICLE MASS

NT PLANETARY MASS

NT STELLAR MASS

Meteor masses and atmospheric density calculation inaccuracy by use of effective stellar magnitudes of meteors
02 p0314 A69-11695

Mass effect on frequency tested during approach of pulsar to sun
02 p0323 A69-12298

Instability phenomena encountered in galaxies determined based on classification of galaxies according to mass and brightness
12 p2163 A69-27019

Meteor masses and atmospheric density calculation inaccuracy by use of effective stellar magnitudes of meteors
13 p2355 A69-28726

Nuclear level density and mass shell corrections relationship for deformed and undeformed nuclei
14 p2488 A69-29337

Inertial and gravitational mass equality reexamined, considering Galileo, Newton and Eotvos experiments
14 p2486 A69-29647

Optical and radio estimations of galactic masses, analyzing radius of rotation curve inflection point
15 p2687 A69-30547

Rotation curve, mass and M/L ratio of Sc galaxy NGC 6574, discussing nucleus and systemic velocity
15 p2691 A69-30764

Radio galaxy Messier 87 mass determined using virial theorem for nucleus velocity dispersion
15 p2695 A69-30883

Line widths of 48 galaxies at 21 cm and spectroscopic data, estimating masses and angular momenta, finding mass-angular momentum relation
16 p2866 A69-32818

Partially conserved axial vector currents and current algebra to obtain vertex functions at point having zero mass by extrapolations
17 p3008 A69-33004

Meteor dynamical and photometrical analyses compared quantitatively, determining mass loss value from fragmentation model
17 p3045 A69-34223

MASS BALANCE

Laminar flow stream containing periodic fluctuation of mass fraction of chemical species over flat plate with reactive surface
11 p1831 A69-24284

Satellite attitude control mass properties, showing weight tradeoff analyses role in selecting control system
18 p3208 A69-34885

PDP8 digital computer and Trebel vertical balancing machine combined for real time presentation of trim weights and positions, noting noise in force components
18 p3220 A69-34888

Moment of inertia measurements facility for spacecraft dynamic balancing operations at low angular rates
18 p3118 A69-34889

Aircraft on board weight and balance system, discussing operations and economics programs [SAWE PAPER 805]
18 p3091 A69-34901

MASS DISTRIBUTION

Gas combustion hydrodynamic stability using feedback equation and theorems for variations in mass and momentum vector
01 p0173 A69-10087

Open cosmological model containing radiation and matter, noting matter density relationship to visible matter average
01 p0150 A69-10371

Mass functions of real earth derived from satellite orbital perturbations [UN PAPER 68-95385]
01 p0064 A69-10460

Einstein equations obtained for axisymmetric distribution of masses in approximation of square of stellar rotation angular velocity in empty space
02 p0317 A69-11956

Mass points substitution for mass of earth, giving gravitational effect equal to observed gravity values corrected for centrifugal acceleration
02 p0243 A69-12008

Mass distributions of meteoroids obtained from underdense radio meteor echoes
03 p0518 A69-14254

Lunar mascons size and depth calculated in terms of mare formed by low velocity iron meteorites impact
04 p0654 A69-14629

Lunar mascons, interpreting lunar gravitational field anomalies over maria in terms of near-surface slab-like model for maria structure
04 p0654 A69-14630

- Lunar crater formation studied to explain distortion in large craters or maria, discussing mass concentrations indicated by positive residuals of gravimetric map
04 p0654 A69-14632
- Lunar surface formation, emphasizing density variations and mass concentrations
04 p0654 A69-14633
- Lunar high density mass concentrations effect on Lunar Orbiters accelerations, discussing lunar gravity field determination
04 p0661 A69-15145
- Vibration analysis of plates with discrete mass distribution based on Galerkin approach
04 p0682 A69-15293
- Self balancing single degree of freedom free fall space environment simulator, discussing coincidence of mass and rotation centers
04 p0586 A69-15468
- Hydrothermal investigation of Ge trace quantity distribution between metal, silicate and sulfide phases at controlled oxygen partial pressure by oxygen buffer techniques
05 p0819 A69-15624
- Large mass concentrations /mascons/ effect on moon dynamical figure, considering production of asymmetries
05 p0820 A69-15762
- Radar determination of exponent s for describing mass distribution of Geminid and Quadrantid meteoric bodies
05 p0823 A69-16033
- Meteoroid mass distribution determined by radar observations of underdense meteor trails at Springhill Meteor Observatory
06 p1003 A69-17493
- Rolling ballistic vehicles mass and aerodynamic characteristics determined from dynamic motion data by performing Fourier analysis on roll axis equation of motion
[AIAA PAPER 69-102] 06 p0862 A69-18039
- Mass distribution and inertia characteristics influence on spin susceptibility and spin recovery characteristics for eight current fighter aircraft
[AIAA PAPER 69-188] 06 p0868 A69-18057
- Lunar mass concentrations /mascons/ origin and nature, postulating primordial lunar atmosphere and hydrosphere and carbon derived from primordial organic compounds
08 p1397 A69-20697
- Symmetrical body rotational motion with asymmetrical mass distribution about center of mass, determining minimum initial value of angular velocity
09 p1595 A69-21762
- Euler rotational equations for bodies with variable inertia tensor subjected to extreme variations of mass distribution and mass loss
09 p1616 A69-21956
- Increasing rotation of axisymmetric body about velocity vector ascribed to asymmetry in mass distribution, defining conditions for occurrence
09 p1431 A69-22077
- Neutral hydrogen content and distribution of late type spiral galaxy NGC 6946 from 21 cm line measurements
09 p1598 A69-22187
- Rotation and mass of Sb galaxy NGC 1832, giving central and mean densities
09 p1599 A69-22188
- Interstellar reddening material distribution within 2500 parsecs of sun, noting concentration in galactic plane, spiral arms and cloud complexes
10 p1773 A69-22961
- Mass and velocity distribution of interstellar clouds from Oort model simulated by Monte Carlo method on computer, predicting rogue cloud existence
10 p1779 A69-23608
- Dynamical model for spherical inhomogeneity in mean mass density of universe to predict velocity dispersion observed for Coma Cluster
10 p1789 A69-24133
- Variational equations for rotation of heavy solid body with fixed point about horizontal axis, noting mass distribution
11 p1917 A69-24778
- Vector equation for correction masses for dynamic balancing of rotor supported on n points derived from bearing structure vibrations amplitude and phase
12 p2180 A69-26243
- Nonrelativistic theory of rotating configurations in terms of gravitational potential, center mass density and variable angular velocity
12 p2159 A69-26662
- Galactic descriptive functions and empirical model construction methods for determining mass distribution
12 p2160 A69-26852
- Moon internal structure, discussing aggregation origin of Moon parallel to earth and three layer model of nife core, sima mantle and porous sheath
12 p2160 A69-26896
- Mass distribution for bodies fallen on planets during formation estimated from present inclination of planetary axes of rotation, using limit theorems of probability theory
13 p2345 A69-27652
- Photometric data and law of rotation in symmetry plane for constructing mathematical model of mass and luminosity distribution in M 31
13 p2351 A69-27870
- Moon-earth system origin emphasizing mass distribution
13 p2352 A69-27902
- Integral equation solved by successive approximation procedure for determining mass distribution in galaxies on radial velocity basis, applying to NGC 7331
13 p2353 A69-28325
- Finite difference method for motion stability of periodic bipolar vibrational systems, considering perturbations
14 p2534 A69-29039
- Classical and relativistic gravitation theories using harmonic coordinate system, interpreting Einstein equations for insular distribution of masses and applications in geodesy
15 p2596 A69-30573
- Interplanetary dust and distribution study by micrometeorite analyzer and by zodiacal light observations using solar probe
15 p2694 A69-30879
- Lunar mascon origin from collisions of large masses with lunar surface
15 p2698 A69-31328
- Lunar mass and gravitational field determined from lunar satellite dynamics, using potential function in terms of spherical harmonics
15 p2699 A69-31405
- Fuel injector-induced mass flux and mixture ratio distributions effects on combustion performance, chamber volume and stability, discussing combustion oscillation avoidance
16 p2877 A69-31731
- Einstein field equations solutions generated via static spherically symmetric mass and charge distributions
16 p2812 A69-32053
- Fixed mass of monatomic gas unsteady spherically symmetric expansion into vacuum by asymptotic Boltzmann equation expansion
16 p2772 A69-32168
- Bending vibratory motion instability of rotor on elastic shaft with uniform mass distribution along axis, using variational methods
16 p2875 A69-32249
- Frequency distribution of star masses formed from solid H grains clouds, noting agreement with Salpeter initial mass function
16 p2862 A69-32372
- Mass of Jupiter system from motion of Doris, using variational equations for initial rectangular coordinates and velocities with respect to mass of Jupiter
16 p2863 A69-32403
- Lunar localized subsurface mass concentration association with circular maria, noting two large mascon basins from gravity data and orbital photography
16 p2864 A69-32446
- Mascons implications in selenodetic data analysis conducted at U.S. space centers
17 p3028 A69-32922
- Interferometric study of electron concentration and mass density profiles through ionized argon thermal end-wall layer formed in shock tube
[AIAA PAPER 69-694] 17 p3074 A69-33477
- Stars kinetic energy and escape rates from isolated cluster with arbitrary stellar mass distributions, assuming spherical symmetry and velocity distribution isotropy
17 p3038 A69-33721
- Forced oscillations of resonance machine elements represented by truss of concentrated masses and external forces, taking into account aerodynamic energy dissipation
17 p3064 A69-33916
- Tail tip-evacuation limits, calculating aircraft balance effect of passenger relocations by graphical method
[SAWE PAPER 765] 18 p3091 A69-34877
- Aerospace balancing system with hydrostatic spindle, describing component construction and functions
[SAWE PAPER 737] 18 p3118 A69-34890
- Dynamic balancing mechanics covering graphical representation, mass asymmetries corrections or adjustment calculations and ballasting equations
[SAWE PAPER 736] 18 p3220 A69-34891
- Bjerhammer gravity reduction method applied to gravity in space, analyzing two test models with mass focused between topographical and reference surface
18 p3173 A69-35197
- Leonid meteoroids mass distribution law exponent evaluation based on unstable meteoric radio echo durations integral distribution
18 p3203 A69-35334
- Free oscillations of rigidly clamped circular plate carrying concentrated masses, deriving frequency equation and value of lower roots
18 p3226 A69-35377
- Newton gravitational constant determination from measured acceleration and known magnitude of masses, describing control system
20 p3537 A69-37140
- Photographic photometry investigation of Light distribution in spiral galaxies NGC 681, 972 and 1084, discussing mass distribution
20 p3599 A69-37476
- Galactic mass relativistic distribution calculated, considering spherically symmetric model differential rotation near sun
20 p3600 A69-37484
- Satellite representations of earth gravity field portraying consistent pattern of mass anomalies due to density differences in layers
20 p3523 A69-37566
- Galaxy NGC 3593 with large amounts of interstellar dust, calculating galactic mass and central density
20 p3610 A69-38143
- Data on mass distribution of terrestrial fragmented rocks to interpret lunar rock samples, noting origin of asteroids and meteorites
20 p3613 A69-38250
- Book on mathematical model for heat and material exchange in bubbles covering bubble formation, transition period and quasi-stationary bubble rise
21 p3847 A69-38448
- Lunar surface, asteroids and meteorites properties by mass distributions of fragmented rocks
21 p3800 A69-38677
- Spherically symmetrical T models of dust matter yielding method for obtaining maximum total mass effect in general relativity theory different from Friedman closed model
21 p3803 A69-38994
- Meteoroid penetration damage to spacecraft system, showing particle mass density distribution as protection criterion
21 p3805 A69-39229
- Earth shape and areas of anomalous gravity from satellite orbital perturbations, tabulating results from various experimenters
21 p3718 A69-39734
- Variations in gravity, plotting results for U.S., with tables for Alaska, Mexico, India, Africa, etc
21 p3718 A69-39735
- Bok globules in Orion nebula, deriving temperature and density data
22 p4022 A69-40465
- Matter surface distribution in general relativity, deriving matching conditions
22 p3982 A69-40753
- Gyroscopic motion with center of mass displaced along suspension axes and kinetic moment varying as power law under linear accelerations
23 p4163 A69-41552
- Increasing rotation of axisymmetric body about velocity vector ascribed to asymmetry in mass distribution, defining conditions for occurrence
23 p4060 A69-41968

MASS FILTERS
U FLUID FILTERS
MASS FLOW

- Sonic nozzle mass flow measurement errors at high supply pressures and moderate temperatures due to real gas effects
[ASME PAPER 68-WA/FM-4] 05 p0699 A69-16114
- Mass motions in solar flares - Conference, Anacapri, Italy, June 1968
06 p0992 A69-17426
- Mass motions in solar flares using line profiles and filtergrams
06 p0993 A69-17427

- Optical evidence for mass motions in solar flares [1937-1967] 06 p0993 A69-17428
- Mass motion in solar flares, discussing loop flares from emission line profile characteristics 06 p0993 A69-17429
- Small scale mass motions in chromospheric structures surrounding solar flare indicating changes in magnetic field 06 p0993 A69-17431
- Mass motions in flares and moustaches indicated by spectral features, discussing red asymmetry of line emission 06 p0994 A69-17432
- Spectrographic H alpha observations indicating effects of rotary mass motion in flares and prominences 06 p0994 A69-17434
- Solar moustaches H alpha profiles spectroscopic studies indicating near symmetry 06 p0994 A69-17435
- Hall effect and mass flow influence on MPD arc jet radial pressure profile calculated as function of pressure and magnetic field [AIAA PAPER 69-246] 09 p1562 A69-21226
- Fluid injection into flowfield from porous forward portion of blunt body in stagnation region flow, determining reservoir pressure and mass flow rate 09 p1430 A69-21973
- Mechanical properties of glass, discussing volume flow, hardness, strength and scratchability 12 p2119 A69-26831
- NGC 4038-9 velocity field from spectrum obtained at McDonald Observatory, suggesting existence of two centers of matter ejection 12 p2169 A69-27060
- Diffusion and mass flow in steady state magnetically stabilized helium arc plasma effects on spectroscopic determinations of electron temperature, discussing degree of ionization 12 p2141 A69-27146
- Numerical solutions of equations for high Prandtl number boundary layers in two dimensional flat plate incompressible flow with mass injection 13 p2249 A69-28238
- Mixing regimes for flows with different stagnation enthalpies subject to mass flow limitation due to thermal choking 13 p2251 A69-28499
- Perturbation technique application to stability criterion for rectilinear missile flight with arbitrary inclination, noting mass reduction and flow and gravity effect 19 p3429 A69-35779
- Supersonic air to air ejectors performance for low secondary-to-primary mass flow ratios, deriving correction factor for Fabry-Paulon theory 21 p3644 A69-38654
- Viscoelastic fluid steady flow in porous walled channel, examining mass flow solution continuity 22 p3930 A69-40118
- Quasi-one dimensional analysis for nonequilibrium flow of dissociated diatomic gas through converging-diverging nozzle, discussing critical mass flow rate 22 p3927 A69-40583
- Optimum functions for mass and energy flow during spacecraft orbital transfer, emphasizing time behavior of propulsion variables 24 p4382 A69-42921
- Mass injection by strong blowing across Couette-Poiseuille shear flow 24 p4301 A69-43354
- Stagnation temperature determined in transition and free molecule region of rarefied gas flows from critical mass flow dependence on temperature and stagnation pressure 24 p4408 A69-43492
- MASS FLOW RATE**
- Local mass transfer from wall with homogeneous or heterogeneous chemical reactions in uniform velocity flow, Couette flow and boundary layer flow 02 p0232 A69-12234
- Quasi-one dimensional analysis of MPD arcs with nonequilibrium ionization taking into account finite rate processes and variable area [AIAA PAPER 68-87] 02 p0291 A69-12505
- Controllable sonic flow orifice, discussing mass flow rate, area and upstream stagnation pressure 10 p1693 A69-23343
- Mass flow rates for nearly free molecular flow through two dimensional slit for several tank pressure ratios 11 p1874 A69-25357
- Steady deflagration of homogeneous monopropellant in condensed phase, considering nonequilibrium surface condition for mass decomposition rate [WSCI PAPER 69-6] 16 p2830 A69-32347
- Rarefied gas flow between parallel plates using linearized Boltzmann transport equation, deriving integral equation for mass flow velocity 19 p3296 A69-35621
- Temperature measurement in and near opposed-jet diffusion flame subjected to electric field, discussing flame behavior at low mass flow rate 21 p3852 A69-39597
- Operational characteristics of multiple arcjet wind tunnel for time varying mass flow rate programs, calculating isentropic core densities and velocities [AIAA PAPER 68-229] 22 p3927 A69-40541
- Radial pressure distribution in steady state rotationally symmetrical plasma jet subjected to axial magnetic field, emphasizing mass entrainment effect [DGLR-69-024A] 23 p4202 A69-41924
- Mass injection effects on viscous hypersonic low Reynolds number shock layer downstream and at stagnation point in blunt forebody region analyzed for non-reacting gas 24 p4249 A69-43663
- MASS RATIOS**
- NT PAYLOAD MASS RATIO
- NT PROPELLANT MASS RATIO
- Autonomous two degrees of freedom Hamiltonian system triangular libration points found stable for all mass ratios in circular restricted three body problem 12 p2155 A69-25883
- Resonant long-period orbits around Lagrange equilateral points for critical mass ratio of main bodies 13 p2346 A69-27706
- Restricted three body problem of conservative Hamiltonian systems with two degrees of freedom and mass ratio parameter, considering phase space around L sub 4 13 p2346 A69-27711
- Parallax and mass ratio of visual type K6 dwarf binary system, ADS 1865, BD plus 30339 13 p2349 A69-27811
- Lunar origin theories, considering moon/earth mass ratio, earth-moon system angular momentum deficiency and differential volatilization in earth 14 p2527 A69-29882
- Carbonaceous meteorites specimen petrographic observations, noting genetic interrelations with urelites regarding S-C and reduced Fe oxidized Fe ratios 19 p3413 A69-36112
- Mean velocity and pressure fields in turbulent boundary layer on flat plate at Mach 2 investigated for ratios of mass flow [AIAA PAPER 68-129] 24 p4304 A69-43581
- MASS SPECTRA**
- Plasma jet mass structure investigated for decomposition during passage through vacuum by spectrometer and probe techniques 03 p0478 A69-13841
- Mass spectrometric studies of plasmas produced by laser beam interaction with solid materials 06 p0932 A69-16921
- Mass spectra of quinoline and isoquinoline N-oxides, discussing diagnostic values of fragmentation reactions for heteroaromatic N-oxide function presence 07 p1075 A69-19496
- Mass spectral fragmentation of substituted aliphatic glycols and hydroxylated carbon-carbon bond 09 p1448 A69-22551
- Absolute dimensions of 34 eclipsing variables having both components near main sequence, comparing mass luminosity and mass spectrum to homogeneous model stars 11 p1952 A69-24248
- Mass spectra peaks of N-Acyl-2-indolinols fragmentation processes upon electron impact, noting compounds predominance in open chain tautomer gas phase 15 p2561 A69-30407
- Electron impact field ionization source for mass measurement of molecular ions, noting organic geochemistry applications 15 p2608 A69-30428
- Qualitative interpolation formula for phonon frequency spectrum of mass disordered alloys three dimensional systems at high concentrations 20 p3583 A69-37279
- MASS SPECTROMETERS**
- NT TIME OF FLIGHT SPECTROMETERS
- Electrode geometry for mass spectrometer ion source to measure electron ionization cross section of low vapor pressure materials 01 p0080 A69-10605
- Mass spectrometer helium leak testing of cryogenic storage vessels, noting procedures and insulation and evacuation of jacket space 02 p0252 A69-11811
- Lower thermosphere composition over New Mexico, discussing rocket flight mass spectrometer measurements during summer 1967 03 p0425 A69-14009
- Mass spectrometer leak testing by calibrated enclosure method for quantification of gaseous leaks in large complex systems 04 p0598 A69-14974
- Magnetic electron multiplier used as particle detector in time-of-flight (TOF) mass spectrometers can introduce mass discrimination effects 04 p0599 A69-15014
- Oil lubricant vapors under frictional working conditions in vacuum analyzed by mass spectrometer and gas-liquid chromatography concerning molecular weight and composition [IME PAPER 11] 07 p1137 A69-18558
- Electron impact induced fragmentation of ring D steroids involving loss of carbon atoms analyzed by mass spectrometry 07 p1069 A69-19497
- Nose cone ejecting system with pyrotechnic devices for two stage Centaur rockets /Sud-Aviation/ with RF mass spectrometer 10 p1635 A69-23034
- Spectral baseline instability correction for time of flight mass spectrometer operating at source pressures up to one torr 10 p1693 A69-23345
- Ethylene oxide and ethane low pressure fuel-rich flames mass spectrometry, analyzing composition and temperature profiles and OH radical role 11 p1831 A69-24478
- Drift velocity and longitudinal and transverse diffusion coefficient for low energy N ions in N gas in mass spectrometer at room temperature 13 p2302 A69-27458
- Metastable ions formation and detection in double focusing mass spectrometer, calculating location of decomposition in electrostatic analyzer and doubly charged ions transition 15 p2561 A69-30021
- Ion-molecular reactions measurements in ionosphere by VV type device and RF mass spectrometer 15 p2603 A69-31407
- Gas chromatograph-mass spectrometer combination for in situ analysis of lunar organic matter, describing instrument design and operation 18 p3113 A69-34238
- Shock wave studies of gaseous NO thermal ionization in Kr as function of temperature, using time-of-flight mass spectrometer 18 p3099 A69-34464
- Ar 39-Ar 40 method using neutron activation and inert gas mass spectrometry to investigate meteoritic thermal histories 19 p3412 A69-36105
- Earth satellite sweeping mass spectrometer for measuring atmospheric neutral particle and positive ion concentration 19 p3314 A69-36681
- Explorer 31 ion mass spectrometer calibrated in flight and compared with Alouette 2 topside electron concentration data 20 p3545 A69-37879
- Meteoritic organic matter origin, discussing time-of-flight mass spectrometer combined with gas chromatographic capillary column 22 p4012 A69-40085
- Digital processing of rocket-borne mass spectrometers for measurements in upper atmosphere, discussing calibration 22 p3904 A69-40232
- Computerized mass spectrometer for monitoring atmosphere in astronaut suits and cabin [AIAA PAPER 69-1016] 22 p3922 A69-40388
- Laser produced Sb and Te vaporization near critical point, using time of flight mass spectrometer 22 p3993 A69-40719
- MASS SPECTROSCOPY**
- Leak flow rates of nitrogen and helium at various pressure gradients measured by gas chromatography and mass spectroscopy 01 p0079 A69-10297
- Automatic heteroatomic plotting of high resolution mass spectral data, presenting relative intensity vs elemental composition in bar form 01 p0024 A69-10905
- Planetary atmosphere composition determination using mass spectrometry for neutral components, ion

spectrometry for ionic components and data system optimization
[AAS PAPER 68-183] 02 p0247 A69-11468

Automatic equipment for sampling and preparing gases by dual column gas chromatography for subsequent mass spectral analysis of carbon isotopes during methane metabolism
02 p0205 A69-12603

Mass spectrometric technique applied to positive column of hydrogen glow discharge for plasma properties, including relative densities of various hydrogen ions
05 p0802 A69-15913

Mass spectrometric measurements to determine energy distributions of ions produced in dissociative photoionization of O molecules
06 p0960 A69-17110

Supersonic molecular beam sampling system for coupling mass spectrometer to alkali metal-air reacting flow system in kinetics study, noting gas dynamic effects
[AIAA PAPER 69-94] 06 p0930 A69-18099

Ammonium perchlorate high temperature decomposition by using carbon dioxide laser pyrolysis/mass spectrometry
[AIAA PAPER 69-143] 06 p0885 A69-18111

Mass spectrometer application to plasma diagnostics, discussing mass spectra, particle extraction, low and high pressure discharges, supersonic flow, ion detection methods, etc
08 p1316 A69-20475

Partition coefficients between natural melts and plagioclase phenocrysts determined for rare earth elements and barium by mass spectrometry
08 p1310 A69-20944

Dominant ionic species in cesium plasma through mass spectrometer analysis, measuring total ion and electron currents
09 p1544 A69-21335

Quadrupole mass filter for rocket-borne measurements of thermospheric helium content, discussing turbopause level and winter helium bulge
09 p1489 A69-21712

Mass spectrometric analysis of silicon carbide for inhomogeneity in sample, noting metallic impurities
09 p1448 A69-22313

Mass spectrometric determination of pyrolysis products generated from heated polymer samples
09 p1448 A69-22314

Lunar surface chemical composition using RF mass spectrometer
10 p1698 A69-24207

Pyrimidine and purine bases analysis by time of flight mass spectrometry and paper chromatography
11 p1832 A69-24738

Semiconductor thin films analysis using mass spectrometer with spark source
13 p2316 A69-27293

Borane carbonyl pyrolysis in low pressure tubular flow reactor measured by mass spectrometry, noting wall collision role in diborane bond dissociation
14 p2410 A69-29282

Mass spectroscopic structural analysis of organic compounds, discussing computer application to data recording, processing and evaluation
18 p3099 A69-34553

Spark source mass spectroscopy for determining trace elements in Ti and Ti alloys used in aeronautical and aerospace technology
[ONERA-TP-723] 18 p3155 A69-34638

Leak tests for sealed electronic circuits using helium mass spectrometer
18 p3138 A69-35271

Mass spectrometric investigation of thermosphere at high latitudes, measuring number densities for nitrogen, Ar and molecular and atomic oxygen
20 p3533 A69-38086

Acid fraction extraction of Green River shale identified by gas chromatography-mass spectrometry-computer system, noting trimethyl pentadecanoic acid
21 p3669 A69-38983

Aromatic and nonaromatic hydrocarbon fractions in terrestrial graphite, discussing classification and analysis by chromatography and mass spectrometry
22 p3934 A69-39890

Lunar rocks types determination by mass spectrometry, describing results of terrestrial rocks tests
22 p4034 A69-41106

Mass spectrometric analysis of lunar material from soil vaporization products ion component by electron beam
22 p4034 A69-41107

Pb isotopic analysis using double spike mass spectrometric method to achieve reproducibility and accuracy, discussing principles and performance
24 p4280 A69-42733

MASS TRANSFER

Mass or energy transfer in reinforced media, discussing components characteristics and role of diffusion processes
01 p0173 A69-10079

Simple and shock waves in nonlinear unsteady heat and mass transfer, discussing conditions for transforming simple waves into shock waves
01 p0174 A69-10096

Linear partial differential equations for nonlinear intensive heat and mass transfer, discussing analogy between transfer processes and electromagnetic waves distribution
01 p0174 A69-10104

Heat and mass transfer coefficients derived for reacting gas mixtures by applying variational principle
01 p0006 A69-10400

Turbulent heat and mass transfer in rotating incompressible fluid flow analyzed by kinetic energy and shear stress equations
01 p0060 A69-10402

Mathematical models of energy and mass transfer processes in closed loop multicomponent life support systems
01 p0021 A69-11316

Turbulent fluid transport properties predicted by simple model for fluid behavior, obtaining mass, momentum and energy diffusivities
01 p0177 A69-11402

Dynamics of moving gas bubble injected in quiescent liquid, considering velocity, heat flow and mass transfer [ASME PAPER 67-WA/HT-30]
02 p0351 A69-12201

Local mass transfer from wall with homogeneous or heterogeneous chemical reactions in uniform velocity flow, Couette flow and boundary layer flow
02 p0232 A69-12234

Determining influence of blowing various gases into boundary layer on friction and heat and mass transfer when external flow velocity varies according to power law
02 p0234 A69-12581

Transpiration cooling of porous flat plate by injection of carbon dioxide or air into carbon dioxide and air free streams
03 p0413 A69-12996

Conservation equations for steady incompressible flow in variable area duct with mass transfer at walls simplified by linearizing inertial and convective terms
03 p0413 A69-13011

Dynamic processes of heat and mass transfer in transpiration cooling of gas flow
04 p0684 A69-14355

Confined jet mixing region at entrance of tubular reactor, discussing mass and momentum transfer, chemical conversion and effect of Reynolds number
[AIChE PAPER 25A] 04 p0586 A69-14508

Mass exchange and evolution of close binaries/Main Sequence stars/
04 p0653 A69-14614

Turbulent flow transfers from applications point of view, noting example of cooling of heated wall
05 p0743 A69-15558

Injection or suction at disk surface, noting effects on heat and mass transfer in laminar flow about rotating disk
06 p1029 A69-17002

Heat and mass transfer by catalytic effect at wall, noting interaction of laminar boundary layer on flat plate
06 p1030 A69-17115

Laminar near wake flow field of two dimensional adiabatic circular cylinder with surface mass transfer
[AIAA PAPER 69-67] 06 p0862 A69-18044

Compressibility transformation theory extended for turbulent boundary layer, involving mass transfer with/without chemical reactions
[AIAA PAPER 69-161] 06 p0912 A69-18045

Chemical nonequilibrium, mass transfer and viscous interaction effects on spherically blunted cones at hypersonic conditions, emphasizing stagnation point
[AIAA PAPER 69-168] 06 p0862 A69-18047

Effects of multidimensional flow through porous matrices in mass transfer cooling, analyzing one dimensional model for blunt axisymmetric surfaces
[AIAA PAPER 69-149] 06 p1038 A69-18179

Heat and mass transfer - Conference, Minsk, May 1968
07 p1243 A69-19732

Electrochemical kinetic and mass transport model for studying stress corrosion crack propagation in Ti [ECS PAPER 147] 08 p1332 A69-20359

Binary stars systems with same total mass calculated for evolution from main sequence stage through mass exchange to white dwarfs
08 p1393 A69-20569

Bounds on mass and momentum transport by turbulent flow between parallel plates derived for Couette and Poiseuille flows
08 p1305 A69-20840

Hot air open circuit wind tunnel for testing vaporized fuel films heat and mass transfer over flat plates
08 p1302 A69-20878

Mass transfer during interfacial turbulence induced by Marangoni effect in physical model
09 p1621 A69-21903

Local creation of mass in steady state universe as source of static field energy propagating away at speed of light
09 p1601 A69-22212

Thin wall flow of circular jets in bounded transverse flow, showing hydrodynamical parameter of mixture effect on jets dimensionless path
10 p1679 A69-23567

Heat and mass transfer between cryogenic fluid and superheated wall, analyzing experimental data
11 p1996 A69-24228

Dynamical effects of mass exchange in close binary systems ejection modes from point of view of orbital elements evolution
11 p1962 A69-25113

Three dimensional laminar boundary layer near windward generator of cone subjected to uniform mass transfer by suction or injection
11 p1874 A69-25281

Close binaries evolution and mass exchange for stars of 5 solar masses with very short periods, using modified Henyey method
11 p1964 A69-25414

Heat and mass transfer in laminar boundary layer on porous flat plate with variable suction or injection velocity and constant wall temperature
12 p2061 A69-25947

Heat and mass transfer coefficients derived for reacting gas mixtures by applying variational principle
12 p2062 A69-26668

High velocity liquid lithium effect on structural materials for MHD power generators, discussing material loss
13 p2278 A69-27478

Heat and mass transfer conditions in ablation of shear thinning and thickening fluids at stagnation point [ASME PAPER 67-HT-78] 13 p2374 A69-27778

Heat and mass transfer in two dimensional turbulent free shear flows including separated and reattached flows
13 p2377 A69-28145

Mass transfer cooling of high velocity surfaces in gaseous environment noting applications to atmospheric entry
13 p2377 A69-28146

Mass transfer cooling data correlation for estimating mass injection effect on slender cone drag
13 p2199 A69-28224

Convective heat and mass transfer in binary turbulent vertical boundary layer
13 p2378 A69-28311

Heat and mass transfer coefficients in binary laminar boundary layer during natural convection, taking into account enthalpy and thermal diffusion effects
13 p2378 A69-28312

Mass transfer due to plasma recombination, ambipolar diffusion and electrode erosion and resistance forces effects on electrodynamic accelerated plasma
13 p2315 A69-28555

Similarity theory similar to Nusselt and Stanton numbers obtained by triple analogy for heat, mass and momentum transfer
13 p2380 A69-28560

Coupled heat and mass transfer with zero order reactions in two phase systems consisting of drops, bubbles or solid particles
14 p2537 A69-29012

Partially ionized multicomponent gas mixture kinetics in strong electromagnetic field, determining magnetic field, stress tensors and transfer coefficients
14 p2492 A69-29610

Halley comet abrupt daily motion variation ascribed to solid particles ejection from ice nucleus stimulated by gas outflow
14 p2524 A69-29712

Bibliography of Soviet books and articles on heat and mass transfer covering thermodynamics, heat conduction, convection and radiation, etc

14 p2540 A69-29900

Magnetic field effect on heat and mass transfer in incompressible fluid MHD flow

14 p2500 A69-29901

Convective heat and mass transfer coupling in laminar hydrodynamic duct flow, obtaining values for bulk and wall temperatures, transfer coefficients and rates, etc

15 p2716 A69-30004

Heat and mass transfer interaction at wall for laminar boundary layer on flat plate, considering catalytic effect of wall in atomic nitrogen recombination

15 p2716 A69-30415

Mass transfer during Cs condensation from moving vapor mixture containing Ar in water-cooled tube

15 p2718 A69-30998

Heat and mass transfer in porous medium with bulk flow in thin adjacent channel, applying Green function analysis to hydrogen-oxygen fuel cell

15 p2552 A69-31115

Energy relations and conversion for electrodynamic plasma acceleration with allowance for mass transfer processes resulting from recombination, diffusion and electrode erosion

15 p2664 A69-31176

Plane Cauchy problem solution for differential equations in heat and mass transfer theory, applying contour integral method in matrix construction

15 p2719 A69-31262

Flow field around sharp slender cones with surface mass transfer at zero angle of attack in low density supersonic and hypersonic flow [AIAA PAPER 68-66]

16 p2732 A69-31887

Soviet bibliography of heat and mass transfer covering thermodynamics, aerohydrodynamics, MHD, transfer processes in various media, etc

16 p2878 A69-31960

Hybrid rockets combustion mechanism, discussing turbulent boundary layer with heat and mass transfer, chemical reactions, etc

16 p2879 A69-32002

Monograph on engineering calculations of momentum, heat and mass transfer through laminar boundaries having arbitrary pressure distribution and constant physical properties

16 p2879 A69-32203

Mean patterns of meridional interhemispheric flow for 40 degree equatorial sector, calculating mean air mass transport in lower troposphere over western Indian Ocean

18 p3166 A69-34420

Heat and mass transfer on vertical surface under combined free and forced convection, solving laminar boundary layer equations by stream function

19 p3453 A69-36844

Book on heat and mass transfer in recirculating flows, presenting elliptic differential equations and numerical solutions by computer

21 p3691 A69-38333

Heat and mass transfer coefficients in binary laminar boundary layer during natural convection obtained with integral equations and Karman-Pohlhausen method

21 p3848 A69-38633

Heat flow in belt-type heat transport device allowing for conductive and mass transport effects, deriving expression for heat transfer capability

22 p4050 A69-40554

Finite-difference grid procedure for predicting friction heat and mass transfer in two dimensional boundary layers

22 p3932 A69-40939

Momentum, heat and mass transfer in turbulent channel flow emphasizing phenomena close to wall, using boundary layer growth-breakdown model

24 p4407 A69-42914

Heat transfer to highly accelerated turbulent boundary layer with and without mass addition, presenting data in terms of Stanton number vs Reynolds number [ASME PAPER 69-HT-53]

24 p4409 A69-43518

Heat and mass transfer in gas suspension, studying suspended particles effects on heat transfer by irreversible thermodynamics

24 p4410 A69-43528

Turbulent pipe flow with wall suction, calculating friction factor, pressure gradient, heat and mass transfer coefficients, velocity and temperature profiles [ASME PAPER 69-HT-4]

24 p4414 A69-43562

Oxygen and carbon dioxide transfer in membrane oxygenators, considering liquid dispersion and membrane diffusion limitations

24 p4279 A69-43799

MAST SHOCK TUBES

U MAGNETIC ANNULAR SHOCK TUBES

MATCHING

Matched asymptotic expansions for establishing relationship between inner and outer expansions of unknown function, discussing classes of singular perturbation

07 p1180 A69-18809

Visual backward masking experiment for studying overlapping and nonoverlapping contours of target and masking stimuli straight line

22 p3879 A69-40843

MATERIAL ABSORPTION

Purines, pyrimidines and nucleosides absorption by Li-, Na-, Mg- and Ca-montmorillonite in aqueous solutions over range pH 2-12 by cation exchange

05 p0716 A69-15973

Absorption of nucleosides, purine and pyrimidine derivatives by Co-, Cu- and Ni-montmorillonite taking place by cation exchange process

05 p0716 A69-15974

MATERIAL BALANCE

U WATER BALANCE

MATERIAL REMOVAL (MACHINING)

U MACHINING

MATERIALS

Materials research - Conference, Tokyo, September 1967

06 p0941 A69-17120

Structures, structural dynamics, materials and aeroelasticity - ASME-AIAA Conference, New Orleans, April 1969

11 p1988 A69-25492

Book on mathematical model for heat and material exchange in bubbles covering bubble formation, transition period and quasi-stationary bubble rise

21 p3847 A69-38448

MATERIALS EROSION

U EROSION

MATERIALS HANDLING

NT GROUND HANDLING

NT PROPELLANT TRANSFER

Air cargo traffic increase, discussing technical and economical prospects, use of intermodal containers and transportation automation tendency

01 p0008 A69-10030

Remotely controlled explosives processing facility for handling unfamiliar sensitive materials, noting safety aspects and inspection, testing, transporting and destroying techniques

02 p0226 A69-11523

Air cargo terminal materials handling, discussing computer control, off-airport consolidation, packaging, etc

13 p2239 A69-27337

Highly concentrated hydrogen peroxide production, handling and storage, discussing crystallization process, equilibrium diagram, decomposition reduction and stabilizers

17 p3017 A69-33353

Materials processing in space, suggesting electronic single crystals preparation, materials melting and utilization of low g earth orbit environment

19 p3324 A69-35589

Air cargo traffic, discussing payload lots, aircraft types suitable for freight transport, difficulties and solution

22 p4052 A69-40426

Cargo handling systems for worldwide door to door service from marketing systems viewpoint [RAES PAPER I]

22 p4053 A69-40482

Handling and processing function in air freight transportation, discussing system design approaches, cargo terminals, materials handling systems and containerization

22 p4053 A69-40483

MATERIALS RECOVERY

NT WATER RECLAMATION

Second phase hardened materials recovery creep rate model, showing dependence on stress level

03 p0447 A69-13615

Point defects in body centered cubic transition metals, discussing thermal equilibrium, irradiation cold work, high and low temperature recovery, etc

03 p0447 A69-13817

Aging and recovery effect on structure and hardness of Ag and Be doped Al-Mg alloys

05 p0783 A69-16811

Deformation dependence on strain hardening and recovery rate during transient and steady state creep

06 p0943 A69-17236

Soft fiber reinforced plastics creep and recovery properties, discussing test equipment, rheological properties, polishing effects, etc

23 p4179 A69-42006

Material recovery from metabolic and other wastes for long duration manned space missions, discussing carbon dioxide removal, bioregenerative food systems, etc [AAS PAPER 69-143]

24 p4272 A69-42876

MATERIALS SCIENCE

Corrosion control, discussing corrosive concentration cells, coatings and sacrificial systems of protection, deep corrosion, corrosion augmented stress, forgings and titanium corrosion testing

01 p0093 A69-10148

Mechanical and thermodynamic theories of material behavior based on rate independence concept, discussing equivalence of various theories

01 p0166 A69-10227

Handbook on fatigue properties for product design covering metals stress conditions, machine parts load and stress determination, cyclic stress, etc

01 p0170 A69-10918

Cumulative damage theories application to fatigue data for high strength materials, discussing stress levels

04 p0668 A69-14379

Book on modern materials covering radiation processed wood plastic materials, industrial jewels, solid propellants, superconductors and beryllium

04 p0619 A69-14581

Method of finding new nonlinear optical materials using anharmonic oscillator model [IEEE PAPER F-5]

05 p0808 A69-16312

Cryogenic properties of polymers - NASA/Case Conference, Cleveland, April 1967

05 p0784 A69-16485

Manufacture and properties of carbonaceous materials for nuclear and aerospace technologies, discussing pyrolytic graphite, vitreous carbon and carbon fiber

05 p0786 A69-16657

Papers on materials research advances, Volume 3, covering continuum theory, fatigue hardening, crystal lattices, etc

06 p0944 A69-17501

Materials compatibility for space requirements, discussing shape retention, ductility, tensile strength, dissimilar materials stability, etc

06 p0945 A69-17872

Aerospace material investigation and fabrication techniques - Conference, Cocoa Beach, November 1968

09 p1504 A69-22301

Dielectric relaxation for analysis of defect structure, microstructure, surface behavior, structural changes kinetics and environmental effects in insulators and semiconductors

09 p1559 A69-22307

Thermodynamic properties of materials in critical region, discussing inhomogeneity

11 p2003 A69-25440

Astronautics - Conference, Braunschweig, West Germany, October 1968, Volume 3, Strength, material, methods of construction

12 p2176 A69-25850

Structures, structural dynamics and materials - AIAA-ASME Conference, New Orleans, April 1969

12 p2183 A69-26807

Spacecraft construction materials and strength problems including stress-strain determination, thin shell structural stability, dynamic loads, heat resistance, fiber-reinforced composites, ablation materials, etc

13 p2362 A69-27920

Sliding behavior of nonmetallic bearing materials /plastics, ceramics and cermets/, discussing non-lubricated bearing application

14 p2454 A69-28851

Civil aircraft projected development regarding materials and structures, discussing new components and fuel contribution to weight and metals and composites for replacing Al

16 p2872 A69-32024

Book on superconducting materials physical metallurgy covering fundamental theory, material properties, behavior regularities, applications, etc

16 p2802 A69-32051

Kim-Anderson flux flow theory for materials with kappa nearly equal to 1, discussing pinning forces and sites

17 p3016 A69-33754

Materials and processes for aerospace applications in 70s - Conference, Los Angeles, April-May 1969

19 p3315 A69-35501

Materials research - Conference, Kyoto, September 1968

Crack density effects on stress-dependent creep rate in isotropic and anisotropic materials undergoing high temperature creep deformation

Viscoelastic materials gradual resilience loss under tensile stress, discussing mathematical relations between stress, loading time, elastic deformation and experimental verification

Acoustic emission signals for nondestructive testing and material evaluation, determining critical stress intensity factor for stress corrosion cracking

Radio telescope structure material selection criteria, developing deformability criteria for structures under various stresses

Three dimensional X ray pictures of flaws shape and location in various materials

Carbon fiber reinforced materials applications in aerospace industry, discussing long term potential and applications in F-5 aircraft

Linear elastic isotropic materials for model tests, describing properties of material composed of Araldite B and air

Temperature, applied stress and pressurization effects on materials corrosion by liquid F and F containing oxidizers

Vacuum exposure nephelometer system for materials contamination screening in space applications

Materials research structural design cycle, discussing simultaneous optimization, constituent materials, fabrication process, load environment and mission constraints

Materials in space technology - Conference, Bristol, England, April 1969

Metallic and nonmetallic materials for space applications with launch and orbit condition requirements, examining finishes and lubricants

Aerospace pressure vessel materials selection and construction, applying Apollo program experience to future programs

MATERIALS TESTING REACTORS
U NUCLEAR RESEARCH AND TEST REACTORS

MATERIALS TESTS

Trailing camera technique to photograph impact and projectile penetration into earth materials from above and behind test vehicle

Technique for compressive mechanical behavior of viscoplastic nonlinear composites, discussing rate dependence and one dimensional stress-strain time properties

Evaporographic converter to test for striations /schlieren/ in materials used in IR

Optimization of plane smooth rectangular panels of constant cross section subjected to loading and heating conditions

Refractory metal, precious metal and ceramic material compatibility tested by metallography and by microprobing for protective coatings possibilities

Materials, processing and testing variables effects on mechanical properties determined for metal matrix composites [ASME PAPER 69-GT-23]

Tests and quality control equipment used in German aeronautical and astronautical industries

Material selection for structures under vibration loads, analyzing fatigue strength on basis of stress susceptibility and relationship with tensile strength

Structural reliability tests using photoelasticity and associated techniques, discussing computer methods, materials research, etc

Tires tested for road hazards, noting correlation to population density and rainfall

Impact hardness of materials determined by Drozd method of static hardness determination, noting tests on steel

Metal surface distribution of electromagnetic field from striding transducer in eddy current flow detection, calculating magnetic field component

Microcracking susceptibility studies of Inconel 718 weld heat affected zones, noting hot ductility, weld circle patch and fillerless fusion welding tests

Dielectric properties of high loss nonmagnetic microwave materials used for waveguide absorbers and anechoic chamber linings

Ablation characteristics of heat shield materials measured in arc heated wind tunnels, considering influence of model scale, heating rate and pressure level

Book on ultrasonic methods in solid state physics covering stress wave propagation in solids, pulse methods of velocity change and attenuation measurements and causes of losses

Epoxy adhesives physical chemistry, curing processes, formulation, surface application methods, testing and health hazards

Impact testing machine with dropping load, noting provision for sample fastening to reduce reflected tensile wave effect

IR techniques for nondestructive testing, discussing applications to heat injection and generation and IR test equipment capabilities

High temperature ultrasonic testing to measure and control solid materials early in processing

Book on ultrasonic testing of materials covering ultrasonics application to nondestructive testing, flaw detection and quality control

Blast response of model structures fabricated from material differing from prototype structures, testing in dynamic, impulsive and quasi-static loading realms

Ablative materials in hydrogen/oxygen thrust chamber using expansion nozzle to substitute regenerative thrust chamber assembly [AIAA PAPER 69-442]

Betatrions for nondestructive quality control for materials and products under special conditions

Thermoelectrical leg product specification /TELPS/ apparatus and data reduction technique for determining temperature dependent thermoelectric properties of material

Full circle Be brake disks in C-5 aircraft, discussing properties at elevated temperature and fastening of friction lining

Syntactic foam prepreg for low density laminate construction, presenting design and mechanical test data

Unfilled Pyrrone prepared from powder into molded parts for flexural tests at elevated temperatures observed for stability to electron irradiation in air

Materials evaluation for devices with long term underground exposure, including field tests at tropical locations

Nondestructive testing for aerospace corrosion, discussing light, penetrants, X rays, sound, ultrasounds, electrical conductivity, magnetic reaction and radiation backscatter methods

Sand crosion behavior of metals and plastics in air blast rig under varying exposure time, angles of impact and tensile stress

Soviet book on resistance of materials to deformation and fracture in complex stress states covering elasticity, mechanical theories of limiting stress state, experimental verification, etc

Structural ceramics and testing of brittle materials - U.S. Army Conference, Chicago, March 1967

Structural analysis and statistical fracture approach to design and testing for polycrystalline ceramic materials, including combined stress testing and load redistribution models

Mechanical testing procedures for brittle materials, discussing test philosophy, tabular data, laboratory tests correlation, etc

Parametric influence on strength of brittle materials, considering volume, surface, notch, strain rate, modulus variations and material variability effects

Brittle materials mechanical properties test programs design based on nature of material, use of data and available techniques

Elastomers for SST aircraft applications, discussing properties evaluation, material selection, scantal requirements, etc

Anaerobic adhesives for aircraft bonding tested for mechanical properties, noting advantages over epoxy adhesives

MATHEMATICAL ANALYSIS
U APPLICATIONS OF MATHEMATICS

MATHEMATICAL LOGIC
NT ALGORITHMS
NT BOOLEAN ALGEBRA
NT BOOLEAN FUNCTIONS
NT BOREL SETS
NT EQUIVALENCE
NT FORMULAS [MATHEMATICS]
NT LATTICES [MATHEMATICS]
NT SET THEORY
NT THRESHOLD LOGIC

Axiomatic explanation of complete self reproduction, noting logical mathematical biological reasoning and evolution theories

GO/NO/GO logic synthesis for probability functions development for systems operational readiness tests

MATHEMATICAL MODELS
NT DIGITAL SIMULATION
NT THOMAS-FERMI MODEL

Modified admittance yielding Kubo admittance at nonzero frequencies, discussing transformation of correlations of Ising model

Generalized plane stress concept extended for mathematical model to study out of plane displacement restraint in thin plates

Output p-channel MOS transistor selection tree for display and information storage systems

Exponential distributions in Markov chain models for communication channels, considering error free runs of tropospheric systems

Equation of characteristic functional for Burgers one dimensional model fluid turbulence using logarithmic expansion method, discussing change in time of energy spectrum

Mathematically stylized simple systems representing systems with functional law varying as function of acquired experience

Difference methods in solution of incorrect Cauchy problem simulating ideal gas flow in nozzle

Spiral structure of cloudiness in occluded cyclones studied by mathematical model based on meteorological satellite photographs [UN PAPER 68-95429]

CRT method of processing contoured data from hemispheric and global numerical models simulating general atmospheric circulation

Radiation models using discrete radiator ensembles having applications to analysis of forward and backscatter from rough surfaces, clutter and chaff models, etc

Optimal predictor design by comparison of statistical input models, measuring signal filter performance by root-mean-squared errors

Multiple configuration analysis of structures systematically predicting static and dynamic response of structures of single configuration class

MATHEMATICAL MODELS

Mathematical model constructed for behavior of multicomponent system subject to cannibalization
01 p0086 A69-10651

Digital simulation models for continuous systems determined by direct search minimization
01 p0036 A69-10706

Two dimensional structural model of micropolar continuum involving orientable points joined by extensible and flexible rods
01 p0169 A69-10810

Simultaneous estimation of parameters in multiple equation regression model arising from radioactive tracer experiments using compartmental models
01 p0106 A69-10926

Nonlinear buckling analyzed by mathematical models and computational procedures using organized matrix approach to structural analysis based upon finite element
01 p0171 A69-10964

Tracking radar glint analysis model using diffraction theory to evaluate parameters of fields received from scattering centers on target aircraft
01 p0033 A69-11007

Model describing outflow of cryogenic propellant tank pressurized by pressurizing gas, predicting pressurant mass, gas and wall temperature distribution, inlet flow rate, etc
01 p0163 A69-11147

Mathematical models of energy and mass transfer processes in closed loop multicomponent life support systems
01 p0021 A69-11316

MHD waves and toroidal mode existence by mathematical approximation
02 p0236 A69-11430

Lunar electrical parameters range determination using models [AAS PAPER 68-199]
02 p0312 A69-11477

Mathematical simulation of temperature and humidity changes in compartments of hermetically sealed space vehicle cabins
02 p0200 A69-11489

Mathematical models for Chlorella cell and biomass growth under illumination during space flight, noting ionizing radiation presence
02 p0198 A69-11508

Bayesian method for optimizing controlled plant characteristics using self adaptive model
02 p0223 A69-11566

Magnetosphere boundary determined in two dipole model approximation, taking into account current layer in tail
02 p0236 A69-11655

Data acquisition program for Apollo crew motion disturbances experiment consisting of ground simulations and orbital experiment establishing mathematical model of human body
02 p0201 A69-11759

Singular perturbation method for reducing order of mathematical models in optimal sensitivity control problems
02 p0224 A69-11967

Model for asymptotic separated flow in wake behind broadside of bluff body, discussing separation point, interaction, reattachment, base flow and near wake
02 p0188 A69-11986

Seismic wave generation, propagation, dispersion and attenuation in gravitating sphere having homogeneous elastic mantle and liquid core, giving theoretical seismograms
02 p0243 A69-12010

Metal fatigue crack propagation mechanism, deriving basic laws for failure in high and low stress regions, determining material parameters
02 p0340 A69-12025

Model for fast randomization of electron gas by trapped electroacoustical waves
02 p0289 A69-12236

Numerical solution on UNIVAC 1107 for model describing symmetrical gravitational collision of two four body systems
02 p0322 A69-12269

Collisionless computer model performing gravitational experiments with two dimensional galaxy
02 p0322 A69-12271

Computer study of collisionless self gravitating system using two dimensional model, obtaining gravitational field by solving Poisson equation
02 p0322 A69-12272

Space-station-centrifuge configuration dynamic stability exhibiting instabilities at lower and higher centrifuge rotational speeds [AIAA PAPER 68-142]
02 p0334 A69-12373

Probabilistic model for scattering function to solve radiative transfer problems in externally illuminated spherical shell atmosphere with perfectly absorbing core
02 p0328 A69-12751

Ultrahigh energy interactions working model, suggesting interpretation of cosmic ray experimental data on basis of Aleph plus Pionization model
03 p0499 A69-12945

Semiconductor nonlinear electron polarizability, using model to obtain correct order of magnitudes
03 p0483 A69-13035

Mathematical modeling of gyro drift rate in inertial navigation based on stationary and nonstationary time series analysis
03 p0463 A69-13213

Mathematical dipole model for geomagnetic field to provide main magnetic field source distribution within earth
03 p0424 A69-13543

Mathematical models to investigate transient plane bending wave propagation in elastic plates, using elasticity and plate theories
03 p0525 A69-13606

Long period variations in zonally symmetric circulations of tropical stratosphere, using zonally averaged momentum, continuity and heat and heat energy equations for numerical model
03 p0461 A69-13681

Two band model for determining linear and nonlinear electromagnetic responses of small band gap semiconductors in magnetic field
03 p0487 A69-13753

Lenz-Ising model of ferromagnetism noting mathematical methods used to investigate model properties
03 p0488 A69-13785

Tactical aspects of pursuit and evasion, emphasizing analysis of conceptual framework and construction of analytic models
03 p0457 A69-13898

Mathematical model derivation for observed atmospheric tide phenomena, taking into account thermal and other effects
03 p0426 A69-14098

Air traffic prediction based on mathematical econometric methods
03 p0536 A69-14105

Book on nonlinear programming covering models for weapon systems assignment, alkylation process optimization, chemical equilibrium, launch vehicle design, etc
04 p0621 A69-14362

Model for predicting characteristics of short duration intense microwave pulse propagating in heated high temperature air
04 p0634 A69-14453

Optimal control of linear stochastic systems using noise measurement data mathematical model
04 p0581 A69-14569

Thin shells deformations described by finite element model accounting for transverse shear deformations
04 p0674 A69-14588

Mathematical density-depth model proposed for lunar outermost layer compared to Matveev model, noting Surveyor estimates
04 p0655 A69-14659

Mathematical modeling of Gaussian and non-Gaussian processes obtained by linear and nonlinear transformations of white Gaussian noise, noting Markov processes
04 p0623 A69-14694

Perturbation behavior of solid propellant combustion, discussing relevance of analytical models and use of qualitative models
04 p0685 A69-14726

Predictive model for risk in technological research and development
04 p0689 A69-14980

Gaussian channels capacity, studying supremum of information transmission rates with small error probability
04 p0558 A69-15006

Interaction of gas atoms with solid surface, giving mathematical model assumptions
04 p0632 A69-15008

Kinetic model equation for electron plasma incorporating collision terms for model scattering
04 p0636 A69-15042

Properties and methods of generation of pseudorandom binary signals, developing linear modeling for multivariable systems
04 p0583 A69-15113

Flux equivalences of reflected and transmitted radiation among Rayleigh, isotropic and other scattering models
04 p0687 A69-15281

Domestic satellite communication system model for greatest possible amount of traffic using Saturn 5 propulsion systems, multibeam antennas, synchronous repeater platforms, etc
04 p0561 A69-15447

Mathematical models relating gain, cost, diameter, frequency and rms surface tolerance of ground antennas for exposed and radome enclosed parabolic reflectors
04 p0561 A69-15449

Laminar flow of nonNewtonian fluids described via rheological three parameter model
05 p0744 A69-15678

Mathematical theory for describing mechanical behavior of continuous media based on principle of determinism for stress
05 p0833 A69-15729

Mathematical theory for describing geometric structure of simple bodies, discussing dislocation distribution and exact field equations for elastic bodies motion
05 p0834 A69-15731

Models of continuous media with internal degrees of freedom based on Lagrangian variational principle
05 p0793 A69-15775

Factor analysis applied to identifying extremal plants, presenting regression analysis based on least squares techniques to calculate mathematical model coefficients
05 p0737 A69-15888

Collection of papers on computerized simulation covering dynamic modeling of ideas and systems
05 p0724 A69-16467

Mathematical model simulation of structures using building block approach
05 p0842 A69-16471

Ionizing radiation effects in microcircuits, using lumped model technique to derive mathematical model from electronic characteristics and boundary values of each semiconductor
06 p0977 A69-16886

Models to predict transient radiation responses in microcircuits, discussing model accuracy for junction and dielectrically isolated circuits
06 p0977 A69-16887

Laser Doppler meter model interpreting output frequency in terms of particle crossing set of fringes
06 p0932 A69-16927

Intervalley scattering model for Gunn domain dynamics, noting effects comparable to diffusion
06 p0893 A69-16937

Cosmic ray propagation model, considering determination of He interstellar spectrum and amount of matter traversed at low energies
06 p0988 A69-17270

Adaptive modeler to estimate state and future trajectory of unknown plant having automatically synthesized control
06 p0900 A69-17353

On-line optimization of stochastic control systems based on learning controller model, discussing computer simulation results
06 p0900 A69-17354

Mathematical description of electromagnetic field containing plasma, discussing energy transfer modes between plasma and containing field
06 p0965 A69-17517

Mathematical theory of electromagnetic induction for spherical model of earth with conductivity distribution given by sine function
06 p0921 A69-17739

Dermal injury predictability for exposure to thermal radiation based on mathematical model using temperature-time histories
06 p0875 A69-17840

Nonsteady combustion models for gases, liquid fuels and solid propellants, reviewing errors in physics and mathematics [AIAA PAPER 69-178]
06 p1037 A69-18100

Mathematical model for flow within external target type thrust reverser, assuming inviscid incompressible two dimensional flow [AIAA PAPER 69-3]
06 p0985 A69-18124

Model for spectral bidirectional reflectance of rough surface producing good agreement with experimental data [AIAA PAPER 69-64]
06 p0959 A69-18125

Analytical model developed from turbulent shear flow study, discussing Reynolds number effect [AIAA PAPER 69-163]
06 p0914 A69-18139

Computer model for n-p-n transistor in integrated circuit using substrate p-n junction isolation
07 p1114 A69-18246

Explorer 40 satellite mathematical model and verification testing for close spacecraft flight temperature predictions
[SAE PAPER 690202] 07 p1239 A69-18305

Thermally excited oscillation experienced by OGO 4 boom antenna demonstrated by mathematical model, showing nonplanar coupled bending-torsion oscillation by solar radiation
07 p1227 A69-18333

Ignition pressure transient for solid propellant rockets predicted by computer program
[WSCI PAPER 68-35] 07 p1203 A69-18352

Empirical and analytic modeling of propellant role in ignition, discussing ignition transient prediction to describe propellant ignitability characteristics
[WSCI PAPER 68-34] 07 p1202 A69-18364

Analytical model for thrust-time curve during ignition transient of solid propellant rocket engines, discussing flame spreading
[WSCI PAPER 68-33] 07 p1203 A69-18365

Nondemographic model predicting market shares of V/STOL aircraft in competition with automobiles and conventional airliners for short haul intercity business travel markets
07 p1244 A69-18967

Spatially nonuniform laser model allowing for photon density and inversion variations, noting self Q switching mechanisms from stimulated scattering processes
[IEEE PAPER Q-6] 07 p1154 A69-19078

Statistical analysis of cascade of bandpass limiter, ideal phase detector and video filter for mathematical modeling of coherent communication systems
07 p1084 A69-19147

Analytical model of spoiler generated sound in jet pipe, presenting data on level, spectrum and directivity of sound
07 p1183 A69-19462

Mathematical model of radar display, considering radar construction tube resolution, environment and eye perception parameters
07 p1136 A69-19504

Lifting rotor blades flapping response to atmospheric turbulence, discussing time averaging and perturbation schemes
[AIAA PAPER 69-206] 07 p1057 A69-19577

Mathematical models of crack propagation in solids noting similarity for equilibrium crack length
07 p1238 A69-19692

Viscoelastic rod model of human spine subjected to accelerations
07 p1072 A69-19725

Interaction between atom and plane monochromatic traveling wave taking into account pressure effect occurring in strong collision model
08 p1354 A69-19954

Linville model for describing elementary phenomena of electronic equipment in terms of physical data applied to irradiated semiconductor diode and transistor
08 p1280 A69-19974

Controlled charge models for computer calculation of electronic circuits, discussing tunnel diode static characteristics and equivalent transistor circuits
08 p1280 A69-19975

Distributed type bipolar transistor model construction, considering methods of development and computer tests for transient conditions
08 p1280 A69-19976

Vector equation of transfer for planetary atmosphere describing light scattering by anisotropic particles and analysis of resonance line scattering
08 p1385 A69-20063

Organization behavior models compared in theory of scientific and professional personnel management, noting compromise between excess restrictions and freedom
[AIAA PAPER 68-805] 08 p1422 A69-20196

Adaptation process of management systems from point of view of control system philosophy
[AIAA PAPER 68-807] 08 p1422 A69-20197

Iterative methods for composite layer slabs transport models, using invariant imbedding approach to transport theory
08 p1343 A69-20353

Electrochemical kinetic and mass transport model for studying stress corrosion crack propagation in Ti
[ECS PAPER 147] 08 p1332 A69-20359

Tuning design optimization of single circuit LF automatic control systems, using transfer functions and phase amplitude graphs
08 p1297 A69-20418

Dynamics and instability of multilayered systems models in field of gravity, noting isostatic adjustment of layered globe
08 p1309 A69-20578

Monograph on mathematical model for aircraft separation in air traffic safety control, analyzing aircraft motions and collision avoidance
08 p1347 A69-20712

Vortex valves and amplifiers small signal analysis using mathematical model to describe quantitative effects of vortex parameter changes
[AGARDOGRAPH-118] 08 p1257 A69-20953

Mission model construction for power limited systems, discussing flight concepts, propulsion mixes and electric propulsion
09 p1584 A69-21205

Mathematical models for outgoing traffic flow in airport terminal used for determining service requirements
09 p1476 A69-21439

Theoretical models describing quasi-stellar objects and radio galaxies, noting objects locality, semilocality and cosmological distances
09 p1594 A69-21693

Local axial voltage variation from one dimensional model applied to solve thermionic boundary conditions in two dimensional thermal analysis of converter
09 p1440 A69-21834

Mathematical model for improving statistical approximation convergence and accuracy in estimating structural components parameters
09 p1461 A69-21857

Bayesian reliability growth model with random variable parameters, discussing multimode failures
09 p1504 A69-21912

Computer study of analytical model of boundary layer transition from laminar to turbulent flow
[AIAA PAPER 68-38] 09 p1482 A69-21945

Single sideband modulation theory explained by sum representation of sampling theorem, comparing different signal generating methods
09 p1456 A69-22290

Deterministic model for cost effectiveness of avionics support programs based on subsystems support ability, test philosophy and test equipment design and manufacture
[AIAA PAPER 69-305] 09 p1478 A69-22377

Kalman filter with delayed states as observables, discussing extra computer effort and modeling technique
09 p1473 A69-22438

Mathematical model, analog computer simulation and information comparison of closed Brayton cycle systems for power conversion
[ASME PAPER 69-GT-50] 09 p1442 A69-22479

Mathematical, physical and physiological modeling for analysis of functional changes during varying gravity conditions
09 p1444 A69-22541

Radio signal reflection from objects of complex configurations by statistical model
09 p1460 A69-22662

Nonlinear control plants model with pure delay effect identified by harmonic balance method
09 p1475 A69-22669

Elasticity theory upper and lower bounds for two and three dimensional inhomogeneous problems and applications to plates
10 p1794 A69-22889

Turbulent transport processes mathematical model, determining upper and lower bounds
10 p1677 A69-22895

Model explaining intergranular crack initiation parallel to pulling axis in samples of spun beryllium broken under pressure
10 p1708 A69-22996

Electrical conductivity, electron density and population temperature as functions of current density in Cs-Hc thermal plasma studied with nonequilibrium ionization model
10 p1732 A69-23443

Mathematical model of closed biological cycle regenerating part of life support products, incorporating astronaut, storage and regenerating waste disposal units
10 p1649 A69-23580

Book on rocket propellants covering propulsion fundamentals, liquid, solid and hybrid propellants properties, performance calculations, rocket technology, etc
10 p1752 A69-23806

Human pilot adaptation in simulated multiloop VTOL hovering task with series loop closure model
10 p1650 A69-23878

Programmed search and gradient search methods for determination of sampling intervals in synthesis of sampled data models of human operators
10 p1650 A69-23881

Probability models used in statistical approach to fracture mechanics, noting role of weakest link model in representing brittle fracture
11 p1975 A69-24673

Constraint theory for analysis of mathematical models to alleviate software problems associated with simulation of complex large scale systems
11 p1858 A69-24936

Einstein field equations solutions for homogeneous cosmological models, assuming perfect fluid gravitation source and existence of simply transitive surface motions
11 p1919 A69-25245

Optimal control theory for systems modeled by ordinary differential equations, considering delay in control action
11 p1860 A69-25447

Modeling errors in linear discrete stochastic system effects on Kalman filter state estimates
11 p1860 A69-25448

Mathematical model for initial conditions of asymptotically stable nonlinear control system to estimate region of acceptable motions
11 p1861 A69-25453

Mathematical model with straight wake airfoil to determine aerodynamic forces on oscillating rotor blades in hovering flight
11 p1821 A69-25514

Aircraft stability derivatives determined by adaptive method, emphasizing physical and mathematical characteristics of learning model
11 p1824 A69-25671

Streamer based on model of perfectly conducting plasma produced on boundaries by entering and departing electrons, discussing streamer thickness and propagation velocity
11 p1935 A69-25759

Optimum nonstationary Gaussian signals estimation in presence of noise, generalizing Wiener stationary processes filtering theory
12 p2029 A69-26202

Detection of known signals in general noise, describing sufficient conditions for singular detection and estimation
12 p2029 A69-26203

Gallium arsenide junction laser resonant modes from theoretical model, calculating frequency separation
12 p2108 A69-26637

Mathematically stylized simple systems representing systems with functional law varying as function of acquired experience
12 p2054 A69-26670

Difference methods in solution of incorrect Cauchy problem simulating ideal gas flow in nozzle
12 p2012 A69-26671

Model, assuming electron thermal conductivity contribution, applied to studying solar plasma discharge characteristics in presence of three dimensional thermal sources in solar corona
12 p2149 A69-26680

Geomagnetic field dipole model by extrapolating vertical Z component for 1955 to heights between 500 and 25,000 km
12 p2071 A69-26695

Adaptive pattern recognition system simulated and tested with agricultural radar images, describing predictive environmental model mathematically
12 p2097 A69-26990

Human operator as servo system element of subassemblies in tracking and equilibrium tasks, stressing results of electromyographic analysis
12 p2025 A69-27081

Man machine model for prediction of human control behavior, generating model from analysis of helicopter pilot tasks
12 p2025 A69-27082

Model for temporal structure of human behavior from analysis of temporal information treatment in subjective synchronization task
12 p2025 A69-27084

Mathematical models of human performance in man machine systems, discussing operations research, maintainability and real time computer simulation for command and control systems
12 p2025 A69-27085

Models for cognitive behavior and psychomotor behavior for maintenance tasks
12 p2025 A69-27086

Abrasive wear model leading to abrasive wear equation and empirical findings on relative abrasive wear resistances 13 p2265 A69-27233

Mathematical relations presented for parameters of technological, transport and information systems reliability and life expectancy 13 p2268 A69-27436

Photometric data and law of rotation in symmetry plane for constructing mathematical model of mass and luminosity distribution in M 31 13 p2351 A69-28770

Theoretical model of homogeneous solid propellant ignition in neutral nonflow environment, discussing ignition time 13 p2324 A69-28218

Maxwellian velocity distributions simulated in one, two and three dimensions by superposition of N monoenergetic isotropic distributions, noting application to kinetic theory computation 13 p2313 A69-28222

Mathematical models for ballistic limit of single and double wall structures, yielding equations for relation to projectile and target characteristics [AIAA PAPER 69-370] 13 p2367 A69-28302

Nuclear emulsion high energy nucleon-nuclei interaction model accounting for two maxima track formation 13 p2303 A69-28371

Four dimensional momenta transfer during high energy cosmic ray particle collisions, comparing various collision models 13 p2330 A69-28375

Stable homogeneous combustion of condensed substances (CS), systematizing and analyzing elementary CS combustion models 13 p2379 A69-28454

Phenomenological macrorheology, discussing mechanical models designed for studying relation between stresses and strains in materials 13 p2369 A69-28562

Magnetosphere boundary determined in two dipole model approximation, taking into account current layer in tail 13 p2256 A69-28686

Model equation for Reynolds stress in turbulent two dimensional shear flow 14 p2428 A69-29000

Deterministic economic mathematical models for optimum airline networks, considering transportation cost 14 p2540 A69-29141

Thermionic converter components reliability under mechanical load and failure models, showing probabilistic nature of failures 14 p2400 A69-29227

Mathematical model of mechanical wear in surface friction based on approximation of cross section profiles, using Fokker-Planck equation for distribution function 14 p2455 A69-29331

Machine vibration effects on human operator performance using locomotor model 14 p2409 A69-29742

Binary encounter model for ionization by charged particle impact modified to evaluate cross section for ionization of positive ions by electron impact 14 p2489 A69-29996

PCM oscillator synchronization system stability, considering sampled model by digital nature of equipment 15 p2565 A69-30171

Electronic analog model for differential equations of equilibrium of gaseous combustion products based on asymptotic stability 15 p2717 A69-30862

Dynamic characteristics of model of spacecraft-astronaut-tether system during approach, deriving kinetic potential 15 p2696 A69-31064

Mathematical model for money expenditure on product oriented research programs, based on accumulated profits 15 p2721 A69-31068

Unknown channels classes epsilon capacity applied to estimating capacity of channels with additive noise, discussing models and upper and lower bounds 15 p2570 A69-31142

Metal oxide semiconductor structural model usefulness in understanding behavior near transition region, discussing surface inversion layer properties, surface mobility theory, etc 16 p2757 A69-31612

Time and space on-line simulation of analog, digital and hybrid block diagram systems 16 p2755 A69-31709

Mechanical systems modeling modification to include mobile coordinates, introducing gyroscopic and pseudogyroscopic terms into motion equations 16 p2875 A69-32246

Soviet book on nervous mechanisms of vestibular reactions emphasizing mathematical description of operation, neurohythmic changes in cerebellar cortex and oculomotor activity modeling 16 p2746 A69-32605

Hazards model for probabilistic prediction of casualties by exploding solid propellant rockets, deriving casualty expectation equation [AIAA PAPER 69-461] 16 p2869 A69-32749

Finite resolution effect on solar granulation simulated by numerical experiments using two dimensional smeared pattern 17 p3029 A69-33046

Planetary zonal flows hydrodynamic instability characteristics analysis, using quasi-geostrophic numerical model to study earth atmospheric cyclone wave role 17 p2960 A69-33149

Satellites and space vehicles attitude control mathematical model accounting for nonrigidity, sloshing and energy dissipation in vehicle interior 17 p3048 A69-33239

Radiant heat transfer predictions between isothermal plates based on diffuse plus specular directional property model 17 p3070 A69-33259

Mathematical model for determining time dependent terrain surface temperatures and radiances, considering radiative transfer convection, evaporation, ground vegetation temperature, etc [AIAA PAPER 69-592] 17 p3071 A69-33263

Rotary wing aircraft height-velocity testing, analyzing engine-out landing by combining flight tests with mathematical simulation model [AHS PAPER 353] 17 p2900 A69-33524

Finite difference schemes for barotropic fluid free surface model primitive equations tested for numerical integration stability and accuracy 17 p2997 A69-33691

Closed compartment fire mathematical model to analyze combustion parameter effects, atmosphere pressure and temperature during fire [AIAA PAPER 69-618] 17 p3074 A69-33704

Model calculations for movement of barotropic and initially symmetric vortices in rotating fluids with Coriolis parameter or fluid depth varying horizontally 17 p3000 A69-33761

Mathematical model of fields reradiated by Huygen sources in front of array for glide path site analysis 17 p3003 A69-34107

Mathematical model for aircraft antenna to antenna electromagnetic interference analysis, emphasizing techniques for propagation paths and shading factors 17 p2943 A69-34134

Torkington progressive rigidity model with successive minimum requirements relation to diagonal matrix elements of molecular force constants 17 p3068 A69-34230

Saturn 5 system simulation showing feasibility, efficiency and economy of real time simulation using large mathematical model and general purpose digital computer 18 p3113 A69-34268

Structural members stability mathematical models using lumped bars and springs simulating postbuckling behavior 18 p3211 A69-34342

High speed ball bearing skidding, proposing analytic model as design tool, discussing effects of thrust load, speed, oil temperature and flow rate [ASME PAPER 69-LUBS-20] 18 p3140 A69-34377

Mathematical model for operational readiness of dormant systems /periodically checked missiles/, discussing time distribution to failure detection, occurrence and between tests 18 p3142 A69-34477

Human performance reliability, testing mathematical model application and implications of time to first error concept by vigilance task 18 p3097 A69-34478

Mathematical index model based on weighted factor analysis to facilitate management and technical decisions concerning achievement of numerous tasks with fixed funds 18 p3232 A69-34504

Mathematical model of yielding of adhesive bonds in form of viscous threads between elastic bodies, obtaining solution to two dimensional problem 18 p3215 A69-34569

Rarefied gases transfer coefficients stochastic process calculation models, comparing results with correlation functions derived from transport equation 18 p3121 A69-34710

Local radiation characteristics calculation method, consisting of reducing integral equations to linear algebraic equations, applied to solve radiative heat exchange problems 18 p3229 A69-34713

Statistical model for coherent functions obtained from laser equation, showing amplitude and frequency coupling of radiation fluctuations 18 p3152 A69-34820

Stochastic meteorological models based upon presence of weather regimes, illustrating association with statistical inference problems 18 p3166 A69-34822

Models of continuous media with internal degrees of freedom based on Lagrangian variational principle 18 p3173 A69-35028

Stochastic failure models based on stress peak distributions, including randomly deteriorating strength model and increasing hazard reliability functions 18 p3148 A69-35079

Expected occurrences mathematical model for flight system availability under uncertainty 18 p3210 A69-35083

Four terminal silicon planar p-n-p-n model operating as semiconductor small signal linear tetrode amplifier, discussing properties and mathematical models 18 p3109 A69-35293

Hydrodynamics of gas flow due to solar flares using point explosion model, determining shock wave travel time to earth orbit 18 p3189 A69-35397

Parameters distinguishing analytic queuing models of time sharing algorithms, emphasizing techniques used for analyzing round-robin and multiple level queuing models 19 p3279 A69-35600

Shadow effects on current-voltage characteristics of solar cell array circuits, developing mathematical models 19 p3254 A69-35709

Mathematical basis for human operators purposeful behavior in complex systems control situation requiring decision reaching 19 p3260 A69-35895

Kinetic model and steepest descent method to optimize one dimensional combustor [AIAA PAPER 68-644] 19 p3448 A69-35943

Cost model to trade off competing systems designs for space communications, navigation, operational availability and ballistic missile defense 19 p3454 A69-36007

Partial prior information utilization via confidence intervals for mean time to failure of exponential reliability model 19 p3360 A69-36038

Mathematical model of CW ring laser mode coupling in limits of low excitation 19 p3334 A69-36047

Modified Monte Carlo model applied to computerized meteoric orbit evolution, simulating secular perturbations by imposing sinusoidal variation on orbital elements 19 p3414 A69-36117

Wall boundary condition model modification applied to molecular beam-solid surface scattering, noting qualitative agreement with observed distributions 19 p3377 A69-36179

Geometrical model for surface contact area, noting influence of nonlimitations on friction coefficient in elastic deformation 19 p3329 A69-36494

Numerical simulation of macrophysical and microphysical processes in convective cloud, including cloud geometry and equations describing dry and moist phases 19 p3362 A69-36497

Finite difference scheme for primitive equation model, emphasizing two grid internal noise suppression to improve gradient force expression accuracy 19 p3364 A69-36507

Adaptive predicting filter mathematical model based on information probability, using adaptive systems latent memory 19 p3287 A69-36665

Electric models optimization for heat exchange systems based on mathematical similarity between equations describing temperature and electrical potential fields 19 p3256 A69-36717

Graphical representation of friction stresses produced on mechanical parts surface layers, using mathematical model based on Poisson ratio and friction coefficient

19 p3329 A69-36723

Linearized wave propagation digital simulation models to predict arterial blood flow characteristics and impedance, comparing phase velocity and transmission per wavelength

19 p3264 A69-36868

Stochastic model for estimating manufacturing costs, discussing Mellin and Laplace transforms and Gram-Charlier series approximations

20 p3633 A69-36924

Multilevel mathematical model of oculomotor apparatus using neuron networks and complex activators, including computer analysis

20 p3470 A69-37245

Mechanical loss factors calculated by approximation formula from resonance curves of Voigt-Kelvin and Maxwell models

20 p3623 A69-37435

Mathematical model of nonlinear microwave breakdown for overdense and underdense plasma outside reentry vehicle, predicting nonlinear pulse transmission through high temperature plasma

20 p3495 A69-37853

Model predicting steady state input-output characteristics of vortex amplifiers operating in incompressible flow regime, correlating model with experimental data [ASME PAPER 69-FLCS-20]

20 p3465 A69-37980

Mathematical models and solution techniques for calculating optimal elastoplastic structures by computer, discussing methods for displacements preceding plastic failure

21 p3831 A69-38414

Book on mathematical model for heat and material exchange in bubbles covering bubble formation, transition period and quasi-stationary bubble rise

21 p3847 A69-38448

Book on mathematical foundations of systems analysis covering calculus, linear algebra, linear and nonlinear programming and major applications

21 p3754 A69-38576

Random variable used as model for unknown parameter in linear system, describing orthonormal expansion for evaluating mean-integral-squared error

21 p3685 A69-38727

Mathematical models of human vestibular system for dynamic space orientation, using control theory

21 p3662 A69-38728

One dimensional model and equation of energy spectrum function solved in studying turbulent diffusion in fluid at rest

21 p3693 A69-38749

Mathematical model of probability of errorless human performance for time continuous tasks for use in systems reliability analysis

21 p3664 A69-38971

Model of isotropic polycrystal generalized to composite materials including mechanical mixtures, calculating macroscopic constants in heat conduction, diffusion and elasticity

21 p3752 A69-39193

Mathematical model for determining trusted interplanetary spacecraft orbit, considering time history of position, velocity and thrust acceleration [AIAA PAPER 69-901]

21 p3806 A69-39335

Gyro drift rate mathematical modeling based on stationary and nonstationary time series analysis techniques with random process reduction to white noise residuals [AIAA PAPER 69-838]

21 p3761 A69-39369

Model performance index /PI/ providing criterion for approximating one dynamic flight control system by another based on geometrical representation of linear autonomous systems [AIAA PAPER 69-885]

21 p3764 A69-39410

Soviet monograph on mathematical methods of optimal control, discussing models and synthesis of optimal quick response systems by Pontryagin principle

21 p3757 A69-39524

Condensation dynamics of atom by solid body model consisting of one dimensional chain of harmonic oscillators

21 p3775 A69-39557

Mathematical model of astronaut motion and spacecraft angular control during tethered reentry, discussing conditions preventing spinning and collisions

21 p3667 A69-39630

Mathematical modeling techniques applied to thermoclastic cooling for plate without clamping and

mechanical loads, examining integrator schematic diagram

21 p3680 A69-39851

Homogeneous dynamo in cylindrically symmetric volume with symmetrically moving fluid and large magnetic Reynolds number, demonstrating first and second approximations using Braginskii method

22 p3989 A69-40192

Steady state mathematical modeling of light field structure for narrow collimated light beams propagating in artificial dispersive media

22 p3981 A69-40245

Algorithm for numerical modeling by Monte Carlo method of diffusion bounded light beams in dispersive media, applying to light pulse in cloudlike medium

22 p3981 A69-40248

Mathematical model of optimal partially closed life support system consisting of man, recycling unit, storage unit and waste disposal outlet

22 p3892 A69-40272

Mathematical models for describing visual perception of distance to ground during VTOL landing and takeoff

22 p3892 A69-40282

Natural torsional-flexural vibrations of bars with single symmetry, using matrix equations of equilibrium, displacements and natural coupled vibrations

22 p4043 A69-40456

Time dependent mathematical double acceptor model including heat effects for analyzing Q switching and stimulated emission time delays in pulsed junction lasers

22 p3962 A69-40560

Reliability engineering application to aircraft safety, considering mathematical models involving safety, human errors and accident causes

22 p3867 A69-41129

Human vision mathematical simulation, relating optical input signal parameters to corresponding visual impression

23 p4109 A69-41978

Human hearing and vision mathematical simulation, relating signal perception parameters to corresponding adaptation processes

23 p4109 A69-41979

Mathematical model for information processing of biological memory as cybernetic system

23 p4110 A69-41982

Dynamic reactions of mathematical model representing vision and hearing process adaptation

23 p4110 A69-41984

Mathematical model construction to simulate light adaptation in human vision based on Maxwell disk experimental results

23 p4110 A69-41985

Teleological systems behavior modeling based on input, output, goals, operation duration, etc

23 p4134 A69-42059

ASTRA /advanced structural analyzer/ based on stiffness approach to finite element method, generating mathematical model for stresses and deflections

23 p4232 A69-42144

Interference prediction models of equipment emissions and susceptibility thresholds based on limited spectrum signature data

23 p4126 A69-42223

Controlled plant in n dimensional Euclidean space, analyzing optimal trajectory using integral equations

23 p4183 A69-42472

Compartmental models for radioactive tracer experiments with known tracer material amount, using generalized Spearman simultaneous estimation procedure

24 p4339 A69-42765

Air traffic growth forecasting, describing various mathematical econometric models [AAS PAPER 69-329]

24 p4417 A69-42807

Decision process model for man-machine decision task structuring by system designers

24 p4274 A69-43018

Solar wind collisionless hydromagnetic flow interaction with planetary atmosphere, using mathematical model to determine bow shock position limits in atmosphere

24 p4368 A69-43178

Mathematical input-output model for vestibular system, relating linear and angular motions to non-visual perception of orientation, motion and nystagmus for physiological characteristics

24 p4276 A69-43274

Time-invariant multivariable linear systems, discussing structure theorem for controllable systems and application to decoupling problem

24 p4294 A69-43314

Geomagnetic zenith calculation at given point based on geomagnetic field model, using polynomial development

24 p4311 A69-43505

Stagnation region heat transfer with nongray gas subjected to external radiation using two step continuum absorption coefficient model

24 p4415 A69-43590

Shock formation mechanism in simple shock tube using multistage modification of White model, deriving variation of shock Mach number

24 p4305 A69-43631

MATHEMATICAL STATISTICS

U STATISTICAL ANALYSIS

MATHEMATICAL TABLES

Tabulation of high accuracy gamma function values for some rational arguments, noting applications to Gaussian quadrature formulas, fractional Bessel functions and Airy functions

03 p0455 A69-13375

Soviet book of statistical and mathematical tables for calculation, analysis and control of reliability

04 p0608 A69-15540

Stability derivative estimation at subsonic speeds for preliminary design engineer

05 p0700 A69-15545

Mathematical formulation of Noy tables, noting more efficient programming and minimal disagreement with original tables

08 p1266 A69-20403

Data interpretation, discussing correlation describing effectiveness of independent variable and table giving values directly from sample size, t, z, F and chi square values

10 p1669 A69-23040

Table of definite and indefinite integrals of products of exponential integrals with elementary or transcendental functions

24 p4341 A69-43324

MATHEMATICS

Latvian yearbook on mathematics covering rectangular thermal problems, second order systems, metric theory and nonlinear oscillatory systems

03 p0468 A69-13862

Physics, mathematics, mechanics - Conference Moscow, December 1964

13 p2300 A69-28430

MATHIEU FUNCTION

Mathieu equation with square law damping effect on first order instability range

10 p1724 A69-22920

Differential equations application to electrical circuit problems, solving voltage for series LCR networks and transforming Mathieu into Hill equation

12 p2052 A69-26351

Nonlinear time varying feedback control system stability applied to damped Mathieu equation

23 p4146 A69-42473

MATRICES [CIRCUITS]

Wideband hybrid junctions synthesis from given parameters, suggesting matrix representation of ring circuits

01 p0043 A69-10593

Electronic beam-rotation systems operation using matrix network to feed circular arrays, noting applicability to direction finding or radar systems

08 p1288 A69-20964

Algorithms in electronic circuit analysis, establishing algebraic and topological analogs based on generation of fundamental relations

09 p1472 A69-21777

Thermionic converters with matrix circuit connections, considering current flow patterns in matrices to evaluate electrical failure spreading

14 p2400 A69-29225

Algorithm for enumerating all circuits of linear graph, noting suitability for computerization without large computer memory

14 p2421 A69-29541

Topological circuit analysis by digital computer, using conductivity matrix determinant in form of sum of trees

15 p2582 A69-30112

Lumped and distributed parameter systems, discussing transfer matrix elements, connecting lines, etc

15 p2582 A69-30319

Memory matrices sensitivity to laser beams with various emission power densities, considering matrices of thin metal layers on transparent base

19 p3335 A69-36198

- Quadrupole network transfer matrix calculation from known octupole matrix, describing frequency response determination of coupled transmission lines 22 p3912 A69-40257
- MATRICES [MATHEMATICS]**
- NT ADJOINTS
- NT CANONICAL FORMS
- NT EIGENVALUES
- NT EIGENVECTORS
- NT JORDAN FORM
- Oblique matrix pseudoinverse concept extended, discussing elementary properties and applications 01 p0104 A69-10315
- Matrix procedures for stability of nonlinear control with nonlinearities, discussing system with three actuating elements 01 p0050 A69-10355
- Book on advanced linear programming computing techniques covering algebraic theory and construction of computer programs 01 p0035 A69-10701
- Matrix technique for transformation of equation of motion into first order equation in analyzing perturbation forces producing mechanical oscillations 01 p0170 A69-10827
- Coulomb approximation for dipole and quadrupole transitions, calculating tables for radial matrix elements 01 p0124 A69-10901
- Integral operators on space of Borel measurable functions bounded considering weight function, giving condition for infinite complex matrices, mapping analytic sequence spaces 01 p0107 A69-11244
- Keplerian motion parameters second derivatives determined from initial conditions by deriving differential equations 01 p0107 A69-11305
- Stable high order implicit methods to solve numerically differential equation systems with matrix coefficients used for heat conduction equation 01 p0107 A69-11364
- Structure oriented parallel algorithms for matrix operations, noting applicability to real time calculations for discrete Kalman filter and control problems 02 p0224 A69-11743
- Matrix transformation applications in dynamic system theory and stability test 02 p0281 A69-11943
- Matrix representation of linear active two port noise figures and charts in terms of power wave variables 02 p0211 A69-12444
- Fast Fourier-Hadamard transform for digitized signal representation, classification, discrimination and efficiency 03 p0392 A69-13249
- Eigenvector approximation of complex matrix by inverse iteration, giving Algol 60 program 03 p0455 A69-13371
- Matrizants construction for Keplerian motions, discussing Hamiltonian character of variational equations for planar two body problem 03 p0513 A69-13779
- Planar array multiple beam generation and position determination using N-port Butler matrices 04 p0570 A69-14309
- Invariance of stabilized coordinates in power gyro stabilizers, using matrix equivalent of gyroscopic moments acting on platform 04 p0597 A69-14602
- Matrix elements calculation for one dimensional quantum-mechanical problems using transformation theory 04 p0632 A69-14866
- Two dimensional elementary transformation for obtaining eigenvalues, considering programming aspects for computing characteristic roots of matrix 04 p0624 A69-14967
- Green matrix of periodic boundary value problem for system of linear differential equations 04 p0624 A69-15098
- Instrumental Stokes vector calculating method involving light flow transformation matrix elements determination 04 p0601 A69-15248
- Higher dimensional Dirac Hamiltonians from L-matrix hierarchy using dimensional eigenvector 04 p0625 A69-15275
- Approximate expressions for displacement state of orthotropically reinforced conical thin walled shell, finding stiffness matrix by numerical integration 05 p0835 A69-15829
- Stiffness matrices for buckling or vibration analysis of long thin flat plate structures connected at longitudinal edges 05 p0836 A69-16029

- Dynamic equations for offset unsymmetric gyroscope with obliquely placed rotor, using dual transformation matrices [ASME PAPER 68-WA/DE-5] 05 p0764 A69-16170
- Sensitivity matrix in multivariable feedback control systems, discussing loop gain matrix design to achieve desired insensitivity to system error sources [ASME PAPER 68-WA/AUT-9] 05 p0738 A69-16179
- Matrix Riccati and matrix quadratic equations in problems of stochastic control and filtering 05 p0740 A69-16601
- Optimal approximation of functional matrix, giving upper bounds for deviations of general matrices from closest special matrices 06 p0948 A69-17495
- Spin-other-orbit matrix elements for F super 3 electron configurations 06 p0962 A69-17819
- Linear equivalent gain matrix of multivariable non-linearity evaluated with equivalent gain concept for monovariable nonlinear stochastic process 07 p1114 A69-18286
- Fourier transform algorithm introduction leading to image coding technique with image transformed by Hadamard matrix operator 07 p1078 A69-18859
- Sparse matrix scheme for computer analysis of structures, introducing term searching factor as efficiency guide for matrix routines 07 p1089 A69-19723
- Separable expansion for off shell two body t matrix with Coulomb potential to solve nonrelativistic three body problem with two body interactions 08 p1354 A69-20205
- Multiloop control plant described by Jacobian transfer matrix to control spectral characteristics of random processes 08 p1296 A69-20233
- Synthesis method for UHF transistor oscillators tunable in wideband using Y-matrices 08 p1285 A69-20380
- Explicit transverse bending stiffness and mass matrices for triangular finite plate element with linear thickness variation, using matrices for natural frequencies of vibration 08 p1414 A69-20526
- Linear systems analysis by generalized numbers method, discussing algorithms for manual or computer analysis 09 p1472 A69-21778
- Specialized mathematical machine for expanding matrix determinants and solving combinatorial problems, discussing symbolic circuit 09 p1460 A69-21782
- Circuit function determination from Laplace transforms without calculating transient state matrix, using numerical method 09 p1472 A69-21785
- Digital computer algorithm for analyzing circuits represented as autonomous multiport networks 09 p1472 A69-21786
- Matrix elements for asymmetric rotors using rigid rotor reduced energies, describing computations method 09 p1614 A69-21913
- Error bounds for estimation error covariance matrix of fixed point smoothing and fixed interval smoothing algorithms for optimum linear estimation 09 p1533 A69-22436
- Quasi-static modified field distributions in inhomogeneously filled cavities and waveguide tubes, comparing with homogeneously filled cavities and obtaining matrix eigenvalues 09 p1467 A69-22561
- Signal flow graphs based on matrix methods, discussing loop currents, systems orientation and transfer functions 09 p1475 A69-22600
- Variational approximation of probability measures and products of random matrices, discussing point distribution on Lobachevskii plane 10 p1719 A69-23399
- Multiple loop feedback systems synthesis utilizing extended node introduction synthesis theory, considering filter response functions characteristics 10 p1667 A69-24037
- Matrix Computer for solution of algebraic and integrodifferential equations in linear and nonlinear statics and dynamics, considering mechanical vibration problems [ASME PAPER 69-VIBR-12] 10 p1806 A69-24167

- Order of finite order linear continuous completely controllable completely observable system, using impulse response matrix and order of corresponding differential equations 11 p1858 A69-24567
- Radiant power flow, transmittance and absorptance of absorbing thin film multilayer in terms of characteristic matrix and admittance of surrounding media 11 p1896 A69-24850
- Matrix Riccati equation duality and bounds, discussing duality in context of optimal control 11 p1909 A69-24885
- Matrix computation operations devoid of sense and relevancy arising in interdisciplinary problems 11 p1910 A69-25522
- Transient response of linear time invariant system from state transition matrix, eliminating evaluation of eigenvalues 12 p2120 A69-25913
- Matrix transfer functions factorization to obtain irreducible representations of multivariable control systems used for studying invariant linear multidimensional processes 12 p2047 A69-26072
- Liapunov matrix equation solution, discussing restriction removal 12 p2121 A69-26377
- Inverse iteration method insensitive to small eigenvalue errors for finding eigenvectors 12 p2121 A69-26510
- Rational transfer function matrix realization into irreducible Jordan canonical form state equation by nonsingular transformations 12 p2122 A69-26511
- Negative exponential solution of matrix Riccati equation associated with linear optimal regulator and filter problems for time invariant plants 12 p2122 A69-26513
- Radiation diffusion in medium of finite optical thickness, computation of source function and tabulation of matrices 12 p2131 A69-26661
- Nonsingular matrices inversion method by group partitioning applied to noise covariance matrix used in optimal prediction and control 12 p2123 A69-26754
- Asymptotically stable discrete time closed loop linear systems synthesis, presenting feedback matrix as illustration 13 p2287 A69-27238
- Square matrices decomposition into orthogonal and triangular matrices products for computer storage applications 13 p2290 A69-28485
- Homogeneous finite automaton asymptotic analysis, calculating series terms for matrix transition probability function 13 p2239 A69-28535
- Group code decoding, discussing equivalent transformations of reference matrix and reduction of equipment losses 13 p2225 A69-28537
- Electro-optical Q switched lasers with prismatic reflectors and phase shifter studied using Johns matrices for polarizer, Kerr cell and Porro prism elements 14 p2459 A69-29390
- Eigenvalues of finite matrix Hamiltonian, considering convergence radius of perturbation series, limits and renormalization 14 p2470 A69-29451
- MHD quantities in linear wave and small intensity shock wave dissipation and structure determinable by right and left eigenvectors of matrix MHD flow equation 14 p2500 A69-29902
- Coupled equations for heavy particle motion expressed by introducing generalized matrix operator for effective momentum in atomic collision problems 14 p2489 A69-29997
- Moving targets trajectories determination from radar data, using posteriori probability distribution represented by Markov chain 15 p2566 A69-30334
- Optimum order for column orthonormalization of sparse matrices, applying results to Gram-Schmidt and Householder methods 15 p2644 A69-30425
- Economical computer techniques for numerically integrated finite elements, creating 96 element square matrix 15 p2711 A69-30873

Probabilistic automata stochastic matrices algebraic properties of definite, quasi-definite, periodic and quasi-periodic sets

15 p2645 A69-31141

Plane Cauchy problem solution for differential equations in heat and mass transfer theory, applying contour integral method in matrix construction

15 p2719 A69-31262

Approximation of vector linear differential equations with slowly varying matrix coefficients on time sharing computers, noting modeling possibilities

17 p2996 A69-33879

Reduction of partitioned submatrices functions for expediting calculations of hypercirculant and hyper-hyper Jacobi analytic functions

18 p3163 A69-34330

Matrix formulation for discrete element method applied to linear static and eigenvalue problems of thin walled segments, using homogeneous differential equations

19 p3445 A69-36831

Ensembles of random Hermitian cyclic matrices in statistical theory of complex systems energy level spectra, noting Gaussian density function of eigenvalues

20 p3567 A69-36988

Generalized Clifford matrix algebra applications, noting relation to generators of special unity group

20 p3568 A69-37072

Perturbation matrix derivation in rectangular coordinates using Sitarsky two body variational equation for all motions

20 p3568 A69-37200

Mathematical properties of involutorial matrix solutions to simple quadratic equation, obtaining symmetry properties, eigenvalues and recursion formulas

20 p3568 A69-37579

Physical networks with lumped components and hydraulic, pneumatic, electric, thermal and elastic lines of transfer matrices

[ASME PAPER 69-FE-15] 20 p3568 A69-37999

First order linear differential equations subject to linear constraints, discussing solution uniqueness dependence on matrix nonsingularity

21 p3754 A69-38744

Unitary matrix representing generalized inverses, proving weak method of steepest descent for least squares solution of equations

21 p3755 A69-38926

Transfer matrix symmetry about secondary diagonal in vibration analysis useful for computer programming

22 p4040 A69-39938

Natural torsional-flexural vibrations of bars with single symmetry, using matrix equations of equilibrium, displacements and natural coupled vibrations

22 p4043 A69-40456

Matrix identity associated with linear digital filtering and recursive estimating determined using matrix projection operators and properties

22 p3975 A69-41014

Frequency response of control systems analyzed by digital computer using operational arrays, noting extensions to time response and root locus computation

22 p3909 A69-41255

Green matrix for operator M governing steady state wave propagation in inhomogeneous anisotropic media obtained as solution of integral equations system

23 p4180 A69-41368

Fast Fourier Transform connection with circulant and permutation matrices for case with discrete time sample number equal to discrete frequency samples

23 p4182 A69-41761

Three dimensional pin-jointed trusses calculation method by state vector incorporating force and displacement matrices

23 p4236 A69-42485

Iterative and vectorial methods for correcting computed direction cosine matrix errors

23 p4134 A69-42543

Sequential vector estimation of matrix of second partial derivatives, suggesting alternative least squares method

24 p4340 A69-42958

Triangular plate bending element using Herrmann variational method, deriving matrices for finite elements

24 p4404 A69-43591

Vector matrix second order sensitivity equation application to Mars entry guidance, performing numerical simulation of second order sensitivity guidance and tabulating results

24 p4388 A69-43690

P-Q norms generalized inverse concept of matrix derived from extension of Penrose best approximate solution of linear equations

24 p4342 A69-43703

Density matrices of symmetry projected single determinant wave functions for finite groups, considering many particle system

24 p4351 A69-43810

MATRIX ALGEBRA **U MATRICES [MATHEMATICS]**

MATRIX ANALYSIS **U MATRICES [MATHEMATICS]**

MATRIX METHODS

Sheba family of shell elements for matrix displacement method applied to problems of thin shells under membrane and bending action

01 p0170 A69-10865

Nonlinear buckling analyzed by mathematical models and computational procedures using organized matrix approach to structural analysis based upon finite element

01 p0171 A69-10964

Physical interpretation for Choleski decomposition method applied to structural analysis, discussing stiffness and flexibility methods

01 p0173 A69-11417

Computer stress analysis may result in automated designs, emphasizing finite element technique

02 p0341 A69-12153

Matrix displacement method for nonlinear elastic analysis of shells of revolution under symmetrical and asymmetrical loadings

02 p0346 A69-12511

Compatibility equations in plane micropolar thermoelasticity theory obtained by associated matrix method

03 p0525 A69-13607

Matrix-harmonic method for vibration study of mechanisms and machines

03 p0468 A69-13860

Matrix-harmonic method of vibration study extended to include autonomous vibrations of single degree of freedom machines

03 p0468 A69-13861

TUBA family of plate elements, discussing kinematically equivalent load matrices, initial loads due to initial strains, geometrical stiffness and square plates

03 p0530 A69-14090

Matrix perturbation method for hyperstatic structure modification by combining original solution elements with data on modification

04 p0668 A69-14380

Panel flutter in supersonic flow, using finite element approach in matrix displacement methods to derive aerodynamic influence coefficient matrices

04 p0676 A69-14707

Stiffness matrices for sector elements under membrane stress, considering alternative displacement distributions within element

04 p0676 A69-14728

Laminated plates vibrational characteristics calculations by transition matrices, relating stresses and displacements under load

04 p0679 A69-14907

Matrix displacement and force methods of stability analysis, deriving method of determining geometrical stiffnesses for complex structures

05 p0841 A69-16399

Unsymmetrically laminated simply supported plates approximate solutions, considering potential energy and reduced stiffness matrix

07 p1232 A69-18725

Book on computer calculation of structures covering programming, computer language, mathematical aspects of structural analysis, matrix computation, etc

07 p1233 A69-19349

Matrix method for structural analysis using force and rigidity methods

07 p1239 A69-19776

Explicit transverse bending stiffness and mass matrices for triangular finite plate element with linear thickness variation, using matrices for natural frequencies of vibration

08 p1414 A69-20526

Curved tetrahedral and triangular elements in matrix displacement method covering linear and nonlinear cases

08 p1415 A69-20631

Matrix displacement method for nonlinear elastoplastic two or three dimensional structures or continua, discussing strain distribution

08 p1416 A69-20705

Wave interaction in magnetically confined plasma taking into account body and surface waves

08 p1370 A69-21014

Stiffness matrix for doubly curved shallow shell element with rectangular plane projection applied to circular cantilevered cylinder and barrel vault

10 p1802 A69-23892

Natural mode structural analysis matrix methods for small displacements, discussing curved local subbeam in space and circular arch

11 p1969 A69-24374

Dynamic unified structural analysis method in computer program, calculating stiffness matrix to obtain natural frequencies and mode shapes

11 p1987 A69-25367

Strip method for prediction of subcritical frequency and damping characteristics for subsonic wind tunnel and flight flutter tests

11 p1987 A69-25368

Discrete linear optimal control system with quadratic performance index synthesized by dynamic programming method, obtaining matrix equations

12 p2050 A69-26091

Linear, quadratic, optimal control problems solved by sweep method, discussing time role, feedback control law and use of matrix equations

12 p2053 A69-26512

Laminated plates vibrational characteristics calculations by transition matrices, relating stresses and displacements under load

12 p2182 A69-26660

Automated Structural Analysis Procedure employing Displacement Method of Matrix analysis applied to validation studies of various finite elements for wing structures

12 p2184 A69-26809

Shallow hyperbolic paraboloidal shell with large deflections, analyzing nonlinear behavior with numerical method based on integral equations

12 p2185 A69-26820

Load deflection equation solution based on row operations, involving three passes of coefficient matrix, using wavefront processing and modified Gauss algorithm

13 p2358 A69-27208

Stiffness matrix derived for skewed curved shallow shell element with reference to oblique coordinate system

13 p2358 A69-27210

Discrete element plastic analysis of long prismatic bars under transverse loading in longitudinal direction, based on matrix displacement method

13 p2365 A69-28237

Power gyrostatic kinematic structure synthesis, applying matrix methods to design variables

14 p2446 A69-28924

Elastoplastic matrix for stress increments for yield surfaces with associated flow rule, considering initial stress computation

15 p2706 A69-30433

Stiffness matrix for refined triangular plate bending finite element, considering Kirchhoff theory

15 p2706 A69-30434

Stiffness matrix of polygonal finite plate bending element derived using assumed stress distribution

15 p2710 A69-30867

Nondeformable closed contour spatial gear kinematics using matrix tensor method suitable for computer programming

15 p2713 A69-31020

Statistical calculation of three dimensional frames of thin walled rods, using method of initial parameters in matrix form

15 p2714 A69-31199

Triangular shell element SHEBA for arbitrary curvature variation as means of performing large displacement matrix analyses, discussing local subelement, natural modes, cross sectional results, etc

16 p2872 A69-32025

Aerodynamic control surface/trim tab coupling coefficients in subsonic two dimensional unsteady flow using matrix method valid for motion involving harmonic oscillations

17 p2895 A69-33597

Complete spherical shells nonsymmetric vibrations frequencies and mode shapes calculated by matrix method

17 p3061 A69-33706

Torkington progressive rigidity model with successive minimum requirements relation to diagonal matrix elements of molecular force constants

17 p3068 A69-34230

Finite element analysis of nonlinear elastoplastic material-geometric behavior problems, describing computer program and incremental stiffness matrices

18 p3219 A69-34664

Elastic stiffness, kinematically equivalent loads and initial loads due to initial strains of FUGA 6 element, describing program for matrices generation

19 p3447 A69-36852

Rectangular plate bending element corresponding to finite difference method use, deriving stiffness matrix from strain energy approximation
20 p3619 A69-36949

Stiffness matrices in plane elasticity problems by Galerkin method, leading to simultaneous expressions related to finite element method
20 p3619 A69-36951

Matrix displacement method of structural analysis applied to dynamic buckling of clamped shallow spherical caps under step pressure loading
20 p3622 A69-37229

Airframe stability of VAK 191 examined by displacement method, using matrix calculations within Automatic System of Kinematic Analysis
20 p3462 A69-37515

Parallel wire antenna array design for specified pattern using matrix methods and method of moments for self and mutual impedances and required excitations
20 p3507 A69-37847

Automatic structural analysis by matrix force method, giving diagrams of load paths, equilibrium sequence and flow chart
21 p3843 A69-39311

Strain anisotropy matrix construction for various strain trajectories from elastic properties of expression relating stress and elastic strain deviators
22 p4039 A69-39915

Thin walled rods for girder and frame systems designed by matrix method, solving differential equations for tension, compression, bending and torsion
23 p4230 A69-42005

ASTRA /advanced structural analyzer/ based on stiffness approach to finite element method, generating mathematical model for stresses and deflections
23 p4232 A69-42144

Field transfer matrices for simultaneous treatment of free and forced vibrations and buckling through axially loaded Timoshenko beam
23 p4234 A69-42400

Matrix method for free and forced oscillations of complex linear damping system with known linear vectors
23 p4236 A69-42484

Matrix method for analyzing elastic structures linear transient response to time dependent loads and temperature change
24 p4399 A69-42988

MATRIX THEORY

Oblique matrix pseudoinverse concept extended, discussing elementary properties and applications
01 p0104 A69-10315

Exchange rule to solve system of linear matrix equations in sense of Chebyshev, giving various algorithms
01 p0105 A69-10705

Physical interpretation for Choleski decomposition method applied to structural analysis, discussing stiffness and flexibility methods
01 p0173 A69-11417

Matrix theorem giving necessary and sufficient conditions for leaving cone invariant, considering finite dimensional spaces
04 p0624 A69-15003

Theorems and lemmas formulated pertaining to Volterra equations stability
05 p0787 A69-16449

Optimal approximation of functional matrix, giving upper bounds for deviations of general matrices from closest special matrices
06 p0948 A69-17495

Asymptotic solution to problem of finding time optimal transformation for controlled plant with motion in phase space described by matrix differential equation
10 p1666 A69-23883

Matrix formulation of electromagnetic field equations and nonlinear conservation laws for measurable quantities
10 p1725 A69-24049

Oscillation theorems for linear self adjoint elliptic equations of even order $2m$, discussing proofs dependence on Swanson comparison theorem
11 p1909 A69-24882

Matrix Riccati equation duality and bounds, discussing duality in context of optimal control
11 p1909 A69-24885

Numerical computation method for evaluating transition matrix of linear time invariant system, estimating error propagated in transient response
11 p1910 A69-25660

Matrix eigenvalue problems with statistical properties, applying to dynamic structural systems and verifying solutions by Monte Carlo simulation
16 p2871 A69-31878

Algorithm minimizing nonzero elements during Crout reduction of sparse matrices
20 p3497 A69-36946

Asymptotic stability of null solution of matrix differential equation, considering linearized equations of rotational motion for hinged two body gravity gradient satellite orbit
20 p3575 A69-37212

N symmetric matrices orthogonal integrity basis, considering product traces, polynomial invariants, tensor groups, etc
20 p3624 A69-37587

Matrix pseudoinverses producing necessary and sufficient conditions for positive and nonnegative definiteness
21 p3756 A69-39497

Fast Fourier Transform connection with circulant and permutation matrices for case with discrete time sample number equal to discrete frequency samples
23 p4182 A69-41761

Book on matrix-computer methods in engineering covering matrix algebra and calculus, computer programming, Fourier transforms, etc
23 p4234 A69-42421

Generalized inverse of matrix computation method, using elementary orthogonal matrices and Gaussian elimination
24 p4339 A69-42762

MATTER (PHYSICS)

Open cosmological model containing radiation and matter, noting matter density relationship to visible matter average
01 p0150 A69-10371

Superdense matter possibly present in neutron stars, discussing relation with Einstein theory and nuclear physics
06 p1012 A69-18240

Relativistic cosmological models with radiation and matter, analyzing conversion from radiation-like models to dust-like models
07 p1222 A69-19587

General theory of relativity and tensor field equations relating space time characteristics to local properties of matter and vacuum, using Palatini Lagrangian method
09 p1593 A69-21572

Equilibrium state of matter at high temperatures and densities with respect to nuclear reactions, determining neutron-proton ratio
11 p1957 A69-24403

Neutrons overloaded nuclei role studied for neutronization of matter at high densities in statistical equilibrium with respect to nuclear reactions
11 p1957 A69-24404

Extragalactic gamma ray fluxes predicted, discussing collisions, matter-antimatter annihilation and cosmological implications
11 p1946 A69-24466

Mathematical methods for quantum mechanical problems caused by electromagnetic field interaction with matter
18 p3175 A69-35402

Coherent radiation generation using gas lasers, analyzing interaction between EM radiation and matter
19 p3335 A69-36067

Meteorite and primordial matter composition related to possible fractionation processes influence, discussing nuclear species abundance
19 p3406 A69-36073

Solar system matter evolutionary beginning traced to chemical elements synthesis by considering radioactive decay irreversible processes
19 p3406 A69-36076

Cosmic matter density and velocity in expanding universe with negative curvature within Einstein-Friedman theory
20 p3599 A69-37472

Matter and radiation interaction in hot model universe, investigating residual radiation spectrum deviation from Planck curve
21 p3797 A69-38536

Universal dependence of density fluctuations on specific entropy derived from equation describing material composed of neutral particles and equal number of charged and antiparticles
21 p3771 A69-38995

Matter surface distribution in general relativity, deriving matching conditions
22 p3982 A69-40753

Equilibrium state of matter at high temperatures and densities with respect to nuclear reactions, determining neutron-proton ratio
24 p4391 A69-43793

Neutrons overloaded nuclei role studied for neutronization of matter at high densities in statistical equilibrium with respect to nuclear reactions
24 p4391 A69-43794

MATURING U GROWTH

MAXIMUM PRINCIPLE

Dynamic programming to demonstrate sufficient conditions of optimality in maximum principle when regular control synthesis is realized
02 p0225 A69-11975

Quantitative form of maximum principle for elliptic partial differential equations
03 p0457 A69-13826

Trajectory optimization, obtaining sequence of control functions by iterative application of maximum principle /min H/ to nonoptimal functions [DVL-852]
04 p0548 A69-14827

Pontryagin maximum principle used to solve optimal control problems on analog computer
05 p0739 A69-16473

Maximum principle application to stochastic systems, developing set of stochastic partial differential equations
05 p0788 A69-16482

Maximum principle in integral form for optimal control problems with delay differential system equations, using vector matrix notation
10 p1718 A69-23038

Dynamic programming to demonstrate sufficient conditions of optimality in maximum principle when regular control synthesis is realized
10 p1666 A69-23884

Successive approximation techniques for problems in optimum control theory, considering maximum principle and Banach space
11 p1908 A69-24771

Feedback control of linear systems subject to sudden changes in parameter values
12 p2052 A69-26502

Maximum principle for infinitesimal deformations of convex surface with nonnegative Gaussian curvature, noting application to rotation and displacement diagrams
13 p2361 A69-27741

Optimal control conditions for systems described by differential equations with deviating neutral type argument formulated in maximum principle form
14 p2426 A69-29419

Three and n body problems solution by reduction of independent variables and maximum principle
15 p2652 A69-30448

Pontryagin maximum principle applied to time optimal control of autonomous second order system with constant coefficients and differentiation in transfer function numerator
15 p2583 A69-31059

Suboptimal closed loop control of nonlinear systems subject to quadratic performance indices by invariant imbedding concepts and maximum principle
18 p3111 A69-34678

Coplanar impulsive transfers and second variation test, using maximum principle and Lagrangian multiplier technique for propellant expenditure minimization
19 p3400 A69-35676

Linear optimal control problem for system with variable terminals, proving maximum principle and transversality conditions under minimum constraints
19 p3285 A69-35859

Variational or optimal control for delayed systems, involving integrated maximum principle for problems with nonlinear functional differential systems
21 p3754 A69-38429

Point mapping in optimal control, describing maximum principle, dynamic programming and substitution of variables
21 p3688 A69-39860

MAXIMUM USABLE FREQUENCY

Gain from communications operation at maximum usable frequency estimated on basis of long range ionospheric prediction technique adapted to computer
03 p0421 A69-13377

Ionospheric beam deflection maximum and minimum levels, deriving equations for maximum usable frequency at given ionization conditions and radiation angles
03 p0424 A69-13540

IC selection for minimum thermal effects, discussing speed, power dissipation, maximum operating frequency and noise threshold
06 p0894 A69-17219

Maximum horizontally radiated power of earth stations in any 4-kHz band for multichannel telephony and TV using satellites
09 p1450 A69-21278

Gain from communications operation at maximum usable frequency estimated on basis of long range ionospheric prediction technique adapted to computer
14 p2433 A69-28827

MAXWELL BODIES

Correlation between temperature and stress field in thermal buckling of square viscoelastic Maxwell plates under random temperature
12 p2188 A69-27113

MAXWELL-BOLTZMANN DENSITY FUNCTION

Statistical description of nonelastic processes in nonequilibrium plasma in transverse magnetic field, using kinetic equations for distribution functions
03 p0476 A69-13412

Qualitative mechanisms to explain Langmuir paradox, discussing wall mechanism for Maxwellian distribution formation in low pressure discharges
06 p0960 A69-16922

Noncoherent scattering of atoms with Maxwellian distribution in moving atmosphere, discussing Doppler broadening expansion in Legendre polynomials
07 p1219 A69-19286

Complex microwave incremental conductivity of InSb at 77 K in steady electric field using displaced Maxwellian distribution function
07 p1200 A69-19447

Nonlinear longitudinal oscillations in nonisothermal electron plasma with Maxwellian distribution in velocity space and different temperatures of electrons and ions
09 p1550 A69-22025

Fast electron energy distribution function and atom concentration in first excited level in weakly ionized plasma, considering transitions between excited levels
10 p1739 A69-23628

Maxwellian velocity distributions simulated in one, two and three dimensions by superposition of N monoenergetic isotropic distributions, noting application to kinetic theory computation
13 p2313 A69-28222

Gain and loss collision integrals in Boltzmann equation for rigid sphere gas evaluated for distribution expressed as linear combination of Maxwellians
14 p2431 A69-29578

Lorentz gas approximation to Boltzmann collision operator generalized for heavy molecule nonMaxwellian gas distribution function, obtaining equilibrium distribution applicable to ionized gas
18 p3179 A69-34438

Solar wind temperature, using distribution function for solar wind ions in anisotropic Maxwell distribution form
19 p3396 A69-36631

MAXWELL EQUATION

Einstein-Maxwell equations corresponding to superposed electric and magnetic fields stationary solutions, noting singularities in metric tensor
01 p0115 A69-10020

Optical pulse generator consisting of solid state laser with saturable absorber at cavity end using perturbation theory and Maxwell equations
01 p0089 A69-10179

Plasma stability criterion for universal mode, discussing cusp curvature stability
01 p0127 A69-10279

Symmetric tensor of time averaged stresses for collisionless plasma in oscillating field derived by Maxwell equations
02 p0286 A69-11588

Magnetoionic propagation of signals in magnetosphere using Maxwell equations and tensor quantities, linking to Hall, transverse and longitudinal conductivities [ONERA-TP-593]
02 p0236 A69-11617

Godel type solution of Einstein-Maxwell equation for dust filled universe, using Rainich equations
02 p0280 A69-11814

Kerr family of solutions of Einstein and Einstein-Maxwell equations for gravitational field of rotating body, noting global structure and causality
03 p0466 A69-13473

MHD generator two dimensional analysis for studying edge effect, taking into account Hall effect
03 p0480 A69-14099

Monograph on classical electromagnetism via relativity, developing Maxwell equations from Coulomb law
07 p1180 A69-18404

Geometrical optics approximation of Maxwell equations for electrodynamics of inhomogeneous anisotropic media
07 p1076 A69-18519

Maxwellian field and second order invariant system in vacuum in three dimensional Riemannian space with positive-definite metric, discussing Lorentz invariant equations
09 p1541 A69-22392

Coherence theory of electromagnetic field from classical/wave/ or quantum /particle/ standpoint, stressing information theory
11 p1915 A69-24455

Maxwell theory basis of special theory of relativity, discussing universal length constant
11 p1920 A69-25562

Limiting frequencies of inhomogeneously filled lossless rectangular waveguides and field states, using Maxwell equations
11 p1855 A69-25620

Guided waves in circular cylindrical radially inhomogeneous medium, using vector theory based on Maxwell equations
13 p2221 A69-28062

Magnetized plasma waveguide dispersion characteristics using Maxwell equations, stressing interaction of electron beam with wave modes
13 p2315 A69-28571

Macroscopic quasi-linear theory of HF radiation in cold electron-proton plasma allowing direct use of plasma and Maxwell equations
16 p2819 A69-31684

Nonlinear Maxwell equations applied to non-monochromatic emission for nonlinear crystal situated in resonator, examining generation of second optical harmonic
19 p3332 A69-35869

Radiation fields from energetic electron moving in helical orbit in magnetoactive plasma, using Maxwell equations
22 p4008 A69-39965

Mode conversion in nonuniform multimode waveguides and transitions using Maxwell equations, considering tapered and circular waveguides
23 p4135 A69-41354

MAXWELL FLUIDS

Idealized slider bearings with Maxwell liquid as lubricant, analyzing elasticity effects on pressure, load capacity and friction
02 p0253 A69-12413

Class of uniform motions of continuous media and rarefied gases
05 p0751 A69-16677

Asymptotic solutions of Grad system of kinetic moments
05 p0752 A69-16678

State variables of ideal gas in two phase region, discussing determination from equations of state and equation for internal energy and Maxwell criterion inapplicability
06 p1030 A69-17170

One dimensional unsteady monotonic Maxwellian gas flow at small Knudsen numbers using Hilbert method, noting validity for shear flows
14 p2432 A69-29611

Plane shock layer structure in pseudoMaxwellian monatomic gas, integrating Krook equation for gas molecule velocity
14 p2432 A69-29613

Pressure gradient produced steady plane flow of Maxwellian gas between infinite parallel planes, describing linearized Boltzmann equation solution
19 p3379 A69-36604

MAXWELLIAN DISTRIBUTION [DENSITY]
U MAXWELL-BOLTZMANN DENSITY FUNCTION

MCDONNELL AIRCRAFT
U DC 10 AIRCRAFT
U F-4 AIRCRAFT

MCDONNELL MILITARY AIRCRAFT
U MILITARY AIRCRAFT

MEAN

Lunar components in mean values of geomagnetic field daily variations, discussing lunar phase during selected quiet days
16 p2782 A69-32458

MEAN FREE PATH

Radio telescope measurements of total vertical atmospheric absorption to determine effective mean free path of oxygen and water vapor for absorption
02 p0206 A69-11450

Transfer coefficients for inhomogeneous systems characterized by constant density, mean free path and activation energy of carriers at each point
07 p1193 A69-19024

Enskog method for Boltzmann equation, analyzing asymptotic nature of integral kinetic equation for molecular mean free paths and Laplace probabilities
09 p1481 A69-21889

Electromagnetic field penetration into plasma cylinder having electron mean free path comparable with plasma diameter, noting anomalous skin effect
12 p2133 A69-25833

Gas molecular mean free path effect on performance of spiral grooved thrust bearing, discussing slip flow factor and He Knudsen number [ASME PAPER 68-LUBS-17]
13 p2266 A69-27273

Mean free path of interaction of nuclear active particles in Fe with energies greater than 530 gev
13 p2303 A69-28385

Neutron star atmosphere and X ray emission spectrum, computing incident protons mean free path for two assumptions
15 p2686 A69-30535

High energy cosmic ray proton, electron and photon propagation through cosmic microwave background, discussing mean free paths
16 p2852 A69-32819

Gas dynamics of material slab under radiation impact assuming thermal equilibrium reemission, discussing equations of motion and mean free path as function of frequency
19 p3449 A69-36355

Absorption mean free path for radiation absorbed by given medium, using zenith angle distribution from particle counter telescope
21 p3723 A69-38841

Varying ratio between mean free path and spherical particle radius at 0-10 km, discussing free molecular flow effects in cloud physics
24 p4345 A69-43145

NT BINARY INTEGRATION
NT BOREL SETS
NT FUNCTIONAL INTEGRATION
NT INTEGRAL CALCULUS
NT NUMERICAL INTEGRATION
NT RUNGE-KUTTA METHOD
NT STIELTJES INTEGRAL
NT WEIGHTING FUNCTIONS

Multidimensional nonlinear plants adaptive control by direct integration, identifying differential equations coefficients
01 p0053 A69-10875

Integration for equations governing linearized thermoelastic transformations of incompressible solids
02 p0340 A69-12033

Integration method for equations of plastic two dimensional stressed state with Mises yield condition, noting stress concentration at hole with pressure on contour
04 p0679 A69-14924

Analytical expressions for integrals involving Euler and Bernoulli numbers
04 p0624 A69-14969

Integrability of equations for problem of motion of heavy solid body about fixed point
05 p0794 A69-16206

Integration forms suitable for fabrication of hybrid and monolithic microwave integrated circuits
07 p1096 A69-18441

Riemann sum definition and development of bounds for error in approximating integral, showing quadrature formulas as Riemann sums
10 p1719 A69-23521

Hamilton-Jacobi equation integrated for Hamiltonians, extending method to more than two variables case
11 p1910 A69-25747

Navigational equations solution by airborne analog computer techniques, describing electronic, electromechanical, digital reset and mechanical integrations with respect to time
18 p3107 A69-34847

Asymptotic evaluation of complex frequency integrals in theory of radiation from transient sources in dispersive media, interpreting results in terms of space-time rays
20 p3494 A69-37841

Motion equations of quasi-linear nonautonomous systems with many degrees of freedom, obtaining periodic solutions by asymptotic integration
23 p4183 A69-42477

MEASUREMENT

SNR variation with PCM using quantization distortion equations applied to coding-decoding facilities not exactly matched with respect to amplitude

Direct reading device for minority carriers lifetimes measurement in semiconductor single crystals
01 p0078 A69-10073

Human systolic and diastolic blood pressure measuring apparatus and method
01 p0079 A69-10296

Electrode geometry for mass spectrometer ion source to measure electron ionization cross section of low vapor pressure materials
01 p0080 A69-10605

Jet fuel lubricity evaluation by ball-on-cylinder device
[ASLE PREPRINT 68AM 4A-2]
01 p0083 A69-10914

Spadoryc slide rule for damping determination from vibration decay traces, noting use in flight flutter tests
01 p0087 A69-11029

Vibrating rod automatic ice detection and control system for fixed and rotary wing aircraft
01 p0083 A69-11046

Simultaneous measurement of gain and noise of linear two port device using noise generators as signal sources
02 p0210 A69-12430

Microwave oscillator AM and FM noise measurement using Schottky barrier diode detector, discriminator, storage oscilloscope and wave analyzer
02 p0220 A69-12453

Surface temperature thermal fluxmeters used in measurements of shock tubes [ONERA-TP-648]
03 p0427 A69-12876

Stark effect meter for electric field measurement in space, discussing absorption cell development
03 p0429 A69-13222

Nondestructive measurement of thin transparent film thickness by interference method, noting diffusion profiles
03 p0430 A69-13634

Absolute rotation in space measured with microwave rotation sensor using polarization of electromagnetic wave
04 p0573 A69-14342

Standing wave methods for measuring permittivities of liquids having attenuation coefficients over considerable range
04 p0599 A69-15015

Direct reading instrument using four point probe and two analog computing circuits for Si and Ge resistivity measurements
04 p0599 A69-15019

Make wire, light pipe and spring wire ablation sensors development for measuring parameters of heat shield materials for reentry vehicles
04 p0602 A69-15428

Transient method for measuring thermal properties of biological materials, concerning thermal conductivity, inertia and blood flow rate
06 p0879 A69-17086

Device for measurement of time to failure of brittle materials in thermal-endurance testing, noting shock wave
06 p0927 A69-17690

Nose cone reentry simulation under low temperature subliming ablators, discussing dry ice, camphor and steel calibrations models fabrication, instrumentation and boundary layer measurements [AIAA PAPER 69-152]
06 p0929 A69-18098

Book on fundamentals of temperature, pressure and flow measurements covering standards, calibration, moving fluid effects, transient effects and installations in fluids and solids
07 p1131 A69-18410

Nonstationary aerodynamic load for harmonically oscillating body in fluid flow with constant mean velocity measured, determining errors as functions of system parameters
07 p1050 A69-18752

Hypoxia warning system based on dry electrolyte oxygen sensor with millisecond response time
07 p1071 A69-19430

Adapter circuits for MOSFET electrical properties measurement
07 p1113 A69-19780

Atmospheric turbidity and visibility measuring instrument /videograph/ using light backscattering, noting shipboard, coast guard service, large cities and weather stations applications
08 p1314 A69-20376

Linearization unit for compensating hyperbolic characteristic of capacitive displacement sensor used for contactless displacement measurement
08 p1317 A69-20879

Three dimensional laser Doppler velocity instrument for mean velocity and turbulence measurements in subsonic jet shear layer [SAE PAPER 690266]
09 p1494 A69-21555

Vibration measurements on rotating machinery, using diode switching potentiometric strain gage circuit and multiple common rings
09 p1496 A69-22014

Self oscillations in angular velocity sensor using electric spring and potentiometric pickup, examining friction moment and inductance coil effects
09 p1497 A69-22106

High sensitivity gyroscopic HF angular acceleration sensor using special differentiator, obtaining motion equations and dynamic response
09 p1498 A69-22109

Radial inflow gas turbine engine performance testing, discussing instrumentation, recording systems and calibration techniques
[ASME PAPER 69-GT-104]

09 p1501 A69-22522

Automatic level measuring system, consisting of decade control oscillator, digital level generator and selective level meter for 200Hz-2MHz range

09 p1501 A69-22577

Complex admittances and impedances of various networks determined by impedance bridge, describing frequency dependent limits of measurement parameters

09 p1501 A69-22578

Hall effect theory and devices, noting application to measurement of several physical quantities and sources of errors in devices

09 p1541 A69-22698

Lasers industrial manufacturing applications, discussing processing operations and measurement and inspection techniques

09 p1521 A69-22783

Noise in instrumentation systems, considering coupling and current noise source and reduction by isolation and filtering

10 p1691 A69-23231

Gage for measurement of density variation between expansion chamber and driver gas of valve driven shock tube

10 p1673 A69-23342

Relative heights on moon, tabulating lunar topography and comparing micrometrical measurements and map data

10 p1782 A69-23697

Digital design techniques for electronic equipment including measuring instruments, generators, synthesizers, etc

10 p1664 A69-23796

Tunnel diode test circuit, measuring differential resistances and bias voltages on loss resistance and of socket capacitance

10 p1665 A69-24215

Direct measurement device for metallic material response to mechanical stresses from stress force and global displacement/including material deformation/

11 p1884 A69-24757

Dynamometer based on electrical capacitance change in sensor element, discussing working range, circuit diagram and mechanical design

11 p1887 A69-25207

Second tacite sounding rocket test for measuring UV radiation in transition zone between upper ionosphere and space

11 p1887 A69-25213

Integral normal emissivity of electrically conducting materials heated to high temperatures by HF field of inductor, discussing measurement procedure and equipment

11 p1888 A69-25230

Nonorientable five channel adapter with spherical measuring head for three dimensional gas flow measurement, noting sensitivity to mechanical disturbances in calibration

11 p1888 A69-25340

Sweep frequency measuring setup for adjusting equalizers in carrier transmission systems

11 p1841 A69-25639

Computer controlled network analyzer performing automatic microwave measurements of passive and active networks, based on signal splitting and detecting

12 p2037 A69-26048

Precision measuring instrument for negative conductance of active element at microwave region

12 p2038 A69-26054

Dielectric loss tangents measurements combining coherent optical resonator with microwave techniques, noting application at mm wavelengths

12 p2080 A69-26057

Calibration and accuracy check of measuring instruments at National Center of Space Studies in France, emphasizing reference instruments

12 p2080 A69-26123

High sensitivity LF and HF frequency deviation meter with resonant RC amplifiers for frequency discrimination and filtering

12 p2038 A69-26337

Inelastic interactions between Tev cosmic particles and light element nuclei, describing design and operation of measuring apparatus and derivable data

12 p2093 A69-26583

Horseshoe electromagnet sensors above ferromagnetic plate, analyzing electromagnetic properties of plate and coil impedance

12 p2094 A69-26719

Lasers application to measurement techniques including alignment, direction, distance, elongation, interferometric, holographic, etc

12 p2094 A69-26903

Microminiature five point measuring head with linear point design for resistivity measurement of semiconductor films, noting four point head capabilities

12 p2099 A69-27104

Pulse frequency integral estimate devices with integrating chemotron tetrodes for automatic systems metering applications

13 p2227 A69-27522

Instrumental investigation of submillimeter astronomy, noting advancements in semiconductor physics, quantum electronics and space astronomy

13 p2342 A69-27602

Earth orbital manned space astronomy, discussing long range program, instruments, facilities and data processing

13 p2240 A69-27947

Cosmic ray muons angular distribution measuring device for determining pion/kaon ratio

13 p2332 A69-28421

Dynamic instrumental errors of quasi-steady state mechanical meters approximated by graph analytical method

14 p2451 A69-29747

MHD properties of velocity measurement method using cylindrical glass filament probe and Pitot and Prandtl tubes

14 p2453 A69-29920

Surveyor lunar landing procedures and results including instrumentation, lunar topography, selenology, chemical and physical properties, solar corona and earth laser output observations

15 p2681 A69-30324

Saturn 5 boost phase environment simulation on Apollo stages, discussing fixtures, load devices, instrumentation and ground test

15 p2588 A69-30405

Hypersonic wakes interference effects induced by facility instrumentation, discussing results of wind/shock tunnel investigations

15 p2588 A69-30475

Crack growth monitoring and recording techniques during fracture testing, using foil gauge, potential flow and acoustic pickup methods

15 p2713 A69-31109

Test measurement - Conference, New York, October 1968

15 p2612 A69-31267

Fatigue life gage on operational aircraft providing in situ monitoring of fatigue damage prior to and during propagation of running fatigue cracks

15 p2613 A69-31271

Ceramic heat transfer gage for supersonic wind tunnel investigation of blunt swept wing leading edges aerodynamic heating

15 p2613 A69-31272

Water cooled split-flow probe measuring enthalpy of high temperature subsonic streams

15 p2614 A69-31275

Laser Doppler heterodyning for monitoring motion noting solid surfaces vibration, liquid and solid surfaces linear velocity and turbulence in liquids and gases

15 p2614 A69-31276

Maximum likelihood methods applied to device performing ion swarm experiments, measuring positive ion mobility in hydrogen

16 p2788 A69-31670

Multiple function combination probe design for compressor and turbine air flow research

16 p2766 A69-31917

Polish electronic measurement devices operating principles and specifications including vibration, frequency and pressure meters, fatigue testing machines, etc

16 p2790 A69-32076

Instrument azimuth determination, discussing observations and theory

16 p2791 A69-32227

Inertial navigation system theory that uses increased numbers of newtonometers/force measuring devices/in place of gyroscopic sensitive elements

16 p2791 A69-32283

Hall generator for measuring mechanical displacements and vibrations of 10 A, describing operating principles and arrangements

17 p2971 A69-33022

Column method of measuring thermal conductivity of CO and oxygen in 350-1500 degrees K temperature range, discussing error sources and data reliability

17 p3073 A69-33298

Instrumentation for rotorcraft aerodynamics, considering boundary layer measurements, hot-wire anemometer and schlieren system for rotors and propellers

17 p2895 A69-33539

Metrological measuring instrument scales selection principles for ensuring constant sensitivity and Q factor

17 p2975 A69-33614

Measurement errors and geometry effects on navigational accuracy, determining maximum allowable error for measuring devices employed

17 p3002 A69-34098

Gyroscopic apparent rate meters generating steering moments in inertial navigation systems for determining moving object position and course

18 p3134 A69-34556

Self contained hand held battery operated aerosol particle analyzer, measuring aerosol concentration and size distribution for laboratory and space flight applications

18 p3136 A69-34691

Ultrasonic spectrometry application to thickness measurement of thin and thick welded articles

18 p3137 A69-35110

Skin friction balance in Mach 5 wind tunnel with high heat transfer, measuring shear forces

19 p3292 A69-35734

Skin friction balance for shear stress measurements in presence of ablation, describing balance construction, calibration, flexure range, etc

19 p3292 A69-35735

Radio measurement methods and standards including measurements of attenuation, phase shift, time delay, impedance, field strength, antenna characteristics, RF properties of materials, etc

19 p3276 A69-36426

S/N fatigue life gage response to constant frequency random amplitude input strain

20 p3537 A69-37007

Dynamic cathode ray tube spot size measurement by two slit technique, noting relationship to beam current and luminance

21 p3719 A69-38329

Automated rebound resilience apparatus for polymer dynamic mechanical properties studies over wide temperature range, using photoelectric device

21 p3689 A69-38593

Fluidic angular rate sensor, obtaining rate information by sensing laminar jet flow deflection from nozzle, discussing advantages over mechanical rate sensors

21 p3722 A69-38766

Device determining dynamic mechanical properties of tissues and various transducers, evaluating elastic properties of polyurethane, Hevea rubber and descending thoracic aorta

22 p3890 A69-40204

Photoelectric methods for pulsed and CW lasers output power and energy measurements

22 p3961 A69-40239

Phase equilibrium apparatus for measurement of thermodynamic properties of cryogenic fluid mixtures, including argon-methane data

22 p3947 A69-40630

Absolute thermal conductivity measurements on fluid normal H and fluid parahydrogen, noting apparatus and data graphical presentation along isotherms, isochors and isobars

22 p3998 A69-40631

Electronic measurement and control in industry - Conference, Budapest, 1969

22 p3915 A69-40934

Choke coil magnetoelastic sensors thermal stability found decreasing proportionally to measurement range decrease/below 100 newtons/

23 p4166 A69-41995

Balloon-borne instrument for auroral X ray measurements at Antarctic station, discussing design requirements, circuit characteristics and improvement recommendations

23 p4166 A69-42011

Instrumentation and data interpretation method for particle size determination by low-angle light scattering

24 p4313 A69-42764

Separation theorem for arbitrary nonlinear measurements to find optimal stochastic control without dynamic programming

24 p4291 A69-43269

MECHANICAL DEVICES

Thermal IR imaging devices for shape recognition and target position, emphasizing optical mechanical image or object plane scanners using point detectors

19 p3310 A69-36064

Ordinary coherence functions for computing frequency response in mechanical systems under random excitation

20 p3537 A69-37162

Rigid and flexible coupling devices for spacecraft rendezvous, describing general operating conditions

22 p4036 A69-40008

MECHANICAL DRAWINGS

U ENGINEERING DRAWINGS

MECHANICAL DRIVES

NT HELICOPTER PROPELLER DRIVE

NT PROPELLER DRIVE

Intermittent traversing gear with stepping motor for small hypersonic helium wind tunnels

01 p0054 A69-10219

Hydrostatic bearings, hydraulic drive system and hydraulic braking system for radio telescope with 2550 tons moving weight

[ASME PAPER 68-WA/PEM-2]

05 p0743 A69-16147

Mechanically and electronically despun spacecraft antennas, comparing designs and projected performances for spin stabilized Intelsat 3 satellite

06 p0897 A69-17590

Rotary engines, discussing scissor, eccentric rotor, multiple rotor and revolving block types

07 p1203 A69-18910

Mechanical systems modeling modification to include mobile coordinates, introducing gyroscopic and pseudogyroscopic terms into motion equations

16 p2875 A69-32246

Aircraft auxiliary power systems, discussing weight and power requirements, component design, driving methods and influence on power plant design

17 p3018 A69-33217

Mechanical drives effectiveness for large antenna tracking/communications systems evaluated in terms of reliability and availability

18 p3100 A69-34522

Minimum radius of three dimensional cam gears calculated from driven element motion and pressure angle

23 p4168 A69-41413

Structural features and performance of 300 ft steerable receiving antenna, discussing aiming error, aperture efficiency, azimuth and altitude drive

23 p4148 A69-42121

MECHANICAL ENGINEERING

Book on stability criteria for linear mechanical engineering systems covering response characteristics, encirclement theorem, Routh and Hurwitz criterions, root loci, D partition, etc

02 p0281 A69-12276

Metal strip angled profile shaping by sliding application of forces with draw plate, analyzing friction effect with thin plastic shell engineering theory

03 p0432 A69-12962

Applied mechanics yearbook covering shell theory, elastic stability and other problems

05 p0831 A69-15685

Program to study interactive graphic display console systems use for solving mechanical design problems involving plate cam and follower mechanisms

05 p0724 A69-16384

Clearing and blocking control over frequently overadjusted automatic equipment in precision machine and device construction

06 p0931 A69-17692

Microminiature system mechanical design for aerospace environment, considering guidelines for implementation of requirements

[AGARDOGRAPH-114]

08 p1291 A69-20986

Stress analysis, Volume 12, Theoretical and experimental studies of strength of machine structures

11 p1980 A69-24940

Mechanical engineering applications to aerospace flight, discussing stability and piloting problems and experimental methods

11 p1824 A69-25672

Soviet collection of articles on theoretical and experimental investigations of strength of mechanical engineering structures

17 p3056 A69-33190

Guide for establishing harmonious relationships with design engineers within typical mechanical engineering department

17 p3077 A69-34198

Mechanical failure technology, describing programs of government coordinated Mechanical Failure Working Group/MFWG/

18 p3144 A69-34492

Extreme disturbance analysis and optimum performance and design problems for structural and

mechanical dynamic systems, basing solutions on linear, nonlinear and dynamic programming

18 p3106 A69-34663

Stress corrosion cracking research, history, engineering and education, incorporating stress corrosion data in mechanical design, terminology and nomenclature

19 p3348 A69-36884

Lasers and mechanical engineering - Conference, London, November 1968

22 p3960 A69-40234

Machine tools design for performing cutting operations within acceptable vibration limits

22 p3928 A69-40672

MECHANICAL IMPEDANCE

Human body dynamic response to vibration combined with linear acceleration, noting changes in body mechanical impedance and resonance

01 p0022 A69-11335

Holographic mode shapes used in conjunction with mechanical impedance approach for vibration analysis of turbine blades

[ASME PAPER 69-VIBR-32]

10 p1806 A69-24174

Fluidic feedback oscillator performance from fluid density effects analysis including supply jet, feedback line dynamics and load and control port impedances

[ASME PAPER 69-FLCS-39]

20 p3465 A69-37984

MECHANICAL MEASUREMENT

NT DISPLACEMENT MEASUREMENT

NT DRAG MEASUREMENT

NT FLOW MEASUREMENT

NT FRICTION MEASUREMENT

NT PRESSURE MEASUREMENTS

NT STRESS MEASUREMENT

NT THRUST MEASUREMENT

NT VELOCITY MEASUREMENT

NT VIBRATION MEASUREMENT

NT WIND MEASUREMENT

NT WIND VELOCITY MEASUREMENT

NT X RAY STRESS MEASUREMENT

Surveyor 5 alpha particle backscattering instrument measurement, TV pictures of lunar surface elemental composition and magnetic and mechanical measurements

02 p0317 A69-12023

In-flight measurement of shear, bending moment and torque on lifting or control surfaces and loads on nose and main landing gear

04 p0677 A69-14842

Plane shear strain measurement by means of properly oriented strain gages on surface and proper disposition of gages in Wheatstone bridge circuit

04 p0603 A69-15498

Fracture toughness measurements by means of dimensionless fracture toughness parameters, noting results for materials with very different elastic moduli

05 p0780 A69-16080

Cylindrically orthotropic hollow cylinder elastic properties determination using experimental test for production of stress and strain states and end effects

07 p1232 A69-18718

Four point flexure, ring flexure and NOL ring tension tests for evaluation of composite material mechanical properties

09 p1499 A69-22308

Capacitance methods for measuring adhesives mechanical properties in thin film bonded joints, noting results for tension, compression and shear loading

09 p1500 A69-22309

Fiber glass reinforced plastic backing phase of composite armor, noting test method for evaluation of performance

09 p1507 A69-22319

Silica fabric reinforced phenolic composites mechanical properties at temperatures above cure level

09 p1530 A69-22321

Plain strain fracture toughness tests on two inch thick maraging steel plates of various strengths, using bend and compact tension tests

10 p1795 A69-23057

Tensile strength and failure loading evaluation for structure, discussing stresses in neighborhood of crack, crack toughness measurement and fracture mechanics

12 p2176 A69-25861

Plane strain fracture toughness tests on maraging steel plates for various yield strengths and large dimensions

12 p2114 A69-26496

Wing section of high lift/drag test vehicle for 2500 F reentry, describing design, manufacture and testing

12 p2103 A69-26837

Error analysis in efficiency measurement of gas turbines, considering thermodynamics and power output

14 p2509 A69-29509

Dynamic instrumental errors of quasi-steady state mechanical meters approximated by graph analytical method

14 p2451 A69-29747

Complex mechanical vibrations causes determined by sensor signals analysis

16 p2876 A69-32434

Polyethylene stainless steel lap joints and polyethylene samples yield strengths measurements at high temperature, suggesting yield mechanism based on dislocation loops

16 p2794 A69-32572

Hall generator for measuring mechanical displacements and vibrations of 10 A, describing operating principles and arrangements

17 p2971 A69-33022

Mechanical and resistance type fatigue life indicator, comparing operating and performance characteristics [AHS PAPER 378]

17 p3059 A69-33511

Measuring elastic modulus and tensile strength of high modulus graphite fibers including comparative data, error sources and full strand test

19 p3355 A69-35520

Test stand for measurement of forces and moments from thrust vector controlled rocket, analyzing dynamic characteristics of hydrostatic supports

21 p3691 A69-39631

MECHANICAL OSCILLATORS

NT GYROSCOPIC PENDULUMS

NT PENDULUMS

Wagon rolling toward piston executing HF oscillations, discussing periodic solutions of equations of motion corresponding to piston phase at collision

04 p0630 A69-14893

Linear mechanical systems idealized by single degree of freedom system with viscous damping subjected to combined deterministic and random excitation

04 p0680 A69-14968

Impacting oscillatory devices for use as mechanical frequency dividers

07 p1136 A69-19458

Vibration machine as vibration environment simulation for product reliability testing, analyzing spectrum of acceleration waveforms

12 p2060 A69-26940

Pressure distribution in viscous flow between parallel disks with sinusoidal oscillation, noting effects of oscillation amplitude and vibrating disk velocity

[ASME PAPER 68-LUBS-1]

13 p2244 A69-27278

Viscous friction damping effect on impact vibrator stability, analyzing boundary region of multiply periodic single impact motion by point mapping

18 p3172 A69-34588

Machine parts vibration attenuation, discussing input vibration reduction, resonance avoidance, damping, vibrating parts strengthening and shakers

18 p3148 A69-34619

Monograph on frequency response characteristics of mechanical oscillator chains, calculating forced vibrations in linear systems

20 p3577 A69-37920

Hydrostatic pressure effects on mechanical properties of hot pressed, extruded and rolled polycrystalline beryllium sheet
 01 p0092 A69-10059

Beta titanium alloys mechanical properties improvement, discussing effects of alloying elements, heat treatment and high temperature deformation
 01 p0093 A69-10213

Mechanical properties of lithium fluoride single crystals, taking into account equilibrium lattice defect structures
 01 p0138 A69-10602

Interstitial impurity effects on mechanical properties of molybdenum single crystals, considering temperature dependence of flow stress in bcc metals
 01 p0095 A69-10609

Chemical vapor deposited W and W-Re alloys for structural applications, discussing fabrication methods and effects on mechanical properties
 01 p0096 A69-10641

Silicon carbide filament fabrication by chemical vapor deposition, noting physical and mechanical properties and application to other refractories
 01 p0097 A69-10645

Chemical vapor deposited W and W-Re alloys investigated for deposition variables and heat treatment effects on mechanical properties
 01 p0097 A69-10648

Collection of Soviet papers on problems of dynamics and strength, Number 15
 01 p0086 A69-10826

Mechanical properties of AZ5G-Zr-Cr alloy welded sheet subjected to biaxial stress at low temperature
 01 p0088 A69-11152

Strain measurements in pure polycrystalline Ti at constant temperature and strain, considering creep and elastic aftereffects
 01 p0101 A69-11363

Steel selection for heat treated parts, discussing strength and hardness, service conditions, carbon content, quenching, cost, etc
 01 p0101 A69-11397

High strength steel welding with physical properties equal to parent metal, discussing gas tungsten-arc, electron beam and plasma arc techniques
 01 p0088 A69-11399

Homogenous mechanical stresses in amorphous and crystalline gallium films during vacuum deposition and annealing
 01 p0141 A69-11420

Alloying additions effect on mechanical properties of Zr-V-Nb system
 02 p0263 A69-11849

Fe, Ni and Cr influence on corrosion resistance and mechanical properties of Zr-Cu-Mo system alloys
 02 p0263 A69-11853

Silicide coatings effect on Mo mechanical properties subjected to tensile tests in vacuum and air at various temperatures
 02 p0264 A69-11883

Polymeric film properties related to metal substrate interface corrosion, considering effects of stress concentration, surface cleanliness and adsorbed gases
 02 p0265 A69-11896

Metal fatigue crack propagation mechanism, deriving basic laws for failure in high and low stress regions, determining material parameters
 02 p0340 A69-12025

Vacuum heating and thermal cycling influence on mechanical and structural properties of aluminum sheets fabricated from sintered powder
 02 p0266 A69-12126

Hydroextrusion effect on Mo structure and mechanical properties, noting improved ductility after high temperature annealing
 02 p0267 A69-12189

Molybdenum elasticity limit and rupturing stress dependence on structure for high temperature annealing, noting changes in solid solution interstitial impurity concentration
 02 p0268 A69-12191

Ni-Cr-Ti-Al /Nimonic/ alloy single crystal mechanical properties at room temperature, determining importance of structure
 02 p0268 A69-12192

Lunar surface mechanical properties at Surveyor 5 site
 02 p0321 A69-12225

Mechanical behavior of materials under dynamic loads - Conference, San Antonio, September 1967
 02 p0342 A69-12277

Free surface motion and stress measuring instrumentation, describing plate impact one dimensional strain configuration for determining mechanical properties under stress wave propagation
 02 p0344 A69-12290

Kinetic theory of fracture initiation, discussing changes in relative orientation distribution of network chains
 02 p0345 A69-12401

Aluminum alloy with lithium and magnesium noting mechanical properties and electrical and corrosion resistance
 03 p0443 A69-13026

Fatigue and corrosion fatigue properties of aluminum alloys, noting elastic modulus, cyclic loading strength, corrosion resistance, etc
 03 p0443 A69-13027

Grooved commercial Ti and Ti alloys mechanical properties under uniaxial static tension at low temperatures
 03 p0443 A69-13028

Mechanical and optical viscoelastic characterization of Hysol 4290 epoxy polymer as function of time and temperature, using creep test data
 03 p0524 A69-13064

Physical and mechanical properties of surfaces and interfaces - Conference, Raquette Lake, New York, August 1967
 03 p0448 A69-13867

Surface and interface phenomena in engineering technology, determining mechanical or electronic properties
 03 p0434 A69-13868

Surface effects on metals mechanical properties, discussing dislocation dynamics and resulting effects on macroscopic plastic behavior
 03 p0448 A69-13869

Surface effects on mechanical properties of crystalline and vitreous materials, considering environmental effects on dislocation mobility
 03 p0454 A69-13870

Directional solidification and composite structures, discussing structure changes effect on mechanical properties
 03 p0449 A69-13877

Fiber-matrix interfacial bond function and bond strength role in fiber composites mechanical behavior
 03 p0450 A69-13881

Grain boundary sliding influence on gross mechanical behavior and stress distributions, emphasizing creep behavior
 03 p0450 A69-13882

Mechanical properties of thermally diffused layers obtained by vacuum chromizing of steel, establishing need to decarburize substrate material
 03 p0450 A69-13913

Chemical treatment effects on mechanical properties of titanium alloy tubes
 03 p0434 A69-13914

Powdering temperature effect on mesh size, structure and mechanical properties of pressed semifinished sintered Al-Cr and Al-Fe alloys
 03 p0452 A69-14119

Si and iron impurities effects on duraluminum alloy structure and mechanical and plastic properties for fabrication from granules and rolling from ingots
 03 p0452 A69-14120

Cold rolling and annealing effects on tensile strength, heat resistance and ductility of sintered Al powder sheets
 03 p0452 A69-14121

Alloying elements effect on mechanical and refractory properties and structure of forging of age hardenable Ni base alloys
 03 p0452 A69-14122

Machine for simultaneous creep and long term strength evaluation of multiple metallic specimens
 04 p0584 A69-14537

Prolonged loading effect on mechanical properties of 18Kh2N4VA steel at low temperature, discussing notched and unnotched specimens
 04 p0614 A69-14573

Mechanical properties and stress concentration sensitivity of structural alloys at low temperature
 04 p0614 A69-14574

Nb and Cr additions effects on Hadfield type steel mechanical properties, noting improvement especially at low temperatures
 04 p0614 A69-14579

Low temperature aging prior to higher temperature artificial aging increases Al alloys strength
 04 p0614 A69-14634

Thermal strengthening effect in aluminum due to temperature fluctuations
 04 p0615 A69-14638

Experimental high strength maraging steel mechanical properties optimization, discussing heat treatment, quenching, aging and reducing conditions
 04 p0615 A69-14645

Overheated maraging steel mechanical properties improvement by heat treatment
 04 p0615 A69-14646

Whisker research history, discussing characteristic morphology, mechanical and physical properties and future applications as reinforcing components in reinforced metals
 04 p0616 A69-14843

Strain hardening and softening characteristics of maraging steels, Ni-Co and other steels and Ti-Al-Mo alloy
 04 p0618 A69-15156

Plastic deformation effect on structure, yield point and tensile strength of aged austenitic alloy containing Ni, Cr and Ti
 04 p0618 A69-15177

Mathematical theory for describing mechanical behavior of continuous media based on principle of determinism for stress
 05 p0833 A69-15729

Mechanical and physical properties and cryogenic wear tests performed on composite materials, considering NERVA cryogenic turbopump bearing retainer development
 [ASME PAPER 68-WA/LUB-10]
 05 p0768 A69-16133

Hot working temperature effects on Rene 63 mechanical properties and microstructures, using tensile and stress rupture tests, electron microscopy and X ray diffraction analysis
 05 p0781 A69-16446

Cryogenic behavior of adhesive materials used in fabrication of liquid hydrogen/liquid oxygen powered Saturn S-4B stage
 05 p0784 A69-16487

Film processing effects on cryogenic mechanical properties of polyethylene terephthalate
 05 p0785 A69-16490

Cryogenic mechanical properties of epoxy resins and glass/epoxy composites
 05 p0785 A69-16491

Mechanical behavior of polyethylene terephthalate at cryogenic temperatures
 05 p0785 A69-16494

Vulcanizable elastomers suitable for contact with liquid oxygen, discussing preparation, mechanical properties, transition temperature and structure
 05 p0717 A69-16497

Transition temperature from brittle to plastic state of W-Mo alloys in recrystallized state, noting increased Mo content effect
 05 p0783 A69-16809

Diffusion bonded aluminum-boron composite material, discussing mechanical, metallographic and radiographic properties
 06 p0939 A69-16946

Micromechanics of boron filament reinforced aluminum composites
 06 p0940 A69-16948

Aluminum-silica fiber reinforced metal composite, discussing mechanical behavior and effect upon engineering applications
 06 p0940 A69-16949

Strain rate effect on structure and mechanical properties of rapidly stretched metals
 06 p0941 A69-17122

Stress-strain relations for laminar anisotropic medium from known mechanical properties of layers for application to fiber reinforced plastics
 06 p1021 A69-17176

Sigma formation effects on cast nickel-based superalloys properties, discussing sigma occurrence prevention for longer service life of gas turbines
06 p0942 A69-17223

Materials compatibility for space requirements, discussing shape retention, ductility, tensile strength, dissimilar materials stability, etc
06 p0945 A69-17872

Precipitation hardening stainless steels, discussing corrosion resistance, high strength, weldability, fabricability, heat treatment, etc
06 p0932 A69-17874

Ti alloys chemical composition, fatigue life, stress rupture strength, crack susceptibility and nature of stress-strain rate
07 p1161 A69-18763

Corrosion resistance and mechanical properties of Ti-Mo alloy, developing processing methods for forgings, bars and sheets
07 p1163 A69-18781

Powder metallurgy, fusion and chemical vapor deposition techniques in manufacturing tungsten base alloys
07 p1165 A69-18792

Alumina radomes fabrication and control techniques to assure reproducibility of electrical and mechanical properties, detailing finished product inspection methods
07 p1142 A69-19529

Strength increase in steel components of aircraft, missiles and subsurfaces in relation to chronological application sequence, discussing ultimate strength [ASM PAPER GG8-9.4]
07 p1169 A69-19675

Elevated temperature mechanical properties data for commercially produced super-strength alloys supplemented by product description tables
08 p1328 A69-19913

Weld mechanical properties of Ti-6Al-2Sn-4Zr-2Mo titanium alloy as function of cooling rate changes or transformation rate shifts resulting in wide range of hardnesses
08 p1318 A69-19965

Roll planishing and thermal treatments effects on gas tungsten arc welded Ti-6Al-4V alloy on residual stresses, tensile, formability and fracture toughness properties
08 p1319 A69-19966

Structural parameters influence on fiberglass reinforced plastics strength studied for optimal structure selection
08 p1335 A69-20332

Structural residual stresses determination in oriented fiberglass reinforced plastics by models taking into account mutual influence of fibers
08 p1335 A69-20333

High modulus and high strength carbon fibers and composites, discussing mechanical properties and interlaminar shear strength
08 p1338 A69-20488

Filament winding process variables effect on carbon or fiberglass reinforced composites, determining mechanical properties
08 p1338 A69-20489

Mechanical properties of cast epoxy resins correlation with corresponding composites strength under static and dynamic fatigue stressing
08 p1340 A69-20510

Direct chemical bonding effect on flexural strength and flexural modulus of glass fiber reinforced plastics, noting degradation reactions
08 p1341 A69-20514

Mechanical properties of ceramic material consisting of pure silica matrix reinforced by carbon fibers
08 p1341 A69-20700

Monograph on precipitation hardening and mechanical properties of various heat resistant alloys with Co contents to 35 percent
08 p1334 A69-20763

Viscoelastic properties of heterogeneous media of composite sphere model type obtained from shear modulus formula
08 p1417 A69-20825

Thermal stress field under uniform heat flow due to elliptical elastic inclusion for anisotropic case
08 p1418 A69-21003

Glass science and technology noting optical, electrical and mechanical properties, forming techniques, structure, ionic properties, high pressure effects and glass ceramics
08 p1341 A69-21126

Al alloys application to Concorde project and other aircraft structures, noting mechanical properties
08 p1335 A69-21141

Shell theories for polymer and reinforced plastic shells, giving revised temperature and creep problem solutions due to mechanical behavior
09 p1611 A69-21481

Dynamic tests of mechanical properties of polyamide Tarlon X-A using free and resonant vibrations methods
09 p1528 A69-21496

Spinodal decomposition effect on Al-Zn alloy mechanical properties noting strengthening, brittleness and work hardening capacity
09 p1522 A69-21501

Deformation processing of superalloy gas turbine components, studying inert characteristics, alloy segregation effect and thermomechanical properties [SAE PAPER 690101]
09 p1503 A69-21557

Heat resistant nickel alloys for castings, tabulating chemical composition, mechanical properties, heat treatment, weldability, etc
09 p1522 A69-21608

Metals structure and mechanical properties after hydroexplosive forming analyzed by X ray diffraction
09 p1503 A69-21851

In situ vacuum testing requirement for valid measurement of vacuum induced changes in mechanical and thermal properties of various filled elastomers
09 p1477 A69-22008

Boron-epoxy composites applications and properties, comparing strength to weight and stiffness to weight ratios with aluminum, titanium and beryllium
09 p1529 A69-22068

Temperature dependence of high melting point metals mechanical properties
09 p1525 A69-22138

Structure and properties of high heat resistant alloys based on high melting point metals with bcc lattice explained by electron theory
09 p1525 A69-22139

Metallic and nonmetallic matrices reinforcement by ceramic whiskers, describing mechanical properties
09 p1525 A69-22142

Alloying elements effects on structure, mechanical properties, aging and composition of precipitation hardening intermetallic phases in Ni and Fe based alloys
09 p1525 A69-22143

Mechanical properties of welds of niobium and Ni based heat resistant alloys and susceptibility to crack formation at high temperatures
09 p1504 A69-22146

Four point flexure, ring flexure and NOL ring tension tests for evaluation of composite material mechanical properties
09 p1499 A69-22308

Adhesive bonded lap joint strength dependence on adherend mechanical properties under conditions of homogeneous adherend and cohesive failure
09 p1530 A69-22317

Silica fabric reinforced phenolic composites mechanical properties at temperatures above cure level
09 p1530 A69-22321

Magnesium boron composite fabrication by diffusion bonding and liquid metal infiltration, obtaining minimized property variations and high strength to density ratios
09 p1507 A69-22332

Pyrolytic carbon felt composite development and properties, measuring and tabulating mechanical, thermal and ablation properties
09 p1530 A69-22364

Materials, processing and testing variables effects on mechanical properties determined for metal matrix composites [ASME PAPER 69-GT-23]
09 p1527 A69-22496

Titanium-boron composites for gas turbines, mechanical properties and service life in high temperature environment [ASME PAPER 69-GT-1]
09 p1527 A69-22510

Static and dynamic strength tests and modulus data for graphite fiber/epoxy composite yarn, noting ply winding and dimensions [ASME PAPER 69-GT-114]
09 p1531 A69-22520

Stress graphitizing and boron codeposition effect on dynamic mechanical properties of pyrolytic carbon, noting increase in internal friction and dynamic modulus
10 p1716 A69-23036

Ductile to brittle transition shown in tensile stress-strain curves of polycrystalline body centered cubic and hexagonal close packed materials
10 p1795 A69-23063

Austenite to martensite strain induced transformation effect on energy absorption during crack propagation
10 p1709 A69-23074

Aluminum plates bending fatigue tests, discussing mechanical properties, structural failure, grain size, strain hardening, stress-strain-time relations, heat treatment, etc
10 p1711 A69-23356

Intermolecular potential function relation to individual macroscopic properties extended to simultaneous fit of all possible pair combinations
10 p1652 A69-23391

Rubber modified thermoplastics structure and mechanical properties, emphasizing stress concentration around composite particles and crazing role in creep and fracture
10 p1716 A69-23985

Metals with combined high damping and good mechanical properties for solving fatigue, noise and vibration problems
10 p1715 A69-24044

Book on strength and failure of viscoelastic materials covering linear and three dimensional polymers or polymer-based materials, flexibility and temperature effects
11 p1970 A69-24610

Beryllium properties and processing including magnesian thermal reduction, powder purity, oxygen content, grain size and temperature effects on mechanical properties
11 p1904 A69-24897

Preliminary natural aging effects on maximum strength properties obtained at various artificial aging temperatures for aluminum ternary alloy
11 p1905 A69-24921

Aging effects on hardness and tensile strength of nickel-chromium steels at various high temperatures and time periods
11 p1906 A69-25439

Polyurethane foam high velocity deformation properties, discussing results of dynamic uniaxial stress tension and compression tests
11 p1907 A69-25648

Fiber reinforced materials shear and tensile strength effect on stress-strain state of composite materials machine parts, considering design requirements
11 p1907 A69-25680

Glass fiber reinforced plastics shells stability under external hydrostatic pressure, discussing compression and axial tests for normal elastic modulus, shear modulus and Poisson coefficient
11 p1995 A69-25681

Metal adhesive bonding strength behavior in satellite and space vehicle applications, noting effects of various space environment factors
12 p2101 A69-25858

Book on hard alloy properties, discussing bending and compression properties, tensile, torsional and impact strength, wear resistance and thermal shock resistance
12 p2111 A69-25902

Surface wave patterns of truncated conical shells with free edges attributed to mechanical properties
12 p2178 A69-26002

Nimonic alloy single crystals strengthening during plastic deformation, analyzing jump phenomenon at high and low temperatures
12 p2112 A69-26038

Plasticizer mechanical properties and content in paste, considering effects on texture of coagulation structure during die extrusion of compacts
12 p2118 A69-26257

Soviet monograph on nuclear radiation effect on structure and properties of metals and alloys covering electron, gamma and neutron radiation
12 p2114 A69-26469

Hydrogen embrittlement of stainless steel and effects on mechanical properties, discussing martensitic phase role
12 p2115 A69-26616

Soviet book on strength, stability and vibrations covering stability of rods, plates and shells subjected to plastic and elastic deformations, etc
12 p2182 A69-26755

Composite materials consisting of brittle inorganic glass matrix with metallic or inorganic crystal microspheres, noting strength and elasticity
12 p2115 A69-26830

Mechanical properties of glass, discussing volume flow, hardness, strength and scratchability
12 p2119 A69-26831

Crystal microstructure and mechanical properties of unidirectionally solidified Ni-Ni-Nb intermetallic eutectic alloy at high temperature, examining deformation and fracture modes
13 p2276 A69-27402

Temperature effects on mechanical properties and fracture behavior of lamellar Ni-nickel titanide inter-

metallic eutectic alloy showing dependence on inter-metallic constituent

13 p2277 A69-27406

Composition, gamma structure and mechanical properties of three unidirectionally solidified eutectics within Ni-Al-Cb, Ni-Al-Zr and Ni-Al-Ti systems

13 p2277 A69-27407

Plasma spray quenched Al-V alloys resulting in dispersion strengthening of material

13 p2277 A69-27409

Plastic deformation effects by hydrostatic fluid extrusion on mechanical properties of Ni maraging steels

13 p2278 A69-27414

Polymer structure relationship to thermal, mechanical and chemical properties of electrical insulating materials

13 p2285 A69-27986

Dielectric thin film electrical and mechanical properties and preparation for semiconductor devices, emphasizing Si compounds

13 p2286 A69-28004

Aluminum alloys precipitation hardening types requiring solution heat treatment, quenching and artificial aging, noting advantages in strength and weldability

13 p2282 A69-28180

Crack behavior and toughness of aluminum alloy parent metal and weldments, noting temperature effect

14 p2462 A69-29003

Ceramic and cermet materials insulating, physical and mechanical properties for use in thermionic converters

14 p2467 A69-29214

Titanium alloys for thermionic nuclear converters, discussing melting, forging, drawing and quality control of mechanical and physical properties

14 p2462 A69-29217

Beta Ti alloy initial state effect on mechanical properties and dislocation structure after cold deformation by rolling

14 p2463 A69-29313

Glass finish and glass resin chemical bond adhesion roles in filament wound structures response, failure and filament strength

14 p2468 A69-29345

Woven roving construction and fill/warp ratio effects on flexural strengths of four ply laminates

14 p2469 A69-29414

Casting variables of Co base superalloys, discussing variables effects on ultimate mechanical properties, investment casting, etc

14 p2456 A69-29893

Tungsten vacuum-arc melted samples in deformed and recrystallized conditions, studying mechanical properties at temperatures near ductile to brittle transition

15 p2637 A69-30267

Beta titanium alloys mechanical properties improvement, discussing effects of alloying elements heat treatment and high temperature deformation

15 p2637 A69-30269

Prolonged loading effect on mechanical properties of 18Kh2N4VA steel at low temperature, discussing notched and unnotched specimens

15 p2638 A69-30274

Mechanical properties and stress concentration sensitivity of structural alloys at low temperature

15 p2638 A69-30275

Metaloceramic materials strength as function of porosity calculated for tension, shear, bending and torsion deformations

15 p2638 A69-30283

VM-1 alloy investigated for creep mechanisms and ultimate strength for applications in reactors, rockets and aircraft construction

15 p2638 A69-30284

Structural strength calculations, considering micro and macro stress distributions

15 p2706 A69-30447

Concorde aircraft and engine materials selection factors including mechanical properties of metals and nonmetals, corrosion resistance, service life, sealants, weight analysis, etc

15 p2639 A69-30464

Chemical composition effect on Cr-Ni-Mo-Ti stainless maraging steels mechanical properties

15 p2640 A69-30631

Titanium effect on structural steels mechanical properties noting anisotropy ascribed to sulfides, nitrides and borides

15 p2640 A69-30633

Tensile, bending and impact strengths of materials produced by metal porous blank impregnation with molten glass, noting metal density and sintering effects

15 p2643 A69-31188

Refractory materials based on BN and silicon nitride, studying effect of sintering conditions and chemical composition on mechanical properties

15 p2643 A69-31244

Trace elements influence on precipitation process and properties of Al-Cu, Al-Zn-Mg and Al-Mg alloys, using X ray diffraction

16 p2801 A69-31783

Ti alloy forgings production for optimal mechanical properties by cross section and structural condition selection and avoidance of oxygen, nitrogen and hydrogen pickup

16 p2801 A69-31785

Slow forming forging and extrusion required for Ti alloys, discussing mechanical properties as function of beta transformation temperature

16 p2793 A69-31786

Optical measuring methods of cross sections and mechanical properties of heat resistant fiber reinforced materials

16 p2803 A69-31804

Hydroextrusion influence on mechanical properties of powder compacts of sintered Mo rods

16 p2803 A69-32491

Precipitation processes and effect on properties of Cr-Ni-W-Ti heat resistant austenitic steel, using electron diffraction and transmission electron microscopy

17 p2984 A69-32833

Dimensioning and strength calculations - Conference, Budapest, October-November 1968

17 p3051 A69-32975

Binder polymer network and microstructure effects on solid rocket propellant properties, emphasizing choice of polymer ingredients

17 p3017 A69-33668

Surface layer role in strengthening of iron determined from examining temperature dependence of internal friction during thermomechanical treatments

17 p2991 A69-33939

Lunar surface uppermost layer physical and mechanical properties investigated by soilmeter-penetrometer and radiation densimeter on Luna 13

18 p3113 A69-34239

Metallurgy, properties and applications of Co-Ni-Mo-Cr ultrahigh strength alloy, discussing corrosion

18 p3154 A69-34307

Polymer molecular structure influence on physical and mechanical properties, considering regularity, chain flexibility, crosslinking and intermolecular forces

18 p3099 A69-34606

Composite materials behavior studies for structural applications, using macroscopic and microscopic phenomenological approach

18 p3154 A69-34607

Omega phase formation in Ti and Zr alloys with transition metals, discussing effects on mechanical and superconducting properties

18 p3155 A69-34634

Hydraulically extruded Mo properties after annealing, showing reduction in stability and hardness and varying nature of change in plasticity

18 p3156 A69-34719

Silicide coatings effect on Mo mechanical properties subjected to tensile tests in vacuum and air at various temperatures

18 p3156 A69-35043

Thin brittle plastic shells mechanical properties differing under tension and compression described by solving differential equations in successive approximation

18 p3224 A69-35327

Optimal structure model of fiberglass reinforced materials with polymer matrix, obtaining strength utilization coefficient dependence on length/ diameter ratio

18 p3162 A69-35356

Metal alloys mechanical properties summary for cryogenic applications, considering fracture and thermal behavior, cryogenic structures fabrication and composites applicability

18 p3158 A69-35416

Mechanical properties and weldability of austenitic steel for cryogenic applications

18 p3158 A69-35417

Soviet collection of papers on strength and plasticity of Ni and Ti and alloys covering high temperature internal friction, deformation and creep characteristics

18 p3158 A69-35442

Group 7A and group 8 elements alloying effect on Cr dislocation structure and mechanical properties, discussing ductile-brittle transition temperature and electronic theory

18 p3160 A69-35452

B-epoxy and B-Al composites compared for strength/weight and modulus/weight ratios, moisture absorption, corrosion resistance, projected costs, etc

19 p3340 A69-35506

Syntactic foam prepreg for low density laminate construction, presenting design and mechanical test data

19 p3353 A69-35512

Mechanical properties and thermal aging of laminated specimens of collimated B monofilament reinforced composites preimpregnated with polyimide resin

19 p3354 A69-35514

Mechanical properties associated with 55-Nitinol memory effect, presenting stress-strain and electrical resistivity as function of temperature

19 p3340 A69-35523

Be/Al cast duplex alloy with Be embedded as discrete particles in Al matrix, detailing fabrication techniques and mechanical properties

19 p3340 A69-35524

Directionally solidified Co-Nb eutectic alloys mechanical properties and magnetic performance for elevated temperature space applications

19 p3341 A69-35542

Military storage and environment effects on strength of filament wound glass reinforced epoxy structures, tested on plastic motor case and pressure vessels

19 p3321 A69-35567

Elastomeric and coating materials for aerospace systems, considering temperature, rain, sand erosion, propellant and radiation resistant properties

19 p3357 A69-35586

Bonded solderless solar cell panel prototype withstanding high annealing temperature and thermal shock without electrical or mechanical degradation

19 p3251 A69-35688

Strength analysis of three layer rectangular plates under complex load and support distributions

19 p3434 A69-35827

Glass fiber with epoxy resins compared to polyester resins, discussing chemical reactions, bonding and strength relations

19 p3358 A69-35902

Morphologies and mechanical properties for identification of phosphides /schreibersite/ and carbides /cohenite/ in iron meteorites, noting nucleation and growth

19 p3417 A69-36133

Heat treatment effects on mechanical properties of Ti-Fe and Ti-Fe-Al alloys

19 p3344 A69-36151

Quenching temperature and deformation conditions for Ti alloy bars optimal mechanical properties, emphasizing effect of primary structure

19 p3328 A69-36152

Fabrication effects on high strength Al alloy plate properties, comparing texture, plane strain fracture toughness, yield stress, ultimate tensile stress and elongation

19 p3346 A69-36437

Static theory of fibrous surface media based on continuum mechanics, neighboring fibers noninteraction principle and additivity of mechanical properties

19 p3447 A69-36858

Transverse stiffness and strength of unidirectional fiber-reinforced composites determined as function of fiber volume content, using finite element method and stress functions

20 p3623 A69-37354

Inorganic heat resistant coatings high temperature mechanical tests noting corrosion, safety factors and rigidity after heating and temperature gradients

20 p3538 A69-37360

Monograph on solid rocket propellants covering composition, combustion characteristics and energetic, mechanical and operational properties

20 p3585 A69-37441

Rheology application to description, explanation and measurement of materials properties during deformation

20 p3561 A69-37599

Storage and loss moduli measurement for laminated glass fiber reinforced epoxy composite beams, discussing moduli prediction

20 p3627 A69-37763

Beta working effect on Ti alloy mechanical and fatigue properties

20 p3564 A69-38136

Carbon fiber reinforced plastics application to aircraft metal components for weight reduction, low cost and high mechanical properties

21 p3750 A69-38428

Ti-Al-V fasteners heat treated in beta field, showing superior mechanical properties to samples treated in alpha plus beta field

21 p3729 A69-38661

Ti-Al-V sheets quenched from alpha plus beta field into salt bath at various high temperatures, studying effects of bath temperature and holding time on aging and mechanical properties

21 p3730 A69-38667

Al alloys properties evaluated to determine tensile and static fracture behavior

21 p3743 A69-38668

Statistical mechanics applied to mechanical properties and thermodynamics studies of rapidly expanding or collapsing self gravitating systems

21 p3801 A69-38702

Fiber reinforced plastics mechanical behavior including thermosetting and thermoplastic polymers reinforcement mechanism

21 p3752 A69-38933

Plastic deformation combined effect with aging on mechanical properties of phase-hardened austenitic Fe-Ni-Ti alloys

21 p3746 A69-38956

High temperature electronic tensile testing device utilizing SCR to study strain rate effect on metals properties

21 p3727 A69-39811

Trace elements role in precision metallurgy for obtaining certain steel properties

21 p3750 A69-39870

Cu, Ni, Co, Cr and Ti effect on high temperature mechanical properties and stability after prolonged annealing of Al-Si alloy with added 1 percent Mg

22 p3968 A69-40063

Device determining dynamic mechanical properties of tissues and various transducers, evaluating elastic properties of polyurethane, Hevea rubber and descending thoracic aorta

22 p3890 A69-40204

Carbon monoxide effect on dog lung volume, mechanical properties and diffusing capacity

22 p3874 A69-40224

Mission sequential environment effects on Dacron parachute material mechanical properties

[AIAA PAPER 69-1018] 22 p3923 A69-40390

Preferential welding oxidation emphasized as element transfer mechanism in weld metal composition control

22 p3955 A69-40460

Dual filler metals for increasing joint efficiency by changing fusion zone composition, discussing mechanical properties in Ti and Al plates welding

22 p3956 A69-40462

Anodic Al oxide films mechanical and fracture properties, studying roles of environmental water vapor and film thickness

[ECS PAPER 81] 22 p3973 A69-40736

Residual stress effect on strength of oriented glass fiber reinforced plastics under transverse and longitudinal tension

22 p3973 A69-40745

Alloy Inconel 625 precipitation behavior and effect on short and long term properties, discussing tetragonal phase segregate and creep strength

22 p3971 A69-40802

Mechanical properties of aircraft fasteners high temperature materials

22 p3956 A69-40823

Extrastrong maraging steel based on 18 percent Ni, noting alloying elements percentages, mechanical properties and applications

22 p3971 A69-40833

Mechanical and thermal properties of vanadium alloys and austenitic stainless steels compared to determine applicability in high temperature reactor fuel jackets

22 p3971 A69-40973

Glass fibers strength in relation to surface defects, comparing behavior of flawless and commercial fibers

22 p3974 A69-41039

Nonmetallic inclusions effect on steels cyclic strength dependence on inclusion composition and metallic matrix properties, derived from fatigue tests

22 p4047 A69-41064

V contents influence on high temperature strength and fine structure interrelation in low alloy CrMoWV steels

22 p3972 A69-41083

Physicomechanical properties of tuff rock based on similarity to lunar surface rock, determining natural density, porosity and compression strength

22 p4034 A69-41105

Mechanical properties of welded joints in Kh 18N9T steel at very low temperatures using austenitic-ferritic and austenitic welds

22 p3958 A69-41204

Bright chromium electrodeposition principles and properties of coatings

22 p3958 A69-41263

Metallurgy and properties of quenched and tempered high strength Ni-Co steels, discussing welding and aerospace applications

23 p4175 A69-41299

Ingot dendrite arm spacing and thermomechanical treatment effects on fracture behavior and mechanical properties of Al alloy, finding ultimate and yield strengths

23 p4176 A69-41506

Ni based superalloy mechanical properties, determining chromium carbide discontinuous precipitation effects at various temperatures

23 p4176 A69-41507

Chromium composites mechanical properties, studying effects of alloying with spinel and magnesium oxides

23 p4177 A69-41672

Exposure rate influence on mechanical properties of polymer binder cross-linked by gamma radiation exposure from cobalt isotope source

23 p4179 A69-41711

Temperature influence on mechanical properties and creep curves of fiberglass reinforced textolites compared with data from elasticity theory

23 p4179 A69-41993

Mechanical properties of fiberglass reinforced textolite at normal temperature, noting applicability of elasticity formulas

23 p4179 A69-41994

B, silicon carbide, C and Be reinforcing fibers technology, thermal and physicomechanical properties, noting coating, surface defects and improvement over glass fibers

23 p4179 A69-42154

Low temperature mechanical properties of structural materials for high energy propulsion systems, using low boiling point propellants as liquid hydrogen, fluorine and oxygen

23 p4177 A69-42159

Cold working and aging effects on mechanical properties of TiAl-V including creep and temperature effects

[DGLR-69-002] 23 p4177 A69-42163

Lunar surface material mechanical properties from Surveyor observations, analyzing grain size, rock density, internal friction, cohesion and bulk density compared to Luna observations

24 p4383 A69-42962

Mechanical properties and dislocation configurations and densities of Nb single crystals measured at various strain rates

24 p4332 A69-43030

Mechanical properties of glass and glass-ceramics products improvement through prestressing

24 p4335 A69-43034

Shear load, cohesion and internal friction measurements of low bulk density particulate silicates of complex shape, noting significance for lunar comparison

24 p4383 A69-43040

Static mechanical strength of syntactic foam tested by generating failure conditions based on combined biaxial and triaxial stress

[ASME PAPER 69-APMW-24] 24 p4336 A69-43095

Mechanical testing procedures for brittle materials, discussing test philosophy, tabular data, laboratory tests correlation, etc

24 p4333 A69-43340

Ti and Ti alloys investment castings mechanical properties, dimensional control and corrosion resistance in aircraft and aerospace structural application

24 p4324 A69-43433

Postcured low void content graphite fiber reinforced polyimide resin composites fabrication including shear, flexural and tensile strength data

24 p4337 A69-43446

Anaerobic adhesives for aircraft bonding tested for mechanical properties, noting advantages over epoxy adhesives

24 p4338 A69-43464

MECHANICAL RESONANCE U RESONANT VIBRATION

MECHANICAL SHOCK NT HYDRAULIC SHOCK

Channel wall effect on gain of apparent mass of cylindrical and elliptical bodies floating in channel and subject to vertical impact

11 p1875 A69-25487

Shock waves in solids, discussing gas gun firing and explosive detonating at specimen, transformations measurement and materials processing applications

13 p2360 A69-27341

Shock spectra practical applicabilities to simulated and real shock equivalence, including spectra definitions and determinations

13 p2369 A69-28600

Shock development in electrothermal shock tube with performance simulation of mechanical shock tube with hot driver but turbulent or unstable driver-shock interface

14 p2427 A69-29768

Optimal active shock isolation by nonlinear elements for system subjected to shock type loadings, discussing impulse shapes

15 p2713 A69-31019

Micropropulsion system with sublimable solid fuel for satellite attitude control, satisfying mechanical and thermal environmental conditions during launch and in space

17 p3021 A69-33359

Mechanical linear accelerator simulating acceleration, shock and weightlessness, noting data acquisition and interpretation

17 p2945 A69-33423

Laplace-Carson integral transforms for analyzing surface waves generated by central impact of two elastic bodies

23 p4226 A69-41702

MECHANICAL TWINNING

Mechanical finishing abrasion induced plastic deformation microtwinning observed in thin stainless steel films by transmission electron microscopy

02 p0251 A69-11542

Ferroelectric domain structure to explain microcracks nucleated at twinband intersections in mechanically deformed lithium niobate

03 p0486 A69-13618

Crystal twinning directional effect on Mg alloys tensile yield strength degradation, investigating recovery methods

19 p3341 A69-35583

Iron meteorites microscopic and macroscopic features due to preterrestrial mechanical deformation, stressing local displacements encountered in normal or acicular kamacites

19 p3418 A69-36134

MECHANICS [PHYSICS]

Mechanical and thermodynamical theories of material behavior based on rate independence concept, discussing equivalence of various theories

01 p0166 A69-10227

Applied mechanics - Conference, Laval University, Quebec, May 1967

02 p0339 A69-11984

Higher order differential operators description and derivation of analytical mechanics for holonomic and nonholonomic systems and impact phenomena

02 p0281 A69-12199

Applied mathematics and mechanics - Conference, Prague, April 1968

10 p1675 A69-22874

Fundamental concepts of nonholonomic coupling and coordinates in nonholonomic mechanics

12 p2129 A69-25990

Physics, mathematics, mechanics - Conference, Moscow, December 1964

13 p2300 A69-28430

Computational approaches in applied mechanics - ASME Conference, Chicago, June 1969

18 p3105 A69-34657

Applied mechanics - Conference, Waterloo, Ontario, Canada, May 1969

19 p3374 A69-36655

Averaging methods applied to nonlinear equations in mechanics, discussing solution convergence estimation

20 p3576 A69-37440

Collection of papers on mechanics including quantum theory, mechanics of micropolar continua, elasticity and plasticity, rheology, etc

20 p3623 A69-37580

MECHANISM

Equations of motion of holonomic and non-holonomic mechanical systems obtained by displacement operators

22 p3980 A69-40106

MECHANIZATION

Software remechanization of conventional hyperbolic LORAN for totally passive closed loop one way direct range measurements to individual LORAN transmitters

17 p3002 A69-34079

MEDIA

NT ANISOTROPIC FLUIDS

NT ANISOTROPIC MEDIA
 NT ELASTIC MEDIA
 NT INTERGALACTIC MEDIA
 NT INTERPLANETARY DUST
 NT INTERPLANETARY GAS
 NT INTERPLANETARY MEDIUM
 NT ZODIACAL DUST

Motion of medium at ultrarelativistic velocities in general theory of relativity, noting velocity minimum at radius limit

15 p2653 A69-31067

Circular antenna arrays radiation pattern synthesis in moving medium relative to main beam, noting medium motion influence on pattern changes

22 p3915 A69-40706

MEDICAL ELECTRONICS

Linear passive electrical analog model of human systemic arterial tree, discussing artery segment modeling, vessels input impedance, wave travel, etc

17 p2908 A69-33007

Diathermy instrument using solid state circuits to provide square wave pulses, discussing operating parameters for bipolar coagulation and advantages over spark gap instruments

18 p3134 A69-34537

Variable time lapse videoscintiscopes in medical applications, discussing implementation of TV camera, signal tape recording and audio activation

18 p3134 A69-34541

Wireless telemetry system design for physiological signals in human diagnosis, discouraging casual use of wireless transmission

19 p3261 A69-36269

Electronic stethoscopes for use in high background noise environments for patients on air evacuation flights

21 p3667 A69-39444

Algorithmic approach to nonlinear signal estimation problem useful in fetal electrocardiography

21 p3668 A69-39866

Collection of papers on biomedical engineering and medical physics covering cardiac pumps, neural models, control theory, telemetry and laser applications, etc

22 p3893 A69-40784

Telemetry in medicine and biology, describing applications and operation of various systems

22 p3893 A69-40787

MEDICAL EQUIPMENT

NT RESPIRATORS
 NT STETHOSCOPES
 NT SURGICAL INSTRUMENTS

White rat physiological processes while maintained on hypothermic cardiopulmonary bypass with small membrane type heart-lung machines

05 p0708 A69-15971

Pulmonary mouth pressure and heart rate in Flack test for flight personnel by simultaneous double recordings

05 p0710 A69-16626

Cardiopulmonary bypass developed for studies of long term weightlessness on cardiovascular system of mice, white rats and squirrel monkeys

24 p4278 A69-43394

MEDICAL PERSONNEL

NT FLIGHT SURGEONS
 NT PHYSICIANS

Aircraft pilots medical disabilities as potential flight safety hazard, discussing aerospace medical specialist role and pilot education in symptoms evaluation

22 p3894 A69-41146

Private one doctor one nurse clinic at Sydney airport, discussing history, operating conditions, medical record and statistics

23 p4105 A69-41786

Interplanetary space travel medical problems during long duration missions, noting earth diagnostic and therapeutic methods adaptation, drugs selection, astronaut medical training, etc

24 p4278 A69-43396

MEDICAL PHENOMENA

NT PHENOMENOLOGY

In-flight medical disorders sustained by crew members of various aircraft in French Air Force correlated with aircraft accidents, flight experience and age

24 p4277 A69-43383

MEDICAL SCIENCE

NT DENTISTRY
 NT EPIDEMIOLOGY
 NT GYNECOLOGY
 NT HISTOLOGY
 NT IMMUNOLOGY
 NT NEUROLOGY
 NT NEUROPSYCHIATRY
 NT OTOTOLOGY
 NT PHENOMENOLOGY

NT RADIOBIOLOGY
 NT RADIOLOGY
 NT RADIOPATHOLOGY
 NT SOCIAL PSYCHIATRY

Space technology contributions to medical problems, discussing organization and achievements of biochemical application program of NASA [UN PAPER 68-95417] 01 p0020 A69-10471

Book on space clinical medicine covering hypoxia, ebullism, decompression, aerotitis, dehydration, hypothermia, cabin atmosphere contamination, urinary calculus, etc

05 p0711 A69-16801

Medical investigation of aviation accidents - Conference, Washington, D.C., September 1966

12 p2021 A69-25837

Aeromedical developments by NASA biomedical applications program applied to general medical equipment including cardiac sensors, surgical sterilization, ballistocardiograph, etc

16 p2882 A69-32430

Book on simulation in biology and medicine covering mathematical models, blood circulation, pulmonary ventilation, etc

19 p3260 A69-35894

Centrifugation for removal of bullet fragment floating freely in ventricular system of human brain to fixed safe position in left lateral ventricle wall

24 p4265 A69-43372

MEDICAL SERVICES

Aeronautical health service problems relating to efficiency of military and civil aviation personnel of all nations

12 p2023 A69-26490

Electrophysiological /electrosplanchnogram/ medical data transmission via satellite from France to U.S. for real time computer processing

16 p2746 A69-32070

Helicopter evacuation role in mortality rate among wounded in battle in Korea and Vietnam, discussing air ambulance unit organization

23 p4107 A69-41809

Medical aid organization after aircraft accidents at airports, examining injury probability by statistical methods

23 p4107 A69-41812

Medical aid, equipment and organization for injured passengers in large aircraft accidents at airports and immediate neighborhood

24 p4270 A69-42602

Algorithm for aeromedical airlift system stop selection and sequencing, minimizing patient in-system time and aircraft flight distance [AAS PAPER 69-385] 24 p4251 A69-42804

MEDIUM SCALE INTEGRATION

MSI 12 bit digital to analog converter in integrated circuit form using MOS switching circuit [AIAA PAPER 69-968] 22 p3906 A69-40349

Spacecraft onboard data handling system with MSI complementary MOS arrays, describing various components

23 p4133 A69-41739

MEETINGS

U CONFERENCES

MEISSNER EFFECT

U DIAMAGNETISM
 U SUPERCONDUCTIVITY

MELLIN TRANSFORMS

Wave scattering from nonplanar periodic structures using periodicity method, including Green function and Mellin transform

17 p2929 A69-33880

MELTING

NT ARC MELTING
 NT FUSION [MELTING]
 NT VACUUM MELTING

Gas content and impurities in aluminum melts, analyzing oxides and hydrogen interactions

01 p0098 A69-10958

Wires electric... explosion applications used to study equilibrium characteristics of metals and alloys at high temperatures

02 p0280 A69-11581

Microscopic time lapse movies in solid/liquid interface profile during melting and freezing of materials for spacecraft thermal control as reversible heat sink [AIAA PAPER 69-95] 06 p1038 A69-18126

Mathematical model for melting of finite paraffin slab based on method on numerical computer solution of heat conduction equations for thermal control devices

12 p2190 A69-26785

Particles maximum diameter numerical values for melting during injection into plasma jet calculated for various metals and refractory dielectrics

17 p3009 A69-32825

Molten iron plane melt flow duration and mass in bimetallic castings production determined using nomogram

18 p3149 A69-35289

Ramsdorf meteorite chondrules and metal particles formation attributed to shock-induced partial melting and rapid cooling

19 p3409 A69-36088

Unsteady heat transfer between gas flow and solid surface during melting

20 p3631 A69-37088

MELTING POINTS

Superconductivity and melting point of metals, discussing cause of anomalies

02 p0283 A69-11785

Melting points of tetrahedral phases with stoichiometric vacancies found proportional to covalent bonds number in semiconductors

02 p0297 A69-11881

Relative heats of formation and reduced melting temperatures of lanthanide compounds correlated to lanthanide contraction

07 p1168 A69-19597

Refractory compounds static strength temperature dependence at high temperatures measured in reference to melting temperature

09 p1523 A69-21873

Heat resistant alloying of niobium with group 4A, 5A and 6A elements, studying elements diffusion mobility dependence on melting point

09 p1525 A69-22144

Hydrogen solubility in solid and liquid Ti close to melting point, showing no effect on welds and castings porosity

11 p1905 A69-24963

Melting points of tetrahedral phases with stoichiometric vacancies found proportional to covalent bonds number in semiconductors

18 p3182 A69-35041

Melting points, electrical conductivity, Hall constants, magnetic susceptibility, density, bending strength, microhardness and elastic modulus of zirconium nitride in homogeneity range

20 p3558 A69-37014

Ammonium perchlorate melting point estimate taking into account theory of corresponding states encompassing two sets of experimental independent data

20 p3585 A69-37217

Enthalpy and heat capacity of high melting point homogeneous Ti, Zr and Nb carbides, analyzing influence of Me-Me bonds and carbon sublattice defects

21 p3742 A69-38614

Low melting point material selected model melt simulating shrinking process in castings of melt with broad liquidus-solidus interval

21 p3733 A69-39720

Fusibility diagrams for Ti-Ta-Cr by determining specimens melting points after homogenization at various temperatures in argon

22 p3969 A69-40075

MEM [EXCURSION MODULE]

U MARS EXCURSION MODULE

MEMBRANE ANALOGY

U STRUCTURAL ANALYSIS

MEMBRANE STRUCTURES

NT SKIN [STRUCTURAL MEMBER]

Hysteresis properties of membrane structures with soldered or rolled edges noting superiority of added elastic element in clamped area

01 p0087 A69-10828

Sheba family of shell elements for matrix displacement method applied to problems of thin shells under membrane and bending action

01 p0170 A69-10865

Critical internal pressure induced plastic instability in membrane shells of revolution determined by graphical numerical method

02 p0338 A69-11719

Flutter vibration in subsonic flows, analyzing critical velocity for membrane and damping destabilizing effects in nonconservative system

02 p0192 A69-12825

Stiffness matrices for sector elements under membrane stress, considering alternative displacement distributions within element

04 p0676 A69-14728

Elastic-plastic analysis of flat plates in membrane stretching and flexure, using method of initial strains [ASME PAPER 68-WA/PVP-10]

05 p0840 A69-16191

MEMBRANE THEORY

Natural frequencies and modes of skew membranes obtained by Rayleigh-Ritz method

06 p1021 A69-17146

Existence and uniqueness theorems for boundary value problems of axisymmetric deformation of circular membrane at normal pressure, using membrane theory and shooting method

07 p1233 A69-19299

Capacitance and lowest eigenvalue bounds for two dimensional anisotropic media as exemplified by transverse vibrations of stretched membrane

08 p1418 A69-20848

Finite inelastic deformations under transverse impulsive loading of clamped thin rectangular planform shells idealized as membranes, using incremental plasticity theory

09 p1616 A69-21939

Axisymmetric vibration modes of cylindrical-hemispherical membrane tank partly filled with liquid [AIAA PAPER 67-75]

09 p1482 A69-21940

Acceleration effects on cellular and subcellular structures enzyme activity in humans and animals, noting changes resulting from changed permeability of membranes

10 p1645 A69-23496

Finite deformation equations for flat annular membranes deduced from equations for thin shells of revolution, discussing displacement equations and fixed edge forces

11 p1979 A69-24813

Deformation processes of geometrically nonlinear rotational membrane shells under internal pressure

11 p1980 A69-24821

Buckling loads for anisotropic fiber reinforced composite plates with strong bending membrane coupling terms

12 p2186 A69-26840

Creep stresses and displacements in conical membrane shells at small angle of attack to supersonic flow field, discussing temperature distributions

13 p2364 A69-28205

Membrane flutter and panel stability in supersonic flow, considering infinite aspect ratio equation solution through Galerkin method

13 p2365 A69-28236

Circular membranes vibrational and stability characteristics under simultaneous constant spin and precessional motions, obtaining Hill equation for motion amplitude coefficients

13 p2370 A69-28665

Semifree elastic membranes standing waves fundamental frequency, developing variational principle for first eigenvalue

14 p2535 A69-29365

Perturbation analysis for error estimates in algebraic eigenvalues and eigenvectors problems for solving skewed membrane vibrations

15 p2703 A69-30211

Membrane analogy for flexure of prismatical beams with square cross section and longitudinal cavities, employing Saint-Venant solution

15 p2704 A69-30288

Uncoupled field equations for free large amplitude axisymmetric transverse vibrations of spinning membrane disks

15 p2704 A69-30303

Local buckling of infinite continuous plane elastic membrane under longitudinal load in form of concentrated forces

16 p2875 A69-32293

Hydrogen-oxygen ion exchange membrane fuel cells for sounding balloons, discussing flight duration and power requirements, gas supply pressure effects, etc

16 p2738 A69-32413

Eigenvalue problems in partial differential equations solved by extended Kantorovich method, considering vibration of rectangular membrane and stability of elastic rectangular plate

16 p2876 A69-32783

Nonlinear equations for elastic strain of circular toroidal membrane shell under uniform pressure, computing stress and displacement fields

18 p3216 A69-34575

Transverse vibration and wave solutions for nonlinear equations governing transverse motions of spinning circular membrane disks

19 p3440 A69-36637

Nonlinear rotational viscoelastic membranes creep rupture and failure found dependent on function of accumulated energy and power dissipation during deformation

19 p3444 A69-36806

Equilibrium equations reduced to single partial differential equation for membrane theory of shells having

coefficients of first quadratic form and specified curvature radius

20 p3622 A69-37220

Plane membranes finite deformation, deriving energy theorems for potential U bounds estimation

20 p3624 A69-37588

Complex representation of strain and displacement state in spherical shell using membrane theory, deriving shear forces resulting from single moment loading

21 p3831 A69-38416

Stiffness matrix for curved membrane shell, outlining discrete element representation of cylinders with widely spaced circumferential stiffeners

21 p3842 A69-39305

Wrinkling of pressurized cylindrical and conical fixed free membrane column under lateral load, considering membrane sheets elastic properties

22 p4045 A69-40814

High pressure hydrogen-oxygen reversible fuel cells using calcia stabilized porous zirconia as membrane and aqueous KOH as electrolyte

23 p4076 A69-42308

Asymmetric dynamic response to free and forced vibrations of thin membrane shells at given stress state due to previous loads

24 p4399 A69-42990

Finite deformation of circular elastic membrane spinning with constant angular velocity, solving nonlinear differential equations by Runge-Kutta method for three boundary conditions

24 p4404 A69-43651

Large deflections of circular air mat plates consisting of inflatable structures of two membranes connected by inextensible cords network

24 p4405 A69-43688

Oxygen and carbon dioxide transfer in membrane oxygenators, considering liquid dispersion and membrane diffusion limitations

24 p4279 A69-43799

MEMBRANE THEORY

U STRUCTURAL ANALYSIS

MEMBRANES

NT CHOROID MEMBRANES

NT ION EXCHANGE MEMBRANE ELECTROLYTES

NT MEMBRANE STRUCTURES

NT PLEURAE

NT SKIN [STRUCTURAL MEMBER]

Gyroscopically induced vibrational response of rectangular plates and membranes, determining spin and precession effects on natural frequencies

02 p0347 A69-12519

Membrane vapor diffusion for water reclamation from urine and wash water on space missions

03 p0379 A69-12992

Natural frequencies controllability by induced thermal membrane stresses examined for thin disk

04 p0682 A69-15494

Cylindrical elastic membranes with finite axisymmetric deformation, discussing exact solution by strain energy method

08 p1418 A69-21001

Abiogenic synthesis of prebiological membranes under assumed primitive earth conditions by UV radiation of alkanes on phosphate and Mg ions aqueous solutions

11 p1828 A69-25462

Molecular flow network theory extended to pulsed operation with gases mixtures having various molecular weights

13 p2247 A69-28085

Natural oscillations of loaded strings, membranes and geometric bodies with distributed loads treated as material discontinuities

20 p3578 A69-38292

Nonlinear theory of elastic membranes accounting for thickness effects, obtaining field equations and constitutive relations for various cases

21 p3832 A69-38465

Membrane vibration problems for combined free and forced laminar convection through vertical ducts, obtaining expressions for velocity, temperature and Nusselt numbers

21 p3851 A69-38974

MEMORY

Holographic theory of visual memory behavior, discussing human tests in situation of prompted visual recall

01 p0083 A69-10985

Mathematical model for information processing of biological memory as cybernetic system

23 p4110 A69-41982

Cybernetic approach to memory, proposing model characterized by hierarchical structural order and sequence to study physiological rhythms

23 p4110 A69-41983

Human body responses to microwave irradiation, discussing thermal and nonthermal effects and damage to eyes and to information storage in living systems

23 p4111 A69-42216

MEMORY STORAGE UNITS

U COMPUTER STORAGE DEVICES

MENTRUSTUATION

Jet flying effects on air hostess menstrual function, considering cycle length, duration, regularity, dysmenorrhea and flow severity

23 p4103 A69-41685

MENTAL HEALTH

Cardiovascular system, neuromuscular activity and mental fitness of subjects performing physical and mental assignments with prescribed work-rest schedule during confinement

17 p2906 A69-32936

Pilots mental and physical welfare, discussing roles of mental hygiene and preventive medicine in flight surgeons programs

18 p3097 A69-35301

MENTAL PERFORMANCE

Reduced sensory input states psychobiology, discussing brain-mind relationship and dynamic information transfer loop for normal brain-mental operations

06 p0873 A69-17020

Cybernetic structural model for learning and mental operation comprehending symbol systems, languages, homeostatic mechanisms, etc

07 p1070 A69-18385

Mental and physical human performance characteristics under thermal loads noting admissible temperatures and endurance limits

08 p1263 A69-19940

EEG electrode stimulated simian mental activity in problem solving during simulated space flight, discussing skull implantation and EEG recordings of hippocampus activity

17 p2910 A69-33749

Human radar operator effectiveness at night noting vigilance level lowering, discussing possible logic mechanism perturbation

21 p3666 A69-39268

Human mental performance impairment at simulated 8000 ft altitude indicated in increasingly difficult tests

23 p4102 A69-41680

Mental patient performance in detecting and identifying visual signals under fixed interval schedule, noting nonuniform performance and comparing to normal subjects

23 p4091 A69-42014

Psychological stress effect on human convergent and divergent thinking after presentation of disturbing or benign control films

24 p4269 A69-42555

MENTAL STRESS

U STRESS [PSYCHOLOGY]

MERCAPTAN

U THIOLS

MERCAPTO COMPOUNDS

U THIOLS

MERCATOR PROJECTION

Lunar gravimetric data reprocessed to present in usable and readable form, plotting acceleration on Mercator projection of lunar surface

18 p3194 A69-34413

MERCURY [METAL]

Exploding wire self healing fuse feasibility demonstrated with Hg, noting dynamics of conversion of electric to mechanical energy

01 p0120 A69-10677

Interferometric laser beam scanner using hollow cathode mercury ion laser output

04 p0609 A69-14288

Heated liquid mercury rotation rate and direction counter to rotating bunsen flame related to Venus cloud formations high velocities

04 p0664 A69-15466

Antimony bromine and mercury abundances in meteoritic materials determined by neutron activation analysis

08 p1404 A69-20919

Mercury concentration relation to thermal history of chondritic meteorites, using activation analysis

08 p1404 A69-20920

Liquid mercury cathode thrusters characteristics satisfying constraints imposed by solar flux variations with distance from sun [AIAA PAPER 69-237] 09 p1565 A69-21246

Liquid mercury cathode electron bombardment thrusters applicability to electric propulsion missions [AIAA PAPER 69-302] 09 p1569 A69-21876

Viscosity and electrical conductivity effects on axisymmetric instabilities of current carrying annular cylinder of mercury 11 p1923 A69-24292

Dynamic growth of positive ion sheath on plane electrode in mercury plasma, measuring sheath thickness and current 12 p2134 A69-26099

Argon ion laser with water cooled mercury pool cathode shielded by U-bent section trap, considering advantages as compared to oxide cathodes 12 p2107 A69-26326

Shift of certain Hg spectral line by high power pulse from Nd laser through perturbation of atomic energy levels 13 p2270 A69-27202

MHD channel mercury flow with hydraulic shock in transverse magnetic field, determining characteristic values distribution over range of principal parameters 13 p2307 A69-27499

MHD mercury flow in rotating torus with little friction investigated for Reynolds numbers, considering induction pump forces and magnetic field influences 14 p2500 A69-29907

Smooth and notched tensile properties of Fe-Ni alloys in liquid Hg, discussing ductility and toughness 20 p3563 A69-38025

Liquid mercury flow turbulent intensity measured by quartz insulated Pt hot-film sensors, discussing calibration equation and measurement techniques 21 p3722 A69-38769

Pitot probe measurements of Hg drop growth rates and diameters, allowing for thermal and diffusion effects 24 p4316 A69-43583

MERCURY (PLANET)

Mercury radio emission phase dependence, discussing brightness temperature value approximation and surface layer properties 02 p0314 A69-11640

Planet Mercury rotation, showing reminiscence of apparent path of sun to Ptolemaic concept of planetary system 03 p0509 A69-13368

Mercury radio emission theory, calculating Mercurian brightness temperature as function of solar illumination and distance from sun 03 p0512 A69-13688

Mercury rotation period determination by surface photography, correcting earlier interpretation 03 p0517 A69-14233

Mercury atmospheric models for preliminary environmental criteria to be used in spacecraft design and engineering trade-off studies [AIAA PAPER 69-54] 06 p1010 A69-18042

Mercury transits in 1970 and 1973 to resolve prominence threads and spicules, sunspot fine structures, etc 11 p1958 A69-24434

Icarus radar and optical observations analyzed to verify general relativity predictions using Schwarzschild metrics and to estimate solar oblateness, Mercury mass, etc 13 p2350 A69-27823

Chemical composition of earth, Venus, Mars, Mercury and moon calculated from mathematical models, constructing approximate equations of state at high pressure 14 p2526 A69-29878

Cassini laws applied to moon and Mercury, determining relations between moment differences for spin vector, orbital angular-momentum vector and precessional velocity 16 p2861 A69-32239

Suspected phase anomaly and Mercury atmosphere 17 p3034 A69-33414

Particulate thermophysical lunar soil model for measuring lunation nighttime and eclipse cooling, noting applicability to IR surface brightness temperature of Mercury hot pole 18 p3191 A69-34303

Mercury internal constitution and chemical composition, discussing models with iron cores and iron admixtures in mantle 20 p3597 A69-37331

Mercury and Venus thermal histories based on analogy to earth models 20 p3597 A69-37333

Resonant spin and anomalous rotation of Mercury, analyzing influence of tidal degradation and permanent deformation of planet 21 p3814 A69-39568

Venus and Mercury diurnal period commensurability associated with Venus spin-orbit resonance with earth orbit 22 p4018 A69-40270

Venus swingby and direct Mercury trajectories analysis for optical imaging from flyby missions [AAS PAPER 69-258] 24 p4380 A69-42860

MERCURY ARCS

Mercury ion thrusters and facilities automatic controls durability testing, discussing vacuum chamber systems, unattended operation and control [AIAA PAPER 68-576] 02 p0229 A69-12385

MERCURY COMPOUNDS

Effective masses of electrons and holes in HgSe and HgTe characterized by narrow forbidden bands and high charge carrier mobility 11 p1937 A69-24920

MERCURY LAMPS

Long lived low level chemiluminescence due to gaseous reactions at low concentrations induced by mercury lamp irradiation or Tesla coil discharge 01 p0024 A69-10618

Pulse ruby lasers with mercury lamps for pumping noting improved efficiency, power and temperature regime due to reduced IR radiation 19 p3336 A69-36347

Hg injection lamp with high power and variable spectral energy distribution as light source for testing solar radiation effects 20 p3510 A69-37630

MERCURY PROJECT

Gemini and Mercury space flights medical results, summarizing physiological effects noted on body systems 01 p0017 A69-11074

Systems engineering activities in manned space flight involving design, development, manufacture, test and operation of Mercury, Gemini and Apollo flight systems 06 p1016 A69-17602

MERCURY SPACECRAFT

Guidance and control concepts and hardware for atmospheric entry of Mercury, Gemini and Apollo spacecraft 11 p1914 A69-25724

MERCURY TELLURIDES

HgTe-CdTe single crystals homogeneity and Cd distribution obtained by Bridgman and/or zone melting studied for carrier concentration and electron mobility 09 p1557 A69-21737

Photovoltaic effects in cadmium mercury tellurides, considering band-gap variations, effective masses, mobilities, majority carrier concentration and pair lifetime 19 p3381 A69-35680

HgTe-CdTe single crystals homogeneity and Cd distribution obtained by Bridgman and/or zone melting studied for carrier concentration and electron mobility 20 p3584 A69-38215

HgCdTe as IR satellite detector for terrestrial, atmospheric and ocean mapping, IR astronomy and optical communication 24 p4362 A69-43666

MERCURY VAPOR

High sensitivity mercury vapor analysis automated to provide continuous monitoring of Hg in atmosphere, discussing winter and summer concentrations 02 p0244 A69-12019

Contact phenomena theory in decaying plasma applied to deionizing mercury vapor diode gas discharge plasma diagnostics 03 p0404 A69-13547

Equivalent pressure concept verification for arc discharge with incandescent cathode in mercury vapor 03 p0478 A69-13843

Free fall theory for afterglow decay of average electron density and temperature in pulsed cylindrical mercury vapor discharge plasma 08 p1358 A69-19811

Hollow cathode mercury electron bombardment thruster design, emphasizing low specific impulse operation and discharge chamber improvements [AIAA PAPER 69-300] 09 p1569 A69-21880

Mercury cesium plasma in crossed electric and magnetic fields as working fluid of MHD generators based on Rankine cycle 10 p1636 A69-23458

Thermal accommodation coefficient and critical supersaturation for nucleation of mercury vapor on pyrex glass 13 p2321 A69-28005

Balance equations for axial separation in anisothermal plasma columns with radial variation of neutral gas temperature applied to argon discharge with mercury vapor addition 14 p2493 A69-29690

Synthesized plasma from neutralized mercury ion beam ejected from electron bombardment source, analyzing temperature, plasma sheath and stability 14 p2502 A69-29956

Thermodynamic parameters of MHD cycle employing supercritical Hg, indicating need for more suitable fluids 16 p2736 A69-31914

I-V characteristics of caloroelectric plasma converter with concentric electrodes measured for various hot electrode temperatures and mercury vapor flow rates 16 p2822 A69-32065

RF ion thrusters using electrodeless self sustaining mercury discharge, describing basic theory, component design, performance optimization and test results 17 p3018 A69-33326

Heated Hg shock tube construction and operation, application to high electron density plasmas and problem of shock bifurcation in Hg monatomic gas 18 p3116 A69-34453

High electron density in transient mercury vapor plasma determined using He-Ne laser interferometer measurements 18 p3153 A69-35307

Mach-Zehnder laser interferometer for measurements of electron density in transient Hg vapor plasma, noting agreement with microwave measurements 22 p3965 A69-40924

MERIDIANAL FLOW

Mean meridional circulation models in tropics based on vorticity equation 03 p0460 A69-13334

Sensible and latent heat meridional transport associated with standing eddies computed from climatic mean data 04 p0627 A69-15085

Time dependent model of photochemical, advective and turbulent effects on meridional ozone distribution 07 p1122 A69-18253

Geostrophic trajectories of horizontal diffusivity estimated in midlatitude troposphere and lower stratosphere 08 p1308 A69-20310

Meridional flow, angular momentum and energy flux in atmosphere calculated from IGY data 08 p1346 A69-20312

Two level quasi-geostrophic model to probe atmospheric general circulation, noting functional dependence of zonal momentum meridional flux 08 p1346 A69-20314

Oscillation cycle of atmospheric circulation, analyzing solar activity effects on lunar and solar semidiurnal tides and transition from zonal to meridional circulation 12 p2070 A69-26692

Expansion of stream function of steady meridional flow of viscous fluid at small Reynolds numbers, giving expansion in spherical coordinates 13 p2247 A69-27737

Secular instability of steadily rotating stars, analyzing meridional motions in radiation zones by linear perturbation theory 13 p2354 A69-28566

Ozone concentration changes in polar regions and tropical zone due to meridional atmospheric circulation 14 p2442 A69-29830

Regional distribution of relative angular momentum transport over equator, noting advective and turbulent transfer 16 p2773 A69-31793

Atmospheric ozone distribution in meridional plane including time effects of photochemistry, advection and turbulence assuming zonal symmetry 16 p2785 A69-32624

Mean patterns of meridional interhemispheric flow for 40 degree equatorial sector, calculating mean air mass transport in lower troposphere over western Indian Ocean 18 p3166 A69-34420

Turbomachine blade thickness effect on meridional flow disturbances analyzed through blade geometry using differential equations 20 p3457 A69-37084

Meridional circulations in kinetic energy budget of Northern Hemisphere troposphere based on winter and summer climatic mean data, noting Hadley circulation 20 p3523 A69-37505

Model equatorial electrojet with meridional current system constructed by spherical harmonic expansion for geomagnetic field, noting current loops
20 p3533 A69-38084

WE and SN wind components models from 60 to 130 km for different months and latitudes, discussing meridional and interhemispheric circulations
23 p4154 A69-41306

Instability theory of baroclinic vortices in incompressible and inviscid fluid, investigating symmetric meridional motions time evolution by numerical integration of hydrodynamic equations
23 p4153 A69-42346

Hadley and equatorial cell models for mean meridional circulation in terms of vorticity equation
24 p4345 A69-43152

MEROMORPHIC FUNCTIONS

U ELLIPTIC FUNCTIONS

U RATIONAL FUNCTIONS

MESH

Image tube storage target mesh electrode structure and transmission data for electron beams of various velocities, noting secondary electron redistribution control
11 p1848 A69-24749

Erectable metal booms and meshes structural analysis, design and mounting and deployment techniques for space applications
19 p3433 A69-35544

MESITYLENE

Isopentane and mesitylene index of refraction variations with pressure, determining average molecular radii and polarizabilities
01 p0123 A69-10685

MESON-NUCLEON INTERACTIONS

Electromagnetic muon-nucleon interaction explanation for observed horizontal air showers, reexamining shower data in view of triplet particles
15 p2678 A69-31498

Approximations for meson-nucleus scattering length from energy level measurements on mesonic atoms, emphasizing formula for negative pi mesonic atoms
22 p3987 A69-41004

High energy negative kappa meson-nucleon interactions with respect to multiplicity distribution of charged pions in nucleon-antinucleon annihilation, showing binomial distribution
24 p4351 A69-42791

MESON RESONANCES

Fireball events, isobars and meson resonances in very high energy nuclear interactions, discussing dispersion and four momenta transfer methods
13 p2303 A69-28380

MESONS

NT K-MESONS

NT MESON RESONANCES

NT MUONS

NT PIONS

Cosmic ray meson diurnal anisotropies direction calculated on basis of subtracted diurnal vectors
02 p0306 A69-11730

Atmospheric temperature and water vapor variations and seasonal environmental changes effects on cosmic ray neutron and meson monitor counting rates
03 p0498 A69-12936

Cosmic ray meson component solar diurnal variation calculations noting amplitude, average deflection angle and dependence on zenith angle of arrival
03 p0501 A69-13752

Electromagnetic theory of gravitational forces unifying electromagnetic, meson and gravitational fields
03 p0469 A69-14096

Amplitude and phase of cosmic ray meson diurnal variation, noting less variation in neutron diurnal variation
04 p0648 A69-14374

Primary cosmic ray intensity variation with cut-off energy of particular secondary component, using ground based monitors
06 p0925 A69-17295

Geomagnetic activity correlation to cosmic ray solar daily variation underground, observing primary cosmic ray flux with meson telescopes
09 p1583 A69-22755

Low momentum muon directional coupling coefficients based on latitude survey of directional meson intensity
09 p1583 A69-22759

Nonmesonic to mesonic decay ratio estimated for delta hydrogen hyperfragments
12 p2133 A69-26298

High energy mu-mesons component of atmospheric cosmic ray showers by particle impact penetration using multiple underground ionization chambers
13 p2332 A69-28409

Meteorological corrections of meson megatelescope data based on hourly ground-level pressures and temperatures, considering vector and regression analyses
19 p3308 A69-35991

MESOPAUSE

Reversed thermal conditions in mesopause, examining atomic oxygen IR radiation effect
01 p0062 A69-10129

Near mesopause atmospheric layer energy balance, noting atomic oxygen diffusion role in redistributing absorbed solar energy among atmospheric layers
03 p0422 A69-13408

Mesopause wind measurements at high latitude locations by sounding rockets noting relation to noctilucent clouds
13 p2294 A69-28466

Ionospheric winter anomaly duration in height range of mesopause region based on zenith angle dependence of absorption at LF
16 p2782 A69-32456

MESOPHILES

Ferredoxin from thermophilic and mesophilic Clostridia, noting difference in heat stability due to iron and sulfide environments
22 p3897 A69-41068

MESOSPHERE

Rocket and radiosondes data from measurements over Northern Hemisphere used to study stratospheric and mesospheric circulation during three midwinter periods
05 p0753 A69-15800

Wind data from Arctic upper mesosphere showing easterly winds increasing with height, resolving diurnal and semidiurnal oscillations
06 p0949 A69-17005

Midwinter warmings in upper stratosphere for differences between various stratospheric and mesospheric levels, noting need for additional upper air data
08 p1345 A69-20134

Carbon dioxide absorption and emission in mesosphere, discussing vibrational relaxation time and radiative heating rate
08 p1308 A69-20308

Air movement component of winter anomaly effect on radio wave absorption in mesosphere directly detected by rocket sounding
11 p1913 A69-25436

Zonal and meridional wind components monthly global cross sections for stratosphere and mesosphere from sounding and radar data
12 p2070 A69-26577

Satellite and rocket probe measurements of water vapor in mesosphere
13 p2253 A69-27694

Cloud drift radar measurements for determining wind velocity profiles in mesosphere, using rocket released dipole reflectors
13 p2253 A69-27848

Latitudinal and vertical variations in six-month zonal wind cycles in equatorial and tropical stratosphere and lower mesosphere, utilizing rocket observations
13 p2294 A69-27854

Thermally excited diurnal wind oscillations in lower mesosphere using model atmosphere in CIRA 1965, discussing daytime ozone density profiles
14 p2441 A69-29379

Two year cyclic monsoon type variations in zonal wind distribution in tropical stratosphere and mesosphere obtained by rocket measurements
14 p2478 A69-29834

Aerosol content of mesosphere with noctilucent clouds measured with optical radar in Norway
14 p2444 A69-29877

Internal gravity waves suggested as possible cause for anomalous mesospheric temperatures
15 p2601 A69-31376

Longitudinal variations of density, temperature and pressure distributions in stratosphere and mesosphere based on rocket observations, emphasizing arctic and subarctic regions
15 p2602 A69-31379

Mesospheric fine winds structure, discussing data obtained by Skua II rocket with chaff payload
15 p2604 A69-31415

Rocket and radiosondes data from measurements over Northern Hemisphere used to study stratospheric and mesospheric circulation during three midwinter periods
17 p2962 A69-33779

Physical process providing EMF for maintaining electrical structure of stratosphere and mesosphere shown to center in lower ionospheric thermally driven tidal motions
18 p3130 A69-35103

Atmospheric flow with respect to mesoscale disturbances, examining conditions for hydrodynamic stability
18 p3167 A69-35343

Convective momentum exchange in mesoscale gravity wave
20 p3522 A69-37350

Mesosphere and lower thermosphere molecular O density from solar radiation atmospheric absorption, using satellite measurements
20 p3523 A69-37413

Solar activity effect on short term meteorological processes and dynamic state of mesosphere and ionosphere, emphasizing relationship to entire atmosphere dynamics
20 p3590 A69-37684

Mesospheric wind measurement by meteorological rockets based on radar determination of drift trajectories of chaff clouds
20 p3529 A69-37797

Distributions, seasonal variations and ionospheric implications of mesospheric nitric oxide concentration
21 p3703 A69-38364

Altitude variation of mesospheric daytime sky brightness from earth based measurements of twilight sky brightness, noting inconsistency in calculations based on standard atmospheres
21 p3716 A69-39116

Rocket optical experiment for determining water, methane, nitric oxide and ozone vertical profiles in stratosphere and mesosphere
22 p4035 A69-39910

Upper stratosphere warming and associated structure of mesosphere from rocket sounding, discussing high winds related to pressure gradient, upward vertical motion, etc
22 p3977 A69-39928

Mesospheric circulation related to noctilucent cloud data, discussing seasonal variations
24 p4307 A69-42965

MESSAGES

NT SYMBOLS

Probabilistic analysis of code message distortion due to pulse noise in modulation systems and comparison between linear and quadratic detections
17 p2919 A69-33145

METABOLIC WASTES

NT FECEs

NT HUMAN WASTES

NT URINE

Discharge rates of metabolic products in men confined in pressure chamber wearing airtight suits and gas masks
10 p1646 A69-23508

Mineralizing metabolic wastes by catalytic oxidation of pyrolysis products, noting nutritive value of ash solutions for *Chlorella* cultivation
10 p1649 A69-23579

METABOLISM

NT ADRENAL METABOLISM

NT CALCIUM METABOLISM

NT CARBOHYDRATE METABOLISM

NT ENZYME ACTIVITY

NT HORMONE METABOLISMS

NT HYPERGLYCEMIA

NT HYPOGLYCEMIA

NT LIPID METABOLISM

NT OXYGEN METABOLISM

NT PHOSPHORUS METABOLISM

NT PROTEIN METABOLISM

Basal metabolism in humans restricted to prolonged bed rest, noting decreased oxygen consumption rates
02 p0197 A69-11497

P32 distribution in protein of blood serum, liver and brains of rats bombarded with high energy protons
02 p0198 A69-11507

Handbook on metabolism and nutrition containing tables, charts and diagrams on food composition, material incorporation into organism, energy exchange and end products
04 p0553 A69-14908

Energy metabolism changes during weightlessness, considering effects on basal and nonbasal requirements connected with added increments for activity
06 p0872 A69-17014

Radiative, convective and evaporative heat losses and thermal comfort conditions for human beings, describing theoretically and empirically based equation
06 p0880 A69-17087

Objective evaluation of metabolic reactivity of organism based on biophysical model compared with experimental individual
06 p0874 A69-17595

Oxygen intake and body temperature of basal and sleeping Andean natives at high altitude
06 p0874 A69-17835

Human body cold tolerance and relation to BMR seasonal variation
06 p0876 A69-18024

Depressed metabolism - Conference, Washington, August 1968
10 p1641 A69-23116

High temperature acclimation, climates with heat dissipation problems and hibernation or torpor effects on metabolic depression in homeotherms
10 p1642 A69-23121

Electrocardiograms of homeothermic animal, hibernator, warm and cool climate poikilothermic animals compared for hypothermia, considering metabolic changes contributing to EKG changes
10 p1643 A69-23123

Physiologic and metabolic effects in humans undergoing therapeutic hypothermia
10 p1643 A69-23125

Radiation resistance of animals in hibernation and hypothermia, noting temperature dependence of protective effect
10 p1643 A69-23126

Hypokinesia effect on dynamics of metabolic processes in athletes muscular system by comparison of diuresis, creatinine excretion and cutaneous fat layer indices
10 p1646 A69-23582

Heart rate and bodily fluid changes in aestivating desert anurans, discussing weight loss and metabolism reduction
11 p1827 A69-24923

F-102 pilot anticipatory and flight stress, noting endocrine-metabolic hyperactivity
12 p2023 A69-26552

Prolonged dehydrated food diet effect on metabolism of humans, noting complete adaptation after three or four months
13 p2212 A69-28624

Preferential shifts in consumption of metabolic fuels following exposure to hydrazine or monomethylhydrazine, considering biochemical and physiological responses
14 p2407 A69-29303

Glycolysis control by respiration in human leukocytes with and without Pasteur effect conditions
15 p2555 A69-30413

Human locomotion analysis, measuring metabolic expenditure and mechanical energy levels of principal body segments during walking
15 p2558 A69-30587

Experiments integrated into single automated laboratory to detect extraterrestrial life through measuring metabolism and growth in planetary surface material
17 p2912 A69-32969

Extraterrestrial life detection experiments integrated into single multipurpose space laboratory, including chemical analyses, metabolism identification, observation for molecular and/or cellular growth and replication
17 p2912 A69-32970

Glutamic acid metabolism compartmentation in brain cortex demonstrated in vitro, using isotopic labeling
18 p3096 A69-35172

Urinalysis of crew members of first transatlantic helicopter flight indicating interindividual endocrine-metabolic variability and circadian trends modification
19 p3263 A69-36452

Mammalian brain epinephrine metabolism data after isotonic saline perfusion into cranial vasculature
21 p3650 A69-38323

Human metabolic response to hypothermia measured over wide range of work intensities and durations
22 p3891 A69-40215

Real time metabolic rate analysis of suited astronaut using heart rate and O methods during thermal vacuum and extravehicular mobility tests
[AIAA PAPER 69-993] 22 p3893 A69-40371

GABA shunt contribution to total metabolism of alpha ketoglutarate to succinate and high pressure O effect on system under in vitro conditions
22 p3877 A69-40776

Receptor and adrenergic blockade effects on blood loss, tolerated period and metabolic sequels of hypotension in dogs
23 p4098 A69-42102

X band pulsed microwaves effect on skin metabolism including respiratory activity, biochemistry and biosynthesis of intercellular materials, etc
24 p4270 A69-42575

METAGALAXY
U UNIVERSE

METAL ALLOYS
U ALLOYS

METAL BONDING
NT METAL-METAL BONDING

Electrode indentation in resistance spot welds related to weld strength for titanium, steel and aluminum alloy
01 p0086 A69-10538

Fusion, resistance and pressure welding of titanium, discussing shielding, brazing, diffusion and adhesive bonding
02 p0253 A69-12064

Metal/alumina interfaces strength, examining correlation with wetting and bonding and martensitic transformations
03 p0447 A69-13612

Braze bonds of refractory electrical contacts using induction heating
04 p0607 A69-15218

Phosphate cements for bonding mica ceramic to titanium in jet engine equipment
05 p0786 A69-16799

Diffusion bonding of whisker reinforced aluminum in closed steel die in argon atmosphere
06 p0943 A69-17238

Aluminum and aluminum alloys surface treatment prior to adhesive bonding, discussing degreasing, anodization, shear and bond strengths
07 p1141 A69-19312

Methyl 2-cyanoacrylate adhesive bonding characteristics, noting importance of film thickness
09 p1529 A69-22316

Adhesive bonded lap joint strength dependence on adherend mechanical properties under conditions of homogeneous adherend and cohesive failure
09 p1530 A69-22317

Fracture toughness of laminated adhesive bonded structures and monolithic aluminum, considering fracture stresses and ductile and brittle failure
09 p1526 A69-22318

Metallic systems microbonding and joining reliability, noting electron and laser beam welding and deposited film connections
09 p1510 A69-22348

Pulse echo ultrasonic nondestructive testing of C-5 adhesive bonded aluminum composites with multiple bond lines
10 p1698 A69-23047

Aluminum bonded structures corrosion resistance through adhesive primers and surface treatments
10 p1700 A69-24088

Diffusion processes in metal welding noting role of recovery, polygonization, recrystallization, polymorphic transformations, etc
11 p1890 A69-24799

Diffusion bonding as solid state metal joining process for nuclear and aerospace hardware, discussing tooling and nondestructive tests
[ASME PAPER 69-DE-7] 14 p2454 A69-28840

Metal joints mechanisms in soldering, brazing and welding
14 p2455 A69-29344

Bonding strength of plasma coatings with substrate, testing aluminum oxide on steel
15 p2630 A69-31189

Solar furnace for metal soldering, brazing and welding, using Pb-Sn solder for various joint types, twisted wires and rod-flange joining
16 p2793 A69-31818

Quartz fiber adhesion to Re measured in LEED /low energy electron diffraction/ apparatus for clean and O layer surfaces, noting brittle fracture
18 p3156 A69-35182

Room temperature vulcanizing silicone rubber adhesive sealants strength and self bonding, describing primerless adhesion to Ti and Al alloys, Al, Ni and stainless steels
19 p3356 A69-35532

Resistance spot welds in Al, Ti and stainless steel in air and hard vacuum, showing feasibility for space assembly
19 p3310 A69-35554

High temperature structural adhesives developed from thermoplastic aromatic-heterocyclic polymers
19 p3357 A69-35560

Beryllium bonding, evaluating various surface preparations and adhesives
19 p3320 A69-35561

Spray cleaning and deoxidizing of Al surfaces for structural bonding using sulfuric acid-sodium dichromate deoxidizer, noting tests with proprietary solutions
19 p3321 A69-35564

Diffusion welding and soldering of metallic wire with graphite and graphitized viscose applied to chromel, copel, chromel-alumel, Mo, W and W-Re
21 p3728 A69-38617

Bonding mechanisms in Mo-Mn-Ti metallizing and Cu brazing in metal to ceramic seals by strength test, microscopy and electron probe microanalysis
21 p3733 A69-39599

Load transfer to sheet metal plate from bonded strip axially loaded by single force, assuming linear viscoelastic adhesive layer
22 p4038 A69-39896

METAL CARBIDES
U CARBIDES

METAL COATINGS
NT ALUMINUM COATINGS
NT GOLD COATINGS

Chemical vapor deposition of beryllium metal coatings noting thickness, purity and processing effects on surface properties
01 p0097 A69-10644

Electroless deposition of various metals with emphasis on nickel, discussing mechanism, plating solutions, substrates, deposit properties and applications
01 p0099 A69-11060

Silicon carbide deposition from liquid organic compounds using film boiling applied on heated tungsten wire substrate
02 p0252 A69-11804

Color and appearance properties of paint films and relations to amounts and properties of colorants, noting translucent plastics and metallized paint films
04 p0620 A69-14886

Tungsten coatings applied on stainless steel and titanium alloy surfaces by plasma jet
07 p1165 A69-18931

X ray and photomicrographic study of metal layer-ceramic seal interface reaction products, discussing phase transformations, temperature effects and time dependence
08 p1320 A69-20375

Oxidation influence on molybdenum disilicide coatings emissivity, determining degree of blackness over thermal stability range
09 p1522 A69-21588

Graphite fiber electroplating with nickel on continuous basis for ribbon like continuous flexible twist free yarn
09 p1512 A69-22362

Vacuum deposition of Cr-Al film on Ni-Mo alloys, describing operating pressure, temperature and film thickness
10 p1715 A69-24013

Bulk weld filler metals, discussing granular compositions, electrodes and iron, nickel and cobalt base deposits
11 p1891 A69-24931

Deposition and interdiffusion of W layers on Mo emitter of in-core thermionic reactor, investigating microstructure of transition zone
14 p2462 A69-29210

Thermionic emission from bare and Cs-covered metal surfaces, calculating current and work function by employing localized electron orbital model
14 p2505 A69-29264

Alkaline metal adsorption on high work function metals with charge transfer, measuring polycrystalline Mo photoelectric emission as function of Cs coverage
14 p2507 A69-29275

Stannate immersion process for reduction of magnesium-steel couples galvanic corrosion, discussing bath operating limits
14 p2466 A69-29933

Electrodeposits on molybdenum alloys in high temperature oxidizing environments, noting performance of Cr-Ni-Cr composite coating
14 p2466 A69-29934

Plating wear resistant electrodeposits of Ag, Cu, Ni and Cr on Ti, noting adhesion tests
18 p3148 A69-34654

Molybdenum coatings electrodeposition from fused salt system
18 p3156 A69-35001

Reflection reduction properties of symmetrical, light transmitting three layer coating consisting of zinc sulfide-magnesium fluoride-zinc sulfide films
18 p3173 A69-35147

Thermogravimetric study of oxidation protection of refractory metals by fused LiF coating, noting oxidation retardation of Ta, Nb and W
19 p3341 A69-35573

Controllable process for forming Ti-Ni intermetallic wear resistant coating on Ti alloys, discussing techniques, weight saving advantage, gear tests, etc
19 p3323 A69-35582

- Collection of papers on protective coatings of metals
19 p3328 A69-36155
- Steels chromized by vacuum diffusion, studying depth, microstructure and properties of chromized layer
19 p3329 A69-36572
- Coating deposition theory on high temperature materials, discussing interfacial energy and wetting properties of molten metal drop on solid base material surface
20 p3560 A69-37358
- Temperature fields and stresses in heat resistant ceramic coatings, illustrating alumina coating on Mo to calculate heating rate
20 p3565 A69-37359
- Temperature effect on grain size, crystal orientation, microhardness and heat resistance of diffusion Si coatings on Mo
20 p3560 A69-37361
- Zr and Nb carbide coatings on Nb, Ta Mo and W, investigating methods for coating and base metal combinations
20 p3560 A69-37362
- Diffusion processes during formation of coatings by condensation
20 p3549 A69-37365
- Diffusion processes, composition and structure of vapor deposited Ni coatings on Nb substrate, plotting intermetallic compounds growth against temperature
20 p3560 A69-37366
- Niobium carbide deposition from gaseous halogen compounds on graphite particles in pseudoliquefied state, noting stoichiometric coatings
20 p3566 A69-37369
- Carbide coatings formation on graphite in molten media, determining diffusion coefficient of carbon in molten Zr
20 p3566 A69-37372
- Tungsten carbide erosion resistant coatings, discussing optimum plasma deposition process and coating characteristics
20 p3561 A69-37373
- Re and Re alloy powder metallurgy, noting fabrication of Re coated W particles
20 p3562 A69-37749
- Large aperture Al alloy telescope mirrors consisting of Tenzallay Al coated with Ni alloy, presenting performance data
20 p3546 A69-38193
- Plasma metal spray coating for Al and Mg alloy aircraft components adhesive bonding repair technique compared to welding and electroplating
21 p3728 A69-38462
- Metal matrix compatibility of metal coated graphitized, silicon carbide and boron fibers, discussing fiber weakening processes
[ASM PAPER W9-20.1] 21 p3751 A69-38670
- Metal or ceramic layers application to substrate by flame spraying process
21 p3731 A69-38938
- Tungsten coatings applied on stainless steel and titanium alloy surfaces by plasma jet
21 p3746 A69-39152
- Titanium diboride electrodeposition on Inconel from molten salt electrolyte at high temperatures noting electrolyte metabolates and coating thickness range
22 p3970 A69-40735
- Galvanic corrosion prevention measures for airframe fasteners, discussing crevice sealants, primers, zinc chromate, cadmium and aluminum coatings
22 p3957 A69-40825
- Wear protection of pressure loaded Ti-Mn alloy by heat diffused lubricated electrodeless Ni coatings
24 p4331 A69-42786
- METAL COMBUSTION**
- Burning ability and inflammability of mixtures of powdered Mg, Al, Mg alloys or Al alloys and C-H-O organic compounds
02 p0355 A69-12669
- Temperature distribution and vaporization rate boundary conditions on metal particle surface during preignition heating in oxygen containing medium
02 p0355 A69-12670
- Tungsten delay powders combustion mechanism and intermediate stages of burning process, noting burning rate
[WSCI PAPER 68-19] 07 p1202 A69-18370
- Metallic particle ignition in oxygen containing media, obtaining temperature curves and vaporization rates
08 p1375 A69-20343
- UV, visible and near IR spectral characteristics of hydrocarbon-air flames with particulate Al, Mg and B, noting hot metal continuum and oxide emissions
11 p1940 A69-24483
- Boron combustion for air augmented rocket applications, discussing single boron particle ignition and combustion characteristics
16 p2828 A69-31737
- Laser ignited Zr droplet free fall combustion in oxygen, analyzing metal conservation and luminosity correlation assuming reflux action from fog layer
[WSCI PAPER 69-1] 16 p2830 A69-32342
- Combustion of pulse heated single Al and Be particles in various oxidizers
[WSCI PAPER 69-2] 16 p2830 A69-32343
- Combustion of isolated aluminum particles ignited by laser and burning in controlled gas mixture observed by cinephotomicrography
[WSCI PAPER 69-3] 16 p2830 A69-32344
- Combustion of pure crystalline boron single particles injected into hot oxidizing gases streams at atmospheric pressure
[AIAA PAPER 69-562] 16 p2880 A69-32741
- Interaction between two phase dynamical and combustion parameters in one dimensional gas-metal combustion system
[AIAA PAPER 69-540] 16 p2880 A69-32742
- Aluminum oxide droplets condensation from atmosphere of metal vapor and oxygen, studying temperature and time effects on particle nucleation, growth and distribution
21 p3783 A69-38799
- Beryllium fluoride heat of formation from heat of combustion of Be-polytetrafluoroethylene mixture in fluorine
21 p3853 A69-39703
- Combustion considerations in fuel rich solid and hybrid propellant systems in air breathing propulsion for comparison with metal ignition requirements
23 p4199 A69-41894
- METAL CORROSION**
- U CORROSION**
- METAL CRYSTALS**
- Yield condition of polycrystalline hcp metal, considering slip characteristics of hcp crystals
01 p0094 A69-10304
- Theory of fatigue crack growth crystal in metals in terms of coplanar dislocation arrays extended to oblique slip planes, discussing orientation
01 p0168 A69-10344
- Soviet book on structure of thin metal films covering electron microscopic and electronographic studies, crystallization and heat treatment effects
01 p0140 A69-11106
- Vacancies and interstitials in metals - Conference, Jülich, West Germany, September 1968
02 p0267 A69-12185
- Migration and penetration of vacancies in quenched magnesium analyzed by electrical resistivity measurements and electron microscopy
02 p0267 A69-12187
- Strain rate effect on dislocation substructure in deformed niobium single crystals, investigating relationship between mechanical properties and dislocation substructure
02 p0268 A69-12287
- Free flight impact tests showing deformation curve for aluminum and copper single crystals representable as 1/4 power law
02 p0344 A69-12288
- Model of creep in solids based on Markov process, discussing dislocation movement by means of thermal activation
03 p0529 A69-13942
- Orientation dependence of pitting and blistering in proton irradiated Al polycrystal surfaces
04 p0640 A69-14451
- Unified theory of stress-strain curve of fcc metal crystals in Stages II and III of work hardening
05 p0778 A69-15755
- Cross slip model for work hardening of nickel aluminate crystals, discussing temperature dependence
05 p0779 A69-15760
- Book on plastic deformation of metals in terms of dislocation theory covering single crystals, alloying solid solutions, aggregates, annealing, etc
05 p0841 A69-16369
- Electromagnetic wave scattering in ferromagnetic crystals with anisotropy, discussing correlation functions of characteristics fluctuations and magnetoacoustic resonance
05 p0809 A69-16547
- Magnetoresistance of tellurium single crystals with various current carrier concentration at liquid helium temperatures
06 p0978 A69-16986
- Deformation and fracture of Be bicrystals grown by seeding and floating zone melting method from Be single crystal
06 p0942 A69-17225
- Diamond pyramid hardness dependence on grain size of recrystallized alpha titanium
06 p0943 A69-17235
- Unified methods based on dislocation theory for direct solution of problems pertaining to physical properties of metals
06 p0944 A69-17502
- Fatigue hardening in fcc metals, discussing dislocation distribution in unidirectionally deformed single crystals
06 p0944 A69-17503
- Chemisorption of H onto Nb (110) surface, measuring low energy electron diffraction and inelastic electron scattering from clean and H-covered surfaces
06 p0980 A69-17758
- Anomalous size effects in galvanomagnetic properties of zinc crystal samples caused by compensation
06 p0981 A69-18232
- Dislocation redistribution during annealing and shock deformation in liquid nitrogen of chromium, molybdenum and tungsten single crystals
07 p1159 A69-18534
- Ti alloy beta phase variations in quantity, composition and dispersion during quenching, thermomechanical treatment and aging
07 p1163 A69-18777
- Plastic deformation in bcc, fcc and hcp metals as function of initial impact load energy, noting strain hardening effects
07 p1166 A69-19144
- Polycrystalline Mg-Th-Zr alloy precipitation hardening investigated by tensile and hardness tests and transmission electron microscopy
07 p1167 A69-19265
- Crystal growth and deformation induced recrystallization in pure aluminum
[ONERA-TP-671] 07 p1167 A69-19340
- Polycrystalline beryllium specimens fabricated from powders, discussing initial powder particle size and distribution effects on microyield strength
07 p1168 A69-19598
- Structural defects in annealed niobium crystals observed by optical microscopy, discussing etch pits
07 p1169 A69-19603
- Subgrain diameter relation to misorientation in melt-grown aluminum single crystals from etch pitting and X ray techniques, discussing critical shear stress
08 p1330 A69-20011
- Fiber-metal matrix composites fabrication, applications, mechanical properties and powder metallurgy
08 p1332 A69-20204
- Binary vanadium alloys property change regularities using alloying elements
08 p1333 A69-20439
- Thermally activated processes influence on dislocation interaction and on temperature dependence of flow stress in niobium single crystals
08 p1333 A69-20446
- Tensile deformation properties of copper single crystals strengthened by fine dispersions of BeO particles
08 p1334 A69-20575
- Dislocation damping measurements made on Fe-18Cr-Ni alloys, noting damping relation to nickel content and stacking fault
08 p1334 A69-20576
- Alkali halide crystals destruction by laser radiation for estimating optical strength, discussing impact ionization hypothesis
08 p1328 A69-21188
- Work function change of tungsten single crystal (100) surface measured as time function during surface molecular gas adsorption
09 p1521 A69-21338
- Effective work function of Re and Mo electrode samples determined from Schottky plots and emission measurements from grains
09 p1557 A69-21807
- Surface characterization on chemical vapor deposited tungsten, evaluating grain size effect
09 p1558 A69-21810
- Partial pole figures in vapor deposited and wrought cylindrical tungsten specimens, noting random surface produced by orientation
09 p1558 A69-21811
- Omega phase transformation in binary and ternary Zr alloys after water quenching from within alpha plus beta phase region
10 p1707 A69-22988

Impurities effect on plastic flow stress and activation volume as functions of strain, strain rate and temperature in molybdenum crystals
10 p1710 A69-23089

Recrystallization diagrams of commercially pure Mo and Mo alloyed with Fe, Co or Fe plus Ni, noting additions effect on recrystallized grain size
10 p1715 A69-24012

Chromium-rhenium-boron ternary system using X ray diffraction and microstructure analysis, establishing phase equilibria at high temperatures
10 p1715 A69-24054

Zirconium-rhenium-carbon ternary system, determining resistivity of melted alloys, discussing eutectic quasi-binary compounds
10 p1715 A69-24055

Diffusion constant of Ni in Ti alloys with Al, Mo and Nb, considering beta phase
11 p1902 A69-24274

Acicular crystals growth and dendrites orientation in Mo ingots prepared by electron beam and arc melting analyzed by X rays
11 p1903 A69-24538

Gadolinium-cobalt system investigation by X ray diffraction thermoanalysis and metallography for inter-metallic compounds, noting structure transformation and homogeneity
11 p1903 A69-24574

Microsectioning technique applied to measurement of diffusion coefficients of Cr 51 in polycrystalline Nb at 1220-1766 K temperature range
11 p1903 A69-24577

Stress-strain relation in crystalline media for pure tension and elongation epsilon several times conventional elastic limit, verifying by testing Al alloy [ONERA-TP-695]
11 p1975 A69-24754

Temperature and stress dependence of microstrain and microyielding in polycrystalline W for range of impurities and dislocations, considering transition to macrostrain
11 p1905 A69-25183

Dislocation structure and surface deformation markings correlation analyzed on fatigued Al electron microscope foils
11 p1905 A69-25184

Molybdenum additive role in deformed carbonylic nickel recrystallization process
12 p2114 A69-26454

Temperature effect on tensile brittle fracture stress of polycrystalline tungsten
12 p2116 A69-27135

Molybdenum dislocation velocity and macrodeformation, noting thermal double kink mechanism inconsistencies and strain role in strain-rate relationship
13 p2276 A69-27392

Surface resistivity oscillatory dependence on magnetic field in single crystal metals, examining electron trajectories, energy levels and wave functions
13 p2316 A69-27641

Beryllium single crystals c axis compression behavior at three purity levels under hydrostatic pressures
13 p2279 A69-27760

Grain size effect on room temperature tensile strength of alpha-titanium analyzed by tensile testing and electron transmission
13 p2280 A69-27766

Polycrystalline Re high temperature plastic deformation during tensile creep, including activation energy and substructure dislocation study
13 p2280 A69-27767

Grain size and deformation velocities effects on plasticity of dispersion hardened alloy
13 p2283 A69-28489

Internal friction, Young modulus and resistivity measurements for stage I interstitials in electron irradiated tungsten
13 p2284 A69-28682

Book on defects and radiation damage in metals covering collision cascades, point defects clustering and impurities behavior
14 p2503 A69-28889

Electron work function profile determined for polycrystalline Mo and W single crystals with and without Cs vapors by emission microscope and photomultiplier
14 p2507 A69-29276

Monograph on mechanical behavior of crystalline solids at elevated temperatures, discussing creep properties of metals, solid solutions and two phase alloys
14 p2465 A69-29749

Macrostructure of steel, zinc and aluminum ingots using electromagnetic vibrations during crystallization, for stress relieving of welded structures
14 p2456 A69-29916

CoO complex defects indicated by negative enthalpy of formation, considering isobaric electrical conductivity measurements at various temperatures and oxygen pressures
14 p2508 A69-29925

Strain aging of polycrystalline Nb containing interstitial impurities as function of temperature, discussing interstitials role in recovery substages
15 p2636 A69-30194

W single crystals cleavage cracks by spark discharge, showing effective surface energy dependence on crack initiation and propagation temperatures
15 p2637 A69-30226

Heat resistant fiber composites produced by oriented eutectic crystallization in Co and Ni quaternary alloys [ONERA-TP-710]
16 p2799 A69-31765

Oxygen adsorption on Mo single crystals /100/ surface as function of temperature using low energy electron diffraction
16 p2748 A69-32795

Creep behavior of oriented Al bicrystals, emphasizing intergranular creep types and crystal orientation
17 p2985 A69-32906

Creep tests on polycrystalline Be and Be alloy at various temperatures and stresses
17 p2986 A69-32912

Thermionic emission parameters for faces of W-Re, Mo-Re and Ta-Mo single crystals determined by Richardson method of straight lines
17 p3015 A69-33630

Alkali halide crystals destruction by laser radiation for estimating optical strength, discussing impact ionization hypothesis
18 p3152 A69-35157

Group 7A and group 8 elements alloying effect on Cr dislocation structure and mechanical properties, discussing ductile-brittle transition temperature and electronic theory
18 p3160 A69-35452

Recrystallization limit effects on coarse grain growth in aluminum alloys extruded sections, studying roles of additives, extruding temperature and heat treatment duration
18 p3160 A69-35472

Crystal twinning directional effect on Mg alloys tensile yield strength degradation, investigating recovery methods
19 p3341 A69-35583

Molybdenum single crystals deformation in direct shear, determining stress temperature dependence and critical regions for various slip systems
19 p3342 A69-35811

Surface grains orientation effect on fatigue behavior in polycrystalline Al, noting strain hardening role in failure
20 p3561 A69-37597

Fe crystals dislocations dynamic behavior during plastic flow development, describing stress and temperature effects on dislocations propagation and interactions
21 p3833 A69-38569

Structural changes during annealing of W and Mo single crystals deformed by rolling, using X ray diffraction topography methods with two crystal spectrometer
21 p3742 A69-38583

Dislocations multiplication and rearrangement structure in thermal fatigue of Mo single crystals produced by electron beam zone melting
21 p3746 A69-39162

Dislocation structures in Nb-Ti alloys formed after annealing
21 p3747 A69-39163

Field emission and field-ion microscopic adsorption studies, discerning major states in chemisorption for metal-crystal surfaces
22 p3895 A69-39898

Bcc metals strengthening and alloy softening mechanisms, studying temperature and additives effects
22 p3970 A69-40166

Electron spin resonance /ESR/ of polycrystalline Mo/V/ complexes with diprydil and phenanthroline, observing hyperfine interaction due to odd numbered isotopes
22 p3897 A69-40971

Thermal isolation characteristics of low conductance interstitial materials determined, using test apparatus of axially loaded radiation shielded cylindrical column in vacuum [AIAA PAPER 68-31]
23 p4239 A69-41889

Fcc metals higher order elastic constants calculated by Morse potential function, considering atomic interactions truncation and pressure derivatives
23 p4233 A69-42337

Linear elastic theory for calculating monovacancies entropy and energy of formation in metals
24 p4360 A69-42649

Mechanical properties and dislocation configurations and densities of Nb single crystals measured at various strain rates
24 p4332 A69-43030

High temperature anelastic effect in Mo single crystals ascribed to internal friction peak due to electronic interactions between dislocations and C interstitials
24 p4332 A69-43031

METAL CUTTING

Electrochemical grinding application to metal cutting of refractory alloys in aircraft jet engine overhaul [SAE PAPER 680662]
03 p0433 A69-13453

Pressure properties of fluorides and silicofluorides as cutting and grinding lubricants for titanium [ASLE PAPER 68-LC-20]
07 p1141 A69-19311

Finish turning cutting speed effects on titanium alloy surface layers
18 p3148 A69-34548

Cutting loads measured as function of cutting rate and cutting tool geometry during boring of Cr-Ni steel pipe blanks
21 p3731 A69-38878

Machine tools design for performing cutting operations within acceptable vibration limits
22 p3928 A69-40672

Automation of single pass electric spark machining of high alloy steels and hard alloys, including anodic-mechanical profiling, cutting and drilling
23 p4168 A69-41308

Digital computer systems for automating machine parts design main metal cutting operations, emphasizing optimal instrument usage, reliability, digital algorithm language and economics
23 p4169 A69-41952

METAL DRAWING

Metal strip angled profile shaping by sliding application of forces with draw plate, analyzing friction effect with thin plastic shell engineering theory
03 p0432 A69-12962

Cold drawing workability of Nb, Mo and Ta using dies with lubrication for metal sheets
03 p0452 A69-14124

Strain rate effect on structure and mechanical properties of rapidly stretched metals
06 p0941 A69-17122

Reversion and drawing techniques for ultrahigh strength ductile maraging steel wire without excessive deformation
13 p2278 A69-27412

Unstable metal deformation, discussing volume displacement in necking leading to fracture, homogeneous total deformation and torsion
17 p3053 A69-32987

METAL FATIGUE

Low cycle fatigue life of aluminum alloy in reversed biaxial bending
01 p0093 A69-10116

Cycle dependent fatigue hardening and softening of metals in terms of crystal structure and stress amplitude
01 p0165 A69-10133

Theory of fatigue crack growth crystal in metals in terms of coplanar dislocation arrays extended to oblique slip planes, discussing orientation
01 p0168 A69-10344

Surface fatigue significance in sliding wear studied from damage on copper single crystal using electron microscope techniques
01 p0085 A69-10368

Moisture effects on crack propagation in high strength aluminum alloys studied by fatigue tests
01 p0098 A69-10766

Low stress fracture criteria for large elastic structures and small brittle laboratory specimens below transition temperature
01 p0169 A69-10768

Substructures around fatigue cracks in fcc metals and alloys, noting relation between structural formation and crack propagation
02 p0260 A69-11826

Metal fatigue crack propagation mechanism, deriving basic laws for failure in high and low stress regions, determining material parameters
02 p0340 A69-12025

Ductile crack propagation speed relation to dynamic flow properties of metals analyzed using Dugdale crack model
02 p0343 A69-12283

Plastic fatigue life of steel under rotary bending, proposing fracture criterion based on strain amplitude for low cycle stress levels

02 p0346 A69-12421

Damping capacity and resistance to resonance fatigue of titanium and aluminum based steels and alloys

03 p0443 A69-13025

Fatigue and corrosion fatigue properties of aluminum alloys, noting elastic modulus, cyclic loading strength, corrosion resistance, etc

03 p0443 A69-13027

Spin tests to determine brittle fracture under plane strain, using cyclic thermal stress or hydrostatic pressure to generate fatigue crack in rotor blank

03 p0524 A69-13060

Dynamic tensile stress-strain curves for annealed Al, Cu and Fe at constant strain rates, describing experimental method

03 p0524 A69-13065

Dispersed hard particles effect on high strain fatigue behavior of nickel at room temperature

03 p0443 A69-13121

Heavy titanium carbide precipitation on fatigue slip zones of stainless steel, noting rupture produced crystallographic facets

03 p0447 A69-13605

Stability of ductility and fatigue strength of stainless steel under long time static loads in vacuum and in liquid lithium

03 p0450 A69-13912

Fatigue strength reduction of structural steels fatigued in rotating bending after tensile deformation

03 p0450 A69-13916

Torsion bar with two inertia masses attached used to determine damping capacity and torsional fatigue strength

03 p0431 A69-13917

Fatigue mechanism in fcc metals at ultrasonic frequencies, comparing microstructural changes in copper and alpha-brass

04 p0613 A69-14448

Inelastic strain measurement in metals during cyclic loads by impact tester

04 p0674 A69-14539

Delayed rupture strength of metals and welded joints at fixed stress level

04 p0674 A69-14541

Heat treatment and shot peening effects on Al alloy fatigue strength and fine crystallographic structure

04 p0614 A69-14576

Residual gas effect on fatigue behavior of pure iron subjected to alternating bending load in ultrahigh vacuum

04 p0616 A69-14846

Random cumulative damage theory for fatigue failure of steel under sinusoidal loading taking into account randomness of time to failure and possession of memory

04 p0680 A69-15154

Cold working considered for decreasing fatigue crack propagation rate in thin duraluminum sheets with various plastic deformations

04 p0681 A69-15170

Thermal stress in fiber reinforced metals, assuming Young modulus variable when thermal stress is applied during heating and cooling

04 p0682 A69-15393

Linear cumulative damage theory defining low cycle fatigue region of classic S-N curve, providing biaxial strain mode by centrifugally loading rotors [ASME PAPER 68-WA/MET-8]

05 p0838 A69-16151

Fatigue crack growth in notched samples of aluminum alloy subjected to cyclic compressive loading, noting residual tensile strength at notch root [ASME PAPER 68-WA/MET-16]

05 p0838 A69-16154

Crack formation and propagation in metallic materials under dynamic fatigue loading, noting dislocation during work hardening

05 p0781 A69-16542

Fatigue crack propagation in machine parts under cyclic loading

05 p0842 A69-16543

Fatigue life reduction in Al alloy specimens with stress concentrations due to notches

05 p0843 A69-16696

Fatigue performance of composites consisting of W or Mo helical coils embedded in Cu matrix, discussing evaluation from microstructural behavior

06 p0940 A69-16951

Strain near fatigue crack tip in notched steel plates measured by copper electroplating method

06 p1022 A69-17198

Semiconductor device failure modes temperature dependence, discussing bonds, metallization and packaging

06 p0894 A69-17218

Fatigue hardening in fcc metals, discussing dislocation distribution in unidirectionally deformed single crystals

06 p0944 A69-17503

Collection of papers on metal fatigue theory and design

06 p1024 A69-17525

GP zones study in aluminum alloys during fatigue process by electrical measurement, discussing resistivity, cyclic deformation, loading and unloading

07 p1166 A69-18962

Fatigue damage of metals under cyclic stressing, noting deformation modes dependence on stress amplitude and material type

07 p1166 A69-19215

Metal fatigue simulation by Monte Carlo method, showing programmed fatigue tests in form of life distribution functions

07 p1233 A69-19314

Fatigue tests on steel of various diameters using standard and accelerated methods

07 p1233 A69-19315

Forging and heat treatment parameters effect on Ti-Al-V alloy low cycle fatigue properties, relating crack initiation and propagation rates to microstructures [ASME PAPER D8-24.4]

07 p1169 A69-19669

Breakdown regularity of metals having different crystal structure, considering metal lifetime dependence on stress magnitude and test temperature

08 p1328 A69-19793

Fatigue characteristics of unidirectionally solidified Al-intermetallic aluminum nickel eutectic alloy consisting of discontinuous Al-Ni intermetallic whiskers in Al matrix

08 p1329 A69-20006

Vibration characteristics of rectangular plate with fatigue crack and subject to tensile load, applying results to crack propagation in fuselage panels

08 p1413 A69-20399

Ductile fracture behavior of two phase stainless steel examined by straining smoothed and notched tensile and Charpy impact specimens

08 p1333 A69-20574

Sample changer for metal fatigue studies under ultrahigh vacuum conditions, noting successive testing in same vacuum

08 p1302 A69-20877

Aircraft structural aluminum alloy fatigue life, considering atmospheric relative and absolute humidity

09 p1521 A69-21390

Methanol-water-chloride solutions effect on titanium alloys failure time, noting effect of changing water volume on cracking

09 p1521 A69-21400

Heat resistant nickel alloys static and dynamic properties at high temperature, creep-fatigue interaction, etc

09 p1523 A69-21609

Fretting fatigue prevention in Al alloys, noting strength reduction due to fretting

09 p1526 A69-22148

Titanium alloy castings fatigue behavior at room and elevated temperatures in annealed and heat treated conditions [ASME PAPER 69-GT-22]

09 p1619 A69-22497

Oxidation effects on creep and fatigue properties of metals noting time and temperature roles

10 p1708 A69-22998

Aluminum alloy thin sheets with central transverse fatigue cracks subjected to increasing static loads to fracture, investigating crack tip deformation

10 p1709 A69-23056

Strain fatigue mechanism of crack propagation in ductile metals, considering distribution of plastic cohesive stresses at crack tip

10 p1795 A69-23059

Substructural changes during fatigue due to stacking fault energy variations related to morphology of fracture surface in solid solution Ni-Co alloys

10 p1795 A69-23060

Geometry at tip of growing fatigue crack, measuring crack propagation rate and fitting data to nucleation theory

10 p1795 A69-23062

Electron fractography of aluminum alloy fatigue for intermetallic particles and inclusions effects on crack growth

10 p1795 A69-23065

Fatigue crack propagation in cylindrical shells under fluctuating internal pressure, considering stress intensity factor

10 p1795 A69-23066

Existing predictive methods for determining high temperature low cycle fatigue life reexamination based on experiments on nickel

10 p1796 A69-23068

Mechanical model for investigating macrobehavior of cyclic fatigue crack propagation in plates of several metal alloys

10 p1796 A69-23072

High temperature effect on fatigue deformation and fracture of nickel base superalloy in single crystal and columnar grained forms

10 p1709 A69-23073

Debonding mechanism role in fatigue crack development in notched aluminum alloy samples using optical and electron microscopy

10 p1710 A69-23076

Plastic crack propagation near fatigue fracture surface during tensile mode crack growth in copper single crystals by transmission electron microscopy

10 p1797 A69-23077

Fatigue crack propagation and crack tip stresses measurements in tensioned cracked panels subjected to acoustic loading

10 p1797 A69-23078

Dislocation substructure near fatigue fracture surface during tensile mode crack growth in copper single crystals by transmission electron microscopy

10 p1797 A69-23079

Low cycle fatigue fracture behavior at high temperatures, noting fatigue crack behavior and crack density concept

10 p1797 A69-23081

Mechanical model for fatigue crack propagation assuming propagation as function of material strain cycling at crack tip

10 p1797 A69-23082

Low cycle fatigue of metals under biaxial strain, considering specimen life and strain amplitude correlation

10 p1797 A69-23083

Environment influence on fatigue crack propagation mechanisms in aluminum alloys in vacuum, ambient air and distilled and sea water

10 p1710 A69-23084

Aluminum plates bending fatigue tests, discussing mechanical properties, structural failure, grain size, strain hardening, stress-strain-time relations, heat treatment, etc

10 p1711 A69-23356

Cyclic stress-strain and fatigue behavior in aircraft structural metals, discussing hardening and softening in aluminum alloys, steels and titanium alloys

10 p1714 A69-23981

Cyclic stress-strain curve of metals determined using companion specimens, step strain tests, monotonic tension and hysteresis loop analysis

10 p1715 A69-23982

Cyclic deformation resistance and fatigue damage accumulation in aluminum alloys, aircraft steels and titanium alloys

10 p1715 A69-23983

Metal fatigue at elevated temperatures concerning viscosity, energy loss and stress, strain and temperature cycling

10 p1803 A69-24043

Macroscopic states of stress criteria for plastic flow initial yielding, plastic flow and brittle fracture of ductile and brittle metals

11 p1975 A69-24671

Tresca shear stress fatigue failure criterion and experimental data for combined bending and torsion acting out of phase

11 p1984 A69-25140

Dislocation structure and surface deformation markings correlation analyzed on fatigued Al electron microscope foils

11 p1905 A69-25184

Aircraft structures fatigue life determination based on Kordonskii method, comparing steel tests result with linear summation theory

11 p1987 A69-25345

Fcc metals cyclic deformation and fatigue dependence on cross slip of screw dislocations, considering strain hardening and crack propagation

11 p1906 A69-25389

Compressive and tensile creep of metals, discussing compressive stress, void nucleation, barreling specimen shape and platen lubrication

12 p2175 A69-25836

High speed deformation of metals under pulse loading, noting role of maximum stress magnitude and deformation characteristics

12 p2113 A69-26043

Fatigue life of Al alloy thin laminated sheets, considering cyclic frequency and temperature effects

12 p2180 A69-26359

Energy dissipation and fatigue in metals under cyclic static loads, determining logarithmic decrements of vibrations and Bauschinger effect

12 p2181 A69-26612

Fatigue crack propagation and fail-safe design for stiffened large Al alloy panels with crack stoppers, using residual strength analysis method

12 p2186 A69-26835

Metal fatigue mechanisms - Conference, Brno, Czechoslovakia, June 1968

12 p2116 A69-26911

Tension-compression fatigued alpha Ti twin formation contribution to fatigue damage during cyclic loading

12 p2116 A69-26913

Fatigue crack initiation and propagation correlation with substructure formation by static and alternating stresses in Al

12 p2188 A69-26915

Fatigue fracture surfaces in cast steel and Al alloys, studying fracture morphology, crack propagation rate and striation spacing with microfractographic methods

12 p2116 A69-26916

Oxygen content effect on tension-compression fatigue of alpha Ti alloys, discussing internal damage associated with twin formation

12 p2116 A69-27134

Microscopic mechanisms in fracture surface markings, using electron fractography cleavage, fatigue, stress corrosion cracking, microvoid coalescence and tear ridge formation

13 p2274 A69-27224

Structural modes of fracture, analyzing brittle, ductile, fatigue and stress corrosion fractures using fractography

13 p2274 A69-27226

Metal fatigue in Al alloys subjected to stress cycles, determining macrocracks propagation stages

13 p2359 A69-27291

Ambient air pressure effects on fatigue crack growth rate in strain hardened aluminum

13 p2276 A69-27393

Low cycle fatigue crack initiation in Ti-6Al-4V at room and high temperatures and in aqueous salt environment

13 p2278 A69-27413

Aluminum alloys ductile fatigue striations, considering dependence on grains crystallographic orientation and vacuum effect

13 p2278 A69-27415

Fatigue crack propagation in aged aluminum alloy sheets, studying specimen geometry and stress level variations effects

13 p2280 A69-27835

Copper and aluminum fatigue in vacuum and ultrahigh vacuum, discussing effects of hydrogen, nitrogen and oxygen pressures

13 p2280 A69-28088

Sinusoidal or random excitations equivalence from point of view of rupture risks, considering industrial applications

13 p2370 A69-28602

Physical limit model of fatigue in metals and alloys to determine stress producing plastic flow in surface layer

14 p2461 A69-28913

Linear cumulative damage theory defining low cycle fatigue region of classic S-N curve, providing biaxial strain mode by centrifugally loading rotors [ASME PAPER 68-WA/MET-8]

14 p2535 A69-29438

Titanium alloys fatigue properties at various temperatures using notched and unnotched specimens, considering vibrational fatigue strength and notch sensitivity

15 p2637 A69-30227

Heat treatment and shot peening effects on Al alloy fatigue strength and fine crystallographic structure

15 p2638 A69-30278

Structural fatigue-inducing random load spectrum analyzed and computed for laboratory simulation

15 p2705 A69-30363

Room temperature fatigue crack propagation rates for high strength aluminum alloy in heavy water environment compared with argon and distilled water

15 p2640 A69-30815

Plastic expansion in metals due to alternating torsional and static tensile loading

16 p2875 A69-32291

Short life fatigue data for metals, noting applications in design

17 p3052 A69-32978

Rotating bending fatigue tests on aluminum alloys based on statistical analysis for material strength

17 p3052 A69-32979

Load carrying capacity of thin steel plates fatigued by cyclic shear buckling

17 p3052 A69-32980

Fatigue cracks initiation and propagation studied by surface plastic replication method, noting metallographical and continuum mechanical factors influence on low carbon steel

17 p3052 A69-32981

Cumulative metal fatigue damage gauges, analyzing resistance change properties by using strain amplitude tests

17 p3053 A69-32989

Fatigue crack growth rates in stainless steel at elevated temperature measured as function of oxygen pressure in resonant fatigue machine

17 p2987 A69-33074

Low cycle fatigue behavior prediction for 304 and 306 stainless steels based on temperature and strain rate ratio to tensile ductility

17 p2987 A69-33079

Fatigue crack propagation in thin aluminum alloy plates under plane bending using microscopic surface observation and electron fractography, noting role of aging conditions

17 p3061 A69-33677

Damping, fatigue and optimal heat treatment of Cr-Ni steel for compressor blades operating at temperatures up to 500 K

17 p2990 A69-33933

Mean stresses effect on fatigue strength by specimens vibratory/tensile mean stress diagram combining Goodman line and Gerber parabola merits with increased accuracy

17 p3067 A69-34197

Testing machine for in vacuo tensile testing of tubular metallic specimens at high temperatures and low pressures

18 p3117 A69-34604

Nondestructive eddy current testing of chromium steel for early stage fatigue damage of aircraft components

18 p3136 A69-34777

Low cycle fatigue leading to failure on AISI 321 stainless steel as function of elevated temperature and straining frequency

18 p3219 A69-34834

Thermal stress in fiber reinforced metals, assuming Young modulus variable when thermal stress is applied during heating and cooling

18 p3223 A69-35021

Ti-6Al-4V alloy general and stress corrosion behavior in Freon environments, discussing fracture mechanics

18 p3150 A69-35411

Collection of articles on physical nature of plastic deformation and failure of metals

18 p3159 A69-35451

Fatigue characteristics of Al alloys by fatigue tests with complex stress patterns, finding secondary stress wave effects

19 p3342 A69-35772

Nickel base superalloy high temperature fatigue properties, comparing crack initiation and propagation in directionally solidified and conventionally cast forms

19 p3342 A69-35919

Titanium alloys wear and fatigue resistance as functions of time and temperature of nitriding by purified nitrogen

19 p3347 A69-36743

Electroplating method for local stress concentrations determination, discussing measurement techniques, metal fatigue failure prediction, etc

19 p3441 A69-36751

Stress corrosion cracking of metals related to surface phenomena involving surface reaction layer ruptures or selective electrochemical dissolution along defects

19 p3349 A69-36885

Dislocation effects on stress corrosion of metals, discussing behavior of porous structure and metal/corrosion film interface under applied stress

19 p3349 A69-36886

Stress corrosion cracking in stainless steel foils correlated with stacking fault energy and ordering, emphasizing environmental forming tendencies

19 p3350 A69-36892

Aluminum 7 percent Mg alloys stress corrosion cracking, presenting aging kinetics and depletion zone dislocations at grain boundaries

19 p3350 A69-36896

Titanium alloys stress corrosion cracking (SCC) from metallurgical-mechanical viewpoint, discussing phase transformations, dislocation arrangements, crack propagation, etc

19 p3352 A69-36902

Metallographic analysis of stress corrosion cracking of Ti alloys of Al and Sn in aqueous magnesium chloride solutions, noting cleavage process

19 p3352 A69-36903

Oxygen environment influence on Inconel X-750 surface deformation and cracking during fatigue related to chemisorption and oxidation

20 p3558 A69-36966

Apparent dynamic modulus and damping under multilevel loading during fatigue cycling to estimate stainless steel specimens cumulation fatigue lives

20 p3620 A69-36997

Soviet monograph on metal fatigue in aircraft structures, discussing effects of temperature, loading, residual stresses, surface finish and contact corrosion

20 p3622 A69-37231

Weld defect data analysis in relation to aerospace structure performance, emphasizing effect on fatigue behavior and acceptance standard [SBAC PAPER 17]

20 p3550 A69-37450

Electron beam welding for fabrication of aircraft structures, discussing fatigue strength of Ti and Al alloys and marking and low alloy steels [SBAC PAPER 12]

20 p3550 A69-37456

Surface grains orientation effect on fatigue behavior in polycrystalline Al, noting strain hardening role in failure

20 p3561 A69-37597

Fatigue crack initiation in relation to contact stresses due to fretting, studying causes of strength reduction and crack inclination to surface

20 p3563 A69-38110

Mean stresses effects on fatigue crack initiation and propagation under controlled fretting slip amplitude

20 p3563 A69-38111

Beta working effect on Ti alloy mechanical and fatigue properties [ASM PAPER D8-24.3]

20 p3564 A69-38136

B fiber reinforced Ni failure characteristics at high temperature, discussing plastic deformation and matrix role in crack inhibition

21 p3743 A69-38616

Stress concentration and surface strain hardening effects on fatigue strength of refractory alloy specimens with and without cut

21 p3745 A69-38875

Ti-Al-V forgings macro /prior beta/ grain size and in-process thermal treatment effects on fatigue life [AIME PAPER S69-2]

21 p3732 A69-39470

Thermal fatigue combined with mean stress, reversed mechanical stress, low cycle fatigue and static creep in stainless steel

21 p3847 A69-39813

Impact effects on metallic materials deformation and wear, considering impact force, time and coefficients, penetration depth, deformation energy, etc

22 p3966 A69-39876

Metal fatigue crack nucleation at stresses below static fracture strength, determining local plastic strain under cyclic loading

22 p4041 A69-40053

Uniaxial tensile testing machine to operate under combined creep and fatigue conditions for studying dislocation structure changes in metals and alloys at high temperature

22 p3926 A69-40441

Titanium stress pin with headed straight-shank pin and collar for reducing fatigue stress around holes

22 p3957 A69-40832

Partial differential equation for creep process in plane stressed metals, interrelating strain, rate, stress tensors, temperature and time

22 p4048 A69-41268

Alpha Ti fatigue properties, studying internal precracking effects in alloys of various tensile strength

23 p4178 A69-42360

Stress corrosion cracks propagation from fatigue precrack in Al alloy exposed to organic liquid environments

23 p4178 A69-42452

Cylindrical steel specimens high strain rate tensile tests, using Malvern theory for ideal elastoplastic and work hardened materials

23 p4236 A69-42529

Notch effect on corrosion fatigue behavior of high strength Al alloy under bending and direct stresses

24 p4330 A69-42553

Structural changes in subsurface layer and surface microgeometry factors of metal fatigue failure, explaining crack formation and propagation

24 p4395 A69-42559

Room temperature tensile tests determining failure modes and defect influence on diffusion welds of unalloyed Ti, using electron microscopy and fractography

24 p4331 A69-42939

Porosity and inclusions effects on Al arc weld fatigue properties at ambient and cryogenic temperatures
24 p4331 A69-42940

Low cycle fatigue strength tested on notched and unnotched round steel bars, distinguishing between fatigue lives for crack initiation and propagation
24 p4404 A69-43627

Rotational bending fatigue strength of plain and notched conventional and maraging steels, evaluating gas nitriding effects
24 p4335 A69-43802

METAL FILMS

Vortices coupling between superposed superconducting tin films as function of perpendicular magnetic field, primary current and temperature
01 p0135 A69-10014

Quasi-static Kerr magneto-optic observation and procedure to predict results of dynamic flux reversal in thin Ni-Fe films
[IEEE PAPER 11.7] 01 p0138 A69-10716

Wall streaming, creeping and parade motion in Ni-Fe films excited by hard axis pulses
[IEEE PAPER 11.8] 01 p0138 A69-10717

Soviet book on structure of thin metal films covering electron microscopic and electronographic studies, crystallization and heat treatment effects
01 p0140 A69-11106

Homogenous mechanical stresses in amorphous and crystalline gallium films during vacuum deposition and annealing
01 p0141 A69-11420

Electrical properties of vacuum deposited Bi, noting association of negative temperature coefficient of resistance in Bi thin films with grain-boundary effects
02 p0296 A69-11878

Photoelectric effect of thin gold films on silver and quartz substrates, analyzing work function dependence on thickness of deposited metal
02 p0300 A69-12630

Photoelectric effect of thin gold film under electric field, noting work function dependence on film thickness exhibits extremum
02 p0300 A69-12631

Spectrum and yield of emitted electrons resulting from passage of heavy ions through metal films
03 p0471 A69-13164

Electrical resistance temperature dependence below room temperature for polycrystalline epitaxially grown Au and Ag films, noting effects of alpha irradiation
03 p0486 A69-13582

Brittle surface films role in stress-corrosion phenomena in various environments
03 p0448 A69-13873

Superconductivity of electron beam evaporated tungsten films by X ray and electron diffraction techniques, discussing temperature dependence of energy gap
04 p0640 A69-14447

Selective etching process for microminiaturization of special circuits for aerospace
05 p0736 A69-16753

Barium, oxygen and BaO adsorption influence on Mo and Ti thin films conductivity and work functions
06 p0978 A69-16900

Passivated metal semiconductor IMPATT diode for microwave CW oscillation
08 p1286 A69-20862

Ag-GaAs Schottky barrier photodiodes, describing fabrication and use as UV radiation detectors
09 p1462 A69-21334

Presprayed metal films influence on visibility and contact resistance of GaAs prior to fusing in Sn, In and lead contacts
10 p1748 A69-24214

Electrodeposition of Te-containing Permalloy films with uniaxial magnetic anisotropy, noting electrolyte composition and film structure
11 p1935 A69-24332

Hetero-epitaxial germanium films on GaAs by germanium condensation from molecular beams in vacuum, obtaining p-type conductivity
11 p1938 A69-25033

Absorption characteristics of thin metallic films in standing light wave for mode selection and conversion in lasers
12 p2104 A69-26024

Physics of metal films - Conference, Kiev, October 1966
12 p2143 A69-26456

Vacuum evaporation effects on internal macrostresses in deposited metal films based on X ray analysis, showing substrate temperature contribution
12 p2143 A69-26457

Scale effect on gold films electrical conductivity, analyzing film thickness and electron parameters of mean free path, concentration and surface reflection
12 p2143 A69-26459

Gases effect on electrical conductivity of vacuum deposited thin films of Cr, Be, Ni, Au and Ge at different thickness and low pressure
12 p2143 A69-26460

Avalanche Schottky barrier photodiodes fabricated by plating GaAs with thin Pt layer and forming proton radiation guard ring, discussing gain bandwidth and SNR
13 p2226 A69-27195

Gold-underlayer film combinations adhesion to oxide substrates, describing adhesion changes as function of Au and underlayer film thickness, time, environment, etc
13 p2321 A69-28007

Electrical properties of electron beam evaporated Ti, Zr and Hf films as function of substrate temperature, material and film thickness
13 p2321 A69-28010

Resistivity, capacitance and dielectric loss measurements for diode reactive sputtering grown AlN films and film sandwich structures of Ta, Au and Al films
13 p2322 A69-28013

Adsorption of N, H, O and CO on thick vapor deposited Be films at room temperature
13 p2322 A69-28017

Effects of cold electron and light emission centers from dispersed Au films in electric field, as universal qualities characterizing dispersed metal films
14 p2504 A69-28992

Metal layers deposition, structure and properties obtained by H reduction of metal halides in vapor phase
14 p2462 A69-29209

Dry lubricant films of soft metals, self lubricating plastics and crystalline powders, noting design and tests
15 p2642 A69-30328

Metal film resistor reliability for conventional and space use, outlining guidelines for fabrication and quality control
15 p2628 A69-30847

Gas laser cutting of thin carbon films on thick pyrex glass and ceramic substrates
15 p2635 A69-31037

Electromigration role in material accumulation and depletion forming regions in Au film conductors, discussing regions origin from and correlation with thermal gradients along conductor
17 p2936 A69-32896

Single frequency lasers using thin metal film mode selection filters, discussing film properties and experiments with Ar ion and Nd-YAG lasers
17 p2982 A69-33399

He-Ne laser emission tuning with thin absorbing metallic film situated near reflecting mirror
20 p3555 A69-37730

Bloch wall motion along hard direction of Permalloy films due to fast rising hard-axis pulses
20 p3584 A69-38191

Metal semiconductor contact resistance determination from measuring voltage drop in current passing through contact and second metallic contact
21 p3780 A69-39046

Impurities effects on single crystal film formation of fcc metals on alkali-halide cleavage planes, stressing stacking fault energy importance
22 p3992 A69-39899

Dispersion relations for surface plasma oscillations in normal metals for single and multiple films taking into account retardation effects, noting dielectric function
22 p3992 A69-40419

Josephson currents interaction with LF surface plasmons in superposed thin dielectric and superconducting metal films, noting I-V characteristics
22 p3992 A69-40420

Physicochemical principles of electrolysis and electrodeposition of metals for obtaining bright galvanic coatings
22 p3958 A69-41262

Si integrated circuits single and composite layered metallization systems, comparing characteristics of various refractory and noble metals
24 p4286 A69-42761

Ge films formation by evaporation technique, discussing background O pressure effect
24 p4361 A69-43345

METAL FINISHING

NT ELECTROPOLISHING

NT SHOT PEENING

Metal electrolyte system for electrochemical machining in sodium chloride solution for achieving dimensional control
13 p2268 A69-27521

Military specifications validity with reference to reliability and metal finishing industry
15 p2722 A69-31120

METAL FOILS

Fatigue-damage evaluation system for transport aircraft, noting use of cumulative strain gauge that stores strain history
01 p0165 A69-10118

Photoelectric effect of thin gold films on silver and quartz substrates, analyzing work function dependence on thickness of deposited metal
02 p0300 A69-12630

Electron emission from metal foils used to study lifetime, concentration and mean ion energy of hot plasma
03 p0481 A69-14211

Smear out electron beam generation for experiments on weak plasma turbulence by passing beam through aluminum foils
04 p0636 A69-15020

Electron microscopic and microdiffraction study of structure of quenched and annealed titanium alloy foils at high temperatures
05 p0783 A69-16810

Fresnel formulas for surface plasma waves excitation by light in thin metal foil embedded between dielectric layers, discussing transmissive and absorptive resonances
08 p1372 A69-20290

Glass reinforced polyimide laminate fabrication, discussing metal foil laminates
09 p1530 A69-22363

Spontaneous martensite phase transformation in Ti-Cr alloy thin foils formed electrolytically
10 p1708 A69-22994

Dislocation structure and surface deformation markings correlation analyzed on fatigued Al electron microscope foils
11 p1905 A69-25184

Multifoil thermal insulation using oxide particle layer separation, discussing insulation heat transfer characteristics as function of source temperature and oxide particle size
14 p2539 A69-29213

Dislocation pattern in thin Mo foils deformed by hydroextrusion observed by transmission electron microscope
14 p2463 A69-29311

Thin foil penetration measurements for Fe microparticle impacts on metal and Mylar foils in space
15 p2641 A69-31339

Electron beam welding method for very thin foils, discussing welding of pinhole free Ni, Cu and stainless steel foils
17 p2977 A69-32854

Secondary recrystallization in cold rolled molybdenum foil as function of temperature using electron microscopy and diffraction
18 p3157 A69-35253

Multifoil thermal insulation for radiation shields from cryogenic temperatures to 3500 F, noting thermal conductivity
19 p3341 A69-35540

Manufacturing ultrahigh purity aluminum strip for cryogenic magnets, discussing ingot preparation, rolling, chemical milling and cleaning, arc welding, annealing and sampling
19 p3318 A69-35541

Polycrystalline nickel foil microstructure after explosive shock loading and heat treatments, using transmission electron microscopy
20 p3563 A69-38126

Solar wind sample collection, describing experiment to determine ion flux capture efficiency for various metal foils
23 p4205 A69-41539

Temperature dependence of equilibrium solid solubility of C in Au, Cu and Ag foils with respect to graphite
24 p4334 A69-43413

METAL FORGING

U FORGING

METAL FORMING

U FORMING TECHNIQUES

METAL FUELS

Composite modified cast-double-base rocket propellants with large proportions of metallic fuel and oxidizer, discussing application rocket propulsion
17 p3017 A69-33349

METAL-GAS SYSTEMS

Concentration changes in binary metal-gas solutions during simultaneous degassing kinetics and metal evaporation
09 p1528 A69-22732

Dissolved gases and carbon effect on transition temperature from plastic to brittle state of high melting metals including niobium and vanadium
10 p1715 A69-24011

Desorption of hydrogen and methane from Al, Mg and Mb under room temperature tensile deformation in ultrahigh vacuum
23 p4176 A69-41541

METAL GRINDING

Pressure properties of fluorides and silicofluorides as cutting and grinding lubricants for titanium
[ASLE PAPER 68-LC-20] 07 p1141 A69-19311

METAL HALIDES

NT ALKALI HALIDES
NT ALUMINUM CHLORIDES
NT BERYLLIUM FLUORIDES
NT CALCIUM FLUORIDES
NT CESIUM IODIDES
NT CHROMIUM BROMIDES
NT IRON CHLORIDES
NT LANTHANUM FLUORIDES
NT LITHIUM FLUORIDES
NT MAGNESIUM CHLORIDES
NT NICKEL FLUORIDES
NT POTASSIUM BROMIDES
NT POTASSIUM CHLORIDES
NT SILVER HALIDES
NT SILVER IODIDES
NT SODIUM CHLORIDES
NT TITANIUM CHLORIDES
NT URANIUM FLUORIDES

Metal fluoride compounds as cathodes for use with mixed fluoride electrolyte /LiF-NaF-KF eutectic/ in thermal batteries
10 p1640 A69-23997

Metal layers deposition, structure and properties obtained by H reduction of metal halides in vapor phase
14 p2462 A69-29209

METAL HARDENING

U HARDENING [MATERIALS]

METAL HYDRIDES

NT BERYLLIUM HYDRIDES
NT LITHIUM ALUMINUM HYDRIDES
NT LITHIUM HYDRIDES

Spectra of hydrides of Mg 25 and Mg 26 in photo-sphere, searching for weak lines on basis of isotope shifts
03 p0515 A69-14035

Nondestructive detection of titanium hydride formation in threaded joints of Ti alloy pressurization tanks by neutron radiography
24 p4320 A69-42998

METAL IONS

Metal ionic reactions with weak chemical bond breaking and three body reactions forming molecular ions without bond breaking, discussing sporadic E deionization
01 p0071 A69-11168

Midlatitude sporadic E layer, examining hypothesis of wind action on metallic ions and metallic ion accumulation caused by gravity waves
01 p0072 A69-11173

Ionized metals emission lines intensity in chromosphere observed with coronagraph, determining hydrogen concentration
02 p0314 A69-11635

Coronagraphic determination of hydrogen concentration in luminescence regions of ionized metals in lower chromosphere
03 p0420 A69-13086

Alkali metal ion sources noting cesium ion engine development for space propulsion
[ECS PAPER 170B] 03 p0478 A69-13859

Collisional ionization cross section for Fe ions evaluated to estimate solar corona temperature
04 p0651 A69-14365

Coherent emission from rare earth ions in electro-optic crystals, noting oscillations and electric field modulation occurrence
09 p1514 A69-21339

Cs and K ions drift velocity calculations in vapors of own atoms under various electric field strengths effect
11 p1922 A69-24226

Stimulated emission cross section measurement of Nd ions in calcium tungstate using Edwards method
11 p1938 A69-25049

Microwave analysis of plasmas produced by laser beam on aluminum spheres, noting expansion velocity and electron density
11 p1930 A69-25287

Uranyl ions interaction with phospholipid and cholesterol monolayers, using surface pressure and potential measurements
11 p1832 A69-25641

Oscillator strengths and wavelengths of X ray and EUV transitions in highly ionized iron line spectra
13 p2326 A69-27554

Fe III line profiles and equivalent widths from spectrograms of zeta Cas and gamma Peg for Fe abundance, using model atmospheres
13 p2347 A69-27715

Coronagraphic determination of hydrogen concentration in luminescence regions of ionized metals in lower chromosphere
14 p2433 A69-28768

Fe and Ti line growth in 12 July 1961 solar flare spectrum, finding ionized titanium, neutral and ionized iron excitation temperatures
14 p2514 A69-29720

Fe II forbidden lines profiles and equivalent widths prediction for solar photospheric spectrum, deducing photospheric Fe abundance
16 p2854 A69-31652

Center limb observations of Ca II emission core interpretations, discussing chromospheric thickness effects on Doppler width
16 p2854 A69-31653

Coronal Fe ionization lines X, XIII and XIV photographed by UV coronagraph
16 p2847 A69-31661

Charge transfer cross section between mercury ion and Cs assessed, considering ion engine positive ion beam neutralization
16 p2835 A69-31895

Meteoritic elements ionization and loss mechanisms in E region, discussing roles of atomic oxygen and metal ions chemical reactions
16 p2780 A69-32313

MH alpha 328116 /Cygnus/ spectrum noting three Fe IV lines
16 p2866 A69-32815

Catalytic activity enhancement of complex Co/III/ compounds on standing explained by hydrated Co/II/ ions appearance
17 p2988 A69-33433

Tau-luminescence in thin gamma-colored and uncolored ruby crystals containing Cr ions measured, discussing ions absorption spectrum changes
19 p3335 A69-36166

Ammonium perchlorate experimental heat capacity data significance for rotational freedom of ammonium ion
20 p3484 A69-37344

Ultrasonic paramagnetic resonance investigations of Pr ions ground state energy levels in calcium fluoride
24 p4360 A69-42790

Elastic differential Li ion scattering cross sections on helium, nitrogen and oxygen
24 p4354 A69-43817

METAL JOINTS

NT SOLDERED JOINTS
NT SPOT WELDS
NT WELDED JOINTS

Fusion, resistance and pressure welding of titanium, discussing shielding, brazing, diffusion and adhesive bonding
02 p0253 A69-12064

Beryllium assemblies for aerospace and nuclear requirements, emphasizing braze joining structural components and effective manufacturing methods
[SAE PAPER 680651] 03 p0433 A69-13454

Glued metal joints under cyclic loading evaluated by change in short term strength as function of time at stress levels
04 p0605 A69-14540

Metal welding procedures for aircraft assembly, discussing weight, specific alloys and airframe components
04 p0608 A69-15483

Reliable fluid transmission systems by brazed joints, noting base and filler metals, fitting designs and various processes
09 p1507 A69-22333

Joining methods for fabricating thoria dispersion strengthened nickel and nickel chromium materials
09 p1509 A69-22342

Vacuum brazing technique for joining dissimilar metals without oxide and nitride film contamination
09 p1509 A69-22343

Metallic systems microbonding and joining reliability, noting electron and laser beam welding and deposited film connections
09 p1510 A69-22348

Thermal resistance of bolted or screwed sheet metal joints in vacuum, using method applicable to different materials and surface finishes
12 p2191 A69-26803

Adhesive metal bonding methods including continuous surface bonds, core to face bonds, lap joints and structural adhesive materials
14 p2454 A69-28847

Metal joints mechanisms in soldering, brazing and welding
14 p2455 A69-29344

Solar furnace for metal soldering, brazing and welding, using Pb-Sn solder for various joint types, twisted wires and rod-flange joining
16 p2793 A69-31818

Thermal silicone grease type filler materials for heat transfer across bolted or clamped sheet metal surfaces in electronic equipment for space applications
16 p2794 A69-32560

Wire-wrap solderless joints production technology in electronic equipment
16 p2763 A69-32579

Dielectric overcoating effects on electromigration Al interconnections, showing dependence on thickness and surface passivation
17 p2935 A69-32889

Vacuum and thermal environment long term influence on thermal resistance for Mg to aluminum and Mg to Mg bolted joints
[AIAA PAPER 69-628] 17 p3073 A69-33309

Diffusion bonding of metals, discussing interface joining processes and application to fluoric devices, jet engine servovalves and porous woven structures
17 p2978 A69-33374

Machined fastened joints for airframe structural parts, discussing fatigue life, strength and fastener hole preparation
19 p3319 A69-35553

Outdoor aging effects on unstressed Al-Al lap shear joints bonded by various polymeric adhesives
19 p3320 A69-35562

Various fasteners influence on fatigue life of bolted joints, noting high clamping force beneficial effect
24 p4325 A69-43438

F-111 sandwich structure adhesive joints glue-lines, describing thickness measurement techniques and acceptance criteria
24 p4403 A69-43461

METAL MATRIX COMPOSITES

Bonded Al-B metal matrix composite materials hot press fabrication and design, discussing temperature pressure time cycles and honeycomb sandwich structures
09 p1510 A69-22351

Materials, processing and testing variables effects on mechanical properties determined for metal matrix composites
[ASME PAPER 69-GT-23] 09 p1527 A69-22496

Aluminum-boron metal matrix composite joining methods including electron beam, resistance spot, plasma arc and fusion welding
[ASM PAPER W9-23.4] 14 p2455 A69-29449

Tensile and creep deformation of fiber reinforced composites consisting of Mg-Li alloy matrix with high strength precipitation hardening stainless steel wire
17 p2986 A69-33073

B-epoxy and B-Al composites compared for strength/weight and modulus/weight ratios, moisture absorption, corrosion resistance, projected costs, etc.
19 p3340 A69-35506

Forming, machining and joining characteristics of B-Al composite sheet metal material for space structures
19 p3318 A69-35507

Beryllium wire reinforced Al composites, discussing layup techniques and coated filament advantages
19 p3340 A69-35508

Silicon carbide coated boron fibers in aluminum alloy matrix, discussing tensile and structural properties of braze bonded specimens
19 p3340 A69-35509

Electroforming of Al matrix composites by codeposition of short graphite fibers, obtaining increased strength and elastic modulus
19 p3318 A69-35510

Filament reinforced metal matrix composites made by continuous casting process, discussing tensile tests results and production costs
19 p3318 A69-35511

Silicon carbide coated boron fiber reinforced /Bor-sic/ Al composites tensile strength and elastic properties
19 p3344 A69-35926

Metal fiber reinforced thermoplastic composites, analyzing unidirectional, crossed and random orientation cases taking into account adhesion efficiency between fiber and matrix
20 p3559 A69-37083

High porosity W-Ta matrix to thin solid Ta support structure joining technique involving vapor-deposited coating process

20 p3548 A69-37216

Boron fiber reinforced Al alloys spall failure and shock induced filament damage, using flyer plate technique

20 p3562 A69-37772

Diffusion bonding of Al and boron filament layers into continuous structural material, studying process variables including heat treatment and cross rolling effects

[AIME PAPER S69-6] 20 p3564 A69-38197

B fiber reinforced Ni failure characteristics at high temperature, discussing plastic deformation and matrix role in crack inhibition

21 p3743 A69-38616

Metal matrix compatibility of metal coated graphitized, silicon carbide and boron fibers, discussing fiber weakening processes

[ASM PAPER W9-20.1] 21 p3751 A69-38670

Al-B composite aircraft structure fabrication, discussing wingspan segment, resistance spot welding, hot forming of joggles, etc

[AIME PAPER S69-1] 21 p3732 A69-39471

BORSIC Al composites for propeller blades, discussing designs, fabrication methods and tensile test results

[AIME PAPER S69-4] 21 p3733 A69-39473

Stress-strain curves of W wires and of aligned composites of same wires in Cu matrix

21 p3845 A69-39709

Metal matrix fiber-reinforced composite materials joining by welding and brazing techniques

22 p3956 A69-40480

Cyclic stress tests of stainless steel fiber Al alloy matrix composite, including strain hardening and stiffness characteristics

24 p4331 A69-42925

Tensile strength improvement in Al-B composites by heat treatment to T6 condition and subsequent cold rolling

24 p4334 A69-43449

Al-B composites fracture toughness obtained by comparing notched tensile data with unnotched specimens

24 p4335 A69-43451

Tensile data and photomicrographs of explosively bonded metal matrix composites interfaces

24 p4326 A69-43452

METAL-METAL BONDING

Diffusion welding of AMS 4921 titanium, discussing premature pressure removal before completion of first joining stage

01 p0086 A69-10535

Phenolic and epoxy adhesives for metal-metal and honeycomb bonding, discussing cold cure adhesives for aircraft structures and aircraft floor sandwich design optimization

04 p0606 A69-14845

Explosive welding application to dissimilar metals and tube to tube plate welding, noting influence of detonation and sound bulk velocity

04 p0608 A69-15481

Helicopter rotor blades in metal sandwich bonding, discussing component parts assembly by adhesive films

07 p1143 A69-19731

Metal adhesive bonding strength behavior in satellite and space vehicle applications, noting effects of various space environment factors

12 p2101 A69-25858

Metal bonded and sandwich structures application to space vehicles, launch vehicles, rocket motors, ground equipment and balloon gondolas, noting inspection methods

12 p2101 A69-25859

Vacuum effects on resistance spot welds in aluminum, stainless steel and titanium alloys, noting X ray and tensile shear test results

12 p2103 A69-26622

Metallographic analysis techniques for high aluminum activity pack cementation coating on nickel-base alloy

13 p2282 A69-28163

Adhesive metal bonding methods including continuous surface bonds, core to face bonds, lap joints and structural adhesive materials

14 p2454 A69-28847

Explosive bonding technique, discussing choice of explosive and geometrical parameters to match material parameters

[ASME PAPER 69-DE-47] 14 p2454 A69-28849

Aluminum-boron metal matrix composite joining methods including electron beam, resistance spot, plasma arc and fusion welding

14 p2455 A69-29449

Diffusion bonding for leaktight joints in connectors using intermediate metal system of Au-Cu-Au

15 p2617 A69-30100

Outdoor aging effects on unstressed Al-Al lap shear joints bonded by various polymeric adhesives

19 p3320 A69-35562

Adhesive bonding of Al sheets for honeycomb sandwich material, using electrical conductivity to measure sheets age hardening progress during high temperature curing

19 p3321 A69-35565

High porosity W-Ta matrix to thin solid Ta support structure joining technique involving vapor-deposited coating process

20 p3548 A69-37216

Plasma metal spray coating for Al and Mg alloy aircraft components adhesive bonding repair technique compared to welding and electroplating

21 p3728 A69-38462

Aluminum alloy laminates composed of two metallogically bonded Al alloys of different composition

21 p3745 A69-38937

Stainless steel cladding of metals to combine desirable properties into composite, describing bonding, product types and treatment

21 p3745 A69-38937

Outdoor aging effects on unstressed adhesive-bonded Al to Al lap shear joints

24 p4319 A69-42932

Corrosion resistant bonding materials, discussing metal-to-metal adhesive primers, Al honeycomb core and foil finish

24 p4334 A69-43421

Polycarbonate and polysulfone thermoplastic bonding of Al and Ti in aircraft structures, discussing peel strength and stress crazing tests

24 p4326 A69-43459

METAL OXIDE SEMICONDUCTORS

MOSFET drivers for low current memory fabricated in 64 unit monolithic strips, discussing driver performance data

01 p0039 A69-10172

Output p-channel MOS transistor selection tree for display and information storage systems

01 p0039 A69-10173

Electron transfer through metal/semiconductor contact surfaces, measuring electrical conductivity on sintered cylinders with or without silver addition

02 p0296 A69-11790

Semiconductor center traps effect on characteristics of metal oxide semiconductor transistors

02 p0299 A69-12183

Silicon nitride gate insulator in metal-insulator-silicon /MIS/ devices, noting sandwich structures with thermally grown oxides removes limitations

02 p0299 A69-12244

Radiation resistance of MOS transistors noting relationship with thermal stability, gate oxidation and metals used

02 p0221 A69-12468

Wafer chip assembling technique for high density interconnection of silicon devices in large monolithic electronic systems, noting application to MOS shift register

02 p0222 A69-12472

MOST devices characteristics at cryogenic temperatures, studying variation in gain over audio frequency range

03 p0405 A69-13642

Relaxation effect in epitaxial silicon MOS structures, formulating differential equation for doping distribution in epitaxial layer

03 p0490 A69-13947

Substrate terminal current anomalous enhancement observed in n-channel Si MOS transistors beyond pinch-off

04 p0574 A69-14348

Voltage variable resistor MOST, noting channel resistance controllability

04 p0574 A69-14351

Device and logic/system designers and design aids interaction, emphasizing engineering trends in large scale integration area using MOS arrays

04 p0568 A69-15356

MOS GP computer suitable for navigation applications

04 p0568 A69-15357

Semiconductor memory units, considering bipolar, p channel MOS and complimentary MOS chip technologies

04 p0569 A69-15362

Freeze-out characteristics of MOS varactor, noting impurity effects and compensation

05 p0806 A69-15809

Electric field effects on thermal annealing of electron irradiation damage in p-channel MOSFET device

05 p0733 A69-16562

MOSFET fabrication by ion implantation using gate metal as mask, noting source and drain alignment with gate and low feedback capacitance

05 p0734 A69-16563

Physical and physicochemical properties of anodic silica obtained by silicon oxidation in organic bath, discussing possible applications

05 p0810 A69-16589

Neutron radiation effects on MOSFET, presenting model for neutron produced ionization in oxide layer

06 p0976 A69-16875

Gamma radiation effects on gate threshold voltages in modified oxide insulators in MOS structures

06 p0976 A69-16876

Electron radiation damage in MOSFET devices using bias temperature treatments

06 p0976 A69-16877

Interface states effects on characteristics of p-channel MOS transistors

06 p0979 A69-17117

Audio frequency noise in p channel MOST at cryogenic temperatures, noting trap contribution

06 p0979 A69-17151

Refractory metal silicon device technology noting high temperature diffusion masking properties for possible use in MOSFET technology

06 p0930 A69-17152

Immobile space charge in MOS semiconductors as function of external voltage

06 p0979 A69-17153

Two section model of saturation drain conductance of MOS transistors

06 p0893 A69-17155

Metal oxide semiconductor random-access memories, discussing large scale integration and static and dynamic circuits chip size

06 p0894 A69-17203

MOS technique applied to fabrication of integrated monolithic miniature circuits

07 p1099 A69-18494

P-n channel MOS triode fabricated by doped-stepped-oxide method, obtaining p-channel enhancement

07 p1100 A69-18622

Substrate bias influence on AC characteristics of MOS transistors used in variable resistor region

07 p1102 A69-18860

Metal oxide semiconductor circuits with higher orders of complementarity for performing multiple electronic functions, noting I-V characteristics and effects of bias

07 p1104 A69-18887

MOS technology developments for higher speeds in logic circuits

07 p1113 A69-19765

Flip-flops built with complementary symmetry MOS, discussing power, noise and load stability due to n and p channel series transistors

07 p1113 A69-19766

Adapter circuits for MOSFET electrical properties measurement

07 p1113 A69-19780

MOS transistor logic circuit performance optimization through component geometry and feed voltage

08 p1280 A69-19977

MOS transistor equivalent circuit for computer aided calculations with IMAG I program, noting versatility of model

08 p1280 A69-19978

Magnetoelectric characteristics of inversion layers below gate region in transistors, noting Hall mobility

08 p1372 A69-20460

Metal oxide semiconductor technology and applications, discussing gates, analog computers, switching circuits and inverters

08 p1286 A69-20833

Ionizing radiation effects on space charge of MOS devices, showing electron-hole pairs within oxide and electron injection from cathode

08 p1373 A69-20864

HF excess noise and equivalent circuit representation of MOSFET with n-type channel, noting local mobility fluctuations effect

09 p1463 A69-22094

- Electronic systems partitioning in preparation for MOS large scale integration for system performance and cost improvement
09 p1466 A69-22451
- Supplementary bibliography of papers on metal insulator semiconductor theory and technology
10 p1743 A69-23169
- Positive space charge buildup produced in silicon dioxide by low energy electrons as function of beam energy and oxide thickness
10 p1743 A69-23172
- N enhancement silicon MOST saturation current as function of temperature
10 p1743 A69-23175
- Transient response of MOS capacitance caused by mechanisms dependent on electric field distribution between silicon and oxide
10 p1744 A69-23176
- Interfacial stress between thermally grown silicon dioxide and single crystal silicon correlated with oxide compressive strength
10 p1744 A69-23177
- Interfacial charges in MOS transistors determined as function of surface potential by measuring channel conductance as function of temperature
10 p1744 A69-23178
- Surface charge exchange in metal oxide silicon capacitors generated at low temperatures by surface state free carrier trapping
10 p1744 A69-23179
- Silicon single crystal substrate, preoxidation, oxidation and low temperature heat treatment effects on MOS transistor compared with Silicon-Silicon dioxide interface characteristics
10 p1665 A69-24051
- Drift and tunnel effect of MOS transistors under ionizing electron and X ray irradiation, considering fabrication, electrical characteristics and D-2 satellite tests
11 p1848 A69-24873
- Silicon nitride as ambient alkali barrier liner analogous to silicon carbide in MIS devices for thermal growth of silicon oxide
12 p2142 A69-25935
- Beryllium oxide semiconductor thermistor for temperatures to 2500 K, discussing construction materials and test results
12 p2092 A69-26478
- LF generation-recombination noise in MOS transistors with depletion region impurity centers, analyzing noise resistance saturation and drain-voltage dependence
12 p2041 A69-26627
- MOS and junction transistors damage due to radiation, noting decrease in collector current under fast neutron dose
13 p2227 A69-27514
- MOS transistor Hall voltage, mobility and constant verified by magnetoelectric measurements of Si p-inversion layer
13 p2323 A69-28331
- Small signal, HF equivalent circuit for intrinsic metal oxide semiconductor field effect transistor, considering nonpinchoff and pinchoff modes
13 p2238 A69-28429
- MOS unitoron switching circuit operation subjected to nonlinear load, using analytic approximations of current-voltage characteristics
13 p2234 A69-28507
- Large signal transit time effects in MOS transistor, noting drain current response
14 p2418 A69-28891
- Charge flow injection into MOS substrate attributed to gate pulses, correlating charge magnitude with pulse frequency
15 p2573 A69-30033
- MOSFET/unitoron/ switching circuits classification in terms of load curve shapes obtained with different output connections of load elements
15 p2574 A69-30122
- Frequency response of MIS capacitance beyond inversion voltage, discussing recombination rate and generation-recombination current in space charge region
15 p2565 A69-30179
- Linear metal oxide semiconductor integrated circuits, discussing advantages, disadvantages and use of current source load device to improve voltage gain and swing
15 p2577 A69-30594
- MOS devices for radiation environments utilizing aluminum oxide as gate insulator for developing resistance to radiation damage
15 p2577 A69-30595
- VHF and uHF MOS tetrode minimum noise factor computed as function of frequency by adding thermal noise sources to resistive parts of equivalent circuit
15 p2577 A69-30603
- High temperature effects on electron and X ray irradiated MOS transistors for space charge analysis and defects in silica films
15 p2625 A69-30828
- MIS devices with dielectric properties avoiding positive space charge formation, discussing radiation effect
15 p2625 A69-30829
- Production line requirements for MOS and IC, considering high reliability at minimum cost for space applications
15 p2627 A69-30841
- Large scale integrated MOS devices tests for space applications, establishing quality specifications
15 p2580 A69-31131
- Metal oxide semiconductor structural model usefulness in understanding behavior near transition region, discussing surface inversion layer properties, surface mobility theory, etc
16 p2757 A69-31612
- Metal oxide semiconductor integrated circuits, showing failure rates and degradation causes
16 p2759 A69-31851
- Surface state density determination as function of surface potential in MIS capacitors, discussing MIS capacitance method theory and computer programs
16 p2827 A69-32556
- Neutron bombardment and ionizing radiation resistance of aluminum oxide MOS devices using gate insulator fabricated by plasma anodization
17 p2935 A69-32888
- Computer aided design of machines with custom LSI arrays, describing error detection procedures and MOS logic circuits
17 p2942 A69-34121
- Silicon MOS transistor characteristics, discussing stability, temperature effects and inherent noise, noting applications to amplifier circuits
18 p3109 A69-35161
- Failure mechanisms and analyses of large scale integrated circuits based on bipolar and MOS transistors, describing measurement and probing techniques
19 p3282 A69-35787
- Electron-plasmon interaction in degenerate semiconductors, using mathematical model for rectifying metal contacts tunneling characteristics
19 p3382 A69-36049
- Current-voltage characteristics of unitoron with metal-dielectric-semiconductor structure /MOSFET/ taking into account substrate potential effect
19 p3284 A69-36592
- MOS threshold voltages calculations, considering fixed bulk and oxide charges and difference in work function between metal and semiconductor, considering MOS-FET devices
20 p3506 A69-37779
- Silicon dioxide film doped with Al to increase MOS structure radiation resistance
20 p3584 A69-38070
- Metal insulator semiconductor volt-capacitance changes due to light flux, introducing surface recombination rate to improve model
20 p3585 A69-38273
- MOS arrays failure mechanisms, discussing oxide defects, contamination and metal migration due to mode of operation and fabrication techniques
21 p3684 A69-39605
- MSI 12 bit digital to analog converter in integrated circuit form using MOS switching circuit
22 p3906 A69-40349
- Critical transition temperature of vanadium oxide semiconductors as function of doping element content and lattice constant, using X ray diffraction
23 p4198 A69-41564
- Spacecraft onboard data handling system with MSI complementary MOS arrays, describing various components
23 p4133 A69-41739

- METAL PARTICLES**
NT POWDERED ALUMINUM
- Temperature rise of micron sized silver particles on carbon film due to electron beam heating, setting up heat balance equation
04 p0640 A69-14449
- Metallic particle ignition in oxygen containing media, obtaining temperature curves and vaporization rates
08 p1375 A69-20343
- UV, visible and near IR spectral characteristics of hydrocarbon-air flames with particulate Al, Mg and B, noting hot metal continuum and oxide emissions
11 p1940 A69-24483

Aerodynamic field around symmetric profile two dimensional plates, visualizing velocity fields with Al particles

12 p2011 A69-26288

Monograph on interstellar extinction computations covering theoretical curves for spherical metal and graphite particles, albedo, optical constants, normalization, temperature dependence, etc

14 p2516 A69-28901

Metal particles evaporation kinetics in plasma arc, determining total and unsteady evaporation time by spectroscopy and absorption radiography

15 p2663 A69-30990

Effective heat transfer coefficient lambda for microscopic Fe particles traversing rarefied air, oxygen and Ar target gases

16 p2769 A69-31870

Particles maximum diameter numerical values for melting during injection into plasma jet calculated for various metals and refractory dielectrics

17 p3009 A69-32825

Metallic aerosol generator application in shock tube spectrometric measurements of radiation by molecules occurring as solids before decomposition to vapor phase

18 p3099 A69-34461

Ramsdorf meteorite chondrules and metal particles formation attributed to shock-induced partial melting and rapid cooling

19 p3409 A69-36088

METAL PLATES

Displacement function selection in calculating rubber-metal valve design, considering boundary conditions of material deformation

01 p0087 A69-10829

Symmetric and asymmetric metal flanges effects on radiation patterns of H plane sectoral horns, noting theoretical explanation and applications

02 p0216 A69-12027

Subsequent yield surfaces in cross shaped brass plates determined after prestraining or cold rolling

04 p0682 A69-15302

Strain near fatigue crack tip in notched steel plates measured by copper electroplating method

06 p1022 A69-17198

Histogram approximation of plastic deformation of metals, analyzing tube under internal load and sandwiched layer compression

10 p1793 A69-22850

Plain strain fracture toughness tests on two inch thick maraging steel plates of various strengths, using bend and compact tension tests

10 p1795 A69-23057

Very low temperature dependence of thin single crystal Al plates electrical resistance, noting Umklapp processes contribution

10 p1711 A69-23620

Decoupling force exerted by magnetic forming Be coil assembly on metallic plate during forming

11 p1888 A69-25310

Plane strain fracture toughness tests on maraging steel plates for various yield strengths and large dimensions

12 p2114 A69-26496

Crack opening displacements of stationary and running cracks and of inclined stationary cracks in centrally notched plates, noting normal strain fields

12 p2189 A69-27163

Pyrex spheres accelerated to 15 km/sec by plasma rail gun to study hypervelocity impact in thin stainless steel and Al targets

[AIAA PAPER 69-378]

13 p2368 A69-28308

Two plate meteoroid shields effectiveness determined by analyzing debris cloud ejected behind front plate after hypervelocity impact

[AIAA PAPER 69-380]

13 p2368 A69-28310

Initial comparisons between theory and experiment of strain fields in cracked copper plate

15 p2640 A69-30810

Air resistance effect on transverse vibration damping of flat specimens of heat resistant alloy, duraluminum, Ti, Mo and Nb

17 p2991 A69-33947

Fabrication effects on high strength Al alloy plate properties, comparing texture, plane strain fracture toughness, yield stress, ultimate tensile stress and elongation

19 p3346 A69-36437

Dual filler metals for increasing joint efficiency by changing fusion zone composition, discussing mechanical properties in Ti and Al plates welding

22 p3956 A69-40462

Thickness direction tensile properties, ultrasonic attenuation and mild steel plate lamellar tearing in multipass fillet joints measured by weld cracking test

24 p4320 A69-42942

METAL POLISHING

NT ELECTROPOLISHING

Radiation emission factors determination of polished metallic surfaces

07 p1242 A69-18952

Electrolytic and mechanical polishing techniques for metallographic specimens of beryllium

13 p2281 A69-28161

METAL POWDER

NT POWDERED ALUMINUM

Burning ability and inflammability of mixtures of powdered Mg, Al, Mg alloys or Al alloys and C-H-O organic compounds

02 p0355 A69-12669

Temperature distribution and vaporization rate boundary conditions on metal particle surface during preignition heating in oxygen containing medium

02 p0355 A69-12670

Exothermal effects during sintering of nickel-aluminum powder mixture

02 p0269 A69-12838

Exothermal effects during sintering of nickel-aluminum powder mixture, showing role of liquid phase decomposition and intermetallics

02 p0269 A69-12843

Electrical resistivity of sintered high melting point metal oxides, noting width of semiconductor forbidden band

03 p0445 A69-13570

Insensitive explosive trigger or initiator consisting of metal/metal oxide powder with low shock sensitivity and high thermal stability

04 p0646 A69-15300

Compaction kinetics in continuous quasi-viscous medium having plastic flow material under applied load, discussing hot pressing of nichrome powders

04 p0618 A69-15389

Two stage thermal treatment inhibiting influence on swelling and porosity linked to Kirkendall effect during sintering of Fe-Ni powder mixtures

05 p0782 A69-16616

Properties of electrolytic and reduced titanium powders and sinterability of porous compacts

05 p0782 A69-16795

Tungsten delay powders combustion mechanism and intermediate stages of burning process, noting burning rate

[WSCI PAPER 68-19]

07 p1202 A69-18370

Electroslag welding using plasma jets with powdered material, discussing various parameters

08 p1321 A69-20766

Physical properties control in nickel powders obtained by hydrogen reduction of nickel diamine sulphate solutions

08 p1334 A69-21057

Bulk weld filler metals, discussing granular compositions, electrodes and iron, nickel and cobalt base deposits

11 p1891 A69-24931

Ductile metal powder chemical reactions during comminution in pure or oxygenated water

13 p2216 A69-27762

Sintered mixtures of Ni-Mo powder noting electrical resistance, alloy and shear strength and impact viscosity

15 p2638 A69-30280

Mathematical analysis of compaction process for powder mixtures of different metals assuming known characteristics of components

15 p2641 A69-31182

Powder properties effect on rolled strip thickness and compactness, angles, pressure at roll and torsion during rolling, analyzing Fe, Ni and Cu powders

15 p2630 A69-31183

Thermal EMF, electrical conductivity and Peltier effect in sintered refractory oxides at high temperature in air and in Ar

17 p3068 A69-32990

Optical characteristics at 2-25 micron spectral interval for various metal blacks vaporized in vacuum on KBr, Ni foils and nitrocellulose substrates

17 p3075 A69-33976

Carburizing spherical powders of Nb, Mo and W to obtain carbides, noting agreement between theoretical and experimental data

19 p3345 A69-36162

X ray analysis of rolled and compressed Ti powder produced by calcium hydride reduction, noting coexistence of screw dislocations

21 p3745 A69-38952

Compactibility dependence of Fe, Co and Ni powders with Zr, Nb and Mo carbide additives on pressure, carbide content and lubricant

22 p3970 A69-40634

Optimal conditions for extrusion compacting of hard alloy mixtures plasticized with paraffin, determining plasticizer content, upsetting, pressure and temperature

22 p3956 A69-40635

METAL PROPELLANTS

Beryllium propellants for space applications, considering composite solid propellant with powdered Be as fuel

02 p0303 A69-11763

Liquid alumina particles agglomeration in convergent and throat region of nozzle leading to performance decrease by increasing velocity and temperature difference between phases

22 p4001 A69-40929

METAL SHEETS

Elastic anisotropy and polycrystalline orientations in cold rolled titanium sheets investigated by Fourier series method, discussing Young modulus values

01 p0094 A69-10431

Prestraining of stainless steel En58b sheet at room and cryogenic temperature, noting effect on tensile properties

01 p0099 A69-11151

Mechanical properties of AZ5G-Zr-Cr alloy welded sheet subjected to biaxial stress at low temperature

01 p0088 A69-11152

Vacuum heating and thermal cycling influence on mechanical and structural properties of aluminum sheets fabricated from sintered powder

02 p0266 A69-12126

Fabrication of large arched bottoms for pressure vessels from aluminum alloys, discussing sheet cutting and welding, annealing, machining, etc

02 p0254 A69-12678

Aluminum plastic sandwich products production costs compatibility with conventional materials

02 p0348 A69-12749

Cold rolling and annealing effects on tensile strength, heat resistance and ductility of sintered Al powder sheets

03 p0452 A69-14121

Sheet steel composition effect on gas-tungsten arc welds porosity

04 p0607 A69-15219

Anisotropic plasticity in sheet metals under uniaxial and balanced biaxial tension

05 p0837 A69-16030

Air cushion effect on dimensional accuracy in explosive forming of metal sheet

06 p0930 A69-17001

Air cushion effect in explosive forming of metal sheets, considering simple geometrical shape

06 p0931 A69-17526

Surface edge preparation of titanium alloy sheets for argon shielded arc welding

06 p0932 A69-17898

TIG welding introduced residual stresses amplitude and distribution in Ti sheets, studying effects on mechanical properties

[ASM PAPER GG8-6.2]

07 p1169 A69-19674

Elastic springback and residual stress distribution in sheet metal formed by bending determined as function of radius sheet thickness and stress-strain characteristics

08 p1319 A69-20005

Electron fractographic study of fatigue cracks in wrought beryllium sheet, noting transgranular and intergranular modes on fracture surface

09 p1500 A69-22324

FM Lamb wave system for flaws and defects detection in thin metal sheets

10 p1699 A69-23048

Aluminum alloy thin sheets with central transverse fatigue cracks subjected to increasing static loads to fracture, investigating crack tip deformation

10 p1709 A69-23056

Buckling deformation and stress fields around central slits in photoelastic models and metal sheets under tensile load

10 p1796 A69-23069

Mechanical model for investigating macrobehavior of cyclic fatigue crack propagation in plates of several metal alloys

10 p1796 A69-23072

Testing system stiffness effect on sheet fracture, discussing notch strength dependence on stiffness

10 p1796 A69-23075

Transgranular stress corrosion crack propagation in thin sheet single phase magnesium-aluminum alloy

10 p1710 A69-23086

Structural inhomogeneity of Ti alloys cause increased susceptibility to production of sheets, forgings and drop forgings
11 p1902 A69-24276

Annealing effects on cold rolled titanium sheets, noting changes in Young modulus and characteristics of recrystallized titanium
11 p1904 A69-24899

Fatigue life of Al alloy thin laminated sheets, considering cyclic frequency and temperature effects
12 p2180 A69-26359

Thermal resistance of bolted or screwed sheet metal joints in vacuum, using method applicable to different materials and surface finishes
12 p2191 A69-26803

Rolled sheets from beryllium scrap converted into vacuum cast ingots, discussing preparation techniques
13 p2281 A69-28160

Aluminum double sheet target penetration resistance determined by studying high velocity pyrex glass impact effects on front/rear sheets and spacing [AIAA PAPER 69-375]
13 p2367 A69-28305

Strain rate and temperature effects on sintered molybdenum sheets strength and elongation characteristics
14 p2464 A69-29322

Adhesive pressure welded joints tightness and fabrication stability analyzed on duraluminum sheet samples
17 p2978 A69-32949

Plastic energy dissipation rate during stable crack growth in sheet under uniaxial tension
18 p3212 A69-34345

Optimum conditions for producing Ti-V alloy sheet plated on one side with Nb by hot rolling
18 p3155 A69-34652

Explosives parameters effect on metal sheet velocity during explosive welding, considering load density and explosive force
18 p3149 A69-35279

Forming, machining and joining characteristics of B-Al composite sheet metal material for space structures
19 p3318 A69-35507

Axial load fatigue crack propagation tests on Al alloy sheets for stress ratio effects
19 p3346 A69-36435

Anisotropy coefficients obtained during annealed Al sheet tests based on stress-strain characteristics, noting fading memory effects
19 p3447 A69-36857

Recrystallization in thoria dispersed Ni sheet as function of strain-anneal cycles, using electron transmission technique quantitative determination
20 p3557 A69-36958

Sheet metals deformation behavior during punch stretching and hydraulic bulging, noting effects of lubrication, stress-strain relation, anisotropy and microcracks
20 p3551 A69-38115

Al alloys sheet, plate and weldments crack behavior and fracture toughness at cryogenic temperatures, using notched and surface flawed plane strain specimens [ASM PAPER W9-19.3]
21 p3743 A69-38669

Fatigue resistance of bimetallic sheets of steel and Al alloys by fatigue resonant machine, analyzing lifetime distribution and failure probability
21 p3835 A69-38773

Galvanostatic anodic and cathodic currents effect on stress corrosion of Be sheet in aerated synthetic sea water at 72 F
21 p3747 A69-39436

Load transfer to sheet metal plate from bonded strip axially loaded by single force, assuming linear viscoelastic adhesive layer
22 p4038 A69-39896

Creep at 400 degree C in Ti alloy sheets in short period plastic deformation due to work hardening by stepwise drawing in extensometric device
22 p3971 A69-41032

High temperature vacuum treatment of thick stainless steel sheets reducing hydrogen content and outgassing
22 p3958 A69-41217

METAL SHELLS

Fragmentation behavior of small thin walled metal cylinders during explosions as function of expansion velocity and material parameters
09 p1611 A69-21352

Permanent displacement relationship to shell thickness following snap-through of loaded rigid boss in spherical metal shell
11 p1980 A69-24822

Plane monochromatic and pulsed electromagnetic waves penetration into metal cylindrical shells, deriving equations for electromagnetic field in interior
15 p2569 A69-30950

Cylindrical reinforced steel shells stability under external pressure
18 p3225 A69-35371

METAL STRIPS

Metal strip angled profile shaping by sliding application of forces with draw plate, analyzing friction effect with thin plastic shell engineering theory
03 p0432 A69-12962

Stress distribution in infinite strip with equally spaced identical semicircular notches on one edge and subject to transverse bending
05 p0842 A69-16643

Stresses in finite width infinite elastic isotropic strip with equally spaced identical semicircular notches under uniform tension or pure bending
05 p0843 A69-16644

Power law taperings for minimizing peak to trough deflection of cross section of strip bent longitudinally into cylindrical surface
06 p1023 A69-17374

Minimal interference thin metal strap support system for dynamic stability tests of high fineness ratio wind tunnel models [AIAA PAPER 69-350]
13 p2243 A69-28284

Oxygen influence on low pressure ethylene decomposition on high temperature tungsten and Re ribbons surface
19 p3266 A69-36732

Electromagnetic wave diffraction normally incident on symmetrical five element metallic array
23 p4123 A69-42029

Plane electromagnetic wave diffraction by screened periodic metallic strips array with real ferrite transversely magnetized to saturation
23 p4124 A69-42032

Electromagnetic wave diffraction by multielement periodic metallic strips arrays positioned transversely in rectangular waveguide
23 p4124 A69-42035

Rectangular waveguide with periodic array of infinitely thin metallic strips, studying intrinsic oscillations critical frequencies and amplitude spectrum
23 p4124 A69-42036

Dispersion and resonant properties of electromagnetic waves propagating along plane metallic strip array with shield and dielectric
23 p4124 A69-42038

Plane polarized electromagnetic wave diffraction incident on skewed metal ribbons array
23 p4125 A69-42043

METAL SURFACES

Streak interferometry method for measuring transient deformation data on metallic solid surfaces
01 p0078 A69-10117

Corrosion of steel surfaces in contact with molybdenum disulphide noting influence of high humidity, milling and inhibitors
01 p0094 A69-10367

Microfacets of metal surface cracks studied for plastic deformation and atomic separation mechanisms by electron diffraction
01 p0098 A69-10763

Heat transfer dependence on direction of heat flow in stainless steel/aluminum interfaces, showing surface roughness and flatness influence
01 p0177 A69-11406

Kinetics of vaporization of metals with surface subjected to incident radiation flux noting pulse duration
02 p0350 A69-11577

Monocarbide phases high temperature vaporization from open metal surfaces into vacuum, obtaining temperature dependence
02 p0260 A69-11583

Force law determining impact processes of pyramidal and conical body penetration into smooth surface of rigid plastic metals
02 p0337 A69-11615

Electron plasmas near plane metallic surfaces, determining transmittance and reflectance of incident light waves and surface waves dispersion characteristics
02 p0286 A69-11788

Electron transfer through metal/semiconductor contact surfaces, measuring electrical conductivity on sintered cylinders with or without silver addition
02 p0296 A69-11790

Substructures around fatigue cracks in fcc metals and alloys, noting relation between structural formation and crack propagation
02 p0260 A69-11826

Liquid oxides wetting and spreading capabilities on refractory metal surfaces, noting chemical reaction oxide reducing effect
02 p0265 A69-11884

Polymeric film properties related to metal substrate interface corrosion, considering effects of stress concentration, surface cleanliness and adsorbed gases
02 p0265 A69-11896

Surface preparation effect on stress corrosion cracking of type 310 stainless steel wires in boiling aqueous magnesium chloride solutions
03 p0444 A69-13311

Surface effects on metals mechanical properties, discussing dislocation dynamics and resulting effects on macroscopic plastic behavior
03 p0448 A69-13869

Metal surface degradation by constant density laser radiation, computing screening effect
03 p0442 A69-14221

Emissivity of rough metallic surfaces with preserved profile similarity, showing independence to roughness height
05 p0845 A69-15894

Radiation emission factors determination of polished metallic surfaces
07 p1242 A69-18952

Field diffraction at finite metallic surface represented in eigenfunctions of discrete spectrum, considering forced oscillations of open circuit
07 p1084 A69-19151

Radome axis error due to phase /dielectrics/ and metallic obstacles
07 p1112 A69-19542

Ruby laser beam incident on steel surface in air or water measured for energies, determining reflected energy dependence on incident energy for self insulation effect
07 p1157 A69-19594

Work function and desorption energy measurements of alkali metals from metallic substrates with modulated molecular beam, noting surface contamination
09 p1558 A69-21808

Eddy current nondestructive tests of nonmagnetic thin metallic sheets and plates from single surface
10 p1698 A69-23046

Ultrasonic technique for metal surface and near surface residual stress measurement, emphasizing aluminum alloys
10 p1794 A69-23052

Screw dislocation interaction with partially bonded bimetallic interface, using isotropic elastic continuum approximation
10 p1802 A69-24027

Fractures in refractory metals surface layers due to Q switched laser pulses
11 p1899 A69-25402

Laser radiation in vacuum effects on metals and alloys
11 p1906 A69-25684

Metallic impurities effect on Ge surface charge and recombination properties, noting fast and slow electron density changes by forbidden band penetration
11 p1939 A69-25703

Reflection of moving rarefied AR plasma from surface of nickel cylinder inserted into gas discharge tube
11 p1934 A69-25710

Sr and La ionization on crystal surfaces of W and polycrystalline W, discussing temperature effect on oxidation and work function
12 p2142 A69-26113

Inelastic interactions cross sections of slow electrons with adsorbed particles on W surface as function of temperature in surface bond vibrational region
12 p2132 A69-26114

Desorption kinetics of atomic and oxide phases, analyzing composition of surface film formed from W and Mo single crystals interaction with oxygen
12 p2026 A69-26115

Back scattered electron inelastic LEED spectra of cesium plasma in W/100/-Cs system, noting strong loss peak
12 p2132 A69-26116

Fatigue strength reduction in Ti alloy in sliding friction contact with metallic materials caused by fretting corrosion
12 p2113 A69-26125

Electronic structure of clean metallic interfaces, considering electron, ion and surface interactions for metal-vacuum interface
13 p2321 A69-28008

Free electron model for electron work functions and number density distributions and surface potentials in metals
14 p2504 A69-29009

Thermionic emission from bare and Cs-covered metal surfaces, calculating current and work function by employing localized electron orbital model
14 p2505 A69-29264

Tungsten surfaces with high work functions generated by electrochemical etching, discussing effects of heat treatment in vacuum
14 p2506 A69-29267

Tungsten emitting surfaces work functions, discussing dense crystalline planes electrolytic or pyrolytic deposit growth and surface chemical or electrolytic attack
14 p2506 A69-29268

Corrosion at polymeric film-metal substrate interfaces, noting roles of film properties, bond strengths and primer coats
14 p2466 A69-29938

Oxygen adsorption on Mo single crystals /100/ surface as function of temperature using low energy electron diffraction
16 p2748 A69-32795

Field ionization at metal surfaces as rearrangement collision, considering anisotropic electron tunneling probabilities produced by Fermi surface
17 p3015 A69-32821

Secondary electron emission from gas covered metal surfaces, discussing results of neutral beam investigations
17 p3008 A69-33000

Thin surface films effect on radiative properties of metal surfaces determined by thin film optics, noting dependence on refractive index
[AIAA PAPER 69-623] 17 p3072 A69-33283

Heat transfer from cylindrical copper surface to liquid helium at 4 degrees K, discussing temperature fluctuations in nucleate boiling region
17 p3074 A69-33780

Finish turning cutting speed effects on titanium alloy surface layers
18 p3148 A69-34548

Wavelength dependence of total and depolarized backscatter laser light cross section for rough metallic surfaces
18 p3172 A69-35011

Liquid oxides wetting and spreading capabilities on refractory metal surfaces, noting chemical reaction oxide reducing effect
18 p3156 A69-35044

Low energy electron diffraction oxygen adsorption kinetics on planes of tungsten at coverages below monolayer and work function measurements
18 p3183 A69-35106

Oxygen 18 adsorption on silicon activation analysis measurements used to obtain kinetic curve for chemisorption from monolayers
18 p3183 A69-35107

Electron current flow from metal target in gas due to laser radiation, showing increased dependence on gas pressure
18 p3152 A69-35124

Friction coefficient increase caused by metal surface textures anisotropic effect on friction force
18 p3149 A69-35151

Quartz fiber adhesion to Re measured in LEED /low energy electron diffraction/ apparatus for clean and O layer surfaces, noting brittle fracture
18 p3156 A69-35182

Beryllium bonding, evaluating various surface preparations and adhesives
19 p3320 A69-35561

Microbiological corrosion and degradation of aircraft metals and organic materials in fuel tanks
19 p3341 A69-35569

Electric fields and electron work functions, surface potentials and number density distributions in selected metals surfaces determined using free electron model
19 p3382 A69-36045

Low pressure ethylene decomposition on high temperature W ribbon surface
19 p3265 A69-36729

Low pressure ethylene decomposition on high temperature Re ribbon surface
19 p3266 A69-36730

Surface structures, work function changes, Auger electron and surface plasma losses for Cs on clean W surface
19 p3392 A69-36733

Fracture surfaces of stress corrosion cracks in Fe-Cr-Ni alloys studied by electron microfractography, noting cleavage fracture
19 p3350 A69-36891

Surface cavity profiles created by pulsed laser on Ti, Al, Cu, Pb and Zn, compared with isotherms computed from heat conduction models
20 p3552 A69-36917

Plasma coating formation mechanisms and parameters, studying metal surface and deposited particles temperatures, spraying time effects, etc
20 p3549 A69-37374

Titanium surface cleaning and descaling in preparation for machining, discussing acid pickling, mechanical abrasion, conditioning cycles, etc
20 p3549 A69-37434

Dielectric response of semiinfinite metal surface to external point charge in linearized Fermi-Thomas approximation, discussing potential in metal and vacuum
20 p3583 A69-37498

C and O atoms chemisorption on Mo surface demonstrated by surface striation
20 p3562 A69-37782

Maxwell coefficient change of Cd atoms /in molecular beam/ diffusely reflected from metal surfaces related to reflector temperature, material and fabrication method
20 p3580 A69-37814

Microstructure and X ray structure compared for two and three component chromide, titanide and silicide diffusion layers on Nb, discussing phase composition
20 p3563 A69-37820

Vacuum apparatus for measuring uniaxially loaded metal surfaces interfacial adhesion, showing surface oxide removal effectiveness influence in adhesion strength
21 p3689 A69-38594

Diffuse reflection of UV radiation from rough metallic surfaces, noting irregularities
21 p3770 A69-38796

Stress concentrations in metals determined through surface properties measurements, correlating local electrochemical potentials and metal-metal oxide junction parameters
21 p3747 A69-39326

Field emission and field-ion microscopic adsorption studies, discerning major states in chemisorption for metal-crystal surfaces
22 p3895 A69-39898

DC beam experiment for determining molecule sticking coefficients of gas beams incident on Ti, Ba and Sr gettering surfaces at cryogenic temperature
23 p4151 A69-41544

Distribution function of output energies of polycrystalline metal surface used as plasma probe, considering homogeneous plasma flow and isotropic particle velocity distribution
23 p4196 A69-41696

Corrections for eliminating anomalous skin effect on IR emissivity for Ag, Cu, Au and Al
23 p4177 A69-42212

Surface texture effects, discussing metallic and elastomeric contacts, measurement, profile, model parameters, adhesion, hysteresis, lubrication, squeeze films, macroelastohydrodynamics and randomness
23 p4170 A69-42359

Solid film lubricants deposited by DC triode sputtering on Ni, Ni-Cr and Nb surfaces friction tested under ultrahigh vacuum conditions
24 p4321 A69-43126

METAL VAPORS

NT MERCURY VAPOR

Electrical equation of state of metals determination from density, conductivity, energy and metal vapor velocity measurements in wire explosions
01 p0117 A69-10659

Alkali metal vapors thermal conductivity determination by temperature difference dilatometric measurement
02 p0247 A69-11579

Magnetic confinement of electric arc in alkali metal vapor containing gas flow, considering degree of ionization
02 p0286 A69-11585

Spectroscopy of potassium vapor using laser induced fluorescence, noting laser line coincides with several molecular transitions
05 p0771 A69-15907

Gasdynamic flow shock wave phenomena during exploding wire dwell time inside metal vapor cylinder, noting effect on reignition
07 p1188 A69-18275

Temperature distribution in low pressure magnesium vapor-oxygen diffusion flames, discussing environmental conditions and visible radiation
[WSCI PAPER 68-20] 07 p1241 A69-18367

Pulse broadening in MHD copper vapor laser
07 p1149 A69-18904

Rubidium vapor laser pumping induced frequency shifts eliminated by detuning resonator without decreasing output power
09 p1520 A69-22636

Concentration changes in binary metal-gas solutions during simultaneous degassing kinetics and metal evaporation
09 p1528 A69-22732

Cs and K ions drift velocity calculations in vapors of own atoms under various electric field strengths effect
11 p1922 A69-24226

Liquid-metal MHD space power generation system using intermittent vaporization slugs shooting at 2700 R peak temperature
13 p2206 A69-27492

Metal layers deposition, structure and properties obtained by H reduction of metal halides in vapor phase
14 p2462 A69-29205

Barium vapor effect on converter materials, examining metals-ceramics compatibility at high temperatures
14 p2467 A69-29215

Saturated Li vapor pressure measured by static equilibrium technique based on use of null membrane, tabulating pressures for various temperatures
15 p2656 A69-30997

High energy electrons emission during alloy evaporation on hot metal filaments used for thin film deposition
16 p2827 A69-32016

Electric field variations in vicinity of auroral forms from motions of Ba vapor clouds released from Nike-Tomahawk rockets
18 p3128 A69-34935

Aluminum oxide droplets condensation from atmosphere of metal vapor and oxygen, studying temperature and time effects on particle nucleation, growth and distribution
21 p3783 A69-38799

Laser produced Sb and Te vaporization near critical point, using time of flight mass spectrometer
22 p3993 A69-40719

Spectrum characteristics of plasma generated by pulses of solid state laser radiation on metals and alloys in regular and quasi-stable regimes of emission
22 p3964 A69-40793

Equilibrium vapor compositions and activities over Fe-Cr-Ni alloys at 1600 C determined by collecting effusate from thoria Knudsen cells
23 p4175 A69-41503

Sonic vapor flow heat transfer limitations in heat pipes for Na, K and Cs, showing strong influence of temperature and working fluid
23 p4239 A69-41719

METAL WORKING

NT AUSFORMING

NT BULGING

NT CLADDING

NT COINING

NT EXPLOSIVE FORMING

NT FORGING

NT HYDROFORMING

NT MAGNETIC FORMING

NT SIZING [SHAPING]

Nichrome bars production dispersion hardened by alumina and zirconia inclusions, noting extrusion temperature influence
01 p0085 A69-10397

Chemical vapor deposited W and W-Re alloys for structural applications, discussing fabrication methods and effects on mechanical properties
01 p0096 A69-10641

Strain measurements in pure polycrystalline Ti at constant temperature and strain, considering creep and elastic aftereffects
01 p0101 A69-11363

Laser applications in metal working including dissimilar metal welding, hole drilling, material removal and dynamic balancing
[ASTME PAPER MR68-406] 02 p0252 A69-11796

Deformation temperature and reduction effects on structure and properties of cylindrical specimens of various titanium alloys
02 p0266 A69-12124

Shot impact shaping of parts made of monolithic panels, relating curvature of profile to parameters of process
03 p0433 A69-12963

Fabrication of Cu-W composites with discontinuous fibers based on sintering and rolling
03 p0444 A69-13349

Tubular metal parts and assemblies, discussing flaring, forming, beading, tapering and step drawing
03 p0435 A69-13918

Soviet book on press working of aviation materials, noting granulated and powdered materials and high strength and refractory materials
03 p0451 A69-14117

Tangential and normal stress distribution in deformed metals, discussing work hardening of metals and cold working without softening effect

03 p0435 A69-14118

Alloying elements effect on mechanical and refractory properties and structure of forging of age hardenable Ni base alloys

03 p0452 A69-14122

Geometrical and thermomechanical effects on pressure and forces in deformation of thin Ti alloy blanks

03 p0452 A69-14123

Closed die development for forging very large and complex parts to meet needs of high Mach aircraft

04 p0604 A69-14523

Extrusion processes used for aluminum, magnesium and titanium extrusions, presenting die configurations

04 p0604 A69-14526

Beryllium properties, metallurgy, alloys, fabrication and applications in guidance components, aerospace structures and nuclear reactors

04 p0614 A69-14586

Ti alloy sheet, plates, rods, sectional shapes, forgings, stampings, pipes and wire production from ingots and blanks

07 p1161 A69-18762

Ti alloys thermomechanical treatment effect on strength and plasticity characteristics, noting single and double phase alloys and rupture

07 p1161 A69-18766

Production technology of sheets, forgings and drop forgings from Ti and Ti alloys, discussing gas saturation prevention and plastic deformation

07 p1164 A69-18786

Technology of titanium for C-5A aircraft, discussing structural and functional components and machining, welding, forging, etc

[ASM PAPER D8-26.2] 07 p1143 A69-19672

Elastic springback and residual stress distribution in sheet metal formed by bending determined as function of radius sheet thickness and stress-strain characteristics

08 p1319 A69-20005

Microfilaments, Taylor production method, mechanical properties and comparison to whisker

08 p1320 A69-20582

Contour of axisymmetric holes in dimensional electron-beam machining calculated from density distribution of transmitted energy

08 p1321 A69-20727

Deformation processing of superalloy gas turbine components, studying ingot characteristics, alloy segregation effect and thermomechanical properties

[SAE PAPER 690101] 09 p1503 A69-21557

Whisker metal matrix composite fabrication, discussing aligned whisker distribution without degrading strength or fracturing and detailing extrusion process

09 p1511 A69-22361

Laser applications to production line metal working, discussing economics, welding, drilling, automation, thermal and atmospheric effects, etc

10 p1698 A69-22985

Superimposed tool vibration function in deep drawing, ironing and cold forging, discussing equipment instrumentation, emphasizing dynamic force measurement

[ASME PAPER 69-VIBR-8] 10 p1700 A69-24164

Slip band extrusions in hexagonal close packed Cd, Mg and Ti subject to cyclic stresses, noting microstructural changes

12 p2116 A69-26912

Rolled sheets from beryllium scrap converted into vacuum cast ingots, discussing preparation techniques

13 p2281 A69-28160

Ruby and neodymium glass lasers applicability to metal working, investigating factors affecting integral pulse power stability

13 p2273 A69-28431

Titanium alloys for thermionic nuclear converters, discussing melting, forging, drawing and quality control of mechanical and physical properties

14 p2462 A69-29217

Dislocation pattern in thin Mo foils deformed by hydroextrusion observed by transmission electron microscope

14 p2463 A69-29311

Hot extrusion process for steel and various metals in U.S. semifinished product industry, considering lubrication problems, research centers and development

15 p2618 A69-30228

Powder properties effect on rolled strip thickness and compactness, angles, pressure at roll and torsion during rolling, analyzing Fe, Ni and Cu powders

15 p2630 A69-31183

Ti alloys commercial applications and properties, discussing alloying elements influence, deformability, weldability, stress corrosion and market trends

16 p2801 A69-31784

Microstructural factors role in metal fracture toughness, considering effects of deformation processing and heat treatment, grain size, structural refinement, fibering, etc

17 p2988 A69-33552

Welding technique using pulsed current supply to achieve smooth metal transfer on thin sections in various positions

18 p3150 A69-35418

Electromagnetic shaping of metallic parts using equations describing magnetic and electric field intensity as function of blank profile and cylindrical blank wall thickness

18 p3151 A69-35456

Low temperature predeformation and disorientation of mosaic blocks to strengthen aluminum

20 p3562 A69-37819

Beta working effect on Ti alloy mechanical and fatigue properties

[ASM PAPER D8-24.3] 20 p3564 A69-38136

Shock hardening of Al alloys in annealed, solution heat treated and aged conditions compared with cold-rolled materials

[ASM PAPER W9-10.4] 21 p3729 A69-38664

Gas turbine compressor blade buckling during blade fabrication by hydraulic pellet jet technique eliminated by controlling working pressure of jet

21 p3731 A69-38879

Forming techniques to overcome pressing behavior of maraging steels, noting tendency to thin during stretching and reluctance to stretch

23 p4170 A69-42157

Explosive forming theory and experience including explosives characteristics, dimensional relations, hold-down pressure, economics and applications

24 p4320 A69-43038

METALLIC PLASMAS NT CESIUM PLASMA

Simulation experiments using artificial plasma for astrophysical rocket exploration, discussing experiments leading to barium-copper oxide mixture choice for plasma cloud

06 p0999 A69-16973

Dynamic growth of positive ion sheath on plane electrode in mercury plasma, measuring sheath thickness and current

12 p2134 A69-26099

Collisionless Ce and K plasmas measurements to determine steady state parameters and LF oscillations, noting noise relationship to drift instability

14 p2499 A69-29849

Synthesized plasma from neutralized mercury ion beam ejected from electron bombardment source, analyzing temperature, plasma sheath and stability

14 p2502 A69-29956

METALLIZING

Mechanical properties of thermally diffused layers obtained by vacuum chromizing of steel, establishing need to decarburize substrate material

03 p0450 A69-13913

Integrated circuit interconnection patterns computerized design, discussing automatic laser mask-making control

06 p0931 A69-17199

X ray and photomicrographic study of metal layer-ceramic seal interface reaction products, discussing phase transformations, temperature effects and time dependence

08 p1320 A69-20375

Narrow gap gas metal arc welding process in spray transfer range for narrow welds in thick plates, discussing equipment and applications

11 p1891 A69-24930

Sintered metal powder process for metal-to-ceramic seals for thermionic converters, giving results for tensile strength, thermal cycling and cesium corrosion

14 p2454 A69-29211

Large scale integrated circuits reliability with emphasis on multilayer metallization, designing test vehicles for failure mechanisms

17 p2935 A69-32887

Steels chromized by vacuum diffusion, studying depth, microstructure and properties of chromized layer

19 p3329 A69-36572

Bonding mechanisms in Mo-Mn-Ti metallizing and Cu brazing in metal to ceramic seals by strength test, microscopy and electron probe microanalysis

21 p3733 A69-39599

Hybrid microwave IC assembly techniques, discussing active devices connection to substrate with thick or thin film metallizations

22 p3912 A69-40068

Si integrated circuits single and composite layered metallization systems, comparing characteristics of various refractory and noble metals

24 p4286 A69-42761

METALLOGRAPHY

High temperature magnetic analysis of metallurgical structure of high strength steels and composites, including phase transformation and matrix grain structure

01 p0093 A69-10111

A15 type phase in vapor deposited W-Re alloys identified by X ray diffraction, metallography and hardness measurements

01 p0098 A69-10649

Diffusion zones in filament reinforced metal matrix composites, using metallographic technique

01 p0103 A69-11269

Structure of zirconium corner of Zr-V-Ni system phase diagram, using metallography, hardness and microhardness methods

02 p0262 A69-11847

Diamond abrasive process for preparation of microminiature devices for metallographic analysis

03 p0402 A69-13007

Stress corrosion crack initiation in aluminum alloy observed by optical microscopy

06 p0944 A69-17855

Carbon influence on cast Waspaloy, discussing chemical segregation, chemical gradients and tensile ductility

[SAE PAPER 690100] 07 p1158 A69-18307

Structure and critical superconductivity current of titanium niobium alloy as function of heat treatment and deformation

07 p1158 A69-18532

Time and temperature dependence of Mo and W deformation structure variation and primary recrystallization from metallographic investigations using electron microscopy

08 p1334 A69-21058

Structure of spinodal decomposition in Al-Zn alloys by X ray diffraction noting anisotropy, periodicity and stability

09 p1522 A69-21502

Metals structure and mechanical properties after hydroexplosive forming analyzed by X ray diffraction

09 p1503 A69-21851

Polarized light microscope for application to metallic crystallographic studies noting grain orientation, hep grain basal pole orientation and etched fcc metals

09 p1499 A69-22302

Molybdenum, titanium and cobalt effects on nickel maraging steel strength and ductility

11 p1904 A69-24643

Soviet collection of articles on atomic ordering effects on alloy properties

11 p1936 A69-24701

Metallographic aspects of fracture, analyzing very brittle solids, Griffith cracks, ductile solids and ductile to brittle transition

13 p2274 A69-27225

Metallography - Conference, Denver, November 1968

13 p2280 A69-28154

Metallographic study of microstructure recrystallization of 50 Ni-50 Fe alloy during annealing using special etchants and methods

13 p2281 A69-28155

Electrolytic and mechanical polishing techniques for metallographic specimens of beryllium

13 p2281 A69-28161

Metallographic analysis techniques for high aluminum activity pack cementation coating on nickel-base alloy

13 p2282 A69-28163

Dispersion-strengthened alloys from extraction replicas, determining volume fraction and spacing of dispersed phase particles

13 p2282 A69-28167

Metallography of iron meteorites emphasizing Canyon Diablo anomaly

13 p2353 A69-28169

Structural modifications of metals and alloys accompanying various stages of creep, interpreting equations describing time-deformation relation

17 p2985 A69-32904

Iron distribution inconsistency indicated in Group H and L chondrites through Ni and Co analysis of frac-

tionated samples, plotting atomic ratios on Prior diagram
19 p3407 A69-36078

Meteorites Ni-Fe metal structures analysis as part of petrology study of mesosiderites
20 p3602 A69-37536

La-Rh system study by powder X ray diffraction, metallographic and differential thermal analysis, constructing equilibrium diagram and determining crystal structure data
21 p3744 A69-38739

Dislocation structure of Al, Ni, Cu and Ag during creep, noting dependence of creep rate on stacking-fault energy
22 p3972 A69-41080

Metallographic techniques for meteorite studies, determining etching topography and orientational difference within each phase
24 p4382 A69-42934

METALLOID ORGANIC COMPOUNDS

U ORGANOMETALLIC COMPOUNDS

METALLURGY

Meteoritic extraterrestrial materials sampling for chemical, petrographic and metallurgical analyses, discussing microstructure and optimum specimen weight for representative analysis
[UN PAPER 68-95381] 01 p0150 A69-10480

Dendrite formation and solidification relationship in highly alloyed materials from quantitative determination of controlling factors for segregation
01 p0098 A69-10899

Hydraulic press large closed die forging of various alloys and refractory materials, evaluating mechanical and metallurgical problems
[ASM PAPER C7-5.4] 04 p0604 A69-14522

Beryllium properties, metallurgy, alloys, fabrication and applications in guidance components, aerospace structures and nuclear reactors
04 p0614 A69-14586

Metals study using field ion microscope for detecting dislocations, crystal boundaries and growth surfaces and surface diffusion energies
06 p0943 A69-17376

Refractory metal alloys metallurgy and technology - Conference, Washington, D.C., April 1968
07 p1164 A69-18790

Metals hydrogen embrittlement theory, discussing role of dynamic strain aging hypothesis in overcoming theory defects
09 p1523 A69-21849

Aluminum alloys role in aerospace technology, discussing temperature characteristics, gas absorption, weldability, purity, etc
11 p1903 A69-24518

Cast and forged steel mechanical properties noting starting materials and production methods roles in cast steel improvement
11 p1904 A69-24644

Beryllium properties and processing including magnesian reduction, powder purity, oxygen content, grain size and temperature effects on mechanical properties
11 p1904 A69-24897

Steels classification for welded construction according to heat treatment and metallurgical structures
12 p2111 A69-25826

Beryllium production, properties and technology, discussing ductility, welding and soldering problems, temperature effects, etc
16 p2793 A69-31788

Metallurgy, properties and applications of Co-Ni-Mo-Cr ultrahigh strength alloy, discussing corrosion
18 p3154 A69-34307

Z-micron sections removed from metal specimens by microtome for radiotracer study of mass dependence of self diffusion
19 p3313 A69-36490

Solar absorptance, total hemispherical emittance and absorptance/emittance ratio for metals at cryogenic temperatures measured simultaneously with sinusoidally perturbed incident radiation
01 p0176 A69-10847

Superconductivity and melting point of metals, discussing cause of anomalies
02 p0283 A69-11785

Tabular reduction of crystal structure chemical information for metals and semiconductors for material selection use
02 p0295 A69-11786

Dynamic mechanical behavior of metal at tip of plain strain crack, discussing fracture strength relation to triaxial plastic stability
02 p0343 A69-12284

Electromagnetic wave propagation in metals in magnetic field, noting helicon waves, magnetoplasma waves, waves with discrete spectrum or near cyclotron resonance and quantum phenomena
02 p0299 A69-12565

Metal composite materials, discussing strengthening mechanism for inclusion of high elastic coefficient and creep limit fibers in weak ductile matrices
02 p0268 A69-12750

Ground state energy for single magnetic impurity dissolved in nonmagnetic metal, applying cluster variation method to s-d interaction Hamiltonian
03 p0485 A69-13298

Metal-insulator transition, observability and transition in ionic lattices and polar liquids
03 p0489 A69-13922

Analytical determination of traces of metals caused by wear in aircraft liquid fuels, hydraulic fluids and lubricants, noting polarography and coulometry
03 p0435 A69-14101

Localized umklapp scattering effect on galvanomagnetic properties of nearly free electron bcc metal with spherical Fermi surface
03 p0493 A69-14240

Plasticity of metals under isothermal conditions at elevated temperatures
04 p0671 A69-14454

Metal heating by laser, noting heating rates exponential increase with time due to optical characteristics changes
06 p0932 A69-16915

Metal matrix composites - ASTM Conference, Boston, June 1967
06 p0938 A69-16940

Metal matrix composites highest potential for future use and development of filament-matrix compatibility in relation to high temperatures
06 p0939 A69-16941

Metal atom production by bombarding metal with positive ions from microwave discharge, obtaining isolation in inert gas matrix and UV spectra
06 p0957 A69-17113

Galvanic corrosion couples of metals and alloys tested in liquid fluorine, determining corrosion rates for possible missile components application
06 p0944 A69-17854

Solar absorptance and hemispherical emittance of metals at space conditions determined with cyclic incident radiation technique
[AIAA PAPER 69-60] 06 p0945 A69-18154

Direct bead sampling by aspiration of molten metal in open hearth furnaces and converters
07 p1141 A69-19341

Stellar atmospheres radiative opacity, computing metal absorption coefficients
07 p1220 A69-19392

Filler metals for HY steels, discussing tensile and yield strength, elongation and area reduction of butt welds deposited
08 p1320 A69-20406

Stresses and waves in highly conducting magnetoplastic metals as analogy of MHD processes in plasma
09 p1551 A69-22033

Atmospheric models for metal deficient stars of K and G spectral type, studying reduced metal abundance effect on atmospheric structure

09 p1596 A69-22055

Boron carbide filaments as reinforcements for metal structures, noting vapor deposition use of silica

09 p1529 A69-22070

Ceramic whiskers and metallic matrix chemical reactions during composite formation, analyzing coated and uncoated SiC whiskers in titanium matrix

09 p1527 A69-22359

Materials, processing and testing variables effects on mechanical properties determined for metal matrix composites

[ASME PAPER 69-GT-23] 09 p1527 A69-22496

Carbidothemic production of metals and binary and ternary alloys, discussing eutectic properties

09 p1514 A69-22731

Metallicity index Q value difference between cluster and noncluster galaxies determined from UV, blue and violet observation data

10 p1774 A69-22964

Metals with combined high damping and good mechanical properties for solving fatigue, noise and vibration problems

10 p1715 A69-24044

Electroplating solutions test for filament winding and electroforming process used in fabricating fiber reinforced metal composites

11 p1890 A69-24337

Direct measurement device for metallic material response to mechanical stresses from stress force and global displacement /including material deformation/

11 p1884 A69-24757

Soviet collection of papers on diffusion processes in metals covering welding, annealing, anisotropic crystals, metal condensation layer, cast iron decarboxization, etc

11 p1890 A69-24798

Diffusion processes during annealing of metals irradiated by electrons and neutrons, discussing crystal damage, recovery and recrystallization

11 p1891 A69-24800

Testing machines for metallic materials, discussing design criteria and application to tensile strength, vibration and durability test machines

[DVL-865] 11 p1889 A69-25682

Soviet monograph on nuclear radiation effect on structure and properties of metals and alloys covering electron, gamma and neutron radiation

12 p2114 A69-26469

Thermal emission from metal in contact with dielectric for cryogenic insulation applications

13 p2374 A69-27783

Optical depths of convection related to metal deficiency for main sequence and giant stars

14 p2527 A69-29946

Metallo ceramic materials strength as function of porosity calculated for tension, shear, bending and torsion deformations

15 p2638 A69-30283

Thermal stresses in fiber reinforced metals as function of volumetric content of fiber phase

15 p2638 A69-30285

Tensile, bending and impact strengths of materials produced by metal porous blank impregnation with molten glass, noting metal density and sintering effects

15 p2643 A69-31188

Solar chromosphere metal abundance determined taking into account local thermodynamic equilibrium departures

16 p2855 A69-31657

Light metals - Conference, Leoben, Austria, June 1968

16 p2799 A69-31774

Ceramic phase reinforcement of metals and alloys, discussing interfacial energies, binding forces and elastic stress fields

[ONERA-TP-661] 16 p2802 A69-32204

Structural modifications of metals and alloys accompanying various stages of creep, interpreting equations describing time-deformation relation

17 p2985 A69-32904

Sliding friction and wear properties of metal ceramic composites applied to aircraft brakes

17 p2987 A69-33375

Collection of papers on fracture, Volume 6, Fracture of metals

17 p2988 A69-33550

Temperature dependence of metal elastic properties including thermal strains effect on stress field, yield stress changes and elastic modulus variations

18 p3212 A69-34353

Electrode potential measurements for corrosion study of metals and alloys in aqueous solutions, molten salts and gaseous atmospheres

18 p3150 A69-35412

Optical frequencies mixing based on photoelectric effect in metals and semiconductors, noting internal photoconductivity

19 p3332 A69-35871

Atmospheric models for specified effective temperatures, hydrogen-to-metal ratios and surface gravities in studying metal deficiency effect on stellar atmosphere

19 p3425 A69-36338

Space age metals supply and demand relationships, discussing system engineering criteria for maximum efficiency

19 p3346 A69-36635

Low strain rate effects on metals yield and tensile strength

20 p3563 A69-38063

Vacuum heat treating and joining process for various ferrous and nonferrous metals and alloys, discussing advantages, applications and economics

[ASM PAPER D8-22.3] 20 p3551 A69-38132

Metals plastic behavior including strain hardening and Bauschinger effect

21 p3832 A69-38466

Metal deformation dynamics at elevated temperatures, discussing closed loop electrohydraulic testing machine for stress relaxation and strain rate sensitivity

21 p3689 A69-38595

Metal-polymer-metal and metal-polymer-silicon thin film structures analysis for polymers bulk properties and insulator-silicon interface, noting dipole-like relaxation

21 p3782 A69-39464

Molybdenum disulfide influence on electrochemical corrosion of metals

21 p3733 A69-39804

Metals conductivity under high pressure, giving theories for electrons scattering cross sections on ions and for Debye temperature

22 p3980 A69-40187

Multiquantum photoemissive effect in metals, semiconductors and dielectrics emphasizing laser application for studying electromagnetic field

22 p3964 A69-40690

Seizing characteristics of metals using electrical resistance as measure of lattice imperfection density due to friction

22 p3957 A69-41111

Galactic evolution using concept of stellar populations and correlation with metal and He abundances

23 p4218 A69-42323

Metallic and nonmetallic materials for space applications with launch and orbit condition requirements, examining finishes and lubricants

24 p4332 A69-43207

METASTABILITY

U METASTABLE STATE

METASTABLE ATOMS

Elastic scattering cross section for low energy electrons on metastable He atoms, using polarized orbital method

03 p0469 A69-12922

Time dependence of laser output in C and N atoms following dissociative excitation transfer explained in terms of measured populations of excited states

05 p0795 A69-15663

Noble gas atom simultaneous ionization and excitation by removal of metastable electron in fast collision

06 p0961 A69-17137

Forward scattering of metastable and ground state argon atoms after argon ion-atom charge transferring collisions, discussing excitation resonances

08 p1354 A69-19809

Continuous polarized electron beam produced from spin conversion in ionizing reactions involving optically pumped metastable atoms in He discharge

12 p2130 A69-26312

Laser interferometer determining spatial distribution of neon metastable state in He-Ne active discharge, discussing lens effects

12 p2108 A69-26636

Residual gas analyzer and leak detector by time of flight measurements on neutral metastable atoms and molecules between pulsed electron gun and auger surface detector

13 p2262 A69-28006

Photoinduced shock processes involving metastable hydrogen atoms and molecules, discussing vibrational and rotational levels

16 p2813 A69-31754

Monograph on ionization of Ar-CH mixtures during Townsend discharge, covering metastable Ar atoms lifetime in various pressure ranges

16 p2814 A69-31841

Forbidden atomic transitions involving metastable species in upper atmosphere, tabulating permitted and forbidden molecular band systems

19 p3421 A69-36214

Spectroscopic measurements of weakly ionized Ar plasma premixed with diatomic N in plenum chamber, demonstrating role of competitive reactions for metastable Ar atom

21 p3779 A69-39794

Metastable atom detection system for ground state atom beams, measuring Ar beam density five orders lower than background gas density

22 p3950 A69-41230

Detection of metastable He, H, Ne, Ar, Kr, Xe and molecular nitrogen with continuous channel electron multipliers

22 p3917 A69-41235

He-Ne laser heterodyne system for measuring dispersion at 6328 and 6401 A due to Ne metastable atoms in gas discharge

23 p4172 A69-41397

METASTABLE STATE

Metastable positive He molecules and He atoms decay in afterglow, taking into account simultaneous emission at 4650 angstroms during absorption studies

02 p0287 A69-11932

Metastability of 1D state of negative N ion, instability of 3P state and energies of both states

02 p0284 A69-12598

Q switched Ruby laser metastable state population kinetics and resonator losses, discussing internal energy redistribution with subsequent absorption spectrum changes

04 p0610 A69-14381

Metastable phases of binary zirconium-niobium system, defining decomposition of solid solution in cooling

05 p0781 A69-16614

Metastable level population measurement in laser crystal based on luminescence changes under influence of stimulated emission

06 p0934 A69-17457

Metastable helium abundance in interstellar and intergalactic space, inferring low energy cosmic ray concentration

06 p1010 A69-17973

Metastable phases in titanium alloys with beta alloying elements

07 p1162 A69-18773

Temperature profile and power density distribution in metastable level of ruby laser rod during pumping in air

07 p1150 A69-18937

Metastable molecules and fragments produced by electron excitation of nitrogen, hydrogen, carbon dioxide and nitrous oxide, noting excitation functions, kinetic energy, etc

13 p2301 A69-27362

Combined free and forced convection flows in parallel channel systems and in single channels, discussing metastable flow regimes, single phase laminar flows, etc

13 p2377 A69-28152

Q switched ruby laser metastable state population kinetics and resonator losses, discussing internal energy redistribution with subsequent absorption spectrum changes

14 p2456 A69-28754

Metastable ions formation and detection in double focusing mass spectrometer, calculating location of decomposition in electrostatic analyzer and doubly charged ions transition

15 p2561 A69-30021

Two photon decay of metastable levels of hydrogenic and He-like ions in solar corona, depopulating via proton collisional excitation to 2p level

19 p3396 A69-36218

Metastable level population measurement in laser crystal based on luminescence changes under influence of stimulated emission

20 p3555 A69-37940

Spectral distribution of two photon emission from metastable state of singly ionized He by broadband spectroscopic coincidence counting technique

23 p4220 A69-42378

- Elastic electron scattering by metastable states of rare gases, using effective potential matching experimental binding energy of negative ions
24 p4354 A69-43818
- METAZOA**
U ANIMALS
- METEOR BURSTS**
U METEOROID SHOWERS
- METEOR HAZARDS**
U METEOROID HAZARDS
- METEOR TRAILS**
Mechanism responsible for luminosity of long duration meteor trains, discussing color changes, band emission and train spectra as function of height and duration
01 p0154 A69-10874
- Wind profile harmonic analysis based on meteor trail observations, noting wind power spectra and propagating waves in atmosphere
01 p0072 A69-11170
- Particles behavior after separation from meteor, considering deceleration for separation altitudes and initial velocities
02 p0314 A69-11645
- Envelope distribution of echo signal during reflection scattering by extended turbulent meteor trails
02 p0207 A69-11690
- Meteor masses and atmospheric density calculation inaccuracy by use of effective stellar magnitudes of meteors
02 p0314 A69-11695
- Wind measurements by radio observation of meteor trails compared with fading drift results
02 p0275 A69-12042
- Electron concentration in lower ionosphere based on measurement of Faraday rotation of polarization plane of radio waves scattered by meteor trail
03 p0423 A69-13535
- Bolide fireball radiation maximum efficiency from observed spectra, using monochromatic radiation efficiency data for rarefied atoms and ions in meteor comas
03 p0512 A69-13692
- Diffuse meteor stream separation from sporadic background, using orbital elements of individual meteors
04 p0659 A69-15034
- Soviet book on meteor trail scatter communications covering civil and military advantages over troposcatter systems, meteor trail scatter properties, etc
04 p0562 A69-15488
- Meteoroid mass distribution determined by radar observations of underdense meteor trails at Springfield Meteor Observatory
06 p1003 A69-17493
- Receiving system of CENFAM multistation radar project for meteoric and upper atmosphere studies composed of antennas connected to form product-interferometer pairs
07 p1077 A69-18674
- Duty cycle increase on meteor forward scatter radio communication paths by use of wide-beam transmitting antenna along great circle
08 p1394 A69-20609
- 11 Canis Minor meteor stream orbit computed, noting retrograde orbit and 4.2 million km perihelion
08 p1394 A69-20621
- Ionized meteor trails initial radii statistical characteristics determined for two models
10 p1783 A69-23917
- Spectral measurement of luminous trails produced by injecting high velocity submicron diameter iron particles into gaseous targets compared with meteor spectra
10 p1790 A69-24142
- Artificial noctilucent clouds or meteor trails positions determined by transforming photogrammetric coordinates
12 p2154 A69-25822
- Color photograph of group of meteor trails with red glow beneath by automatic camera from balloon at 30.6 km
12 p2157 A69-26231
- Reflection coefficient of polarized radio waves at ionized meteoric trails obtained by numerical integration of differential equations
12 p2031 A69-26691
- Wind structure in atmosphere meteor region from persistent meteor trail radio echoes amplitude fluctuations, noting horizontal wind velocity profiles
12 p2074 A69-26962

- Visual and photographic observations of Perseids meteor trails velocity noting discrepancy
13 p2353 A69-28035
- Envelope distribution of echo signal during reflection scattering by extended turbulent meteor trails
13 p2224 A69-28721
- Meteor masses and atmospheric density calculation inaccuracy by use of effective stellar magnitudes of meteors
13 p2355 A69-28726
- 17 November 1966 Leonids return, tabulating data from previous returns starting with October 899
14 p2525 A69-29715
- Lyrid and Perseid meteor spectra for spectral line identifications in 3100-4000 Å UV range, listing lines from six neutral atoms and five ions
15 p2700 A69-31500
- Meteorite entering earth atmosphere on 25 April 1969 over England, describing path, size and recovered fragments
15 p2701 A69-31528
- Meteoric elements ionization and loss mechanisms in E region, discussing roles of atomic oxygen and metal ions chemical reactions
16 p2780 A69-32313
- Meteoric trails radar observations to measure zonal wind profiles between 80-110 km, noting short period oscillations
16 p2865 A69-32609
- Meteor trail drift radar observations in Kharkov, giving wind velocity diurnal and seasonal variations
17 p3041 A69-33897
- Radar unit for network component (wind patrol) in statistical observations of wind drift conditions in meteor trails
17 p2939 A69-33901
- Automatic radar station for meteor observations, discussing separate transmitting and receiving antennas directive gain and radio echo power
17 p2939 A69-33902
- Photographic networks for meteors orbits and trajectories and meteorites impact points during nighttime, discussing fireball occurrence
19 p3415 A69-36120
- Network for fireball trajectories rapid analysis to recover meteorites and obtain orbital elements data, noting role of planetariums
19 p3295 A69-36121
- Wind shear effects on radar echo decay constant for finite meteor trail, considering roles of trail length and electron density variations
19 p3276 A69-36482
- Meteor radio electronics principles, methods and equipment, discussing ionized meteor trail formation, radar tracking and utilization of trails for communications
19 p3277 A69-36591
- Meteor winds analysis method used on tidal period wind measurement data obtained by chemical release from rocket in 95-135 km region
20 p3574 A69-38092
- Radio wave reflection from irregularly ionized meteor trains, discussing decay time scatter and electron line density
22 p3899 A69-39969
- Visual observation of meteor and train microstructure obtained by refractor
22 p4033 A69-41058
- Radio echoes diffraction patterns determination from reflection coefficients of polarized radio waves reflected from ionized meteor trails
23 p4214 A69-41846
- Qualitative model of atmospheric mass circulation constructed from radar meteor trail drifts observations, considering solar thermal radiation and zonal wind direction
23 p4214 A69-41862
- Ionized meteor trails reflection zone altitudes determination by interferometric measurements of phase differences
24 p4311 A69-43508
- METEORITE COLLISIONS**
Barrier penetration depth by meteorite particles at prethreshold impact velocities, taking into account energy dissipation on shock wave front
01 p0152 A69-10579
- Ching iron meteorite discovery site, noting no crater or impact traces
01 p0160 A69-11380
- Meteoroid hazard, discussing possible future collisional dangers for space traffic
01 p0160 A69-11412

- Barrier penetration depth by meteorite particles at prethreshold impact velocities, taking into account energy dissipation on shock wave front
15 p2709 A69-30749
- Lunar mascon origin from collisions of large masses with lunar surface
15 p2698 A69-31328
- Meteorite impact hypothesis supported by autochthonous and mixed breccias, shattercones and microscopic shock deformation evidence in central uplift rocks at La Malbaie structure
22 p4021 A69-40410
- METEORITE COMPRESSION TESTS**
U COMPRESSION TESTS
U MECHANICAL PROPERTIES
U METEORITES
- METEORITE CRATERS**
Meteorite structure and origin, discussing cosmic dust analysis and collection, Tungusk silicate-magnetite spherules, asteroid collisions and meteorite ages
01 p0159 A69-11367
- Thermoluminescence intensity of dolomite specimens from Kaali meteorite craters, discussing meteorite impact thermomechanical effect and crystal lattice defects
01 p0159 A69-11371
- Lunar mascons size and depth calculated in terms of mare formed by low velocity iron meteorites impact
04 p0654 A69-14629
- Nature and origin of lunar far side Tsiolkovsky crater
06 p1003 A69-17386
- Structure transitions in iron meteorites from Widmanstätten to granular pattern to study Barringer crater and Canon Diablo meteorites formation
09 p1597 A69-22154
- Meteor explosion theory of origin of lunar craters and round maria, suggesting endogenic origin
10 p1784 A69-23960
- Moldavites and Ries crater material, studying Rb-Sr isochronal relationship
23 p4154 A69-41341
- Impact origin of Ivory Coast tektites and Bosumtwi Crater indicated by gamma ray spectrometric study of U, Th and K abundance patterns
23 p4210 A69-41347
- METEORITES**
NT ACHONDrites
NT AUSTRALITES
NT CARBONACEOUS METEORITES
NT CHONDRITES
NT IRON METEORITES
NT KAPOETA ACHONDRITE
NT MURRAY METEORITE
NT ORGUEIL METEORITE
NT PANTAR CHONDRITES
NT SIKHOTE-LIN METEORITE
NT STONY METEORITES
NT TEKTITES
NT TUNGUSK METEORITE
- Preatmospheric meteorite size determination from distribution of radioactive isotopes resulting from nuclear reactions produced by cosmic rays, discussing core sources
01 p0159 A69-11375
- Meteorite collections in museums of Lvov, U.S.S.R., noting specimens from Pultusk shower, Kansas, Mexico, Czechoslovakia and U.S.S.R.
01 p0160 A69-11388
- Etching techniques for revelation and viewing of fossil charged particle tracks in meteoritic and terrestrial minerals
02 p0245 A69-12569
- Chemical composition of nuclear cosmic rays with Z greater than 22, noting etching techniques for utilizing meteoritic minerals as detectors
05 p0816 A69-16355
- Meteorites radiogenic and cosmic ray exposure ages, orbits and parent bodies, discussing H and L group chondrites
08 p1405 A69-20928
- Asteroidal and cometary orbits and origin of meteorites, discussing eccentricities, exposure ages and mass yield
08 p1406 A69-20929
- Stratospheric dust, discussing terrestrial and meteoritic origins, volatility of particles smaller than few microns, and light scattering and direct sampling measurements
09 p1608 A69-22689
- Possible sources of meteoritic material from Hopewell Indian burial mounds
11 p1963 A69-25401
- Vilna meteorite bolide observation with all-sky camera noting seismic and analytic records
13 p2334 A69-27189

Meteorite entering earth atmosphere on 25 April 1969 over England, describing path, size and recovered fragments

15 p2701 A69-31528

X ray detectable preferred disorder in solids by shock loading studied in Ainsworth meteorite and in hexagonal alpha silicon dioxide

15 p2671 A69-31538

Meteorite origin theory limitations from microscopic examination and microprobe analyses of chondrules in unequilibrated meteorites

17 p3034 A69-33585

Meteorite research - Conference, Vienna, August 1968

19 p3403 A69-36072

Meteorites data in planetary cosmogony, discussing iron meteorite ages, Xe retention in chondrites and synchronism of sun and protoplanetary cloud forming

19 p3406 A69-36075

Densities and angular distributions of fossil tracks in meteorites produced by slowing down heavy primary cosmic ray nuclei

19 p3410 A69-36096

Meteorite orbits analysis with emphasis on recovered meteorites, noting fireballs and hyperbolic orbits

19 p3414 A69-36115

Modified Monte Carlo model applied to computerized meteorite orbit evolution, simulating secular perturbations by imposing sinusoidal variation on orbital elements

19 p3414 A69-36117

Photographic networks for meteorites orbits and trajectories and meteorites impact points during nighttime, discussing fireball occurrence

19 p3415 A69-36120

Saint-Severin amphoterite geometrically reconstructed from fragments in form prior to atmospheric breakup, noting agreement with track densities of iron ions

19 p3416 A69-36128

Shock histories of hexahedrites and Ga-Ge group III octahedrites based on metallographic and X ray diffraction analysis, noting meteorites shocked preterrestrially

19 p3418 A69-36136

Shock wave parameters from meteoric body moving at high supersonic speeds through atmosphere, calculating specific heat ratio

19 p3428 A69-36841

Soviet book on shock waves propagated by meteorite intrusion into earth atmosphere, covering interaction with earth surface, Tungusk meteorite, etc

20 p3613 A69-38205

Average meteorite flux at Martian surface estimated by generating flux distribution for Martian atmosphere top and adjusting for mass loss and deceleration

24 p4387 A69-43351

METEORITIC COMPOSITION

Meteoritic extraterrestrial materials sampling for chemical, petrographic and metallurgical analyses, discussing microstructure and optimum specimen weight for representative analysis

[UN PAPER 68-95381] 01 p0150 A69-10480

Monograph on nature of planets and solar system origin covering meteorite observations and age determination, chondrite composition, metallic elements, etc

01 p0152 A69-10702

Replicate neutron activation determinations of Ga, Ge, In and Ir in L group chondrites, proposing model which accounts for observations

01 p0155 A69-10976

Chondrules in Sharps /H-3/ chondrite show evidence of recrystallization and homogeneous olivines and pyroxenes

01 p0156 A69-10977

Carbonaceous, enstatite and stony meteorite classification on basis of siderophyllic, chalcophyllic and lithophilic element proportions or isotope composition, discussing thermodynamic equilibrium

01 p0025 A69-11368

Uranium in meteorites, discussing U content and isotope composition, Pb isotope ratios, radiogenic Pb, origin of matter and meteorite ages

01 p0025 A69-11369

Mineralogy of iron fragments from impact craters near Lake Kaali, Estonia, discussing structure and type of meteorite

01 p0159 A69-11370

Nerft and Kaande stony meteorites mineralogical composition from microscopy, noting olivine hypersthene chondrite classification

01 p0159 A69-11374

Meteoritic materials investigated for Sc, Ce and Eu content and distribution in various phases, using neutron activation analysis

01 p0026 A69-11376

Tungusk meteorite preceding and succeeding atmospheric events, explosion and origin

01 p0159 A69-11378

Chemical composition of various types of chondrites, determining quantitative proportions soluble and insoluble in acids

01 p0026 A69-11381

Stone meteorite chemical composition, analyzing chondrites Borodino, Lavrentevka, Alfianello and Nardoo II

01 p0026 A69-11382

Minerals in ablated crust of Saratov meteorite using X ray analysis

01 p0160 A69-11385

Meteorite dust composition of Tungusk meteorite noting angular and spherical particles

01 p0160 A69-11386

Enstatite chondrites structure and mineral content and composition using microscopic and X ray analysis, grouping parameters in distinguishing types

02 p0317 A69-12016

Rubidium, Sr and Sr isotopic composition of normal gray hypersthene chondrite falls, noting Rb/Sr and Sr87/Sr86 ratio determination of Bath Furnace L chondrite isochron

02 p0317 A69-12020

Magnetite content of type I carbonaceous meteorite from quantitative X ray diffractometry of Orgueil meteorite

02 p0328 A69-12729

Meteorite fragments fall and distribution at Bur-Ghelui, Somalia, discussing crust morphology, mineralogical composition and structure

03 p0507 A69-13095

Australites from Port Campbell and Princetown region of Western Australia

03 p0507 A69-13096

South African octahedrite containing inclusions of troilite and graphite veined with kamacite

03 p0507 A69-13097

Oxygen partial pressure, temperature and olivine composition related, determining distribution coefficient of Fe and Mg between olivine and pyroxene

03 p0516 A69-14082

Electron microprobe analysis of potassium feldspar in Weekeroo Station meteorite

04 p0659 A69-14979

Nepheline occurrence in unequilibrated chondrites, discussing crystallographic evidence from X ray powder patterns

04 p0659 A69-15010

Boron determination in type I carbonaceous chondrites by nonaqueous colorimetry, comparing results with ordinary chondrites

04 p0661 A69-15147

Hydrothermal investigation of Ge trace quantity distribution between metal, silicate and sulfide phases at controlled oxygen partial pressure by oxygen buffer techniques

05 p0819 A69-15624

Heavy xenon isotopic anomalies in carbonaceous chondrites, rejecting plutonium 244 spontaneous fission decay mechanism

05 p0819 A69-15625

Chemical compositions and structural states of feldspar in recrystallized /Type 6/ chondrite meteorites, using electron microprobe analysis and X ray diffraction techniques

05 p0819 A69-15626

Nitrogen abundances in chondritic meteorites determined by carrier gas fusion extraction

05 p0825 A69-16301

Stony meteorite Krahenberg, determining isotopic composition, rubidium and strontium age of dark and light portions by neutron activation analysis

05 p0826 A69-16439

Rare gases in stony meteorites, noting premordial inheritance and complex Xe anomalies

05 p0826 A69-16440

Isotopic composition in near-surface regions of meteorites due to nuclear processes with low energy solar particles

06 p0989 A69-17282

Electron microprobe analysis of vanadium in presence of titanium by compositional measurement of chromite in chondritic meteorites

07 p1073 A69-18419

Chemical composition and morphological, structural, textural and mineralogical characteristics of chondrules and chondrites

07 p1212 A69-18548

Chemical analysis, isotopic composition, structure and mineralogy of meteorites for classification into iron and stones, discussing time variation of temperature, pressure, etc

07 p1224 A69-19710

Alternative explanation of garnet composition in Coorara meteorite, giving probable formula

08 p1382 A69-19819

Chondrite meteorite fall /1969/ in Mexico, noting opaque and microcrystalline matrices and gamma rays from short lived isotopes

08 p1396 A69-20686

Plutonium-244 existence in early solar system concluded from relative abundance ratios of excess meteoritic heavy Xe isotopes

08 p1401 A69-20900

Primitive elemental abundances in solar system, discussing composition of sun, meteorites and lunar maria

08 p1403 A69-20914

Fractionation of abundant lithophile element ratios in chondrites emphasizing Si-Mg ratio

08 p1403 A69-20915

Rare earth elements and yttrium in meteoritic chondrules determined by radiochemical neutron activation analysis

08 p1403 A69-20916

Indium abundances in chondritic and achondritic meteorites and terrestrial rocks determined by radiochemical neutron activation analysis

08 p1404 A69-20917

Gold and iridium concentrations in meteoritic and terrestrial materials by neutron activation, discussing chondrules, meteoritic troilite and metallic spherules

08 p1404 A69-20918

Antimony bromine and mercury abundances in meteoritic materials determined by neutron activation analysis

08 p1404 A69-20919

Mercury concentration relation to thermal history of chondritic meteorites, using activation analysis

08 p1404 A69-20920

Trace element distribution in metal phase of chondrites and iron meteorites, using neutron activation analysis with radiochemical separation

08 p1404 A69-20921

Trace elements distribution in Smithonia iron meteorite by spark source mass spectrometry, noting terrestrial weathering effects

08 p1404 A69-20922

Chlorine as indicator of terrestrial contamination in iron meteorites, using neutron activation analysis and metallographic observation

08 p1405 A69-20923

Radioactive decay products concentration from extinct radioisotopes in meteorites with estimation of formation interval, discussing fissiogenic xenon and solar system nucleosynthesis

08 p1405 A69-20924

Ne and Xe in carbonaceous chondrites, noting large amounts of fission Xe and implications for galactic nucleosynthesis models

08 p1405 A69-20925

Redistribution of potassium and argon in meteorites and rock samples, discussing thermal diffusion and grain size

08 p1405 A69-20926

Electron probe analysis of olivine and pyroxene in LL-group chondrites, discussing iron and fayalite composition and unequilibrated stones

08 p1406 A69-20931

Magnetite morphological variations of type I carbonaceous meteorites, discussing isometric crystals, spheres, spherulites, platelets and filaments

08 p1406 A69-20932

Boron in tektites determined by calorimetric technique for analysis of boron in silicates, comparing results with values from igneous and sedimentary parents

08 p1407 A69-20936

Geochemistry and element abundances for Henbury impact glass, Darwin glass and australites, noting evidence for meteorite impact on sandstone

08 p1407 A69-20937

Statistical distribution of chemical elements average abundances in earth crust and meteorites and nucleosynthesis of elements under specific astral conditions

08 p1310 A69-20941

Rare earths relative and absolute terrestrial abundances in shales, basalts, rhyolites and granites

08 p1310 A69-20942

Meteoritic materials structure, composition and magnetic properties, supporting theory for solar system formation from supernova outbursts

09 p1593 A69-21581

Kodaikanal iron meteorite measurements for cosmogenic rare gases and K-Ar isotopes ages for glass inclusions

09 p1596 A69-22047

Thin sections of ringwoodite natural spinel in Tenham meteorite shower, observing various rounded purple isotropic grains

09 p1597 A69-22155

Tritium and argon 39 measurements of stone and iron meteorites, discussing decay and production rates and cosmic ray intensity

09 p1604 A69-22398

Cosmic ray induced radioactivity in lunar surface and meteorites calculated together with cosmic ray intensity variations

10 p1756 A69-22817

Water content of tektites, impactites and artificial glass of tektite composition using IR absorption measurements

10 p1778 A69-23413

Aluminum abundances in stony meteorites measured using nondestructive instrumental neutron activation analysis

11 p1952 A69-24334

Chemical and mineralogical study of Kodaikanal meteorite silicate and metal phases, using optical, X ray and electron microprobe techniques

11 p1953 A69-24335

Chemical composition analysis of one mesosiderite and seven chondrites, with notes on mineralogy and chemical procedures

11 p1953 A69-24336

Organic matter signals in carbonaceous meteorites, discussing possible relation to extraterrestrial life and origin

11 p1953 A69-24342

Chemical composition of stony meteorites by analytical methods, discussing sample preparation and X ray fluorescence

11 p1953 A69-24358

Quality assessment of quantitative data on chemical composition of stony meteorites, considering precision and accuracy

11 p1953 A69-24359

Lithophile elements relationship in chondrites and basaltic achondrites, tabulating Ca-Al ratios and Ca, Al, Ti, Zr, Sr, Ba and Sc percentages

11 p1954 A69-24360

Possible sources of meteoritic material from Hopewell Indian burial mounds

11 p1963 A69-25401

Freshly fallen meteorites from Portugal and Mexico, determining exposure age and classifying into iron meteorite and carbonaceous chondrite types

12 p2160 A69-26935

Organic analysis of Pueblito de Allende meteorite using thin layer chromatography or combined gas chromatography and mass spectrometry

13 p2337 A69-27520

Chondritic meteorites arsenic, tin and antimony content determined by anion-exchange chromatography and neutron activation analysis

13 p2344 A69-27630

Tishomingo iron meteorite metallography, noting nickel content and martensitic microstructure evolution

13 p2353 A69-28159

Oxide composition of silicate spherules from forest area devastated by Tunguka meteorite explosion using electron microprobe analysis

14 p2516 A69-28869

Rb 87-Sr 87 age of bronzite chondrites, analyzing olivine bronzite chondrite falls for K, Rb and Sr elemental concentrations

14 p2526 A69-29881

Geochemistry of fission Xe component in chondrites, suggesting Xe derivation from superheavy elements with Z 112 to 119

15 p2681 A69-30325

Chondritic Cr and Mn content studied by X ray fluorescence, noting positive correlation in H and L groups and negative correlation in carbonaceous chondrites

15 p2681 A69-30416

Chlorapatite and whitlockite compositions of phosphate minerals from chondrites determined by electron microprobe

15 p2690 A69-30706

Silicon in iron meteorites and earth core determined by activation analysis on octahedrites, hexahedrites and ataxites

16 p2865 A69-32807

Volatiles percentage at 1000 C in nitrogen atmosphere for chondrites, considering cosmo-petrological significance of microchondrule coalescence

17 p3030 A69-33067

Cosmogenic Al 26 in achondrites and chondrites measured by nondestructive gamma-gamma coincidence counting

17 p3034 A69-33584

Uranium abundances in several eucrites measured by fission track method, discussing Pu-Xe decay interval question

17 p3044 A69-34167

Heavy nuclei origin based on empirical abundance distribution, discussing stellar, galactic and cosmic events for nuclear genesis

17 p3009 A69-34190

Percorait phase in nickel analog of clinohyrosite formed under hydrothermal conditions in Wolf Creek meteorite cracks

18 p3199 A69-34824

Bovey Chondrite fall in Northern Ireland, describing fragments trajectory and metal, sulphide and silicate presence

18 p3200 A69-34993

Barringerite as Fe-Ni phosphide occurring in meteorite Ollague pallasite, indicating troilite and schreibersite crystallization at high temperatures

18 p3205 A69-35433

Meteorite and primordial matter composition related to possible fractionation processes influence, discussing nuclear species abundance

19 p3406 A69-36073

Pu/U ratio from fossil track studies bearing on extinct Pu 244 in Campo del Cielo and Kodaikanal meteorites

19 p3407 A69-36077

Iron distribution inconsistency indicated in Group H and L chondrites through Ni and Co analysis of fractionated samples, plotting atomic ratios on Prior diagram

19 p3407 A69-36078

Terrestrial planets high temperature evolution from solar system genesis theory, discussing meteorite chemical composition, petrography, mineralogy and age determination

19 p3407 A69-36079

Meteoritic trace elements with varying chemical and physical properties investigated for abundance by neutron activation technique

19 p3407 A69-36080

Carbon content and isotopic composition in light and dark portions of gas-rich chondrites Breitscheid and Pantar

19 p3408 A69-36081

Mossbauer spectra of Fe minerals in unequilibrated ordinary chondrites, noting ratios of olivine to pyroxene iron

19 p3408 A69-36082

Meteorite Li isotopic composition variations to determine neutron role in nucleosynthesis of solar system light elements

19 p3408 A69-36084

Boron, Li and Cl contents in iron and stone meteorites by fluorometric, thermal-neutron activation and pyrohydrolytic separation methods, tabulating results

19 p3408 A69-36085

Sharps chondrite chemical, petrographic and mineralogical studies suggesting formation from complex and repetitious high temperature events and agglomeration processes

19 p3408 A69-36086

Fractionation of abundant lithophile element ratios of Si, Mg, Ca, Al and Ti in carbonaceous, common and enstatite chondrites

19 p3409 A69-36087

Ramsdorf meteorite chondrules and metal particles formation attributed to shock-induced partial melting and rapid cooling

19 p3409 A69-36088

Tieschitz and Mezo-Madaras chondrites and chondrules formation from considerations of coexisting minerals and interstitial ground mass

19 p3409 A69-36089

Bjurböle chondrules composition and density, discussing formation of homogeneous olivines and pyroxenes

19 p3409 A69-36090

Ca-rich achondrites genesis implied from rare earth and Ba absolute and relative concentrations

19 p3409 A69-36091

Cosmic ray produced radionuclides and rare gas isotopes from Saint-Severin meteorite surface, showing relative Kr spallation mass yields dependence on cosmic ray energy spectra

19 p3410 A69-36093

Cosmic ray produced radionuclides P 32, Cl 36, Ar 37 and Ar 39 determined in separate mineral phases of meteorites, emphasizing ratios in metals

19 p3410 A69-36094

Energy spectrum of Fe group heavy nuclei from fossil track densities depth variation in hypersthene and oligoclase crystals from meteorite Saint-Severin, noting ablation

19 p3410 A69-36095

Heat generation in meteorites by radioactive isotopes generated by early solar proton irradiation prior to solar system solidification

19 p3411 A69-36098

Cosmic-ray-produced stable and long-lived nuclides in iron meteorites, considering shielding effect on spallation production

19 p3411 A69-36099

Ar 39 and Cl 36 production rates and ratios in stone and stony-iron meteorites metal phases, discussing terrestrial age calculation

19 p3411 A69-36100

Ar 39 content in chondrites interpreted for meteorite size, exposure age and orbital elements

19 p3411 A69-36101

Meteoritic trace elements and radionuclides measured by gamma coincidence techniques, emphasizing Mn 53 and Al 26

19 p3412 A69-36103

K and Ar 40 determination in iron meteorites by neutron activation for K/Ar dating

19 p3412 A69-36106

Lance chondrite C III, studying mineral composition of chondrules and heterogeneous crystalline fragments

19 p3413 A69-36110

Carbonaceous meteorites mineralogically identified by selected-area electron diffraction, suggesting formation from minerals mixtures

19 p3311 A69-36111

Carbonaceous meteorites specimen petrographic observations, noting genetic interrelations with ureilites regarding S-C and reduced Fe oxidized Fe ratios

19 p3413 A69-36112

Isoprenoids and isomeric alkanes identification in carbonaceous chondrites by gas-chromatographic mass-spectrometric analyses, including results from troilite nodules

19 p3414 A69-36113

Proton and deuteron energy used to study solid state chemical reactions effects on meteorites composition and properties, obtaining hydroxyl ions and hydrocarbons

19 p3414 A69-36114

Cr-S and Cr-Fe-S systems phase relations, using silica tube and collapsible tube experiments, correlating formation conditions of meteoritic sulfide assemblages

19 p3359 A69-36123

Reflectivity and chemical composition of metallic phase minerals in stone meteorites, showing optical characteristics sensitivity to composition

19 p3415 A69-36124

Phosphate mineralogy of meteorites using X ray, electron-microprobe and chemical analyses, noting predominance of whitlockite

19 p3416 A69-36126

Black chondrite inclusions in Cumberland Falls meteorite, discussing inclusion chemical, mineralogical and electron probe data

19 p3416 A69-36127

Iron meteorites genetic classification based on parent body cooling rate and Ga-Ge trace element content

19 p3416 A69-36129

Iron meteorites analysis for Ni, Co, P, C, S and Cu elements by milling technique, noting superiority degree based on Co-Ni correlation

19 p3417 A69-36130

Kamacite analysis for P and Ni in chondrites, palasite and iron meteorites, considering cooling rate and rhadbite

19 p3417 A69-36131

Morphologies and mechanical properties for identification of phosphides /schreibersite/ and carbides /cohenite/ in iron meteorites, noting nucleation and growth

19 p3417 A69-36133

Dynamically deformed structures in chondrites and hexahedrites observed to discriminate among theories about origin of chondrules and meteorites

19 p3418 A69-36135

K 40-Ar 40 age measurements in separated mineral phases of chondrites, including production rates of spallation isotopes

19 p3418 A69-36137

Spallogenic rare gas concentrations and isotopic ratios in taenite of iron meteorites measured mass spectrometrically and compared with kamacite values

19 p3419 A69-36139

Trapped rare gases in Fe phase and silicate inclusions of Campo del Cielo Meteorite, El Taco

19 p3419 A69-36140

Thermal rare gas release from mineral separates of Mocs meteorite, using method giving activation energies as function of temperature

19 p3419 A69-36141

Distribution and origin of primordial He, Ne and Ar in Fayetteville and Kapoeta meteorites extracted and analyzed by laser-microprobe mass spectrometer

19 p3419 A69-36142

Stony meteorite barium isotopes and iron meteorite and terrestrial silicate inclusions analyzed using double spike method for laboratory fractionation correction

19 p3425 A69-36422

Alpha-scattering experiments by Surveyor missions, studying hypothesis regarding lunar origin of eucrites and howardites

20 p3597 A69-37341

V 50/V 51 abundance ratios in chondrite, terrestrial diabase standard W-1 and reagent V

20 p3601 A69-37501

Spontaneous symmetric fission of superheavy elements near doubly magic nucleus as explanation for Xe and Kr isotopic composition anomalies in meteorites

20 p3601 A69-37503

Petrology, mineralogy and phase composition of Siena chondrite, interpreting meteorite as ignimbritic rock or welded tuff

20 p3602 A69-37534

Calcium rich achondrites radiation ages determined from measuring He, Ne and Ar in howardites, nakhlites and angrite

20 p3602 A69-37535

Meteorites Ni-Fe metal structures analysis as part of petrology study of mesosiderites

20 p3602 A69-37536

Chemical classification of iron meteorites with Ge concentrations between 80 and 200 ppm, reporting concentrations of Ge, Ni, Ga and Ir

20 p3602 A69-37537

Meteorite minerals as detectors for studying fossil record of cosmic ray nuclei, emphasizing feldspars and pyroxenes

20 p3590 A69-37568

Gamma ray emission of meteorite of 25 April 1969 measured by scintillation spectrometry, attributing peaks to annihilation radiation, Cs 137, Mn 54, etc

20 p3590 A69-37571

Fe-Ni unmelted and unablated micrometeorites number at earth surface calculated, using space density of interplanetary particles and micrometeoritic theory

20 p3614 A69-38251

Abundance compilations of elements due to nuclear processes, discussing carbonaceous chondrites character

21 p3789 A69-38812

Meteoritic compositions used to determine prehistoric cosmic rays composition and energy spectrum

21 p3789 A69-38815

Amphoterite /LL/ chondrites Rb-Sr age determination, noting high brecciation

21 p3814 A69-39583

Sporopollenin content of Orgueil and Murray meteorites as evidence for extraterrestrial life

21 p3662 A69-39617

Morphological, chemical and X ray analysis of urelite meteorite, identifying diamonds with kamacite and troilite admixtures from carbonaceous material

21 p3816 A69-39626

Stony meteorite composition and structure studied for conditions of preplanetary stage of solar system

22 p4012 A69-40084

Meteoritic organic matter origin, discussing time-of-flight mass spectrometer combined with gas chromatographic capillary column

22 p4012 A69-40085

Tektite origin theories, discussing Surveyor experiments effects on lunar geology and Tektite origin

22 p4012 A69-40086

Hoba meteorite surface radioactive isotope composition measured, finding terrestrial age from Ni-59 activity

22 p4021 A69-40411

Meteorite chemical and mineralogical composition and classification

22 p4032 A69-40981

Extraterrestrial objects composition in defining cosmic abundance curve, including solar and meteoritic data

22 p4032 A69-40982

Bogou iron meteorite Ni-Cu-Zn contents determined by radiochemical methods

23 p4209 A69-41321

Moldavites and Ries crater material, studying Rb-Sr isochronal relationship

23 p4154 A69-41341

Rb-Sr isotope patterns in tektites from Southeast Australian strewn field, studying Rb volatilization role in Rb-Sr isochron production

23 p4154 A69-41342

Tektites chemical composition showing minor concentration changes during melting used for parent material identification

23 p4210 A69-41346

Impact origin of Ivory Coast tektites and Bosumtwi Crater indicated by gamma ray spectrometric study of U, Th and K abundance patterns

23 p4210 A69-41347

Chemical composition and lechatelierite size frequency influence on moldavites bulk density, using data to elucidate origin

23 p4210 A69-41348

Ivory Coast microtektites chemical composition from electron microprobe analysis

23 p4211 A69-41351

Ilmenite composition in equilibrated ordinary chondrites, analyzing Fe, Mg, Ti and Cr content

24 p4382 A69-42890

Chemical composition of carbonaceous chondrites /Orgueil, Nogoya and Ormans/ and LL group chondrite /Ngawi/, confirming Ca/Al ratio

24 p4382 A69-42927

Chemical composition of basaltic achondrites /eucrites and howardites/, indicating dominant role of physical process over magmatic differentiation

24 p4382 A69-42928

Halogen concentrations in basaltic achondritic meteorites, discussing applications to rare gas and lunar surface studies

24 p4382 A69-42929

Metallographic techniques for meteorite studies, determining etching topography and orientational difference within each phase

24 p4382 A69-42934

Primordial hydrogen and helium concentration in Pesyanoe meteorite measured by gas chromatography, indicating solar wind injection source

24 p4384 A69-43213

Rb-Sr isotopic determinations for Olivenza olivine-hypersthene chondrite, noting isotopic ratio vs age

24 p4385 A69-43214

Trapped Ne in carbonaceous chondrites and gas-rich meteorites, observing Ne 20/Ne 22 ratio variance

24 p4385 A69-43217

Fe abundance in sun and carbonaceous chondrites, noting agreement between solar and meteorite abundances of Ni, Mg, Si and Li

24 p4385 A69-43223

METEORITIC DAMAGE

Meteoroid flux measured by Explorer 16 and Lunar Orbiter, analyzing penetration rate, average velocity and consistency with photographic meteors

13 p2349 A69-27820

Lunar surface environmental factors including molecular gas behavior under weak gravity and low atmospheric density, radiation and temperature effects, meteorite bombardment, etc

13 p2352 A69-27904

Lunar surface characteristics, discussing light polarization, lunar radiation, solar radiation and meteorite impact effects, etc

16 p2856 A69-32069

Hypervelocity micrometeor impact sites identification on aluminized glass, using conchoidal pattern as criterion in analysis

18 p3199 A69-34952

Pressure and temperature effects on reversal transitions of stishovite, noting meteoritic impact formation at Meteor Crater, Arizona

22 p4021 A69-40412

METEORITIC DIAMONDS

Morphological, chemical and X ray analysis of urelite meteorite, identifying diamonds with kamacite and troilite admixtures from carbonaceous material

21 p3816 A69-39626

METEORITIC DUST

U MICROMETEORITIDS

METEORITIC IONIZATION

U ATMOSPHERIC IONIZATION

U METEOR TRAILS

METEORITIC MICROSTRUCTURES

Mineralogy of iron fragments from impact craters near Lake Kaali, Estonia, discussing structure and type of meteorite

01 p0159 A69-11370

Enstatite chondrites structure and mineral content and composition using microscopic and X ray analysis, grouping parameters in distinguishing types

02 p0317 A69-12016

Meteorite fragments fall and distribution at Bur-Gheluai, Somalia, discussing crust morphology, mineralogical composition and structure

03 p0507 A69-13095

Disordered chondritic pyroxenes, analyzing X ray patterns of meteoritic and synthetic crystals

03 p0516 A69-14083

Deformation microstructures in shock loaded olivine, discussing planar features

05 p0818 A69-15607

Specific gravity data for olivine-pyroxene and enstatite chondrites, aerolites, siderites, amphoterites, pallasites and Butler meteorites

08 p1389 A69-20262

Chondrite meteorite fall /1969/ in Mexico, noting opaque and microcrystalline matrices and gamma rays from short lived isotopes

08 p1396 A69-20686

Magnetite morphological variations of type 1 carbonaceous meteorites, discussing isometric crystals, spheres, spherulites, platelets and filaments

08 p1406 A69-20932

Meteoritic materials structure, composition and magnetic properties, supporting theory for solar system formation from supernova outbursts

09 p1593 A69-21581

Structure transitions in iron meteorites from Widmanstatten to granular pattern to study Barringer crater and Canon diablo meteorites formation

09 p1597 A69-22154

Meteorite fragment from Arizona Meteor Crater, establishing probable history from shock loading experiments on iron alloys

12 p2158 A69-26344

Structure of meteorite Gibeon section containing taenite grains and annealing twins indicating plastic deformation of taenite followed by recrystallization and grain growth

17 p3034 A69-33586

Ar 39-Ar 40 method using neutron activation and inert gas mass spectrometry to investigate meteoritic thermal histories

19 p3412 A69-36105

Isotopic age determinations on iron and stone meteorites, discussing Rb-Sr and K-Ar results, internal isochrones, Kodaikanal data and planetary formation

19 p3413 A69-36108

Lance chondrite C III, studying mineral composition of chondrules and heterogeneous crystalline fragments

19 p3413 A69-36110

Fe-Ni-P phase diagram studies applied to schreibersite and rhodite formation in iron meteorites

19 p3417 A69-36132

Iron meteorites microscopic and macroscopic features due to preterrestrial mechanical deformation, stressing local displacements encountered in normal or acicular kamacites

19 p3418 A69-36134

Dynamically deformed structures in chondrites and hexahedrites observed to discriminate among theories about origin of chondrules and meteorites

19 p3418 A69-36135

Meteoritic cosmic ray exposure time from method based on spallogenic Ar 36/Ar 38 ratio, noting impracticality for exposures longer than 5 million years

19 p3418 A69-36138

Primitive low energy Fe-group nuclei irradiation of meteoritic crystals from studies of pyroxene and feldspar from meteorites, discussing astrophysical implications

20 p3590 A69-37569

Stony meteorite composition and structure studied for conditions of preplanetary stage of solar system

22 p4012 A69-40084

Black magnetite bearing spherules extracted from tektites, and magnetic fractions of impact glasses, determined by reflecting microscope and electron microprobe

23 p4210 A69-41349

Metallographic techniques for meteorite studies, determining etching topography and orientational difference within each phase

24 p4382 A69-42934

METEOROID CONCENTRATION

Meteorite scattering in geogravitational field and influence on lunar meteorite precipitation distribution

01 p0153 A69-10756

Mass distributions of meteoroids obtained from underdense radio meteor echoes

03 p0518 A69-14254

Lunar influences on meteoroid influx to earth, tabulating binomial distributions and probabilities of meteorite falls according to different lunar angles

04 p0655 A69-14663

- Mass influx and penetration rate of meteor streams
06 p1000 A69-17007
- Meteoroid mass distribution determined by radar observations of underside meteor trails at Springhill Meteor Observatory
06 p1003 A69-17493
- Region of transition from laminar to turbulent flow in meteor trains, suggesting electron attachment processes to molecular oxygen in presence of third body
08 p1393 A69-20608
- 11 Canis Minor meteor stream orbit computed, noting retrograde orbit and 4.2 million km perihelion
08 p1394 A69-20621
- Meteoric matter distribution by calculating orbital elements of 12,500 meteors from radar data, using diversity reception for radio waves scattered at meteor trails
17 p3041 A69-33894

METEOROID CRATERS

U METEORITE CRATERS

METEOROID DUST CLOUDS

U ZODIACAL DUST

METEOROID HAZARDS

- Meteoroid hazard, discussing possible future collisional dangers for space traffic
01 p0160 A69-11412
- Meteoroid perforation effects on space cabin design, discussing simulated destructive environmental tests [AIAA PAPER 69-365]
13 p2357 A69-28297
- Meteoroid penetration damage to spacecraft system, showing particle mass density distribution as protection criterion
21 p3805 A69-39229
- Spacecraft probes design for mapping meteoroid environment and penetration hazard through asteroid belt [AAS PAPER 69-321]
24 p4392 A69-42867
- Meteoroid shower model for interplanetary flight hazard evaluation, suggesting shower zone defining on ecliptic plane
24 p4385 A69-43258

METEOROID PROTECTION

- Barrier penetration depth by meteorite particles at prethreshold impact velocities, taking into account energy dissipation on shock wave front
01 p0152 A69-10579
- Meteoroid penetration detector development program for spacecraft construction, discussing design, materials and environmental tests
02 p0338 A69-11749
- Super insulation blankets comprised of dacron sailcloth, silk net or aluminized mylar, describing crinkling, cutting, sewing and hole drilling techniques
09 p1507 A69-22330
- Space suit meteoroid protection for extravehicular activity, discussing Gemini and lunar surface EVA suits and bumper concept [AIAA-PAPER-69-366]
13 p2213 A69-28298
- Fracture of bumper protected fuel tanks subjected to hypervelocity meteoroid impact, applying method of characteristics to stress wave propagation in tank walls [AIAA PAPER 69-369]
13 p2367 A69-28301
- Mathematical models for ballistic limit of single and double wall structures, yielding equations for relation to projectile and target characteristics [AIAA PAPER 69-370]
13 p2367 A69-28302
- Penetration mechanics of multisheet structures based on discrete particle modeling of impact debris [AIAA PAPER 69-371]
13 p2367 A69-28303
- Multisheet meteoroid protection design in Apollo program, discussing bumper, backup sheet and honeycomb cells insulation [AIAA PAPER 69-372]
13 p2367 A69-28304
- Hypervelocity projectile size and density effect on ballistic limit of dual sheet spacecraft meteoroid protection structures, considering penetration of low and high density particles [AIAA PAPER 69-376]
13 p2367 A69-28306
- Lightweight double walled meteoroid shield for Mariner Mars 1971, considering Teflon impregnated glass fabric outer sheet and multilayer thermal insulation [AIAA PAPER 69-377]
13 p2357 A69-28307
- Two plate meteoroid shields effectiveness determined by analyzing debris cloud ejected behind front plate after hypervelocity impact [AIAA PAPER 69-380]
13 p2368 A69-28310
- Barrier penetration depth by meteorite particles at prethreshold impact velocities, taking into account energy dissipation on shock wave front
15 p2709 A69-30749

- Meteoroid penetration damage to spacecraft system, showing particle mass density distribution as protection criterion
21 p3805 A69-39229
- Meteoroid shower model for interplanetary flight hazard evaluation, suggesting shower zone defining on ecliptic plane
24 p4385 A69-43258

METEOROID SHOWERS

- NT LEONID METEORIODS
NT ORIONID METEORIODS
NT PERSEID METEORIODS
- Frequency occurrence of small particles in meteor showers, discussing fragmentation and cosmic erosion as primary effects in small particle development
01 p0154 A69-10872
- Meteor grouping in meteor streams analyzed using radar records of meteor showers
01 p0154 A69-10873
- Origin and mineralogical composition of stones associated with 1824 stone hail near Sterlitamak
01 p0160 A69-11387
- Cosmic rays intensity increase due to meteor showers noting maximum solar activity effects
03 p0500 A69-13509
- Diurnal variations of visual meteoric activity mean hourly rates compared with earlier observations
04 p0658 A69-14879
- Diffuse meteor stream separation from sporadic background, using orbital elements of individual meteors
04 p0659 A69-15034
- Sporadic background separation from radar observations of meteor showers, using echo range distribution, head echoes and antenna direction change
04 p0659 A69-15035
- Radar determination of exponent s for describing mass distribution of Geminid and Quadrantid meteoric bodies
05 p0823 A69-16033
- Mass influx and penetration rate of meteor streams
06 p1000 A69-17007
- Meteor angular velocities distribution over sky in showers, considering effect of altitude, night hour, season and azimuth
08 p1393 A69-20607
- Thin sections of ringwoodite natural spinel in Tenham meteorite shower, observing various rounded purple isotropic grains
09 p1597 A69-22155
- Statistical analysis of photometric curves for meteors undergoing fragmentation at onset of vaporization
12 p2154 A69-25819
- Efficiency parameter beta for ion and electron production by meteoritic processes, noting importance to nighttime sporadic E ionization
14 p2520 A69-29372
- Micrometeoroid showers proximity to epsilon Leonid showers in earth orbit, analyzing Helfenzreider comet role from satellite data
14 p2522 A69-29588
- Meteor showers contribution to interplanetary dust flux based on relative number of particles of various size
15 p2697 A69-31308

- Picogram dust particle flux in selenocentric space measurement by Lunar Explorer 35, showing enhancement during meteor showers
15 p2699 A69-31396
- Noctilucent clouds seasonal frequency, considering meteor shower effects and temperature dependence role
16 p2781 A69-32453
- Meteor station photorecorder of reflected radio signals, discussing design and performance during meteor shower
17 p2976 A69-33898
- Meteor burst communication channel parameters for low data rate telemetry, considering signal amplitudes, decay, duty cycle, multipath, phase stability, trail location and variations
19 p3271 A69-36250
- Meteor shower effects on rainfall, noting anomalous radar meteor influx increase and subsequent subnormal precipitation
20 p3609 A69-38062
- Meteoroid shower model for interplanetary flight hazard evaluation, suggesting shower zone defining on ecliptic plane
24 p4385 A69-43258

METEORIODS

- NT BOLIDES
NT LEONID METEORIODS
NT MICROMETEORIODS
NT ORIONID METEORIODS

- NT PERSEID METEORIODS
NT RADIO METEORS
NT SPORADIC METEORIODS
NT ZODIACAL DUST

- Meteor photographic observation noting initial mass, motion, position and duration, disintegration in process of flaring, spectra and meteor flare classification scheme
01 p0159 A69-11372
- Monograph on orbit computation of doubly photographed meteors employing method of least squares, giving computer programs and tables of data printout
02 p0324 A69-12495
- Cometary origin of meteorites, discussing and rejecting origin from recent asteroidal collisions
05 p0818 A69-15588
- Simultaneous photographic and radar observations of meteors, determining absolute stellar magnitude of meteor as function of parameters
08 p1390 A69-20337
- Cometary origin of meteors and element abundance in primitive solar nebula, discussing neutron capture products in chondrites
08 p1406 A69-20930
- Ablation rate of Saint-Severin amphoterite based on heavy primary cosmic ray track densities in surface samples
08 p1406 A69-20933
- Atmospheric density analyzed on basis of photographic observations of meteors, comparing vertical profile with CIRA profile
10 p1688 A69-23936
- Cometary, lunar and solar effects on precipitation, considering joint influence of meteoric streams and moon
11 p1965 A69-25420
- Photometric standardization and calibration of meteor spectrograms for real meteor masses determination using spectrosensitometer
12 p2154 A69-25820
- Meteoroid flux measured by Explorer 16 and Lunar Orbiter, analyzing penetration rate, average velocity and consistency with photographic meteors
13 p2349 A69-27820
- CENFAM radar receiving system for meteoric and upper atmospheric data on amplitude, range and direction of meteor echoes through interferometer pairs
13 p2354 A69-28649
- Photographically observed meteor orbits 1937-1963, noting overestimation of hyperbolic orbits due to observation errors
15 p2697 A69-31253
- Antimatter meteors detectability, considering annihilation and vaporization in earth atmosphere
17 p3034 A69-33579
- Directional transmitting and receiving antenna arrays for short wave meteor studies in Kharkov
17 p2939 A69-33903
- Angular velocity effects on meteors apparent brightness
17 p3045 A69-34222
- Meteor dynamical and photometrical analyses compared quantitatively, determining mass loss value from fragmentation model
17 p3045 A69-34223
- Meteor flakes nature and statistics from studying 318 meteors characterized by irregular brightness curve
18 p3203 A69-35333
- Meteorite orbits and radiant calculated, noting asteroidal belt origin
19 p3414 A69-36116
- Transmitting antenna design of multistation radar system for meteors and upper atmosphere investigation, discussing amplitude and phase of electromagnetic field
19 p3278 A69-36661
- Visual observation of meteor and train microstructure obtained by refractor
22 p4033 A69-41058
- Cometary and asteroidal orbital differences and similarities, emphasizing limiting cases to study orbital evolution of meteors
23 p4208 A69-41284
- Spacecraft probes design for mapping meteoroid environment and penetration hazard through asteroid belt [AAS PAPER 69-321]
24 p4392 A69-42867

METEOROLOGICAL BALLOONS

- Inner and outer meteorological balloon assembly for fast rising and high altitude sounding
01 p0010 A69-10541

Ghost project for gathering weather data by balloons and transmission of data to central data processing stations by satellite
03 p0520 A69-13621

All weather wind profile monitoring system using FPS-16 radar/Jimsphere system and flight simulation for protection of space vehicle and missile launches
03 p0462 A69-13852

Tetroon flight observations of eddy velocities in planetary boundary layer, noting effects of height and seasonal variations
04 p0626 A69-14912

Eole satellite and meteorological balloons telecommunications used to study wind distribution in Southern Hemisphere and other atmospheric parameters
07 p1084 A69-19134

Error analysis of high resolution balloon-borne temperature sensor and comparison of temperature data with simultaneous rawinsonde measurements
09 p1494 A69-21642

Power supplies for balloon-borne instruments, describing light flexible NiCd batteries and solar cells used in EOLE project
16 p2736 A69-31745

Wind profile data measured by AN/FPS-16 radar/superpressure balloon system, noting error sources
18 p3139 A69-35428

METEOROLOGICAL CHARTS

Numerical maps of sporadic E critical frequency for solar cycle maximum and minimum to estimate propagation
01 p0070 A69-11160

Numerical radar information charts, plotting radio echo reflection boundaries from cloud and precipitation observations by weather radars
03 p0459 A69-13287

Temperature change and fog forecasting diagram modified by Swinbank relation in place of Brunt formula
03 p0462 A69-13965

Tiros and ESSA weather satellites meteorological contributions, discussing photographic interpretation for weather predictions
04 p0626 A69-14690

Synoptic density maps for postreentry altitudes derived from constant pressure charts and horizontal gradients
04 p0626 A69-14909

Meteorological satellites in weather forecasting, contrasting satellite data continuity to discreteness of synoptic charts
[UN PAPER 68-95760] 06 p0949 A69-17037

Computerized objective analysis of meteorological variables based on weight determination involving autocovariances
08 p1345 A69-20309

Zonal and meridional wind components monthly global cross sections for stratosphere and mesosphere from sounding and radar data
12 p2070 A69-26577

Complex climatological cloud profiles structural characteristics along given air traffic routes prepared for practical aviation problems
12 p2127 A69-26899

Height and temperature vertical variability in mid and upper stratosphere determined from constant pressure charts /1964-1966/
13 p2290 A69-27637

Radiation fields and large scale atmospheric disturbances analyzed, using radiation maps from Cosmos satellites
13 p2291 A69-27727

Satellite radiation maps for synoptic analysis regarding world weather maps, discussing front, intertropical convergence zones and typhoon location
14 p2473 A69-29729

Jet stream vertical wind shear chart construction for aircraft with gas turbine propulsion
14 p2473 A69-29730

Irregular data obtained by radiosondes in winter for charts of high isobaric levels, noting stratospheric temperature effects on radiosonde ascent height
14 p2473 A69-29731

Secular fluctuations of atmospheric circulation over Northern Hemisphere analyzed using isobaric and composite-kinematic surface maps, discussing analogies with Southern Hemisphere
14 p2478 A69-29836

Global mean monthly charts for IR radiation temperature, based on Cosmos 144 satellite data
15 p2596 A69-30643

Meteorological satellite data application to weather analyses and forecasts, discussing sea-ice boundaries and snow fields location
15 p2650 A69-31364

Daily European weather surveys based on meteorological satellite pictures transmitted during third quarter 1967
17 p3000 A69-33769

Climatological patterns of atmospheric kinetic energy dissipation in free atmosphere derived from upper wind statistics of Northern Hemisphere, using Kolmogoroff functions
18 p3166 A69-34825

Diurnal wind variations below 30 km plotted on constant pressure charts, showing topographical influence on tidal fluctuations
18 p3166 A69-34828

Precipitation zone-cloud mass correlation based on Tiros cloud photographs, synoptic charts and weather maps for European U.S.S.R.
19 p3366 A69-36671

Meteorological data real time processing for automatic weather analysis and prognosis, program used and computer output charts
22 p3977 A69-40732

Amplitude and phase maps for annual global variations in atmospheric pressure based on harmonic data analysis, suggesting standing wave type distributions
23 p4185 A69-42493

Multiple exposure averaging technique summarizing satellite cloud photographs for various periods, presenting entire earth cloud cover atlas
24 p4343 A69-42897

METEOROLOGICAL FLIGHT

Meteorological rocket soundings and global synoptic observations, noting influence of atmospheric middle region
[UN PAPER 68-95405] 01 p0109 A69-10484

Destructible low cost meteorological sounding rocket Dart for global observation of upper atmosphere
[UN PAPER 68-95467] 01 p0161 A69-10510

Meteorological and sounding British rockets Skylark, Petrel and Skua, showing capabilities, payloads and experiments
[UN PAPER 68-95785] 01 p0161 A69-10530

Selective chopper radiometer for remote atmospheric temperature sounding, discussing satellite versions for Nimbus D and Nimbus E
[UN PAPER 68-95797] 01 p0080 A69-10531

Aircraft instrumentation system for cloud nucleation studies measures and records ice nucleus and aerosol concentration/distribution, temperature, etc
01 p0080 A69-10542

Meteorological rockets for space meteorology, aeronomy and weather forecasting, noting international programs involving U.S.S.R.
06 p1043 A69-17056

Interamerican Experimental Network of Meteorological Investigation with Rockets /EXAMETNET/, discussing atmospheric parameters measurement at high altitude
[UN PAPER 68-95903] 06 p0950 A69-17062

Rocket transportation for upper atmospheric measurements, discussing sensors and cost effectiveness
[AIAA PAPER 69-159] 06 p1018 A69-18066

Remote sensing platform requirements for oceanographic and meteorologic observations, discussing orbital and aircraft platforms
[AIAA PAPER 69-154] 06 p1044 A69-18122

Aerial chronophotography of Southern Hemisphere conducted on around world polar flight analyzed for meteorological and geographical aspects and compared with satellite data
09 p1534 A69-21405

Meteorological rocket probes in Spain for wind and temperature measurements, including stratospheric circulation data
11 p1877 A69-24519

Nimbus D meteorological satellite construction, control system, orbit, etc
13 p2356 A69-27832

Meteorological analysis of stratospheric clear air turbulence flights, discussing vertical temperature structure in terms of wave motion and turbulence intensity
17 p2999 A69-33736

METEOROLOGICAL INSTRUMENTS

NT CLOUD HEIGHT INDICATORS

NT DROPSONDES

NT IONOSONDES

NT RADIOMETEOROGRAPHS

NT RADIOSONDES

NT RAWINSONDES

NT SONDERS

NT WEATHER DATA RECORDERS

NT WIND VANES

Satellite meteorological research in U.S.S.R., discussing Cosmos satellites instrumentation, earth thermal radiation distribution, IR and UV spectra and cloud photography
01 p0111 A69-10950

Cloud instrumentation for measurement of icing conditions of airplane flight tests
01 p0055 A69-11044

Meteorological instrumentation in India for surface and upper air observation
02 p0248 A69-11817

Atmospheric measurements and experiments using aircraft as platforms, noting aircraft operation in severe weather, electrical supply problem and aircraft wake problem
[AIAA PAPER 69-157] 06 p0869 A69-18153

Dew /or frost/ point determination method for low temperature humidity measurement
09 p1502 A69-22691

Anemometer based on neon helium ring laser with four mirror resonator
13 p2260 A69-27857

Cloud distribution effect on global coverage of remote radiometric sounding of atmosphere, considering Nimbus 1 and 2 data
15 p2650 A69-31335

Amplitude and intensity distributions of plane periodic Fresnel diffraction grating calculated by Fraunhofer theory, noting applicability to spectrometric and meteorological instruments
19 p3372 A69-35906

A scope laser radar to measure atmospheric particles spatial distribution through echo pattern and beam attenuation
20 p3487 A69-37284

METEOROLOGICAL PARAMETERS

Soviet book on methods of calculating characteristics of solar radiation covering short wave radiation, relationship to meteorological factors, applications, etc
20 p3570 A69-37233

Electronic data collection for climatological stations, describing acquisition and processing of various identification signals and meteorological parameters
20 p3538 A69-37428

Cumulus and cumulonimbus clouds electrical and microphysical properties measured by instrumented aircraft
20 p3572 A69-37907

Meteorological parameters-radio propagation characteristics correlation, studying feasibility of data acquisition by occultation satellite system
21 p3705 A69-38374

Daily simultaneous solar measurements of microwave atmospheric absorption and emission to determine frequency correlation between meteorological phenomena and atmospheric parameters
21 p3718 A69-39747

Uniform random field model development by taking moments in linear transformation form of certain initial field
23 p4183 A69-41523

Mars atmospheric features from measurements during entry and after landing, discussing atmospheric state properties, diurnal variability, clouds and winds
23 p4212 A69-41617

Nighttime F region time-altitude variations in aeronomic parameters calculated under conditions close to solar activity maximum
23 p4156 A69-41844

METEOROLOGICAL PROBES

U SONDERS

METEOROLOGICAL RADAR

Fluctuating radar echoes from cloud targets with vibrating drops, noting amplitude modulation effect of changing cross section on backscattered signals
02 p0208 A69-12021

Numerical radar information charts, plotting radio echo reflection boundaries from cloud and precipitation observations by weather radars
03 p0459 A69-13287

All weather wind profile monitoring system using FPS-16 radar/Jimsphere system and flight simulation for protection of space vehicle and missile launches
03 p0462 A69-13852

Quantitative estimations of cloud and precipitation by radar meteorology, assuming homogeneous reflectivity distribution of clouds
04 p0626 A69-14507

Level crossing rate meter correction for boxcar width and receiver noise readings in incoherent weather radars
04 p0557 A69-14915

- Upper wind observation and computation accuracy, comparing radar and slide rule instrument errors
06 p0950 A69-17788
- Power relations to fit radar meteorology parameters including rainfall, reflectivity function and attenuation rate
09 p1536 A69-21643
- CENFAM radar receiving system for meteoric and upper atmospheric data on amplitude, range and direction of meteor echoes through interferometer pairs
13 p2354 A69-28649
- Radar backscatter analysis for Arctic ice identification, deriving ice surface roughness factors from Kirchhoff-Huygens principle
14 p2416 A69-29530
- Radar meteorology - Conference, Dolgo-Prudnaya, U.S.S.R., April 1966
16 p2805 A69-32263
- Precipitation intensity measurements, obtaining distribution parameters from radar reflectivity at two wavelengths and microwave attenuation factor at third wavelength
16 p2806 A69-32265
- Turbulence dissipation rate in clouds and precipitations determined from rms width of vertical sounding radar signal fluctuation spectra, distinguishing gravity and turbulence effects
16 p2807 A69-32273
- Meteorological effects on anomalous radio echo determined from simultaneous aerological and radar observations, noting maximum signal amplitude during high humidity and low wind speeds
16 p2808 A69-32277
- MRL-1 meteorological radar station detection of cloud types under steady rain, showers and storm conditions, describing radar data analysis procedure
16 p2808 A69-32278
- Automatic meteorological radar data processing system incorporating MRL-1 radar and low speed digital computer
16 p2791 A69-32279
- Automatic conversion receiver of meteorological radar data, examining reception amplitude sensitivity and frequency characteristics
16 p2791 A69-32280
- Meteorological radar dead zone diminished by using hybrid electronic waveguide suppression system to eliminate antenna sidelobe reflections
16 p2791 A69-32281
- Airborne radar navigation with emphasis on semiautomatic fixing, describing beacon mode, map matching and airborne weather radar
18 p3169 A69-34851
- Meteorological Doppler radar information display for real time identification of hazardous winds and turbulence in storms
18 p3139 A69-35427
- Wind profile data measured by AN/FPS-16 radar/superpressure balloon system, noting error sources
18 p3139 A69-35428
- Microwave application in determining atmosphere meteorological characteristics compared with visual and IR wavelength measurements
20 p3569 A69-36984
- Millimeter wave pseudorandom coded CW meteorological radar for precipitation drop size spectrum analysis and cloud studies, discussing overall system design
23 p4115 A69-41531
- Radar signal reflectivity and precipitation relationship revised on basis of radio signal damping for improved measurement accuracy
23 p4185 A69-42494
- Simultaneous lower atmosphere clear air turbulence analysis by multiwavelength radar, jet aircraft and special rawinsondes
24 p4342 A69-42894
- Thunderstorm turbulence relationship to weather radar echoes from storm penetrations in Oklahoma by instrumented aircraft
24 p4347 A69-43720
- Satellite automatic picture transmission application to meteorological and hydrological problems including wind estimates, atmospheric stability and cloud distributions
[UN PAPER 68-95300] 01 p0108 A69-10462
- Atmospheric model development relating temperature, density, moisture and energy measurements from satellite observations for long term weather forecasting
[UN PAPER 68-95397] 01 p0108 A69-10463
- Space applications program including communications and navigation meteorology, earth resources survey and geodesy
[UN PAPER 68-95437] 01 p0178 A69-10472
- World Weather Watch /WWW/ system and meteorological satellites, discussing observational networks, data centers, telecommunication facilities, research, education and training program
[UN PAPER 68-95209] 01 p0178 A69-10478
- Utility of satellite cloud pictures to meteorological work, discussing weather observation in Israel
[UN PAPER 68-95571] 01 p0109 A69-10482
- Meteorological satellite research program, including unmanned satellite observations and possibilities with meteorologist on board manned spacecraft
[UN PAPER 68-95350] 01 p0109 A69-10483
- Passive and active transmitters and receivers of electromagnetic radiation in earth orbital satellites to collect pictorial or numerical data to study hydrology
[UN PAPER 68-95333] 01 p0064 A69-10487
- Satellites use in meteorology, noting monsoon rain forecasting through mesoscale sea surface temperatures of Indian Ocean
[UN PAPER 68-95555] 01 p0109 A69-10502
- Meteorological satellite observations value to Southern Hemisphere
[UN PAPER 68-95213] 01 p0109 A69-10513
- Automated layered-nephelanalysis and numerical total cloud cover prediction program using moisture data from Tiros 7 photographs
01 p0110 A69-10691
- Satellite meteorological research in U.S.S.R., discussing Cosmos satellites instrumentation, earth thermal radiation distribution, IR and UV spectra and cloud photography
01 p0111 A69-10950
- Satellites use in French space meteorology, discussing evolution, achievements, Eole project, etc
02 p0275 A69-11911
- Meteorological satellites for atmospheric data collection applicable to weather forecasting and synoptic analysis
02 p0277 A69-12778
- Application satellites for air traffic control, meteorology and earth resources, considering European participation
03 p0520 A69-13587
- Tiros and ESSA weather satellites meteorological contributions, discussing photographic interpretation for weather predictions
04 p0626 A69-14690
- Soviet book on attitude control of meteorological satellites noting reference systems, sensing units and control algorithms
04 p0666 A69-15012
- Outgoing radiation field based on interpretation of broad sector radiometer measurements made from meteorological earth satellites
04 p0627 A69-15032
- Interpretation technique for weather satellite photographs of spatially coherent cloud distributions
04 p0628 A69-15090
- Satellites role in observing and forecasting global atmospheric behavior, discussing World Weather Watch and Global Atmospheric Research Program
06 p0916 A69-16854
- Meteorological satellites data for safe navigation of ships, discussing techniques to overcome difficulties in interpreting ice and cloud photographs
[UN PAPER 68-95776] 06 p0916 A69-17028
- Atmospheric processes interpretation from cloud cover pictures televised by orbiting satellite, examining indirect weather forecasting
[UN PAPER 68-95713] 06 p0949 A69-17029
- Meteorological satellites data for quantitative weather forecasts, discussing error effects due to data treatment in adiabatic approximation
06 p0949 A69-17032
- Meteorological satellites in weather forecasting, contrasting satellite data continuity to discreteness of synoptic charts
[UN PAPER 68-95760] 06 p0949 A69-17037
- Meteorological satellite TV data of earth cloud cover for determining atmosphere pressure field
[UN PAPER 68-95654] 06 p0949 A69-17052
- U.S.S.R. system Meteor consisting of four Cosmos satellites in polar orbits to observe cloud distribution, snow and ice field boundaries, etc
06 p1013 A69-17053
- Eole meteorological satellite secondary use, discussing cosmic rays monitoring, navigation purposes and oceanographic research
[UN PAPER 68-95833] 06 p1013 A69-17077
- Dynamic stability tests of tilt winged V/STOL aircraft model in ultralow speed range, discussing apparatus for stability derivatives
06 p0866 A69-17091
- Cloud features produced by European tropospheric low pressure areas observed by meteorological satellite photographs, noting cyclonic systems development
06 p0950 A69-17619
- Soviet papers on satellite meteorology covering equipment onboard meteorological satellites, data processing, photograph interpretation, etc
06 p0951 A69-17976
- Calibrating long wave actinometric instruments designed for Soviet meteorological satellites
06 p0929 A69-17978
- Informative properties of IR scanning equipment of meteorological satellites, discussing radiative flux measurements and thermal mapping
06 p0929 A69-17979
- Lower atmosphere pressure field determination based on meteorological satellite observations of amount and types of clouds and upper boundary altitude
06 p0952 A69-17987
- Radiating surface temperature and total atmospheric moisture content determinations based on meteorological earth satellite measurements of outgoing radiation in IR
06 p0952 A69-17988
- Atmospheric measurements from satellites, discussing ATS-1 cloud images for definition of wind and use of WEFAX through ATS 2 satellites for data transmission
[AIAA PAPER 69-158] 06 p0954 A69-18038
- Eole satellite and meteorological balloons telecommunications used to study wind distribution in Southern Hemisphere and other atmospheric parameters
07 p1084 A69-19134
- Meteorological satellites observation of energy exchange between earth and space, discussing planetary albedo, energy absorption and source and sink regions
07 p1127 A69-19261
- Radiocommunications from Tiros and Nimbus meteorological satellites, noting weather data communications and hydrological experiments
09 p1451 A69-21289
- Meteorological observation problems from satellites, considering lower atmosphere measurements and accuracies
09 p1537 A69-22690
- Apollo 7 and weather satellite observation photographs of hurricane Gladys and typhoon Gloria
10 p1722 A69-22944
- ATS satellite distorted photographs conversion into normal and Mercator projections, using computer programs
10 p1689 A69-22945
- Soviet meteorological and geophysical rockets, satellites and techniques in cloud studies and weather forecasting, noting Cosmos results
13 p2290 A69-27348
- Collection of articles on satellite meteorology including vertical air motions, clouds and radiation fields
13 p2291 A69-27723
- Satellite and aerological ground station data combined to determine geopotential fields and wind velocity fields for inadequately serviced areas
13 p2292 A69-27732
- High and low latitude cellular cloud patterns observed by meteorological satellites, noting frequent occurrence over oceans
14 p2473 A69-29727
- Air density at various heights determined from analysis of satellite low perigee orbits, discussing periodic density variations and correlation with daily geomagnetic index
15 p2599 A69-31348
- Air densities from satellite obtained orbital data, comparing accuracy of values and methods of analysis
15 p2600 A69-31349
- Meteorological satellite data application to weather analyses and forecasts, discussing sea-ice boundaries and snow fields location
15 p2650 A69-31364

European geostationary satellite orbit inclination and eccentricity modification for maximum observation time of Northern Hemisphere by high resolution IR radiometer

15 p2650 A69-31389

Antenna array construction for reception of weather satellite transmissions, noting automatic picture transmission systems /APT/

17 p2946 A69-33767

Daily European weather surveys based on meteorological satellite pictures transmitted during third quarter 1967

17 p3000 A69-33769

Meteorological satellite research, ATS-3 program earth color picture from oceanographic and geomorphological viewpoints and U.S.S.R. research

17 p3000 A69-33777

Daily European weather surveys based on pictures transmitted by satellite during fourth quarter 1967

17 p3000 A69-33778

Satellite photography for snow cover mapping and depth estimation

18 p3167 A69-35084

Image dissector meteorological cameras, discussing ATS-III and Nimbus systems, high resolution camera and multispectral cameras

18 p3137 A69-35101

Soviet collection of papers on satellite meteorology problems covering cloud physics, jet streams, cyclones, satellite photography, etc

19 p3365 A69-36667

Meteorological parameters-radio propagation characteristics correlation, studying feasibility of data acquisition by occultation satellite system

21 p3705 A69-38374

Satellite synoptic meteorological data collection systems, discussing configurations, global location requirements and digital code platforms position determination

[AIAA PAPER 68-1095] 21 p3819 A69-39029

Satellite-based meteorological observation system for global atmospheric research program, discussing wind measurement, IR and microwave sounding possibilities, etc

[AAS PAPER 69-120] 24 p4307 A69-42817

METEOROLOGICAL SERVICES

Utility of satellite cloud pictures to meteorological work, discussing weather observation in Israel Meteorological Service

[UN PAPER 68-95571] 01 p0109 A69-10482

WEFAX /Weather Facsimile/ experiment to explore operational feasibility of direct meteorological data transmission via satellite relay from central station to remote stations

03 p0411 A69-13240

Soviet papers on satellite meteorology covering equipment onboard meteorological satellites, data processing, photograph interpretation, etc

06 p0951 A69-17976

Ground, aircraft and spacecraft actinometric data compared for clear sky

06 p0951 A69-17982

Constant level sounding balloon systems providing global data on atmospheric circulation, discussing icing problems and average life improvement

07 p1053 A69-18955

Satellites in meteorological service, describing TOS, ESSA and Nimbus satellites operation methods

08 p1409 A69-19960

Satellite and aerological ground station data combined to determine geopotential fields and wind velocity fields for inadequately serviced areas

13 p2292 A69-27732

Wind velocity, geopotential and atmospheric layer temperature fields constructed from Tiros 9 satellite cloud data using least squares method and trigonometric polynomials

13 p2292 A69-27733

Automatic processing and error analysis of horizontal, vertical, static and geostrophic wind data by U.S.S.R. Hydrometeorological Service

13 p2292 A69-27839

Statistical analysis of radiation temperature structure for automatic recognition of meteorological situations from actinometric satellite observations

13 p2293 A69-27842

Meteorological problems in Italy analyzed by digital computer program through numerical integration of atmospheric models to provide weather forecasts

13 p2295 A69-28651

Jet stream vertical wind shear chart construction for aircraft with gas turbine propulsion

14 p2473 A69-29730

Soviet collection of articles on aviation forecasting of cloud cover, high altitude wind and turbulence

14 p2473 A69-29734

Probabilistic forecasts in meteorological support of aviation, comparing economic implications of squall forecasting

14 p2474 A69-29739

Clear air turbulence computerized analysis and forecast over U.S. using upper air rawinsonde measurements

22 p3976 A69-39927

Atmospheric variability at proposed flight levels, analyzing meteorological requirements of SST operations, discussing annual cycles in stratospheric circulation

24 p4251 A69-42711

Short range aviation terminal weather predictions concerning runway visual range, cloud-base height and wind, using FAA mesometeorological network

24 p4342 A69-42892

Meteorological satellite research program, including unmanned satellite observations and possibilities with meteorologist on board manned spacecraft

[UN PAPER 68-95350] 01 p0109 A69-10483

Japanese space research organizations, sounding rockets, meteorology, satellite communications, geodesy, etc

[UN PAPER 68-95563] 01 p0151 A69-10501

Automatic picture transmission station equipment including antenna, cavity filters, tape recorder, oscilloscope, facsimile system and kinescope

[UN PAPER 68-95450] 01 p0054 A69-10522

Australian sounding rocket programs carried out in conjunction with U.S. satellite experiments

[UN PAPER 68-95214] 06 p1013 A69-17076

Soviet papers on satellite meteorology covering equipment onboard meteorological satellites, data processing, photograph interpretation, etc

06 p0951 A69-17976

Automation of meteorological fields analysis using computer

07 p1175 A69-18677

Meteorology - Conference, Berlin, September 1968

09 p1534 A69-21512

Meteorological data for flight path climatologies, analyzing annual frequency distribution of maximum wind velocities

09 p1535 A69-21519

One and two dimensional frequency distributions for probability estimates of climatological quantities, discussing temperature and interdiurnal changes

09 p1535 A69-21520

Electron production rates variations in lower ionosphere cosmic layer related to meteorological, geomagnetic and cosmic conditions

10 p1759 A69-22839

Soviet collection of articles on satellite data interpretation and use for meteorological services

11 p1911 A69-24824

Buoyancy in turbulent shear flow, rotation or streamline curvature effects and meteorological parameters, drawing formal exact algebraic analogy

11 p1870 A69-24894

Meteorology and space vehicle capabilities noting earth, outer space and earth atmosphere observations and measurements, relaying telecommunication signals, etc

12 p2126 A69-26126

Optimum coordination between homogeneous isotropic geopotential field and derivatives, estimating efficiency of geopotential and wind fields simultaneous analysis

12 p2126 A69-26580

Radar application to meteorology, entomology and ornithology, discussing clear air turbulence detection and flight tracking of birds and insects

12 p2034 A69-27004

Vertical refraction effect on gas laser beam propagation near earth surface under various meteorological conditions, comparing index for diffuse light

13 p2220 A69-27827

Blocking processes synchronous development involving atmospheric circulation disturbances in Northern and Southern Hemispheres, noting localization in Pacific and Atlantic oceans

13 p2292 A69-27840

Anomalous meteorological field distribution as observed by correlated stations, determining independent stations number observing same data

13 p2293 A69-27851

Time correlation functions for wind vectors and components at various altitudes over Moscow in winter and summer

13 p2294 A69-27856

Passive remote sensing at microwave frequencies for meteorology, oceanography and geology, reviewing physics of wave interactions, mathematics of data interpretation, etc

14 p2414 A69-29514

Collection of Soviet papers on planetary atmospheric circulation covering tropospheric and stratospheric temperature distribution, cloud patterns, wind fluctuations, etc

14 p2472 A69-29723

Soviet collection of papers on general circulation of atmosphere

14 p2475 A69-29818

Dynamic meteorology quasi-stable problems solved using sequential approximations solution for barotropic model of Euler equations

14 p2476 A69-29821

Meteorological elements variation from measuring earth radiation in different spectral regions by satellites, determining temperature and humidity profiles

14 p2477 A69-29828

Stellar scintillation spectra for different zenith distances, correlating data with meteorological conditions at time of observation

15 p2647 A69-30165

Monograph on large scale cloud distribution in extratropical low pressure regions, using classical meteorological observations and Tiros weather satellites data

15 p2650 A69-31212

Israel research on space data for meteorological purposes, describing automatic picture transmission data and errors in surface temperature determination by satellite radiometry

15 p2650 A69-31422

Book on operational meteorological information processing by computers, discussing synoptic and aerological data, automatic data processing in operational numerical forecasting, etc

18 p3105 A69-34332

Advanced Meteorological Sounding System /AMSS/ for measurements up to 150,000 ft, discussing configuration, characteristics, radiosonde, ranging, telemetry data ground equipment and test

18 p3108 A69-35102

Meteorological corrections of meson megatelescope data based on hourly ground-level pressures and temperatures, considering vector and regression analyses

19 p3308 A69-35991

Large atmospheric motions analyzed by elliptic partial differential equation and hydrostatic and quasi-geostrophic approximations

19 p3364 A69-36504

Soviet collection of papers on satellite meteorology problems covering cloud physics, jet streams, cyclones, satellite photography, etc

19 p3365 A69-36667

Mesometeorology in central Europe, discussing applications of numerical techniques to forecasting

20 p3570 A69-37427

Solar activity effect on short term meteorological processes and dynamic state of mesosphere and ionosphere, emphasizing relationship to entire atmosphere dynamics

20 p3590 A69-37684

Lidar technology application to atmospheric and meteorological problems in clouds and cloud structures, air motion and inhomogeneity in clear air

22 p3977 A69-40535

Meteorology and geophysics - Conference, Hamburg, April 1968

24 p4344 A69-43144

IR measurements applications to meteorology, discussing IR radiation characteristics, atmospheric effects, thermal radiation detection and differences between real and black bodies

24 p4316 A69-43507

METEORS

METEORS

U METEOROIDS

METERS

U MEASURING INSTRUMENTS

METHACRYLATE RESINS

U ACRYLIC RESINS

METHANE

Methane IR absorption band centered near wavenumber 9050, noting R branch features and fine structure
01 p0023 A69-10289

Thermal model for interaction of exploding wires with methane atmosphere, discussing energy transfer efficiency in high temperature pyrolyses near explosion
01 p0119 A69-10674

Jovian atmospheric rotational temperature from rotational lines in methane band
01 p0153 A69-10856

Gas chromatographic determination of hydrocarbon quantity in methane in parts per billion range
03 p0382 A69-14115

Trace analysis /parts per billion/ of methane in helium, hydrogen and neon
03 p0382 A69-14116

Methane broadening and anomalously small pressure shift of 3.39 micron rotation-vibration line, using laser saturated molecular absorption
04 p0633 A69-15424

Charge exchange cross sections in methane and ammonia, noting dissociative charge exchange role
06 p0884 A69-17114

NASA atlas of IR solar spectrum, reporting B and 4 meter spectrometer recordings over band containing methane telluric absorptions
06 p1008 A69-17810

Deuterated diazomethane prepared by base catalyzed reaction of hydrazine with chloroform
06 p0885 A69-17885

Chemiluminescence in high temperature oxidation of methane studied in shock tube
06 p0885 A69-17937

Ignition time of methane and acetylene, considering concentration and thermodynamic properties during reaction
[WSCIPAPER 68-41] 07 p1240 A69-18356

Radiogenic theory of origin of He in natural gas and absence of Ar from K 40 decay, discussing primordial earth atmosphere composition
08 p1311 A69-20947

Vibrational relaxation times in pure O and in O with methane impurity determined with acoustic absorption measurements
09 p1542 A69-21721

Molar heat and entropy of adsorption and activity coefficient of adsorbed phase for methane-ethane-silica gel system
10 p1652 A69-23370

Methane absorption distribution in 6190 A band over Jupiter disk based on spectrograms, noting center to limb variations
11 p1960 A69-24730

Methane absorption distribution in 6190 A band over Saturn disk at center and polar latitudes based on spectrograms
11 p1960 A69-24731

Thermal ignition of methane-oxygen mixture, observing flame propagation
13 p2380 A69-28459

Leak rate measurement accuracy of rate-of-rise technique for nitrogen, methane and He between millionth and thousandth torr
16 p2791 A69-32326

Space storable regenerative cooling with FLOX/methane under conditions for small pump fed engine, describing injector and chamber design
[AIAA PAPER 69-509] 16 p2844 A69-32718

Flox/methane pump fed engine, discussing RL-10-1-A engine tests and optimized 5000 lb thrust engine design
[AIAA PAPER 69-510] 16 p2741 A69-32720

Jupiter photochemistry above 1000 A, noting methane and ammonia photolysis zones, atmospheric pressures and hydrogen recombinations
17 p3032 A69-33165

Primitive earth upper atmosphere thermal models, considering roles of exospheric temperature and free hydrogen availability in methane dominated environment
20 p3608 A69-38056

Methane abundance and rotational temperature of Jupiter, considering effects of line saturation
20 p3613 A69-38174

Methane rotational temperature in Jovian atmosphere deduced from equivalent widths of lines at 1.1 micron band
22 p4028 A69-40663

Formation mechanism of positive ethyl ion and hydrogen molecule during interaction between positive methyl ion and methane molecule
24 p4280 A69-43814

METHIONINE

Chlorella seaweed hybrid strains containing larger amounts of amino acids than original parent species
13 p2216 A69-28620

METHOD OF CHARACTERISTICS

Two dimensional compressible inviscid laminar gas flows unsteady processes studied by extending method of characteristics
01 p0008 A69-11360

Survey of papers on computer calculation of two and three dimensional gas flows, emphasizing method of characteristics and finite difference techniques
03 p0363 A69-13657

Induced flow determination in pulsejet ejector, solving momentum and continuity equations by method of characteristics and mathematical model
[ASME PAPER 68-WA/FE-33] 05 p0812 A69-16106

Quasi-method of characteristics with application to fluid lines with frequency dependent wall shear and heat transfer
[ASME PAPER 68-WA/AUT-7] 05 p0750 A69-16181

Method of characteristics for nonequilibrium internal flow fields in propulsion systems, discussing focusing, shock wave and accuracy
[AIAA PAPER 69-6] 06 p0915 A69-18170

Three dimensional hypersonic steady flow around blunt and pointed cones at nonzero angles of attack calculated by method of characteristics
[AIAA PAPER 69-187] 06 p0865 A69-18176

Unstationary characteristics method applied to numerical computation of steady compressible flow around airfoil
[ONERA-TP-630] 07 p1049 A69-18413

Large amplitude longitudinal wave propagation in elastic rod solved by method of characteristics, prescribing end velocity as step function of time
07 p1233 A69-19176

Characteristics method for solution of differential equations representing time changes of wind and pressure fields in divergent barotropic channel flow
11 p1911 A69-24585

Delta wing in three dimensional supersonic flow analyzed by method of characteristics, discussing leading edge problems
11 p1820 A69-25425

Relaxing gas nonequilibrium flow in plane expansion, comparing partial differential equations with method of characteristics
13 p2244 A69-27322

Transport equation numerical solution for unsteady radiation field by straight lines method, allowing for scattering indicatrix forms with passage of time
13 p2350 A69-27858

Characteristics method for stress waves from hypervelocity impact of circular cylinder on half space, discussing numerical diffusion effect on pressure and flow fields
[AIAA PAPER 69-355] 13 p2365 A69-28287

Three dimensional supersonic nozzle flow field calculations using second order numerical method of characteristics and computer programmed for internal flows
[AIAA PAPER 69-463] 16 p2734 A69-32766

Method of characteristics for computing supersonic jets and wakes with given boundary pressure distribution
[ONERA-TP-721] 18 p3121 A69-34636

Monograph on method of characteristics for three dimensional supersonic flows, covering numerical calculations of steady gas flow past bodies at angle of attack
19 p3238 A69-36170

Flowfield properties of two dimensional supersonic jet near sonic nozzle exit by numerical method of characteristics
22 p3860 A69-40920

Shock wave transient motion during passage through ducts in inviscid gas containing convergences, using characteristics method
23 p4153 A69-42398

METHODOLOGY

Nonlinear transport equations solution methodology covering transformations, invariants, boundary value problems, numerical methods, etc
21 p3697 A69-39729

Top-down initiating technique for forecasting future decade major systems requirements based on information progression
[AAS PAPER 69-409] 24 p4417 A69-42803

METHODS

U METHODOLOGY

METHYL ALCOHOLS

Hydrogen peroxide electrode cathodic polarization studied for liquid oxidant use in methanol fuel cells
11 p1825 A69-24523

Stress corrosion cracking of Ti-6Al-4V alloy tensile tested in anhydrous methanol by electron fractography and diffraction, noting hydrogen embrittlement
11 p1903 A69-24576

Titanium alloy tensile specimens tests in liquid methanol and anhydrous methanol environments at known stress-strain-time relations examined by fractography and high resolution electron diffraction
16 p2799 A69-31718

Stress corrosion cracking of alpha Ti in liquid nitrogen tetroxide and various methanol environments, considering failure mechanisms
19 p3352 A69-36906

Methyl alcohol, ether and acetone vapors decomposition in microwave discharge, obtaining H and CO in addition to solid polymeric films
22 p3895 A69-40103

METHYL COMPOUNDS

IR and Raman spectra of solid and matrix isolated methylamine and deuterium derivatives, locating amine twisting vibration in solid phase IR spectra
01 p0023 A69-10287

Photoionization curves and threshold energies for fluorocarbon and trifluoromethyl halide molecules and ions, calculating ionic heats of formation and bond dissociation energies
02 p0205 A69-12464

Methyl 2-cyanoacrylate adhesive bonding characteristics, noting importance of film thickness
09 p1529 A69-22316

Electron spin resonance spectra of gamma irradiated single crystals of 9-methyladenine, analyzing H abstraction radical and temperature effects
19 p3264 A69-35974

Chromatographic analysis of products formed during induction period of 2-methylbutane gaseous oxidation in flow system at low temperatures and long residence times
21 p3669 A69-38798

Rotational microwave spectrum of 2-methylfuran, using fourth order perturbation method for internal rotation A-E doublet splittings
24 p4280 A69-43811

METHYLHYDRAZINE

Macaque monkey behavior after injection of monomethylhydrazine with and without pyridoxine HCl, noting effects of aversively and appetitively rewarded training
03 p0375 A69-14068

Renal pathology of acute methylhydrazine intoxication in dogs, noting hemolytic anemia and hemoglobinuric nephropathy
06 p0883 A69-17847

Monomethylhydrazine /MMH/ toxic effects on cornea and blood aqueous barrier studied in vivo on dogs
09 p1447 A69-22547

IR and Raman spectra of gas and liquid phase methylhydrazine and deuterated methylhydrazines, discussing vibrational motions, H bonding and thermodynamic functions
10 p1752 A69-23528

Preferential shifts in consumption of metabolic fuels following exposure to hydrazine or monomethylhydrazine, considering biochemical and physiological responses
14 p2407 A69-29303

Monomethylhydrazine absorption through canine skin noting metabolic aftereffects and methemoglobinemia
22 p3887 A69-41191

METROLOGY

Operational principles and characteristics of pulse width modulator designed on basis of autooscillator amplifier, giving circuit diagrams
10 p1664 A69-23817

Metrological measuring instrument scales selection principles for ensuring constant sensitivity and Q factor
17 p2975 A69-33614

Technical and metrological characteristics of short base strain gages and bonding to specimen, investigating sensitivity and creep
20 p3544 A69-37817

- Holography for engineering metrology, discussing interferometry, pattern interpretation, inspection techniques, etc
22 p3945 A69-40235
- MICA**
Phosphate cements for bonding mica ceramic to titanium in jet engine equipment
05 p0786 A69-16799
Heat resistance and strength properties of porous Ni-base cermet materials with mica additions under high temperature oxidation
21 p3751 A69-38615
- MICE**
NT POCKET MICE
Vertical vibration stimulation of growth of onion bulbs and mice body weights
01 p0014 A69-10584
Renal effects of moderate hypoxia exposure in mice as reflected in urine volume and electrolyte excretion patterns during four days at simulated altitude
01 p0015 A69-10921
Deuteron microbeam for simulating biological effects of ionization by heavy cosmic ray particles
03 p0373 A69-13493
Histological investigation of internal organs of mice exposed to atmosphere with high oxygen content
05 p0709 A69-16513
Immunological and histochemical methods for studying mice reactivity after long term exposure to hyperoxic atmosphere
07 p1065 A69-18975
In vivo hemolytic susceptibility to hyperoxia in mice deficient in tocopherol
07 p1066 A69-19422
Microwave radiation effects on body weight and peripheral blood hemograms of mice, discussing maximum safe exposure related to generator output
08 p1266 A69-20678
Barbamyl effect with and without somatotropic hormone injection in mice during prolonged isolation and hypokinesia, noting sleep duration
10 p1646 A69-23576
Sublethal ionizing radiation doses effect on hemolytic immunocompetent spleen cells in mice upon using chemical radiation protectors
13 p2210 A69-28334
Hypokinesia effects on transversostriated muscle fibers of mice, noting changes in myofibrillar apparatus, mitochondria and sarcoplasm
13 p2212 A69-28616
Vertical vibration stimulation of growth of onion bulbs and mice body weights
15 p2555 A69-30754
Diurnal variations in radiation sensitivity of mice and rats to irradiation with median lethal doses, noting sine curve survival function
15 p2557 A69-31458
Antihypoxic preparations protective effect on white mice and rats subjected to gravitational accelerations
17 p2906 A69-32931
Oxygen consumption and rectal temperature in male mice confined in nitrogen and helium diluted hyperoxic atmosphere at specific temperature and humidity ranges
17 p2906 A69-32932
Corneal epithelium chromosome rearrangements in gamma irradiated white adult mice, noting radiation dosage and duration
17 p2907 A69-32944
Transverse acceleration overstrain effect on mice sensitivity to cystamine
17 p2909 A69-33386
Centrifugation effects on body composition and growth of mice
17 p2910 A69-33746
Histological investigation of internal organs of mice exposed to atmosphere with high oxygen content
18 p3096 A69-34732
Mice convulsions at varying hyperbaric oxygen pressures and carbon dioxide content correlated with decreasing brain alpha aminobutyric acid levels
19 p3257 A69-35972
Immunological and histochemical methods for studying mice reactivity after long term exposure to hyperoxic atmosphere
20 p3479 A69-38223
Retarded immunological recovery in sublethally X-irradiated mice by additional thymic exposure reversal with injected marrow cells
22 p3887 A69-41194
X ray radiation damage to white mice blood serum proteins disappearing following intraperitoneal administration of imidazole or benzimidazole
23 p4077 A69-41300
White mice gastrocnemius muscle wet mass, dry mass and noncollagen-nitrogen /NCN/ content, noting /NCN/ content dependence on body mass
23 p4080 A69-41406
Radioprotective effects of 5-azacytidine on bone marrow and blood leukocytes of X ray irradiated AKR mice
23 p4080 A69-41429
Whole body X irradiation effect on protein degradation in mice, using radioactive I labeled albumin
23 p4099 A69-42151
Altered gaseous environments effect /parabiosis/ on interferon production in mice injected with Newcastle disease virus, noting hypoxia role
24 p4262 A69-42888
White mice survival rates and blood morphology and sedimentation rates in low ambient pressure confinement following infectious bacteria injection
24 p4267 A69-43397
- MICHELL THEOREM**
Michell type optimum fiber arrangement for transferring torque across annulus, considering single straight, double and multiple annular arrays under single load system
19 p3447 A69-36851
- MICHELSON INTERFEROMETERS**
Elastic and inelastic collisions between deformable bodies, using Michelson interferometer with He-Ne laser as source
02 p0282 A69-12607
Stellar spectra taken with rapid scanning Michelson interferometer, noting IR excess due to radiation from clouds surrounding stars
04 p0655 A69-14667
Helium-neon gas laser as coherent light source for holograms of vaporizing fuel films and for Michelson interferometer
08 p1327 A69-20874
Optical diagnostics methods for fast processes in rarefied plasma, using Michelson interferometers with ruby and Nd lasers as light sources
12 p2089 A69-26186
Contrast interference patterns obtained in Michelson interferometer at various path differences, using He-Ne laser as light source
12 p2108 A69-26593
Signal strength of two beam interferometers with laser illumination, considering modulation depth of interference pattern
13 p2259 A69-27450
Dynamic Michelson interferometer equipped with Ge detector to obtain spectra of airglow from 1.2-1.6 microns
13 p2252 A69-27587
Michelson interferometers with large interference fields for plasma diagnostics emphasizing structural rigidity, monochromatic light pulse power, instruments vibrations resistance, etc
14 p2496 A69-29776
Long path difference vacuum Michelson interferometer application to far IR and IR laser wavelength measurements compared with 6328 A He-Ne wavelength
17 p3006 A69-33405
Modular Michelson interferometer used as IR spectrometer for absorption and dispersion studies, describing instrument construction, range and accuracy
20 p3538 A69-37297
Vibrational displacement phase measurement by Michelson interferometer with laser source
20 p3538 A69-37320
Transverse and longitudinal laser modes in holography, noting Michelson interferometer interference pattern role
21 p3734 A69-38398
Intensity interferometer applications comparison with Michelson interferometer, discussing sensitivities, radio and optical wavelength astronomy, space plane waves, etc
21 p3722 A69-38794
Single mode high power He-Ne laser with Michelson interferometer in cavity, describing performance determination method
22 p3962 A69-40473
- MICROANALYSIS**
Magnified image of Al-Mg specimen microanalyzed during examination by electron microscope, studying segregation and initial precipitation at grain boundaries
03 p0442 A69-12894
Microchemical analysis for diffusion measurement of laser produced lithium plasma in uniform magnetic field
05 p0762 A69-15960
- Carbon influence on cast Waspaloy, discussing chemical segregation, chemical gradients and tensile ductility
[SAE PAPER 690100]
07 p1158 A69-18307
X ray microanalyzer maximum sensitivity obtained using flow type proportional and scintillation counters with proper tuning and eliminating scattered electrons
12 p2093 A69-26596
Radioactivity induced in solid materials for components microautoradiography and radiograph information quantitative evaluation
13 p2297 A69-28157
Chlorapatite and whitlockite compositions of phosphate minerals from chondrites determined by electron microprobe
15 p2690 A69-30706
- MICROBALANCES**
Oscillating fiber microbalance for direct mass determinations in .1 mg to .0001 microgram range
21 p3720 A69-38592
- MICROBE**
U MICROORGANISMS
MICROBIOLOGY
NT BACTERIOLOGY
Space controlled microbiology, discussing telemetry control of waste material conversion in air and water pollution
[UN PAPER 68-95861]
01 p0014 A69-10456
Biological life support system for regenerating closed atmosphere by photosynthesis, using gas exchange between man and microalgae
01 p0021 A69-11078
Terrestrial microorganism survival in space aboard Gemini satellite, discussing lethal effects of solar radiation
01 p0018 A69-11087
Ionospheric and stratospheric UV radiation effects on survival of microorganisms
01 p0018 A69-11088
Pedoscope use in soil microbiological studies including ecology, infection susceptibility, etc
01 p0021 A69-11092
Biological monitoring during assembly of Technological Feasibility Spacecraft /Mars lander/ to evaluate thermal control techniques and microbiological burden prior to sterilization
02 p1201 A69-11774
Microbiology of water management subsystem for manned space flight, discussing sterilization by heat and tests inside Integrated Life Support System /ILSS/ [SAE PAPER 680718]
03 p0379 A69-13441
Microbial contaminants on space hardware, discussing detection and enumeration techniques
05 p0714 A69-15954
Microbiological surface sampling methods, noting role in detecting contamination on eating utensils, blankets, sheets, etc
05 p0715 A69-15982
Microbiology quality assurance program for planetary mission, considering spacecraft sterilization during fabrication, test and launch site activities
15 p2559 A69-31124
Manganese deficiency effect on growth and chlorophyll content of algae with and without hydrogenase
15 p2558 A69-31551
Microbiological influence on astronauts efficiency during and after long space flights, stressing simulated microclimates and confinement effects on flora
18 p3097 A69-35304
Microbiological corrosion and degradation of aircraft metals and organic materials in fuel tanks
19 p3341 A69-35569
Microbial protein extraction from Chlorella algae and Torulla yeasts using urea soaking method
21 p3662 A69-39712
Prokaryotic and eucaryotic microfossils localized in pre-Paleozoic microfiora, noting radiometric age and association with stromatolites
22 p3935 A69-40052
Open cell ester-base polyurethane foam effect on fuel-utilizing microorganisms growth in jet fuel- water systems
24 p4271 A69-42700
- MICROCALORIMETERS**
U CALORIMETERS
MICROCIRCUITS
U MICROELECTRONICS
MICROCLIMATOLOGY
Microbiological influence on astronauts efficiency during and after long space flights, stressing simulated microclimates and confinement effects on flora
18 p3097 A69-35304

MICROCRACKS

MICROCRACKS

Dead-end microcracks stress fields, studying positive /tensile/ and negative /compressive/ nature dependence on crack size

04 p0674 A69-14548

Surface environment effects on mode of microcrack formation during fatigue of Al single crystals, noting surface void formation mechanism

07 p1235 A69-19387

Micromechanism of crack propagation in brittle fracture, considering kinematics for steady state crack in plane strain and energy dissipation

10 p1796 A69-23070

Fracture mechanics of polymers and fiberglass reinforced plastics, indicating microcracking under static and cyclic loading due to resin phase brittleness and low strength

12 p2120 A69-26849

Microcrack detection by holographic interferometry, describing experimental apparatus and test procedure and results

24 p4317 A69-43763

MICROELECTRONICS

Performance characteristics of microstrip ferrite devices for hybrid microwave integrated circuit systems, including meander line phasers and YIG elements

01 p0040 A69-10191

Thin ferrite use in microwave integrated circuits including phase shifters, latching circulators, isolators and phase and amplitude modulators

01 p0040 A69-10192

Hybrid integrated parametric amplifier design considerations for fabrication in microstrip transmission line

01 p0040 A69-10193

Hybrid microstrip integrated microwave circuits, discussing substrate and conductor materials and fabrication processes

01 p0040 A69-10199

Microstrip-like transmission lines analyzed by method based on line capacitance variational calculation and charge density distribution

01 p0044 A69-10625

Planar technology application to germanium electronic components and integrated circuits

02 p0214 A69-11597

Neutral buoyancy microelectrode for prolonged recording from single nerve units

02 p0202 A69-11865

Air gap isolated microcircuit beam-lead devices fabrication, operation, electrical performance and radiation resistance

02 p0221 A69-12469

Microelectronic components joining technique by compliant bonding, utilizing deformable medium between tool and beam leads to eliminate intricate tool shapes and alignments

02 p0254 A69-12473

Analysis and design of synchronous filter compatible with microelectronics requirements, switching N monolithic RC thin film devices to signal source of resistance

03 p0403 A69-13206

RF sputter etching of microcircuits and components

04 p0606 A69-14874

Medium scale integration for packaging hybrid electronic monolithic systems

05 p0735 A69-16752

Temperature effects on primary photocurrent of base collector and collector substrate junctions of isolated transistors from microcircuits

06 p0977 A69-16881

Models to predict transient radiation responses in microcircuits, discussing model accuracy for junction and dielectrically isolated circuits

06 p0977 A69-16887

Microelectronics in astronautics, discussing properties of thick and thin film electronic devices, integrated semiconductor circuits and hybrid circuits

07 p1089 A69-18256

Collection of papers on applications of microelectronics to aerospace equipment, noting design and reliability of circuits and computers

[AGARDOGRAPH-114] 08 p1291 A69-20981

Microelectronics technology and economics, discussing semiconductor integrated, discrete component and thin film hybrid circuits and MOSFET devices

[AGARDOGRAPH-114] 08 p1291 A69-20983

Microcircuit components and microelectronic systems reliability assessment including short term testing, noting digital systems, packaging, production controls, etc

[AGARDOGRAPH-114] 08 p1291 A69-20984

Microminiature system mechanical design for aerospace environment, considering guidelines for implementation of requirements

[AGARDOGRAPH-114] 08 p1291 A69-20986

Microcircuits, integrated circuits and other monolithic solid state circuits failure mechanisms examined and applied to reliability methodology

[AGARDOGRAPH-114] 08 p1292 A69-20987

Microelectronic studies in France noting semiconductor integrated circuits, thin film devices and application to airborne apparatus and small computer

[AGARDOGRAPH-114] 08 p1292 A69-20993

Conventional electronic and microelectronic circuits reliability, discussing external stress effects on improvement in avionics and rocket applications

08 p1293 A69-21112

Integrated semiconductor circuits reliability in electronics and microelectronics, discussing hybrid and monolithic circuits in thin/thick film design and on Si monocrystals

08 p1294 A69-21118

Reliability in microelectronics estimated from failures expected during lifetime, describing various test methods

08 p1294 A69-21121

Precision trimmed RC active networks for high selectivity microelectronic filter fabrication for frequency division multiplex applications

09 p1466 A69-22452

Microelectronics for digital adaptive controls, discussing digital filter design and chips required in fabrication

09 p1474 A69-22453

Microelectronic data and remote control function transmission system for wind tunnel testing of aircraft dynamic response to gusts and turbulence

10 p1672 A69-23283

Laser application to welding, drilling and other processes involving material removal for microelectronic circuits and components fabrication

11 p1846 A69-24600

Radioisotope fueled miniature thermionic converter for fractional watt level operation, defining optimum interaction of variables

14 p2399 A69-29193

Microelectronic technology for mass production of high reliability hybrid thin film circuits

15 p2628 A69-30845

Quality control of high volume microelectronic circuit assembly of military computer emphasizing preventive action

15 p2580 A69-31129

Microelectronic S band upconverter designed and fabricated in microstrip on alumina substrate

16 p2762 A69-32562

Functional signal conversion operations in microelectronic radio equipment, examining components in analog and pulsed devices synthesis

18 p3109 A69-35162

Intermediate level mathematical reliability model relating failure mechanism, part strength and interaction of application stresses to parts failure rates, with emphasis on microcircuits

19 p3283 A69-36019

Microelectronics and IC process and quality control check list including conductor screening, resistor abradings and discrete part attachment

19 p3283 A69-36020

Microelectronics role in maintenance and maintainability of subminiature solid state components, emphasizing functional packaging at module level

19 p3283 A69-36021

Book on field effect and bipolar junction transistors and microcircuits, covering ideal and practical amplifiers, circuit characteristics, etc

20 p3505 A69-37147

Lasers as tools for integrated circuits fabrication, noting roles of various laser operating parameters

21 p3742 A69-39705

Hybrid microelectronic circuit failure mechanisms for thick and thin film resistors, conductors and capacitors, noting packaging contributions

22 p3910 A69-39954

Wire, flip-chip and beam-lead bonding processes effects on hybrid microcircuits reliability

22 p3911 A69-39956

He-Ne laser system for micromachining thin film photolithographic masks, describing computer controlled coordinate table and product quality

22 p3954 A69-40236

Radiation hardened microcircuits and transistors for protection against transient radiation released by nuclear weapons

23 p4135 A69-41528

Hybrid techniques to produce thin and thick film microcircuits and logic system parameters

24 p4286 A69-42906

Hybrid and monolithic integrated microcircuits application to electronic digital computer structures

24 p4284 A69-42907

Thin film field effect transistors and integrated microcircuits, investigating active and passive elements fabrication

24 p4419 A69-42908

Microcircuit phased array electronic countermeasures system design and hardware techniques for aerospace applications, analyzing adaptive, retrodirective and combination array systems

24 p4287 A69-43111

Microelectronics test program consisting of four reliability screening levels based on Mil-Std 883

24 p4287 A69-43205

Materials problems in microelectronic circuits, discussing multilayer interconnection arrays production by thick film or print-and-fire process

24 p4333 A69-43212

MICROFIBERS

Microfilaments, Taylor production method, mechanical properties and comparison to whisker

08 p1320 A69-20582

Microfibrous boehmite as binder for molybdenum disulfide in formation of ductile water resistant dry lubricant films

[ASLE PAPER 68-LC-14] 15 p2642 A69-30606

MICROFILMS

Micromation and micrographics, discussing nonimpact printing in computer avoiding output imbalance by high speed microfilm recorder

18 p3234 A69-35059

MICROGRAPHY

U PHOTOMICROGRAPHY

MICROHARDNESS

N- and p-type InSb and GaSb single crystals microhardness, noting decrease after doping is limited to thin surface layer

01 p0139 A69-10832

Zirconium corner of Zr-Cu-Mo phase diagram, using microstructure analysis of hardness and microhardness measurements, discussing plasticity variations and corrosion resistance

02 p0263 A69-11852

Relationship between microhardness of niobium and other variables characterizing superconductivity

05 p0810 A69-16805

Ion nitrided binary iron alloys and steels electron microscopic studies reveal particle formation during hardenings

06 p0942 A69-17224

N and p type InSb and GaSb single crystals microhardness, noting decrease after doping is limited to thin surface layer

11 p1936 A69-24699

Book on hard alloy properties, discussing bending and compression properties, tensile, torsional and impact strength, wear resistance and thermal shock resistance

12 p2111 A69-25902

Nb and Ti carbides investigated for lattice parameters, microhardness and resistivity in homogeneity domain

15 p2638 A69-30282

Photomechanical and electromechanical effects in semiconductors, considering indentation microhardness decrease caused by light irradiation or electric field

19 p3386 A69-36526

MICROINDENTATION

U MICROHARDNESS

MICROMANOMETERS

U MANOMETERS

MICROMETEORITES

U MICROMETEOROIDS

MICROMETEOROID EXPLORER SATELLITES

NT EXPLORER 16 SATELLITE

Micrometeoroid showers proximity to epsilon Leonid showers in earth orbit, analyzing Helfenzreider comet role from satellite data

14 p2522 A69-29588

MICROMETEOROIDS

NT ZODIACAL DUST

Micrometeorites acoustic recordings on Cosmos 135, investigating data reliability influenced by appearance of thermal noise

01 p0152 A69-10578

Meteorite particles recording by piezoelectric transducers, comparing data collected by Soviet and American scientists
01 p0152 A69-10587

Micrometeorite and meteoric dust data obtained in Soviet space flights
01 p0155 A69-10939

Meteorite dust spherules at Tungusk and Sikhote-Alin falls investigated for mineral composition using X ray analysis
01 p0160 A69-11383

Meteoritic dust composition of Tungusk meteorite noting angular and spherical particles
01 p0160 A69-11386

Particles behavior after separation from meteor, considering deceleration for separation altitudes and initial velocities
02 p0314 A69-11645

Micron and submicron particle cumulative flux upper limits in satellite micrometeoroid environment of Gemini 12
07 p2125 A69-18845

Stony meteoric particles size and velocity during passage through atmosphere
12 p2157 A69-26341

Meteoritic dust particles collections prediction in atmosphere for low and high entry fluxes
12 p2158 A69-26342

Micrometeoroid showers proximity to epsilon Leonid showers in earth orbit, analyzing Helfenzreider comet role from satellite data
14 p2522 A69-29588

Micrometeorites acoustic recordings on Cosmos 135, investigating data reliability influences by appearance of thermal noise
15 p2691 A69-30748

Meteorite particles recording by piezoelectric transducers, comparing data collected by Soviet and American scientists
15 p2691 A69-30757

Interplanetary dust and distribution study by micrometeorite analyzer and by zodiacal light observations using solar probe
15 p2694 A69-30879

Micrometeoroid collections, describing Gemini satellite and Aerobee rocket-borne equipment and experimental results
15 p2700 A69-31440

Micrometeorite simulation by wire explosion plasma, discussing energy requirements and simulator performance
16 p2821 A69-31839

Hypervelocity micrometeor impact sites identification on aluminized glass, using conchoidal pattern as criterion in analysis
18 p3199 A69-34952

Fe-Ni unmelted and unablated micrometeorites number at earth surface calculated, using space density of interplanetary particles and micrometeoritic theory
20 p3614 A69-38251

Rocket and satellite particle collection experiment to confirm reduced micrometeoroid flux near earth, noting inconclusive size frequency distributions of exposed flight samples
21 p3793 A69-38343

Piezoelectric microphone sensor flown on rocket for recording micrometeoritic impacts during noctilucent cloud display, determining cosmic dust particles flux
21 p3793 A69-38348

MICROMETEOROLOGY

Horizontal wind velocity energy spectra, attributing free atmosphere meso and microscale turbulence to meso and micrometeorological processes
12 p2070 A69-26575

Objective analysis of pressure trend fields and surface pressure retaining field with scale of 100 km, using filtering procedure
18 p3166 A69-34816

MICROMETEORS

U MICROMETEORIDS

MICROMETERS

Pitch determination of micrometer screw by scalar star pairs derived from FK3 and Washington zenith catalog noting temperature and dampness effects
16 p2859 A69-32218

MICROMINIATURIZATION

Integrated circuits technology, discussing thin film, monolithic compatible and hybrid circuit techniques
02 p0216 A69-12050

Selective etching process for microminiaturization of special circuits for aerospace
05 p0736 A69-16753

Semiconductor standard memory circuits, discussing arrays and density
06 p0894 A69-17202

Microfilaments, Taylor production method, mechanical properties and comparison to whisker
08 p1320 A69-20582

Microsoldering techniques for thin and thick film hybrid circuits and microminiature printed circuit boards
09 p1510 A69-22349

Engineering problems in IC microminiaturization, dividing devices according to suitability for microminiaturization
15 p2576 A69-30352

Unoccupied space utilization in aircraft compartments due to microminiaturization, considering reliability enhancement of electronic equipment
15 p2576 A69-30353

MICROMINIATURIZED ELECTRONIC DEVICES

NT MICROMODULES

Diamond abrasive process for preparation of microminiature devices for metallographic analysis
03 p0402 A69-13007

Microminiature system mechanical design for aerospace environment, considering guidelines for implementation of requirements [AGARDOGRAPH-114]
08 p1291 A69-20986

Micromin alumina substrates design data, determining dielectric constant, impedance vs line width and wavelength vs frequency
09 p1460 A69-22792

Microminiature latching relay design and manufacturing cost
13 p2232 A69-28049

Visual inspection, thermal and mechanical shock, burn-in and hermeticity tests of microelectronic equipment, reviewing test methods and procedures of MIL-STD-883 program
19 p3284 A69-36043

Microminiature Elliott MCS 920 M digital computer for inertial guidance of CECLES-ELDO launcher, discussing construction, code, interrupt, guidance system and functions
20 p3501 A69-37391

Microminiaturized digital computers for missiles and aircraft, discussing characteristics, environmental conditions and transformation possibility for use in satellites
20 p3502 A69-37392

Miniature floated ball gimballess inertial platform construction, functions, readout, digital computer coupling, etc [AIAA PAPER 69-835]
21 p3761 A69-39366

Hybrid microelectronic modules, using basic thermal design guidelines
22 p3910 A69-39952

MICROMODULES

Micromodule unsteady thermal behavior reduced to calculating linear heat flux for boundary conditions containing temporal and spatial derivatives
23 p4136 A69-41558

Lethal effect of solar UV radiations on dried Coliphage T-1 exposed to space at sounding rocket altitudes
01 p0017 A69-11086

Terrestrial microorganism survival in space aboard Gemini satellite, discussing lethal effects of solar radiation
01 p0018 A69-11087

Ionospheric and stratospheric UV radiation effects on survival of microorganisms
01 p0018 A69-11088

Soil, moisture and other requirements for microorganism survival in simulated Martian environment
01 p0018 A69-11091

Wolf Trap life detector design to sample and culture Martian surface dirt for microorganism growth
02 p0201 A69-11769

Spacecraft sterilization techniques for space exploration, discussing mathematical models for planetary quarantine and contamination by nonlanding vehicles
05 p0712 A69-15935

Modeling requirements and methods for monitoring microbial contamination, discussing vacuum probe sampler to recover microorganisms from large surface areas
05 p0713 A69-15948

Microorganism viability in rocket engine combustion environments used to determine probability of biological contamination of Mars by Voyager missions
05 p0714 A69-15949

Split-seam process for inserting sterile objects into isolated sterile environment without contamination as method for sterile spacecraft repair
05 p0714 A69-15950

Mars contamination with terrestrial microorganisms, considering possibility of waste materials ejection from manned orbital vehicles
05 p0714 A69-15951

Protein free diets effects on rat intestinal microflora, noting decrease in lactic acid bacteria and increase in spore forming bacteria
05 p0709 A69-16516

Amino acid biosynthesis control in microorganisms by end product/feedback/ inhibition of enzyme action
06 p0876 A69-18238

Vacuum, radiation and freeze drying effects on survival rate of microorganisms, noting influence of protective materials on extent of damage
07 p1064 A69-18943

Axial units with basal plates in spermatozoa of Chlidia groenlandica negatively stained with phosphotungstic acid, showing doublet microtubules
07 p1066 A69-19263

Aircraft design, fabrication and finish techniques taking into account aircraft integral fuel tank corrosion due to contaminants associated with microbiological debris [NACE PAPER 49]
08 p1320 A69-20599

Microorganism survival in space for exposure to solar UV radiation on balloons, rockets and satellites
11 p1828 A69-25457

Spacecraft sterilization requirements, evaluating viable organisms release probability from spacecraft as function of equipment fracturing
11 p1828 A69-25460

Microbial contamination release probability from solids fractured by impact, considering spacecraft sterilization requirements
11 p1828 A69-25461

Unicellular microorganisms size and concentration estimates based on light scattering measurements of suspensions in spectrophotometer cuvette compartment
11 p1829 A69-25643

Biochemiluminescent luminol-peroxide reaction to detect iron porphyrin proteins in microorganisms for extraterrestrial life search, discussing reaction kinetics
15 p2556 A69-31325

Dry heat destruction rates for microorganisms encapsulated in and on spacecraft hardware, concluding temperature and water conditions in spore as major factors
15 p2560 A69-31444

Gas environment effect on catabolic activities and enzymatic reactions of trachoma and meningopneumonitis agents of genus Chlamydia
16 p2747 A69-31865

Origin of microbial life on earth and implications for extraterrestrial forms
17 p2907 A69-32972

Protein free diets effects on rat intestinal microflora, noting decrease in lactic acid bacteria and increase in spore forming bacteria
18 p3096 A69-34735

Soviet book on cosmos and microorganism utilization for creating regenerative life support in spacecraft
20 p3467 A69-37230

Microorganisms death by exposure to high intensity visible and UV light, discussing effect of endogenous photosensitized oxidation on caratoid- containing Rhodoturla glutinus
20 p3475 A69-37613

Microbial contamination release from impact- fractured solids, examining bacterial spores growth in fractured methyl methacrylate plastic for application to space exploration
20 p3475 A69-37614

Space contamination by spacecraft-borne terrestrial microorganisms, testing vacuum effect on water desorption rate using mass spectrometry on various cells

20 p3475 A69-37615

Radiation effects on microorganisms and plants during space flight on Biosatellite 2 and Gemini 11 missions

20 p3476 A69-37617

Regenerative life support system development, considering synthesized organic compounds and microorganisms as foods for long duration space missions

20 p3477 A69-37623

Cell-like structures containing biochemicals as inevitable event under various hypothetical primitive earth conditions

23 p4085 A69-41479

MICROPARTICLES

Submicron particles spatial location in three dimensional volume detected by Fraunhofer holography

04 p0596 A69-14292

Satellite data for reevaluating extraterrestrial particles origin found in polar ice, atmosphere and terrestrial surface collections

04 p0654 A69-14655

Acidic, neutral and basic proteinoids thermal synthesis, discussing characterization and tendency to form microparticles

07 p1074 A69-18633

Micron and submicron particle cumulative flux upper limits in satellite micrometeoroid environment of Gemini 12

07 p1215 A69-18845

Thermochemically synthesized high melting micropowders grinding by vibrational method and classification for polishing and finishing applications

12 p2113 A69-26256

Composite materials consisting of brittle inorganic glass matrix with metallic or inorganic crystal microspheres, noting strength and elasticity

12 p2115 A69-26830

Thin foil penetration measurements for Fe microparticle impacts on metal and Mylar foils in space

15 p2641 A69-31339

Time dependent diffusion of light particles of Lorentz fluid approximated by Boltzmann equation leading to microscopic telegrapher equation

22 p3984 A69-40530

MICROPHOTOGRAPHS

Microholographic system for nonpseudoscopic stereoscopic image reconstruction of transparent and nontransparent microobjects

21 p3726 A69-39702

MICROPHOTOMETERS

U PHOTOMETERS

MICROPULSATIONS

NT GEOMAGNETIC MICROPULSATIONS

Acoustic waves pressure field micropulsations in turbulent fluid, analyzing space-time spectrum

09 p1492 A69-22710

Frequency time dispersion of storm sudden commencement micropulsations, noting polarization effects

14 p2440 A69-29129

Acoustic waves pressure field micropulsations in turbulent fluid, analyzing space-time spectrum

16 p2782 A69-32489

MICROROCKET ENGINES

Cesium electron bombardment microthruster system, discussing ion engine, feed, discharge neutralizer, power conditioning and control electronics

[AIAA PAPER 69-293] 09 p1561 A69-21223

Pulsed plasma microthruster propulsion system for synchronous orbit LES 6 satellite

[AIAA PAPER 69-298] 09 p1562 A69-21227

RF ion thrusters using self sustaining electrodeless discharge

[AIAA PAPER 69-285] 09 p1565 A69-21247

Cesium microthruster system using beam deflection for satellite control, describing ion engine subsystem and control logic/power conditioner subsystem

[AIAA PAPER 69-292] 09 p1569 A69-21875

Hollow cathode mercury electron bombardment thruster design, emphasizing low specific impulse operation and discharge chamber improvements

[AIAA PAPER 69-300] 09 p1569 A69-21880

Simulator for testing colloid microthruster, discussing spacecraft interfaces and time of flight thrust data

[AIAA PAPER 69-314] 09 p1478 A69-22380

Reaction control rocket engines for manned spacecraft, discussing operating and cycle life, thrust response, specific impulse and reliability

16 p2867 A69-31746

Microthrusters thrust requirements for attitude control and orbital transfer of gravity gradient geostationary satellite

17 p3019 A69-33336

Micropropulsion system with sublimable solid fuel for satellite attitude control, satisfying mechanical and thermal environmental conditions during launch and in space

17 p3021 A69-33359

Boundary layer formed in miniature nozzle studied for effect on jet spreading discharged into space at high Mach numbers

19 p3395 A69-36760

Valving concepts and functional approaches for inert gas attitude control thruster systems providing redundancy safeguards at minimum weight, volume and power costs

[AIAA PAPER 69-843] 21 p3786 A69-39373

MICROSCALES

U MICROBALANCES

MICROSCOPES

NT ELECTRON MICROSCOPES

NT ION MICROSCOPES

NT OPTICAL MICROSCOPES

Rapid recording microspectrophotometer for IR to UV absorption spectra of living cells, cell organelles and half micron diameter particles

03 p0428 A69-13109

Polarized light microscope for application to metallic crystallographic studies noting grain orientation, hcp grain basal pole orientation and etched fcc metals

09 p1499 A69-22302

Polishing-etching cell permitting continuous sample surface observation for use with inverted stage microscopes

13 p2281 A69-28156

MICROSCOPY

Electrical properties of edge and screw type dislocations in germanium, using bilateral microscopy

03 p0488 A69-13761

Lasers application to measurement techniques including alignment, direction, distance, elongation, interferometric, holographic, etc

12 p2094 A69-26903

MICROSPORES

Cytological analysis of *Tradescantia paludosa* microspores for space flight influence onboard Cosmos 110

01 p0018 A69-11317

MICROSTRUCTURE

NT METEORITIC MICROSTRUCTURES

NT WIDMANSTATTEN STRUCTURE

Structural transformations of quenched Fe-Ni-Nb austenitic alloy from X ray diffraction microstructure examination and hardness measurements

01 p0095 A69-10603

Microfacets of metal surface cracks studied for plastic deformation and atomic separation mechanisms by electron diffraction

01 p0098 A69-10763

Microstructure analysis and relationship between microvariations and macroscopic events, using magnetic variations recordings of IGY network

01 p0069 A69-11126

Mechanical finishing abrasion induced plastic deformation microwinning observed in thin stainless steel films by transmission electron microscopy

02 p0251 A69-11542

Isothermal sections construction of zirconium corner of ternary phase diagram of Zr-Mo-V system from microstructure of cast and quenched alloy specimens

02 p0262 A69-11846

Structure of zirconium corner of Zr-V-Ni system phase diagram, using metallography, hardness and microhardness methods

02 p0262 A69-11847

Zirconium corner of Zr-Cu-Mo phase diagram, using microstructure analysis of hardness and microhardness measurements, discussing plasticity variations and corrosion resistance

02 p0263 A69-11852

Solid solutions microstructure and electrical conductivity in InAs-CdS and InAs-CdS and InAs-CdSe systems

02 p0297 A69-11882

Hydroextrusion effect on Mo structure and mechanical properties, noting improved ductility after high temperature annealing

02 p0267 A69-12189

Molybdenum elasticity limit and rupturing stress dependence on structure for high temperature annealing, noting changes in solid solution interstitial impurity concentration

02 p0268 A69-12191

Ni-Cr-Ti-Al /Nimonic/ alloy single crystal mechanical properties at room temperature, determining importance of structure

02 p0268 A69-12192

Structural influence on superconductivity of niobium-titanium alloys, using electron microscopy and measurements of current density vs magnetic field strength

02 p0269 A69-12763

Fatigue mechanism in fcc metals at ultrasonic frequencies, comparing microstructural changes in copper and alpha-brass

04 p0613 A69-14448

Heat treatment and shot peening effects on Al alloy fatigue strength and fine crystallographic structure

04 p0614 A69-14576

Ferrite-austenitic stainless steels with Ti analyzed during aging at 450-600 C for steel phase nature

04 p0615 A69-14641

Structural microheterogeneities in monophase Ti alpha alloys, using complex phase analysis method

04 p0617 A69-14939

Alloying elements and cold rolling deformation effects on formation of texture in Ti alloys, noting inhomogeneity

04 p0617 A69-15077

Plastic deformation effect on structure, yield point and tensile strength of aged austenitic alloy containing Ni, Cr and Ti

04 p0618 A69-15177

Superconductors and living matter behavior, studying conditional parallelism via microstructure, cryogenic and electronic fundamentals

04 p0644 A69-15321

Molybdenum oxide crystals growth and microstructure, using X ray and electron diffraction analyses

05 p0779 A69-15831

Nickel structure alterations during interaction with high speed air flow at elevated temperatures

05 p0783 A69-16812

Metal matrix composites compression microstrain behavior, analyzing continuous fiber composites of magnesium-boron and copper-tungsten

06 p0939 A69-16945

Fatigue performance of composites consisting of W or Mo helical coils embedded in Cu matrix, discussing evaluation from microstructural behavior

06 p0940 A69-16951

Strain rate effect on structure and mechanical properties of rapidly stretched metals

06 p0941 A69-17122

Controlled microstructures of eutectic aluminum-copper aluminides produced for mechanical properties studies

06 p0942 A69-17227

Localized microstructural changes and fatigue crack propagation in cantilever type notched specimens of austenitic stainless steel under cyclic bending at constant load

06 p0943 A69-17237

Microstructure of diffusion zone during contact fusion in magnesium-nickel system at high temperatures

06 p0945 A69-17895

Microstructural changes during liquid phase sintering of alloys, considering temperature effect on carbide grain growth and activation energies

07 p1168 A69-19599

Microstructure relationship to tensile strength and creep resistance in Zn-Ni-Ti alloy extrusions, discussing role of finely dispersed intermetallic particles

08 p1329 A69-20002

Microstructural changes in 52100 steel bearing inner rings during cyclic stressing, obtaining thickening rate data on white-etching regions and lenticular carbides

08 p1319 A69-20004

Phase identification and microstructural effects of gaseous nitrogen reaction with binary Nb-Ti alloys at 1000 C

08 p1331 A69-20195

Binary vanadium alloys property change regularities using alloying elements

08 p1333 A69-20439

Microstructure for spinodal decomposition in Al-Zn alloys noting Zn precipitation, fracture mechanics, dislocations and transmission electron microscopy results

09 p1522 A69-21503

Brittleness and physical causes of cold shortness in Cr, discussing high purity metal formation and fine and superfine grain structures synthesis

09 p1526 A69-22147

Primary silicon crystals content and grain size effect on wear of high silicon aluminum alloys

09 p1526 A69-22281

Unidirectional filamentary composites thermoelastic properties relation to constituent materials properties, using semiempirical micromechanics theory

09 p1530 A69-22320

Gas turbine blade materials after long term service, analyzing tensile, impact and stress rupture properties and microstructure

[ASME PAPER 69-GT-12] 09 p1527 A69-22503

Microstructure and crystallography of lamellar eutectic alloy of Ni and intermetallic Ni-Ti compound

10 p1707 A69-22986

Microstructural analysis, determining junction orientation polarity effect on draw junction structure in GaSb crystals at room temperature

10 p1745 A69-23330

Nickel base wrought and cast superalloys examined to determine minor phases and microstructure thermal stability in high temperature heat treated condition

10 p1714 A69-23977

Chromium-rhenium-boron ternary system using X ray diffraction and microstructure analysis, establishing phase equilibria at high temperatures

10 p1715 A69-24054

Thermal and microstructural analyses to determine phase interactions nature in Mg alloys of Mg-Nd-Al system

11 p1902 A69-24271

Solid solution decomposition effect on binary Mg alloys recrystallization temperature containing Al and Nd, using X ray and microstructural analysis

11 p1902 A69-24272

Micropolar elasticity theory for materials exhibiting granular structure and microstructure, discussing deformation geometry and measurement, strain kinematics, microstrains, thermodynamics, etc

11 p1975 A69-24674

Electrical resistivity and magnetization saturation in cobalt alloys during formation of modulated structures

11 p1904 A69-24707

Temperature and stress dependence of microstrain and microyielding in polycrystalline W for range of impurities and dislocations, considering transition to macrostrain

11 p1905 A69-25183

Heat treatment effect on Ti-Mn alloy microstructure, discussing fcc martensite transformation into alpha, beta and intermediate phases as function of aging

11 p1906 A69-25578

Microscopic mechanisms in fracture surface markings, using electron fractography cleavage, fatigue, stress corrosion cracking, microvoid coalescence and tear ridge formation

13 p2274 A69-27224

Macroscopic crack extension force, critical flaw size and minimum fracture strength calculated from microscopic quantities

13 p2275 A69-27227

Microstructured mixtures theory including energy balance, mass and momentum equations and entropy production inequality for structured fluids in motion

13 p2371 A69-27318

Structural features of Fe-Ni massive martensite observed by light, electron and hot stage microscopies showing parallel block packet

13 p2276 A69-27401

Matrix grain size relation to dispersed particle size distribution and Zener-McLean equation description of microduplex structure in superplastic Ni-Fe-Cr alloy

13 p2278 A69-27411

Microstructural stability Fe-Ni base heat resistant alloy Pyromet 860 during long time creep-rupture testing

13 p2279 A69-27764

Polycrystalline Fe-Ni, Fe-Ni-Co ferrites structure, magnetostriction, magnetization curves and hysteresis prior and after thermomagnetic treatment

13 p2319 A69-27992

Metallographic study of microstructure recrystallization of 50 Ni-50 Fe alloy during annealing using special etchants and methods

13 p2281 A69-28155

Microstructure of light scattering media consisting of large size spherical particles

14 p2481 A69-28737

Double notch creep rupture tests of Cr-Mo steels, investigating changes in notch profile, dimensions and structure

[ASME PAPER 68-WA-MET-7] 14 p2464 A69-29441

Co base high temperature binary alloys microstructure, investigating diffusion coefficients, stacking faults, vacancies, etc

14 p2465 A69-29890

High temperature properties relationship to microstructure of Co base superalloys and strengthening methods

14 p2465 A69-29891

Time and temperature effects on corrosion and structure of Hastelloy alloy C-276

14 p2466 A69-29930

Shock hardening in Ni at high pressure observed by electron microscopy showing dominating thermal effects on microstructure

15 p2637 A69-30225

Heat treatment and shot peening effects on Al alloy fatigue strength and fine crystallographic structure

15 p2638 A69-30278

Friction effects on friction couples made of two different nonferrous alloys, discussing temperature regime difference effects on microgeometry and structure

15 p2629 A69-31027

Austenitic alloy structure and stress rupture after boron addition

17 p2985 A69-32908

Microstructural factors role in metal fracture toughness, considering effects of deformation processing and heat treatment, grain size, structural refinement, fibering, etc

17 p2988 A69-33552

Dynamic model of bodies with microstructure and nondissipative energy motion, discussing action steadiness, invariance conditions and Galilean relativity

17 p3067 A69-34149

Composite materials behavior studies for structural applications, using macroscopic and microscopic phenomenological approach

18 p3154 A69-34607

Micropolar liquid basic flows, considering case with coupling constant relating microstructure to macroscopic flow greater than viscosity coefficient

18 p3121 A69-34786

Solid solutions microstructure and electrical conductivity in InAs-CdS, InAs-CdSe systems

18 p3182 A69-35042

WC-Co alloys structural changes under loads near yield limit, noting formation of slip bands

18 p3158 A69-35261

Statistical description of microstructural elements /fibers and fillers/ in unidirectional fiberglass reinforced plastics determined in lattice nodes

18 p3163 A69-35363

Tempering time and temperature effect on microstructure, superconductivity, tensile strength and electrical conductivity of recrystallized Nb-Ti alloy

19 p3345 A69-36302

Continuous particle media on basis of microstructure, discussing granular media deformation, elastic media dilatation, turbulent flow and dilute suspensions

19 p3446 A69-36833

Processing variables influence on microstructure of extruded Ti-Al-Sn alloy, noting deformation by slip over temperature range

20 p3557 A69-36955

Alpha and alpha plus beta Ti alloys analyzed to relate phase composition and microstructure to stress corrosion cracking in NaCl solution

20 p3557 A69-36961

Microstructure and X ray structure compared for two and three component chromide, titanide and silicide diffusion layers on Nb, discussing phase composition

20 p3563 A69-37820

C content and microstructure effect on electrochemical parameters of Fe and steels in dilute sulfuric acid, discussing Tafel constants and current density

20 p3563 A69-38002

Polycrystalline nickel foil microstructure after explosive shock loading and heat treatments, using transmission electron microscopy

20 p3563 A69-38126

WC-Co alloys microstructure and microproperties, considering individual phase behavior and grain-solid solution interactions

20 p3564 A69-38246

Extrusion variables influence on microstructure and hardness level of Ti-Al-Sn compared with recrystallization behavior after cold swaging

[ASM PAPER W9-8.2] 21 p3729 A69-38660

Structural defects of neutron irradiated W wire noting microstress relaxation using atomionic microscope

21 p3749 A69-39623

Mn, S and rare earth additions influence on Inconel alloy weld microfissuring including material, hot ductility and tensile strength data

22 p3967 A69-39883

Photoelastic behavior in amorphous solids, proposing microstructural mechanism for deformation birefringence

22 p3972 A69-40081

Visual observation of meteor and train microstructure obtained by refractor

22 p4033 A69-41058

Hafnium microstructure and impurity concentrations before and after electron beam melting

23 p4178 A69-42361

Early Precambrian Onverwacht microstructures studied in petrographic thin sections and powdered preparations for possibility of oldest terrestrial fossils

24 p4263 A69-43221

Polycrystalline ceramics chemical and microstructural control through thermomechanical and thermochemical hot forming techniques, discussing pressure sintering, hot extrusion, strain annealing, etc

24 p4321 A69-43338

MICROTHRUST

Cesium contact ion microthruster experiment on-board ATS 4, measuring emission currents and spacecraft potentials

[AIAA PAPER 69-297] 09 p1561 A69-21218

Spacecraft trajectory using microthrust and lunar gravitational attraction for acceleration into heliocentric orbit

09 p1593 A69-21620

Geodetic satellites transfer between low ellipticity orbits by microthrust

21 p3793 A69-38338

Cs contact ion microthruster system design, fabrication and flight qualification, noting control logic/power conditioning unit and electronic packaging

[AIAA PAPER 68-552] 21 p3783 A69-39212

Cesium contact ion microthruster experiment on-board ATS 4, measuring emission currents and spacecraft potentials

[AIAA PAPER 69-297] 24 p4365 A69-43238

MICROTOMY

Z-micron sections removed from metal specimens by microtome for radiotracer study of mass dependence of self diffusion

19 p3313 A69-36490

MICROTOPOGRAPHY

U TERRAIN

MICROTRONS

Electron acceleration in microtron through injection from low pressure gas discharge plasma

08 p1279 A69-19803

MICROWAVE AMPLIFIERS

Microwave amplifier design with hybrid integrated circuits of thin film lumped elements, noting gain and efficiency of transistor circuits

01 p0039 A69-10190

Microwave transistor amplifier computerized design, discussing wide bandwidth and flat in-band gain response optimization on high dielectric substrates

01 p0404 A69-10194

Energy source specifications and control techniques evaluated for microwave amplifier arrays, discussing use of common power supply and energy storage bank

01 p0447 A69-10998

Punch-through microwave negative resistance diode explained and contrasted with similar Read and Shockley structures

02 p0215 A69-11938

Additive noise measurement in microwave power amplifiers under continuous wave and pulsed conditions

02 p0221 A69-12454

Low noise microwave amplifiers for radio astronomy and satellite communications receiving system preamplification

03 p0402 A69-13017

Electroacoustic amplifier based phonon devices, using surface waves on piezoelectric materials to speed radar data real time processing

03 p0394 A69-13353

Microwave generation and amplification, noting microwave transit time tubes, semiconductor devices and methods utilizing quantum electronic effects to generate and amplify EHF oscillations

03 p0395 A69-13611

Maser model of single mode field coupled to N identical two level atoms, deriving threshold, stable and unstable steady states, relaxation oscillations, etc

03 p0441 A69-14108

SNR analysis at amplifier output with AGC, noting increase with signal strength

05 p0729 A69-16085

Log-periodic circuits for application to microwave amplifiers in antenna design, noting bandwidth

05 p0739 A69-16554

- Microwave and optical generation and amplification - Conference, Hamburg, September 1968
07 p1090 A69-18420
- High power microwave oscillator/carpitron/ for pure or FM signal amplification, noting low output noise level
07 p1096 A69-18437
- Microwave oscillation and amplification in long bulk GaAs with barium titanate sheets on surface due to differential negative resistance across terminals
07 p1197 A69-18452
- High efficiency punch-through avalanche transit time diode for generating microwaves over three octaves
07 p1098 A69-18457
- Tunnel diode amplifiers for amplifying weak microwave signals, discussing low noise wideband preamplifier for communication satellites
07 p1099 A69-18464
- Sideband amplification via saturated gas resonance in 258 GHz reflection amplifier with hydrogen cyanide, gas filled cylindrical cavity
07 p1145 A69-18479
- Microwave amplification using silicon diodes in avalanche resonance pumped modes
08 p1279 A69-19909
- Multichannel microwave amplifier at L band frequencies, using several amplifiers in parallel
09 p1466 A69-22446
- Transmit-receive device noise contribution effect on receiving system noise factor for device insertion immediately before low noise microwave amplifier
09 p1469 A69-22605
- Microwave avalanche diode oscillators performance estimates, discussing operation modes and transit time
10 p1665 A69-23873
- Computerized design techniques for microwave components using diodes, detailing X band parametric amplifier
10 p1661 A69-23874
- Microwave amplifiers and receivers noise performance factors measurement noting thermal noise, definitions of noise temperatures and noise figure, noise generators, etc
11 p1840 A69-25301
- Integrated tunnel diode amplifiers, discussing low noise, bandwidth, reliability, miniaturization and applications
11 p1854 A69-25611
- Ultrawideband DC transistor amplifier for pulsed switching circuits with subnanosecond risetimes, discussing multistages with feedback dipoles, transient response and drift problems
11 p1854 A69-25612
- Thin film lumped passive elements for microwave power amplifier integrated circuits, discussing distributed reactances, element size and fabrication, etc
11 p1856 A69-25654
- Transmission type E saki diode amplifier with stabilizing dielectric loaded rectangular waveguide
13 p2233 A69-28067
- Negative resistance amplifier with stabilizing resistor in compensating circuit for operation in microwave duct mismatched beyond amplifier passband range
15 p2573 A69-30118
- Traveling wave tube amplifier for wideband radio in SHF range containing periodically integrated magnetized system, discussing output power variation range
16 p2759 A69-31863
- Gunn effect applied to digital electronics, discussing diode characteristics, microwave amplifier design, pattern recognition, analog- numerical conversion, etc
19 p3285 A69-36708
- Microwave oscillations amplification in bulk GaAs, discussing experimental verification of small signal theory
21 p3781 A69-39127
- Solid state SHF transmission amplifiers design using rectangular waveguides and biased bulk GaAs
21 p3683 A69-39452
- Amplifrons use as broadband microwave amplifiers in high power radar systems with frequency agility, involving modified high vacuum tube modulator and modulator circuit
23 p4135 A69-41384
- Constant beamwidth antenna consisting of parabolic reflector and ridge loaded horn, noting conical scan tracking antenna application
02 p0218 A69-12325
- Wave measurements of normal electric field and tangential magnetic field over microwave disk antenna surfaces
02 p0219 A69-12342
- Dual band shunt slot linear array for S and X band radiation patterns generated from single aperture
02 p0219 A69-12344
- Cosmic microwave background radiation measurement, discussing measurement techniques for antenna temperature at microwave frequencies
02 p0210 A69-12431
- High gain self steering repeater for multibeam microwave array system for earth-satellite communications
04 p0573 A69-14330
- Earth effect on signal correlation in space diversity microwave reception antennas, analyzing vertical separation and out of phase signals
05 p0720 A69-16530
- Antennas with any mean surface, prescribed feeder and radiation pattern synthesized by microwave holography
05 p0734 A69-16574
- Microwave antennas simulation by optical systems based on Huygens-Kirchhoff approximation, noting application to antenna analysis, synthesis and radiation patterns
05 p0736 A69-16780
- Optical simulation of microwave antennas with variable profile reflectors, investigating radiation patterns by photometric scanning of photographs obtained with He-Ne laser
05 p0736 A69-16781
- Bounds on electric field outside radiating system determined for application to UHF and VHF systems design, considering microwave breakdown
08 p1273 A69-20026
- Pressure formed parabolic reflectors for millimeter waves, discussing electrical measurements at 30 GHz
08 p1282 A69-20039
- Microwave antennas optical simulation, discussing given phase amplitude distribution problems
09 p1469 A69-22625
- Small microwave antenna calibration by method of two black bodies exposed to different temperatures, reducing influence of cloudiness and humidity
11 p1844 A69-24450
- Vertical parabolic antenna array and receiving system for S band transhorizon signal phase and amplitude measurement
11 p1851 A69-24987
- Complete electric field of idealized infinite slot antenna with uniform excitation in infinite conducting plane
11 p1851 A69-24994
- High gain self steering microwave repeater for earth-satellite communications noting design, performance and results of color TV transmissions
11 p1839 A69-25294
- Microwave antenna testing on small indoor ranges, discussing reflectors and feeds for generation of approximately uniform plane waves for antenna illumination
11 p1852 A69-25314
- Electronically scanned and fixed multiple beam phased arrays for spaceborne microwave radiometric sensors
12 p2044 A69-26977
- Input impedance measurement of radiating symmetrical HF and microwave antennas, using solid state oscillator for feeding
14 p2420 A69-29394
- Wideband frequency switch to connect narrow band auxiliary to wideband radio system antenna, describing components
16 p2759 A69-31861
- Earth effect on signal correlation in space diversity microwave reception antennas, analyzing vertical separation and out of phase signals
16 p2753 A69-32472
- Horn antenna with parabolic reflector for 30 cm wavelength, calculating field distribution, main and side lobe radiation patterns and aperture efficiency
17 p2937 A69-33147
- Double aperture problem with partially coherent incident field, noting application to microwave antenna-reflector combination
17 p2929 A69-33877
- Monopulse parabolic antenna radiator design for decimeter and meter wavelengths, discussing characteristic properties at optimal dimensions
17 p2939 A69-33905
- Radio interferometry for suppressing background variance between microwave radiometer antenna and random terrestrial background
20 p3506 A69-37712
- Space erectable microwave truss antenna automatically deploying rigid parabolic reflector
22 p3913 A69-40696
- Omnidirectional microwave parallel plate waveguide fed antenna design for flush mounted broadband spacecraft, noting equatorial and polar patterns
22 p3913 A69-40697
- Focus broadening by astigmatism of large microwave parabolic antennas, discussing large span surface deformations caused by astigmatic aberration
23 p4140 A69-42188

MICROWAVE ATTENUATION

- Microwave absorption and series resistance of silicon mesa parametric amplifier diodes, discussing p-n junction and dielectric loss mechanism
05 p0732 A69-16347
- Collisionally induced microwave absorption by non-polar gases, discussing dimer absorption
06 p0962 A69-17816
- Microwave absorption and scattering by atmospheric precipitation as function of temperature and water droplet size
06 p0954 A69-17997
- Radio emission and microwave absorption spectrum dependence on physical properties of clouds in millimeter and centimeter wavelength range
06 p0954 A69-17998
- Pulsar distance estimates based on evaluation of galactic H absorption of 21 cm radiation
06 p1012 A69-18225
- Microwave absorption by free carriers in c domain barium titanate crystals inserted in waveguide during polarization reversal
08 p1374 A69-21189
- Ferromagnetic composite materials for microwave absorption and shielding over frequency band 0.3 to 10.0 GHz
09 p1510 A69-22352
- Spatial density distribution and local values of attenuation of pulsed reflex discharge plasma determined from measured attenuation of microwave beam
13 p2312 A69-28112
- Microwave propagation in Venusian atmosphere, analyzing refraction angles, attenuation and field strength fluctuations
13 p2223 A69-28567
- Magnetoelastic resonant interaction of microwave longitudinal phonons propagating at right angles to magnetic bias applied to YIG rod axis
15 p2565 A69-30184
- Nonresonant absorption and dispersion of microwaves by gases, studying gaseous mixtures, relaxation parameters, anomalous dispersion and temperature effects
15 p2654 A69-31219
- Waveguide capacitive screw tuners effects on dissipative loss, discussing microwave measurements with copper screw tuners
16 p2757 A69-31586
- Microwave power loss and semiconductor conductivity relationship measured for carrier lifetime and mobility, noting nonlinearity and accuracy
16 p2825 A69-31617
- Solid fuel propulsion systems for tactical rockets design, discussing microwave attenuation, acceleration-combustion interactions and performance optimization
16 p2836 A69-31998
- Precipitation intensity measurements, obtaining distribution parameters from radar reflectivity at two wavelengths and microwave attenuation factor at third wavelength
16 p2806 A69-32265
- Attenuation statistics due to rain measured on earth-space path at 16 and 30 GHz, using sun as signal source
17 p2920 A69-33398
- Microwave absorption by free carriers in c domain barium titanate crystals inserted in waveguide during polarization reversal
18 p3183 A69-35158
- Mathematical model of nonlinear microwave breakdown for overdense and underdense plasma outside reentry vehicle, predicting nonlinear pulse transmission through high temperature plasma
20 p3495 A69-37853

MICROWAVE ANTENNAS
NT HORN ANTENNAS
NT LENS ANTENNAS
NT SLOT ANTENNAS

Phase, frequency and amplitude scanning, noting array design and applications

01 p0049 A69-11348

Microwave absorption by Ar plasma of positive column discharge in waveguide under inhomogeneous magnetic field

21 p3778 A69-39547

Microwave absorption by biological materials, noting energy distribution between reflected, transmitted and absorbed radiation as function of medium physical properties

24 p4270 A69-42574

Air density determination using transit time method involving microwave phase measurements

24 p4313 A69-42898

MICROWAVE CIRCUITS

Performance characteristics of microstrip ferrite devices for hybrid microwave integrated circuit systems, including meander line phasers and YIG elements

01 p0040 A69-10191

Thin ferrite use in microwave integrated circuits including phase shifters, latching circulators, isolators and phase and amplitude modulators

01 p0040 A69-10192

Diode structure optimization for monolithic integrated circuit for Ku-band reflective phase shifter

01 p0040 A69-10195

Gallium arsenide single crystal epitaxy with doping/concentrations into semiinsulating microwave circuits

01 p0040 A69-10196

Hybrid microstrip integrated microwave circuits, discussing substrate and conductor materials and fabrication processes

01 p0040 A69-10199

Energy source specifications and control techniques evaluated for microwave amplifier arrays, discussing use of common power supply and energy storage bank

01 p0047 A69-10998

Fundamental microwave oscillations at high frequencies in GaAs epitaxial sandwich layers, using space charge growth control

02 p0297 A69-11941

Thermal noise from passive linear multiports, noting influence of temperature and absorption coefficients

02 p0211 A69-12443

Matrix representation of linear active two port noise figures and charts in terms of power wave variables

02 p0211 A69-12444

Circulator power splitting and isolating function in integrated microwave network

02 p0222 A69-12475

Circuit properties of microwave dielectric resonators, discussing mode identification, resonant frequencies, coupling control, loaded Q, frequency tuning and periodic arrays

04 p0575 A69-14750

Equivalent generator approach to facilitate scattering matrix analysis of complicated microwave circuit

04 p0582 A69-14755

Equivalent circuit for parallel conductor array based on array capacitance matrix

04 p0576 A69-14756

Hybrid loop properties determination using quadrupole algebra, noting frequency dependence of input impedance and voltage transmission

04 p0582 A69-15072

Equipment for minimum cost laboratory for thin and thick film hybrid circuits

04 p0559 A69-15198

Loss factors effects on substrate choice in production of microwave printed circuit components

04 p0578 A69-15199

General theorem of isotropic microwave waveguide junction ports imposed by reflection symmetry

06 p0893 A69-16935

Beam modulation resynchronization at large signal levels by TWT circuit wave to enhance efficiency

07 p1094 A69-18423

Traveling wave amplifiers beam defocusing by RF circuits and space charge fields under large signal operating conditions, discussing magnetic field strength

07 p1094 A69-18424

Integration forms suitable for fabrication of hybrid and monolithic microwave integrated circuits

07 p1096 A69-18441

Monolithic HF circuits stability in TV and HF devices noting need for appropriate amplifiers

07 p1103 A69-18883

Y-circulators specified, measured and calculated values correlated as function of leakage matrix elements and terminating dipoles reflection

09 p1473 A69-22114

Microwave techniques for bondline defects and thickness of reentry elastomeric heat shield material bonded to titanium alloy

09 p1499 A69-22306

Frequency conversion in microwave crystal mixer with EMF amplitude fluctuations in heterodyne

09 p1469 A69-22644

Computer program for analysis of linear microwave multiport circuit by means scattering matrix equivalent

11 p1858 A69-24572

Fabrication procedure for microwave epitaxial GaAs diodes applicable for switching purposes

12 p2035 A69-25831

Microstripline circuit for stabilizing oscillating frequency of Gunn diodes prepared with GaAs slices

12 p2036 A69-25924

Tunnel diode nonlinear p-n junction capacitance influence on characteristics of diode microwave self excited oscillator

12 p2043 A69-26889

Microstrip circulator size reduction attained by tight inductive ferrite coupling for incorporation with microwave integrated circuits

13 p2230 A69-27679

Solid state radar feasibility, discussing circuit components, circuit design problems involving striplines and monoblocks, phase controlled antenna, solid state computers, etc

13 p2230 A69-27928

TEM mode networks design for producing phase coherent pulse modulated microwave signals through spectrum S band

13 p2234 A69-28073

Spatial harmonic spectrum and tangential field distributions in microwave devices showing separation of higher harmonics through delay structure

13 p2236 A69-28576

Microwave dispersion systems, using waveguide loaded with dielectric material to obtain group linear frequency delay characteristic

14 p2412 A69-29395

SHF solid state phased array radar with Gunn effect modular microwave IC design, discussing air and ground applications

14 p2420 A69-29435

Waveguide below cut-off resonators for active microwave circuits, describing experiments with avalanche and Gunn diodes

15 p2577 A69-30613

Stripline microwave integrated circuits in terms of building blocks and components, discussing hybrids, backward wave coupler, balanced modulators and mixers, etc

15 p2579 A69-31075

Hybrid coupled low power digital microwave phase shifters design, discussing lumped element L-C and variable C shifter theories, power limitations and construction techniques

15 p2580 A69-31076

Broadband microwave double balanced mixer/modulators, discussing bandwidth, conversion loss, noise figure, intermodulation and power dissipation

15 p2580 A69-31077

Crystallographic classes of ferrites for microwave devices, discussing magnetic properties, applications and work on polycrystalline yttrium-calcium iron-vanadium-indium garnet

15 p2670 A69-31208

Disk and transmission line microstrip resonators radiation, measuring fractional amount of radiated power

16 p2760 A69-31946

Book on physics of microwave semiconductor diodes covering p-n junction theory and device characteristics and applications

21 p3682 A69-38990

Hybrid microwave IC assembly techniques, discussing active devices connection to substrate with thick or thin film metallizations

22 p3912 A69-40068

Microwave integrated circuit applications to reflective and transmissive phased arrays, discussing radar system elements

24 p4286 A69-43109

MICROWAVE COUPLING

NT COUPLING CIRCUITS

Plasma waveguide properties during high intensity electromagnetic wave propagation, discussing microwave waveguide coupling

03 p0482 A69-14228

Toroidal gas discharge in waveguide by coupling of microwave power into gas to heat gas, noting plasma confinement

[IMPI PAPER A4]

04 p0636 A69-14999

Coupled cavity short slit delay lines in high power traveling wave tubes

07 p1095 A69-18428

Design of coupled cavity extended interaction output resonators for klystron amplifiers

07 p1095 A69-18431

Microwave directional filter using ring resonator and couplers to obtain low transmission loss and center frequency tuning

13 p2226 A69-27187

Microwave propagation in coupled pairs of microstrip transmission lines for integrated circuit design, discussing dielectric Green function

13 p2229 A69-27672

Power coupling among modes in semiconductor lasers in presence of spontaneous or forced microwave modulation of population inversion

15 p2634 A69-30875

Approximate solution for coupled microstrip transmission lines in integrated circuits, discussing impedance, capacitance and testing

15 p2580 A69-31078

MICROWAVE EQUIPMENT

NT BACKWARD WAVE TUBES

NT CARCINOTRONS

NT CATHODE RAY TUBES

NT COLD CATHODE TUBES

NT GAS DISCHARGE TUBES

NT GYRATORS

NT THYRATRONS

NT TRAVELING WAVE TUBES

NT VIDICONS

Microwave applications of monolithic and hybrid semiconductor circuit technologies, considering cost and performance

01 p0039 A69-10188

X band mixer with reactively terminated image, using gallium arsenide barrier diodes and microwave integrated circuit techniques

01 p0039 A69-10189

Digital loaded-line phase shift networks for microwave thin film applications, emphasizing design equations

01 p0040 A69-10198

Bulk effect germanium hot-carrier microwave modulator for Q band, reducing required applied voltages by using short length semiconductor ships

01 p0043 A69-10563

Microwave carrier graycode analog to digital converter capable of 1200 megabits per second

01 p0044 A69-10627

Output power of Gunn effect microwave diode using equal area analysis and Fourier transforms

01 p0049 A69-11195

Microwave frequency multipliers for radio relay systems based on VHF transistors and varactor diodes

02 p0216 A69-12097

Miniaturized X band IMPATT microstrip power sources based on Si avalanche transit time diodes integrated with microstrip oscillator circuits

02 p0216 A69-12146

Dispersive two port components for application to microwave pulse compression, coupling YIG crystal magnetoelastic spin wave mode to acoustic transducer

02 p0217 A69-12149

Weak signal interaction between electron beam and microwave resonators, obtaining electron conductance, gain and transfer admittance

02 p0208 A69-12265

Microwave transistor noise figure, power gain and noise measure as function of source admittance and source reflection coefficient in L and S bands

02 p0219 A69-12427

Microwave thermal noise standards, discussing construction, calibration and errors for field operational liquid nitrogen cooled waveguide noise standard

02 p0210 A69-12438

Noise generation and propagation in linear N cascaded mismatched two port networks, noting application to microwave measurements in low noise technology

02 p0211 A69-12445

Low temperature microwave thermal noise standard, discussing waveguide termination, cryogenic cooling and temperature and pressure controls
02 p0211 A69-12446

Cavity stabilization of microwave oscillator for noise reduction
02 p0220 A69-12451

Microwave oscillator AM and FM noise measurement using Schottky barrier diode detector, discriminator, storage oscilloscope and wave analyzer
02 p0220 A69-12453

Microwave measurements of AM and FM noise spectra with video frequency and RF coverage flexibility and high sensitivity
02 p0221 A69-12455

Amplitude noise spectra of X band microwave oscillators with Si avalanche diodes, noting various contributions and dependence on circuit and operating parameters
02 p0221 A69-12456

Probability density function measurement for microwave noise generator
02 p0221 A69-12459

Voltage probability density of wideband microwave noise, discussing measurement technique of dividing spectrum down by noise bandwidth
02 p0211 A69-12460

AM/PM noise conversion in solid state FM microwave signal sources, relating baseband noise power contribution to PM baseband noise power
02 p0212 A69-12462

Gunn effect in bulk GaAs, noting microwave oscillator applications
03 p0484 A69-13292

Holographic and microwave technology relationship, noting side-looking radar photos and X band radiation
03 p0430 A69-13354

Electrically controlled broadband microwave phase shifter consisting of coaxial line with varactors or ferroelectrics
03 p0408 A69-13987

Bandpass characteristic for wide instantaneous bandwidth microwave components for phased arrays, noting error effect on compressed signal and time delay design
04 p0571 A69-14318

Semiconductor microwave phase shifters for electronic steering of phased array radar antennas noting cost, reliability and properties of steerable antennas
04 p0572 A69-14319

Absolute rotation in space measured with microwave rotation sensor using polarization of electromagnetic wave
04 p0573 A69-14342

Waveguide arc location by sound ranging to determine RF breakdown onset in high power microwave system, describing experiment determining feasibility
04 p0576 A69-14762

Microwave power applications to propulsion, noting spacecraft launching, aircraft takeoff thrust assistance and power transmission in space
[IMPI PAPER D2] 04 p0647 A69-15000

Microwave diodes on GaAs base, determining basic parameters and effects on crystal formation and device construction
05 p0730 A69-16222

Equivalent circuit for microwave point diode noting waveform calculations, frequency dependent elements and recovery phenomena
05 p0735 A69-16605

Measurement methods at IF and baseband sections of microwave links, calculating noise superimposed on each swept measurement curve
05 p0722 A69-16728

Microwave generator of FM oscillations using two reflex klystrons and modified by wideband regenerative amplifier to minimize intrinsic AM
05 p0736 A69-16791

Radar detector for survivors, using inexpensive microwave mixer detector crystal
06 p0878 A69-16964

Noise generation mechanism of Read microwave avalanche diode under large signal conditions
06 p0895 A69-17472

High accuracy microwave phase standard for calibration laboratories, discussing broadband differential phase shifter
06 p0896 A69-17487

Automatic compensation of unwanted signal level fluctuation in measuring setups including microwave generators and detectors
06 p0903 A69-17489

Acoustical and microwave holography obviating need for real or simulated reference wave, using recording time for reference
06 p0928 A69-17902

Microwave and optical generation and amplification - Conference, Hamburg, September 1968
07 p1090 A69-18420

Microwave semiconductor devices, discussing performance trends in detectors, tunnel diodes, mixers, varactors, transistors and Gunn effect devices
07 p1096 A69-18440

IMPATT diode microwave oscillator, discussing large signal characterization and model for efficiency dependence on load conductance and admittance plane characteristics
07 p1101 A69-18650

Quenched multiple domain mode oscillations in GaAs microwave diodes noting relationships between efficiency, power output, negative resistance and bias voltage
08 p1282 A69-20107

Microwave converters structural characteristics, calculating noise figure
08 p1285 A69-20594

Microwave power and low noise transistors, noting continuous wave output and circuit design
09 p1462 A69-21407

Microwave silicon technology applied to fabrication of high gain high efficiency transistor
09 p1462 A69-21410

Microwave solid state power sources including transistors, varactor harmonic generator chains, tunnel diodes, avalanche transit time devices, etc
10 p1662 A69-23144

Computerized design techniques for microwave components using diodes, detailing X band parametric amplifier
10 p1661 A69-23874

Microwave amplifiers and receivers noise performance factors measurement noting thermal noise, definitions of noise temperatures and noise figure, noise generators, etc
11 p1840 A69-25301

P-n-p planar epitaxial germanium microwave transistor used as amplifier in 1-4 GHz range and as high speed switch, summarizing design, fabrication and characterization
12 p2037 A69-25940

Dielectric properties of high loss nonmagnetic microwave materials used for waveguide absorbers and anechoic chamber linings
12 p2079 A69-26047

Transmission and reflection scattering coefficient measurements of microwave networks by Fourier analysis of transient response to impulsive or steplike waveforms
12 p2038 A69-26056

Varactor diode parameters measurements by microwave power reflection method
13 p2327 A69-28645

Avalanche diodes as high power pulsed microwave sources, noting power yields and efficiencies
14 p2418 A69-28890

Noise reduction techniques using injection phase locking and high-Q cavities for HF oscillator high order multiplier and avalanche diode oscillator microwave sources
14 p2420 A69-29458

Communication satellite frequency and time divisions multiple access problem, detailing microwave multiplexers design
14 p2417 A69-29688

Design and electrical features of microwave measurement system for solid state spectroscopy, discussing waveguides, signal source, detector, etc
15 p2610 A69-30709

Microwave hologram construction and image reconstruction by laser beam, analyzing results by matrix expression
15 p2610 A69-30802

Linearly tapered transmission line equation and transfer matrix parameters, considering input impedances and microwave application
16 p2749 A69-31582

Dual channel waveguide insertion loss test set for calibrations at 90 GHz in radio astronomy and communication systems, using sprayed thermistor mount
16 p2760 A69-31945

Microwave scanning beam landing guidance system for Swedish tactical aircraft Saab 37 Viggen, reviewing ground station and onboard equipment
16 p2735 A69-32057

Soviet book on avalanche transit time diodes and applications in microwave technology, describing p-n

junction model, negative resistance, dynamic characteristics, synchronized oscillators, etc
16 p2761 A69-32109

Solar radio bursts polarization measured with microwave correlation polarimeter, noting output recording rate
18 p3188 A69-35213

Gunn effect and devices effective use for specific purposes and as components of microwave systems
18 p3183 A69-35263

Microwave equipment reliability considered in terms of various subsystems and components, showing carefully formulated and executed test program as essential
19 p3282 A69-35785

Lasers and maser devices in radio quantum electronics, discussing optical parametric and microwave devices including transistors, diodes, magnetrons, etc
19 p3284 A69-36433

Low noise microwave devices performance and price, discussing transistor and tunnel diode amplifiers, traveling wave tubes and price reductions via manufacturing methods
20 p3504 A69-36913

Equivalent circuit for microwave cavity containing active GaAs device applied to waveguide and radial mode cavity design
20 p3508 A69-37900

X ray emission from high voltage microwave devices during high velocity electron braking measured using X ray sensitive film with superimposed aluminum scale
21 p3664 A69-39059

Germanium microwave backward diodes optimum design and performance prediction through computer calculation for important parameters
22 p3916 A69-41224

Collection of papers on microwaves covering phasers and time delay elements, mm waveguides application to railroad communications and mode conversions
23 p4135 A69-41352

Electronically controlled microwave phasers and time delay elements design and operation, discussing beam width, steering and effects, directivity and planar arrays
23 p4135 A69-41353

Transient processes in microwave quadrupoles with ferrite resonators
23 p4139 A69-41948

Helicopter powering and positioning by CW microwave beam, describing antenna and sensor arrays, feasibility experiments, system applications, etc
23 p4063 A69-42534

High intensity electromagnetic fields generation equipment for calibrating field intensity monitors, discussing anechoic chamber, transmitting antenna, etc
24 p4312 A69-42577

MICROWAVE FILTERS

Microwave selective filter using resonant cavity with single coupling component in feedback circuit of amplifier traveling wave tube or klystron
01 p0042 A69-10384

Tunable ferrimagnetic bandpass filter using magic T configuration to permit low magnetic field strength and retain nonstacked configuration advantages
04 p0573 A69-14343

High Q magnetically tunable microwave filters using magnetodynamic modes in ferrite spheres
06 p0892 A69-16831

Cut-off coupled microwave bandpass filters for use in dielectric filled waveguide systems
09 p1466 A69-22447

Filter circuits for stabilization of solid state microwave devices, noting input matching characteristics
11 p1849 A69-24961

Magnetically selective microwave filters using magnetodynamic natural oscillations in premagnetized ferrite sphere at cavity center
11 p1855 A69-25626

Microwave filters with lumped capacitances and coupled waveguides derived by frequency conversion from lumped filters circuits
11 p1855 A69-25628

Transmission characteristics of narrow band microwave bandpass filters with power cascade and Chebyshev behavior
11 p1857 A69-25677

Synchronized microwave harmonic energy generation by filtering using DC step source feeding modified pulse forming network
12 p2041 A69-26630

Microwave directional filter using ring resonator and couplers to obtain low transmission loss and center frequency tuning
13 p2226 A69-27187

Microwave filters for canonical realization of non-minimum phase transfer functions, combining magic-T or hybrid junction with ladder structure network
13 p2228 A69-27668

Tunable band stop filter realization from characteristic equation solution for propagation modes by magnetized ferrite slab placed in rectangular waveguide
14 p2422 A69-29751

Microwave filter tailored for frequency response in L through S band regions for high range resolution radar receiver
14 p2423 A69-29759

Stepped digital narrow band bandpass microwave elliptic function filters design and construction
16 p2759 A69-31939

Microwave bandpass linear phase filters design and synthesis for simultaneous flat amplitude and delay response
16 p2759 A69-31941

Mode filters for oversized rectangular waveguides, considering resistive sheet with complex surface impedance
16 p2760 A69-31948

Waveguide band filter with reflecting ferrite resonators and frequency matched loads for improved microwave SNR
23 p4139 A69-41945

Microwave bandpass step filters, listing structural dimensions and design parameters
23 p4139 A69-41947

Noise elimination by filtering in high power microwave transmitters, noting practical design tradeoffs
23 p4142 A69-42235

MICROWAVE FREQUENCIES

NT C BAND

NT EXTREMELY HIGH FREQUENCIES

NT SUPERHIGH FREQUENCIES

Microwave second harmonic, sum and difference frequencies generation for two different microwaves normally incident on low temperature semiconductor slab in DC field
01 p0137 A69-10334

Multifrequency three layer sandwich radomes design for reflectionless sandwich at second frequency
01 p0034 A69-11037

Fundamental microwave oscillations at high frequencies in GaAs epitaxial sandwich layers, using space charge growth control
02 p0297 A69-11941

Tunnel breakdown in p-n junctions used to generate microwave oscillations, discussing Si and Ge properties
03 p0492 A69-14163

Free carrier Faraday effect in piezoelectric semiconductors investigated for microwave frequencies, low temperatures, mixed deformation potential and piezoelectric scattering
04 p0643 A69-15201

Wideband microwave KDP light modulator for amplitude and phase modulation, using ring-plane traveling wave circuit
05 p0732 A69-16553

Microwave oscillations during interaction between electron beam and plasma in electron tube
07 p1189 A69-18504

Harmonic generation in microwave gas discharge in pure and air mixed gases, noting rare gases failure in power source applications
08 p1283 A69-20177

Mode designation and propagation characteristics of dielectric tube waveguide, noting practicability at higher microwave frequencies
08 p1284 A69-20296

Galactic and intergalactic ionic fine structure transitions effect on background microwave radiation intensity
09 p1590 A69-21445

Theta pinch plasma microwave emission from electrodeless inductive discharge at low pressures recorded at near plasma frequencies
09 p1549 A69-22017

Nonthermal plasma emission from cold cathode PIG discharge plasma, noting wide spectrum of electron cyclotron frequency harmonics
09 p1549 A69-22018

Stochastic model of electron cyclotron heating, calculating energy gain during transit of magnetic mirror field in presence of microwave electric field
09 p1551 A69-22038

Phase synchronized oscillators in microwave frequency multipliers with improved SNR
09 p1464 A69-22113

Slowly varying component height for microwave radio emission during IQSY, noting magnetic field changing strength effect
09 p1598 A69-22176

Soft magnetic materials, ferrites and magnetic particle composites as two layer laminates for shielding in audio and microwave frequencies
09 p1500 A69-22310

Microwave frequency room temperature acoustic surface wave propagation losses in lithium niobate measured by laser light deflection, discussing propagation and insertion losses
10 p1703 A69-23511

Microwave magnetoelastic wave propagation in ferromagnet subjected to pulsed magnetic field using coupled mode approach
10 p1746 A69-23655

Error analysis in conversion of two port scattering parameters used in microwave transistor characterization
11 p1852 A69-25200

Microwave oscillations amplitude spatial distribution in gas discharge plasma excited by electron beam
11 p1933 A69-25542

Storage varactors and frequency dependent diode input power for multiplier cascades control, discussing series connections and limitations by thermal noise
11 p1841 A69-25607

Varactor diodes for microwave frequency tuning of resonators used for oscillators of avalanche transit time and Gunn diodes, discussing Q factors
11 p1854 A69-25610

Resonators made of YIG single crystals exhibiting lowest linewidth in ferromagnetic resonance at microwave frequencies
11 p1855 A69-25627

Upconverter with gain and stabilized frequency, using sideband locking of IMPATT diode oscillator
12 p2036 A69-25909

Microwave modulation of GaAs injection laser radiation, using Zaleskii recording method and liquid nitrogen to cool laser diode
12 p2105 A69-26031

Precision measuring instrument for negative conductance of active element at microwave region
12 p2038 A69-26054

Microwave frequency synthesizer for digitally tuned UHF and microwave superheterodyne receivers, considering phase locking voltage-tuned transistor oscillator
12 p2030 A69-26390

Substituted lithium ferrites analyzed to obtain materials with small initial magnetic losses at different microwave ranges
13 p2320 A69-28000

Microwave measurement methods, discussing uses of digital computers and sampling techniques
13 p2223 A69-28605

Microwave oscillations in low pressure arc noting long gas discharge in small transverse dimensions
14 p2489 A69-28739

Passive remote sensing at microwave frequencies for meteorology, oceanography and geology, reviewing physics of wave interactions, mathematics of data interpretation, etc
14 p2414 A69-29514

Microwave brightness temperatures for downward viewing over open seas from above atmosphere, using tropospheric model containing homogeneous layer clouds
14 p2415 A69-29515

Plasma surface HF harmonic oscillations amplitude determined by comparing side frequencies intensities of reflected microwave signal
14 p2497 A69-29794

Shields frequency ranges analysis to determine frequencies and parameters for electrostatic and magnetostatic modes transition to electromagnetic and microwave modes
15 p2562 A69-30120

CdS films vacuum deposited on optically polished single crystals used for converting microwave radio signals into hypersonic waves
15 p2575 A69-30236

Frequency effects on Gunn oscillator modulation sensitivity, discussing microwave-frequency deviation and diode impedance
15 p2577 A69-30614

Complex refractive index profiles and wave polarizations calculated for electromagnetic waves transmission through ionosphere at micropulsation frequencies
17 p2927 A69-33864

MICROWAVE INTERFEROMETERS

Artificial plasma properties at microwave frequencies, determining plasma electron density and effects on horn antenna radiation characteristics
18 p3100 A69-34271

Occurrence frequency distributions at microwave frequencies as function of peak intensity and directivities of solar bursts
18 p3187 A69-34969

Electro-optical crystals resonance modulator for coherent light beams and microwave frequencies, describing application to multichannel TV transmission system
19 p3266 A69-35763

Microwave holograms generated by spinning dipole field perturbation technique, showing zone plates and moire fringe resolution
19 p3315 A69-36824

Josephson frequency-voltage relation at microwave and far IR frequencies compared, using radiation induced steps
20 p3583 A69-37418

Sensitivity improvement for inertialess microwave signal scanning and readout by applying pulse compression concepts, discussing application to real time microwave imaging and holography
20 p3545 A69-37901

Microwave frequency measuring instruments design solutions for electric measurements reduction to length measurement
21 p3720 A69-38563

Daily simultaneous solar measurements of microwave atmospheric absorption and emission to determine frequency correlation between meteorological phenomena and atmospheric parameters
21 p3718 A69-39747

Solar microwave flux density during solar activity cycle tabulated, noting discrepancies in absolute flux levels
22 p4001 A69-39987

Molecular collision pumping mechanism for anomalous microwave absorption by formaldehyde rotational transition in Galaxy dust cloud
22 p4029 A69-40768

Parametric losses in nonlinear centrosymmetrical ferroelectric ceramic in strong microwave field at temperatures above Curie point
22 p3996 A69-41164

Human body responses to microwave irradiation, discussing thermal and nonthermal effects and damage to eyes and to information storage in living systems
23 p4111 A69-42216

Space vehicle multibeam Cassegrain antenna system design meeting radiometric mapping requirements in microwave frequency range, discussing mounting, degrees of freedom, etc
23 p4143 A69-42527

RF and microwave signal variable delay and processing using laser-acoustic interactions, photodetector and electrical-to-acoustical transducer
24 p4283 A69-43027

MICROWAVE INTERFEROMETERS

Electron density measurement technique for dense thick steady state plasmas using swept microwave interferometer
02 p0290 A69-12349

Flight inspection positioning system, discussing microwave interferometer angle calibration for instrument landing
03 p0430 A69-13680

Microwave Fabry-Perot resonator for anisotropic plasma diagnostics in presence of static magnetic field
04 p0635 A69-14757

Double microwave interferometer for measuring hydrogen plasma decay
04 p0600 A69-15024

Argon plasma characteristics calculated from 8 mm interferometer data, interpreting transmission coefficients of dielectric film with permittivity gradient
07 p1194 A69-19324

Fast response microwave interferometers classification and construction principles
09 p1496 A69-22028

Microwave interferometer circuits errors, considering interferometers with phase detector, logic counting circuits, frequency conversion and amplitude modulation
09 p1496 A69-22029

Time dependent plasma density variations studies by microwave interferometer having reflector for modulated or nonmodulated microwaves
09 p1496 A69-22030

Refraction errors in plasma density measurement by microwave interferometry
09 p1496 A69-22031

Radio sources angular dimensions determined by microwave interferometry, discussing distinctions between quasars, galaxies and unidentified sources
12 p2166 A69-27039

Plasma microwave interferometry error due to refraction and beam displacement at receiving antenna aperture
13 p2312 A69-28113

Microwave interferometer with digital-logic elements for phase shift measurements in pulsed plasmas without frequency range limitations
14 p2452 A69-29802

Earth based microwave data revealed isothermal layer in extrapolating Venus atmospheric profile below region probed by Mariner 5 and Venera 4
16 p2852 A69-31553

Venus brightness and polarization distributions measurement at centimeter wavelengths using two element interferometer, suggesting Venus atmosphere as main source of radiation
18 p3191 A69-34302

MICROWAVE OSCILLATORS

Microwave oscillations amplification in bulk GaAs, discussing experimental verification of small signal theory
21 p3781 A69-39127

Superconducting cavity X band oscillator designed for study of stability and spectral purity dependence on temperature
21 p3683 A69-39453

Design and performance of microwave open resonators with diffraction grating in mirror, describing Q factor calculation
23 p4139 A69-42045

MICROWAVE PLASMA PROBES

Plasma density dynamic measurements by Fabry-Perot microwave resonator, discussing resonator and coupling problems
01 p0080 A69-10318

Electron radial distribution determination in positive Hg plasma column using simultaneous measurements with two different microwave cavities
02 p0290 A69-12404

Procedure and apparatus for integral microwave and X ray and spectral measurements of quasi-steady plasma radiation
03 p0473 A69-12897

Electron distribution function effect on microwave emission and HF conductivity of weakly ionized discharge plasma
05 p0799 A69-15734

Time resolved measurements, microwave interferometer and pulsed double probe for studying collision dominated plasma expansion in inductive HF He discharge
05 p0804 A69-16535

Microwave spectrum of n-InSb avalanche plasmas under magnetic field, considering dynamic current-voltage characteristics, hole wave instabilities and microwave emission processes
07 p1197 A69-18466

Epithelial microwave radiation from plasma produced by PIG Reflex in magnetic field with mirror geometry, discussing radiation at harmonics of electron cyclotron frequency
08 p1370 A69-21019

Microwave interferometer circuits errors, considering interferometers with phase detector, logic counting circuits, frequency conversion and amplitude modulation
09 p1496 A69-22029

Time dependent plasma density variations studies by microwave interferometer having reflector for modulated or nonmodulated microwaves
09 p1496 A69-22030

Plasma microwave diagnostics by multifrequency probes in geometric optics approximation, assuming inhomogeneous and semiinfinite plasmas with sharp boundaries and nonunity permittivities
11 p1926 A69-24602

Microwave analysis of plasmas produced by laser beam on aluminum spheres, noting expansion velocity and electron density
11 p1930 A69-25287

Soviet book on microwave methods of plasma investigation based on electromagnetic wave interaction, covering microwave probes and plasma radiation
12 p2139 A69-27073

Spatial density distribution and local values of attenuation of pulsed reflex discharge plasma determined from measured attenuation of microwave beam
13 p2312 A69-28112

Plasma microwave interferometry error due to refraction and beam displacement at receiving antenna aperture
13 p2312 A69-28113

Spatial distribution of plasma density from phase shift measurement in millimeter waves based on microwave multichannel probes
14 p2497 A69-29792

Optical image diffraction method for analyzing radiation patterns of horn antenna sounding beams used in microwave measurement of expanding plasmoids
14 p2497 A69-29793

Three channel microwave FM phase meter for studying plasma electron concentrations directional distribution without interferences between channels
14 p2497 A69-29799

FM homodyne phase meter with klystron oscillator for measuring plasma electron concentration, giving block diagrams of meter, detector and oscillator
14 p2451 A69-29800

Direct phase measuring and measured phase compensating microwave devices designed for plasma diagnostics applications
14 p2452 A69-29804

Phase measurements at IF in microwave plasma diagnostics, examining phase stabilization processes
14 p2452 A69-29805

Plasma microwave measurement error allowance for multiple reflection of waves from vacuum chambers dielectric walls
14 p2498 A69-29806

Passive electric microwave probe with balancing capacitance for studying waveguide fields at high microwave power levels in radiative plasma accelerators
14 p2498 A69-29807

Electronic density of collisional cesium plasma, comparing measurements made by Langmuir and HF spherical probes
15 p2659 A69-30300

Microwave-plasma interaction instrumentation for supersonic channel constructed to investigate turbulent boundary layers formed over ablating heat shield materials
19 p3294 A69-35754

Laser radiation power and electron concentration in He-Ne plasma measured by microwave diagnostics
22 p3964 A69-40794

MICROWAVE PROBES

Barium plasma density measurements by Langmuir, microwave probes and resonance fluorescence scattering compared in Q device
02 p0288 A69-12172

Microwave holographic reconstruction of metal objects inside purse by nonscanning method, visualizing microwave field by polaroid and liquid-crystal techniques
07 p1135 A69-19449

Frequency shift and Q change of microwave cavity caused by lossy dielectrics and plasmas, examining perturbing volume requirements for conductor behavior
09 p1544 A69-21323

Hyperbolic EM microwave field used for contactless measurements of parabolic antenna surfaces
19 p3281 A69-35766

Microwave refraction method for satellite horizontal probing of earth atmosphere, discussing phase delay data inversion, air density and intersatellite relative velocity
21 p3671 A69-38376

MICROWAVE RADIATION U MICROWAVES

MICROWAVE RADIOMETERS

3.3 mm radiometer long integration time performance and output noise spectral distribution
02 p0220 A69-12433

Radome material insertion loss measurement by radiometric method noting error analysis
02 p0251 A69-12434

Microwave radiometer with two reference temperatures, discussing overall stability of design, sensitivity and airborne design for operation in X band [DVL-895]
02 p0220 A69-12435

X band radiometer to minimize errors in calibration of microwave noise sources
02 p0220 A69-12440

Broadband null balancing microwave scanning radiometer using diode in feedback loop as reference noise source
02 p0221 A69-12457

Two dimensional electronically scanned k-band phased array antenna design and performance, discussing radiometric system
04 p0572 A69-14328

Microwave radiometer for measuring mesosphere and stratosphere temperature as function of altitude using atmospheric oxygen line
06 p0924 A69-17247

Atmospheric water vapor content determination from microwave radiation measurements and satellite aircraft
06 p0953 A69-17996

Atmospheric microwave radiation and sensitivity of airborne radiometric sounding in water and moisture contents determination
06 p0954 A69-18001

Shock layer microwave radiation measurements during reentry flight of spherical nose cone, determining effective plasma temperature [AIAA PAPER 69-183]
06 p0865 A69-18201

Satellite and aircraft radiation measurements in cm and mm wavelength range to provide information on underlying surfaces
07 p1130 A69-18257

Cutaneous receptor response to microwave irradiation, measuring warmth sensory effects in human forehead with radiometer [AGARDOGRAPH-111]
08 p1266 A69-20677

Hertzian radiometric antennas and signal processing techniques for aerial mapping project for sun
08 p1290 A69-20976

Microwave radiometric sensor operational principles and capabilities, discussing antennas and radiometric receivers
12 p2033 A69-26976

Electronically scanned and fixed multiple beam phased arrays for spaceborne microwave radiometric sensors
12 p2044 A69-26977

Microwave radiometric brightness temperature relationship to soil moisture content for estimating bearing strength
12 p2099 A69-27008

Radar radiometer by adding radar to scanning microwave radiometer, discussing applications to spacecraft measurement of oceanic winds, waves and precipitation
14 p2421 A69-29528

Periodic stellar radiation at 3.5 mm from pulsar CP1919 measured by paraboloid antenna and radiometer
14 p2529 A69-29978

Directional couplers design considerations for use in microwave power meters, analyzing directivity and mismatch effect on system error
19 p3282 A69-35826

Radiometer for 4 cm wavelength range with receiver circuit incorporating tunnel and parametric HF amplifiers, describing design and operation including subunits
21 p3724 A69-39076

Airborne microwave radiometric measurements of simulated ocean surface under various conditions, suggesting possible wind velocity measurement by satellite
21 p3726 A69-39750

Clear air turbulence detection in troposphere by multifrequency radiometric sensor, noting multibeam system for supersonic aircraft
23 p4144 A69-42536

Electron energy measurement accuracy in carbon dioxide laser plasma by S band radiometer
24 p4327 A69-42613

MICROWAVE REFLECTOMETERS

Elastic scattering of electrons from argon atoms in argon air plasmas by shock tube microwave reflection method, measuring power reflection coefficient [AIAA PAPER 68-138]
04 p0632 A69-14701

Swept frequency microwave measurements in simulated reentry environments using dielectric layers, glow discharge plasma and aperture antenna-plasma layer model [AIAA PAPER 69-701]
17 p2920 A69-33461

Microwave reflection technique for transient and quiescent electrical conductivity of Si, noting nonohmic contacts
22 p3997 A69-41226

Swept frequency X band reflectometer for measuring antenna properties in simulated reentry environments [AAS PAPER 69-282]
24 p4313 A69-42861

MICROWAVE RESONANCE

Electron cyclotron harmonic waves in magnetoplasma irradiated by external microwaves
01 p0127 A69-10335

Resonant frequencies and fields in circular cylindrical microwave cavity containing cold uniform magnetoplasma dielectric

06 p0968 A69-17763

Traveling wave microwave and optical resonators synthesis, determining design conditions for resonant frequencies

07 p1145 A69-18477

Microwave resonator characteristics, deriving expressions for Q for pure or coupled electric or magnetic modes

09 p1464 A69-22096

Varactor diodes for microwave frequency tuning of resonators used for oscillators of avalanche transit time and Gunn diodes, discussing Q factors

11 p1854 A69-25610

Electromagnetic fields in cylindrically symmetrical microwave resonator filled with premagnetized ferrite along cylinder axis

11 p1855 A69-25625

Resonance method determining spurious modes excitation in natural mode converter, discussing construction, application and mathematical correlation

11 p1856 A69-25630

Lumped element construction technique involving crossed coils to reduce ferrite produced heat in resonance isolators, using substituted YIG

11 p1856 A69-25632

Dielectric loss tangents measurements combining coherent optical resonator with microwave techniques, noting application at mm wavelengths

12 p2080 A69-26057

Microwave and LF oscillations interactions in plasma beam system, showing oscillation amplitude dependence on frequency relationships

13 p2312 A69-28111

Microwave cavity bandwidth determined from reflection coefficient measurements, considering reflection magnitude and phase

13 p2223 A69-28606

IR radiation detection by photoconductor in microwave resonator noting electric field influence

13 p2223 A69-28639

X band open resonator terminated by step-rimmed flat mirrors, discussing rim effect on Fabry-Perot diffraction loss

14 p2424 A69-29765

Helicon wave dimensional resonance in n-InSb plasma waveguides at different wavelengths relative to wall thickness

19 p3383 A69-36479

MICROWAVE SCATTERING

Enhanced microwave scattering by plasma instability in magnetic field, using microwave interferometer with horn antenna system

06 p0967 A69-17717

Collection of Soviet papers on microwave radiation transport in atmosphere covering radiation field, water vapor content determination, absorption and scattering by precipitation, etc

06 p0953 A69-17994

Microwave absorption and scattering by atmospheric precipitation as function of temperature and water droplet size

06 p0954 A69-17997

Microwave scattering by turbulent plasma column noting effects of plasma density

07 p1194 A69-19411

Microwave scattering from longitudinal plasma waves propagating in collisionless plasma column

08 p1276 A69-20798

Active microwave scattering antenna arrays at super-high frequencies, noting low bias power requirement

08 p1290 A69-20975

Raman microwave scattering with low frequency oscillations caused by plasma drift instabilities

09 p1550 A69-22021

Electron concentration at front of anisotropic plasma expanding in axial direction in electrodeless induction discharge from measurements of reflected microwaves

09 p1550 A69-22027

Limits in applicability of earth equivalent radius to measuring microwave diffraction field in atmosphere

09 p1456 A69-22284

Troposphere effects on millimeter wave radio astronomy measurements, discussing solar noise fluctuations due to clouds and precipitation

13 p2223 A69-28607

Nonresonant absorption and dispersion of microwaves by gases, studying gaseous mixtures, relaxation parameters, anomalous dispersion and temperature effects

15 p2654 A69-31219

Microwave reflection and noise emission from cylindrical rare gas afterglow plasmas in axial magnetic field measured near electron cyclotron resonance

18 p3127 A69-34436

Microwave background angular fluctuations investigated for relationship between whirl motion velocity and temperature dispersion, noting role of scattering by moving plasma

18 p3188 A69-35208

Numerical procedure obtaining scattering matrix of passive reciprocal two port from standing wave measurements, using image circle in Smith chart

24 p4281 A69-42617

MICROWAVE SPECTRA

Microwave and far IR molecular rotational absorption spectra investigated for measuring concentrations of reacting molecular and atomic species in hypersonic projectile wakes

01 p0006 A69-10961

Microwave spectra of peak flux of solar radio bursts of March and July 1966, relating plage regions to spectral characteristics

01 p0069 A69-11121

Water molecules radio spectral lines from microwave emission sources in Galaxy studied for variability, size and polarization

09 p1587 A69-21307

Surface dielectric constant and microwave opacity of Venus atmosphere as function of wavelength determined by radar observations

12 p2153 A69-25805

Venus brightness temperatures vs phase angle to define spectra of day and night face at short wavelengths, using model atmosphere

12 p2153 A69-25806

Frequency spectra of radio galaxies, supernova remnants and quasars observed by radio telescope operating in decimeter wave range

12 p2167 A69-27041

Quasar spectra changes observed from 1962 to 1966 including flux density and antenna temperature for 3C 279 at cm wavelengths

12 p2167 A69-27043

Lambda-doublet radiation from excited state of interstellar OH detected at 5 cm wavelength

13 p2335 A69-27312

Millimeter and submillimeter microwave spectrometric studies of high temperature plasmas and noise emission, discussing instrumentation and absolute measurements

14 p2451 A69-29786

Unsuccessful attempt to observe high charge ion lines generated by dielectronic recombination in solar corona at 5-cm wavelength

15 p2689 A69-30568

Design and electrical features of microwave measurement system for solid state spectroscopy, discussing waveguides, signal source, detector, etc

15 p2610 A69-30709

Absorption coefficient in three microwave lines of O with different rotational quantum numbers calculated, examining Zeeman effect in geomagnetic field

15 p2597 A69-30941

Venus microwave spectrum analyzed by comparing various thermal and nonthermal emission models, discussing surface temperature and atmospheric composition

16 p2853 A69-31597

Lambda doublet maser emission from excited OH rotational level, discussing conditions necessary for microwave radiation

18 p3185 A69-34292

Microwave thermal emission by water measured from aircraft, studying radiation dependence on surface roughness

18 p3127 A69-34421

Solar microwave emission heliographic distribution during pronounced geomagnetic recurrence, noting brightness temperature nonuniformity due to coronal depression through polytrope models for solar wind

18 p3188 A69-35396

Quantum transitions between molecular or atomic energy levels noting microwave spectroscopy utilization

18 p3099 A69-35405

Water vapor microwave emission measurement from galactic hydroxyl sources

18 p3205 A69-35435

Solar microwave emission relationship to geomagnetic activity, analyzing statistically source intensity and model of coronal condensation associated with sunspots based on electron densities

20 p3589 A69-37557

Coupled Fabry-Perot interferometer for microwave spectra with improved selectivity of interference filter

22 p3947 A69-40800

Rotational spectra of methylchlorodiazirine at room and dry ice temperature, using K band and Stark effect spectrometers

23 p4194 A69-42207

Observational cosmology developments with radio and X ray astronomy emphasizing existence, origin, effects and anisotropy of excess microwave background

23 p4219 A69-42327

Single frequency microwave solar bursts correlation with flares and associated active regions based on spectral grouping

24 p4372 A69-43616

Rotational microwave spectrum of 2-methylfuran, using fourth order perturbation method for internal rotation A-E doublet splittings

24 p4280 A69-43811

MICROWAVE SWITCHING

S band thyatron waveguide switch as pretriggered megawatt balanced duplexer

01 p0048 A69-11035

Control signal correction in microwave ferrite modulators, eliminating losses due to screening effect of feeder

13 p2226 A69-27216

Ultrahigh speed microwave diode switch used as transmitter-modulator in PCM systems, utilizing varactor diode avalanche breakdown

13 p2229 A69-27671

High power ferrite latching switch with forced air cooling, discussing nonreciprocal phase shifter materials and configurations

13 p2229 A69-27674

Microwave tunnel diode switch design noting applications to information storage

15 p2574 A69-30132

Wideband frequency switch to connect narrow band auxiliary to wideband radio system antenna, describing components

16 p2759 A69-31861

Distributed communications for earth orbiting global satellite network defined parametrically, describing relay/switching and terminal station satellites

23 p4130 A69-42515

S-band pin-diode switch for high CW power satellite and deep space probe communication, using multiple quarter-wave transformers to stepdown diode impedance

23 p4143 A69-42518

MICROWAVE TRANSMISSION

NT MANDELSTAM REPRESENTATION

Dielectric surface coatings effect on transmission and loss properties of silicon-microstrip microwave transmission lines

01 p0041 A69-10201

Microwave signal nonlinear interaction in isotropic positive column

01 p0127 A69-10282

Microwave second harmonic, sum and difference frequencies generation for two different microwaves normally incident on low temperature semiconductor slab in DC field

01 p0137 A69-10334

Worldwide navigation system consisting of synchronous satellites equipped with pulse modulated microwave transmitters [UN PAPER 68-95205]

01 p0113 A69-10514

Influence of winds aloft on fading rate of microwaves propagated beyond horizon

01 p0030 A69-10566

First normal modes characteristics and lateral wave in weak dielectric layer applicable to microwave propagation

01 p0033 A69-10975

Mean error rates in microwave PCM systems with wave distortion due to multipath propagation

02 p0208 A69-12307

Mismatched errors associated with Y factor power ratio measurement effect on microwave noise-temperature calibrations [JPL-TR-32-1345]

02 p0211 A69-12442

Mutual RF interference between satellite and terrestrial telecommunications microwave relay system at shared frequencies

03 p0392 A69-13242

Wavelength dependence of microwave propagation beyond radio horizon

03 p0395 A69-13626

Relation between satellite data concerning thermal microwave radiation and meteorological conditions in

lower atmosphere for possible use in weather forecasting
06 p0953 A69-17995

Complex microwave incremental conductivity of InSb at 77 K in steady electric field using displaced Maxwellian distribution function
07 p1200 A69-19447

Thermal noise and other disturbances from mismatched two port isolator in low power microwave transmission antenna noise between generators and leads
07 p1108 A69-19486

Plasma waveguide parameter changes due to additional gas ionization from microwave field
07 p1196 A69-19750

Ionospheric and tropospheric effects on microwave propagation including Faraday rotation, atmospheric refraction, attenuation and noise
08 p1272 A69-19958

Complex microwave transmission coefficient of nominal cut-off plasma for several different types of electron distribution, noting discharge characteristics for cut-off
08 p1366 A69-20759

Nonohmic microwave conductivity in semiconductor posts in rectangular waveguide, measuring incident, transmitted and reflected microwave powers
08 p1373 A69-20859

Sensitivity of microwave earth stations for analog and digital communications
09 p1453 A69-21409

Multipath fading reduction on line of sight microwave radio relay links by dual space diversity, noting effects of vertical antenna separation, frequency, etc
[IEEE PAPER 68-TP-350-COM]
10 p1656 A69-23535

Space and carrier frequency diversity determination for mutually interfering microwave radio equipments
11 p1835 A69-24952

Wave propagation in 11.7-12.7 GHz range studied for application to TV transmission, describing emitter, omnidirectional antenna and receiving station
11 p1841 A69-25637

Fresnel dragging effect on 3 cm microwaves by electron gas drift in low pressure glow discharge, noting electron density and excitation modes
12 p2133 A69-25766

Transmission and reflection scattering coefficient measurements of microwave networks by Fourier analysis of transient response to impulsive or steplike waveforms
12 p2038 A69-26056

Internal guiding of microwaves by elevated tropospheric layer noting refractive index, radius of curvature and attenuation
12 p2032 A69-26856

Circular polarization of solar microwave radio emission in Southern and Northern Hemispheres due to solar magnetic field
13 p2326 A69-27550

Microwave propagation in coupled pairs of microstrip transmission lines for integrated circuit design, discussing dielectric Green function
13 p2229 A69-27672

Applied magnetic field effects on longitudinally magnetized reciprocal ferrite phase shifters, showing shift type dependence on guide electrical thickness
13 p2229 A69-27673

Microwave propagation in Venusian atmosphere, analyzing refraction angles, attenuation and field strength fluctuations
13 p2223 A69-28567

Multipath resolution of tropospheric scatter medium by incorporating Rake instrumentation into tropospheric transhorizon microwave experiments
14 p2448 A69-29524

Elastic microwaves propagation attenuation along lithium niobate crystals trigonal axis at various temperatures
15 p2665 A69-30040

Microwave strip transmission line, discussing evolutionary improvements, computerized design, materials, semiconductors, packaging, reliability, etc
15 p2721 A69-31074

Broadband low VSWR transitions between rectangular waveguides and coaxial transmission lines, discussing asymmetrical probe and ridge types
16 p2757 A69-31584

Noise levels due to long range tropospheric transmission calculated for microwave radio systems
17 p2919 A69-33146

Microwave propagation inside hollow cylinder using model plasma as dielectric, deriving relationship between phase shift and free electron density
17 p2932 A69-34218

Microwave application in determining atmosphere meteorological characteristics compared with visual and IR wavelength measurements
20 p3569 A69-36984

Microwave power transmission to high or low altitude balloon systems for stationkeeping, describing flexible diode array rectifier antenna
22 p3870 A69-40809

Carpitron locked oscillator with wide electronic tuning range, describing CW operation characteristics and application to ground station microwave transmitters
23 p4135 A69-41302

Periodic ladder type design delay equalizer for linear delay characteristics in millimeter waveguide systems
23 p4135 A69-41361

Intersatellite microwave laser communication system for ATS-F and ATS-G, discussing experiment, functional design and parameters
23 p4120 A69-41758

NT THYRATRONS

NT TRAVELING WAVE TUBES

NT VIDICONS

Transit time and anomalous modes of oscillation in high pulsed power punch-through Si avalanche diode microwave oscillators
02 p0216 A69-12145

High power microwave interactions in pulsed electron beam plasma klystron
07 p1095 A69-18433

C band waveguide window for average power transmission featuring relatively small biconcave dielectric disk
07 p1096 A69-18435

High power microwave oscillator/carpitron/ for pure or FM signal amplification, noting low output noise level
07 p1096 A69-18437

Convergent high-perveance electron gun design for use in microwave tubes, reducing anode aperture effect on current density
07 p1101 A69-18658

Periodic electrostatic focusing structures in microwave tubes, evaluating properties by action function method
07 p1102 A69-18659

Microwave oscillator design employing avalanche transit time diodes
07 p1107 A69-19155

Barkhausen oscillator for LF domain by substituting Cs and K positive ions for electrons, giving oscillation curves and spectral analysis
08 p1280 A69-19981

Microwave tube development, discussing cold cathodes, ferrite and semiconductor integration into tubes, tube failure physics, etc
11 p1847 A69-24745

Microwave breakdown dependence on elevated gas temperature in electric arc shock tube, considering air, nitrogen and argon
16 p2749 A69-31693

Pulse-to-pulse carrier frequency stability of microwave radar transmitter tube for fixed target suppression
20 p3485 A69-36943

Triode with emitter controlled negative resistance of GaAs as oscillator for microwave applications
22 p3911 A69-40010

MICROWAVES

NT MILLIMETER WAVES

Roughness effect on microwave emissivity according to geometric optics with application to moon and Venus
02 p0207 A69-12017

Venus microwave phase effect analyzed assuming dry massive Venus atmospheric model, discussing heat transfer processes
02 p0319 A69-12108

Magnetoclastic coupling constant b measured by propagating microwave signals in pure and substituted YIG
02 p0299 A69-12243

Compact high-gain chromium doped rutile traveling wave masers for Onsala radio telescope for galactic and extragalactic microwave emission studies
02 p0257 A69-12463

Natural microwave radiation generation and propagation and wideband signal detection in problems connected with radio wave propagation, geophysics, radiometeorology and plasma physics
03 p0420 A69-12919

Microwave energy generation with solid state equipment, noting Gunn effect diodes, avalanche diodes and limited space charge accumulation/LSA/ devices
03 p0402 A69-12971

Generation of UHF space charge waves by nonlinear interaction of two microwave signals in magnetoplasma, predicting optical mixing
03 p0475 A69-13146

Pressure induced microwave absorption in molecular N for various temperatures, determining dielectric loss, absorptivity and quadrupole moment
03 p0472 A69-13317

Reduction of optical breakdown threshold in laser focus by superimposed microwave field
03 p0441 A69-13997

Single punch through silicon avalanche diode structure and two distinct modes of oscillation making possible pulsed generation of microwaves
04 p0573 A69-14334

Microwave excited argon discharge emission spectrum analysis, suggesting possible laser action in microwave discharges
04 p0609 A69-14346

Power and time characteristics of He-Ne laser pumped by microwave pulses
04 p0610 A69-14423

Model for predicting characteristics of short duration intense microwave pulse propagating in heated high temperature air
04 p0634 A69-14453

Microwave power applications to propulsion, noting spacecraft launching, aircraft takeoff thrust assistance and power transmission in space
[IMPI PAPER D2]
04 p0647 A69-15000

High efficiency microwave oscillations in Si p-n and p-n-p positive avalanche diodes under pulsed conditions
04 p0580 A69-15491

Polarization enhancements in solar microwave radiation, noting correlation with other solar events and geophysical effects
05 p0813 A69-15761

Nonlinear optics, discussing frequency mixing, induced changes in dielectric constant and parametric amplification in microwave region of spectrum
05 p0772 A69-16229

Jupiter microwave radiation flux density at 81 MHz, noting spectrum of microwave emission
05 p0827 A69-16506

Antennas with any mean surface, prescribed feeder and radiation pattern synthesized by microwave holography
05 p0734 A69-16574

Domain oscillations removal in n-type gallium arsenides by externally applied microwave field, noting doping effect on LSA conversion efficiency
07 p1196 A69-18446

Dependence of microwave emission from n-InSb on crystalline orientations, noting anisotropy in case of rotation in perpendicular plane
07 p1198 A69-18647

Dynamics of pulsed microwave breakdown in nonuniform field at waveguide fed mica aperture, noting electric field distribution change due to initial plasma configuration
07 p1107 A69-19448

Water in interstellar regions detected by microwave emission from 6 sub 16 to 5 sub 23 rotational transition
08 p1383 A69-19896

Microwave plasma diagnostics, discussing electromagnetic radiation and wave propagation measurements
08 p1316 A69-20470

Microwave radiation effects on body weight and peripheral blood hemograms of mice, discussing maximum safe exposure related to generator output
08 p1266 A69-20678

Cosmic microwave background variations produced by nonthermal gravitational radiation, imposing limits on equivalent mass density

08 p1398 A69-20773

Passivated metal semiconductor IMPATT diode for microwave CW oscillation

08 p1286 A69-20862

Microwaves from celestial objects noting radio emission from sun, moon and Jupiter, cosmic fireball and pulsars

08 p1407 A69-21125

Correlated microwave and energetic X ray emission from solar flare with 16-sec periodic pulsations, discussing energy during modulation peaks

09 p1574 A69-21457

Anomalous mode avalanche diodes for pulse power generation noting output, efficiency, mode of operation, microwave oscillations and IMPATT diodes

09 p1466 A69-22455

Increased energy losses and microwave emission at cyclotron frequency harmonics during plasma electron heating at cut-off plasma concentrations in magnetic trap

10 p1728 A69-23130

Pulsed and CW microwave power effects on rabbit eyes, noting lens opacities produced

10 p1648 A69-23185

Limitations of N-port concept in microwave technology, proposing definitions to avoid contradictions

11 p1841 A69-25624

Reflection and absorption characteristics of two dimensional array of magnetic dipoles for microwaves, considering element orientation and distribution

12 p2035 A69-25901

Liquid crystals for photographically recording microwave holograms, noting impossibility of three dimensional image reconstruction with side-looking radar zone plates

12 p2079 A69-25917

Microwave harmonic generation in plasma capacitor, considering power resonances dependence on electron temperature and density

12 p2037 A69-25939

Mismatch correction in microwave power measurements based on directional coupler techniques

12 p2038 A69-26055

Microwave background radiation by intense sources studied by homogeneous and isotropic Friedmann and steady state models

13 p2339 A69-27574

Microwaves - IEEE Conference, Detroit, May 1968

13 p2228 A69-27667

Nonlinear generation of sum and difference frequencies in ionized plasma current densities by nonuniform microwave fields noting electron scattering

14 p2507 A69-29350

Periodic stellar radiation at 3.5 mm from pulsar CP1919 measured by paraboloid antenna and radiometer

14 p2529 A69-29978

Electron temperature relaxation in shock heated Ar plasma, measuring plasma microwave radiation

15 p2663 A69-30995

Microwave field-plasma slab nonlinear interaction in rectangular waveguide, analyzing current and electron density and second harmonic TE and TM power

16 p2749 A69-31703

Solar microwave radiation burst of 29 October 1968 from active region behind west limb

16 p2865 A69-32811

Microwave holography for antenna synthesis, radiation patterns and visible images reconstruction

17 p2976 A69-33891

Microwave background anisotropy induced by gravitational effects interpreted using spatially flat Friedmann model for substratum

18 p3190 A69-34286

Remote sensing by electromagnetic waves in microwave region, describing differences between microwave and optical sensing

20 p3493 A69-37741

Microwave elastic propagation in single crystal specimen of yttrium-iron-garnet ferrite, discussing attenuation

21 p3780 A69-38774

Temperature fluctuations in microwave background radiation from primeval perturbations compared with perturbations from discrete radio sources

21 p3815 A69-39611

Microwave power coupling to high density plasmas for electrons heating, using dielectric plates

21 p3779 A69-39746

Methyl alcohol, ether and acetone vapors decomposition in microwave discharge, obtaining H and CO in addition to solid polymeric films

22 p3895 A69-40103

Microwave radiation hazard data from experimental animals and surveys on humans, considering nonthermal effects, genetic and neurological effects, etc [MPI PAPER DA-6]

22 p3889 A69-40104

Microwave background radiation in steady state cosmological model, attempting interpretation as discrete extragalactic radio sources population

22 p4029 A69-40765

Radio and microwaves biological effects, discussing differences between U.S. and Soviet assessments of radiation hazards

23 p4099 A69-42516

Microwave radiation effects on biological systems, discussing categories according to radiation protection guide /RPG/ numbers, tissue properties and interactions

24 p4270 A69-42579

Microwave holography by two beam interference method, discussing operating principles, equipment, image reconstruction, etc

24 p4314 A69-42976

MICROWEIGHING

U WEIGHT MEASUREMENT

MICTURITION

U URINATION

MIDCOURSE GUIDANCE

Optimization procedure developed and applied to minimum fuel midcourse guidance of spacecraft, discussing optimal closed loop control of linear stochastic systems

06 p0955 A69-17576

Linearized theory for minimum fuel guidance in neighborhood of minimum fuel space trajectory, unrestricted thrust magnitude and allowances for midcourse impulses [AIAA PAPER 69-74]

06 p0956 A69-18183

Midcourse maneuvers in interplanetary guidance, considering spin stabilized spacecraft flyby for Jupiter mission

13 p2354 A69-28504

Filtering and optimal control problems for discrete stochastic dynamical systems, describing various feedback controls and midcourse guidance optimization

18 p3109 A69-34660

Manual procedures for midcourse and terminal guidance, discussing onboard optical measurements and calculations

19 p3368 A69-35792

Optimum midcourse impulses effects on heliocentric launch window, comparing two and three impulse delta 5 performance for two and three dimensional solar system models [AAS PAPER 68-095]

21 p3804 A69-39201

Interplanetary midcourse velocity correction schedules optimization, discussing timing equations modifications, mission simulation and role of earth based radar

21 p3766 A69-39646

Variable time of arrival /VTA/ guidance generalized, developing computational algorithms to supplement linear guidance method

22 p3979 A69-41186

MIDCOURSE TRAJECTORIES

Optimality criterion and equations of motion determined for fixed time impulsive trajectory to minimize total characteristic velocity

06 p1007 A69-17575

MIDDLE EAR

Rapid decompression and recompression in stapectomized cat, noting fibrous tissue response in middle ear at reconstructions utilizing polyethylene struts on gelfoam

14 p2406 A69-29292

MIDLATITUDE ATMOSPHERE

Sporadic E layer boundary frequencies disturbances at midlatitudes, noting solar activity effects, diurnal variations and effect of meteor fluxes

01 p0066 A69-10600

Cause and structure of temperate latitude sporadic E - Conference, Vail, Colorado, June 1968, Volume 2

01 p0072 A69-11169

Midlatitude ionospheric wind profiles noting seasonal and time differences in circulation patterns, speed, shear, wavelength, energy content and dissipation

01 p0072 A69-11171

Midlatitude sporadic E layer, examining hypothesis of wind action on metallic ions and metallic ion accumulation caused by gravity waves

01 p0072 A69-11173

Midlatitude sporadic E layer vertical and horizontal structure and statistical properties, discussing theory of ion concentration by wind shear

01 p0073 A69-11177

Fast neutron fluxes at various atmospheric levels and geomagnetic northern midlatitudes measured by proportional counters using boron trifluoride

03 p0501 A69-13528

Midlatitude nighttime total ionospheric electron content during magnetically disturbed periods from geostationary satellites Canary Bird and ATS 3

03 p0426 A69-14030

Mechanism for noon electron concentration maximum in F region at midlatitudes found to be recombination process

05 p0753 A69-16031

Electron cooling rates in midlatitude and auroral zone thermosphere measured by probe rockets

05 p0755 A69-16267

Midlatitude neutral thermosphere density and temperature measurements, noting effect of atomic oxygen adsorption by instruments

05 p0755 A69-16268

Stratospheric critical clear atmospheric turbulence at midlatitudes, noting applications to supersonic aircraft design

06 p0950 A69-17789

Simultaneous solution of time-dependent momentum and continuity equations for ions and neutral air in midlatitude F2 region conditions

07 p1123 A69-18818

Cosmic ray absorption and modulation in lower ionosphere at midlatitudes, considering 11 year variations, Forbush effects and solar radiation on electron concentration

10 p1759 A69-22840

Low energy particle effects on midlatitude lower ionosphere conditions after July 7, 1966 proton flare, using ground based measurement

10 p1684 A69-23782

Rocket sounding data on ionospheric currents at mid and low latitudes, showing absence in D and above E region

10 p1686 A69-23909

Midlatitude ionospheric disturbances accompanied by auroral type radio absorption observed by radio astronomy and probes during May 26, 1967 storm

10 p1688 A69-23935

Nighttime maxima anomaly in electron concentration of ionospheric F layer at midlatitudes, considering diffusion and recombination

12 p2064 A69-26007

Monochromatic midlatitude auroral arc /M arc/ observation on 28-29 September 1967 at Moscow, Idaho

12 p2065 A69-26105

Mean vertical moisture profile for summer and winter midlatitude stratosphere from Soviet radiosonde data

12 p2070 A69-26582

Oscillations intervals with diminishing period observed during magnetic storms, noting relationship to midlatitude disturbances in F region

14 p2436 A69-29060

Noon electron densities between 65-90 km from measurements of differential absorption of partial reflections, discussing seasonal variations at midlatitudes

14 p2439 A69-29110

Ozone soundings data obtained over Australia and Colorado to obtain vertical picture of synoptic climatology of ozone at midlatitudes

15 p2649 A69-30898

Morning, daytime and nighttime rocket measurements of electron flux in upper atmosphere at 80-165 km altitudes, noting energy flux

15 p2677 A69-31413

Simultaneous middle and low latitude Thomson scatter measurements, comparing electron density, temperature and exospheric temperature data on quiet and disturbed days

15 p2604 A69-31418

Combined midlatitude neutral air wind and equatorial electrodynamic drift effect on F2 layer diurnal variations

16 p2781 A69-32316

Solar corpuscular and UV radiation variation relationship to midlatitude airglow intensity in O I line

16 p2850 A69-32322

Ionospheric and magnetic disturbances at midlatitudes related, noting individual and simultaneous disturbances

20 p3527 A69-37673

Alouette topside ionograms of ionospheric storms at midlatitudes indicating critical frequencies difference between F1 and F2 layers

20 p3532 A69-37894

Auroral midlatitude red arcs ground and satellite data, noting field aligned electron density depression, plasma temperature increase and O plus-H plus transition altitude

20 p3532 A69-37897

Midlatitude thermosphere vertical air motions to balance divergence and convergence caused by large scale horizontal wind systems

21 p3714 A69-38553

Magnetic declination effect on altitude of top of F 2 ionospheric layer at midlatitudes using M/3000/F 2 transmission factor

21 p3717 A69-39577

Midlatitude F region continuity equation solutions, including east-west electric field effects on electron density

22 p3941 A69-40917

Midlatitude ionospheric electron density rocket data survey, including nighttime and daytime N/h profiles for specific solar activities

23 p4155 A69-41563

Radiative cooling models for various midlatitude synoptic features, including stationary front and cyclones

24 p4343 A69-43064

Midlatitude sporadic E model, discussing overdense ionization layers spatial distribution, wind shear effects, periodic variations, etc

24 p4311 A69-43743

MIDLATITUDES

U TEMPERATURE REGIONS

MIE SCATTERING

NT RAYLEIGH SCATTERING

Mie total and differential backscattering cross sections at laser wavelengths for Junge size distribution aerosol models

04 p0609 A69-14290

Stratospheric aerosol investigation by IR and lidar, applying Mie theory to model aerosol size distribution

04 p0592 A69-14654

Atmospheric droplets diameter, number density and scattering cross sections determined from laser radar return equation and Mie theory

06 p0888 A69-17483

Radiation scattering changes due to droplet size distribution change during stratus cloud formation calculated, using development model and Mie theory

08 p1346 A69-21093

Interstellar extinction models of classical Mie particles and quantum mechanical polycyclic aromatic molecules

10 p1781 A69-23679

Optical constants of bulk diamonds compared with interstellar extinction, calculating extinction curves for diamond particles from Mie theory

12 p2157 A69-26230

Optical radar studies of lower atmosphere, giving Mie theory calculations of clear atmosphere volume backscattering cross sections for four laser wavelengths

• 12 p2033 A69-27001

Subroutines for computing characteristics of electromagnetic radiation scattered by absorbing and homogeneous sphere employing logarithmic derivative method

14 p2412 A69-29283

Zodiacal light brightness and polarization measurements from space probes approximated by Mie scattering of interplanetary dust particles

16 p2857 A69-32092

Particle albedos and extinction cross sections computed by Mie theory showing dependence on refractivity, considering thermal radiation from cloudy planetary atmospheres

20 p3614 A69-38255

MIGRATION

Migration and penetration of vacancies in quenched magnesium analyzed by electrical resistivity measurements and electron microscopy

02 p0267 A69-12187

Charge and degree of ionization of nickel alloyed with molybdenum analyzed by electrolytic ion migration method

07 p1159 A69-18535

MILITARY AIR FACILITIES

Tactical airfield/aircraft system effectiveness in terms of ground support resources, aircraft reliability and maximum potential sorties

05 p0743 A69-16238

MILITARY AIRCRAFT

VTOL or V/STOL Light Intratheater Transport /LIT/ for future tactical airlift situations, comparing tiltwing, liftjet, stowed rotor and fan-in-wing concepts

01 p0008 A69-10146

Military aircraft procurement trends examined to forecast military aircraft market

01 p0009 A69-10147

Hydraulic powered flight control system for Jaguar supersonic military training aircraft

01 p0012 A69-10634

Cost factors in choosing single or twin-engine layout for tactical aircraft

02 p0193 A69-12066

Aeronautics - Conference, Beverly Hills, September 1968

06 p0866 A69-17658

T-53 engine operation in U.S. Army helicopters noting design problems from compressor blade failure, sand and dust erosion and bearing and lubrication malfunctions

[AHS PAPER 215] 07 p1203 A69-18867

Military applications of VTOL aircraft, discussing role in battle area with restricted surface transportation

[AIAA PAPER 69-326] 07 p1055 A69-19556

Compound rotary wing aircraft research, discussing XH-51A maneuverability program and UH-1 high Mach and high advance ratio program

[AIAA PAPER 69-218] 07 p1056 A69-19568

Satellite navigation system feasibility for accurate and continuous navigation capability for Army tactical aircraft

08 p1349 A69-21193

Flight testing and preflight simulated testing of Lockheed C-5 Galaxy transport aircraft

10 p1634 A69-23599

Military forward air control aircraft conversion from lightweight commercial tandem engine aircraft noting visibility, communication and navigation equipment

[SAE PAPER 690313] 11 p1822 A69-24511

Military aircraft operating in various environments with low support costs emphasizing improved design, development and manufacturing standards

14 p2392 A69-29503

Automatic navigation and sighting system for French specified Jaguar combat aircraft development

16 p2809 A69-31760

Military V/STOL aircraft flying qualities specification, considering structure, hover and low speed requirements, forward flight, transition maneuverability and control

[AHS PAPER 363] 17 p2900 A69-33520

Turboshaft engines for military aircraft, discussing size, technology and environmental factors with respect to anticipated market

[AHS PAPER 331] 17 p3022 A69-33530

Canadair CL-84 two propeller V/STOL utility tilt wing vehicle development program and flight tests to assess military potential of aircraft

17 p3077 A69-34065

Parametric approach for weight estimation of surface control systems of transonic and supersonic combat and subsonic transport aircraft

[SAWE PAPER 812] 18 p3221 A69-34898

Military aircraft design, discussing reduction of specialization bias and timely application of technical advances

18 p3092 A69-35137

U.S. military aircraft technology, flight environments, trends toward larger aircraft and R and D

18 p3092 A69-35138

Avionics and electronic countermeasures equipment design, development, installation and application problems for high performance military aircraft to meet hostile electronic environment

[AIAA PAPER 69-822] 19 p3243 A69-35599

Quiet military aircraft design factors, considering human hearing characteristics, noise suppression methods, propeller noise-performance relationships and jet engine noise nature

[AIAA PAPER 69-792] 19 p3243 A69-35637

YF-12A interceptor aircraft development and testing, discussing titanium alloys application, aerodynamics and thermodynamics, escape systems for high speed and altitude tests

[AIAA PAPER 69-757] 19 p3245 A69-35652

Flight control systems influence on military aircraft design and performance, discussing static stability, ride quality, flutter margin and maneuver load controls

[AIAA PAPER 69-767] 19 p3245 A69-35656

Cost comparison of single and twin engine layouts for tactical strike/close support aircraft

19 p3248 A69-36855

Wakkel engine development in Poland for powered military gliders at 18 hp and 5500 rpm

22 p3999 A69-40006

Beriev Be-12 cranked wing seaplane design including technical and operational data

24 p4251 A69-42796

Aero L-39 low wing cantilever monoplane jet trainer developed in Czechoslovakia

24 p4251 A69-42797

Engine design program for TF34-GE2 high bypass ratio turbofan military aircraft engine, outlining estimating procedures for thrust, fuel consumption and weight requirements

24 p4364 A69-43042

Aerodynamics, transonic performance, airframe/propulsion, compatibility, structures and materials, flight controls, takeoff and landing capabilities and combat survivability of next generation military aircraft

24 p4252 A69-43046

Military aircraft service life problems solved by alternative replacement policies comparative present value analysis

24 p4253 A69-43058

F-5 cockpit fogging during low flights and dive bombing in South Vietnam attributed to hot humid weather, recommending cockpit temperature control and pilot diet

24 p4277 A69-43376

MILITARY AVIATION

Automatic air traffic control systems design, development and application to civil and military aviation

06 p0955 A69-17858

Helicopters and fixed wing STOL and VTOL aircraft for intertheater military logistics transportation, discussing C-5A role in 1970s

07 p1053 A69-19177

Interim revision of military flying qualities specifications according to experimental data and characteristics of existing aircraft

[AIAA PAPER 68-245] 17 p2902 A69-34026

Aircraft avionics subsystems and weapon system functional integration reflecting aircraft mission, operational, natural and enemy environments

18 p3109 A69-35140

In-flight medical disorders sustained by crew members of various aircraft in French Air Force correlated with aircraft accidents, flight experience and age

24 p4277 A69-43383

MILITARY HELICOPTERS

NT CH-34 HELICOPTER

NT CH-46 HELICOPTER

NT CH-47 HELICOPTER

NT CH-54 HELICOPTER

NT OH-6 HELICOPTER

NT SA-330 HELICOPTER

Helicopter self defense armament for fire support of British Army operations, discussing vulnerability, weapons selection and tactics, logistics, etc

01 p0010 A69-10869

Helicopter use in military activities noting role in overcoming combined enemy, weather and terrain conditions

[AIAA PAPER 69-190] 07 p1244 A69-19547

Helicopters operation from small ships, describing underside harpoon mooring technique for Alouette 2 and 3

08 p1255 A69-20654

Skorsky HH-3F helicopters electronic equipment, discussing communication and navigation aids, search and recovery missions, etc

10 p1662 A69-23222

Optimized automated system for direct support maintenance of AH-56A subsystem equipment

11 p1865 A69-25075

AH-56A Cheyenne armed compound helicopter designed to operate from unimproved bases with minimum support equipment, noting on-board fueling capacity

[AIAA PAPER 68-560] 12 p2017 A69-26770

NASA flight test of hingeless rotor compound helicopter to determine lift sharing characteristics, showing rotor lift dependence on airspeed

14 p2393 A69-29702

Helicopter fire control systems evaluation by computer model for hit probability and impact point sensitivity to various parameters

[AHS PAPER 316] 17 p2933 A69-33540

Helicopter flight loads spectra data compared on statistical basis to establish component service lives

[AHS PAPER 301] 17 p2901 A69-33548

Helicopter evacuation role in mortality rate among wounded in battle in Korea and Vietnam, discussing air ambulance unit organization

23 p4107 A69-41809

Twin engine five seater BO-105 military helicopter design and subsystems and shipboard compatibility evaluation

24 p4252 A69-42937

MILITARY PSYCHOLOGY

Psychiatric study of master attack carrier aviators in ability to fly, considering adult situational reaction diagnosis 03 p0369 A69-12883

Aviation combat performance criterion by analyzing questionnaires sent to combat deployed flight surgeons, noting possible value of peer rating 09 p1447 A69-22549

Military flying career choice as neurotic compensation for personality defects, stressing personality screening during interview 12 p0203 A69-26492

In-flight illnesses in French Air Force, emphasizing psychological failures in etiology 21 p3666 A69-39270

MILITARY SPACECRAFT
NT VELA SATELLITES

Electron measurements at 18 earth radii in Vela satellite program 02 p0307 A69-11735

TRANSIT /Navy Navigation Satellite System/ military and commercial applications 02 p0278 A69-12359

Error correcting coding on DCSP satellite channels, discussing single access communication through wide-band SHF repeaters in synchronous earth orbit 03 p0387 A69-13177

Solar thermal vacuum test for space flight qualification of military spin stabilized synchronous orbit communications satellite 15 p2587 A69-30391

Research satellite, commercial satellite, lunar spacecraft and military satellite missions, discussing Intelsat, Comsat, Early Bird, MOL and ESRO space program 19 p3432 A69-36750

Interpretation of peaceful uses of outer space in Space Treaty, emphasizing provision forbidding individual military space activities whether aggressive or nonaggressive 20 p3635 A69-37106

MILITARY TECHNOLOGY

Operational research in RAF, discussing weapons tactics and research, strike aircraft speed and height effect on target-finding, VTOL and STOL dispersion value, etc 01 p0180 A69-10863

Helicopter self defense armament for fire support of British Army operations, discussing vulnerability, weapons selection and tactics, logistics, etc 01 p0010 A69-10869

Aircraft squadron performance effectiveness model 03 p0367 A69-13911

Military rotor blade radar antennas for all-weather low level flight and fire control 04 p0559 A69-15197

Tactical support aircraft size, economy and flexibility requirements based on Vietnam experience 04 p0549 A69-15486

Satellite communication requirements for UK defense establishment, describing SKYNET system 08 p1272 A69-19957

Boron carbide body armor fabrication by hot pressing in graphite molds 08 p1320 A69-20411

Space boosters, performance of launch vehicles and requirements for future U.S. space launch capability from USAF vantage point 08 p1410 A69-20882

U.S. Army Materiel Command R and D planning structure and technical planning processes influence on decisions improvement 08 p1423 A69-21153

USAF Logistics Command /AFLC/ Missile Fleet Status Tool /MSFT/ for monitoring and control of Minuteman guidance and control system 11 p1865 A69-25073

Store separation from high speed aircraft via wind tunnel test techniques, discussing drop model, flowfield survey and captive trajectory testing [AIAA PAPER 68-361] 11 p1819 A69-25373

Inertial guidance system synthesis for infantry missile with 1 n mile range against small hardened targets requiring 3 ft maximum miss distance 12 p2129 A69-26791

Value engineering and component/products improvement incentive contract clauses role in defense product quality improvement 13 p2383 A69-28100

VHF to UHF telemetry bands transition implemented by Naval Weapons Center 14 p2411 A69-28880

A-New avionics system for carrier based VSX aircraft used in U.S. Navy aerial submarine hunting, discussing TV, lasers, sonobuoy system, radar, etc 14 p2392 A69-29430

Ground military equipment hardening against nuclear environment, selecting worst case levels from isodamage curves 15 p2651 A69-30380

Integrated circuit failure analysis in military and space applications utilizing type-test programs 15 p2624 A69-30820

Military specifications validity with reference to reliability and metal finishing industry 15 p2722 A69-31120

Military systems trouble documentation and evaluation, emphasizing computerized monitoring of reliability and maintainability 15 p2722 A69-31121

Cost effectiveness of DOD/military systems, discussing principles and analytical model with case study 15 p2722 A69-31125

Avionics systems with integration and federation applied to integrated light attack avionics system /ILAAS/ design to provide navigation, weapon delivery and flight control 17 p2976 A69-34057

TC-2 general purpose digital avionics computer in A-7D/E avionics system performing tasks in weapon delivery, navigation and guidance, display updating, self testing, etc 17 p2933 A69-34059

Airborne radomes reliability and high temperature environments, discussing missile nose cones, light weight ceramic techniques, circular polarization, etc 17 p2942 A69-34084

Failure analyses of semiconductor devices for military use, suggesting modifications to MIL-STD reliability screen tests 18 p3108 A69-34499

Reliability demonstration by MIL-STD-781 for equipment failure and success, proposing useful alternatives 18 p3145 A69-34507

U.S. military aircraft technology, flight environments, trends toward larger aircraft and R and D 18 p3092 A69-35138

Visual inspection, thermal and mechanical shock, burn-in and hermeticity tests of microelectronic equipment, reviewing test methods and procedures of MIL-STD-883 program 19 p3284 A69-36043

High density environment-resistant circular connectors, discussing design, applications, test and performance data compliance with MIL-C-81511 specifications 22 p3910 A69-39947

Implementation of MIL-STD-781 reliability test specification from contractor viewpoint, detailing test procedures /procedural, decision, reporting and corrective action rules/ 22 p3952 A69-40025

Reliability test program based on MIL-STD-781 B specification, noting test environments with AGREE chamber 22 p3953 A69-40027

MIL-STD-781A vibration requirements, using mechanical shakers for AGREE vibration testing 22 p3954 A69-40036

Low light level TV systems for military uses, describing design and operation of various image intensifier tubes 22 p3945 A69-40141

Training missions and military exercises to field test weapons system models [AAS PAPER 69-478] 24 p4296 A69-42884

Aerodynamics, transonic performance, airframe/propulsion, compatibility, structures and materials, flight controls, takeoff and landing capabilities and combat survivability of next generation military aircraft 24 p4252 A69-43046

All-equipments reliability test improved by removing usual truncation and extending accept-reject lines of test plan MIL-STD-781 24 p4321 A69-43203

Microelectronics test program consisting of four reliability screening levels based on Mil-Std 883 24 p4287 A69-43205

Gliding cargo airdrop system including automatic homing and manual control [AIAA PAPER 68-958] 24 p4254 A69-43723

MILITARY VEHICLES

Computer program /TACTICS/ for simulating three vehicles simultaneous motion in space, considering interceptor-target guidance and intercept trajectories [AIAA PAPER 69-890] 21 p3678 A69-39415

Handbook of electronic packaging including rigid and flexible printed wiring, soldering and mechanical interconnections, bonding, computer and military applications, etc 22 p3911 A69-40046

MILKY WAY GALAXY

Galactic H II regions morphology from high resolution radio observations, noting variation of electron density with region size 01 p0151 A69-10552

Metagalactic cosmic rays, galactic halo and sources of cosmic rays in Galaxy, noting models, electron component of cosmic rays and evolutionary cosmology 03 p0497 A69-12929

Galactic cosmic rays energy modulation spectrum in interplanetary space, showing influence of solar wind velocity and diffusion coefficient dependence 03 p0501 A69-13527

Cosmic X ray sources resolved against diffuse background radiation lying close to galactic plane 03 p0501 A69-13767

Life probability and origin on Milky Way planets with emphasis on solar system, discussing molecular biology role 05 p0707 A69-15966

Pulsars, noting clusters associated with spiral arm tangential points, anomalous distribution and possible association with galactic disk or spiral arms 05 p0825 A69-16356

Galactic magnetic field estimation obtained from cosmic ray electron spectrum and radio data 05 p0828 A69-16612

Lunar occultations of galactic center region observed at 1667 MHz indicating OH absorption origin in uniform rotating cloud 06 p1009 A69-17961

Galactic rotation constant calculated from radial velocities of O, B and A stars in Cassiopeia constellation, using Fehrenbach objective prism 07 p1214 A69-18664

Contour map of southern Milky Way at 1410 MHz obtained using 210 ft radio telescope at Parkes, Australia 07 p1214 A69-18667

Interstellar light absorption in Milky Way region of Cepheus analyzed by excess color technique 07 p1216 A69-18855

Galactic Wolf-Rayet star distances and distribution on galactic plane, noting concentration difference toward galactic center 07 p1223 A69-19636

Gas remnant of large scale explosive event in galactic plane at 60 degree longitude, discussing resultant extension on line profile 07 p1225 A69-19717

Milky Way local spiral arm 10 MHz absorption, noting interstellar absorption effect and evidence for cool electron gas 08 p1383 A69-19900

Three color RGU system photometry in Milky Way field in direction of anticenter, determining absolute brightness, luminosity and density of stars 08 p1387 A69-20119

Interlocking systems within Galaxy, deducing gravitational theory accounting for galactic spiral patterns 08 p1387 A69-20136

Spatial distribution of stars and obscuring matter in Milky Way field in Kapteyn Selected Area 195 in Circinus, cataloging UBv photometry of stars 08 p1389 A69-20246

Photoelectric UBv photometry of stars in Puppis-Vela border region for associations of intermediate type stars 08 p1389 A69-20248

Helium production in Galaxy, assuming homogeneous evolution of some massive stars due to external factors 08 p1401 A69-20895

Galactic dust layer spatial structure and relation to brightness of Milky Way based on analysis of photoelectric color excesses in Aql and Cyg stars 09 p1590 A69-21381

Further microwave emission lines and ammonia clouds in Sagittarius region, tabulating relevant transitions in ammonia and water 09 p1597 A69-22150

Far IR source in galactic center detected at 100 microns, noting thermal emission of interstellar dust grains as possible mechanism
09 p1603 A69-22264

Galactic structure and space distribution of known Classical Cepheids, noting interstellar absorption and variation of period with distance to galaxy center
10 p1773 A69-22962

Error analysis of Hubble galaxies count to resolve contradiction of values for average optical half thickness tau of galactic absorbing layer
10 p1779 A69-23609

Infinitesimal bending oscillations and/or responses of thin rotating disks applied to thin disk galaxies, discussing Magellanic Cloud passage near galactic center
10 p1786 A69-24110

Temporal variation of metal content in galaxy, discussing stellar radiation pressure effects on heavy element abundance of interstellar gas
12 p2160 A69-26854

Statistical analysis of UVB characteristics of blue objects located near galactic north pole by scintillation techniques
12 p2168 A69-27054

Ionized gas cloud eruption from galactic nucleus deduced from observed hydrogen line at 5.1 cm
12 p2171 A69-27068

IR objective-prism survey along southern Milky Way for identifying high luminosity stars
13 p2335 A69-27314

Emission line fluxes of southern planetary nebulae in Magellanic Clouds and Galaxy measured photoelectrically, giving upper limit to H beta emission of Magellanic planetary
14 p2520 A69-29376

Radial velocities of planetary nebulae in Magellanic Clouds and Galaxy, discussing Population I and II kinematics
14 p2520 A69-29377

Planetary nebulae nuclei magnitudes in Magellanic Clouds and Galaxy measured photoelectrically, discussing early evolution
14 p2520 A69-29378

Contour maps of Milky Way continuum radiation at 1410 and 2650 MHz from low latitude survey, listing sources with estimates of flux density
14 p2526 A69-29772

Milky Way structure, discussing dust bridge and density of absorbing matter between spiral arms of Sagittarius and Carina Cygnus
15 p2683 A69-30514

Galactic magnetic field structure and strength, considering cosmic ray flux, continuum radio emission, starlight polarization, star formation, etc
15 p2694 A69-30857

Carbon stars in south galactic pole region detected in objective prism survey, including variable R Scl and early R stars
16 p2860 A69-32232

Southern Milky Way spectral survey for selection, classification and photometry of interesting objects
17 p3031 A69-33101

Extragalactic radiation depolarization through Milky Way transit determined from linear polarization and flux density measurements of discrete radio sources at 21.2 cm
18 p3190 A69-34287

Dwarf elliptical galaxies of local group, discussing star distribution and orbits, formation process, origin and distribution about Milky Way
18 p3194 A69-34424

Galactic dust layer spatial structure and relation to brightness of Milky Way based on analysis of photoelectric color excess in Aql and Cyg stars
18 p3198 A69-34769

Milky Way continuum radiation at 4170 MHz using parabolic antenna, mapping discrete sources concentration at galactic equator
18 p3200 A69-34996

Stellar populations in Milky Way galaxy, considering stellar motions, spectroscopy, spatial distribution and galactic dynamics
18 p3202 A69-35284

Unresolved background radiation at 2695 MHz surveyed for galactic wing extent determination
20 p3606 A69-37830

NonJeans gravitational instability of stars and interstellar gas in Galaxy due to wave interaction with stars having velocity near wave phase velocity
20 p3607 A69-38037

Galactic radio sources high resolution observations at 178 MHz, determining flux densities and angular structures, noting supernovae remnants
21 p3801 A69-38701

Interstellar matter, considering objects size, solar wind structure, galactic parameters, magnetic fields and cosmic ray heating
21 p3802 A69-38819

Galactic radio emission and magnetic field strength and structure, using radio surveys to obtain information on cosmic rays
21 p3790 A69-38820

Radio background radiation produced by Galaxy, considering energy, isotropy of radiation and black body character
21 p3790 A69-38821

Galactic gaseous disk dynamics, considering interstellar gas behavior and cosmic ray-magnetic field instability
21 p3802 A69-38824

Ariel 3 satellite attempted background radiation measurement between 2-4 MHz to show absorption onset in Galaxy
21 p3806 A69-39258

Galactic hydrogen distribution, discussing velocity field, spiral structure, symmetry, layer shape, ionization, spectra, etc
21 p3810 A69-39503

Milky Way galactic diffuse radiation photometric study using Schmidt camera, stressing Northern Coal-sack commencement region
21 p3817 A69-39725

Space density of giant M stars as function of distance at galactic anticenter
22 p4014 A69-40125

Book on radial velocities and distances in southern Milky Way stellar fields, covering statistical study of star motions in Galaxy, instrumentation, procedures, etc
22 p4020 A69-40317

Possible star formation regions in Milky Way galaxy searched for compact H II regions, tabulating results
22 p4024 A69-40576

Cold neutral H cloud existence in Galaxy from measurements of 21 cm line spectra
22 p4025 A69-40644

Interstellar reddening in solar vicinity, analyzing roles of galactic latitude and longitude and heliocentric distance
22 p4026 A69-40648

Galactic center observations over various wavelengths including polarization, diameter, flux measurements and power output
22 p4029 A69-40767

Radial velocities for O and B stars in Milky Way field in Scorpius determined from prism spectrograms with specific dispersion at H gamma line
23 p4211 A69-41489

X ray spectra of four high energy sources near galactic center
23 p4206 A69-42114

Radio studies of galactic structure, discussing Milky Way origin and formation
23 p4217 A69-42320

Mean and variance of Faraday rotation and pulsar signal dispersion in galactic turbulent structure, applying to statistically homogeneous disk model of Galaxy
24 p4375 A69-42659

Milky Way hydrogen line survey with Parkes telescope, giving velocity-longitude control maps and tabulated data covering galactic equator
24 p4383 A69-42961

MILLIMETER WAVES

Microstrip transmission line integrated circuits on semiinsulating GaAs substrates, showing feasibility at millimeter wave frequencies
01 p0040 A69-10197

Atmospheric noise at millimeter wavelengths, discussing solar radiation and antenna near and far field patterns
01 p0028 A69-10420

Millimeter wave oscillator AFC system utilizing inherent stability of molecular rotational transition applied to reflex klystron stabilization
01 p0044 A69-10628

Figures of merit for polycrystalline uniaxial antiferromagnetic materials, for nonreciprocal devices at millimeter and submillimeter wavelengths, calculated from perturbation theory
01 p0045 A69-10720

Electromagnetic wave generation in 0.2-3mm range, noting applications to physics, biology and technology
02 p0250 A69-12247

Digital transmission at 35 GHz, noting atmospheric and rainfall effect on terrestrial millimeter wave propagation
03 p0389 A69-13192

Short wave bands for earth-space communications, considering propagation anomalies compensated systems and frequency bands availability
03 p0397 A69-13721

Millimeter waves in communication navigation and research, discussing radar range resolution and remote sensing
03 p0397 A69-13722

Point to point millimeter wave communication system design, discussing propagation and data transmission
03 p0405 A69-13723

Millimeter wave lunar radar system component specifications and design with paraboloidal antenna, emphasizing reflectivity of moon
03 p0397 A69-13725

Low and high power pi-mode Ladderton oscillator design operation and performance characteristics
03 p0405 A69-13726

Spectrum and diameter of source of slowly varying component of solar radio emission between 3.3 mm and 21 cm
03 p0516 A69-14045

Single band millimeter wave amplitude modulator for phase meters with homodyne frequency conversion
04 p0577 A69-14850

Diffraction effects on periodic structures in millimeter wavelength range, discussing apparatus for measurements of Fraunhofer zone field, polarization and phase characteristics
04 p0598 A69-14852

Photographs of intensity of radio emission in millimeter band, using luminophor based on ZnS and CdS
04 p0560 A69-15272

Second order nonlinear coefficient measurement for optical generation of millimeter wave difference frequencies in GaAs waveguide, using carbon dioxide laser
06 p0928 A69-17903

Sideband amplification via saturated gas resonance in 258 GHz reflection amplifier with hydrogen cyanide gas filled cylindrical cavity
07 p1145 A69-18479

Rate equation analysis for internally optically pumped millimeter wave maser operating in laser crystal
07 p1146 A69-18480

Wideband superheterodyne tunable radiometers of millimeter wave range using input mixer and high intermediate frequency
07 p1131 A69-18517

Solar intensity measurements at 1.2 mm during partial solar eclipse, noting solar limb brightening and intense solar outburst near end of eclipse
07 p1217 A69-19243

Background radiation intensity upper limits for mm and submillimeter wavelengths in interstellar medium, noting intense flux in far IR
07 p1221 A69-19404

Radome materials with superior dielectric and temperature characteristics for constructing high tolerance microwave multiband radome
07 p1109 A69-19514

Dielectric constant and loss angles measurement in Ku band used for onboard radars
07 p1112 A69-19544

Pressure formed parabolic reflectors for millimeter waves, discussing electrical measurements at 30 GHz
08 p1282 A69-20039

Galactic H 56 alpha recombination radio line observation in Omega Nebula in millimeter band with radio telescope, obtaining electron temperature
08 p1397 A69-20771

Taurus A flux density measurement at 4.3 mm with 36-ft antenna at National Radio Astronomy Observatory to determine spectrum unambiguously
09 p1591 A69-21450

Large steerable mm wave radio telescope of Simcik observatory in U.S.S.R. noting computer aided pointing system
10 p1674 A69-23805

Millimeter and submillimeter radio waves attenuation in rain, showing effective loss cross section as function of raindrop diameter and wavelength
10 p1657 A69-23943

Venus and Jupiter brightness temperature and radio emission at 2.25 and 8 mm wavelengths observed with radio telescope
11 p1956 A69-24396

Millimeter wave propagation over water, discussing fading characteristics and atmosphere absorption effects
11 p1836 A69-24989

Feed shift beam switch for radiometric measurements of astronomical objects emission at millimeter wavelengths
11 p1836 A69-24996

Dielectric loss tangents measurements combining coherent optical resonator with microwave techniques, noting application at mm wavelengths
12 p2080 A69-26057

Barrier capacitance measurement in mm wavelength parametric and multiplication diodes eliminating socket capacitance influence, describing oscilloscope and indicator methods
12 p2043 A69-26885

Far IR and millimeter solar continuum, analyzing flatness of limb darkening curves and brightness temperature near minimum
13 p2341 A69-27591

Millimeter and submillimeter astronomy, discussing lunar poleward darkening function, solar eclipse measurements, observations of Jupiter, Fourier transform and filter spectroscopy uses, etc
13 p2343 A69-27603

Orotron electron beam excited oscillator-generator of millimeter and submillimeter wave bands with wide frequency tuning range
14 p2421 A69-29546

Millimeter and submillimeter microwave spectrometric studies of high temperature plasmas and noise emission, discussing instrumentation and absolute measurements
14 p2451 A69-29786

Single band millimeter wave amplitude modulator for phase meters with homodyne frequency conversion
15 p2575 A69-30242

Diffraction effects on periodic structures in millimeter wavelength measurements of Fraunhofer zone field, polarization and phase characteristics
15 p2607 A69-30244

Superheterodyne millimeter and submillimeter wave detection, allowing harmonics separation
15 p2570 A69-31093

Channel dropping filter for millimeter wave in low loss circular waveguide for overland telecommunications in bandwith over 10 GHz
17 p2936 A69-33032

Fourier transform laboratory spectroscopy for absorption near earth atmosphere millimeter wave spectrum, discussing integrated absorption strength and dimeric effect
18 p3177 A69-35240

Communication satellites equipment and techniques, considering global network, satellite design, millimeter wave systems, etc
19 p3275 A69-36314

Radio measurements of nonionized media and planetary atmospheres, discussing uses of millimeter waves, line of sight propagation, scattering, etc
19 p3276 A69-36427

Free space to dielectric waveguide millimeter wavelength ratio as function of frequency, discussing equipment and procedure
21 p3674 A69-39130

Strong IR millimeter wave emission from galactic center due to interstellar dust grains resembling semiconductor structure
23 p4215 A69-42115

Measurement technique using dielectric waveguides for studying microwave fields influence on and energy imparted to body tissue
24 p4279 A69-43705

Venus and Jupiter brightness temperature and radio emission at 2.25 and 8 mm wavelengths observed with radio telescope
24 p4390 A69-43786

MILLING [MACHINING]

Beryllium chemical and mechanical machining in quantity production, examining salvage and safety precautions
[SAE PAPER 680649] 03 p0434 A69-13455

Torsional moments and forces during Ti alloy and refractory alloy milling with cylindrical cutter
21 p3731 A69-38877

Metal removal mechanisms during electrochemical milling for moving electrodes, noting equations of motion of point for nonmoving electrodes
23 p4168 A69-41310

MINE DETECTORS

Small metallic sphere detection by electromagnetic induction method, emphasizing masking effect of resistive half space below scatterer
01 p0047 A69-10974

MINERAL OILS

Lubrication properties of mineral oils for power hydraulics using Stanhope-Shell four ball test machine
17 p2991 A69-32948

MINERALOGY

Mineralogy of iron fragments from impact craters near Lake Kaali, Estonia, discussing structure and type of meteorite
01 p0159 A69-11370

Nerft and Kaande stony meteorites mineralogical composition from microscopy, noting olivine hypersthene chondrite classification
01 p0159 A69-11374

Origin and mineralogical composition of stones associated with 1824 stone hail near Sterlitamak
01 p0160 A69-11387

Enstatite chondrites structure and mineral content and composition using microscopic and X ray analysis, grouping parameters in distinguishing types
02 p0317 A69-12016

Chemical analysis, isotopic composition, structure and mineralogy of meteorites for classification into iron and stones, discussing time variation of temperature, pressure, etc
07 p1224 A69-19710

Textural variation relation to mineralogical and chemical characteristics of chondrites from review of published data
08 p1391 A69-20516

Chemical and mineralogical study of Kodaikanal meteorite silicate and metal phases, using optical, X ray and electron microprobe techniques
11 p1953 A69-24335

Magnetized minerals studied to investigate space-time structure and reversal of main geomagnetic field
16 p2782 A69-32462

Terrestrial planets high temperature evolution from solar system genesis theory, discussing meteorite chemical composition, petrography, mineralogy and age determination
19 p3407 A69-36079

Sharps chondrite chemical, petrographic and mineralogical studies suggesting formation from complex and repetitious high temperature events and agglomeration processes
19 p3408 A69-36086

C3 and C4 carbonaceous chondrites origin, evolution and classification based on mineralogic and petrologic data
19 p3413 A69-36109

Lance chondrite C III, studying mineral composition of chondrules and heterogeneous crystalline fragments
19 p3413 A69-36110

Carbonaceous meteorites mineralogically identified by selected-area electron diffraction, suggesting formation from minerals mixtures
19 p3311 A69-36111

Carbonaceous meteorites specimen petrographic observations, noting genetic interrelations with ureilites regarding S-C and reduced Fe oxidized Fe ratios
19 p3413 A69-36112

Quantitative mineralogical characterization of chondrites by modal analysis using electron microprobe
19 p3416 A69-36125

Phosphate mineralogy of meteorites using X ray, electron-microprobe and chemical analyses, noting predominancy of whitlockite
19 p3416 A69-36126

Petrology, mineralogy and phase composition of Siena chondrite, interpreting meteorite as ignimbritic rock or welded tuff
20 p3602 A69-37534

Lunar surface, asteroids and meteorites properties by mass distributions of fragmented rocks
21 p3800 A69-38677

Meteorite chemical and mineralogical composition and classification
22 p4032 A69-40981

Martian surface mineralogical study of present state and past processes from rock analyses by unmanned spacecraft instruments to test planetary models
23 p4212 A69-41619

Thermal conductivities /K/ of rock forming minerals reveals K as linear function of density for constant mean atomic weight
24 p4310 A69-43216

MINERALS

NT ALUMINUM SILICATES

NT ANDESITE

NT ASBESTOS

NT BERYL

NT CALCITE

NT CHROMITES

NT COHENITE

NT CORDIERITE

NT PYROXENES

NT SCHREIBERSITE

NT SILICATES

NT SPINEL

NT TROILITE

NT WURTZITE

NT YTTRIUM-ALUMINUM GARNET

NT YTTRIUM-IRON GARNET

Meteorite dust spherules at Tungusk and Sikhote-Alin falls investigated for mineral composition using X ray analysis
01 p0160 A69-11383

Etching techniques for revelation and viewing of fossilized particle tracks in meteoritic and terrestrial minerals
02 p0245 A69-12569

South African octahedrite containing inclusions of troilite and graphite veined with kamacite
03 p0507 A69-13097

Ionic and nonionic mineral oxide powder fillers influence on stereopolymers lattices formed from phenolformaldehyde oligomers, discussing mechanical properties
08 p1335 A69-20331

Mineralizing metabolic wastes by catalytic oxidation of pyrolysis products, noting nutritive value of ash solutions for Chlorella cultivation
10 p1649 A69-23579

Complex index of refraction of naturally occurring rock and mineral as function of wavelength of incident radiation
17 p2973 A69-33093

Percorite phase in nickel analog of clinohysotile formed under hydrothermal conditions in Wolf Creek meteorite cracks
18 p3199 A69-34824

Cosmic ray produced radionuclides P 32, Cl 36, Ar 37 and Ar 39 determined in separate mineral phases of meteorites, emphasizing ratios in metals
19 p3410 A69-36094

Shock histories of hexahedrites and Ga-Ge group III octahedrites based on metallographic and X ray diffraction analysis, noting meteorites shocked preterrestrially
19 p3418 A69-36136

Mineral dynamics during hibernation and disuse atrophy in connection with organismal homeostasis and chronic-term manned space flight, noting skeletal effect of immobility
21 p3660 A69-39175

MINIATURE ELECTRONIC EQUIPMENT

Shockley theory of field effect transistors, calculating characteristics in miniaturization problems by removing geometric constraints with aid of electric analog
02 p0215 A69-11781

Miniaturized X band IMPATT microstrip power sources based on Si avalanche transit time diodes integrated with microstrip oscillator circuits
02 p0216 A69-12146

MOS technique applied to fabrication of integrated monolithic miniature circuits
07 p1099 A69-18494

Miniature microwave tuners with solid state reliability and reduced power consumption, using YIG, mixer circuits and integrated control circuitry
07 p1102 A69-18672

Miniature current discontinuity antennas for VHF and UHF, describing airborne electronically steerable array exhibiting efficiency and minimum structural disturbance
07 p1105 A69-19111

Miniature power amplifier stage for telemetry transmitters, discussing equipment size and weight reduction methods and hermetic envelope
07 p1106 A69-19115

Miniaturized E-Tee three port circulator with wide bandwidth, noting negligible effect of static field small variations on performance
08 p1291 A69-20980

Microelectronic multimode airborne radar system with modular construction, discussing system design, development, flight testing and operational results [AGARDOGRAPH-114] 08 p1277 A69-20989

Airborne ILS marker beacon receivers and secondary surveillance radar transponder using microelectronic equipment, noting thermal dissipation problems [AGARDOGRAPH-114] 08 p1292 A69-20991

Microelectronic equipment for aerospace application and integrated circuit production in UK [AGARDOGRAPH-114] 08 p1292 A69-20992

Microelectronic studies in France noting semiconductor integrated circuits, thin film devices and application to airborne apparatus and small computer [AGARDOGRAPH-114] 08 p1292 A69-20993

Automatic plasma needle arc fusion welding for computer memory arrays and miniature electronic devices 09 p1511 A69-22355

Multichannel miniature telemetry for vibration, strain and temperature measurements in high speed machinery by solid state encapsulated devices 10 p1654 A69-23251

Miniature telemetry systems for gun launched projectile instrumentation and ejection payloads, noting voltage controlled oscillators, commutators and VHF FM transmitters 10 p1654 A69-23280

Integrated tunnel diode amplifiers, discussing low noise, bandwidth, reliability, miniaturization and applications 11 p1854 A69-25611

Logarithmic response electrometer for upper atmosphere satellite measurements using subminiature vacuum tube 12 p2092 A69-26476

Microstrip circulator size reduction attained by tight inductive ferrite coupling for incorporation with microwave integrated circuits 13 p2230 A69-27679

Temperature measurement miniature telemetry transmitter 15 p2607 A69-30156

Unoccupied space utilization in aircraft compartments due to microminiaturization, considering reliability enhancement of electronic equipment 15 p2576 A69-30353

Seam and stitch welding in miniaturized semiconductor package fabrication, including leak rate tables 18 p3149 A69-35272

EEG monitoring during decompression illness/bends/treatment by hyperbaric procedure using small multichannel telemetry pack 19 p3261 A69-36268

Miniaturized FM telemeter for transmitting electrical activity of single nerve cells in brain of awake and unrestrained animal 19 p3261 A69-36270

Miniature transducer to measure low transient pressures on models in rarefied shock tunnel flows, emphasizing mechanical vibration, convective heating and miniaturization 22 p3950 A69-41227

MINIATURIZATION

NT MICROMINIATURIZATION

Fluidic display systems, discussing thermochromic modules and decoder with miniature components 01 p0078 A69-10155

Fluid logic circuits miniaturization for flow in straight and curved channels of various cross sections 02 p0196 A69-12084

Mini trend hookup copper wire insulation performance evaluation 05 p0730 A69-16242

Miniaturized transmitter for single channel biotelemetric system to transmit electromyograms incorporating thin film components 08 p1265 A69-19836

E shaped cores for miniaturized transformers and inductors from high permeability plastic bonded materials 13 p2237 A69-28586

Microelectronics role in maintenance and maintainability of subminiature solid state components, emphasizing functional packaging at module level 19 p3283 A69-36021

Miniature hydraulic controls with emphasis on four-way directional control valve for space and cost problems 22 p3870 A69-41243

Laser beam circuitry miniaturization facilitating laser circuit assembly isolation from thermal, mechanical and ambient changes 24 p4328 A69-43327

MINIMA

Minimum theorems in elastoplastic theory extended to continua for plastic strains governed by holonomic and nonholonomic stress-strain laws 07 p1235 A69-19442

Reliability of individual components of multicomponent systems under variable loads, using asymptotic distribution of minimal values 08 p1322 A69-21103

MINIMAX TECHNIQUE

Algorithm minimaxing performance index and sensitivity of controller design with and without saddle point 02 p0224 A69-11966

Algorithm with iterative technique for nonlinear minimax approximations 08 p1344 A69-20829

Nondifferential function minimization on entire vector space or bounded subset for application to minimax problems in function spaces, time optimal control, etc 10 p1721 A69-23863

Minimax error technique used with finite difference methods to estimate error in approximations to functions defined by nonlinear differential equations 20 p3568 A69-37832

Discrete problems of optimal control solved by general minimum principle, proposing several algorithms for optimality problems 20 p3509 A69-38295

Minimax sensitivity criteria used to synthesize filters for estimating state of first order plant subject to dynamic and/or statistical parameters uncertainties 22 p3918 A69-41016

MINIMIZATION

U OPTIMIZATION

MINIMUM DRAG

Supersonic gas dynamics variational problems concerning determination of axisymmetric minimum drag 05 p0699 A69-16675

Axisymmetric bodies longitudinal contours for hypersonic flow minimum drag, considering Newtonian pressure distribution and skin friction 10 p1632 A69-23886

Surface of minimum drag symmetrical trapezoidal wing in supersonic flow solved by variational method 15 p2548 A69-31022

Optimum form for hypersonic profile with minimum drag for given bending strength solved by variational method 21 p3644 A69-39099

MINORITY CARRIERS

Direct reading device for minority carriers lifetimes measurement in semiconductor single crystals 01 p0078 A69-10073

P-n-p junctions photoconductivity decay observation, determining signal bulk minority carrier lifetime in thin n regions 01 p0136 A69-10242

Transistor parameters for operation as minority carrier charge controlled device, developing equivalent circuit for computer calculation of transient response 01 p0046 A69-10748

Minority carrier density and diode current obtained as Laplace transforms from analyzing differential equations, describing charge carriers in semiconductor 01 p0049 A69-11361

Base transit time of minority carriers in double diffused Si transistors with small emitter area, discussing cut-off frequency 02 p0297 A69-11995

Minority carriers lifetime measurement in degenerate GaAs, showing dependence on current density and operating temperature 03 p0483 A69-12917

Majority and minority carrier trapping in neutron irradiated Si diodes, measuring transient junction capacitance recovery 06 p0975 A69-16869

Growth induced dislocation effect on lifetime of minority charge carriers in silicon single crystals 06 p0980 A69-17551

Minority carrier distribution in doped semiconductor space-charge layer assuming relation between diffusion and Debye length 07 p1198 A69-18506

Diffusion and minority carriers drift effect on current-voltage characteristics of p-n-p-n structure in high density current 10 p1742 A69-22997

Surface charge exchange in metal oxide silicon capacitors generated at low temperatures by surface state free carrier trapping 10 p1744 A69-23179

Electronic states and minority carrier transport in mixed semiconductors with graded composition, noting position dependent band gaps and effective masses 10 p1745 A69-23360

Minority carrier density in base region of uniform base transistor at arbitrary injection level, using two dimensional model 11 p1845 A69-24569

Single crystal solar cell degradations in space, duplicating radiation effect on minority carriers lifetime by laboratory tests 11 p1826 A69-24876

Cyclotron resonance of minority carriers measured in p-type InSb, giving temperature dependences of absorption derivative and field ratio to line half width 15 p2667 A69-30068

Double diffused transistor with Gaussian impurity distribution analyzed by power series for carrier density distribution and frequency response 16 p2758 A69-31616

Injection level effects on minority carrier lifetimes in lithium-doped devices and solar cells irradiated by electrons and reactor neutrons 19 p3252 A69-35698

Minority carriers penetration depth in solid aluminum gallium arsenide solutions with variable forbidden bandwidth determined from recombination radiation spectra 19 p3391 A69-36606

Active Ni centers properties in Si with emphasis on increasing and reducing minority carrier lifetime in silicon integrated circuits, discussing energy levels 24 p4360 A69-42759

MINUTEMAN ICBM

On job training of logistic publications engineers, emphasizing technical publications and system engineering and development for Minuteman program 10 p1811 A69-22977

Maintenance van loading technique for number of spares and test equipment in Minuteman weapon system for uncommissioned launch facilities at minimum cost 10 p1669 A69-22980

USAF Logistics Command /AFLC/ Missile Fleet Status Tool /MSFT/ for monitoring and control of Minuteman guidance and control system 11 p1865 A69-25073

MIRROR POINT

Bounce resonant scattering of auroral zone electrons, noting contribution to microbursts and mirror point diffusion 05 p0754 A69-16260

MIRRORS

NT MAGNETIC MIRRORS

NT PARABOLOID MIRRORS

NT ROTATING MIRRORS

Mirror photogrammetry geometric principles, studying photo pairs, mirror reflection and reduction methods 01 p0077 A69-10025

Positive feedback of spring mass system for mirror control on spectroheliometer of Apollo Telescope Mount flight 02 p0248 A69-11738

Errors of wavemeter employing open resonator with spherical mirrors 03 p0407 A69-13983

Electromagnetic theory of surface radiation properties, analyzing specular reflectance of optically smooth surfaces 04 p0684 A69-14357

Optical performance of coupled Fabry-Perot resonators with additional mirrors, determining frequency separation parameters due to third mirror 04 p0612 A69-15372

Standing waves effect on spectral and power characteristics of laser with plane mirrors, determining dependence on pumping power 07 p1148 A69-18800

Fabry-Perot laser operation having third mirror inserted on optical axis, analyzing equations solution stability according to Liapunov 07 p1148 A69-18802

Periodic model variations in ruby and neodymium lasers with tilted mirrors, discussing factors in resonator misalignment 09 p1520 A69-22663

Laser frequency drift effect on operation of three mirror interferometer, noting wave reflection by two compounded mirrors 11 p1895 A69-24720

Single and double mirror systems geometrical optical image aberrations noting focal number, angle of field,

secondary magnification and mutual position tolerances
11 p1918 A69-24836

Single mirror scanning geometry and kinematics, analyzing spatial motion of objects plane mirror image
12 p2091 A69-26367

Single mirror image scanning mechanism vector analysis and formulas for vector rotation
12 p2091 A69-26368

Large astronomical mirrors support and testing - Conference, Tucson, December 1966
12 p2055 A69-26406

Elastic mirror flexure and distortion patterns, considering periodic nature of load in polar coordinates, second flexure mode avoidance and friction elimination
12 p2056 A69-26407

Thermal effects in large mirrors, considering temperature gradients parallel to reflecting surface or to optical axis
12 p2056 A69-26408

Antiflexure cylinder for large astronomical mirror, noting support by astatic counterpoint levers and simple flanges
12 p2056 A69-26409

Lever support systems for telescopes noting tilt compensation, acceleration balance and problems of friction, pivot viscosity, thermal effects and weight
12 p2057 A69-26410

Optical tests of Hale telescope mirror and support system at Palomar, noting various maladjustments and malfunctions
12 p2057 A69-26411

Axial support systems for large astronomical mirrors, considering gas support system for flat mirror submerged and floating in isostatic liquid
12 p2057 A69-26412

Sinusoidal tension and compression radial support system for large solid disk primary mirror, noting pivot design and pad bonding adhesive
12 p2057 A69-26413

Large mirror support systems definition in terms of axial location and radial position
12 p2057 A69-26414

Lick telescope support system for 120 inch mirror, noting use of levers and counterweights concept
12 p2058 A69-26415

Isaac Newton telescope, describing support of 98 inch mirror, structure between fabricated cell steel surface and mirror and tests with air bag support
12 p2058 A69-26416

Support system for McDonald 107 inch telescope mirror, adopting Couder design using lily pad single lever supports for axial thrust
12 p2058 A69-26417

Axial support system for Canadian 150 inch telescope mirror, discussing flexural and shear analyses and ring supports repositioning for balancing shear
12 p2058 A69-26418

Construction techniques for lightweight mirrors for secondaries, considering optical finishing and thermal expansion
12 p2058 A69-26420

Axial support system for controlling thermal distortion of 82 inch heliostat mirror for Kitt Peak solar telescope
12 p2058 A69-26422

Dynamic relaxation method for elastic deformation in mirrors, using tensor equations of elasticity in nonorthogonal curvilinear coordinates
12 p2187 A69-26890

Test methods for telescope mirror, discussing polishing, monitoring by Hartmann test and visual null test
13 p2259 A69-27205

Zeeman laser with one end mirror exhibiting x-y-type loss anisotropy, considering resonance condition for round trip pass and self consistent field equations
13 p2271 A69-27398

Light scattering from high reflectivity dielectric mirrors, measuring angular power distribution from beam axis by scanning with narrow slit
13 p2298 A69-27663

Segmented active mirror optics design concept for lightweight optically stable primary reflector used in large orbiting astronomical telescopes
13 p2261 A69-27950

Control system for thin diffraction limited orbiting astronomical telescope mirror based on structural analysis of static deflections
13 p2261 A69-27951

Ultralightweight mirror blanks for astronomical telescopes, discussing weight saving low thermal expansion and fused monolithic core technology
13 p2261 A69-27953

Thermal and mechanical stability of fused silica lightweight mirror structures, examining impact and shear strengths of fused joints
13 p2261 A69-27954

Outgassed condensation effects in vacuum on magnesium difluoride overcoated UV irradiated Al mirrors, including temperature effects, Lyman alpha reflectance and IR analysis of deposits
13 p2299 A69-28015

Photogrammetric calibration of Surveyor 7 stereo mirror based on vector analysis
[JPL-TR-32-1390]
13 p2263 A69-28199

Gas laser design utilizing internal window mirrors deposited with dielectric coating outside resonator
14 p2457 A69-29160

X band open resonator terminated by step-rimmed flat mirrors, discussing rim effect on Fabry-Perot diffraction loss
14 p2424 A69-29765

Pulsed IR laser optimal Q switching mode by using semiconductor mirror with nonparabolic dispersion law and changing mirror opening moment delay time
15 p2633 A69-30064

Spatial and energy characteristics of laser with nonuniform transmittance across resonator mirrors, analyzing transverse modes interaction
15 p2634 A69-30962

Optical performance of coupled Fabry-Perot resonators with additional mirrors, determining frequency separation parameters due to third mirror
16 p2797 A69-32119

Optical computerized design procedure for Ritchey-Chretien corrector, combining ray deviation error function and third order aberration design techniques
17 p2972 A69-33087

Mosaic mirror and lens camera system for multiple image high resolution photography
17 p2972 A69-33089

Ruby laser resonator losses resulting from changes in mirror transmittance or inclination, or introduction of bleachable absorbers
19 p3331 A69-35863

Wave equation of electromagnetic field of optical resonator with arbitrary mirrors, utilizing Schroedinger equation and equivalent mechanical system
19 p3333 A69-35880

Second surface mirror used as coating for spacecraft thermal control
20 p3632 A69-37290

Large aperture Al alloy telescope mirrors consisting of Tenzalloy Al coated with Ni alloy, presenting performance data
20 p3546 A69-38193

Standing waves effect on spectral and power characteristics of laser with plane mirrors, determining dependence on pumping power
21 p3736 A69-38945

Fabry-Perot laser operation having third mirror inserted on optical axis, analyzing equations solution stability according to Liapunov
21 p3736 A69-38947

Annular gas laser cavity designs with additional mirrors for longitudinal oscillation mode selection, noting positive results for He-Ne laser
21 p3740 A69-39553

Thermal control coatings, windows and mirrors for 1973 Mars Viking Lander vehicles under simulated Martian surface conditions
[AIAA PAPER 69-1023]
22 p3923 A69-40393

Ruby laser resonator mirror mechanical vibrations effects on emission temporal behavior, spectral output and far field pattern, describing conditions for spiking
22 p3962 A69-40562

Axial mode frequencies, loss coefficients and optimal parameters of three and four mirror resonators of gas lasers, including designs with maximum selectivity
22 p3964 A69-40796

Mirror mount for shock tube laser cavity with alignment capability, noting seal against internal pressures
22 p3951 A69-41233

Ni plated 40-cm lightweight Al alloy telescope mirror, noting weldment stress relief by annealing
23 p4164 A69-41624

Radial velocity errors in high dispersion astronomical spectrographs in terms of variable spectral shifts along plate produced by mirror surface irregularities
23 p4167 A69-42189

MISALIGNMENT

Misalignment and eccentricity effect on face seal, discussing leakage dependence on phase angle
[ASLE FICFS PREPRINT 15A]
15 p2620 A69-30483

Dynamic balancing mechanics covering graphical representation, mass asymmetries corrections or adjustment calculations and ballasting equations
[SAWE PAPER 736]
18 p3220 A69-34891

MISSIBILITY
U SOLUBILITY

MISFIRES
U FAILURE
U FIRING [IGNITING]

MISMATCH
U IMPEDANCE MATCHING

MISORIENTATION
U MISALIGNMENT

MISS DISTANCE
Virtual or projected miss distance for assessment of missile homing impairment effects, deriving expression based on kinematics
04 p0629 A69-15517

Fixed-tuned telemetry receiver as miss distance indicator /MDI/ to provide information in missile performance program
23 p4138 A69-41781

MISSILE ANTENNAS
Boresight error in missile radome-antenna combination due to reflection and surface wave effects
07 p1111 A69-19536

S band antenna systems for missiles, designed in various types to obtain RF telemetry links reliability by sharing effort between airborne and ground station equipment
23 p4137 A69-41753

MISSILE COMPONENTS
High strength room temperature vulcanizing silicone rubber for tooling and fabrication of aircraft and missile components
09 p1507 A69-22331

Monograph on calculation of linearized supersonic flow on rocket configurations at zero angle of attack, particularly at interfaces between components, covering applications
11 p1817 A69-24637

Detonation system for exploding missile warheads, discussing trigger detonation and safety release elements
17 p3050 A69-33698

Thermal protection for air-launched missile electronics during carry and free flight, considering active, passive and combination systems and weight penalties
22 p4049 A69-39943

MISSILE CONFIGURATIONS
Monograph on calculation of linearized supersonic flow on rocket configurations at zero angle of attack, particularly at interfaces between components, covering applications
11 p1817 A69-24637

Computer programs determining gaseous properties and aerodynamic characteristics for missiles, reentry vehicles and spacecraft at angles of attack
18 p3107 A69-35068

MISSILE CONTROL
Soviet book on inertial control of ballistic rockets covering rocket flight deviations measured by onboard sensors and computer
01 p0113 A69-10994

Missile control during propulsion period, emphasizing vane deflection required for lateral wind compensation
01 p0163 A69-11297

Proportional navigation guidance systems for interceptor missiles optimized by adding biased term to guidance equation
02 p0278 A69-11973

Digital simulation based on guided missile experience, discussing numerical methods for ordinary differential equations, literature, choice of method and simulation languages
03 p0401 A69-13763

Computer programs and analysis methods for digitalization of continuous feedback network in missile control systems
05 p0725 A69-16470

Digital simulation of vehicle motion and control for six degree of freedom simulations of Gemini reentry and aircraft, missile control, etc
05 p0725 A69-16477

Hydraulic control valves for guidance of rockets by secondary liquid injection into nozzle skirt, discussing structure, single nozzle missile and mass gain
07 p1230 A69-19293

Optimal lift and thrust control programs to maximize range of missile in horizontal flight
09 p1610 A69-22086

Flat flexible printed circuitry in AWG-10 missile control system on F-4J, regarding wire harness packaging 09 p1511 A69-22356

Guidance law for autoguided system trajectory to impact target, noting kinematic study 10 p1723 A69-23701

USAF Logistics Command /AFLC/ Missile Fleet Status Tool /MSFT/ for monitoring and control of Minuteman guidance and control system 11 p1865 A69-25073

Inertial guidance system synthesis for infantry missile with 1 n mile range against small hardened targets requiring 3 ft maximum miss distance 12 p2129 A69-26791

Stability analysis of missile lateral supersonic flutter based on Lagrange equations, considering conservative thrust, control deviation and aerodynamic forces 17 p3045 A69-32946

Book on flight mechanics of aircraft and missiles covering mass, propulsion and aerodynamic forces, TOL problems, optimization problems, etc 17 p2898 A69-33319

Perturbation technique application to stability criterion for rectilinear missile flight with arbitrary inclination, noting mass reduction and flow and gravity effect 19 p3429 A69-35779

Missile and spacecraft guidance navigation and control, discussing fluidics, self adaptive and digital control and Kalman filtering 19 p3370 A69-36316

Soviet book on radio control of rocket missiles and space vehicles covering control principles, systems analysis and synthesis, vehicle characteristics, etc 20 p3574 A69-37232

Missile-borne and satellite-borne computers analogies, comparing design, operational conditions and functional requirements 20 p3500 A69-37380

Microminiaturized digital computers for missiles and aircraft, discussing characteristics, environmental conditions and transformation possibility for use in satellites 20 p3502 A69-37392

Single stage rocket control and trajectories for maximum target strike probability within given range 21 p3818 A69-38857

Integrated sensor controllers for missile directional control, discussing test results for two different systems [AIAA PAPER 69-837] 21 p3761 A69-39368

Controllers design for reaction jet controlled aerospace vehicles, studying second order pitch-plane representation with actuator modeled as pure delay [AIAA PAPER 69-854] 21 p3822 A69-39382

Strapped down phased array radar tracker mechanization with digital loop closure electronics for homing missiles, noting cost advantages [AIAA PAPER 69-873] 21 p3763 A69-39399

Reliability assessment of ballistic missile inertial guidance system, discussing objectives and requisites 22 p3953 A69-40028

Monograph on selection of radar echoes from nearly colocated reflection centers, discussing guided missile multiple target resolution 22 p3899 A69-40533

High temperature pneumatic systems for missile and space vehicle control, describing pressure regulators, flow controls, thrusters and analog valves 22 p3870 A69-41240

Antitank missile guidance system with tracker using two optical paths and pyrotechnic flare noting transmission ratios, visibility coefficients and improvement factors 23 p4164 A69-41625

UHF down-converter design used in various Navy missiles UHF telemetry/miss-distance information system 23 p4137 A69-41778

Fixed-tuned telemetry receiver as miss distance indicator /MDI/ to provide information in missile performance program 23 p4138 A69-41781

Rendezvous, intercept and injection optimal control laws derived from inhomogeneous linear differential equations with quadratic performance index 23 p4224 A69-41921

All-electric nonlinear actuator steering advanced tactical missiles, noting 99.29 percent delivered unit reliability during mass production 23 p4225 A69-42458

Controlled plant in n dimensional Euclidean space, analyzing optimal trajectory using integral equations 23 p4183 A69-42472

Extreme value statistics used to determine minimum acceptable tensile strength of wire command links in TOW antitank missiles 24 p4318 A69-42642

Space and missile guidance performance analysis through automatic generation of mission performance sensitivity with respect to error sources from Monte Carlo simulation [AAS PAPER 69-404] 24 p4347 A69-42836

Missile response-PDM guidance and control system parameters relationship, using phase plane representation [AIAA PAPER 68-820] 24 p4283 A69-43252

Quasi-optimum proportional navigation for interceptor missiles, discussing feedback guidance law and attack geometry 24 p4348 A69-43292

Policies and controller design for pursuing vehicle based in terms of pursuit-evasion differential games 24 p4341 A69-43295

MISSILE DESIGN

Liquid hydrogen and LOX boost pump design for Centaur missile and liquid hydrogen and LOX chill-down pump design for Saturn 4B missile 01 p0087 A69-11149

Galvanic corrosion couples of metals and alloys tested in liquid fluorine, determining corrosion rates for possible missile components application 06 p0944 A69-17854

Solid fuel propulsion systems for tactical rockets design, discussing microwave attenuation, acceleration-combustion interactions and performance optimization 16 p2836 A69-31998

Missile and space support planning, objectives, technology development, functions, maintenance and in-flight maintainability 19 p3295 A69-36327

MISSILE ENGINE CASES

U ROCKET ENGINE CASES

MISSILE LAUNCHERS

U MOBILE MISSILE LAUNCHERS

MISSILE RANGES

White Sands Missile Range space and missile test facilities and support facilities for space exploration 02 p0227 A69-11761

Kwajalein Missile Range UHF telemetry conversion program using S band antennas with three channel monopulse autotrack systems 07 p1077 A69-18829

UHF telemetry conversion program at Pacific Missile Range, describing antenna, receive-record and separation display systems 09 p1454 A69-21800

Active interferometer controlled telemetry tracking system for missile range, discussing automatic target acquisition, dish feed, costs and optimized data-channel antenna patterns 19 p3271 A69-36253

MISSILE ROLL CONTROL

U LATERAL CONTROL

MISSILE SILOS

Air pressure wave forces on missile from silo wall motion resulting from close nuclear blast, using acoustic wave equation for concentric cylinder flow 21 p3691 A69-39765

MISSILE SIMULATION [MATH MODELS]

U MATHEMATICAL MODELS

U MISSILES

MISSILE SIMULATORS [TRAINING]

U MISSILES

U TRAINING SIMULATORS

MISSILE STABILIZATION

U STABILIZATION

MISSILE STAGING

U MISSILES

MISSILE STRUCTURES

Book on material and design problems encountered in construction of high performance missiles, rockets and spacecraft, considering influence of space environment 01 p0084 A69-10021

Active feedback control of distributed parameter systems including elastic airplane and missile structures, noting feedback loop coupling problem [ASME PAPER 69-VIBR-61] 10 p1668 A69-24145

Dynamic IR inspection to detect fatigue cracks in aircraft and missile structure from distance 11 p1861 A69-24262

Large plastic deformation of two metallic cylindrical flat ended missiles in mutual longitudinal impact 12 p2179 A69-26217

Finite element techniques of structural analysis for missile and space structures, including Apollo computerized analysis and structural optimization 19 p3438 A69-36324

Composite-to-metal joints design and fabrication, using carbon yarn in epoxy matrix for missile interstage application 24 p4323 A69-43426

High modulus carbon filament composite structural elements for missile interstage application, showing weight savings 24 p4325 A69-43444

MISSILE SYSTEMS

NT GROUND OPERATIONAL SUPPORT SYSTEM

Radome materials design and performance for guided weapons systems, describing research conducted in UK 07 p1112 A69-19540

USAF Logistics Command /AFLC/ Missile Fleet Status Tool /MSFT/ for monitoring and control of Minuteman guidance and control system 11 p1865 A69-25073

Tactical rocket propulsion - Conference, La Jolla, California, April 1965 16 p2836 A69-31991

Liquid expulsion by direct pressurization of propellant tank in spinning missile system, demonstrating feasibility with subscale hardware [AIAA PAPER 69-527] 16 p2838 A69-32651

Kormoran airborne missile weapon system for attacking seagoing targets, discussing navigation guidance, radar tracking and homing system 17 p3050 A69-33697

Polaris and Poseidon nuclear missile systems, considering efficiency and launching depth from nuclear submarine 19 p3432 A69-36687

IRIG /Inter-Range Instrumentation Group/ telemetry standards for U.S. Department of Defense missile and weapons systems, reviewing evolution, content, scope, philosophy, revisions, etc 23 p4121 A69-41770

MISSILE TEST LABORATORIES

U LABORATORIES

MISSILE TESTS

Wind tunnel rain erosion testing of components of aircraft or missiles flying at high speed 07 p1117 A69-19534

Hypersonic flight test data of Berenice missile compared to wind tunnel test data, discussing in-flight flow separation, Mach-Reynolds torque, etc 10 p1632 A69-23842

Mathematical model for operational readiness of dormant systems /periodically checked missiles/, discussing time distribution to failure detection, occurrence and between tests 18 p3142 A69-34477

Computerized prediction of RF instrumentation system signal margins for missile flight tests based on trajectory and range balance equation 18 p3103 A69-35097

Portable UHF telemetry receiving station for medium range surface-to-air missiles testing, analyzing antenna coverage over water and system prediction allowing variable parameters 23 p4122 A69-41780

MISSILE TRACKING

Missile radar cross section based on modeling from simple forms, noting computer program 03 p0384 A69-12910

Radar cross section of missile and aircraft configurations, comparing theoretical and experimental results for Convair 990 static test model 03 p0384 A69-12911

Shipborne self pointing antenna for reception of telemetry signals from maneuverable missile, discussing tracking and compensation for ship platform motion 10 p1664 A69-23803

Phased array radar system for UHF detection, identification and tracking of orbiting objects and ballistic missiles, noting system design and hardware 12 p2028 A69-25906

Antitank missile guidance system with tracker using two optical paths and pyrotechnic flare noting transmission ratios, visibility coefficients and improvement factors 23 p4164 A69-41625

MISSILE TRAJECTORIES

- Virtual or projected miss distance for assessment of missile homing impairment effects, deriving expression based on kinematics 04 p0629 A69-15517
- Trajectories minimizing missile velocity losses due to gravity by setting boundary conditions and trend of thrust in time 08 p1409 A69-20587
- Mechanics of missile dispersion due to dynamic unbalance and rocket spin stabilization problems [SAWE PAPER 741] 18 p3208 A69-34886
- Flight times compared for intercept and pure pursuit missile trajectories 20 p3618 A69-37716
- Single stage rocket control and trajectories for maximum target strike probability within given range 21 p3818 A69-38857

MISSILE VIBRATION

- Close coupled accumulators for suppressing missile longitudinal oscillations /POGO/ developed for Gemini and Titan 3, including pump interaction [AIAA PAPER 69-547] 16 p2869 A69-32729
- Aircraft and missile dynamic characteristics for heavy loads and large heat flux, noting small harmonic vibrations of heated structures in plastic domain [ICAS PAPER 68-38] 17 p3061 A69-33589

MISSILE WINGS

U LOW ASPECT RATIO WINGS

MISSILES

- NT AIR TO AIR MISSILES
- NT AIR TO SURFACE MISSILES
- NT ANTIAIRCRAFT MISSILES
- NT ANTIMISSILE MISSILES
- NT ANTITANK MISSILES
- NT BALLISTIC MISSILES
- NT INTERCONTINENTAL BALLISTIC MISSILES
- NT MINUTEMAN ICBM
- NT POLARIS MISSILES
- NT SURFACE TO AIR MISSILES
- NT V-2 MISSILE

- Secondary explosives ignition by primers and other explosive wire devices on missiles, discussing circuitry and resistance to severe climatic and electrical environments 10 p1751 A69-23021

- Guidance law for autoguided system trajectory to impact target, noting kinematic study 10 p1723 A69-23701

- Main tank injection for packaged liquid missiles, discussing propulsion system design, pressurization, packaging and screen reservoir [AIAA PAPER 68-627] 19 p3429 A69-35947

MISSILERY

U MISSILES

MISSION PLANNING

NT COUNTDOWN

- National space program management, discussing NACA and NASA, lunar mission planning, procedures and program flexibility and responsibility 01 p0178 A69-10468

- Solar system origin and evolution by future space mission experiments, discussing theories and mission objectives [AAS PAPER 68-191] 01 p0153 A69-10823

- Planetary quarantine and biological search strategy, discussing Voyager-Mars mission configuration, sterilization, back contamination and decisions 01 p0021 A69-11090

- Systematic approach to standard launch vehicle based on governmental expenditure minimization while attaining mission goals 01 p0162 A69-11096

- Scientists involvement in planetary spacecraft missions, considering organization for particular instruments and more complex payloads [AAS PAPER 68-192] 02 p0311 A69-11473

- U.S. space program projections, discussing earth orbit operations, lunar and planetary explorations, costs and timetable 02 p0355 A69-11744

- Planetary exploration strategy for form and origin of universe, unified field theory and abiogenesis, discussing mission planning group 02 p0324 A69-12305

- Planetary swingby theory mechanics and applications for optimization of interplanetary trajectories 02 p0331 A69-12818

- Mission capability differences between direct and orbital Mars missions as to launch period selection, targeting capability and error analysis 02 p0331 A69-12821

- Lunar geoscience role in lunar mission planning, discussing costs, reduced gravity effects, sample mass limits and seismology 03 p0510 A69-13391

- Manned reusable space transportation systems development, discussing requirements for future space mission planning 03 p0519 A69-13395

- Mission analysis for applications satellites, discussing tradeoffs among mission objectives, launch vehicles, spacecraft and geopolitical considerations 03 p0511 A69-13428

- Aeroshell structural development for Mars flyby and entry landing mission compatible with Atlas/Centaur launch vehicle [AIAA PAPER 68-1159] 03 p0521 A69-13667

- Mars unmanned spacecraft mission profiles for surface imaging, noting influence of lighting requirements [SMPT PAPER 104-21] 04 p0650 A69-14361

- Iterative guidance mode /IGM/ applied to effective gravity vector prediction, acceleration measurement of noise sensitivity and energy limitations [AIAA PAPER 67-620] 04 p0629 A69-15501

- German analysis of preparatory technology of U.S. space programs, noting effects of hardware development for manned space travel on future planning 05 p0849 A69-15576

- Technological base for planning space flight missions to obtain data on earth resources, detailing earth resources technology satellites /ERTS/ 05 p0830 A69-15921

- Jupiter unmanned flyby probes trajectory and mission analysis, considering planetary gravitational field role for trajectory shaping and flight times 06 p1007 A69-17598

- Analytical technique for unmanned spacecraft sizing for planetary missions, considering scientific objectives, characteristics and requirements [AIAA PAPER 69-125] 06 p1018 A69-18076

- Astrodynamical data compilation for use by system engineer for mission planning [AIAA PAPER 69-124] 06 p1011 A69-18090

- Sun-orbit plane relationship effects on mission planning [AIAA PAPER 69-129] 06 p1011 A69-18093

- Eole satellite and meteorological balloons telecommunications used to study wind distribution in Southern Hemisphere and other atmospheric parameters 07 p1084 A69-19134

- Electric propulsion missions analysis for spacecraft design engineer, discussing out-of-ecliptic and Jupiter flyby probes 09 p1584 A69-21203

- Low thrust mission simulation dependence on hardware definition, discussing power plant characteristics, jet velocity and thruster efficiency 09 p1584 A69-21204

- Mission model construction for power limited systems, discussing flight concepts, propulsion mixes and electric propulsion 09 p1584 A69-21205

- Interplanetary low thrust mission analysis model, discussing major elements interactions 09 p1585 A69-21206

- Space flight trajectory analysis of aerospace systems, discussing Analytical Trajectory Optimization Model 09 p1585 A69-21207

- Low thrust mission analysis techniques and computer programs, discussing electric propulsion 09 p1585 A69-21208

- Predesign and mission analysis software capability for sizing, design, fabrication and developmental testing of flight hardware for electrically propelled interplanetary spacecraft 09 p1585 A69-21210

- Automated parameter search techniques applied to low thrust mission design, stressing trajectories and mission optimization 09 p1585 A69-21211

- West German activity in field of electrostatic propulsion, discussing ion thrusters, colloid thruster development and mission analysis [AIAA PAPER 69-288] 09 p1565 A69-21248

- Ion thrusters and various microthrusters /electron bombardment ion and pulsed plasma/ for proposed European missions [AIAA PAPER 69-274] 09 p1565 A69-21250

- Reactor and mission requirements interaction for unmanned thermionic nuclear electric propulsion, discussing lifetime, payload, power levels, etc [AIAA PAPER 69-250] 09 p1539 A69-21253

- SERT 2 thruster system performance over expected mission parameters, noting operational lifetime excess over mission requirements [AIAA PAPER 69-235] 09 p1566 A69-21255

- Common nuclear propulsion modules for wide spectrum of manned planetary missions, discussing payload, mission and program flexibility [AIAA PAPER 68-590] 09 p1539 A69-21984

- Space exploration plans adaptation, considering spacecraft design, programs, costs and schedules flexibility 10 p1811 A69-22863

- Low thrust space probe mission to Halley comet, utilizing nuclear electric propulsion 10 p1772 A69-22864

- Model simulation in program planning for space station with emphasis on accommodation of logistics 10 p1669 A69-22976

- Spacecraft propulsion systems comparison and evaluation, discussing quality, schedules and costs in relation to mission requirements 11 p1965 A69-25600

- Space experiments analysis involving standardization for economy and mission thesis compromise, detailing aeronomic satellite project with integrated utilization 12 p1713 A69-26128

- Problem areas within cryogenic chemical and nuclear propulsion systems for space missions, noting available technology and limitations [AIAA PAPER 67-454] 12 p2174 A69-26782

- Reliability and maintainability analysis of two year spacecraft mission combining earth orbits and Mars program, using computerized mathematical model [AIAA PAPER 68-1059] 12 p2174 A69-26797

- Large power systems integration in manned space stations, discussing design, selection and application criteria 13 p2209 A69-27939

- Markov chain applications to avionics weapons system reliability specifications starting with mission profile, failure rates, success probabilities, etc 15 p2581 A69-31136

- Manned space stations role in future space plans, discussing prototypes and conceptual design 16 p2866 A69-31736

- Project Symphonie German-French communication satellite mission and technical data 16 p2868 A69-32055

- Fluid controlled solid rocket motors design for Mars mission with acceleration level as parameter, discussing mission specifications, system design and component considerations [AIAA PAPER 69-446] 16 p2841 A69-32687

- Lunar orbital mission plans intended to optimize spacecraft procurement, flight schedules, science objectives and available funds 18 p3193 A69-34362

- Market analysis program to evaluate relationship between launch vehicle jettison weight and total cost based on all projected missions [SAWE PAPER 776] 18 p3208 A69-34872

- General aviation missions in national transportation system /1968, 1975, 1980/, considering fuel taxes, overall system economics, ground facilities, etc [AIAA PAPER 69-818] 19 p3453 A69-35624

- Mission windows for single and multiple planet swingbys past Jupiter to outer planets [AAS PAPER 68-115] 19 p3402 A69-35936

- Approach navigation accuracy for planetary atmosphere braking to orbit about Mars and Venus [AAS PAPER 68-122] 19 p3402 A69-35937

- Mariner Mars 1969 flyby missions objectives, experiments, spacecraft configuration, trajectory design, sterilization, flight path control and photographic imaging [AAS PAPER 68-134] 19 p3402 A69-35938

- Operational missile flight program validation plan noting mission analysis, computer programming, program preparation and performance prediction 19 p3279 A69-35955

- Earth orbital space program mission effectiveness increased through utilization of standby launch vehicles, spacecraft and space station systems 19 p3430 A69-36010

- Worldwide cloud cover simulation procedure providing data for computer simulation of earth oriented space missions, describing computer program using Monte Carlo mission simulation 20 p3573 A69-38120

- Earth resources technology satellite /ERTS/ choice regarding local time of ascending node based on cloud cover and IR measurement considerations 21 p3798 A69-38628

Orbital images for earth resources satellite mission planning using Mercury, Gemini and Apollo synoptic terrain photographs

21 p3721 A69-38632

Two dimensional gravity assisted trajectories for solar probe missions in ecliptic plane, discussing Venus and Jupiter assist missions

21 p3804 A69-39022

Mission and planetary vehicles characteristics affecting design of solid propellant motors and thrust vector control systems in planetary orbiters and landers [AIAA PAPER 68-815]

21 p3819 A69-39031

Spacecraft guidance analysis of multiple outer planet mission utilizing gravity assist swingbys to achieve planetary flybys with single spacecraft [AAS PAPER 68-109]

21 p3761 A69-39205

Triple planet ballistic flybys, discussing mission opportunities and launch windows [AAS PAPER 68-114]

21 p3805 A69-39206

Mission analysis for 1972 Venus launch opportunity, discussing launch period selection and trajectory constraints for Atlas/Centaur vehicle [AAS PAPER 68-135]

21 p3805 A69-39208

Abort capability mission selection criterion, evaluating energy requirements, Mars flyby and velocity contours [AAS PAPER 68-139]

21 p3805 A69-39209

Secondary or abort mission maximized subject to primary mission constraints by variational treatment of optimal branched trajectories [AAS PAPER 68-138]

21 p3819 A69-39210

Lunar Orbiter missions pre- and postflight error analyses compared to estimate dispersions from reference trajectory [AAS PAPER 68-108]

21 p3805 A69-39220

Direct flight and Jupiter swingby heliocentric trajectory modes of elliptic capture orbits compared for unmanned missions to outer planets [AAS PAPER 68-105]

21 p3805 A69-39221

Analytical technique for unmanned spacecraft sizing for planetary missions, considering scientific objectives, characteristics and requirements [AIAA PAPER 69-125]

21 p3828 A69-39770

Mission analysis and trajectory simulation (MATS)/program, discussing computer controls, modular design, integration evaluation [AIAA PAPER 69-939]

22 p3904 A69-40322

Operational reliability verification of Apollo real time mission program and testing structure, discussing environment, processing, controls, response criteria, etc [AIAA PAPER 69-981]

22 p3907 A69-40361

Trajectory analysis of multiplanet Grand Tour mission to four large outer planets on single flight, discussing mission planning [AIAA PAPER 68-1055]

22 p4023 A69-40544

Spatial region accessible to earth launched probes determined for mission planning for exploration of aperiodic comets, discussing orbit parameters

23 p4212 A69-41536

Space power systems analysis, using computer program to correlate systems characteristics with mission parameters for automated satellite repair vehicle and space stations

23 p4068 A69-42240

Adaptive cost equations in computer programs supporting launch vehicle long range planning, based on launch vehicle anticipated usage [AAS PAPER 69-164]

24 p4392 A69-42815

Space program planning, noting market requirements, acceptability and future characteristics [AAS PAPER 69-083]

24 p4418 A69-42820

Navigation systems analysis for space missions planning, discussing onboard equipment and lunar landing accuracies [AAS PAPER 69-406]

24 p4347 A69-42833

Mariner-Mercury 1973 flyby mission using Atlas-Centaur rocket and gravity-assisted maneuvers, discussing encounter geometries, spacecraft configuration and Venus probe considerations [AAS PAPER 69-288]

24 p4381 A69-42862

Space mission opportunities selection from analysis of short period comet perihelia, discussing flyby and rendezvous mission payloads [AAS PAPER 69-320]

24 p4381 A69-42866

Planning lunar surface experiments in nets or at selected sites for optimum scientific return [AAS PAPER 69-207]

24 p4381 A69-42874

Economic aspects of future space activities noting systems analysis, operations research, manned and unmanned space capabilities, etc [AAS PAPER 69-113]

24 p4418 A69-42878

Cape Kennedy space research and national priorities, indicating performance and progress of future space operations [AAS PAPER 69-110]

24 p4419 A69-42879

Space flight programs management cooperation and limited competition advantages, emphasizing single management team responsibility for effective multi-lateral activities

24 p4419 A69-43043

Mars and Venus flyby missions and Mercury planetary exploration plans, discussing future conditions permitting Jupiter, Saturn, Uranus, Neptune, Pluto flybys

24 p4384 A69-43137

Sun-orbit plane relationship effects on mission planning [AIAA PAPER 69-164]

24 p4386 A69-43261

MIST

Vaporization of mist of small droplets by intense light beam for droplet extinction rate proportional to absorbed radiant energy

09 p1539 A69-21346

MITOCHONDRIA

Mitochondrion-endoplasmic reticulum connection in hepatocytes, discussing possible protein molecule transfer

23 p4083 A69-41455

Rodent swimming and treadmill training effect on capacity of mitochondrial fraction from hind limb muscles to oxidize pyruvate triples

23 p4095 A69-42084

MITOSIS

Bone marrow cell division disturbance in rats after proton irradiation

07 p1064 A69-18973

Bone marrow cell division disturbance in rats after proton irradiation

20 p3479 A69-38221

Hyperoxia and hypoxia effects on mitotic activity in regenerating and normal rat liver exposed to environmental conditions

24 p4269 A69-43565

MIXED FLOW

U MULTIPHASE FLOW

MIXERS

Optimal layout of turbofan jet engines, discussing experimental rig for high thrust measurement [AIAA PAPER 67-416]

01 p0143 A69-11015

MIXING

NT DISSOLVING
NT LAMINAR MIXING
NT SIGNAL MIXING
NT SUSPENDING [MIXING]
NT TURBULENT MIXING

Deflection effect on flow and mixing process in flames covering enclosed turbulent diffusion flames in combustion chamber

17 p3068 A69-32966

MIXING CIRCUITS

X band mixer with reactively terminated image, using gallium arsenide barrier diodes and microwave integrated circuit techniques

01 p0039 A69-10189

Voltage controlled oscillator with fixed frequency crystal oscillator, noting double mixing scheme and rejection of all discrete sidebands

01 p0042 A69-10418

Wideband electronically scanned receiver, using varactor diode upper sideband parametric frequency upconverter for frequency mixing

01 p0048 A69-11036

Space charge limited square law diodes as HF mixers, noting low conversion loss of asymmetrical type

03 p0404 A69-13580

Diode mixer power series coefficients for spurious response prediction in superheterodyne receiver

03 p0399 A69-13905

Difference frequency generation by multiple quantum transition from laser medium considered as resonant optical frequency mixing device

07 p1144 A69-18470

Miniature microwave tuners with solid state reliability and reduced power consumption, using YIG, mixer circuits and integrated control circuitry

07 p1102 A69-18672

Frequency conversion in microwave crystal mixer with EMF amplitude fluctuations in heterodyne

09 p1469 A69-22644

Broadband double balanced mixer/modulators compared with single balanced and unbalanced mixer/modulators

10 p1665 A69-23876

Minimum conversion loss in general mixer circuit configuration, noting dependence on time varying resistance and equal terminating impedances

11 p1845 A69-24550

Parametric frequency converter consisting of mixer head in bridge circuit with varactors for 12 GHz TV transmitters

11 p1854 A69-25614

Critical review of statements concerning previous paper on noise in transistor mixers at HF

11 p1857 A69-25662

Tunnel diode harmonic mode mixer having IF receiver, studying combination and cross noise rejection efficiency

14 p2424 A69-29763

Ferrite frequency mixers used with heterodyne receiver, studying combination and cross noise rejection efficiency

15 p2574 A69-30129

Broadband microwave double balanced mixer/modulators, discussing bandwidth, conversion loss, noise figure, intermodulation and power dissipation

15 p2580 A69-31077

Noise during frequency combination and conversion in mixer

17 p2931 A69-33911

MIXING LENGTH FLOW THEORY

Coaxial jet mixing regimes in jet engines, determining requirements for compatibility by applying aerodynamic theory of ejectors [ONERA-TP-599]

02 p0187 A69-11619

Hydrodynamic analysis for determining steady flow region with closed separation area for Reynolds numbers to describe viscous mixing by Prandtl equations

02 p0190 A69-12570

Equilibrium turbulent boundary layer prediction for proposed Prandtl mixing length distribution

03 p0419 A69-13992

Amount of flux carried by convection in late type stars, reevaluating drag role in mixing length theory

06 p1003 A69-17321

Wind velocity and shear stress profiles above surface with changed roughness, using mixing length theory

08 p1346 A69-20311

Temperature gradient in semiconvective region, examining molecular weight distribution in mixing due to overstability

09 p1596 A69-22057

Carbon dioxide laser combining gas flow with fluid mixing to achieve high gain

10 p1701 A69-22954

Physical structure of convective envelopes of population II main sequence stellar models by mixing length theory, emphasizing hydrogen molecule formation and pressure ionization

11 p1961 A69-25109

Mixing regimes for flows with different stagnation enthalpies subject to mass flow limitation due to thermal choking

13 p2251 A69-28499

Viscous incompressible fluid self similar mixing problems, performing group analysis for complete boundary value problem

14 p2428 A69-28803

Outer convection zone of cool white dwarf by atmospheric models, using mixing length theory and abundances

14 p2529 A69-29982

Velocity field in turbulent flow based on momentum transfer, determining velocity distribution for flow near solid surface

16 p2772 A69-32128

Flow over uniformly rough surface in planetary boundary layer from mixing length wind spiral model, using surface shear stress and wind direction data

17 p2997 A69-33153

Mixing length model to relate turbulent shear stress to mean velocity field within planetary boundary layer above surface roughness change

17 p2997 A69-33154

Compressible hypersonic turbulent boundary layers solution by finite difference method, relating mixing length to velocity profile shape factor [AIAA PAPER 69-684]

17 p2955 A69-33474

Turbulent kinetic energy equation for determining turbulent flow fields applied to free mixing problem of constant density streams [AIAA PAPER 69-683]

17 p2956 A69-33492

Prandtl mixing length theory for flow in pipes and channels described by spatial exponential form, developing velocity profile and friction factor [ASME PAPER 69-FE-48]

20 p3516 A69-37978

Diffusion parameters for fluid stream flowing from round hole with given radius and velocity into wake flow

21 p3696 A69-39091

Mixing length theory including eddies axial motion, discussing turbulent field of temperature or concentration

24 p4407 A69-42917

Separation flows in flat channel with step recess, analyzing dynamic characteristics in mixing region, in wake of rarefaction waves and in attachment zone

24 p4247 A69-43498

Outer solar convection zone structure dependence on change of parameters in mixing length theory examined to construct model

24 p4387 A69-43634

MIXTURES

NT ADMIXTURES
NT AEROSOLS
NT BINARY FLUIDS
NT BINARY MIXTURES
NT COLLOIDAL PROPELLANTS
NT COLLOIDS
NT DETONABLE GAS MIXTURES
NT DISPERSIONS
NT EMULSIONS
NT EUTECTIC ALLOYS
NT EUTECTICS
NT FOG
NT GAS MIXTURES
NT LIQUID-GAS MIXTURES
NT METAL MATRIX COMPOSITES
NT NUCLEAR EMULSIONS
NT PHOTOGRAPHIC EMULSIONS
NT SMOKE
NT SOLID SOLUTIONS
NT SOLID SUSPENSIONS
NT SOLUTIONS

Microstructured mixtures theory including energy balance, mass and momentum equations and entropy production inequality for structured fluids in motion

13 p2371 A69-27318

Thermal conductivity prediction technique for two and three phase solid heterogeneous mixtures

13 p2378 A69-28337

Sintered mixtures of Ni-Mo powder noting electrical resistance, alloy and shear strength and impact viscosity

15 p2638 A69-30280

Absorption spectroscopy using resonance broadened atomic lines for two phase mixtures study

21 p3774 A69-39239

MOBILE MISSILE LAUNCHERS

Temporary launching sites for rocket probes, discussing CNES activity, Dragon and Titus programs and mobile launching units

02 p0228 A69-11921

MOBILITY

U ELECTRON MOBILITY
U HOLE MOBILITY
U IONIC MOBILITY

MODAL RESPONSE

Natural frequencies and mode shapes of coupled bending vibrations of pretwisted rectangular cross section beams determined by Rayleigh-Ritz energy method

03 p0529 A69-13989

Dynamic instability of solid bodies, using modal vibration method to establish criteria on basis of equivalent energy conditions

05 p0844 A69-16742

Modal response analysis of servomechanisms as deduced from vibration test, for possible application to aircraft [ONERA-TP-668]

06 p0869 A69-17100

Vibration natural frequencies and mode shapes in cylindrical shells clamped at both ends, using fundamental differential equation under dynamic surface loading

09 p1618 A69-22274

Aircraft modal control systems synthesis to improve response characteristics by altering pairs of complex conjugate and real eigenvalues simultaneously

09 p1435 A69-22779

Damping of response of integrally stiffened skin structures to random acoustic pressures, reducing rms stress in case of broad band excitation [ASME PAPER 69-VIBR-26]

10 p1806 A69-24172

Holographic mode shapes used in conjunction with mechanical impedance approach for vibration analysis of turbine blades [ASME PAPER 69-VIBR-32]

10 p1806 A69-24174

Aerospace structures modal vibration tests data acquisition including multishake excitation methods

15 p2585 A69-30358

Nondivergent oscillations in solar atmosphere forming normal modes or free oscillations, assuming free surface of chromosphere coronal interface and large density in convective zone

17 p3029 A69-33048

Natural frequencies and vibration modal shapes of asymmetrical airfoil blades analyzed by differential equations of motion, noting flexure coordinates center variations effect

17 p3067 A69-34053

Rectangular cross section pretwisted beams modal curves for turbine and compressor blading vibrational studies

20 p3621 A69-37080

Lasing properties of Ni-doped GaAs diodes evaluated by plotting resonance, mode amplitudes and frequencies for various bias currents and external capacitance

22 p3912 A69-40606

Transverse acoustic wave excitation of elastic circular cylindrical sandwich shell submerged in infinite fluid medium, describing simultaneous equations development for modal response [ASME PAPER 69-APMW-17]

24 p4401 A69-43100

MODE OF VIBRATION

U VIBRATION MODE

MODE SHAPES

U MODAL RESPONSE

MODE TRANSFORMERS

Resonance method determining spurious modes excitation in natural mode converter, discussing construction, application and mathematical correlation

11 p1856 A69-25630

Mode filters for oversized rectangular waveguides, considering resistive sheet with complex surface impedance

16 p2760 A69-31948

Mode conversion in nonuniform multimode waveguides and transitions using Maxwell equations, considering tapered and circular waveguides

23 p4135 A69-41354

MODELS

NT AIRCRAFT MODELS
NT ASTRONOMICAL MODELS
NT ATMOSPHERIC MODELS
NT BREADBOARD MODELS
NT DIGITAL SIMULATION
NT DYNAMIC MODELS
NT ENVIRONMENT MODELS
NT LIGHTHILL GAS MODEL
NT MATHEMATICAL MODELS
NT REFERENCE ATMOSPHERES
NT SCALE MODELS
NT SPACECRAFT MODELS
NT THOMAS-FERMI MODEL
NT WIND TUNNEL MODELS

Technological forecasting by intuitive forecasts, consensus methods, analogy, trend extrapolation and structural models

13 p2382 A69-28040

Equivalent dielectric tensor for warm drifting electron plasma using model

16 p2820 A69-31701

Vaporization interaction liquid rocket performance model, discussing performance loss evaluation and test data

[AIAA PAPER 69-470]

16 p2838 A69-32663

Hydraulic tank for visualizing flows around stationary models, noting absence of wall effects [ONERA-TP-708]

17 p2956 A69-33588

Linear elastic isotropic materials for model tests, describing properties of material composed of Araldite B and air

21 p3844 A69-39319

Step recovery diode principle and operation mode as frequency multiplier explained by models

21 p3684 A69-39736

Linear models with self excitation for brightness and contrast perception studies in human visual system

22 p3881 A69-40862

Intercity travel demands simulation by linear graph model applied to Windsor-Montreal corridor [AAS PAPER 69-382]

24 p4417 A69-42805

Training missions and military exercises to field test weapons system models [AAS PAPER 69-478]

24 p4296 A69-42884

MODERATION [ENERGY ABSORPTION]

NT PULSE FREQUENCY MODULATION
NT PULSE FREQUENCY MODULATION
NT TELEMETRY
NT PULSE MODULATION
NT PULSE TIME MODULATION
NT TRAVELING WAVE MODULATION
NT ULTRASONIC LIGHT MODULATION
NT VELOCITY MODULATION

Ground state population modulation in trivalent rare earth doped single crystals by means of optical double resonance, noting applications

01 p0134 A69-10013

Optimum modulation technique determination for single channel voice communication under severe noise conditions [UN PAPER 68-95851]

01 p0029 A69-10526

Communication satellites systems, discussing Intelsat satellite specifications and modulation methods for multiple access

03 p0383 A69-12870

Galactic cosmic rays energy modulation spectrum in interplanetary space, showing influence of solar wind velocity and diffusion coefficient dependence

03 p0501 A69-13527

Modulation of galactic cosmic rays due to electromagnetic conditions of interplanetary space, considering time variations and Parkers model

06 p0989 A69-17287

Drag force measurement in low density flows using modulation techniques

06 p0861 A69-17638

Image averaging time effects on modulation transfer function /MTF/ of system comprising telescope objective and horizontal propagation path in turbulent atmosphere

06 p0890 A69-17806

Cosmic ray modulation by solar wind, discussing anisotropic diffusion during propagation through interstellar magnetic field

10 p1759 A69-22842

MHD power plant research and development, discussing shock wave electric power generators and modulated systems

11 p1925 A69-24469

Ruby laser performance with perturbing effect of standing wave field on homogeneity of deexcitation of level populations eliminated by HF modulation

11 p1900 A69-25569

Hologram recording by offsetting reference beam temporal frequency instead of using reference beam spatial offset

13 p2258 A69-27201

Reference oscillator synchronization inaccuracy influence on SNR at output of correlation receiver during reception of signals with pseudonoise modulation

15 p2563 A69-30141

Discharge parameters modulation caused by acoustic wave propagating in partially ionized plasma, deriving perturbation current density and irradiated light intensity

16 p2752 A69-32364

Modulation transfer function based on Fourier techniques, discussing nonlinear film development process

17 p3005 A69-33080

Holography of intensities, discussing recording of self luminous body by modulation of scattered radiation using optical Q switch

17 p2973 A69-33113

Probabilistic analysis of code message distortion due to pulse noise in modulation systems and comparison between linear and quadratic detections

17 p2919 A69-33145

MODULATORS

- Deformation of amplitude and frequency envelopes of plane modulated electromagnetic waves with dispersion in isotropic dielectric with cubic nonlinearity
17 p2928 A69-33869
- Rocket measurements indicating auroral electrons modulation near equatorial plane, noting intensity changes as function of rocket flight time and altitude
21 p3709 A69-38499
- Modulation envelopes, tables of profiles and harmonic components for modulated waves in electrical and communications problems
21 p3673 A69-38778

MODULATORS

- Bulk effect germanium hot-carrier microwave modulator for Q band, reducing required applied voltages by using short length semiconductor ships
01 p0043 A69-10563
- Working equivalent circuits for fluidic transverse impact modulator in LF and IF range
02 p0196 A69-12082
- High power pulse generators with four layer p-n-p-n structure, discussing design, principles and applications of semiconductor elements as modulators and switches
03 p0402 A69-12978
- Intermodulation and cross modulation distortions in double balanced modulator
04 p0573 A69-14341
- Single band millimeter wave amplitude modulator for phase meters with homodyne frequency conversion
04 p0577 A69-14850
- Modems for high data transmission rates on available voice bandwidth channels, noting point to point and multipoint polled networks and signal to noise ratio
04 p0564 A69-15208
- Broadband hybrid junction of parallel transmission lines application to four diode star mixer/modulator
06 p0896 A69-17485
- Vortex valve pure fluid modulators steady state characteristics, analyzing geometry of exit, control and supply areas and chamber
09 p1443 A69-22738
- Radar signal cross correlation function calculation with reference function, applying acousto-optical modulator
10 p1694 A69-23539
- Broadband double balanced mixer/modulators compared with single balanced and unbalanced mixer/modulators
10 p1665 A69-23876
- Input admittance response characteristics and input susceptance and input conductance of resonant reactive modulator with varactors and nonlinear losses
10 p1665 A69-24066
- Electro-optic broadband laser light modulator designs and modulation characteristics, computing curve set for evaluation of various materials
11 p1897 A69-25039
- Near IR radiation magnetooptical light modulators using Faraday effect in yttrium-iron garnet and in related compounds
11 p1886 A69-25057
- AM-FM calibration modulator for microwave oscillator noise measurement
11 p1856 A69-25631
- Control signal correction in microwave ferrite modulators, eliminating losses due to screening effect of feeder
13 p2226 A69-27216
- Electrooptical ADP modulator design for use with helium-neon laser, considering temperature stability and crystal faces parallelism
13 p2272 A69-28191
- Operation mode of modulator with p-n diode, determining modulus and phase of reflection factor
13 p2235 A69-28518
- Numerical solution of differential equations for two channel PFM with pulse element, applying Dirac pulse sequence to input
14 p2426 A69-29148
- Capacitive parametric modulator transient processes and second harmonic effect analysis, obtaining transient response and recovery time
15 p2574 A69-30125
- Single band millimeter wave amplitude modulator for phase meters with homodyne frequency conversion
15 p2575 A69-30242
- Broadband microwave double balanced mixer/modulators, discussing bandwidth, conversion loss, noise figure, intermodulation and power dissipation
15 p2580 A69-31077
- 360 degree varactor linear phase modulator, analyzing impedance matching, insertion loss, tuning design and serrodyne application
16 p2756 A69-31577

- Single balanced modulators using square law resistors /space charge limited diodes/, discussing noise properties, conversion losses and terminating conductance
16 p2758 A69-31756
- Popov type graphic criterion for determining absolute stability of modulation systems
16 p2764 A69-32440
- Fluidic direct impact modulator design, studying effects of pressure levels and nozzle geometries [ASME PAPER 69-FLCS-38]
20 p3465 A69-37983

MODULES

- NT COMMAND MODULES
NT COMMAND SERVICE MODULES
NT ELECTRONIC MODULES
NT LANDING MODULES
NT LUNAR LANDING MODULES
NT LUNAR MODULE
NT MARS EXCURSION MODULE
NT MICROMODULES
NT SERVICE MODULES
NT SPACECRAFT MODULES
- Pneumatic elements, discussing development from process control via modules systems to logic elements and fluid sensors
02 p0197 A69-12795
- Common nuclear propulsion modules for wide spectrum of manned planetary missions, discussing payload, mission and program flexibility [AIAA PAPER 68-590]
09 p1539 A69-21984
- OMNITRAC general purpose airborne digital computer with permanent memory of 4096 words of 23 bits, noting modular construction
10 p1659 A69-22845
- Modular hydraulic power source systems for general aviation aircraft, discussing design selection, phase in and customer acceptance problems [SAE PAPER 690329]
11 p1825 A69-24505
- Torsion theory for modules over integral domain, giving definition of injective sums
13 p2287 A69-27339
- Primary isotope thermionic electric power module design, considering various assemblies
14 p2398 A69-29190
- MERA /Molecular Electronics for Radar Applications/ modules testing in planar array simulator, measuring far field amplitude patterns in transmitting and receiving modes
22 p3912 A69-40067
- Design, fabrication and evaluation of lunar base solar array power modules, emphasizing structural/ dynamic, thermal vacuum and acoustic tests
23 p4072 A69-42288

MODULI

U RATIOS

MODULUS OF ELASTICITY

- NT DYNAMIC MODULUS OF ELASTICITY
- Kinetic theory of fracture initiation, discussing changes in relative orientation distribution of network chains
02 p0345 A69-12401
- Pressure and temperature dependence of isotropic elastic moduli of polycrystalline alumina, noting Grueneisen parameter, equation of state and Debye temperature
02 p0268 A69-12407
- Fatigue and corrosion fatigue properties of aluminum alloys, noting elastic modulus, cyclic loading strength, corrosion resistance, etc
03 p0443 A69-13027
- Niobium based alloys modulus of elasticity temperature stability, investigating admixture effects
04 p0615 A69-14642
- Hydrogen effect on interatomic bonds of Ti beta alloy and Young modulus, noting measurements at various temperatures
04 p0618 A69-15178
- Thermal stress in fiber reinforced metals, assuming Young modulus variable when thermal stress is applied during heating and cooling
04 p0682 A69-15393
- Young modulus of sintered nonporous titanium, zirconium and chromium nitrides, computing characteristic temperature and root mean square atomic displacements in lattices
06 p0938 A69-16830
- Dynamic measurements of modulus of elasticity for polycrystalline nickel-tungsten alloys at elevated temperatures
06 p0943 A69-17232
- Statistical computations of elastic moduli of macroscopically isotropic particulate composites, discussing porosity and elastic properties of materials made by sintering
07 p1159 A69-18722

- Fiberglass reinforced plastics modulus of elasticity and Poisson ratio determined by strain gauges and frequency and resistivity measurements
08 p1335 A69-20330

- Multidirectional boron-epoxy laminates shear strengths and elastic moduli, calculating in-plane tension and compression
08 p1337 A69-20484

- Thermoelastic properties of particulate, filamentary and layered composites, summarizing Soviet theoretical and experimental work
08 p1339 A69-20500

- Shop-ready high modulus carbon and fiberglass composite reinforcement system, stressing effect of modulus fibers amount in laminate
08 p1340 A69-20508

- Transversely isotropic elastic solid approximation for oriented fibers of polyethylene, nylon, polyethylene terephthalate and polypropylene, measuring elastic compliances
09 p1528 A69-21504

- Tensile strengths and elasticity moduli of graphite fibers produced from textile organic thread, discussing application to composites, ablative and fiber reinforced materials
09 p1529 A69-22071

- Forced vibrations in semibounded elastic bar with various moduli of elasticity, discussing reversing longitudinal force and elastic waves propagation
10 p1799 A69-23155

- Ultrasonics for automatic measurements of temperature and elastic moduli above 5000 F
10 p1694 A69-23373

- Young modulus temperature dependence and order-disorder transformations in ternary nickel alloys
11 p1904 A69-24705

- Symmetrically loaded weak moment shells of revolution made of materials with different moduli of elasticity
11 p1980 A69-24819

- Annealing effects on cold rolled titanium sheets, noting changes in Young modulus and characteristics of recrystallized titanium
11 p1904 A69-24899

- Reduced modulus of elasticity dependence on form of plane stressed state, assuming initially anisotropic body with transversely isotropic elastic properties
11 p1986 A69-25182

- Modulus of elasticity changes and stress relaxation spectra of viscoelastic liquids measured by acoustic methods
11 p1887 A69-25206

- Comparison of errors obtained by using linearly gliding and rotating strengthening moduli in stress-strain state on basis of linear stepwise approximation
11 p1986 A69-25342

- Characteristic temperature, Young modulus and rms atomic displacement in metal borides of various porosities, using dynamic method based on ultrasonic oscillations measurement
12 p2115 A69-26615

- Effective tensors of elastic moduli and yielding of composite materials, considering multiparticle interactions and use of equilibrium and incompatibility equations
13 p2360 A69-27382

- Theoretical compression strength of reinforced materials determined assuming material components differing elasticity moduli
14 p2532 A69-28973

- Thermoelastic stress-strain state of infinite circular cylindrical shell with elasticity modulus temperature dependence expressed by exponential function
14 p2532 A69-28980

- Beam deflection equations having different rigidity moduli on each half span
15 p2705 A69-30417

- Bending theory of orthotropic plates with variable elastic modulus under transverse loads, utilizing stress-strain relations and Kirchhoff-Love hypothesis
15 p2708 A69-30661

- Uniaxial stress effects on molecular breakage rate, relating structure-sensitive parameter to elastic modulus
15 p2709 A69-30807

- Extensional vibration of thin inhomogeneous circular plate with variable modulus of elasticity and central hole, calculating periods of vibration
15 p2713 A69-31026

- Thermal stress in fiber reinforced metals, assuming Young modulus variable when thermal stress is applied during heating and cooling
18 p3223 A69-35021

- Oriented glassfiber reinforced plastics elastic moduli and tensile strength along anisotropic axes determined

- nondestructively, considering component content and material porosity
18 p3162 A69-35359
- Weak moment shells made from materials with different elastic moduli, developing theory based on undeformable normals
18 p3225 A69-35367
- Measuring elastic modulus and tensile strength of high modulus graphite fibers including comparative data, error sources and full strand test
19 p3355 A69-35520
- Hollow cylinder plane stress-strain state analyzed for effect of variable modulus of elasticity of cylinder material
19 p3436 A69-35858
- Two dimensional stress analyzed near crack in infinite elastic sheet, considering crack shape and Young modulus
19 p3440 A69-36638
- Melting points, electrical conductivity, Hall constants, magnetic susceptibility, density, bending strength, microhardness and elastic modulus of zirconium nitride in homogeneity range
20 p3558 A69-37014
- Ti-V martensite decay during heating, noting temperature dependence of elastic moduli and electrical conductivity
21 p3746 A69-39160
- High E modulus, structure, strength and temperature characteristics of reinforcement fibers, considering B, silicon carbide, C and Be
22 p3951 A69-39907
- Elastic modulus of beta Ti alloy containing Mo, Cr, Fe and Al measured under vibrations and shear modulus determined under torsion
22 p3969 A69-40072
- Sandwich beams interlaminar shear stress calculations, considering roles of moduli of elasticity and layers thickness relative to beam
22 p4041 A69-40080
- Young modulus for wire or strip shaped specimens determined from unloaded cantilever vibration considerations
22 p4042 A69-40443
- Reinforcement effect on stress relaxation and creep in hereditary elastic materials, assuming integral shear modulus operator with exponential kernel
22 p4045 A69-40744
- Static pressure-diameter measurements on small pulmonary blood vessels of frogs, analyzing capillary septal area as function of intravascular pressures noting high compliance
22 p3885 A69-40974
- Stress-strain relations for materials with variable modulus of elasticity applied to internal work, obtaining potential strain energy
22 p4047 A69-41171
- Positive phase shift relation to elastic modulus enhancement of smooth muscles of rabbit, cat and dog bladder, pulmonary artery and large veins
23 p4083 A69-41459
- Overall elastic moduli evaluation for solid composite materials comprising matrix of homogeneous elastic materials embedded with cylindrical shape inclusions
24 p4396 A69-42731
- Composite media elastic moduli upper and lower bounds determination using variational principles to characterize displacement and stress in time harmonic deformation
24 p4406 A69-43701
- MOHR CIRCLES**
U FRACTURE MECHANICS
- MOIRE EFFECTS**
Moire fringe interpolation and multiplication by shifting master interference grating, noting increased measurement sensitivity
03 p0524 A69-13063
- Mirror image and oblique shadow method forming moire patterns to measure surface topography
08 p1312 A69-20103
- Moire patterns for photoelastic strain analysis noting applications to elasticity, plasticity and creep problems
11 p1982 A69-24944
- Holographic in-focus projection of images on three dimensional focal planes of arbitrary shape, noting moire pattern strain analysis
11 p1889 A69-25653
- Moire fringes, discussing fringe multiplication by filtering to obtain small strain measurement sensitivity and engraving technique for wave front reconstruction
12 p2099 A69-27164
- Moire and gridwork methods of plastic strain analysis with application to plane strain and axisymmetric extrusion
13 p2359 A69-27256
- Optical refraction effects from refractive index gradients in stressed models as limitation on moire interferometry usefulness in Boussinesq problem and expanding pulse studies
14 p2531 A69-28883
- Stress and strain fields for circular rubber ring under diametrical compression between flat plates, using moire, large strain analysis and photoelastic verification
14 p2531 A69-28884
- Optophotoclectric pickup design for angular displacement measurements, considering application of moire pattern produced by radial diffraction gratings
14 p2447 A69-29327
- Bending surface of shells under crosswise load analyzed by moire method, considering rotating cylindrical surfaces
15 p2713 A69-31056
- Rotatory cylindrical shells supported at corners under symmetric load, determining deformation in arbitrary locations by moire method
15 p2715 A69-31546
- Moire reflection technique applied to study of stress-strain state of partially clamped rectangular cantilever plates under various loads
17 p3058 A69-33203
- Strains in solids of any form, using moire method combined with holographic interferometry
18 p3139 A69-35280
- Book on moire fringes in strain analysis, discussing methods for strain measurement in deformed bodies and engineering structures
19 p3435 A69-35835
- Microwave holograms generated by spinning dipole field perturbation technique, showing zone plates and moire fringe resolution
19 p3315 A69-36824
- Vibrating circular plate standing wave lateral displacements visualization by photographically recorded moire patterns
20 p3537 A69-37067
- Telecentric lens principle for accurate optical strain measurements, using moire grids
21 p3844 A69-39322
- Fringe multiplication techniques for moire fringe arrays of inhomogeneous strain fields
21 p3845 A69-39328
- Moire technique for gaging surface deformations or surface configuration differences by optical interference patterns
21 p3726 A69-39775
- Grids applied to plastic samples for strain measurement using moire fringe method, comparing tensile test results with Linley extensometer
22 p4042 A69-40312
- Moire effect applications to stress analysis, enumerating advantages over conventional grid techniques
22 p4042 A69-40315
- MOISTURE**
Moisture effects on crack propagation in high strength aluminum alloys studied by fatigue tests
01 p0098 A69-10766
- Soil, moisture and other requirements for microorganism survival in simulated Martian environment
01 p0018 A69-11091
- Moisture and hydrogen role in hot chloride salt stress corrosion cracking of Ti alloys by radiotracer technique and mass spectrography
19 p3352 A69-36904
- MOISTURE CONTENT**
NT ATMOSPHERIC MOISTURE
Total atmospheric moisture content by measuring radio wave absorption at water vapor molecule rotational spectrum absorption line
02 p0274 A69-11438
- Atmospheric water vapor content from summer-fall 1966 measurements of atmospheric radio wave absorption of thermal radio emission, describing experimental apparatus
02 p0274 A69-11439
- Hot pressed boron nitride properties and fabrication, noting low moisture absorptivity and aerospace applications
02 p0270 A69-11802
- Dry heat sterilization of spacecraft, microorganism water content and recommendations for fabrication conditions for spacecraft
05 p0712 A69-15939
- Atmospheric noise at 33.5 GHz observed most on days of cumulus clouds probably due to local convective activity
05 p0721 A69-16661
- Flow velocity, density, temperature, dryness and pressure in mixing chamber of MHD vaporizer
06 p0871 A69-17919
- Radiating surface temperature and total atmospheric moisture content determinations based on meteorological earth satellite measurements of outgoing radiation in IR
06 p0952 A69-17988
- Water content of tektites, impactites and artificial glass of tektite composition using IR absorption measurements
10 p1778 A69-23413
- Lunar surface pore water /or ice/ detection by active orbital or surface electromagnetic experiments, noting water effect on reflection coefficient
11 p1958 A69-24693
- Mean vertical moisture profile for summer and winter midlatitude stratosphere from Soviet radiosonde data
12 p2070 A69-26582
- Thunderstorm thermal noise emission determined by radiometer and steerable parabolic antenna in preparing water content contours along radio rays
12 p2127 A69-27002
- Microwave radiometric brightness temperature relationship to soil moisture content for estimating bearing strength
12 p2099 A69-27008
- Radio wave single scattering at particles randomly grouped in space, showing correlation function of water content fluctuations in scattered field in clouds
16 p2807 A69-32267
- Dimensions, concentration and spectrum of large precipitation particles in clouds and cloud water content by measuring reflectivity and absorptivity at different wavelength
16 p2807 A69-32268
- He-Ne laser emission attenuation coefficient relation to water content of artificial fogs for 0.63, 1.15 and 3.39 microns
21 p3738 A69-39118
- Rocket optical experiment for determining water, methane, nitric oxide and ozone vertical profiles in stratosphere and mesosphere
22 p4035 A69-39910
- Environmental neutron flux measured by various techniques, studying effects of soil and moisture on density
22 p4002 A69-40094
- Subjective feeling of dampness correlation with relative humidity of air at zero and below zero C temperatures
23 p4109 A69-41870
- Radiative transfer theory applied to layer cloud with normal liquid moisture content, discussing volume extinction, scattering and absorption coefficients, etc
23 p4184 A69-42177
- Solid cloud cover moisture content relation to outgoing thermal radiation, obtaining correlation coefficient and regression equations
23 p4184 A69-42488
- MOISTURE METERS**
NT HYGROMETERS
NT PSYCHROMETERS
Cloud instrumentation for measurement of icing conditions of airplane flight tests
01 p0055 A69-11044
- Moisture detector for evaluating trapped water effects in thermal insulation, describing equipment and test procedure
24 p4312 A69-42755
- MOL [ORBITAL LABORATORIES]**
U MANNED ORBITAL LABORATORIES
- MOLABS**
U LUNAR MOBILE LABORATORIES
- MOLDAVITE**
Moldavites and Ries crater material, studying Rb-Sr isochronal relationship
23 p4154 A69-41341
- Chemical composition and lechatelierite size frequency influence on moldavites bulk density, using data to elucidate origin
23 p4210 A69-41348
- Petrology of Czechoslovak moldavites, tabulating properties, mapping locations and distribution
23 p4210 A69-41350
- MOLDING MATERIALS**
Epoxy molding compounds characterization and classification for development and evaluation of raw materials
04 p0620 A69-14954
- Electric components encapsulation by combining liquid resin techniques and transfer molding
04 p0607 A69-14955
- Matched metal molding of short graphite fiber composites
08 p1339 A69-20502

Potential usage of titanium in cast parts for gas turbine engines, emphasizing alloys development
[ASME PAPER 69-GT-24] 09 p1513 A69-22494

Glass reinforced plastic molding compounds for OV-10A airplane structural components, noting cost savings
[SAE PAPER 690342] 11 p1890 A69-24497

Compression molding of molecular salt-like intermediate Pyrrone powders by two pressure method, noting volatiles elimination 14 p2469 A69-29415

Injection holding for ceramic parts from nonplastic materials, presenting time-temperature schedules for low temperature removal of molding material without damage 17 p2978 A69-33376

Epoxy molding compounds performance on DIP integrated circuits, determining comparative moisture protection provided by encapsulants 19 p3280 A69-35546

Transfer molded epoxy dielectrics, comparing encapsulation rate, pressure and cure times to compression molding 19 p3281 A69-35548

Moldable plastic shim material for structural airframe components, discussing application requirements 19 p3319 A69-35551

Molded fiber composites in aerospace components applications, considering weight, stiffness, production and cost 24 p4326 A69-43448

MOLDS

Rigid PVC, urethanes and thermosets processing for high performance, noting injection molding and machine developments role 18 p3148 A69-34611

MOLECULAR ABSORPTION

Oscillator strength determination for Schumann-Runge band system in molecular oxygen 02 p0284 A69-12832

Pressure induced microwave absorption in molecular N for various temperatures, determining dielectric loss, absorptivity and quadrupole moment 03 p0472 A69-13317

Dark equatorial belt of Jupiter atmosphere in 1962 and 1963, noting photometric contrasts, molecular absorption and possible structure 04 p0658 A69-14961

Methane broadening and anomalously small pressure shift of 3.39 micron rotation-vibration line, using laser saturated molecular absorption 04 p0633 A69-15424

Absolute wavelength standard using saturated molecular absorption in methane inside He-Ne laser cavity [IEEE PAPER P-1] 05 p0775 A69-16323

Collisionally induced microwave absorption by non-polar gases, discussing dimer absorption 06 p0962 A69-17816

Atmosphere effects on solar IR spectra, discussing role of absorbing molecule distribution in transmittance calculations 13 p2341 A69-27589

Neodymium laser emission of organic molecules in UV region noting molecular absorptivity and fluorescence 13 p2271 A69-27657

CO absorption lines in solar spectrum analyzed theoretically and experimentally indicating random distribution of molecules 15 p2688 A69-30552

Dark equatorial belt of Jupiter atmosphere in 1962 and 1963, noting photometric contrasts, molecular absorption and possible structure 18 p3197 A69-34724

Atmospheric slant path molecular absorption and emission from band model methods, discussing computer program prediction capabilities 19 p3375 A69-36052

DC beam experiment for determining molecule sticking coefficients of gas beams incident on Ti, Ba and Sr gettering surfaces at cryogenic temperature 23 p4151 A69-41544

MOLECULAR BEAMS

Intensity of visible and UV light from beam of positive deuterium molecular ions excited by passage through thin C foil 03 p0471 A69-13166

Crossed beam studies of ion-molecule reaction mechanisms, crossing approximately monoenergetic ion beam with thermal molecular beam 03 p0382 A69-13460

Molecular jets obtained by charge exchange of triatomic ion beams consisting of hydrogen, deuterium and nitrogen, noting formation, energy level, etc 05 p0797 A69-16339

Molecular and atomic beam focusing in electric and magnetic fields with helical symmetry of specified type 06 p0959 A69-16917

Dissociation of hydrogen on tantalum using modulated molecular beam mass spectrometry 06 p0960 A69-17107

Supersonic molecular beam sampling system for coupling mass spectrometer to alkali metal-air reacting flow system in kinetics study, noting gas dynamic effects [AIAA PAPER 69-94] 06 p0930 A69-18099

Collimated nozzle beam for probing low density gas flows, discussing transition from free molecular to isentropic flow and Knudsen numbers 07 p1136 A69-19467

Molecule reorientation and transition probability in molecular beam maser using formaldehyde 07 p1158 A69-19760

Molecular beam gas laser operating at transitions between ground state and resonance excited state of inert gas atom, obtaining population inversion 08 p1325 A69-20325

Speed distribution and density of molecular beam from time domain measurements of propagated beam perturbations, discussing gate functions 10 p1652 A69-23340

Hetero-epitaxial germanium films on GaAs by germanium condensation from molecular beams in vacuum, obtaining p-type conductivity 11 p1938 A69-25033

Crossed beam apparatus with mass selected variable energy primary beam for study of angular and velocity spectra of ion-molecule reactions 12 p2092 A69-26477

Molecular beam scattering analysis by four parameter B-C intermolecular potential, plotting expansion coefficients against reduced curvature 13 p2301 A69-27206

Metastable molecules and fragments produced by electron excitation of nitrogen, hydrogen, carbon dioxide and nitrous oxide, noting excitation functions, kinetic energy, etc 13 p2301 A69-27362

Molecular beam behavior in constant electric and magnetic fields, applying laser frequency dependence on magnetic field orientation to resonator 15 p2655 A69-30943

Hyperfine spectrum analysis of NaCl at low field using molecular beam electric resonance method, discussing Hamiltonian function representation 16 p2815 A69-32794

Molecular beam gas laser operating at transitions between ground state and resonance excited state of inert gas atom, obtaining population inversion 17 p2981 A69-33315

Molecular beam experiments on moon, noting lunar environmental advantages for studies of beam-beam scattering, beam-surface interactions, beam-field deflection, etc 18 p3113 A69-34240

Strong shock wave structural model, considering near molecular beam, upstream hypersonic and downstream subsonic flows and beam-continuum conversion by collision 18 p3120 A69-34457

Velocity and angular distributions of KBr formed in reactive collisions between crossed molecular beams of K and thermal HBr/DBr/ 18 p3178 A69-35476

High and medium energy molecular beams - Conference, Cannes, July 1969 19 p3375 A69-36171

Skimmer interaction influences on nozzle beam production explaining intensity maxima, proposing model assuming normal shock across skimmer mouth 19 p3238 A69-36172

Single junction vacuum thermocouple measuring thermal beam effect with reference to velocity distribution perturbation in molecular beam scattering 19 p3376 A69-36173

Thermal molecular beam sources fabricated from multichannel arrays, describing molecular flux leak rates and angular distributions 19 p3376 A69-36175

High energy neutral molecule beam for gas-surface interaction studies generated in electron bombardment ion source 19 p3376 A69-36176

Low and moderate energy gas molecule-solid surface interactions, using molecular beams 19 p3376 A69-36177

Wall boundary condition model modification applied to molecular beam-solid surface scattering, noting qualitative agreement with observed distributions 19 p3377 A69-36179

Solid surface roughness influence on reflection of thermal energy molecular jets, showing shock determined by incidence angle 19 p3377 A69-36180

Gas molecules scattering by solid surface for monoenergetic and Maxwellian beams, discussing model with different values for magnitude and velocity direction 19 p3377 A69-36181

Satellite-borne experiments of neutral molecular beam-solid surface interactions, describing Molsink chamber, densitometer, sphere and paddlewheel satellites 19 p3377 A69-36182

Heated supersonic beam study of He-Ar intermolecular potential, determining total elastic collision cross section as function of velocity in scattering chamber 19 p3377 A69-36183

Energy dependence of elastic total collision cross section of identical He molecules, using velocity selected primary beams at low target temperature 19 p3378 A69-36186

Supersonic molecular beam relative intensity represented as function of nozzle to collimator distance and gas admission pressure 20 p3579 A69-37432

Maxwell coefficient change of Cd atoms in molecular beam/ diffusely reflected from metal surfaces related to reflector temperature, material and fabrication method 20 p3580 A69-37814

Aerodynamic forces under space-like conditions measured by swing balance, using large scale molecular beams for rarefied hypersonic gas flow simulation [AIAA PAPER 69-1032] 22 p3924 A69-40400

Molecular beams for simulating orbital flight through planetary atmospheres, considering various nozzle beam systems [AIAA PAPER 69-1031] 22 p3926 A69-40437

Crossed beam apparatus (evatron) for studying energy spectra of crossed positive ethylene ion beams and neutral ethylene molecule beams 24 p4280 A69-43813

MOLECULAR BONDS
U CHEMICAL BONDS

MOLECULAR CHAINS

Cross-links effect on char yields of azomethine polymers produced by aryl diamines with aryl diketones 08 p1269 A69-21060

Schiff base cross-links effect on synthesis of polymeric azomethines produced by bis exchange reactions, carbonyl and amine 08 p1269 A69-21061

Molecular rearrangements of nitrene intermediates, suggesting role in bond formation and breaking at nitrogen 20 p3484 A69-37485

Amino acid sequence of dogfish lactic dehydrogenase, isolating acylated amino-terminal peptide and arginine residues, indicating four polypeptide chain composition 24 p4280 A69-43051

Helix to coil transition for triple stranded macromolecule in solution, calculating ring weighting and partition functions and intact bonds 24 p4353 A69-43812

MOLECULAR COLLISIONS

Spatial and kinetic distributions of molecules reflected by surface in rarefied atmosphere, discussing mathematical model 01 p0122 A69-10041

Analytical mechanics of chemical reactions, discussing natural collision coordinates for three dimensional reactions and exchange collisions for molecule and atom 01 p0123 A69-10681

Intermolecular collision induced vibration to vibration energy transfer in nitrous oxide in various gas mixtures, measuring fluorescence and relaxation rates 01 p0123 A69-10684

HI and DI reaction into HD and 2I, noting need for rotational or vibrational excitation in addition to translational energy of collision 01 p0123 A69-10686

Collision integrals for high temperature gases calculated for high order potentials 01 p0124 A69-10929

Preionization of gases by laser beam using theory based on molecular equilibrium concentration and collision excitation

02 p0283 A69-11703

Numerical solution for excitation of oscillations in diatomic molecules during atom-molecule collisions at high temperatures, determining intermolecular interaction forces

02 p0284 A69-12485

Energy distribution among products of reactive collision of atomic H with Br molecule yielding HBr and Br atom, using perturbed Morse oscillator approximation

03 p0472 A69-13316

Frictional forces and collision frequencies for ions moving in neutral gases

03 p0421 A69-13328

Electron backscattering from cathode to cathode due to collisions with molecules, assuming isotropy of scattering

05 p0800 A69-15738

Uranium hexafluoride-hydrogen hydrogen fluoride chemical laser, discussing conditions for negligible collisional deactivation and defined rotational temperature determination

05 p0771 A69-15906

Ion-molecule collisions of Ar-Co and N-No pairs, discussing charge exchange reaction rates and spiraling nature

05 p0797 A69-16428

Population inversion of vibrational levels due to molecular collisions in carbon dioxide lasers, calculating transition probabilities, laser parameters and gain profile [IEEE PAPER G-15]

07 p1151 A69-19061

Optical potentials for rotational and vibrational transitions in inelastic molecular collisions, considering adiabatic and sudden approximations

08 p1358 A69-21008

Near resonant transfer of vibrational energy from carbon dioxide nu 3 mode to N 14 and N 15 molecules in collisions

08 p1358 A69-21011

Hydrodynamic equations and Grad transport coefficients for nonequilibrium rarefied monatomic gases developed for molecular collisions

09 p1481 A69-21888

Enskog method for Boltzmann equation, analyzing asymptotic nature of integral kinetic equation for molecular mean free paths and Laplace probabilities

09 p1481 A69-21889

Nonadiabatic collision broadening theory for IR spectral lines applied to carbon dioxide-carbon dioxide and carbon dioxide-nitrogen collisions, estimating rotational line widths

09 p1543 A69-22250

Molecular reaction rates and ion/electron vertical profile and concentrations in equatorial ionosphere, applying computer simulation to numerical solution of continuity equations

10 p1688 A69-23929

Exact solutions for two state potential curve crossing in subexcitation molecular collisions in terms of various decoupling schemes

12 p2131 A69-25983

Translational-vibrational energy transfer value between atom and diatomic molecule determined using steric factor with repulsive interaction potential

12 p2134 A69-25988

Shapes of extreme wings of collision-broadened carbon dioxide lines, noting absorption deviation from Lorentz-shaped lines

12 p2132 A69-26248

Vibrational energy exchange between diatomic molecules by IR emission of CO fundamental behind shock waves

13 p2301 A69-27361

Oscillations and decomposition of diatomic gas molecules at high temperatures during atom/molecule collisions, deriving kinetic equations for energy level changes

13 p2302 A69-27797

Carbon dioxide band vibration-rotation transitions saturation characteristics, stressing role of collisions in molecular gas lasers

14 p2457 A69-28928

Plane shock layer structure in pseudoMaxwellian monatomic gas, integrating Krook equation for gas molecule velocity

14 p2432 A69-29613

Perturbed molecular distribution in translational and internal degrees of freedom in dilute chemically reacting gases with low ion concentrations

14 p2410 A69-29988

Kinetic theory of gases collision cross section definition compared to usual definition, discussing time reversed collisions

14 p2488 A69-29993

Gasdynamic model of comet nucleus region, discussing molecular collisions, surface brightness distribution and dust particle motion

15 p2684 A69-30520

Nonlinear rarefied gas flow problems with thermal nonequilibrium solved by numerical methods, considering intermolecular collisions effect

17 p2952 A69-33325

Long lived highly excited atoms production in electron collisions with CO, O and N molecules

18 p3177 A69-35125

Velocity and angular distributions of KBr formed in reactive collisions between crossed molecular beams of K and thermal HBr/DBr/

18 p3178 A69-35476

Ion cyclotron double resonance technique to identify collision-induced ion fragmentation pathways illustrated with p-chloroethylbenzene

19 p3265 A69-36292

Deactivation rate constants of carbon dioxide vibrationally excited by high temperature collision with carbon dioxide or nitrogen molecules, describing laser apparatus and reaction cells

20 p3578 A69-36937

Gas molecule collision influence on photon echo intensity produced by two linearly polarized laser pulses incident on sulfur hexafluoride

21 p3774 A69-38589

Collision processes in gaseous nitrogen leading to production of positive triatomic, diatomic and monatomic nitrogen ions

22 p3986 A69-40722

Molecular collision pumping mechanism for anomalous microwave absorption by formaldehyde rotational transition in Galaxy dust cloud

22 p4029 A69-40768

Lyman alpha radiation from electron collisions with simple H-containing molecules, finding dissociative excitation cross section role

24 p4351 A69-43033

Computer made movies and time history plots for ion-dipole collisions involving polar molecules /CO, HCL and acetonitrile/

24 p4352 A69-43124

Monte Carlo calculation of free molecular flow over concave spherical surface, considering partial diffuse reflection and imperfect energy accommodation

24 p4248 A69-43592

MOLECULAR DIFFUSION

High speed automatic osmometer applied to measurements of diffusible branched polyethylene samples, discussing apparent molecular weight observations

01 p0024 A69-10933

Radiative transfer equation for pure molecular scattering inverted for estimating vertical ozone distribution

07 p1126 A69-19042

Temperature variability data for 120-km altitude from observations of grenade glow clouds, calculating molecular diffusion coefficients and atmospheric temperature and density

07 p1127 A69-19277

Laser diodes p-n junctions obtained by Zn diffusion into Ga arsenide, stressing junction flatness problem and arsenic vapor pressure effect

13 p2323 A69-28640

Atomic nitrogen and nitric oxide density in upper atmosphere during nighttime calculated, allowing for atomic and molecular diffusion

16 p2785 A69-32622

Rotational-vibrational relaxation and molecular diffusion effect on saturation parameter of carbon dioxide laser, measuring gain as function of input power

19 p3338 A69-36692

Diffusion parameters for fluid stream flowing from round hole with given radius and velocity into wake flow

21 p3696 A69-39091

Free stream dispersion without permeation using nonporous glass beads and solutes, examining flow rate, particle size distribution, solute diffusivity, etc

22 p3894 A69-39873

MOLECULAR DISSOCIATION

U DISSOCIATION

MOLECULAR ELECTRONICS

MERA /Molecular Electronics for Radar Applications/ modules testing in planar array simulator, measuring far field amplitude patterns in transmitting and receiving modes

22 p3912 A69-40067

MOLECULAR ENERGY LEVELS NT INTERMOLECULAR FORCES

Ground state energies of HeH divalent ion, comparing perturbation calculation values with variation-perturbation technique

01 p0123 A69-10547

Preionization of gases by laser beam using theory based on molecular equilibrium concentration and collision excitation

02 p0283 A69-11703

Doublet electronic states of benzyl radical, discussing configuration-interaction calculations and transition predictions

03 p0472 A69-13321

Thermodynamic approach to calculation of molecular lasers, determining various population levels of carbon dioxide molecule by measuring amplification factors for rotational vibrational transitions

06 p0934 A69-17465

Population inversion of vibrational levels due to molecular collisions in carbon dioxide lasers, calculating transition probabilities, laser parameters and gain profile [IEEE PAPER G-15]

07 p1151 A69-19061

Perturbation methods for exchange and Coulomb energy of hydrogen molecule, calculating Hamiltonian by wave function

07 p1186 A69-19446

Heat transfer effect on population inversion time variation in pulsed carbon dioxide laser and molecules excitation rates dependence on gas mixture composition

09 p1519 A69-22289

Carbon dioxide laser upper level rotational relaxation rate constant measurement, observing CW gain

10 p1701 A69-22948

Rotational excitation and scattering cross sections for rigid diatomic molecules reduced to yield distorted wave approximation, resulting in inelastic transition probabilities

10 p1726 A69-23524

Oscillations and decomposition of diatomic gas molecules at high temperatures during atom/molecule collisions, deriving kinetic equations for energy level changes

13 p2302 A69-27797

Lifetime of vibrational levels of carbon dioxide molecules as function of discharge current and power dissipation, noting gas heating

13 p2273 A69-28579

Energy level population of carbon dioxide molecules, noting intensity of spontaneous emission

13 p2274 A69-28580

Radiative decay of polyatomic molecules, applying Green function form for transition probability to decay of manifold of closely spaced coupled levels

14 p2488 A69-29924

Lambda doublet maser emission from excited OH rotational level, discussing conditions necessary for microwave radiation

18 p3185 A69-34292

Quantum transitions between molecular or atomic energy levels noting microwave spectroscopy utilization

18 p3099 A69-35405

Rate coefficient for primary process in removing molecular nitrogen in high vibrational levels from active nitrogen by N atoms

19 p3379 A69-36424

Electron reactivity of one equivalent oxidizing agents at ZnO surface by electrochemical reduction

19 p3392 A69-36731

Thermodynamic approach to calculation of molecular lasers, determining various population levels of carbon dioxide molecule by measuring amplification factors for rotational vibrational transitions

20 p3555 A69-37948

Photochromic panel for flash blindness protection using epoxy plastic plates containing aromatic hydrocarbon compounds excited to triplet states

21 p3668 A69-39783

Excited states lifetime of carbon dioxide and nitrous oxide ions deduced from spontaneous radiative deexcitation in vacuum after passage through gaseous target

22 p3985 A69-40715

Herzberg bands synthetic spectra matched to various spectrograms to determine vibrational populations of molecular O state in nightglow

24 p4310 A69-43186

MOLECULAR FLOW

NT SLIP FLOW

NT TRANSITION FLOW

Book on mathematical and physical fundamentals of molecular gasdynamics based on statistical mechanics, discussing free molecular flow

01 p0060 A69-10711

Molecular flow in space simulation chambers with cryowalls, noting nonuniform flux density distribution
01 p0057 A69-11153

Crystals and molecules diffraction in supersonic molecular jets
02 p0284 A69-12629

Continuum flow boundary in freely expanding jet estimated from molecular mean free path and modulus of random motion mean velocity
10 p1679 A69-23425

Gas molecular mean free path effect on performance of spiral grooved thrust bearing, discussing slip flow factor and He Knudsen number
[ASME PAPER 68-LUBS-17]
13 p2266 A69-27273

Molecular gas flows in containers for space environment simulation, discussing flux distribution
13 p2241 A69-28081

Molecular flow network theory extended to pulsed operation with gases mixtures having various molecular weights
13 p2247 A69-28085

Molecular flow network theory applicable to volumes interconnected by small orifices or porous membranes for transient pressure measurements
16 p2813 A69-32325

Supersonic leading edge problem using nonlinear Boltzmann equation with ellipsoidal model, calculating molecular distribution functions for flow field
[AIAA PAPER 69-652]
17 p2892 A69-33464

Pure gas suction through free jet shock structure, analyzing aerodynamic effect of molecular separation
19 p3240 A69-36650

Rarefied molecular gas flow past permeable surface, determining reflection law and flow parameters
20 p3459 A69-37438

MOLECULAR GASES

NT DIATOMIC GASES

NT POLAR GASES

NT POLYATOMIC GASES

Multiphoton ionization of molecular hydrogen and rare gases using Q switched Nd laser apparatus
02 p0283 A69-11701

Equilibrium of rotational degrees of freedom in gases undergoing relaxation, noting excitation, relaxation time, kinetics, transfer effects and measurements for hydrogen
02 p0284 A69-12667

Trimodal solutions for strong shock structure in gas of spherocylindrical molecules
03 p0414 A69-13136

Energy transfer and viscosity coefficients during gas molecular interactions, using spherical monatomic gas molecules model
03 p0415 A69-13419

Ammonia gas molecules in interstellar medium, discussing detection in direction of galactic center by means of microwave emission
03 p0518 A69-14258

Gases optical pumping by self radiation laser action, discussing high intensity oscillatory transitional wide bands of molecular gases
04 p0610 A69-14382

Activation energies of bimolecular multivalent transfer reactions of gaseous compounds, considering bond dissociation energy, length and order
[WSCI PAPER 68-48]
07 p1239 A69-18321

Variational solution of linearized molecular chemical-kinetic Boltzmann equation, discussing perturbation of Maxwell distribution, nonequilibrium correction to reaction rate and activation energy
07 p1185 A69-19301

Dissociation-ionization fronts in interstellar molecular hydrogen clouds, analyzing effects of UV radiation from early stars
07 p1221 A69-19584

Wavelike photodissociation of gas molecules under quasi-monochromatic pulsed radiation, investigating associated supersonic disturbances
08 p1354 A69-19950

Gas adsorption of molecular oxygen and hydrogen on molybdenum surface using collector section of field emission retarding potential analyzer
08 p1268 A69-20179

Region of transition from laminar to turbulent flow in meteor trains, suggesting electron attachment processes to molecular oxygen in presence of third body
08 p1393 A69-20608

Luminescence spectra of molecular gases excited by fast electrons in infrared spectral region, noting H alpha line
09 p1590 A69-21382

Effective cross sections of UV radiation absorption by molecular oxygen in Schumann-Runge bands at high temperatures
11 p1921 A69-24617

Molecular carbon dioxide laser radiation emission in tube containing low pressure atmospheric air, using C cathode and Al cold cathode
11 p1895 A69-24625

Slip flow problem for general specular-diffuse boundary condition in kinetic theory of gases, noting molecular distribution function
11 p1869 A69-24893

Slow charged products of charge exchange collisions by ions in molecular gases, comparing kinetic energies during various reactions
13 p2301 A69-27455

Molecular gas flows in containers for space environment simulation, discussing flux distribution
13 p2241 A69-28081

Charge transfer and vibrational excitations in hydrogen molecular ion-hydrogen gas collisions
13 p2302 A69-28196

Fluorescence stimulated by high energy electron and ion beams, determining vibrational temperature and concentration of molecular oxygen in high enthalpy wind tunnel flows
13 p2302 A69-28265

Gases optical pumping by self radiation laser action, discussing high intensity oscillatory transitional wide bands of molecular gases
14 p2456 A69-28755

Molecular hydrogen electron scattering, optical refractivity and molecular anisotropy used to construct model dipole spectrum consistent with oscillator strength rules
14 p2488 A69-29094

Ion-molecular reactions measurements in ionosphere by VV type device and RF mass spectrometer
15 p2603 A69-31407

Molecular gas absorption coefficient dependence on laser emission energy density, considering disturbed equilibrium distribution of molecules
17 p2983 A69-33973

Luminescence spectra of molecular gases excited by fast electrons in IR spectral region, noting H alpha line
18 p3176 A69-34770

Thermal energy rate constants of ion-molecule reactions in gaseous hydrogen, deuterium and HD, using ion cyclotron resonance method
20 p3578 A69-36934

Electron band forces probable values of Meinel system positive N molecules and first positive system of nitrogen molecules at high temperatures
20 p3579 A69-37307

Ambient atmospheric temperature and molecular nitrogen density measured simultaneously by rocket-borne electron beam luminescence method
20 p3543 A69-37799

Gas molecule collision influence on photon echo intensity produced by two linearly polarized laser pulses incident on sulfur hexafluoride
21 p3774 A69-38589

Molecular hydrogen, oxygen and deuterium additions effect on CW laser operation with ordinary and heavy water as active medium
21 p3738 A69-39131

Rocket measurements of diurnal variations of F region concentrations and temperature of molecular N and O, showing disagreement with satellite drag data
22 p3939 A69-40515

DC beam experiment for determining molecule sticking coefficients of gas beams incident on Ti, Ba and Sr gettering surfaces at cryogenic temperature
23 p4151 A69-41544

MOLECULAR INTERACTIONS

Ion reactions with neutral molecules, discussing analogies with conventional chemical systems
01 p0124 A69-10859

Intermolecular interaction potentials for dissociating air components determined by calculating collision integrals for very high temperature gases
02 p0283 A69-11586

Electro-optical measurements to determine intermolecular interaction temperatures in organic liquids compressed by shock waves
02 p0230 A69-11979

Energy transfer and viscosity coefficients during gas molecular interactions, using spherical monatomic gas molecules model
03 p0415 A69-13419

Crossed beam studies of ion-molecule reaction mechanisms, crossing approximately monoenergetic ion beam with thermal molecular beam
03 p0382 A69-13460

Negative ion-molecule reactions in nitrous oxide using mass spectrometer, noting negative ion concentration pressure dependence
06 p0960 A69-17106

Reaction rates coefficients of oxygen ions with molecular oxygen and nitrogen in nighttime F region over Moscow based on loss coefficient estimate
06 p0919 A69-17724

Molecular interactions in ammonia maser beam, discussing influence on oscillation extinction beyond given flow rate
07 p1145 A69-18478

Statistical theory of fluids in equilibrium based on correlation functions for pair interactions between constituent molecules, invoking superposition closure approximation
08 p1350 A69-19868

Ion-molecule reactions constants studied directly in ionosphere, using air injection from geophysical probe and airborne RF mass spectrometer
08 p1311 A69-21159

Electrons resonance scattering by diatomic molecules from elastic and inelastic channel measurements in transmission
11 p1921 A69-24418

Superstructures in multicomponent alloys, transition mode and temperature, ordered state and atomic interactions
11 p1937 A69-24703

Crossed beam apparatus with mass selected variable energy primary beam for study of angular and velocity spectra of ion-molecule reactions
12 p2092 A69-26477

London-van der Waals interaction energy of symmetric molecular pair calculated in perturbation theory second order as infinite series in negative powers of separation
12 p2131 A69-26606

Exchange interactions in lithium ferrite aluminates, measuring spontaneous magnetization by ballistic technique from 77 K to Curie point
13 p2320 A69-27995

Two center Coulomb integrals expressed in terms of center separation, noting applications to molecular calculations
14 p2471 A69-29926

Electro-optical measurements to determine intermolecular interaction temperatures in organic liquids compressed by shock waves
15 p2561 A69-30264

Elementary processes cross sections in charged states changes during proton-hydrogen molecule interactions
15 p2655 A69-30963

Temperature dependence of intermolecular interaction averaged potentials with respect to vibrational states
15 p2655 A69-30982

Langevin equation for interacting molecule system derived by Fourier transformation of Hamiltonian, noting physical correspondence to equation for shear viscosity in monatomic liquids
16 p2815 A69-32370

Nitrous oxide-CO bimolecular reaction and O-CO recombination in single pulse shock tube
16 p2748 A69-32793

Free jet shock wave structure penetrated by surrounding pure gas molecules
18 p3086 A69-34819

Low and moderate energy gas molecule-solid surface interactions, using molecular beams
19 p3376 A69-36177

Gas molecules scattering by solid surface for monoenergetic and Maxwellian beams, discussing model with different values for magnitude and velocity direction
19 p3377 A69-36181

Acetonitrile ion-molecule chemistry using ion cyclotron resonance, discussing reaction of vibrationally excited methyl ions from electron impact
19 p3265 A69-36290

Gas phase ion-molecule chemistry of HCN by ion-cyclotron resonance spectroscopy identifying individual reactions by double resonance
20 p3485 A69-38262

Singlet-singlet energy transfer kinetics dependence on emission and absorption spectra overlap via dipole-dipole interaction
22 p3895 A69-40056

Quantum-mechanical theory of unimolecular kinetics and predissociation developed from generalized Fano theory of resonant scattering
22 p3986 A69-40724

Chemical high pressure laser action produced by stimulated phototransition of electrons at contact mo-

ment between pair of reacting nonexcited gas molecules
22 p3965 A69-41117

Formation mechanism of positive ethyl ion and hydrogen molecule during interaction between positive methyl ion and methane molecule
24 p4280 A69-43814

MOLECULAR IONS

Ground state energies of HeH divalent ion, comparing perturbation calculation values with variation-perturbation technique
01 p0123 A69-10547

Alpha recombination coefficient of molecular helium ions measured in helium afterglow plasmas as function of electron density and gas temperature
02 p0283 A69-11834

Metastable positive He molecules and He atoms decay in afterglow, taking into account simultaneous emission at 4650 angstroms during absorption studies
02 p0287 A69-11932

Charge transfer cross sections for slow ion production in nitrogen molecular ion beams incident on hydrogen and deuterium
05 p0796 A69-15914

Hydrogen ions collision-induced dissociation cross section angular dependence measured, showing qualitative agreement with theoretical predictions
05 p0798 A69-16698

Nitrogen ion number density time dependence by mass spectrometric probing of decaying nitrogen plasmas, noting molecular ion production by colliding metastable nitrogen molecules
07 p1184 A69-19141

Two body rate coefficients for charge transfer reactions of nitrogen, oxygen and NO positive ions to Na atoms measured using flowing afterglow system
07 p1185 A69-19303

Drift measurements of rate constants for charge transfer in ion-molecule processes
08 p1355 A69-20210

Temperature dependence of dissociative recombination and molecular ion formation in decaying He, Ne and Ar plasmas in discharge tube energized with capacitor bank
08 p1356 A69-20741

Molecular ion C13H line found in zeta Oph at 4232.08 A, measuring equivalent width and finding C12/C13 ratio
09 p1603 A69-22266

Ratio of volume emission rates of 5577 A band and of positive N molecular ion first negative system for use in auroral observations
09 p1491 A69-22607

Direct nonresonance excitation of rotational and vibrational states of diatomic molecular ions by electrons in Born-Coulomb approximation
10 p1726 A69-23627

Nitrogen dioxide molecular ions formation in air, discussing absence at lower pressures and early afterglow dominance in air ionized and dissociated by microwave pulses
11 p1879 A69-25158

Charge transfer and vibrational excitations in hydrogen molecular ion-hydrogen gas collisions
13 p2302 A69-28196

Spectrometric characteristics of He, H and molecular H ion recording counters as function of temperature
14 p2452 A69-29811

Electron impact field ionization source for mass measurement of molecular ions, noting organic geochemistry applications
15 p2608 A69-30428

RF spectra for hyperfine structure of ortho-hydrogen molecular ion, calculating doubling constant for vibrational effects
15 p2693 A69-30784

Lifetime of ground state oxygen molecular ions in sunlight from photodetachment rate by free electron production measurement from ions in buffer gas
16 p2848 A69-31973

Molecular ion concentrations determined using flat probe collector trap on Cosmos 5 satellite at 200-300 km
20 p3519 A69-37021

Photodetachment of electrons from nitrogen dioxide ions by light in violet portion of visible spectrum, noting wavelength dependence
22 p3985 A69-40575

Excited states lifetime of carbon dioxide and nitrous oxide ions deduced from spontaneous radiative deexcitation in vacuum after passage through gaseous target
22 p3985 A69-40715

Collision processes in gaseous nitrogen leading to production of positive triatomic, diatomic and monatomic nitrogen ions
22 p3986 A69-40722

Formation mechanism of positive ethyl ion and hydrogen molecule during interaction between positive methyl ion and methane molecule
24 p4280 A69-43814

MOLECULAR ORBITALS

Benzene anion radical in solid solution ESR spectrum, noting removal of orbital degeneracy at 4.2 degrees K
03 p0382 A69-13379

Linear combination of atomic orbitals-molecular orbitals self consistent fields calculation on beryllium dihydride, using Gaussian basis functions
05 p0811 A69-15910

Natural orbitals calculated from spin free one density matrix of open shell limited configuration-interaction wave function constructed from nonorthogonal basis
23 p4194 A69-42206

MOLECULAR OSCILLATIONS

Raman spectra and temperature dependent nuclear quadrupole resonance frequencies of p-dichlorobenzene and p-dichlorobenzene-D, calculating librational amplitudes
01 p0122 A69-10286

Numerical solution for excitation of oscillations in diatomic molecules during atom-molecule collisions at high temperatures, determining intermolecular interaction forces
02 p0284 A69-12485

Electron impact excitation cross sections for emission from first negative bands of positive N molecule ion
06 p0961 A69-17135

Absorption oscillator strengths for rotational lines in Lyman transition vibrational bands of molecular hydrogen from equivalent widths measured photoelectrically
06 p0962 A69-17818

Laser excited vibrational fluorescence for determining vibrational energy transfer rates in HCl-carbon dioxide, HCL-HI and HI-carbon dioxide
07 p1144 A69-18289

Sideband amplification via saturated gas resonance in 258 GHz reflection amplifier with hydrogen cyanide gas filled cylindrical cavity
07 p1145 A69-18479

Competition effects between rotational levels of carbon dioxide rotation-vibration band in traveling and standing wave lasers
[IEEE PAPER G-6] 07 p1151 A69-19055

Single mode carbon dioxide laser Lamb dip and vibration rotation lines absorption coefficients
[IEEE PAPER P-6] 07 p1153 A69-19075

Population inversion mechanism based on electron collisional excitation cross sections for molecular vibrational levels in carbon dioxide lasers
07 p1157 A69-19655

Optical potentials for rotational and vibrational transitions in inelastic molecular collisions, considering adiabatic and sudden approximations
08 p1358 A69-21008

Carbon dioxide bending mode deactivation by orthohydrogen, parahydrogen and deuterium through rotational transitions
08 p1358 A69-21010

Near resonant transfer of vibrational energy from carbon dioxide nu 3 mode to N 14 and N 15 molecules in collisions
08 p1358 A69-21011

Vibrational relaxation times in pure O and in O with methane impurity determined with acoustic absorption measurements
09 p1542 A69-21721

IR and Raman spectra of gas and liquid phase methylhydrazine and deuterated methylhydrazines, discussing vibrational motions, H bonding and thermodynamic functions
10 p1752 A69-23528

Direct nonresonance excitation of rotational and vibrational states of diatomic molecular ions by electrons in Born-Coulomb approximation
10 p1726 A69-23627

Vibrational energy transfer computed for processes in carbon dioxide-nitrogen laser based on vibrational relaxation data
10 p1706 A69-24083

Vibrationally excited nitrous oxide formation in reaction of N atoms with nitrogen dioxide, noting IR emission and vibrationally excited nitric oxide
11 p1832 A69-24880

Quantum oscillators interaction with two level molecules system in circular laser
11 p1899 A69-25325

Molecular vibration absorption spectra from variation of field emitted electron energy distribution due to inelastic electron-molecule interaction at metal-vacuum interface
12 p2132 A69-26097

Charge transfer and vibrational excitations in hydrogen molecular ion-hydrogen gas collisions
13 p2302 A69-28196

Electron cooling rates due to vibrational excitation of molecular oxygen calculated as function of electron temperature in E region
16 p2774 A69-31982

Torkington progressive rigidity model with successive minimum requirements relation to diagonal matrix elements of molecular force constants
17 p3068 A69-34230

Raman scattering during external and internal motion of oxygen molecules condensed phases, observing gamma and liquid phase bandwidths during stretching vibrations
24 p4353 A69-43808

MOLECULAR OSCILLATORS

Oscillator strength determination for Schumann-Runge band system in molecular oxygen
02 p0284 A69-12832

Weak magnetic fields effect on molecular oscillator frequency taking into account Zeeman sublevels
05 p0727 A69-15643

Oscillatory relaxation of multiatomic gases and gas mixtures with quantum exchange between oscillators, noting gasdynamic applications
15 p2654 A69-30109

Weak magnetic fields effect on molecular oscillator frequency taking into account Zeeman sublevels
16 p2762 A69-32500

Transient oscillations in ammonia maser oscillator observation based on switching achieved by signal injection into cavity at molecular resonance frequency
19 p3339 A69-36825

Hydrogen high level transition probabilities formula, giving two tables of oscillator strengths [AFCRL-69-0301]
22 p3983 A69-40149

MOLECULAR PHYSICS

Atomic and molecular excitation mechanisms in nonequilibrium gases up to 20000 K
08 p1354 A69-20146

Molecular state of hydrogen gas in high density condensations in H II regions, discussing effects of nearby stars
11 p1963 A69-25258

MOLECULAR RELAXATION

Molecular velocity distribution function in nonequilibrium flows, detailing asymptotic expansions in different velocity domains for weak shock
01 p0059 A69-10330

Relaxation processes and radiation stimulation in dense low temperature ionized plasma can lead to population inversion of several levels
01 p0131 A69-10789

Vibrational relaxation of diatomic gases behind shock waves, with variable heat bath temperature extended to constant enthalpy and constant total enthalpy conditions
01 p0061 A69-11204

Numerical solution for excitation of oscillations in diatomic molecules during atom-molecule collisions at high temperatures, determining intermolecular interaction forces
02 p0284 A69-12485

Krook kinetic relaxation equation generalized to include approximate kinetic equations with velocity independent collision frequency
02 p0234 A69-12582

Inverse population of vibrational levels generation in polyatomic molecules
02 p0259 A69-12647

Equilibrium of rotational degrees of freedom in gases undergoing relaxation, noting excitation, relaxation time, kinetics, transfer effects and measurements for hydrogen
02 p0284 A69-12667

Parameter changes of diatomic gas behind direct shock wave with simultaneous oscillatory and dissociative relaxation
03 p0418 A69-13835

Transitions in glasses at low temperatures, noting molecular relaxation dependence on copolymer composition
04 p0621 A69-15308

Equations describing chemical kinetics and conservation law derived for ionization relaxation processes behind shock wave front in air

05 p0746 A69-15891

Mechanical relaxation of poly 4 methyl pentene 1 at cryogenic temperatures, discussing temperature dispersion curve and secondary absorption associated with thermal motion of side chains

05 p0785 A69-16492

Chemical kinetic numerical integration techniques applied to equations for chemical relaxation [WSCI PAPER 68-45]

07 p1073 A69-18315

Relaxation equations for oscillatory degrees of freedom of molecular supersonic binary gas flow in Laval nozzle, obtaining population inversion

07 p1118 A69-18540

Thermal disturbance radiative decay time in carbon dioxide at low pressures and for nonzero vibrational relaxation times

07 p1215 A69-18843

Carbon dioxide bending mode deactivation by orthohydrogen, parahydrogen and deuterium through rotational transitions

08 p1358 A69-21010

Vibrational relaxation times in pure O and in O with methane impurity determined with acoustic absorption measurements

09 p1542 A69-21721

Atmospheric molecular oxygen temperatures from photoelectric recordings of absorption bands, analyzing relaxation process and photoeffects in oxygen molecules

09 p1490 A69-21863

Steady compression waves properties in relaxing gases found independent of thermodynamic behavior and relaxation process

10 p1631 A69-22893

Steady three dimensional flow of gases with thermodynamic relaxation, noting flow field weak discontinuities and effect of discontinuities in wall curvature

10 p1677 A69-22894

Carbon dioxide laser upper level rotational relaxation rate constant measurement, observing CW gain

10 p1701 A69-22948

Vibrational energy transfer computed for processes in carbon dioxide-nitrogen laser based on vibrational relaxation data

10 p1706 A69-24083

Carbon dioxide-N-He laser amplifier, noting gain time dependence and thermal relaxation rate after gas heating

11 p1899 A69-25054

Vibrational relaxation frequency of asymmetric stretching mode of carbon dioxide determined by measuring rate of thermal emission in shock waves near 4.3 microns

11 p1922 A69-25128

Vibrational energy exchange between diatomic molecules by IR emission of CO fundamental behind shock waves

• 13 p2301 A69-27361

Fluids structural relaxation analyzed by nonequilibrium thermodynamics and molecular kinetic theory, considering Brownian motion

13 p2299 A69-28037

Radiative decay of polyatomic molecules, applying Green function form for transition probability to decay of manifold of closely spaced coupled levels

14 p2488 A69-29924

Oscillatory relaxation of multiatomic gases and gas mixtures with quantum exchange between oscillators, noting gasdynamic applications

15 p2654 A69-30109

Radiative and conductive heat transfer in heated finite gaseous body with emphasis on collisional and radiative relaxation, noting cooling as two stage process [AIAA PAPER 69-638]

17 p3073 A69-33311

Chemical relaxation, optimum propellant mixture ratio, combustion chamber pressure, gas jet impulse, mass flow and drive capacity of space propulsion systems

18 p3229 A69-34773

Radiation emission by molecules in electromagnetic field, considering cavity resonators and waveguide excitation

18 p3178 A69-35404

Gaseous and solid phase properties of atomic and molecular systems, treating statistical energy distribution, kinetics, excited states and relaxation

18 p3178 A69-35406

Flow velocity, flow Mach number and weak disturbance velocity behind shock wave measured for nitrogen, oxygen and carbon dioxide

19 p3298 A69-36362

Rotational-vibrational relaxation and molecular diffusion effect on saturation parameter of carbon dioxide laser, measuring gain as function of input power

19 p3338 A69-36692

Relaxing polyatomic gases transport properties from Boltzmann equations obtained without knowing excitation probabilities of internal molecular degrees of freedom

19 p3300 A69-36787

Relaxation processes and radiation stimulation in dense low temperature ionized plasma leading to population inversion of several levels

20 p3582 A69-38006

Relaxation time for rotational transitions of linear polyatomic carbon dioxide calculated by using Brout theory for diatomic H rotational relaxation calculations

20 p3581 A69-38121

Relaxation equations for oscillatory degrees of freedom of molecular supersonic binary gas flow in Laval nozzle, obtaining population inversion

21 p3693 A69-38692

Carbon dioxide laser amplifiers gain saturation time dependence characteristics by theoretical model taking rotational relaxation into account

21 p3736 A69-38941

Vibration relaxation time and dissociation rate constant of carbon dioxide in high temperature shock waves, using IR emission

21 p3775 A69-39801

Molecular vibrational relaxation effect on dissociating airflow behind shock wavefront, giving relations to chemical reaction rates in diffusion approximation

24 p4302 A69-43486

Viscous shock wave chemical relaxation for diatomic nonequilibrium dissociating gas flow, using Navier-Stokes and chemical kinetics equations

24 p4302 A69-43487

MOLECULAR ROTATION

Millimeter wave oscillator AFC system utilizing inherent stability of molecular rotational transition applied to reflex klystron stabilization

01 p0044 A69-10628

High resolution spectroscopic study of stimulated rotational transitions of nitrogen molecules using crossed grating Echelle spectrograph

02 p0284 A69-12621

Equilibrium of rotational degrees of freedom in gases undergoing relaxation, noting excitation, relaxation time, kinetics, transfer effects and measurements for hydrogen

02 p0284 A69-12667

Far IR and Raman spectra of ethylene carbonate, gamma butyrolactone and cyclopentanone, noting consistency with hindered pseudorotation

02 p0206 A69-12723

Trimodal solutions for strong shock structure in gas of spherocylindrical molecules

03 p0414 A69-13136

Photosphere models comparison based on theoretical rotational temperatures of various diatomic molecular free radicals, using faint lines method

03 p0512 A69-13694

Separation of center of mass and rotational coordinates from N electron diatomic Schrodinger equation

04 p0554 A69-14861

Molecular motion in polytetrafluoroethylene crystals at cryogenic temperatures, noting crystal defect permitting angular displacements of chain segments

05 p0797 A69-16495

Polar molecule rotational excitation diffusion cross sections for electron scattering

06 p0961 A69-17139

Spontaneous Raman band shapes and depolarization ratios in liquid nitrogen and oxygen measured and compared to gas, discussing time dependence of rotational motion

06 p0962 A69-17817

Absorption oscillator strengths for rotational lines in Lyman transition vibrational bands of molecular hydrogen from equivalent widths measured photoelectrically

06 p0962 A69-17818

Competition effects between rotational levels of carbon dioxide rotation-vibration band in traveling and standing wave lasers [IEEE PAPER G-6]

07 p1151 A69-19055

Single mode carbon dioxide laser Lamb dip and vibration rotation lines absorption coefficients [IEEE PAPER P-6]

07 p1153 A69-19075

Franck-Condon factors for high rotational levels of nitrogen calculated in Morse potential approximation for application to plasma diagnostics

07 p1185 A69-19169

Water in interstellar regions detected by microwave emission from 6 sub 16 to 5 sub 23 rotational transition

08 p1383 A69-19896

Optical potentials for rotational and vibrational transitions in inelastic molecular collisions, considering adiabatic and sudden approximations

08 p1358 A69-21008

Emission-absorption intensity ratio temperature measurements of diatomic molecules under thermal nonequilibrium conditions, considering rotational population distribution during vibration temperature measurement

09 p1623 A69-22255

Hydroxyl luminescence spectrographic observations at twilight in vibrational-rotational band from 10600 to 11200 A

10 p1681 A69-22847

Carbon dioxide laser upper level rotational relaxation rate constant measurement, observing CW gain

10 p1701 A69-22948

Direct nonresonance excitation of rotational and vibrational states of diatomic molecular ions by electrons in Born-Coulomb approximation

10 p1726 A69-23627

Vertical atmospheric absorption of radio waves by water vapor and oxygen molecules near rotational resonance based on radio emission measurements

10 p1658 A69-23944

Barrier to internal rotation from PMR spectrum for 1, 2-disubstituted ethanes, studying vicinal coupling parameters dependence

12 p2132 A69-25987

Carbon dioxide rotational constants from CW beat measurement in bulk GaAs mixer between carbon dioxide vibrational-rotational laser lines

12 p2105 A69-26311

Relative intensities of lines in vibration and rotation bands of isotopic carbon dioxide in planet Venus, tabulating partition functions

15 p2656 A69-31154

Photoinduced shock processes involving metastable hydrogen atoms and molecules, discussing vibrational and rotational levels

16 p2813 A69-31754

Lambda doublet maser emission from excited OH rotational level, discussing conditions necessary for microwave radiation

18 p3185 A69-34292

Molecular N rotational temperature effect on rare gases scattering cross section

19 p3377 A69-36184

Central tuning dip on rotation-vibration transitions of nitrous oxide and carbon dioxide laser with nitrogen, noting frequency discriminator generation

19 p3339 A69-36698

Ammonium perchlorate experimental heat capacity data significance for rotational freedom of ammonium ion

20 p3484 A69-37344

Rotational analysis of O_2/O_2 band of gamma-prime system of TiO molecule, considering transition to ground state

20 p3577 A69-38170

Coupled equations for determining cross sections for rotational transitions in CN induced by low energy electron impact

21 p3773 A69-38476

Upper atmospheric temperature by spectroscopy, considering rotational, OH nightglow, nitrogen cation dayglow and twilight temperatures

21 p3712 A69-38516

Ammonia inversion radiation in Sgr B2 region, observing distribution of density, velocity and rotational excitation

21 p3799 A69-38647

Diatomic molecules rotational excitation calculated from electron molecule elastic scattering parameters in fixed nuclei approximation

21 p3775 A69-39665

Molecular collision pumping mechanism for anomalous microwave absorption by formaldehyde rotational transition in Galaxy dust cloud

22 p4029 A69-40768

Rotational spectra of methylchlorodiazirine at room and dry ice temperature, using K band and Stark effect spectrometers

23 p4194 A69-42207

Order-disorder transitions in solid hydrogen, discussing model to explain molecular rotation angular momentum operator fluctuations

24 p4350 A69-43119

Raman scattering during external and internal motion of oxygen molecules condensed phases, observing

gamma and liquid phase bandwidths during stretching vibrations

24 p4353 A69-43808

Rotational microwave spectrum of 2-methylfuran, using fourth order perturbation method for internal rotation A-E doublet splittings

24 p4280 A69-43811

MOLECULAR SPECTRA

NT ELECTRONIC SPECTRA

NT RAMAN SPECTRA

NT VIBRATIONAL SPECTRA

Methane IR absorption band centered near wavenumber 9050, noting R branch features and fine structure

01 p0023 A69-10289

Carbon dioxide spectral line broadening and self broadening coefficients, using carbon dioxide laser radiant energy

01 p0091 A69-10844

Microwave and far IR molecular rotational absorption spectra investigated for measuring concentrations of reacting molecular and atomic species in hypersonic projectile wakes

01 p0006 A69-10961

Absorption coefficients of molecular oxygen at Lyman alpha line and vicinity measured by vacuum spectroscopy

01 p0076 A69-11230

High resolution spectroscopic study of stimulated rotational transitions of nitrogen molecules using crossed grating Echelle spectrograph

02 p0284 A69-12621

Electronic transition moment for C /Swan/ bands measured in shock tube in carbon dioxide and argon mixtures

02 p0285 A69-12833

Molecular O 0.7620 micron absorption band in pure O and air, noting rotational lines mean half width and lower atmosphere transmission function

03 p0458 A69-13272

Benzene anion radical in solid solution ESR spectrum, noting removal of orbital degeneracy at 4.2 degrees K

03 p0382 A69-13379

Spectra of hydrides of Mg 25 and Mg 26 in photosphere, searching for weak lines on basis of isotope shifts

03 p0515 A69-14035

Night airglow spectrum between four and four microns, noting sequence of hydroxyl bands

03 p0426 A69-14251

Protostars as sources of anomalous OH emission, discussing densities, masses and temperatures of OH condensations

04 p0661 A69-15143

Far IR observations of atmospheric molecular lines, using high altitude aircraft platforms

04 p0628 A69-15146

Nanosecond range flash photolysis technique and application to absorption spectra of excited singlet states

05 p0760 A69-15608

Hydrogen, helium and electron flux measurements by differential detectors at Fort Churchill in 1967

05 p0756 A69-16277

Stellar element abundance ratios determination using relative strengths of molecular lines or bands

06 p1003 A69-17320

Absorption oscillator strengths for rotational lines in Lyman transition vibrational bands of molecular hydrogen from equivalent widths measured photoelectrically

06 p0962 A69-17818

Shock tube study of ammonia oxidation at high temperature, detecting molecular species in reaction zone by IR emission

06 p0885 A69-17936

Water in interstellar regions detected by microwave emission from 6 sub 16 to 5 sub 23 rotational transition

08 p1383 A69-19896

IR zero one band of molecular O observed in day airglow with ground based scanning grating spectrometer

08 p1306 A69-20096

Radio wavelength range observations of NO molecule lines in interstellar space

09 p1590 A69-21377

Luminescence spectra of molecular gases excited by fast electrons in infrared spectral region, noting H alpha line

09 p1590 A69-21382

Molecular line intensity requirement in line of sight for detecting interstellar water vapor cloud, assuming transparent atmosphere and ideal radio telescope

09 p1591 A69-21446

Cometary magnetic fields by measuring depolarization of molecular resonance fluorescence

09 p1603 A69-22234

Emission-absorption intensity ratio temperature measurements of diatomic molecules under thermal nonequilibrium conditions, considering rotational population distribution during vibration temperature measurement

09 p1623 A69-22255

Relative band intensities of atmospheric and IR atmospheric systems of molecular oxygen compared with Franck-Condon factor calculations

10 p1681 A69-23163

Barrier to internal rotation from PMR spectrum for 1, 2-disubstituted ethanes, studying vicinal coupling parameters dependence

12 p2132 A69-25987

IR spectroscopic observations of moon to interpret molecular vibration spectra in terms of molecular composition, discussing rock surface roughness effects

13 p2341 A69-27582

Molecular O 0.7620 micron absorption band in pure O and air, noting rotational lines mean half width and lower atmosphere transmission function

14 p2487 A69-28780

Excited cyanide molecules concentration in arc discharge determined from spectral bands absolute intensities during electron transition

15 p2654 A69-30080

Molecular benzene emission spectra excited by electron beams in RF modulated source, tabulating lifetime measurements

15 p2562 A69-30468

Cyanogen molecules increase attributed to nova shell compression from analyzing absorption spectrum of DQ Herculis 1934 after brightness maximum

15 p2688 A69-30558

Transition probabilities for radiative lifetime of Swan and Mulliken diatomic C bands calculated from lifetime data using Franck-Condon factors

15 p2694 A69-30789

Pressure and wavelength dependence of molecular O absorption coefficient near 1215 A, utilizing UV emission from crossed beam atomic collision

15 p2656 A69-31031

Franck-Condon factors for band systems of molecular hydrogen, computing wave functions for vibrational levels using potential energy function, Part I

15 p2656 A69-31156

Cross sections threshold behavior for Cs II resonance lines excitation due to Cs ion-H collision

17 p3008 A69-33388

Radio wavelength range observations of NO molecule lines in interstellar space

18 p3198 A69-34765

Luminescence spectra of molecular gases excited by fast electrons in IR spectral region, noting H alpha line

18 p3176 A69-34770

Computer program to predict spectra from electronic transitions of diatomic molecules and atoms, noting line intensity distribution by Voigt profile

18 p3177 A69-35239

Forbidden atomic transitions involving metastable species in upper atmosphere, tabulating permitted and forbidden molecular band systems

19 p3421 A69-36214

Rotational analysis of /O,O/ band of gamma-prime system of TiO molecule, considering transition to ground state

20 p3577 A69-38170

Franck-Condon factors for band systems of molecular hydrogen, computing wave functions for each electronic state by numerical solutions of radial Schroedinger equation

21 p3774 A69-38758

IR molecular radiation spectra of upper atmosphere in 3-8 micron range investigated by rockets and satellites, discussing radiation energy density during magnetic storms

21 p3792 A69-39772

Absorption spectrum of NO molecule, analyzing f complexes electron structure, ionization potential and quadrupole moment

22 p3984 A69-40477

Hydrogen fluoride chemical laser emission spectrum, studying rotational-vibrational transition of molecules triggered optically or electrically

23 p4172 A69-41493

Rotational spectra of methylchlorodiazirine at room and dry ice temperature, using K band and Stark effect spectrometers

23 p4194 A69-42207

MOLECULAR SPECTROSCOPY

Fluorescence spectroscopy of proteins, analyzing polarity, distances between groups, flexibility and conformational transitions

01 p0023 A69-10291

Far IR and Raman spectra of ethylene carbonate, gamma butyrolactone and cyclopentanone, noting consistency with hindered pseudorotation

02 p0206 A69-12723

Atomic physics of lasers and active materials, noting multiplet spectra of atoms, molecular spectroscopy, energy level population distribution and amplification

06 p0937 A69-18004

Hydrogen molecule spectroscopy in vicinity of ionization limit, determining absorption and ionization cross sections and fluorescence

07 p1184 A69-18490

Speed distribution and density of molecular beam from time domain measurements of propagated beam perturbations, discussing gate functions

10 p1652 A69-23340

MOLECULAR STRUCTURE

Sliding surface tracks from hardened steel sliders on flat PTFE examined for molecular orientation with electron microscope

01 p0085 A69-10369

Crystal and molecular structure of mu-oxo-bis(chlorobis/2, 4-pentanedionato/titanium/IV/-chloroform solved by symbolic sign determination method and Patterson map interpretation

01 p0023 A69-10411

Perhydroxyl radical electron spin resonance spectrum in solution of hydrogen peroxide and water at 77 K, noting g factor, hyperfine splitting and molecular structure

01 p0024 A69-10683

Europium complexes high resolution emission spectra in relation to molecular configuration

01 p0024 A69-10893

Automatic heteroatomic plotting of high resolution mass spectral data, presenting relative intensity vs elemental composition in bar form

01 p0024 A69-10905

Radiation structural and transcription damage to deoxyribonucleic acid /DNA/, noting postirradiation repair on molecular level

03 p0372 A69-13489

Mechanical anisotropy of polyethylene terephthalate and relation to molecular structure and cold drawing

05 p0785 A69-16489

Rotational spectrum of ethylene episulfide to determine molecular structure, particularly orientation of C sub 2 S ring

08 p1268 A69-20535

Network rupture hypothesis and molecular structure considerations used in obtaining constitutive equations for flow of polymer melts and solutions

10 p1800 A69-23369

Monograph on molecular structure and polymer properties, covering coherent adhesive layer of polymeric material for paint film in protective coatings

10 p1717 A69-24187

Order-disorder in alloys with several phase transition temperatures, discussing crystal lattices, interstitial alloys, atomic and magnetic ordering

11 p1936 A69-24702

Thermally stable polymers for high stress aerospace applications, noting chemical stability and structure of high polymers

12 p2117 A69-25853

Water vapor laser, discussing water vapor molecular structure, population inversion mechanism, perturbation model, etc

12 p2106 A69-26325

Synthesis of N-/trimethylsilylalkyl/ diamines and N-/trimethylsilylalkyl/-N-/2-mercaptoethyl/ diamines, determining structure by IR spectra

15 p2561 A69-30414

Constitutive equation variation effect on near wall flow pattern of dilute polymer solutions

17 p2951 A69-33257

Molecular structure and uses of heat resistant plastics, discussing aromatic polyamides

18 p3161 A69-34279

Polymer molecular structure influence on physical and mechanical properties, considering regularity, chain flexibility, crosslinking and intermolecular forces

18 p3099 A69-34606

Spherulite boundaries and interspherulite breakdown in polyethylene, considering structure control by varying macromolecular microstructure

22 p3973 A69-40740

DNA polymerase from *Escherichia coli*, discussing physical and chemical properties of enzyme and polypeptide chain consistency

22 p3898 A69-41070

MOLECULAR THEORY

Franck-Condon factors in radiative, excitation and ionization molecular transitions of oxygen, carbon monoxide, nitric oxide, etc

05 p0795 A69-15664

Molecular radiobiology, discussing physicochemical processes caused by energy absorption in targets, leading to inactivation under various circumambient conditions

23 p4090 A69-41963

MOLECULAR WEIGHT

High speed automatic osmometer applied to measurements of diffusible branched polyethylene samples, discussing apparent molecular weight observations

01 p0024 A69-10933

Low temperature effects on calf thymus deoxynucleoprotein, crystalline egg albumin and fibrillar actin, noting molecular weight and viscosity changes

01 p0018 A69-11089

Structure and mean molecular weight measurement of unknown atmosphere assessed from high altitude tests in earth atmosphere

[AIAA PAPER 68-1054] 03 p0512 A69-13699

Ultrahigh molecular weight polyethylene terephthalate synthesis from commercial solid state materials, noting effects of several parameters

05 p0797 A69-16496

Injectant stagnation temperature and molecular weight variation effect on flow field generated from secondary injection into supersonic stream

[AIAA PAPER 69-1] 06 p1039 A69-18196

Crack propagation in crosslinked glassy polymers, noting effects of added elastomers molecular weight

08 p1338 A69-20492

Temperature gradient in semiconvective region, examining molecular weight distribution in mixing due to overstability

09 p1596 A69-22057

Two temperature gasdynamics for binary gas mixtures of differing molecular weight components, analyzing ultrasound and shock wave propagation

13 p2250 A69-28447

Molecular engineering of high organic polymers, discussing molecular weight, crystallization, elastomers, fiber formers and building construction materials

20 p3566 A69-37598

Hemoglobin O reaction model explaining molecular weight and oxygen dissociation curve dependence on hemoglobin concentration

23 p4097 A69-42097

MOLECULES

- U DIATOMIC MOLECULES
- U MONATOMIC MOLECULES
- U POLYATOMIC MOLECULES
- U TRIATOMIC MOLECULES

MOLIERE FORMULA

- U COSMIC RAY SHOWERS
- U SECONDARY COSMIC RAYS
- U SPATIAL DISTRIBUTION

MOLNIYA SATELLITES

Communication satellites development in U.S.S.R., discussing Molniya 1 satellite design and objectives and Echo 2 satellite transmission experiments

01 p0032 A69-10949

Molniya 1 communication satellite using elliptical orbit to provide radio, telephone and TV service

[UN PAPER 68-95771] 06 p1013 A69-17044

MOLTEN SALT ELECTROLYTES

Electrolytic deposits of titanium, vanadium and alloys from molten salts, discussing formation conditions, velocity and properties

03 p0446 A69-13574

Secondary cells with liquid lithium anodes and immobilized fused salt electrolytes

04 p0552 A69-15330

Dual gas reference electrode system for molten carbonate cells with immobilized electrolyte

05 p0706 A69-16237

MOLTEN SALT NUCLEAR REACTORS

Shock tunnel hypersonic flow effect on critical Weber number for zirconium drop breakup in partially and fully molten states

12 p2063 A69-26802

MOLYBDENUM

Interstitial impurity effects on mechanical properties of molybdenum single crystals, considering temperature dependence of flow stress in bcc metals

01 p0095 A69-10609

Silicide coatings effect on Mo mechanical properties subjected to tensile tests in vacuum and air at various temperatures

02 p0264 A69-11883

Sintered molybdenum deoxidation effect with C, B and Si, analyzing hardness, tensile strength and ductility

02 p0265 A69-12002

Formation energy of heat vacancies in molybdenum and temperature dependence of concentration determined on basis of enthalpy data

02 p0266 A69-12184

Heat of solution and diffusivity of nitrogen in molybdenum analyzed by quenching technique and resistivity measurements at liquid helium temperature

02 p0267 A69-12188

Hydroextrusion effect on Mo structure and mechanical properties, noting improved ductility after high temperature annealing

02 p0267 A69-12189

Molybdenum elasticity limit and rupturing stress dependence on structure for high temperature annealing, noting changes in solid solution interstitial impurity concentration

02 p0268 A69-12191

Molybdenum interband transitions noting low energy optical property anomalies and origin of two absorption bands

03 p0442 A69-12986

Temperature dependence of internal friction in molybdenum wire in moderate and high temperatures

03 p0446 A69-13576

Internal friction temperature effects on amplitude dependence in niobium and molybdenum

04 p0614 A69-14635

Structural changes and cold shortness of molybdenum in deformation

04 p0615 A69-14637

Complex form internal friction maximum composed of interstitial atoms in molybdenum solid solution

04 p0615 A69-14640

Cobalt concentration reduction in maraging steels by Cr replacement and increased Mo and Ti additions

04 p0616 A69-14649

Carburization structure on surface of Mo and Nb castings cast in graphite molds showing changes in plastic properties of metals

04 p0619 A69-15391

Microplastic properties of arc-cast and Ti-Zr-Mo molybdenum sheet in tension at room temperature, measuring plastic strains with resistance strain gages

05 p0778 A69-15759

Si diffusion rate in single crystal and polycrystalline Mo, using various donor materials

05 p0780 A69-15990

Pitting corrosion resistance improvement in austenitic stainless steels with added molybdenum through electroslog resmelting

05 p0781 A69-16499

Molybdenum disilicide allotropy influence on coating growth rate and morphology

[ONERA-TP-642] 08 p1335 A69-19967

Time and temperature dependence of Mo and W deformation structure variation and primary recrystallization from metallographic investigations using electron microscopy

08 p1334 A69-21058

Effective work function of Re and Mo electrode samples determined from Schottky plots and emission measurements from grains

09 p1557 A69-21807

Metal composites of Ni or Mo fibers in Be matrix, discussing chemical compatibility in terms of reactions, solid solubility and diffusion at various temperatures

10 p1707 A69-22991

Impurities effect on plastic flow stress and activation volume as functions of strain, strain rate and temperature in molybdenum crystals

10 p1710 A69-23089

Molybdenum fiber sintering activation by adding nickel, noting decrease in impact viscosity

10 p1711 A69-23336

Recrystallization diagrams of commercially pure Mo and Mo alloyed with Fe, Co or Fe plus Ni, noting additions effect on recrystallized grain size

10 p1715 A69-24012

Acicular crystals growth and dendrites orientation in Mo ingots prepared by electron beam and arc melting analyzed by X rays

11 p1903 A69-24538

Molybdenum additive role in deformed carbonylic nickel recrystallization process

12 p2114 A69-26454

Surface free energy of solid Mo measured by Udin zero-creep method at high temperatures, noting low value due to residual impurity adsorption

12 p2117 A69-27137

Molybdenum dislocation velocity and macrodeformation, noting thermal double kink mechanism inconsistencies and strain rate relationship

13 p2276 A69-27392

Sensitivity decrease of reversible temper brittleness of low alloy steels due to Mo inhibiting effect on phosphorus diffusion

13 p2283 A69-28491

Micrographic reagent coloring grains of Mo in relation to crystalline orientation applied to refractory metal welding and diffusion studies

14 p2505 A69-29221

Alkaline metal adsorption on high work function metals with charge transfer, measuring polycrystalline Mo photoelectric emission as function of Cs coverage

14 p2507 A69-29275

Electron work function profile determined for polycrystalline Mo and W single crystals with and without Cs vapors by emission microscope and photomultiplier

14 p2507 A69-29276

Vacuum thermal decomposition of molybdenum sesquisulfide into metallic Mo, discussing reaction kinetics, mass transfer, diffusivity of sulfur gas, etc

14 p2467 A69-29287

Strain rate and temperature effects on sintered molybdenum sheets strength and elongation characteristics

14 p2464 A69-29322

Double notch creep rupture tests of Cr-Mo steels, investigating changes in notch profile, dimensions and structure

[ASME PAPER 68-WA/MET-7] 14 p2464 A69-29441

Cold worked high purity Mo wire recovery after plastic deformation at room temperature, considering electrical resistivity decrease as function of annealing temperature

15 p2636 A69-30082

Hydroextrusion influence on mechanical properties of powder compacts of sintered Mo rods

16 p2803 A69-32491

Oxygen adsorption on Mo single crystals /100/ surface as function of temperature using low energy electron diffraction

16 p2748 A69-32795

German monograph on yttrium addition effects on tension and compression behavior of Nb and Mo at high temperature in vacuum

17 p2990 A69-33570

Molybdenum coatings electrodeposition from fused salt system

18 p3156 A69-35001

Carburization structure on surface of Mo and Nb castings cast in graphite molds showing changes in plastic properties of metals

18 p3156 A69-35019

Silicide coatings effect on Mo mechanical properties subjected to tensile tests in vacuum and air at various temperatures

18 p3156 A69-35043

Secondary recrystallization in cold rolled molybdenum foil as function of temperature using electron microscopy and diffraction

18 p3157 A69-35253

Diffusion saturation of Mo and Mo alloys by nitrogen in ammonia with formation of nitride films, noting surface hardness

18 p3158 A69-35288

Molybdenum single crystals deformation in direct shear, determining stress temperature dependence and critical regions for various slip systems

19 p3342 A69-35811

Diffusion during high temperature exposure of protective coatings on Mo, noting compact layers and carbide forming elements effect on thermal stability

19 p3345 A69-36156

Boron thermal diffusion effects on plastic properties of pure Mo subjected to recrystallization

19 p3328 A69-36160

Wear and friction of fiber-metal Mo bodies impregnated with molybdenum disulfide, noting coating-endurance life

20 p3547 A69-36953

Negative electric potential effect on deposition rate of Mo from molybdenum carbonyl and on deposit chemical composition during pyrolysis

20 p3559 A69-37016

- Temperature effect on grain size, crystal orientation, microhardness and heat resistance of diffusion Si coatings on Mo
20 p3560 A69-37361
- C and O atoms chemisorption on Mo surface demonstrated by surface striation
20 p3562 A69-37782
- Structural changes during annealing of W and Mo single crystals deformed by rolling, using X ray diffraction topography methods with two crystal spectrometer
21 p3742 A69-38583
- Grain boundary grooving kinetics for Cr, W and Mo in Ar and vacuum, determining interface free energies and surface self diffusion coefficients
21 p3744 A69-38740
- Abnormal grain growth during secondary recrystallization of hydraulically extruded molybdenum as function of annealing
21 p3745 A69-38953
- Dislocations multiplication and rearrangement structure in thermal fatigue of Mo single crystals produced by electron beam zone melting
21 p3746 A69-39162
- Structural changes in Mo single crystal under action of laser radiation of various power densities
21 p3750 A69-39842
- Electron spin resonance /ESR/ of polycrystalline Mo/V/ complexes with dipyrityl and phenanthroline, observing hyperfine interaction due to odd numbered isotopes
22 p3897 A69-40971
- High temperature anelastic effect in Mo single crystals ascribed to internal friction peak due to electronic interactions between dislocations and C interstitials
24 p4332 A69-43031
- MOLYBDENUM ALLOYS**
- Nitriding effect on heat resistance and transition temperature of molybdenum alloys
01 p0093 A69-10212
- Zirconium corner of Zr-Mo-Ni phase diagram using metallographic analysis, hardness and microhardness methods, constructing isothermal sections for high temperatures
02 p0264 A69-11855
- Zirconium corner of Zr-Nb-Mo system phase diagram, using microstructure, microhardness, hardness and radiographic methods
02 p0264 A69-11856
- Adiabatic elastic constants of molybdenum-rich rhenium alloys, studying concentration effects on bulk modulus, Debye temperatures and interatomic forces
04 p0613 A69-14455
- Martensitic transformation in Ti-Al-Mo alloys, noting specific features and effects of Mo content
04 p0617 A69-14940
- Phase equilibria, phase transformation temperatures and relation between resistivity and chemical composition for alloys of Ti-Al-Mo-Zr system
04 p0618 A69-15079
- Quasi-ternary titanium dichromide-V-Mo system composition at high temperatures, physical properties and phase diagrams
04 p0618 A69-15080
- Be, Ce, V and Ti additions effect on oxidizability of cast, forged and cold worked Nb-Cr-Mo alloys
04 p0618 A69-15081
- Microplastic properties of arc-cast and Ti-Zr- Mo molybdenum sheet in tension at room temperature, measuring plastic strains with resistance strain gages
05 p0778 A69-15759
- Long term creep behavior of nickel-chromium-molybdenum alloy, noting temperature effect on grain boundaries
05 p0781 A69-16500
- Transition temperature from brittle to plastic state of W-Mo alloys in recrystallized state, noting increased Mo content effect
05 p0783 A69-16809
- Isochronic annealing effect on coercive force of Mo Permalloy samples bombarded with neutrons in nuclear reactor
05 p0783 A69-16815
- Creep of high purity Nb-Mo alloys in 800-1300 C range and at 1500-13000 lb/square inch stresses, giving activation energy for creep
10 p1711 A69-23375
- Recrystallization diagrams of commercially pure Mo and Mo alloyed with Fe, Co or Fe plus Ni, noting additions effect on recrystallized grain size
10 p1715 A69-24012
- Plasticity increase of molybdenum alloys during precipitation of second phase at high temperatures due to lattice defects redistribution and plastic deformation
11 p1906 A69-25685
- Heat treatment effects on molybdenum-rhenium alloy field emission and surface structure in alpha and sigma phase regions
12 p2113 A69-26041
- Intermetallic compound precipitation effects on mechanical properties of Fe-Mo alloy at high temperatures
12 p2116 A69-26925
- W, Mo and heat treatment effects on phase composition and heat resistance of ferrite and austenitic steels
13 p2283 A69-28487
- Temperature dependent aging mechanisms in deformed Mo alloys during annealing, using transmission electron microscope
14 p2463 A69-29312
- Electrodeposits on molybdenum alloys in high temperature oxidizing environments, noting performance of Cr-Ni-Cr composite coating
14 p2466 A69-29934
- Ion nitride hardening of Mo-Ti alloy at 1300 degrees C in cathode glow discharge tube
15 p2637 A69-30212
- Nitriding effect on heat resistance and transition temperature of molybdenum alloys
15 p2637 A69-30268
- Sintered mixtures of Ni-Mo powder noting electrical resistance, alloy and shear strength and impact viscosity
15 p2638 A69-30280
- In-process annealing and warm working temperature effects on long time creep rupture properties of Mo alloys tested in vacuum furnace
17 p2987 A69-33076
- Optical constants of Ta-W and Nb-Mo measured in IR and visible ranges as function of incandescent temperatures
17 p2990 A69-33574
- Carbide phase growth rate in Mo-TZC alloy with particle size distribution maintained over time-temperature spectrum, noting diffusion and interface controlled processes
18 p3155 A69-34632
- Hydraulically extruded Mo properties after annealing, showing reduction in stability and hardness and varying nature of change in plasticity
18 p3156 A69-34719
- Diffusion saturation of Mo and Mo alloys by nitrogen in ammonia with formation of nitride films, noting surface hardness
18 p3158 A69-35288
- Metal purity effect of nickel and Ni-Mo alloy on nucleation and recrystallization nuclei growth following 80 percent plastic deformation
18 p3159 A69-35449
- Silicide and B-modified coatings on Mo, noting improved high temperature oxidation resistance under thermocycling
22 p3957 A69-40972
- Ce, Zr, Nb and B effect on heat resistance and structure of low alloy CrMoWV steels /type CSN 41 5335/
22 p3972 A69-41079
- MOLYBDENUM CARBIDES**
- Surface precipitation of carbides in solution treated and cooled molybdenum and tungsten
03 p0451 A69-14000
- Group 4A carbides and nitrides formation in Mo by arc melting, determining threshold solute metal-interstitial atom ratios
12 p2117 A69-27136
- Carburizing spherical powders of Nb, Mo and W to obtain carbides, noting agreement between theoretical and experimental data
19 p3345 A69-36162
- MOLYBDENUM COMPOUNDS**
- Thermal decomposition of molybdenum carbonyl, deriving general equations, noting agreement with experimental data
20 p3558 A69-37015
- Negative electric potential effect on deposition rate of Mo from molybdenum carbonyl and on deposit chemical composition during pyrolysis
20 p3559 A69-37016
- Molybdenum disilicide oxidation kinetics at various temperatures by thermal conductivity method, determining oxidation rates and activation energy
20 p3567 A69-37780
- MOLYBDENUM DISULFIDES**
- Physical sputtering deposition of molybdenum disulfide films as solid lubricant on rotating and sliding components, discussing lubrication properties in vacuum [ASLE PAPER 68-LC-15]
07 p1140 A69-19308
- Hot pressed molybdenum disulphide-nickel composite film friction and wear tests in air and face seal configuration [ASLE FICFS PREPRINT 23]
15 p2620 A69-30491
- Microfibrinous boehmite as binder for molybdenum disulfide in formation of ductile wear resistant dry lubricant films [ASLE PAPER 68-LC-14]
15 p2642 A69-30606
- Solid lubricants on molybdenum disulfide base at various temperatures and low pressures, noting film mass losses and possible use with organic materials under high vacuum
16 p2793 A69-31561
- Wear and friction of fiber-metal Mo bodies impregnated with molybdenum disulfide, noting coating-endurance life
20 p3547 A69-36953
- Molybdenum disulfide influence on electrochemical corrosion of metals
21 p3733 A69-39804
- Wear resistance of briquetted lubricants from fluoroplast and molybdenum disulfide under pressure
21 p3733 A69-39805
- Lamellar solids abrasiveness, effects of particle share in graphite and molybdenite samples
22 p3966 A69-39877
- MOLYBDENUM OXIDES**
- Molybdenum oxide crystals growth and microstructure, using X ray and electron diffraction analyses
05 p0779 A69-15831
- Oxidation influence on molybdenum disilicide coatings emissivity, determining degree of blackness over thermal stability range
09 p1522 A69-21588
- MOLYBDENUM SULFIDES**
- Vacuum thermal decomposition of molybdenum sesquisulfide into metallic Mo, discussing reaction kinetics, mass transfer, diffusivity of sulfur gas, etc
14 p2467 A69-29287
- MOMENT DISTRIBUTION**
- Structural analysis by direct moment distribution, Volume 1, covering statistically indeterminate structures formed of prismatic members
01 p0165 A69-10156
- Distribution of moment of first passage through positive level for homogeneous process with independent increments and exponential characteristic function, constructing integral equation
01 p0104 A69-10265
- Moment method used to determine pulsed radiation instability propagating in luminescent scattering medium
04 p0610 A69-14425
- Phase method of photoelectric registration of stellar transition moments
04 p0601 A69-15252
- Moment equations for general gas mixture from Boltzmann-like equations, evaluating collision integrals
04 p0633 A69-15436
- Moment curvature models under reverse cyclic straining developed from stress-strain curves for rectangular beams
04 p0683 A69-15497
- Effect of small periodic moment applied to axis of inner gimbal on gyro drift when gyro is mounted on base fluctuating about two mutually perpendicular axes
06 p0924 A69-17183
- Helicopter instability on ground with propulsion system operating and inoperative, discussing overturning, restoring moments and pilot training
09 p1433 A69-21385
- Optimal additional loading at zero moment stress-strain state in simply connected shell of complex design under external loads, using successive approximation
12 p2181 A69-26610
- Motion of slender axisymmetric bodies in rotating fluid, relating Long hypotheses to flow reversal and dipole distribution effects on lee waves
13 p2248 A69-28170
- Boundary layer equation of viscous incompressible fluid with moment stresses, noting flow around thin plate and submerged jet problems
14 p2428 A69-28815
- Distribution of moment of first passage through positive level for homogeneous process with independent increments and exponential characteristic function, constructing integral equation
19 p3360 A69-36200
- Circular cylindrical freely supported shell moment state stability, solving critical parameters by infinite matrix eigenvalues determination
21 p3835 A69-38724
- Control function ensuring minimal response time of controlled plant with motion described by integral equations system, using method of distributed moments
21 p3685 A69-38847

Dynamic behavior of infinitely long cylindrical shells of ideally rigid plastic materials strengthened with ring ribs, determining distribution of moments and displacements

21 p3837 A69-39156

MOMENTS

NT BENDING MOMENTS
NT DIPOLE MOMENTS
NT DISTRIBUTION MOMENTS
NT ELECTRIC MOMENTS
NT LOADING MOMENTS
NT MAGNETIC MOMENTS
NT MEAN
NT PITCHING MOMENTS
NT ROLLING MOMENTS
NT STABILITY DERIVATIVES
NT STANDARD DEVIATION
NT TORQUE
NT VARIANCE [STATISTICS]

Aerodynamic lift and moment fluctuations of sphere at supercritical Reynolds numbers measured by hot-wire anemometers, noting dependence on time

14 p2390 A69-29573

Moment and discrete ordinate methods in radiative transfer problems in planar, radiating and nonscattering media, noting conical transformation of moment equations

18 p3174 A69-35237

MOMENTS OF INERTIA

Large mass concentrations / mascons / effect on moon dynamical figure, considering production of asymmetries

05 p0820 A69-15762

Integrability of equations of motion of gyrostat about fixed point inertial moments varying identically in time

05 p0764 A69-16504

Nutational stability of multibody spin stabilized satellites, discussing moment of inertia ratios role with energy dissipative damper on despun platform

06 p1015 A69-17585

Mass distribution and inertia characteristics influence on spin susceptibility and spin recovery characteristics for eight current fighter aircraft

[AIAA PAPER 69-188] 06 p0868 A69-18057

Circular cylindrical spinning shells vibrations by gyroscopically induced inertia loads, formulating equations of motion based on shallow shell theory

07 p1236 A69-19459

Ground and air resonance measured with gimbaled whirl tower stand for soft inplane matched stiffness rotor, discussing body inertia and speed limits

[AIAA PAPER 69-205] 07 p1055 A69-19559

Rotatory inertia and shear deformation effects on natural frequency and bending mode shape in equations of motion of rotating turbomachine blade

[ASME PAPER 69-VIBR-50] 10 p1804 A69-24148

Numerical method for coupled moments of inertia and integral equations of boundary value problems for fluid in moving cavities

11 p1868 A69-24774

Inplane and rotary inertia effects on free vibration frequencies of circular cylindrical shells eccentrically stiffened by orthogonal set of stringers and/or rings

11 p1992 A69-25520

Magnetic desaturation of inertia flywheels of satellite in equatorial or slightly inclined orbit, discussing satellite stabilization

13 p2357 A69-28476

Natural oscillation frequency of gyrocompass mounted in torsional suspension, taking into account moments of inertia of sensitive element

16 p2791 A69-32282

Transverse shear deformation and rotatory inertia effects on large amplitude lateral free vibrations of transversely isotropic plates

[ASME PAPER 69-APM-10] 18 p3213 A69-34386

Pulsar PSR 0833-45 period decrease resulting from mass addition leading to radius and inertia moment decreases

18 p3196 A69-34646

Calculator for obtaining moments of inertia data to determine control power for vehicle orientation and to avoid control systems over design

[SAWE PAPER 792] 18 p3118 A69-34865

Moment of inertia measurements facility for spacecraft dynamic balancing operations at low angular rates

[SAWE PAPER 739] 18 p3118 A69-34889

Triaxial static gyro stabilizer drifts, assuming perturbing moment steady centered random force applied along stabilizing gimbal axis

19 p3311 A69-36195

Slow rotation of relativistic polytropes with linear corrections, showing inertia moment distribution and metric component

19 p3426 A69-36576

Inertial motion of body produced by revolving uniformly deformed configuration, showing constant semiaxes without kinetic energy losses

21 p3772 A69-39620

Normal frequencies, force constants and moment of inertia of carbon dioxide isotope molecules from spectroscopic data, calculating atmospheric transmission of carbon dioxide laser radiation

21 p3742 A69-39780

Spherical motion of solid body about fixed point with nonholonomic coupling, deriving equations for centrifugal moments of inertia effects on motion

21 p3773 A69-39840

Moments of inertia and gravity field of moon, noting application to earth tides

22 p4030 A69-40902

Gyroscopic motion with center of mass displaced along suspension axes and kinetic moment varying as power law under linear accelerations

23 p4163 A69-41552

MOMENTUM

NT ANGULAR MOMENTUM

S matrix theory without restriction to asymptotic particle momentum measurements, introducing main nondynamical features

03 p0467 A69-13754

Cosmic ray magnetic spectrograph for measurement of momentum spectrum, charge ratio and specific ionization of muons, discussing magnetic and scattering displacement

06 p0925 A69-17302

Equations for gradually changing motion by differentiating momentum and energy equations with respect to abscissa noting wall resistance, viscosity, turbulence and Coriolis coefficients

15 p2593 A69-31489

Accelerated boundary layers classified in terms of integral balance of pressure, inertia, wall friction forces and entrainment momenta

[AIAA PAPER 69-666] 17 p2955 A69-33462

Momentum control system for satellite maneuvering and pointing in pitch and roll developed by modifying existing libration damping gyrostabilizer

18 p3207 A69-34684

Transverse momentum of fireball particles emitted in high energy inelastic collision related to emission angle and energy in accelerators

19 p3396 A69-36644

Gas flow past bodies, deriving solution method without partial differential equations for flows with momentum potential

24 p4244 A69-43071

MOMENTUM ENERGY

U KINETIC ENERGY

MOMENTUM PRECESSION

U PRECESSION

MOMENTUM THEORY

Representation for real functions of quantum mechanical momentum operator obtained by functional integration in phase space

01 p0106 A69-10930

Continuity and momentum equations for cosmic ray gas particles in interplanetary region

06 p0992 A69-17379

Computer programmed momentum theory for induced flow field of helicopter rotor in forward flight

[AIAA PAPER 69-224] 07 p1052 A69-19562

Photon momentum distribution role and relation to thermal radiation spectrum in fully ionized gases

08 p1357 A69-20747

Semiempirical parameters in streamline division and momentum integral analyses for separated flows, using error function velocity profile and spreading parameter sigma

14 p2389 A69-29028

Coupled equations for heavy particle motion expressed by introducing generalized matrix operator for effective momentum in atomic collision problems

14 p2489 A69-29997

Numerical estimates of momentum integral error in applying locally similar solutions to nonsimilar problems, assuming two dimensional or axisymmetric flow

16 p2772 A69-32174

Rotor static performance calculation with near wake interference effects on rotor inflow distribution, considering strip momentum theory

18 p3088 A69-35221

MOMENTUM TRANSFER

Relationships derived by dimensional arguments connecting vertical heat fluxes and horizontal momentum in constant flux layer with other relevant variables

02 p0275 A69-12692

Confined jet mixing region at entrance of tubular reactor, discussing mass and momentum transfer, chemical conversion and effect of Reynolds number

[AIChE PAPER 25A] 04 p0586 A69-14508

Laminar flow stability parameter presenting coupling ratio between angular momentum change and loss rate by frictional drag

05 p0750 A69-16187

Simultaneous solution of time-dependent momentum and continuity equations for ions and neutral air in midlatitude F2 region conditions

07 p1123 A69-18818

Interhemispheric transfer of atmospheric angular momentum, noting hemispheric angular momentum contents and annual variations

07 p1127 A69-19258

Bounds on mass and momentum transport by turbulent flow between parallel plates derived for Couette and Poiseuille flows

08 p1305 A69-20840

Momentum and energy transfers analogy in turbulent convection fluid flow emphasizing difficulties in case of liquid metals

09 p1480 A69-21687

Zonal momentum vertical transport due to large scale moving disturbances in westerlies of equatorial lower stratosphere

09 p1537 A69-22299

Vibrating momentum exchange device /VMED/ in single axis configuration as competitor for inertia wheel or twin gyro

09 p1538 A69-22435

Control moment gyro /CMG/ and use in space vehicle attitude control system, emphasizing control laws

[AIAA PAPER 67-589] 12 p1219 A69-26777

Wave damping in plasma, developing Boltzmann analysis of electron mode dispersion relations involving momentum transfer and relaxations of electron-ion temperature and anisotropy

13 p2305 A69-27377

Four dimensional momenta transfer during high energy cosmic ray particle collisions, comparing various collision models

13 p2330 A69-28375

Similarity theory similar to Nusselt and Stanton numbers obtained by triple analogy for heat, mass and momentum transfer

13 p2380 A69-28560

Unignited mode converter and emitter work function patches, calculating electron-cesium momentum transfer cross sections from saturation current measurements

14 p2490 A69-29240

Regional distribution of relative angular momentum transport over equator, noting advective and turbulent transfer

16 p2773 A69-31793

Ion momentum transfer through charge exchange in mixture of ion gases and parent neutral gases under thermal nonequilibrium, noting role of Boltzmann equation

16 p2822 A69-32108

Velocity field in turbulent flow based on momentum transfer, determining velocity distribution for flow near solid surface

16 p2772 A69-32128

Monograph on engineering calculations of momentum, heat and mass transfer through laminar boundaries having arbitrary pressure distribution and constant physical properties

16 p2879 A69-32203

Direct wind measurement and momentum transport estimates obtained from cyclones and anticyclones daily displacements over Northern Hemisphere, applying results to planetary atmospheres

16 p2780 A69-32306

Solar wind phenomenon, discussing angular momentum loss to sun, fluctuations at earth orbit and wind conditions at terminus and regions unvisited by spacecraft

17 p3023 A69-33370

Clear air turbulence uninfluenced by mesoscale disturbances or terrain, discussing relationship between density profile curvature and heat and momentum transfer

17 p2998 A69-33733

Lateral mixing of air masses in jet stream by water fluid model experiments, discussing steady and non-steady state turbulent momentum exchange

17 p3000 A69-33759

Tropical circulation long term mean values of wind and temperature fields, momentum and heat fluxes from weather stations data, noting consistent pattern and energy source

18 p3165 A69-34418

Source requirements for cosmic radiation origin model, noting fluctuations in momentum changing process

18 p3188 A69-35005

Airborne astatic vertical gyro motion found dependent on aircraft motion along trajectory

19 p3311 A69-36194

Time scale of diffusion of angular momentum estimated by model for disturbances occurring in star with secularly unstable angular velocity distribution

20 p3605 A69-37826

Electron momentum transfer cross sections by numerically solving electron energy distribution function from Boltzmann equation in Lorentz approximation

21 p3773 A69-38396

Axial and angular momentum flux, flow force and circulation to determine strength and structure of narrow rotating axisymmetric vortex and swirling core flows

24 p4298 A69-42598

Momentum, heat and mass transfer in turbulent channel flow emphasizing phenomena close to wall, using boundary layer growth-breakdown model

24 p4407 A69-42914

Interphase momentum transfer during propagation of infinitesimal pressure pulse through bubbly flow two phase mixture

24 p4409 A69-43511

MONATOMIC GASES

Radiation attenuation cross sections of monatomic and diatomic xenon gas from UV absorption measurements near resonance line

02 p0284 A69-12551

Hydrodynamic theory of light scattering by dilute monatomic gases generalized by using linearized Burnett equations instead of Navier-Stokes equations

03 p0466 A69-13135

Ionizing shock front structure in monatomic gas, considering atom-atom and electron-atom collisional ionization rates

03 p0414 A69-13138

Stagnation point electrostatic probe measurements of flowing partially ionized high density monatomic gases

06 p0964 A69-17196

Shock waves internal structure in perfect monatomic gases, discussing density distribution in shock layer experimental measurement

07 p1120 A69-18930

Collision cross sections between monatomic gas impurities and metastable atoms in He-Ne laser from output curve and impurity partial pressure

08 p1325 A69-20278

Two fluid kinetic model for analyzing shock wave structure in binary mixtures of monatomic inert gases, noting no overshoot in velocity profiles

08 p1304 A69-20813

Hydrodynamic equations and Grad transport coefficients for nonequilibrium rarefied monatomic gases developed for molecular collisions

09 p1481 A69-21888

Shock wave structure determination in simple monatomic gas, using statistical counting and successive approximation algorithm

10 p1680 A69-23894

Kinetic theories applied to shock wave structure study of monatomic gas

11 p1870 A69-25007

Winter polar mesosphere atomic-oxygen distribution by analyzing data concerning intensity and energy of corpuscular fluxes in auroras

12 p2070 A69-26690

Plane shock layer structure in pseudo-Maxwellian monatomic gas, integrating Krook equation for gas molecule velocity

14 p2432 A69-29613

Fluctuation spectra of monatomic gases, using two time probability distributions for distribution function autocorrelations

16 p2817 A69-31669

Fixed mass of monatomic gas unsteady spherically symmetric expansion into vacuum by asymptotic Boltzmann equation expansion

16 p2772 A69-32168

Shock wave structure in single component monatomic gas by expanding Boltzmann equation distribution function in terms of Hermite polynomial

18 p3124 A69-35170

Low density free jet properties, discussing velocity distribution perpendicular to axis and correlation of all terminal parallel Mach numbers for monatomic gases

20 p3514 A69-37206

Rocket probe devices based on thermometrical body principle for measuring upper atmosphere water vapor and atomic oxygen

20 p3543 A69-37798

Diatomic-monatomic oxygen collision cross section determined from rotational line width in diatomic oxygen Schumann-Runge emission spectra

22 p3983 A69-40099

MONATOMIC MOLECULES

Langvin equation for interacting molecule system derived by Fourier transformation of Hamiltonian, noting physical correspondence to equation for shear viscosity in monatomic liquids

16 p2815 A69-32370

MONAURAL SIGNALS

Probability density distributions for monaural detection of tonal signal in continuous background of Gaussian noise as modified noncentral chi distribution

02 p1201 A69-11821

MONITORS

Resistance welding monitoring systems including thermal expansion slow scan ultrasonic and electric energy monitor/limiter systems

02 p0253 A69-11864

Atmospheric temperature and water vapor variations and seasonal environmental changes effects on cosmic ray neutron and meson monitor counting rates

03 p0498 A69-12936

Multiplicity of secondary neutrons counted by IGY neutron monitor detecting cosmic radiation

06 p0925 A69-17297

Rechargeable nickel cadmium batteries state of charge determination by monitoring capacitance

09 p1435 A69-21425

Jet aircraft engines condition monitoring system for detecting malfunctions without engine disassembly [ASME PAPER 69-GT-66]

09 p1501 A69-22518

Telemetry monitor systems for high speed rotating equipment, discussing data recording, transmission, decoding, thin-thick film microtechniques, etc

10 p1692 A69-23249

Monitors to detect incipient failure during turbine engine development, describing servocontrol

10 p1692 A69-23253

Sonic boom simulation methods using shock tube, booth type simulators, ballistic ranges and explosives, discussing unmanned data recorder as monitoring device

15 p2585 A69-30371

On-course monitoring for instrument landing system glide path operating with far field samples

17 p3003 A69-34105

Automatic ultrasonic instrument monitoring on-line welding conditions of RF longitudinally seamwelded tubes

18 p3136 A69-34778

Carrier frequency monitoring amplifier with automatic bridge tuning for coupling to passive sensors including strain gages, inductive transmitters, etc

22 p3915 A69-40937

Thin film bolometer for monitoring RF radiation of arbitrary polarization and direction of propagation

24 p4311 A69-42572

High intensity electromagnetic fields generation equipment for calibrating field intensity monitors, discussing anechoic chamber, transmitting antenna, etc

24 p4312 A69-42577

MONKEYS

Monkey psychomotor reactions during ballistic flight, noting alertness reduction during weightlessness

01 p0017 A69-11082

Acute somatic effects in monkeys irradiated with protons of various discrete energies representing significant portions of space proton spectrum

03 p0374 A69-13497

Biological effects on rhesus monkeys of high energy protons compared to effects of cobalt 60 gamma radiation

03 p0374 A69-13498

Steroid hormones effect on nervous system and behavior from data on gonadectomized rats and monkeys treated with testosterone propionate

03 p0375 A69-13551

Macaque monkey behavior after injection of monomethylhydrazine with and without pyridoxine HCl, noting effects of aversively and appetitively rewarded training

03 p0375 A69-14068

High energy X ray irradiation of head of Macaca mulatta, determining effect on cerebral blood flow and blood pressure

03 p0376 A69-14075

Increased gravitational stress effects on esophageal sphincter pressures and gastroesophageal reflux in rhesus monkeys, noting cardia competence

06 p0874 A69-17838

Abrupt deceleration effects on monkey heart rate, noting occurrence of relative bradycardia

06 p0876 A69-18031

Monkey behavior in high atmosphere under weightless conditions, discussing problems connected with biological measurements, logic systems and vibration protection

09 p1447 A69-22722

Macaque monkeys in weightless state on sounding rocket, noting vigilance level and characteristics

09 p1445 A69-22724

Microvillar bleb formation in proton irradiated primate hepatocytes with electron microscope, noting sinusoidal lumen

10 p1641 A69-23045

Psychomotor reaction time and motions, myogenic tonus at rest and precision of monkeys during rocket flights along ballistic curve, noting weightlessness effect

10 p1646 A69-23575

Oxidative and dephosphorylating enzymes and esterases in rat and squirrel monkey cerebral cortexes, noting neuron activity

12 p2018 A69-25773

Histochemical studies on nucleus basalis of Meynert of squirrel monkey

12 p2018 A69-25774

Penile erection electrically evoked from Macaca mulatta forebrain, measuring density and distribution of responding points

12 p2018 A69-25775

Histochemical tests on enzymes distribution in rhesus and squirrel monkeys intrafusal and extrafusal muscle fibers

12 p2018 A69-25777

Lactate dehydrogenase and monoamine oxidase distribution in medulla oblongata and cerebellum of squirrel monkey

12 p2018 A69-25778

Light effects on circadian rhythms in monkeys, describing changes in deep body temperature and locomotor activity phase relationships

15 p2556 A69-31336

EEG electrode stimulated simian mental activity in problem solving during simulated space flight, discussing skull implantation and EEG recordings of hippocampus activity

17 p2910 A69-33749

Enzymes distribution in subfornical organ in squirrel monkey

20 p3478 A69-37934

Squirrel monkeys escape behavior under centrifuge simulated gravity in excess of earth gravity

21 p3665 A69-39174

Normobaric oxygen toxicity pathology in baboons and Macaca, irus and squirrel monkeys during 14 day exposure

21 p3660 A69-39179

Rhesus monkeys visual responses recorded before and after unilateral striate lesions, optic tract section and inferotemporal lesions

22 p3876 A69-40263

Visual retroactive perceptual masking effect in monkeys pretrained in visual discrimination task, interpreting electrical potentials recorded along optic pathways

22 p3876 A69-40265

Squirrel monkey retinas spectral stimulation, determining differential color responses reaching striate and prestriate cortex

22 p3879 A69-40844

Visual field meridians in circumstriate visual cortex of monkey determined by tracing degenerating axons stained by Nauta method

22 p3881 A69-40858

Nocturnal and diurnal monkeys spectral sensitivity functions determined from simultaneous recordings of light-evoked cortical and retinal responses

22 p3882 A69-40867

Squirrel monkeys exposed to centrifugally generated artificial gravity trained to respond for food reinforcement at selected gravity levels

23 p4081 A69-41434

Cerebrospinal fluid /CSF/ formation in male monkeys as function of fluid pressure at third ventricle level following temperature stress and feeding

23 p4084 A69-41469

Central nervous, cardiovascular and metabolic data of Macaca nemestrina during simulated Biosatellite flight, testing data acquisitions systems
24 p4260 A69-42703

Social entrainment of feeding rhythms in Rhesus monkeys with light, temperature and sound held constant
24 p4260 A69-42704

Circadian rhythm phase relationships between photoperiodism and heart rate, locomotor activity and deep body temperature (DBT) in unrestrained monkeys
24 p4260 A69-42706

Physiological circadian rhythms in isolated and nonisolated Macaca Nemestrina living under varied light intensities, noting telemetered deep body temperature, urine volume and sodium, etc
24 p4261 A69-42707

Abnormal biologic rhythm in rhesus monkeys associated with behavioral stress, noting brain temperature periodicities sensed with implanted extradural thermistor
24 p4261 A69-42708

Nonhuman primate circadian rhythms as functions of phase shift carried out in advance or delay
24 p4261 A69-42709

MONOCHROMATIC RADIATION

Organic dye lasers energy characteristics excited by monochromatic radiation, investigating radiation absorption during transitions from lower to higher electron-vibrational levels
01 p0090 A69-10381

Solar corona electron density, polarization, temperature and monochromatic emission during November 1966 eclipse
02 p0310 A69-11457

Quadratic and cubic response in photoelectric emission in potassium antimonide under laser irradiation observed with measurement of energy distribution of excited electrons
05 p0771 A69-15813

Differential cross section frequency dependence for resonant scattering of monochromatic light by dilute gas atoms
[IEEE PAPER T-8]
05 p0776 A69-16328

Submillimeter plane monochromatic wave amplitude and phase fluctuations during propagation in turbulent atmosphere surface layer, considering absorption by water vapor
05 p0722 A69-16778

Surface UV irradiated MgO powder catalytic activity for hydrogen-deuterium exchange reaction
07 p1073 A69-18374

Electromagnetic field strength of narrow polarized monochromatic light beam, noting spatial curvature and twisting in beam current line
07 p1147 A69-18524

Nonpolarized single frequency gas laser radiation produced by interferential effects in complex resonator
07 p1149 A69-18936

Wavelike photodissociation of gas molecules under quasi-monochromatic pulsed radiation, investigating associated supersonic disturbances
08 p1354 A69-19950

Optical systems with quasi-monochromatic partially coherent illumination, discussing energy distribution computation program
08 p1353 A69-21096

Far IR radiation from water vapor laser, noting monochromaticity and strong linear polarization
10 p1702 A69-23160

Diffuse reflection of monochromatic radiation by semiinfinite plane layer in case of isotropic scattering, reducing problem to power series
11 p1960 A69-24732

Monochromatic midlatitude auroral arc /M arc/ observation on 28-29 September 1967 at Moscow, Idaho
12 p2065 A69-26105

Organic dye lasers energy characteristics excited by monochromatic radiation, investigating radiation absorption during transitions from lower to higher electron-vibrational levels
12 p2109 A69-26676

Gas lasers, including stimulated emission in monochromatic field of traveling and standing plane waves, spontaneous emission with stimulated transitions, etc
12 p2109 A69-26906

Minimum height of monochromatic radiation ionization in atmosphere assuming spherical earth for space science applications
13 p2256 A69-28653

Plane monochromatic and pulsed electromagnetic waves penetration into metal cylindrical shells, deriving equations for electromagnetic field in interior
15 p2569 A69-30950

Frequency selector for gas laser, considering monochromatic emission and multimode oscillation
16 p2795 A69-31608

Thick gas model for monochromatic one dimensional radiant flux near diffusely emitting and reflecting boundaries, discussing gray gas and exponential kernel approximations
16 p2769 A69-31871

Atmospheric extinction determined by monochromatic photometry in Chile in 3000 to 6000 Å range, discussing components
17 p3031 A69-33100

Monochromatic undulating light vertical refraction path curvature radii calculation based on refractive index
18 p3174 A69-35201

Dual beam white or nearly monochromatic light source providing programmed repetitive sample illumination with variable intensity, pulse duration and sequence for photosynthesis research
19 p3312 A69-36378

Monochromatic electromagnetic field in resonant medium, examining linear, incoherent and coherent nonlinear propagations and resonant scattering
21 p3769 A69-38382

Monochromatic radiation diffusion in one dimensional bounded medium, deriving equations for probability density of quantum yield and intensity of light fluxes
21 p3769 A69-38586

Cross correlation coefficient for submillimeter monochromatic wave amplitude and phase fluctuations in turbulent atmospheric boundary layer
21 p3674 A69-39129

Absorption spectrum of CS atoms excited by electrical discharge and irradiated by monochromatic light and ionized by electron collisions
22 p3984 A69-40418

Temperature distribution on surfaces of close binary stars as basis for predicting variation of monochromatic reflection effect
24 p4387 A69-43350

MONOCHROMATIZATION

Fabry-Perot etalon for obtaining monochromatic weak solar prominences
02 p0248 A69-11634

Optimal thickness of inhomogeneous absorption layer subjected to normally incident plane monochromatic wave treated as Mayer-Boltz variational problem
13 p2297 A69-27381

Michelson interferometers with large interference fields for plasma diagnostics emphasizing structural rigidity, monochromatic light pulse power, instruments vibrations resistance, etc
14 p2496 A69-29776

Accuracy standards for diffraction measurements of electromagnetic waves incident on periodic arrays, using monochromatic field and plane phase wavefront
23 p4139 A69-42042

MONOCHROMATORS

Absorption coefficient of hydrazine and hydrogen peroxide determined with 2.5 angstrom bandwidth monochromator, giving results in graphical form
02 p0205 A69-11873

Ion and electron temperature and density measurement by Thomson scattering with low resolution monochromator for Salpeter parameter near unity
11 p1925 A69-24310

Automatic recording of spectral distribution of high resistance semiconductors photoconductivity using spectrograph monochromator
14 p2447 A69-29409

Solar spectral irradiance measured by airborne instruments, discussing construction, calibration, etc, of photoelectric filter radiometer and Leiss monochromator
16 p2861 A69-32261

Monochromatic linearly polarized electromagnetic beam generator for submillimeter band, discussing applications
17 p2932 A69-34162

CaO and MgO reflectance spectra measurements at high resolution and at low temperature including exciton spectra at 25 K, obtaining fine structure
18 p3181 A69-34274

Optical design of double monochromator for use in EUV, describing astigmatism and transmission properties
24 p4351 A69-43758

MONOCOQUE CYLINDERS

U CYLINDRICAL SHELLS

MONOCOQUE STRUCTURES

Titanium monocoque fuselage reinforced by composite boron filaments in polyimide resin matrix tested

for SST applications, noting weight savings over all titanium structure
[AIAA PAPER 69-763]
19 p3329 A69-36298

MONOCRYSTALS

U SINGLE CRYSTALS

MONOCULAR VISION

Holographic photogrammetry compared with conventional holography in monocular and binocular parallax reconstruction and stationary stability of objects
22 p3944 A69-40044

Target distance and direction monocular estimates with stabilized and nonstabilized retinal images, finding eye movements not improving spatial judgment accuracy
22 p3878 A69-40838

Landing performance in T-33A aircraft with loss of binocular vision compared to performance with both eyes
23 p4102 A69-41675

MONOLITHIC CIRCUITS

U INTEGRATED CIRCUITS

MONOMERS

Monograph on crystallization during polymerization, discussing categories, monomers capable of step reaction, chain reaction, nucleation crystal growth and perfection
05 p0783 A69-15967

Polymerization of monomers considered for direct synthesis of iminobenzylidene
10 p1651 A69-23308

Luminescence spectra of aromatic polymers, monomers and dimers under high energy electron excitation using molecular resonance model
16 p2828 A69-32792

MONOMOLECULAR FILMS

Uranyl ions interaction with phospholipid and cholesterol monolayers, using surface pressure and potential measurements
11 p1832 A69-25641

MONOPLANES

U A-6 AIRCRAFT
U A-7 AIRCRAFT
U AN-24 AIRCRAFT

MONOPOLE ANTENNAS

Radiation pattern, gain and polarization of omnidirectional antenna consisting of dipoles or monopoles arranged along circular cone
01 p0046 A69-10738

End correction for input admittance of electrically thick monopole antenna with arbitrary radius driven from coaxial line
02 p0219 A69-12346

Monopole antenna behavior over grounded metal hemisphere, noting application to spacecraft and broadcasting antennas erected on hill
08 p1282 A69-20040

Capacitance and effective height for VLF umbrella antennas using multiple wire structural members to increase effective antenna surface area
08 p1282 A69-20041

Space frequency filter antennas, using multiple terminals for signal processing as function of frequency and angle
08 p1290 A69-20977

Multiple beam HF receiving antenna system for directivity, azimuthal coverage and noise limitation
13 p2228 A69-27631

Vertically polarized log periodic antenna consisting of unipole vertical radiators with side radiators for achieving minimum size

16 p2763 A69-32580

Radiation and impedance characteristics of spherically capped conical and monopole antennas protruding from spherical vehicle related to cone height, angle and vehicle diameter

22 p3908 A69-40699

MONOPOLES

Magnetic monopole search using synchrotrons and cosmic radiation to destroy ferromagnetic materials binding in rocks, meteorites and deep sea sediments

22 p3981 A69-40197

MONOPROPELLANTS NT AEROZINE

Flame zone development of monopropellant droplets during heat-up period

02 p0352 A69-12310

Spherical monopropellant droplet radially symmetric burning during adiabatic vaporization and direct decomposition, examining near-equilibrium limit by asymptotic analysis

12 p2190 A69-25948

Extinction kinetics of monopropellant droplet burning in inert gas reservoir with atmospheric temperature lower than adiabatic combustion temperature

13 p2378 A69-28250

Semiempirical correlation of characteristic velocity for Otto Fuel II during monopropellant combustion, assuming droplet vaporization as rate controlling process [AIAA PAPER 69-419]

16 p2877 A69-31843

Steady deflagration of homogeneous monopropellant in condensed phase, considering nonequilibrium surface condition for mass decomposition rate [WSCI PAPER 69-6]

16 p2830 A69-32347

Pilot chamber initiated thermal decomposition reactor concept for monopropellant thruster, discussing thrust levels and throttling ratios [AIAA PAPER 69-420]

16 p2841 A69-32685

Pure monopropellant steady droplet burning rate theory for determining heat-up and convection transport rates in droplet combustion products of flat flame burner [AIAA PAPER 69-563]

16 p2834 A69-32722

Rocket motors using hydrazine as monopropellant, considering doping as means of using anhydrous hydrazine mixed with other products

17 p3019 A69-33340

Titan 3 transtage attitude control system hydrazine rocket engine design and performance, emphasizing problems associated with monopropellant [AIAA PAPER 69-422]

19 p3394 A69-36300

Adiabatic model deflagration limits for steady linear monopropellant burning at Lewis number of unity and one step gas phase reaction

24 p4415 A69-43670

MONOPULSE ANTENNAS

Monopulse ground station antenna configuration for improvement of sidelobe level in satellite transmission [DVL-856]

02 p0214 A69-11599

Contour pattern analysis of AN/FPQ-6 monopulse radar Casscgrainian antenna, giving three dimensional drawings

04 p0576 A69-14769

Kwajalein Missile Range UHF telemetry conversion program using S band antennas with three channel monopulse autotrack systems

07 p1077 A69-18829

Axis deviation and refraction errors to correct design in radome of monopulse antenna, comparing various RF radome performances

07 p1110 A69-19520

Radioelectric axis deviation of radome in front of monopulse radar antenna

07 p1111 A69-19524

Stepped scanned ring monopulse array, discussing pattern analysis, directivity, co-phased and quasi-phased model

14 p2419 A69-28894

Monopulse parabolic antenna radiator design for decimeter and meter wavelengths, discussing characteristic properties at optimal dimensions

17 p2939 A69-33905

Multiplicative feed system for monopulse angle tracking antennas, discussing influence of sidelobe and backlobe responses on control function slope determining antenna bearing angle

20 p3510 A69-37704

Phase error in monopulse antenna system attributed to far field background noise sources during passive or active objects tracking

20 p3492 A69-37707

Monopulse telemetry tracking system, describing equipment and mobile operation

22 p3900 A69-40681

Monopulse, high power, three channel antenna feed system design for communication satellites, noting orthogonal polarization of transmit and receive functions

23 p4120 A69-41750

Parabolic antenna properties generated by dual band circularly polarized focused two channel monopulse feed system, discussing tracking data from helicopter, Apollo 8 and Cassiopeia A

23 p4120 A69-41752

MONOPULSE RADAR

Multiple target monopulse radar signal processing technique

04 p0562 A69-15470

Signal processors for implementation of monopulse tracking radar with three instead of four beams, investigating accuracy

08 p1270 A69-19855

Radar target detection and angular location estimation in amplitude comparison monopulse radar by simultaneous observation with group of antennas

09 p1452 A69-21312

Angle of arrival in amplitude comparison monopulse radars in presence of internally generated thermal noise

13 p2220 A69-27942

Electronic boresight shift in space-borne monopulse radar system, expressing antenna and signal parameters in terms of equivalent branch and channel asymmetries

14 p2411 A69-28895

MONOSACCHARIDES

Physicochemical synthesis of monosaccharides from human waste products at atmospheric and elevated pressures, considering methane oxidation by nitrogen oxides and ozone

07 p1071 A69-18971

Monosaccharide production from carbon dioxide from respiration or human waste incineration, evaluating toxicological effects of synthetic monosaccharides

15 p2557 A69-31471

Physicochemical synthesis of monosaccharides from human waste products at atmospheric and elevated pressures, considering methane oxidation by nitrogen oxides and ozone

20 p3483 A69-38219

Carbohydrate analyses of upper carboniferous plant fossils in England, noting monosaccharides separation

21 p3661 A69-39534

MONOSTABLE MULTIVIBRATORS

Circuit for linear voltage amplitude to pulse width conversion using controlled unijunction monostable multivibrator

02 p0217 A69-12151

MONOTONE FUNCTIONS

Brightness curves of eclipsing systems under monotonicity of unknown functions, using stable algorithm

09 p1588 A69-21363

Optimal control problem involving approximation by monotone functions

09 p1531 A69-21412

Tricomi theorem extension concerning intermediate value property of continuous real valued functions of real variable

09 p1533 A69-22797

Monte Carlo method for integral of monotonic continuously differentiable function

13 p2288 A69-27735

Brightness curves of eclipsing systems under monotonicity of unknown functions, using stable algorithm

18 p3197 A69-34753

Monotonic minimization algorithm for nonsmooth extremal problems of mathematical programming, game theory, approximations and optimal control in arbitrary Banach space

23 p4181 A69-41524

MONSOONS

Satellites use in meteorology, noting monsoon rain forecasting through mesoscale sea surface temperatures of Indian Ocean [UN PAPER 68-95555]

01 p0109 A69-10502

Steady state solution of quasi-geostrophic perturbation equations for atmospheric forced response to parametrized heating as global monsoon theory

19 p3362 A69-36405

MONTE CARLO METHOD

Ionization cross sections of excited states of hydrogen atoms and hydrogenoids calculated by Monte Carlo method

01 p0122 A69-10040

Monte Carlo simulation procedure synthesizing probability distributions of reliability parameters with individually exponential components

01 p0036 A69-10707

Monte Carlo method used to construct optimal algorithms for simulating homogeneous Markov chains whose trajectories reach absorbing state with probability of one

01 p0105 A69-10726

Monte Carlo method accuracy improvement for calculating probability characteristics of nonlinear ordinary differential equations, describing nonlinear automatic control

01 p0105 A69-10730

Monte Carlo method to calculate distributions describing particle behavior in Knudsen cell, clarifying relationship between gaseous collisions and Knudsen number

06 p0908 A69-17111

Random search and multiple integral based Monte Carlo method for computer solution of nonlinear aerodynamic problems

06 p0858 A69-17334

Monte Carlo solution of linearized Boltzmann equation in rarefied gas dynamics, noting Knudsen layer and Couette flow applications

06 p0910 A69-17345

Flow near leading edge of sharp insulated and cooled flat plates, using Monte Carlo direct molecular simulation [AIAA PAPER 69-141]

06 p0866 A69-18208

Metal fatigue simulation by Monte Carlo method, showing programmed fatigue tests in form of life distribution functions

07 p1233 A69-19314

Arrival time distribution and energy content of extensive air shower at large core distances, discussing photon energy spectra and Monte Carlo calculation

07 p1186 A69-19410

Monte Carlo method applied to calculation of radiation transmission and dosage behind space vehicle shields during passage through earth radiation belt

08 p1377 A69-19843

Complex bodies aerodynamic characteristics in free molecular gas flow by applying Monte Carlo method

09 p1430 A69-21793

Spatial distribution of residual nuclei produced in thick Fe targets by one and three Gev protons, noting total production and longitudinal variation of production

10 p1760 A69-23411

Mass and velocity distribution of interstellar clouds from Oort model simulated by Monte Carlo method on computer, predicting rogue cloud existence

10 p1779 A69-23608

Interstellar dust alignment mechanisms investigated by Monte Carlo model, discussing grain velocity maintenance by radiation pressure and effects of magnetic constraint on charged grain trajectory

10 p1781 A69-23675

Monte Carlo digital computer simulations, considering sample sizes and confidence intervals in multinomial output

10 p1661 A69-23853

Optimal estimation of conditional mean of posterior probability density function in multistage nonlinear filters, using Monte Carlo techniques and Bayes theorem

10 p1667 A69-24039

Monte Carlo method application to heat transfer analysis including radiation, rarefied gas energy transfer and conduction

11 p1997 A69-24457

Model for radiative transfer in atmosphere-ocean system by Monte Carlo method, considering Rayleigh and Mie scattering

11 p1877 A69-24851

Monte Carlo method for integral of monotonic continuously differentiable function

13 p2288 A69-27735

Proton initiated nuclear cascade in atmosphere calculated using Monte Carlo method, relating electron number to primary proton energy

13 p2331 A69-28397

COHORT-II Monte Carlo computer program written in Fortran IV to model radiation shielding problems

14 p2417 A69-29004

Direct simulation Monte Carlo method for hypersonic rarefied gas flow past solids, modeling on digital computer

14 p2390 A69-29580

Quasi-uniform pseudorandom numbers program transmitter statistical characteristics suited for solving problems by Monte Carlo method

15 p2572 A69-30336

MONTH

Vapor-liquid transition in inert gases based on Monte Carlo method, including comparison with van der Waal equation and plasma ionization equilibrium
15 p2655 A69-30981

Three dimensional Monte Carlo calculations for hadronic component of extensive air showers using semiempirical model high energy nuclear interactions
15 p2678 A69-31482

Normal and directional emittance for two dimensional emitting, absorbing and scattering semiinfinite plane slab based on Monte Carlo method compared with Bobco approximation
[AIAA PAPER 69-625]
17 p3005 A69-33301

Data inaccuracy used for calculating forecasts of reliability analyzed by Monte Carlo simulation
17 p2937 A69-33389

Monte Carlo inversion of seismic body waves for transposing uncertainties of observations to velocity models
17 p2962 A69-33654

Atomic excitation and ionization by thermal electrons, using Monte Carlo trajectories to determine adiabatic collisions effects on energy transfer near dissociation limit
18 p3176 A69-34790

Monte Carlo method application to neutron streaming in hemispherical air-filled ducts in water tank to determine leakage through nuclear reactor shields
18 p3171 A69-35178

Modified Monte Carlo model applied to computerized meteorite orbit evolution, simulating secular perturbations by imposing sinusoidal variation on orbital elements
19 p3414 A69-36117

Chondritic meteorites initial orbits evolution to earth impact calculated by Monte Carlo method, considering relationships to meteorite sources
19 p3415 A69-36118

Monte Carlo relaxation method for physically self consistent model stellar atmospheres, discussing stability, accuracy and convergence of solution
19 p3425 A69-36337

Monte Carlo method for constructing catalogs of stellar positions, distances and velocities
20 p3605 A69-37829

Space mission sensitivity to parameters of interest determined by Monte Carlo simulation samples
21 p3804 A69-39036

Algorithm for numerical modeling by Monte Carlo method of diffusion bounded light beams in dispersive media, applying to light pulse in cloudlike medium
22 p3981 A69-40248

Circular and spherical antenna arrays elements random distribution in three dimensional space using Monte Carlo method, considering arbitrary excitation and nonisotropic elements
22 p3914 A69-40704

Monte Carlo methods for electromagnetic showers simulation, noting electron track length distribution in Pb glass absorber
22 p4007 A69-41057

Monte Carlo method for energy transfer efficiency of ruby laser pumping cavities by helical flash lamps, noting dependence on ruby parameters
23 p4173 A69-41630

Space and missile guidance performance analysis through automatic generation of mission performance sensitivity with respect to error sources from Monte Carlo simulation
[AAS PAPER 69-404]
24 p4347 A69-42836

Monte Carlo calculation of free molecular flow over concave spherical surface, considering partial diffuse reflection and imperfect energy accommodation
24 p4248 A69-43592

MONTH

Synodic month length variations since late Cambrian, noting paleontological evidence in mollusks and stromatolites and associated geological changes
02 p0241 A69-11807

MONTMORILLONITE

Purines, pyrimidines and nucleosides absorption by Li-, Na-, Mg- and Ca-montmorillonite in aqueous solutions over range pH 2-12 by cation exchange
05 p0716 A69-15973

Absorption of nucleosides, purine and pyrimidine derivatives by Co-, Cu- and Ni-montmorillonite taking place by cation exchange process
05 p0716 A69-15974

MOON

Meteorite scattering in geogravitational field and influence on lunar meteorite precipitation distribution
01 p0153 A69-10756

Roughness effect on microwave emissivity according to geometric optics with application to moon and Venus
02 p0207 A69-12017

Moon figure from meridional measurements of visible diameters at different angles of libration, deriving equation for polar and equatorial compression of lunar ellipsoid
03 p0512 A69-13690

Selenographic and celestial selenocentric coordinate systems, noting precession and nutation of lunar rotation axis
04 p0662 A69-15250

Large mass concentrations/mascons/ effect on moon dynamical figure, considering production of asymmetries
05 p0820 A69-15762

Detached lunar compression wave, noting positive evidence from solar wind flux and direction measurements near lunar wake
05 p0824 A69-16251

Origin of moon indicating pristine structure on basis of mascons, alpha scattering and crater formation
06 p1001 A69-17160

Lunar opposition effect theory applied to Mars opposition effect on brightness
07 p1214 A69-18616

Lunar core electrical conductivity determination based on induced magnetic field arising from time varying interplanetary magnetic field associated with solar wind plasma
07 p1215 A69-18832

Model experiment on plasma flow about obstacle to simulate solar wind interaction with moon
07 p1205 A69-18851

Lunar depth profiles of conductivity, dielectric constant and magnetic permeability from radar, radiothermic and magnetic measurements, discussing lunar models
07 p1216 A69-19221

Geomagnetic tail topology, reconnection and interaction with moon from Explorer 33 satellite data
07 p1128 A69-19365

Models for lunar density distribution consistent with available data on lunar physical properties
08 p1393 A69-20579

Low energy proton flux in neighborhood of Moon measured by Luna 12 satellite indicating magnetized plasma region effect on burst
09 p1577 A69-21773

Radiometric observations of moon during total lunar eclipse at 3.33 mm, noting decrease in equivalent black body disk temperature
10 p1789 A69-24132

Solar and lunar/solar harmonics determination, noting effects of moon on values of horizontal magnetic component
11 p1965 A69-25555

Moon internal structure, discussing aggregation origin of Moon parallel to earth and three layer model of nife core, sima mantle and porous sheath
12 p2160 A69-26896

Lunar dynamic response to discontinuities in interplanetary magnetic field to determine electrical conductivity and internal temperature
15 p2700 A69-31442

Cassini laws applied to moon and Mercury, determining relations between moment differences for spin vector, orbital angular-momentum vector and precessional velocity
16 p2861 A69-32239

Moon density and nucleation of planets, explaining low density and absence of heavy core by late aggregation from nonmetallic particles
16 p2865 A69-32808

Lunar rotation parameters determined from photographs and visual observations independent of moon profile
17 p3027 A69-32874

Numerical integration of lunar motion equations to investigate lunar theory for high precision applications and to examine motion departures from gravitational theory
20 p3603 A69-37560

Hypothetical planet captured by earth, becoming earth satellite/moon/, discussing Mercury orbits peculiarities
20 p3603 A69-37562

Spherical lunar coordinates for arbitrary moment of time calculated by digital computer using Brown lunar motion theory
22 p4024 A69-40611

MOON-EARTH TRAJECTORIES

Reentry trajectories from lunar surface and orbit obtained by computer with allowance for initial data spread
09 p1594 A69-21756

Earth-moon and moon-earth trajectory parameters related to lunar orbit conditions for synthesizing lunar orbit trajectory
18 p3196 A69-34704

Moon to earth trajectories analyzed numerically to determine effect of specified earth entry conditions on hyperbolic elements near moon for abort
[AAS PAPER 68-089]
20 p3595 A69-37174

MOONMOBILES

U LUNAR SURFACE VEHICLES

MOREHOUSE COMET

Solar wind directional fluctuation derived from wavy structure of comet Morehouse ionic tail rays, noting solar wind bulk velocity
02 p0311 A69-11459

Motion of condensations within tail of comet Morehouse 1908 III from photographs
08 p1382 A69-19870

MORL

U MANNED ORBITAL RESEARCH LABORATORIES

MORNING

Irregular pulsations in morning sky brightness using all-sky photographic airborne auroral observations along auroral oval
09 p1594 A69-21666

MORPHOLOGICAL INDEXES

Morphological properties and history of Zabrode stony meteorite, discussing storage, disappearance and recovery
01 p0160 A69-11384

MORPHOLOGY

NT GEOMORPHOLOGY
NT ISOMORPHISM
NT LUNG MORPHOLOGY
NT POLYMORPHISM

Pathomorphological aspects of radiation sickness in animals irradiated by high energy protons, showing changes in lymph node, stellate ganglion and spleen
05 p0708 A69-16509

Morphology of E and SO galaxies in terms of equilibrium isopleths within general relativity
08 p1395 A69-20636

Magnetite morphological variations of type 1 carbonaceous meteorites, discussing isometric crystals, spheres, spherulites, platelets and filaments
08 p1406 A69-20932

Grain morphology and preferred orientation effects on direction and propagation of stress corrosion cracking of aluminum alloy plate
09 p1521 A69-21399

Morphological microchanges in solar plexus ganglia of white rats after X irradiation
12 p2019 A69-26347

Spiral galaxies with connectors observed in Southern Hemisphere, noting galactic nuclei differences and nucleus relation to galaxy morphological type
12 p2165 A69-27030

Coding of morphological evolution in time of auroral displays as genericization of existing IUGG code
13 p2256 A69-28655

Pathomorphological aspects of radiation sickness in animals irradiated by high energy protons, showing channels in lymph node, stellate ganglion and spleen
18 p3095 A69-34728

Three dimensional morphology of systems engineering, using model for applications in taxonomy, new activities sets discovery and systems science curriculum design
18 p3236 A69-35235

Noctilucent clouds morphological and kinematic characteristics based on photographs
18 p3132 A69-35335

Tungsten influence on morphology and lattice parameter of fcc gamma prime phase in Ni-Cr-Ti-Al alloys
20 p3558 A69-36962

Lunar morphology evolution by dust transport on surface, discussing possibility of fluidization
23 p4221 A69-42392

MORPHOTROPISM

U ISOMORPHISM

MORSE CODE

Artificial magnetospheric VLF noise triggering by Morse code dots at 14.7 kHz from NAA verified at Antarctica
11 p1878 A69-25155

MORSE POTENTIAL

- Franck-Condon factors for high rotational levels of nitrogen calculated in Morse potential approximation for application to plasma diagnostics
07 p1185 A69-19169
- Fcc metals higher order elastic constants calculated by Morse potential function, considering atomic interactions truncation and pressure derivatives
23 p4233 A69-42337

MORTALITY

- Risk factors in coronary diseases modified to provide base for estimating achievable mortality magnitude reduction
24 p4262 A69-43059
- Stillbirth and neonatal death in stressed rats exposed to mild and acute gravitational loads in automobile ride and aircraft flight
24 p4266 A69-43381

MOS [SEMICONDUCTORS]

U METAL OXIDE SEMICONDUCTORS

MOSAICS

- Solid state IR imaging using monolithic Ge mosaics of isolated sensor elements, discussing design, structure, fabrication, system readout and operation
11 p1938 A69-25307
- Mosaic mirror and lens camera system for multiple image high resolution photography
17 p2972 A69-33089

MOSS [SPACE STATIONS]

U ORBITAL SPACE STATIONS

MOSSBAUER EFFECT

- Temperature dependent isomer shift and anharmonic binding of Sn 119 in niobium stannide, measuring Mossbauer recoil free fraction
01 p0134 A69-10009
- Mossbauer spectra of shocked and unshocked iron meteorite and fayalite
03 p0517 A69-14231
- Stainless steel sensitization analyzed using Mossbauer spectroscopy and X ray diffraction, noting ferromagnetic phase
06 p0944 A69-17852
- Phonon interactions with recoilless gamma rays, considering usability of Mossbauer effect as probe for VHF acoustic experiments
10 p1724 A69-23088
- Mossbauer spectroscopy, discussing nuclear resonance fluorescence and equipment
18 p3099 A69-34622
- High field susceptibility in Fe and Ni and high field Mossbauer study in Fe relating results to band structure and models of ferromagnetism
19 p3383 A69-36050
- Quantitative analysis and classification of stony meteorites, including carbonaceous chondrites, by Mossbauer characteristics, discussing Prior plot and weather influence role in finds and falls
19 p3408 A69-36083

MOT [ORBITAL TELESCOPES]

U MANNED ORBITAL TELESCOPES

MOTILITY

U LOCOMOTION

MOTION

- Motion measurement using Doppler shift of scattered laser light, noting high resolution
09 p1492 A69-21398
- Laser Doppler heterodyning for monitoring motion noting solid surfaces vibration, liquid and solid surfaces linear velocity and turbulence in liquids and gases
15 p2614 A69-31276
- Deterministic and statistical prediction techniques for aircraft carrier motions at sea for application to aircraft landing operations [AIAA PAPER 68-123]
17 p2902 A69-34014
- Band movement phenomenon model for temporal and spatial interactions
22 p3880 A69-40854

MOTION AFTEREFFECTS

- Strain releasing method for reduction of small local movements of recording holographic emulsions resulting in degradation of holographically reconstructed wavefronts
06 p0923 A69-16930
- Motion coordination capacity of persons subjected to 40 days bed rest studied by dynamographic technique, discussing nature of slackening
17 p2906 A69-32937
- Human motion coordination under acceleration followed by weightlessness during jet flights along Keplerian orbits, discussing initial disturbance and subsequent subsiding
17 p2907 A69-32938

Electrophysiological data for directionally sensitive units in optic tectum of mammals, indicating midbrain as site for rotating spiral motion aftereffects
20 p3480 A69-38264

Visual long term storage capability demonstration, describing negative aftereffect of motion perceived after fixation of moving spiral pattern
21 p3661 A69-39332

MOTION EQUATIONS

U EQUATIONS OF MOTION

MOTION PERCEPTION

U SPACE PERCEPTION

MOTION PICTURES

- Systems analysis in aerospace engineering by adding motion pictures and TV techniques [SMPTE PAPER 104-17]
04 p0596 A69-14359
- Digital computer motion pictures generation for ground controlled intercept simulation
06 p0906 A69-17397
- Holographic motion picture recorded using CW Q switched laser and conventional camera
10 p1697 A69-24002
- Photography role in experimental research with applications to flight analysis and comparison with human visual accuracy
11 p1881 A69-24573
- Cineradiography based on repetitive flashes drawn from single field emission X ray tube energized by high voltage pulse generator
12 p2086 A69-26163
- Cinematic holography as continuous motion uninterrupted viewing system compared with standard cinematography, noting flicker-free shutterless reproduction
12 p2087 A69-26173
- Holographic cine-interferometry, using live fringe method with Q switched pulsed ruby lasers to obtain consecutive submicrosecond interferograms
18 p3133 A69-34265
- Nanosecond photography with superradiant light source, X rays or electrons using multipurpose electron accelerator, obtaining stop motion pictures
19 p3305 A69-35721

MOTION SICKNESS

- Physiological causes and prevention of motion sickness during space flight, emphasizing conditioned reflex, different analysts interactions and vestibular-vegetative changes during weightlessness
02 p2000 A69-12122
- Overt motion sickness prevention by incremental exposure to Coriolis accelerations
07 p1067 A69-19425
- Motion sickness inhibitive effect on stomach motor activity, measuring biopotential of stomach wall, pyloric sphincter and ganglions
08 p1263 A69-19935
- Motion sickness studied with slow rotation room having controlled Coriolis accelerations, discussing oculogyral illusion, nystagmus, dizziness and neuromuscular incoordination
12 p2019 A69-26547
- Head movements controlled for rapid vestibular adaptation in slow rotation room /SRR/, preventing motion sickness
17 p2908 A69-33178
- Motion cues simulation system with seat of six differentially inflatable sections, discussing DYNASEAT
17 p2947 A69-34007
- Motion sickness forms in human subjects subjected to induced rocking, noting impaired performance and sensorimotor reactions to visual stimuli
20 p3472 A69-37263
- Vestibular analyzer function relation to arterial pressure during otolith stimulation experiments on subjects susceptible and nonsusceptible to motion sickness
20 p3472 A69-37264
- Motion sickness as sensory rearrangement phenomenon, proposing neural mismatch hypothesis to account for symptom pattern
20 p3483 A69-38266
- Human susceptibility to motion sickness under Coriolis acceleration during parabolic flight weightlessness
21 p3659 A69-39168
- Motion sickness susceptibility during parabolic flight, comparing weightlessness and hypergravity effects on normal and labyrinthine-defective subjects
21 p3660 A69-39176

MOTION SICKNESS DRUGS

- Antimotion sickness drugs tested in slow rotation room with controlled Coriolis accelerations, noting summation effect of dextroamphetamine sulfate and scopolamine hydrobromide
03 p0381 A69-14079

Motion sickness treatment with bethanecol chloride, noting negative results with 12 airsick student naval aviators
12 p2024 A69-26561

Diphenidol and prochlorperazine effect on human semicircular canal function, noting failure of drug to alter vestibular responses
17 p2913 A69-33168

Motion sickness prophylaxis for rabbits subjected to rotation, investigating effects of adrenalin, ephedrine, sympatholitin, piperoxane and pyridoxophene on nystagmus and respiration
20 p3472 A69-37265

Motion sickness prophylactic action of sodium hydrocarbonate in dogs subjected to vertical accelerations, using intravenous administration
20 p3473 A69-37269

MOTION STABILITY

- NT AERODYNAMIC STABILITY
- NT AIRCRAFT STABILITY
- NT ATTITUDE STABILITY
- NT BOUNDARY LAYER STABILITY
- NT DIRECTIONAL STABILITY
- NT FLAME STABILITY
- NT FLOW STABILITY
- NT GYROSCOPIC STABILITY
- NT HOVERING STABILITY
- NT LATERAL STABILITY
- NT LONGITUDINAL STABILITY
- NT LOW SPEED STABILITY
- NT MAGNETOHYDRODYNAMIC STABILITY
- NT ROTARY STABILITY
- NT SPACECRAFT STABILITY

Spacecraft periodic motion near center of mass determined by point transformation combined with bifurcation theory, studying stability and parametric dependence
01 p0161 A69-10205

Theory for stability of steady motions of system with cyclic coordinates applicable to total damping
01 p0151 A69-10567

Dynamically symmetric gyrostat steady motion stability in relation to satellite motion
01 p0163 A69-11301

Stability characteristics of small and moderately sized short period Trojan librations in sun-Jupiter restricted three body problem
01 p0158 A69-11329

Rotating bodies stability conditions relative to radial disturbances found to be field strength dependence on internal mass at any point
02 p0317 A69-11978

Mathematical aspects of stability of equilibrium configurations
02 p0340 A69-11991

Motion stability of two tethered unsymmetrical earth pointing bodies in circular orbit, presenting nine degrees of freedom differential equations of motions
02 p0324 A69-12507

Finite length cylindrical shell dynamic response to uniform radial impulse, noting simple harmonic motion and flexural mode excitation instability [AIAA PAPER 68-144]
02 p0347 A69-12517

Self oscillations of dynamic systems representing space vehicles, considering periodic motions stability, bifurcation curves and energy consumption requirement limit
03 p0519 A69-13068

Role of second order internal resonance in problem of stability of equilibrium of system neutral in linear approximation
03 p0466 A69-13404

Stability of steady motion of body with cavity containing one or several nonmixing liquids as problem of bounded oscillations about motion
03 p0418 A69-13815

Idealized point mass motion in axisymmetric gravitational field, discussing orbital stability about oblate planet
04 p0658 A69-14887

Perturbed nonlinear systems with many degrees of freedom, analyzing resonant oscillatory and rotary motions
04 p0631 A69-15536

Asymptotic stability of gyroscopic systems equilibria with partial dissipation used for motion stability analysis
04 p0631 A69-15537

Stabilization of steady motions of nonlinear controlled systems with two purely imaginary roots, using Liapunov stability theory
05 p0794 A69-15790

Stability of unsteady motion of nonlinear systems during limited time interval, applying differential inequalities method to Liapunov function
05 p0794 A69-16209

Motion stability analysis of system represented by differential equation having continuously differentiable functions as continuously acting disturbances
05 p0794 A69-16450

Satellite relative equilibrium stability under action of gravitational and aerodynamic moments
05 p0830 A69-16503

Motion of gyroscopic integrator of linear accelerations, analyzing nutational vibrations imposed on precession
06 p0927 A69-17688

Rolling ballistic vehicles mass and aerodynamic characteristics determined from dynamic motion data by performing Fourier analysis on roll axis equation of motion
[AIAA PAPER 69-102] 06 p0862 A69-18039

Semipassive three axis stabilization for dumbbell type satellites, considering pitch, roll and yaw motions damping
07 p1226 A69-18324

Stability of motion of spherically symmetric mass of compressible gas with constant space density in absence of gravitational field
07 p1215 A69-18706

Periodic asymptotically stable MHD motions, proving uniqueness and existence theorems
07 p1194 A69-19437

Damping flywheel to stabilize permanent rotation of weightless solid body moving by inertia, obtaining differential equations of motion
07 p1183 A69-19678

Steady state motions stability of gyroscope mounted on satellite in gravitational orbit
07 p1137 A69-19679

Motion of condensations within tail of comet Morehouse 1908 III from photographs
08 p1382 A69-19870

Stability and instability conditions derived for undisturbed motion of system over finite period of time
08 p1351 A69-20321

Ponderomotive forces and irregularities in earth rotation, considering core and lower mantle as closed system with respect to periodic electromagnetic and mechanical effects
09 p1487 A69-21636

Periodic motion of satellite with magnetic damper along circular orbit, assuming small value of damping coefficient
09 p1609 A69-21761

Motion stability over finite interval of time for perturbed mechanical systems
09 p1539 A69-21881

Incompressible fluid unsteady motion between journal and bearing solved in form of Reynolds number power series from stream functions
09 p1514 A69-22712

Gravitational potential of circular rings used to investigate motion stability of Saturn rings
10 p1771 A69-22855

Holonomous and scleronomic dynamic systems steady state motion stability under effect of generalized forces derived on basis of Liapunov theory
10 p1724 A69-22929

Planar motion of satellite containing damping mechanism, considering small dampers case
10 p1791 A69-22935

Harmonic balance procedure to study periodic motions in nonlinear stabilization system of nonrigid satellite
10 p1792 A69-24195

Atmospheric influence on plane oscillations of space vehicle moving at 100-150 km heights
10 p1792 A69-24208

Dynamics of gyroscopic synchronous servo system intended for remote measurement of spatial orientation coordinates of sensor moving element
11 p1881 A69-24558

Motion of body with cavity containing liquid based on Kharlamov solution, noting gyrostatic moment and liquid sloshing effect
11 p1868 A69-24775

Control sets corresponding to desired stability behavior of controlled motion, giving theorem concerning differential inequality
11 p1910 A69-25412

Stability of stationary motion, analyzing gyroscopically uninstabilizable systems and extension to continuous spectrum case
11 p1919 A69-25437

Stability of steady state motions of nonholonomic mechanical systems, noting Chetaev method for construction of Liapunov functions
11 p1920 A69-25742

Gyrostabilized satellite steady state motions in Newtonian force field having displaced satellite center of mass orbital plane relative to center of attraction
12 p2173 A69-25885

Jet flows instabilities with vertical and horizontal velocity drifts from numerical integration of atmospheric motion equations linearized with respect to small perturbations
12 p2125 A69-25950

Boussinesq approximation for compressible fluids, discussing perturbation pressure and velocities and vertical scale motions
12 p2061 A69-26013

Helicoidal precession stability in sense of Liapunov, Poincare and Lagrange
12 p2130 A69-26286

Flat disk squeeze film air bearing, determining motion of supported mass by computer program
[ASME PAPER 68-LUBS-38] 13 p2266 A69-27272

Flat disk squeeze film air bearing, determining motion of supported mass by computer program
[ASME PAPER 68-LUBS-35] 13 p2266 A69-27280

Gyroscope motion with unbalanced rotor in run-down mode, integrating equations for small oscillations
13 p2259 A69-27429

Stratified rotating fluid time dependent motion characterized by stability frequency ratio and Coriolis parameter within quasi-geostrophic approximation
13 p2248 A69-28171

Spacecraft periodic motion near center of mass determined by point transformation combined with bifurcation theory, studying stability and parametric dependence
14 p2530 A69-28741

Self oscillations of dynamic systems representing space vehicles, considering periodic motions stability, bifurcation curves and energy consumption requirement limit
14 p2530 A69-28750

Rotary oscillatory solution of parameterized system with stable unexcited motion using successive approximations
14 p2482 A69-28812

Dynamic process during rms deviation of nonlinear system from prescribed trajectory described by nonlinear differential equations
14 p2425 A69-28822

Unsteady pressure on oscillating slender cone in hypersonic flow derived by expanding flow equations in powers of shock density parameter
14 p2389 A69-29020

Finite difference method for motion stability of periodic bipolar vibrational systems, considering perturbations
14 p2534 A69-29039

Rigid obstacle unsteady motion in compressible fluid with load applied to surface layer, deriving numerical solution of pressure expansion
14 p2430 A69-29480

Incompressible viscous fluid steady motion caused by rotating ellipsoid, determining drag moments for circular disk and sphere
14 p2432 A69-29627

Halley comet abrupt daily motion variation ascribed to solid particles ejection from ice nucleus stimulated by gas outflow
14 p2524 A69-29712

Two piston flow stability separated by thin wall in traveling magnetic field, finding piston inertia centers velocity equal to field velocity
14 p2500 A69-29903

Rotating bodies stability conditions relative to radial disturbances found to be field strength dependence on internal mass at any point
15 p2680 A69-30260

Sufficient conditions for asymptotic stability of motion in finite and whole of nonlinear systems by Liapunov second method
15 p2652 A69-30660

Theory for stability of steady motions of system with cyclic coordinates applicable to total damping
15 p2690 A69-30737

Collisionless stability of relativistic, spherically symmetric star clusters against radial perturbations, considering one dimensional sufficient criteria
15 p2691 A69-30765

Steady state motion of multiple unit impact damper attached to sinusoidally excited primary system, determining asymptotically stable regions
15 p2714 A69-31144

Differential equations of steady motion construction from integral manifold
15 p2654 A69-31260

Satellite motion about center of mass, discussing satellite stabilization and libratory motion in gravitational force field, planet resonances, etc
15 p2703 A69-31411

Stability of steady circular motions in systems with hidden variables analyzed by using Lejeune-Dirichlet theorem
16 p2804 A69-31621

Conditional trajectory stability associated with first integral compared with orbital stability on base of topological method
16 p2853 A69-31622

Liapunov functions applications in motion stability theory problems, considering dynamic systems, periodic orbits, optimum damping and control
16 p2804 A69-32248

Bending vibratory motion instability of rotor on elastic shaft with uniform mass distribution along axis, using variational methods
16 p2875 A69-32249

Energy method determining sufficient conditions for fluid motion stability described by infinitesimal theory of viscoelasticity, restricting analysis to confined fluids or periodic velocity field
17 p2949 A69-33015

Rotating cylinder or vortex motion in shear flow with friction, noting drag and rotor force combined influence
17 p2950 A69-33151

Stable motions determination of solid bodies with liquid filled cavities and satellites motions stability in central Newtonian force field
17 p3005 A69-33228

Stability and instability conditions derived for undisturbed motion of system over finite period of time
17 p3005 A69-33314

Isolated symmetric doubly asymptotic solutions existence in neighborhood of symmetric periodic solutions of nonautonomous canonical system with one degree of freedom near resonance
17 p2996 A69-33619

Tire test machine for tire parameter determination in aircraft landing gear shimmy stability studies
[AIAA PAPER 68-311] 17 p2902 A69-34029

Soviet monograph on liquid rocket as controlled plant covering rocket bodies, liquids motion stabilization and gyrosystem positioning
18 p3206 A69-34333

Pendulum motion about stationary axis of solid body containing damper, ascribing instability to center of gravity shift with respect to cavity
18 p3135 A69-34557

Rotary motion stability of axisymmetric solid body or gyroscope suspended on string and containing ellipsoidal cavity filled with liquid
18 p3135 A69-34558

Steady motion stability of satellite gyroscope in Cardan suspension traveling along circular orbit in Newtonian central force field
18 p3135 A69-34585

Nonlinear systems of differential equations to free oscillations about equilibrium, obtaining periodic solutions
18 p3172 A69-34591

Exponential boundedness of system motion for Lure type forced systems, using quadratic Liapunov functions
18 p3164 A69-34674

Spiral disk galaxies stability analysis assuming centrifugal force balancing self gravitation, transforming linearized equations of motion into eigenvalue equations
18 p3200 A69-35131

Instability criterion for motion differing from criteria of Liapunov and Chetaev
18 p3174 A69-35317

Autonomous system steady motion with rotating phase and deviating argument solved by successive approximation over infinite time interval
18 p3175 A69-35323

Liquid filled rigid bodies motion stability defined and solved for system with infinite number of degrees of freedom
19 p3301 A69-36810

Stability of motions about triangular libration points in elliptic restricted three body problem
[AAS PAPER 68-090] 20 p3595 A69-37175

Liapunov stability theory for motion of spacecraft with flexible and moving parts in force free space
[AAS PAPER 68-125] 20 p3617 A69-37180

Jacobi integral and Hill criterion for analyzing motion stability of natural satellites and large planets inside gravitational sphere
20 p3596 A69-37314

Airborne imaging radar motion compensation and sensing problems concerning perturbed signal correction, discussing spatial sensitivity measures and constraints

20 p3490 A69-37645

Positive pitch-flap coupling for controlling helicopter rotor blade motion stability involving blade in-plane deflections

20 p3463 A69-37808

Motion stability in nonresonant case of four pairs of imaginary roots in characteristic equation

21 p3770 A69-38883

Time-independent feedback attitude control system for high accuracy earth pointing motion of stable and unstable satellites in elliptic orbits

21 p3804 A69-39020

Critical case of stable motion for differential equations having two zero roots

21 p3771 A69-39108

Steady motion of frictionless indenters along surface of elastic layer in plane strain, using Fourier transform and Fredholm equations for numerical solution

21 p3837 A69-39155

Motion and stability characteristics of dual spin satellite system with pendulous type nutation dampers, noting mass unbalance effect
[AIAA PAPER 69-857]

21 p3823 A69-39385

Motion stability of hydraulic actuators with open loop control system in presence of nonlinear negative resistance damping

21 p3650 A69-39716

Randomly moving objects holography and reduction of stability requirement during exposure period due to automatic phase modulation

21 p3726 A69-39741

Closed form solution to stability of coupled libration motion of slender axisymmetric satellite in circular orbit limited to small amplitude vibrations

22 p4008 A69-39936

Minimization of motion deviation from prescribed motion analyzed as differential game of converging motions using equations of motion

22 p3980 A69-40105

Representative data of actual forces and moments applicable to large spacecraft attitude control system for typical crew activities obtained through simulation programs
[AIAA PAPER 69-1006]

22 p3921 A69-40380

Motion stability of rapidly spinning satellite, discussing elastic booms effect

22 p4037 A69-41091

Entropy definition for nonequilibrium states, using mathematical theory of stability of motion applied to kinetic equations of irreversible processes

23 p4238 A69-41366

System asymptotic motion stability for given parameter values using algorithms with aid of R functions

23 p4191 A69-41704

Magnetospheric stable charged particle beams for pearl pulsations and discrete VLF radiation in geomagnetic field, attributing synchronization to space charge

23 p4206 A69-41851

Book on interaction between oscillatory systems and energy source of limited capacity, examining stability and resonance phenomena

23 p4170 A69-42166

MOTIVATION

Science education and training, discussing student motivation
[UN PAPER 68-95809]

01 p0179 A69-10515

Lateral hypothalamic stimulation bound eating motivation in animals, comparing electrical stimulation and hunger elicited eating

17 p2910 A69-33752

Electrical stimulation effect on drive specificity in lateral hypothalamus area of sated rat, suggesting fallacy in previous conclusion concerning appetite

22 p3876 A69-40269

Group leadership attempting behavior dependence on situational and perceptual variables

23 p4110 A69-42015

MOTOR SYSTEMS (BIOLOGY)

U EFFERENT NERVOUS SYSTEMS

MOTORS

NT ELECTRIC MOTORS

NT SERVOMOTORS

NT SYNCHRONOUS MOTORS

NT TORQUE MOTORS

Fluidic numerical controls of linear or rotating motors, discussing pneumatic, hydraulic, hybrid logic components and amplifiers

04 p0550 A69-15082

Compact hydraulic power transfer units in aircraft with common connecting shaft for pump/motor elements, discussing integrated power package

06 p0930 A69-17168

Optical motor system to efficiently convert laser energy into mechanical rotational energy, giving equations for controlling motor speed

09 p1442 A69-22457

MOUNTAIN INHABITANTS

Oxygen intake and body temperature of basal and sleeping Andean natives at high altitude

06 p0874 A69-17835

Irreversible blunted respiratory response to ventilation in high altitude natives, considering hypoxic and hypercapnic stimuli

12 p2018 A69-26130

Transient ventilatory response to breaths of nitrogen at rest and during exercise in high altitude and sea level natives

12 p2019 A69-26131

MOUNTAINS

Mountain structures surrounding lunar craters, discussing possible origin by impacting planetesimals shock waves

04 p0661 A69-15142

Clear air turbulence in upper atmosphere and in mountain waves, discussing density variations

24 p4343 A69-42913

MOUNTING

NT RIGID MOUNTING

Compact antivibration mounting for carrying instruments, using bicycle tire inner tube around heavy slab to provide elasticity and damping

09 p1502 A69-22692

Linear analysis of damped flexibly mounted rolling element bearings influence on dynamic rotor unbalance response, including optimum support characteristics
[ASME PAPER 69-LUBS-8]

18 p3212 A69-34382

Mirror mount for shock tube laser cavity with alignment capability, noting seal against internal pressures

22 p3951 A69-41233

External load distribution in bracket between bolts and joint, verifying Reshetov mounting bolt formulas

23 p4168 A69-41417

Mounting elements alloys relaxation characteristics at various temperatures, considering effects of scale factor and stress concentrations

23 p4169 A69-41419

MOUNTS

U SUPPORTS

MOVEMENT

U MOTION

MOVING TARGET INDICATORS

Automatic sequential detector for noncoherent moving target indicator radar, describing noise and clutter residue control

03 p0389 A69-13197

Moving target indicator (MTI) performance degradation by limiting clutter analyzed for various pulse cancellers and verified by time-domain Monte Carlo simulation

03 p0390 A69-13198

Coherent moving target indicator radar receiver behavior as function of input situation, using improvement factor

04 p0556 A69-14338

Line filter compression and positioning of bipolar video pulse trains for conjunctive use with moving target indicator in echo elimination

04 p0558 A69-15071

Moving window radar detector design for moving targets, giving chart for SNR derivation to obtain given detection probability

04 p0558 A69-15073

Digital filters for moving target indicator radars compared with analog filter systems

04 p0580 A69-15463

Statistical analysis of Radicord/radar digitizing and recording/clutter and signal spectra and moving target detection by pulse radar

05 p0721 A69-16619

Input signal history analysis in recognition of moving or changing objects based on classification definition and Wald sequential analysis

08 p1297 A69-20419

Clutter residues of coherent MTI radar receiver, emphasizing IF stages saturation nonlinearity affecting cancelling circuits performance

13 p2220 A69-27941

MULTICHANNEL COMMUNICATION

Input signal history analysis in recognition of moving or changing objects based on classification definition and Wald sequential analysis

14 p2427 A69-29657

Moving targets trajectories determination from radar data, using posteriori probability distribution represented by Markov chain

15 p2566 A69-30334

Moving target selector radars subsystems amplitude and phase instability effects on interference signal suppression

15 p2576 A69-30339

Position sensitive sensors design of optical tracking systems with emphasis on amplitude, phase, frequency and pulse-time sensors

16 p2790 A69-32111

SNR changes loss factor effect during passage through MTI coherent receiver followed by video integrator

16 p2753 A69-32438

Gyroscopic apparent rate meters generating steering moments in inertial navigation systems for determining moving object position and course

18 p3134 A69-34556

Moving target indication, discussing target motion effects dependence on Doppler imaging radar scan rate and compression ratio

20 p3490 A69-37644

Moving model target for laboratory measurements of radar cross section to simulate satellite or reentry vehicle precession motion, noting signature data analysis

20 p3511 A69-37850

Delay line MTI receivers performance calculation accuracy, discussing error for general and restricted number of pulses from single and double cancellation at IF

23 p4117 A69-41605

MRKOS COMET

Sodium atoms and NO molecules role in atomic O 6300 and 5577 A emissions in comet Mrkos 1957d due to charge exchanges and dissociative recombination

14 p2523 A69-29707

MSRE REACTORS

U MOLTEN SALT NUCLEAR REACTORS

MTI RADAR

U MOVING TARGET INDICATORS

MUBIS [SCANNERS]

U MULTIPLE BEAM INTERVAL SCANNERS

MULLITES

Nickel reinforced with mullite whiskers produced by hot pressing

05 p0782 A69-16794

MULTICHANNEL COMMUNICATION

Multichannel amplitude analyzer for space applications, noting use as gamma-spectrometer component in Lunik 10 and 4096 bit/channel traffic capacity

01 p0084 A69-11315

Multichannel telemetering device for magnetically suspended or free flight wind tunnel models noting strain gage pickups, switching and auxiliary circuits
[ONERA-TP-643]

02 p0226 A69-11623

Multichannel digital data compression simulation, discussing algorithms, buffer queue control, identification coding and system performance measurements

02 p0213 A69-12814

Multichannel communication received signals irregular components, discussing signal phase and amplitude fluctuations correlation coefficients

03 p0394 A69-13519

High gain self steering repeater for multibeam microwave array system for earth-satellite communications

04 p0573 A69-14330

Soviet book on multichannel and TV signals transmission over radio relay links using microwave tropospheric scatter propagation

04 p0558 A69-14919

Wideband multichannel optical signals nonlinear distortions during transmission by electrooptical modulators using Pockels effect

05 p0718 A69-15655

Digital adaptive recording system (DARS) 12 channel flight recorder

05 p0766 A69-16754

Diffractional crosstalk in optical beam waveguide during simultaneous multibeam transmission arising from beam coupling by aperture diffraction

07 p1100 A69-18648

Frequency modulation methods and multiple access for communication satellite systems, considering bandwidth for space station transponder

09 p1449 A69-21274

Multiple access in communication satellite systems for achieving maximum flexibility of interconnection between earth stations

09 p1450 A69-21276

Maximum horizontally radiated power of earth stations in any 4-kHz band for multichannel telephony and TV using satellites

09 p1450 A69-21278

Signal processing regenerative technique used for multichannel predetection combining, including carrier suppressed signals

09 p1458 A69-22472

Noise rejection in multichannel telephone signal reception with FM and multiplexing, determining SNR dependence on SNR at receiver input

09 p1459 A69-22640

Multichannel bit error probability for FSK and DPSK obtained for slow nonselective-fading multipath as function of multipath parameters and diversity order

10 p1656 A69-23533

Discrete continuous signals transmission with minimum noise along synchronous and asynchronous channels

11 p1835 A69-24953

Sampled data multichannel telemetry using pseudorandom sequences generated by linear shift registers

12 p2028 A69-25925

Time domain method for hybrid simulation to compute interchannel distortions due to linear transducers in FM systems

14 p2417 A69-29556

Multichannel telemetry system for chronic implantation in animals to monitor physiological parameters

15 p2559 A69-31044

Wideband multichannel optical signals nonlinear distortions during transmission by electro-optical modulators using Pockels effect

16 p2754 A69-32512

Multibeam transmission in optical beam waveguides by simulation, discussing intensity profiles phase fronts and cross scattering

17 p2974 A69-33400

Shifted pulse multichannel generator producing pulses and pulse sequences time delayed with respect to reference channel

17 p2938 A69-33899

Information storage of multichannel analyzer of continuous and pulsed processes

17 p2939 A69-33900

Electro-optical crystals resonance modulator for coherent light beams and microwave frequencies, describing application to multichannel TV transmission system

19 p3266 A69-35763

Demultiplexing of high speed multichannel optical pulse code transmission systems, based on coincidence detection using locally generated reference pulses

19 p3279 A69-36764

Multiple access techniques of SSB-PM and PCM-PM frequency translation for satellite communication system, comparing performance characteristics

21 p3678 A69-39807

Three channel inertial ship or aircraft navigator for determining gravity vector, using earth gravity field model

23 p4162 A69-41320

Equal bandwidth multichannel FM/FM EEG telemetry system using subcarrier frequencies and HF modulation via varactor diodes

23 p4106 A69-41802

Multichannel time division multiple access system for communication satellite networks, considering PSK modems, PCM codes and channel capacity

23 p4129 A69-42511

Multichannel spectral line receiver for 210 ft Australian radio telescope with front ends covering wide frequency range

24 p4283 A69-43115

MULTICHANNEL RECEIVERS

U RECEIVERS

MULTICHANNEL TRANSMITTERS

U TRANSMITTERS

MULTIENGINE VEHICLES

Multieengine helicopter scheduled passenger service operations in Europe

11 p2004 A69-24378

MULTILAYER INSULATION

Scale modeling of multilayer insulated spacecraft for thermal design, considering solar probe and two meter telescope models

[AIAA PAPER 69-613]

17 p3049 A69-33267

Gas pressure differential across multilayer insulation blanket during rapid evacuation predicted, using one dimensional flow theory

[AIAA PAPER 69-608]

17 p3072 A69-33275

Planetary lander model thermal design, analysis and testing, emphasizing lightweight multilayer insulation, discussing thermal/vacuum testing

[AIAA PAPER 69-612]

17 p3049 A69-33296

Heat transfer in evacuated multilayer insulation by radiation and conduction, considering optically thin media separating reflective layers

[AIAA PAPER 69-607]

17 p3073 A69-33300

Damping properties of multilayer coatings for aircraft structures analyzed on duralumin samples subjected to bending at room, elevated and low temperatures

17 p2993 A69-33941

Multifoil thermal insulation for radiation shields from cryogenic temperatures to 3500 F, noting thermal conductivity

19 p3341 A69-35540

MULTILAYER STRUCTURES

U LAMINATES

MULTILOOP SYSTEMS

U CASCADE CONTROL

MULTIMODE RESONATORS

Normal multimode laser action with and without phase locking, using exact steady state solution of Fokker-Planck equation

08 p1325 A69-20291

Microwave resonator characteristics, deriving expressions for Q for pure or coupled electric or magnetic modes

09 p1464 A69-22096

Intensity interferometry by two photon excitation of fluorescence trace for three mode laser under phase locking, free running and FM-like conditions

10 p1705 A69-23811

Singly resonant optical parametric oscillator, noting single mode and multimode oscillation for various pump powers, pump wave depletion and mode competition

11 p1897 A69-25038

Frequency memory in cavity controlled Gunn oscillators, discussing loop gain and bandwidth dependence on oscillation mode and bias voltage

13 p2229 A69-27677

RF band multimode parametric pulsed oscillations in distributed system using one dimensional resonators

16 p2758 A69-31796

Laser multimode emission kinetic theory, discussing quasi-equilibrium disturbance effects and nature of inhomogeneity

19 p3333 A69-35875

Frequency stabilization in He-Ne three mode laser by stabilizing LF oscillations via automatic adjustment of laser resonator length

21 p3738 A69-39078

MULTIPACTOR DISCHARGES

Back bombardment of magnetron cathode as single surface multipactor, noting effects of cathode grooves and output loading

07 p1101 A69-18656

MULTIPATH TRANSMISSION

Multiple transmission principles, examining linear systems, synchronous and asynchronous codes and channel interference

01 p0026 A69-10068

Optimal coherent reception of frequency diversity signals in multipath channels investigated for noise immunity

01 p0028 A69-10375

Mean error rates in microwave PCM systems with wave distortion due to multipath propagation

02 p0208 A69-12307

Digital simulation of demodulator/tracking phase locked loop of navigation/traffic control satellite system in thermal noise diffuse multipath fading environment

03 p0390 A69-13204

VOR path course errors, emphasizing effects of propagation and receiver processing

03 p0392 A69-13245

Coherent PSK system in multipath environment/Rician fading and additive Gaussian white noise/ with phase locked loop for coherent reference extraction

03 p0393 A69-13255

Path length and path length rate variations in synchronous satellite communications link

04 p0561 A69-15448

Nonlinear distortion of FM signal during passage through multipath medium, using analysis of linear passive four terminal network

05 p0721 A69-16531

UHF telemetry flight tests at White Sands Missile Range, discussing multipath and target scintillation problems

07 p1082 A69-19116

Optical communications applications with emphasis on large capacity transmission

09 p1456 A69-22131

Multipath fading reduction on line of sight microwave radio relay links by dual space diversity, noting effects of vertical antenna separation, frequency, etc

[IEEE PAPER 68-TP-350-COM]

10 p1656 A69-23535

Analog signal transmission through randomly fading channels, proposing pseudorandom phase reversals method for slowly varying multipath communication channels

11 p1834 A69-24552

Digital simulation of phase locked receiver in diffuse multipath fading environment with band limited thermal noise

11 p1839 A69-25298

Binary error investigation in noncoherent FSK communication link with nonselective fading, noting Doppler shift

14 p2414 A69-29498

Multipath resolution of tropospheric scatter medium by incorporating Rake instrumentation into tropospheric transhorizon microwave experiments

14 p2448 A69-29524

Nonlinear distortion of FM signal during passage through multipath medium, using analysis of linear passive four terminal network

16 p2753 A69-32473

Optimal ratio predetection combiner used with diversity signals and various modulations, showing significant improvement in telemetry systems performance

19 p3270 A69-36241

Field strength determination at reception point for long range short wave paths, taking into account multiple ray paths and antenna radiation patterns

20 p3520 A69-37035

MULTIPHASE FLOW

NT TWO PHASE FLOW

Gray radiation and conductive heat transfer in Oseen-like free mixing flow, computing temperature distribution by inversion integral

02 p0354 A69-12504

Environmental temperature and water vapor increases associated with ascending thermals estimated by penetrative convection

03 p0460 A69-13340

Viscid-inviscid equations solution, describing flows with coupled mixing, combustion and lateral pressure gradients

[AIAA PAPER 69-83]

06 p1037 A69-18109

Shock wave in two dimensional mixed transonic airfoil flows, discussing initial value problem for flow downstream of shock

[AIAA PAPER 69-43]

06 p0915 A69-18180

Mixed sub- and supersonic gas flow in plane pressure nozzle free of vortex and neglecting viscosity and heat conduction

07 p1050 A69-18739

MULTIPLE BEAM INTERVAL SCANNERS

Multiple beam electronically steerable retrodirective antenna array with automatic inertialess compensation for altitude or beacon location

02 p0212 A69-12816

Broadband multibeam antenna array with frequency independent beam directions, noting aperture gain limitation

08 p1288 A69-20965

Maxson multibeam antenna design for noninteracting beams, considering beam shapes and positions and applications

09 p1463 A69-21676

Electronically scanned and fixed multiple beam phased arrays for spaceborne microwave radiometric sensors

12 p2044 A69-26977

Electroacoustic transducers interaction effects in multibeam acoustical reflector type receiving antennas

13 p2227 A69-27536

MULTIPLE DEGREES OF FREEDOM

U DEGREES OF FREEDOM

MULTIPLETS

U FINE STRUCTURE

MULTIPLEX TRANSMISSION

U MULTIPLEXING

MULTIPLEXERS

U MULTIPLEXING

MULTIPLEXING

NT FREQUENCY DIVISION MULTIPLEXING

NT TIME DIVISION MULTIPLEXING

Adaptive multiplex telemetry use in scientific satellite data management

02 p0212 A69-12817

Space and immersion suits physiological evaluation by pulse duration multiplexing telemetry, using commercial FM receiver

06 p0883 A69-17845

Tape flutter and additive noise time base errors in coherent demodulation of suppressed carrier AM multiplex

07 p1082 A69-19119

Analog to digital conversion for data sampling systems including scanning, distributors, multiplexing, automatic ranging, noise reduction and data storage techniques

10 p1660 A69-23232

Design of 126 channel PCM telemetry unit for C-5 aircraft flight test, discussing FET analog multiplexing

10 p1693 A69-23275

Holographic multiplexing for producing three dimensional reconstruction of nonlaboratory objects in horizontal direction, noting TV and X ray pictures applications

11 p1883 A69-24684

Multiple information storage in sampled hologram in space division multiplexing holography, constructing hologram with sound waves and reconstructing images with laser light

12 p2079 A69-25921

Time function multiplex system for simultaneous communication via satellite between number of stations, considering transmission capacity decrease due to hard limiting amplifier

17 p2919 A69-33320

Phase locked loop design of desensitized monolithic integrated circuits for FM multiplex signal filtering and demodulation, describing external tuning

19 p3273 A69-36274

Computer program designing multiplex taper to minimize FM/FM telemetry system carrier threshold SNR, examining noise behavior of multiplex system stages for system performance

19 p3273 A69-36275

Addressable remote multiplexed PCM data system used on Titan III launch vehicles

19 p3274 A69-36279

Demultiplexing of high speed multichannel optical pulse code transmission systems, based on coincidence detection using locally generated reference pulses

19 p3279 A69-36764

MULTIPLICATION

Multiplication effects on noise in Si avalanche diodes, noting high resolution apparatus for measurement of spatial variations

04 p0573 A69-14332

Multiplication of solutions of homogeneous linear differential systems

08 p1342 A69-20349

Lower bound for time required for group multiplication by logic circuits, using modified Winograd model for Abelian group

12 p2034 A69-26752

MULTIPLIER PHOTOTUBES

U PHOTOMULTIPLIER TUBES

MULTIPLIERS

Full multiplier design based on stable iterative array cells interconnected to provide logical functions, noting capabilities for binary numbers

01 p0048 A69-11138

Time averaged products and squares of fluid turbulence signals at LF, using Hall effect multiplier device and integrating voltmeter

04 p0601 A69-15116

Stability of time varying systems by construction of multipliers with prescribed phase characteristics

05 p0740 A69-16598

Collection efficiency of continuous dynode electron multiplier arrays, discussing incident electron current

06 p0897 A69-17699

Analog multiplier with controlled current splitting devices and feedback technique for stabilization of transfer characteristics, noting implementation in bipolar transistor

09 p1475 A69-22584

Noise reduction techniques using injection phase locking and high-Q cavities for HF oscillator high order multiplier and avalanche diode oscillator microwave sources

14 p2420 A69-29458

Pulse height distributions, gain and counting rate characteristics of two magnetic strip multipliers and two channel multipliers in 1.5 to 44 A region of soft solar X-rays

17 p2972 A69-33082

Vector integral extension to optimal trajectory coordinate multiplier systems with constant of motion demonstrated for coast-arc problem

[AIAA PAPER 69-907] 21 p3807 A69-39339

MULTIPOLAR FIELDS

Coulomb approximation for dipole and quadrupole transitions, calculating tables for radial matrix elements

01 p0124 A69-10901

Closed analytic expressions for vector potential and magnetic field generated by axisymmetric multipole line currents

06 p0965 A69-17518

Polynomial representations of mirror cusp fields produced by combination of mirror coils and loffe /multipole/ bars

06 p0966 A69-17522

Axially symmetric static solutions of Einstein equations with singularities on z axis allowing for higher multipole moments in general relativity

08 p1350 A69-19783

Electromagnetic multipole left- and right-hand circularly polarized modal fields for multiarm log spiral antennas, discussing current distributions, multipole coefficients and field patterns

08 p1281 A69-20018

Plasma flow motion and polarizing interaction in multipole magnetic field

08 p1370 A69-21015

Impurity elimination from hydrogen plasma jets injected from coaxial source normal to octupole magnetic field

08 p1370 A69-21016

Elastic materials with particle interactions of finite range, establishing continuum field and constitutive equations from particle mechanics

13 p2371 A69-28674

Hydrogen plasmas motions in multipole magnetic fields, discussing plasma polarization, double vortex flow patterns and field line configurations

15 p2661 A69-30924

Multipole configuration toroidal plasma confinement device MHD equilibrium and stability from measured data

16 p2823 A69-32563

Spherical aberration effect on atomic beam focusing in six pole magnetic system

19 p3380 A69-36602

Atomic sources local multipolar field in anisotropic dielectrics determined from magnetic dipole radiation spatial distribution measurements

21 p3779 A69-38531

Geomagnetic multipole parameters changes using spherical harmonic coefficients of geomagnetic potential, relating to secular variation field

23 p4158 A69-42171

Force acting on multipole in external magnetic field, noting dependence on multipole axes

23 p4158 A69-42172

H plasmoid tail cut-off eliminating plasma impurities during injection across octupole magnetic field from coaxial source

24 p4358 A69-43474

MULTIPOLES

Simple dipolar stresses, noting effect of antisymmetry on equations of motion and energy equation

06 p1022 A69-17239

MHD stability of straight multipoles with shear, considering scalar-pressure perfectly conducting two dimensional MHD equilibria

09 p1546 A69-21576

Relativistic behavior of electromagnetic multipolar nongravitating particle, discussing integrability of field equations

14 p2486 A69-29594

MULTIPROGRAMMING

Multiprocessing system simulation using GPSS /General Purpose Simulation System/ model

02 p0213 A69-12492

Parameters distinguishing analytic queueing models of time sharing algorithms, emphasizing techniques used for analyzing round-robin and multiple level queueing models

19 p3279 A69-35600

Real time multiprocessing telemetry ground support integrated system design with expanded definition of hardware/software decision tradeoffs

[AIAA PAPER 69-971] 22 p3907 A69-40351

MULTIPROPELLANTS

U ROCKET PROPELLANTS

NT TITAN LAUNCH VEHICLES

NT TITAN 3 LAUNCH VEHICLE

Turquoise satellite booster, using stages of SSBS and MSBS ballistic missiles

02 p0334 A69-12232

Atmospheric entry testing in terms of velocity-altitude duplication, suggesting multistage rocket propelled aeroballistic range type testing

[AIAA PAPER 69-166] 06 p0907 A69-18189

Optimum attitude program for multistage satellite launch vehicle with impact restrictions

07 p1229 A69-18492

Feasibility of nuclear stage for space missions, discussing Saturn 5 third stage replacement, payload gain, reactor and engine size

08 p1409 A69-20158

Variation in spinning velocity around axis of last stage of solid propellant rocket in flight

08 p1409 A69-20160

Dynamic programming computational approach to optimization with state variable discontinuities, treating problems as multistage optimization with continuous subarc stages

09 p1474 A69-22440

Space stage separation qualification of ONERA rocket vehicles based on angular perturbation measurements during variable roll speeds

10 p1669 A69-23005

Multistage rocket trajectories optimized by second order numerical technique and digital computer program, considering coasting, vacuum flight and transition times

16 p2857 A69-32154

Two stage vehicle gross weight minimization determined by slide rule computation using formula based on specific impulse differences between stages

19 p3429 A69-35918

Rapid Targeting Procedures computer program for optimized orbital payload and associated launch vehicle targeting data with one submittal and minimum user intervention

[AAS PAPER 68-148] 19 p3402 A69-35951

MULTIVIBRATORS

NT FLIP-FLOPS

NT MONOSTABLE MULTIVIBRATORS

Soviet book on impulse generators in transistors covering multivibrators and pulse generators with timer circuits, crystal controlled frequency and delayed feedback

04 p0578 A69-15053

Multivibrator with two widely different zones of discontinuous oscillation

06 p0896 A69-17474

Multivibrator circuit for generation of oscillations with frequency stability against transistor ambient temperature changes

12 p2036 A69-25919

Resonant fixtures used for mechanical amplification of vibrator output to desired test levels

15 p2588 A69-30404

MUONS

Pionic 2p-1s X ray transition energy and natural linewidth and muonic 2p-1s X ray transition energy measurements for Na 23

01 p0122 A69-10035

Energetic cosmic radiation in deep mines, giving hypothesis of new particles more effective than muons

01 p0144 A69-10444

Extensive air showers at sea level, presenting experimental data for muon and electron numbers spectra

03 p0498 A69-12937

Muons in EAS, single unaccompanied muons, underground muons and experiments involving neutrinos

03 p0499 A69-12946

Upper limit estimated for anomalous interaction between cosmic muons with greater than 100 Bev energy

06 p0986 A69-17246

Data on muons indicating temperature effect diurnal maximum and pressure corrected daily variation

06 p0924 A69-17294

Low energy muons and nuclear active particles measured with extensive air showers array composed of scintillation detectors, spectrometer and Geiger counters

06 p0990 A69-17299

Extensive air shower high energy muons measurements noting energy spectrum, lateral spread and dependence on shower size

06 p0990 A69-17300

Cosmic ray magnetic spectrograph for measurement of momentum spectrum, charge ratio and specific ionization of muons, discussing magnetic and scattering displacement

06 p0925 A69-17302

Cloud chamber for measuring specific ionization in relativistic region by muons in gases, using drop counting method

06 p0925 A69-17303

Simultaneous parallel penetrating muons observed in multiplate cloud chambers, obtaining information about sea level muons interactions and EAS

06 p0991 A69-17304

Energy spectra of muons determined from knock-on electrons projected angles of emission in C, Al and Cu

06 p0991 A69-17305

High energy muons Cerenkov radiation, using water filled counter as function of muon momentum, noting no intensity decrease

06 p0991 A69-17306

Muon component of extensive cosmic ray showers, discussing effect of multiplicity of secondary particles created by high energy nuclear interactions

07 p1207 A69-19325

Direct muon production, discussing range vs energy relation for favorable experiment and difficulties with observed muon flux isotropy

07 p1209 A69-19406

Renormalizable weak interaction mechanism for generation of high energy muons from TeV cosmic rays in upper atmosphere

09 p1581 A69-22530

Weak interaction theory modifications needed for high energy cosmic ray muons to not violate conservation of probability

09 p1583 A69-22758

Low momentum muon directional coupling coefficients based on latitude survey of directional meson intensity

09 p1583 A69-22759

Secondary muon flux from primary cosmic ray particles monitored during minimum solar activity by telescopes at 60 mwe underground

10 p1769 A69-23827

Charged primary cosmic rays responsible for relative intensities of muon-poor extensive air showers at mountain and sea levels

12 p2152 A69-27099

High energy nuclear active particles and muons studied with calorimeters, noting cascades muon origin and muon energy spectra

13 p2331 A69-28395

High energy muons energy spectrum in extensive cosmic ray showers from spectrum study of ionization bursts due to penetrating component

13 p2332 A69-28403

Sea level fluctuations of electron-photon, muon and active nuclear components of extensive cosmic ray showers determined, obtaining shower parameters

13 p2332 A69-28406

Cosmic ray muons energy and angular distribution measurements, obtaining curve with respect to projection angles

13 p2332 A69-28420

Cosmic ray muons angular distribution measuring device for determining pion/kaon ratio

13 p2332 A69-28421

Form factor of nucleus effect on high energy muons bremsstrahlung cross section

13 p2333 A69-28422

Muon energy losses due to pair formation taking into account nucleus screening by electrons

13 p2304 A69-28423

Monte Carlo method used to calculate probability of muon penetration to deep underground levels with sea level energies

13 p2333 A69-28424

Muonic component diurnal wave trains at 70 mwe during cosmic ray decreases, discussing Forbush decay as result of shock front advance

14 p2511 A69-28962

Diurnal variation of cosmic ray muon intensity near geomagnetic equator and primary anisotropy monitored by cubical counter telescope

14 p2512 A69-28966

Lateral density distribution of muon component in central region of extensive air showers, using Lodz analyzer

15 p2677 A69-31481

Ground level muon density of extensive air showers related to threshold energy and zenith angle for primary particles

15 p2678 A69-31483

Frequency of multiple muons from extensive air showers as function of zenith angle, noting mean transverse momentum and density spectrum

15 p2678 A69-31484

Multiple muon showers penetrating deep underground, discussing radial extent and occurrence frequency against multiplicity spectrum

15 p2678 A69-31485

Electromagnetic muon-nucleon interaction explanation for observed horizontal air showers, reexamining shower data in view of triplet particles

15 p2678 A69-31498

Near horizontal air showers relationship to direct muon production and heavy triplet particles of unit charge, discussing nuclear interactions and muon bremsstrahlung

15 p2678 A69-31499

High energy cosmic ray muon charge ratios at large zenith angles measured as function of momentum by using spectrometer

17 p3023 A69-33321

Cosmic ray shower axis mean distance from apparatus determined by measuring muon to charged particles densities ratio

17 p3024 A69-33580

Cosmic ray muons for calibrating dE/dx counter used in particle identification by determining cosmic particles distribution as function of energy losses due to ionization

21 p3724 A69-39075

Air showers muon threshold energies deep underground as function of zenith angle, discussing nucleon-air-nucleus collision parameters variation effect

23 p4207 A69-42497

Diurnal variations in solar cosmic ray muon component near sea level, using scintillation counters assembled in muon telescope array

23 p4207 A69-42498

Cosmic ray pions and muons anomalous measurements above 1000 Gev explained by medium-strong contact interaction between protons

24 p4353 A69-43194

MURRAY METEORITE

Sporopollenin content of Orgueil and Murray meteorites as evidence for extraterrestrial life

21 p3662 A69-39617

MUSCLES

NT MYOCARDIUM

Increased gravitational stress effects on esophageal sphincter pressures and gastroesophageal reflux in rhesus monkeys, noting cardia competence

06 p0874 A69-17838

Structural and functional changes in cells as result of freezing of muscular tissue or suspension of erythrocytes

10 p1642 A69-23117

Histochemical tests on enzymes distribution in rhesus and squirrel monkeys intrafusal and extrafusal muscle fibers

12 p2018 A69-25777

Hypokinesia effects on transversostriated muscle fibers of mice, noting changes in myofibrillar apparatus, mitochondria and sarcoplasm

13 p2212 A69-28616

Histological and histochemical studies of dephosphorylating enzyme distribution in muscle spindle capsule of guinea pig thigh muscles and cat calf muscles

15 p2554 A69-30406

Surface electromyography /EMG/ frequency analysis of normal and pathological muscle or nerve contraction as diagnostic tool for industrial physician

21 p3664 A69-38920

Critical closing phenomenon in dog gracilis muscle, using pressure flow measurements and tissue staining techniques, detecting sudden vessel closure in microcirculation

22 p3873 A69-40202

Catalytic, physical and chemical properties of enzyme lactate dehydrogenase isolated from lobster tail muscle

22 p3897 A69-41069

White mice gastrocnemius muscle wet mass, dry mass and noncollagen-nitrogen /NCN/ content, noting /NCN/ content dependence on body mass

23 p4080 A69-41406

Tension effects on amino acid incorporation rate into proteins of cross-striated muscles of rats

23 p4083 A69-41458

Isometric recording device for tensile stresses on muscle preparations in vitro, based on differential transformer

23 p4111 A69-42056

Electric potential measuring device for frog isolated skeletal muscle fiber mounted on micromanipulator

23 p4111 A69-42058

Energy cost of muscular exercise in gastrocnemius muscle of dogs anesthetized with morphine, chloralose and urethane

23 p4093 A69-42065

Fibrosis histological patterns of left ventricular papillary muscles from comparison of hearts with myocardial infarction, noting acute and healed mural lesions

24 p4261 A69-42724

Radioisotopic determination of haemodynamic and bioelectric disturbances of rat striated muscles subjected to acceleration and hypokinesia

24 p4268 A69-43409

MUSCULAR FATIGUE

Hypokinesia effect on dynamics of metabolic processes in athletes muscular system by comparison of diuresis, creatinine excretion and cutaneous fat layer indices

10 p1646 A69-23582

Exhaustion time extension in rats by altitude acclimation, noting adaptation loss resulting from physical exercise discontinuation

23 p4086 A69-41787

MUSCULAR FUNCTION

Musculoskeletal system and weightlessness state, concerning muscular disuse atrophy possibility during prolonged space flights

06 p0873 A69-17018

Hypokinesia muscular activity deficit in males confined to bed rest compensated for by physical exercise, noting orthostatic resistance, acceleration endurance, immunity, etc

08 p1263 A69-19932

Arterial tone and human muscular activity limitations, analyzing hypodynamic effects on aorta, arm and leg vessels constriction

10 p1647 A69-23586

Posture role in physiological effects of acceleration on motor activity, discussing gravitational importance to vital processes

13 p2211 A69-28593

Hand movements in water environment, weightlessness and normal gravity conditions, discussing inner coordinative structure and muscular efforts

17 p2915 A69-33385

Muscle motor performance under continuous practice conditions, analyzing individual differences, intraindividual variability and remoteness

17 p2911 A69-34003

Muscle power output relation to imposed load modified to accommodate inverse relationship between generated force and contraction speed for determining maximum strength

17 p2916 A69-34011

Nervous system relations to insect flight musculature of lift and thrust mechanism

21 p3651 A69-38780

Positive phase shift relation to elastic modulus enhancement of smooth muscles of rabbit, cat and dog bladder, pulmonary artery and large veins

23 p4083 A69-41459

Cat papillary muscle length-tension curves before and after inotropic intervention, noting optimal length changes

23 p4084 A69-41461

Muscle function measurement in astronauts using electromyogram, electrocardiogram and isometric tension at fixed percentage of maximum voluntary contraction

23 p4103 A69-41684

Exercise prescription for hypokinetic airline pilots to prevent physiological deterioration and maintain performance, discussing predictive tests, tolerance evaluation, training regimens, etc

23 p4106 A69-41800

Spinal cord temperature effect on stretch responses of muscle spindle endings of triceps surae, anterior tibialis and extensor digitorum longus in anesthetized cats

23 p4093 A69-42067

Rodent swimming and treadmill training effect on capacity of mitochondrial fraction from hind limb muscles to oxidize pyruvate triples

23 p4095 A69-42084

Primary muscle spindle afferents from gastrocnemius muscle of cat before, during and after cold shivering, utilizing ramp stretches of same muscle

23 p4096 A69-42091

- Training effect on fast muscle isometric contraction in rats, discussing mechanical characteristics
23 p4097 A69-42095
- Spinal cord temperature influence on stretch response of tonic and phasic alpha-motoneurons by filament recordings from ventral roots in anesthetized cats
23 p4098 A69-42099
- Isometric contraction tension after sudden isotonic to isometric contraction mode change in cat papillary muscle, discussing temperature effects, tension development changes, etc
24 p4258 A69-42631

MUSCULAR STRENGTH

- Isolation effects on higher nervous activity, motor and vegetative reactions, muscular strength and emotional state
03 p0377 A69-14202
- Hypohydration effects on isometric muscular strength, noting decreasing trends in maximal strength
05 p0708 A69-15983
- Muscle power output relation to imposed load modified to accommodate inverse relationship between generated force and contraction speed for determining maximum strength
17 p2916 A69-34011
- Muscular strength dynamometric measurements in subjects during prolonged inactivity with restricted caloric and protein intake, showing decrease in strength
21 p3653 A69-38901
- Isometric tensions of detached lateral rectus muscles measured during strabismus surgery for mechanical components of human eye movements, giving muscle tone range
22 p3872 A69-40200
- Maximum voluntary isometric muscle strength relation to endurance time in static work during partial curarization
22 p3890 A69-40213

MUSCULAR TONUS

- NT HYPOTONIA**
- Oculomotor muscular tonus of rabbit during rocket flight acceleration and weightlessness
07 p1062 A69-18590
- Psychomotor reaction time and motions, myogenic tonus at rest and precision of monkeys during rocket flights along ballistic curve, noting weightlessness effect
10 p1646 A69-23575
- Prolonged bed rest effect on human myogenic tonus and proprioceptive reflexes, comparing test subjects with and without physical exercises
10 p1646 A69-23583
- Phase and tonic activity of oculomotor apparatus of rabbits during vestibular reflexes and postrotational nystagmus
20 p3469 A69-37243
- Motor and tonic reactions in animals during weightlessness, discussing interaction between gravity receptors and visual analysis
20 p3470 A69-37247
- Whole body LF mechanical vibration effects on anesthetized dogs peripheral circulation and vascular smooth muscle
22 p3875 A69-40228
- Spontaneous rhythmical activity and mean vascular tone dependence in isolated helical rat aorta strips on extracellular concentration of noradrenalin
23 p4093 A69-42069
- Venous tone, peripheral venous pressure, skin and muscle blood flow, alterations of heart rate and respiration in men during leg exercise
23 p4096 A69-42090

MUSCULOSKELETAL SYSTEM

- NT BONES**
- NT CARTILAGE**
- NT CEREBRUM**
- NT COLLAGENS**
- NT CRANIUM**
- NT MARROW**
- NT SCIATIC REGION**
- NT SKULL**
- NT VERTEBRAL COLUMN**
- Thyroid gland role in resistance and myoglobin content of skeletal muscles of flat land and high altitude acclimatized white rats
05 p0709 A69-16517
- Musculoskeletal system and weightlessness state, concerning muscular disuse atrophy possibility during prolonged space flights
06 p0873 A69-17018

- Physiological response of human skeleton to hypogravity and hypodynamics studied by bed rest experiments, suggesting disuse atrophy of bone
06 p0873 A69-17019
- Decrease in bioelectric activity of skeletal muscles in animals and man during intermittent acceleration and weightlessness
07 p1062 A69-18591
- Thyroid gland role in resistance and myoglobin content of skeletal muscles of flat land and high altitude acclimatized white rats
18 p3096 A69-34736

MUSEUMS

- Meteorite collections in museums of Lvov, U.S.S.R., noting specimens from Pultusk shower, Kansas, Mexico, Czechoslovakia and U.S.S.R.
01 p0160 A69-11388

MUTATIONS

- Accelerated helium and carbon ions effects on mutation-induction and nuclear inactivation in *Neurospora crassa* compared with X rays, discussing relative biological effectiveness /RBE/
03 p0373 A69-13490
- Recessive lethal mutations frequency in gametes of male and female *Drosophila melanogaster* onboard Vostok spacecraft
07 p1063 A69-18598
- Amber suppressors conversion to ochre suppressors in RNA of bacterium or bacteriophage using uracil mutagen
07 p1068 A69-19493
- Escherichia coli* WWU multiautotrophic revertants with nonsense suppression, noting role in aberrant morphology and in catabolizing thymidine for energy and carbon
07 p1069 A69-19503
- Radiobiology of *Tradescantia* clone orbited in Biosatellite 2, analyzing space effects on spontaneous and radiation induced mutation and cytological changes
15 p2556 A69-31321
- Insects mutational responses to space flight and associated radiation on biosatellite 2 compared with ground based controls
20 p3476 A69-37618
- Adenosine triphosphate /ATP/ production in normal cells and sporulation mutants of *Bacillus subtilis*, discussing applications of ATP synthesis response to C sources
22 p3886 A69-41076

MYOCARDIUM

- Electrocardiographic tests to study changes in electropotentials of heart in flying personnel after flight, noting changes in myocardium
03 p0378 A69-14207
- Myocardial repolarization changes in healthy persons with restricted motor activity
07 p1066 A69-18984
- Glycolysis rate and lactic acid content in rats myocardium during adaptation to hypoxia, using pressure chamber
10 p1645 A69-23501
- Bed rest effect on orthostatic tolerance of patients with acute myocardial infarction and without heart failure
10 p1648 A69-24189
- Myocardial changes in rabbits after general chronic ionizing irradiation attributed to lower cardiac activity, hypotrophy and dystrophy
17 p2906 A69-32929
- Myocardial repolarization changes in healthy persons with restricted motor activity
20 p3480 A69-38232
- Heart muscle ultrastructure during general hypoxia in dogs, noting development of compensatory-adaptational and dystrophic changes in myocardial intracellular components
21 p3651 A69-38412
- Temperature dependence of action potential, isometric tension development and relaxation rate of mammalian myocardium at low temperature, considering Ca ions role
23 p4092 A69-42060
- Myocardial muscle fibers transient inward current components during sheep ventricle voltage clamp analysis
23 p4095 A69-42080
- Refractory period adaptation to sudden heart rate changes in dogs
24 p4257 A69-42628
- Contraction frequency increment effects on myocardial oxygen consumption in dogs determined for various heart rate levels, using isovolumic left ventricular preparation
24 p4258 A69-42634

- Experimental myocardial infarction in dogs, examining lysosomal enzymes activity changes in soluble and particle-bound fraction
24 p4259 A69-42636
- Myocardium protein metabolism and heart physiology and pathophysiology, examining contractile function and energy transformation in hyperfunction, hypertrophy and heart failure
24 p4259 A69-42637
- Fibrosis histological patterns of left ventricular papillary muscles from comparison of hearts with myocardial infarction, noting acute and healed mural lesions
24 p4261 A69-42724
- Supraventricular arrhythmias after acute myocardial infarction, noting benefit of early DC shock
24 p4262 A69-42729

MYOELECTRICITY

- Myocardial repolarization changes in healthy persons with restricted motor activity
07 p1066 A69-18984
- Myocardial repolarization changes in healthy persons with restricted motor activity
20 p3480 A69-38232
- Myocardial muscle fibers transient inward current components during sheep ventricle voltage clamp analysis
23 p4095 A69-42080

MYOPIA

- Plots myopia incidence statistical study after initiate medical examination, emphasizing skiagram value in prognosis
24 p4267 A69-43400

N

N-N JUNCTIONS

- Photoelectric properties of n-n junction interfaces in gallium phosphide and arsenide semiconductors
02 p0294 A69-11630
- Differential capacitance of n-n heterojunction calculated by metal semiconductor contact method
09 p1555 A69-21476
- Emission and diffusion theories of metal-semiconductor contacts for describing current characteristics of abrupt isotype nGe-nGaAs heterojunction
11 p1938 A69-25115
- Differential capacitance of n-n heterojunction calculated by metal semiconductor contact method
15 p2669 A69-30721

N-P JUNCTIONS

U P-N JUNCTIONS

N-P-N JUNCTIONS

- Double diffused planar Ge n-p-n and p-n-p transistors with high switching speed, noting fabrication and performance
05 p0809 A69-16557
- Recovery and long term reliability of Si n-p-n transistors subject to gamma radiation, using military specifications for failure
06 p0976 A69-16878
- Monolithic operational amplifier design combining junction FET with n-p-n transistor
07 p1103 A69-18876
- Nondrifting n-p-n semiconductor current gain dependence on surface recombination rate
13 p2236 A69-28547

N-TYPE SEMICONDUCTORS

- Vacuum deposited n-type InAs films magnetoresistance coefficient dependences on length-to-width ratio, homogeneity moving carriers size and magnetic inductance
01 p0136 A69-10254
- Electrical properties of gold-gallium arsenide n-type junctions investigated for influence of crystallographic orientation of surface and charge carrier density
01 p0138 A69-10432
- Negative differential resistance effect producing relaxation type oscillations in n-type gallium arsenide
01 p0138 A69-10557
- Current/field characteristic of n-type GaAs, using high power microwave techniques in presence and absence of transverse magnetic field
01 p0139 A69-10819
- N- and p-type InSb and GaSb single crystals microhardness, noting decrease after doping is limited to thin surface layer
01 p0139 A69-10832
- Impurity concentration in n-type indium antimonide semiconductors at liquid nitrogen temperatures estimated by current-voltage measurements
02 p0294 A69-11631

Low field helicon wave transmission through n-type Ge at liquid He temperature, noting cyclotron resonance damping

02 p0295 A69-11787

Faraday effect of free carriers on n-type GaSb at 20 K, determining mass and mobility of electrons from Hall effect and conductivity

02 p0298 A69-12039

Many valley n-type Ge and Si semiconductors dissipative current breakdown effects, noting dependence on symmetry of valleys and phonon scattering pattern

02 p0298 A69-12098

Conduction band anisotropy in n-type cadmium tin arsenides, analyzing galvanomagnetic tensor and distribution of isoenergetic surfaces for electrons

03 p0488 A69-13888

Transport phenomena analysis in n-InSb semiconductors during elastic/inelastic current carrier scattering

03 p0492 A69-14171

IR absorption and reflection in doped n-GaSb, obtaining absorption coefficient for various impurity concentrations

03 p0492 A69-14174

N-type GaAs single crystal magnetoresistivity, noting charge carrier scattering mechanisms

03 p0492 A69-14177

Cathodoluminescence of n-type GaAs with various carrier concentration bombarded with 24-kv electrons, studying emission spectrum for radiative transition

04 p0639 A69-14436

Fermi level in n- and p-type Ge after irradiation by 50 Mev electrons determined by temperature dependence of carrier concentration

04 p0640 A69-14444

N-type Si surface photopotential, conductivity and capacitance during anodic oxidation in absolute ethylene glycol

04 p0643 A69-15260

Longitudinal and transverse magnetoresistance in n-type InSb single crystals in magnetic fields, noting preparation effect on existence magnetophonon oscillations

04 p0643 A69-15262

Homogeneous electroluminescence at 77 K in n-type GaAs single crystals without artificial p-n junctions, noting effects of electric field strength and Zn doping

04 p0644 A69-15271

Bridge circuit n-type conductivity converter with internal compensation of parasitic effects

05 p0727 A69-15641

Multiple high field domain nucleation in GaAs, discussing dependence on contact inhomogeneities

05 p0807 A69-15959

Incremental conductance of heavily doped n-type Si semiconductor barrier tunneling as function of bias voltage, indicating Fermi level dependence on dopants

05 p0808 A69-16285

Electrical properties of n-type Cd tin arsenide single crystals with impurity concentrations at various temperatures

05 p0809 A69-16375

Diffused Si and GaAs diodes electroluminescence and current-voltage characteristics

06 p0893 A69-16898

Gunn effect verification using n-type semiconductor single crystals in DC field, noting microwave field polarization plane rotation

06 p0978 A69-16902

Hall effect and magnetoresistance for compensated n-InP samples, discussing dependence on magnetic field

06 p0978 A69-16987

Hall effect and resistivity of n-type gallium arsenide phosphides doped with Te and Se

06 p0978 A69-16988

Temperature dependence of n-InSb Hall coefficient and resistivity, noting increase in conductivity with degree of compensation associated with electrical breakdown

06 p0978 A69-16990

Quantum oscillations of Maggi-Righi-Leduc (MRL) effect in n-InSb and n-InAs samples from single crystals at liquid helium temperature

06 p0979 A69-16992

Injection characteristics of n-aluminum gallium arsenides p-GaAs heterojunctions from recombination radiation spectra

06 p0979 A69-16993

Domain oscillations removal in n-type gallium arsenides by externally applied microwave field, noting doping effect on LSA conversion efficiency

07 p1196 A69-18446

Stable negative RF conductance and oscillation conditions for n-GaAs crystals of low $n \times L$ product

07 p1197 A69-18448

Absorption edge broadening by electric field in Gunn domain of N-GaAs crystals

07 p1197 A69-18454

Nonisothermal wave propagation in n-type indium antimonide in orthogonal static and magnetic fields, considering instabilities and acoustic and polar optical phonon scattering

07 p1197 A69-18467

Dependence of microwave emission from n-InSb on crystalline orientations, noting anisotropy in case of rotation in perpendicular plane

07 p1198 A69-18647

Equations for electron scattering by sound in n-type semiconductors, giving corrections to sound propagation velocity during interactions

07 p1199 A69-18680

Temperature dependence of conversion coefficients and sensitivity of n-type InSb detectors in millimeter and submillimeter ranges

07 p1199 A69-18683

Majority carrier concentration changes in P-doped n-type Si during fast electron bombardment, discussing relative effect of A and E centers

07 p1199 A69-18684

Magnetophonon oscillations of transverse magnetoresistance of n-type epitaxial GaAs in pulsed magnetic field

08 p1373 A69-20760

Vapor deposition of high purity epitaxial layers of n-type gallium arsenide, noting resistivity and Hall coefficient measurements

08 p1373 A69-21067

Copper diffusion coefficient in undoped n-type gallium arsenide measured by ultrasonic method

09 p1555 A69-21471

N type surface layer in p type sample noting effect on Hall constant and relationship to temperature

09 p1555 A69-21472

Diffusion method for fabricating negative resistance diodes consisting of Cd doped silicon, introducing Cd into n-type silicon plates in evacuated vials

09 p1462 A69-21477

Vacuum deposited n-type InAs films magnetoresistance coefficient dependences on length-to-width ratio, homogeneity, moving carriers size and magnetic inductance

09 p1559 A69-22647

N enhancement silicon MOST saturation current as function of temperature

10 p1743 A69-23175

Voltage dependence of red and green electroluminescence in GaP diodes prepared by growing n-type liquid epitaxial layer on p-type solution grown substrate

10 p1663 A69-23664

N and p type InSb and GaSb single crystals microhardness, noting decrease after doping is limited to thin surface layer

11 p1936 A69-24699

Forward and reverse current-voltage characteristics and reverse biased capacitance for $n\text{-ZnSe-pGe}$ emitter base diodes of heterojunction transistors

11 p1851 A69-25114

Conduction band anisotropy in n-type cadmium tin arsenides, analyzing galvanomagnetic tensor and distribution of isoenergetic surfaces for electrons

11 p1939 A69-25689

IR absorption spectrum of Br-doped n-CdTe specimen, considering donor level transfer mechanism

12 p2142 A69-25979

Etched surfaces inhomogeneity of n-type GaAs single crystals, noting oxide layers formation

12 p2142 A69-25980

Electron cyclotron resonance measurement in n-type indium antimonide using far IR emission from HCN and water vapor lasers, noting magnetic field strength effects

13 p2270 A69-27200

Relaxation oscillations in field ionized epitaxial n-GaAs Gunn oscillators on semiinsulating substrates, discussing recombination of excess electrons and holes

13 p2227 A69-27236

Conduction band structure in GaSb noting temperature dependence

13 p2319 A69-27899

Longitudinal magnetoresistance oscillations in n-type GaSb single crystals associated with electron concentrations minima

13 p2319 A69-27900

N-type InSb single crystals with high dislocation density, investigating anisotropy of mobility, Hall effect and transverse and longitudinal magnetoresistance

14 p2503 A69-28734

Galvanomagnetic characteristics of n-type semiconductor subjected to perpendicular electric and magnetic fields, noting electron temperature

14 p2505 A69-29037

Plasma screening effect on energy spectra of electrons localized at surface charges in weakly doped unipolar n-type semiconductor

14 p2505 A69-29170

Dislocations effect on carrier mobility and concentration in p-type and n-type InSb crystals

14 p2507 A69-29646

Semiconductor materials and fabrication methods for surface barrier junction n-type and p-type silicon counters used in hydrogen ion flux recording

14 p2452 A69-29810

Burstein-Moss effect observed in studying n-GaAs crystals electrical reflection spectra with large free carrier concentration at two temperatures and low energy levels

15 p2666 A69-30060

Secondary effects role in n-GaAs crystals electrical reflection spectra with low free carrier concentration at room temperature in external electric field

15 p2666 A69-30061

Current and electroluminescence brightness dependence on reverse voltage in n-SiC diodes including tunnel and avalanche processes

15 p2573 A69-30062

Copper diffusion coefficient in undoped n-type gallium arsenide measured by ultrasonic method

15 p2669 A69-30716

N type surface layer in p type sample noting effect on Hall constant and relationship to temperature

15 p2669 A69-30717

Diffusion method for fabricating negative resistance diodes consisting of Cd doped silicon, introducing Cd into n-type silicon plates in evacuated vials

15 p2578 A69-30722

Lattice component of heat conductivity in n-type cadmium arsenide at low temperatures by suppressing electron component of conductivity with strong transverse magnetic field

16 p2824 A69-31568

Two donor levels and conduction properties of n-type semiconductors demonstrated by capacitance measurements of single crystal tungsten oxide in presence of electrolyte

16 p2825 A69-31609

N-type In-doped ZnSb with melt under H-gas preparation and properties

18 p3183 A69-35268

Schottky barrier diodes for high temperature operation prepared on n-type GaP single crystals, studying I-V and C-V characteristics

19 p3381 A69-35681

Photocurrents and recombination luminescence in n-type diamonds subjected to UV, TI 204 and X ray irradiation indicating local electron centers formation

19 p3383 A69-36167

Transient recombination lifetimes in n-type float zone Si from 4.2 K to room temperature, obtaining electrical and photoconductivity values

19 p3383 A69-36447

Helicon wave dimensional resonance in n-InSb plasma waveguides at different wavelengths relative to wall thickness

19 p3383 A69-36479

IR absorption in n-type gallium phosphide doped with telluride or Si in 1.5-2.0 micron range, analyzing wavelength dependence

19 p3385 A69-36518

Combined resonance transition in n-type InSb by IR radiation, plotting intensity against magnetic field for different carrier concentrations to infer band structure

19 p3385 A69-36520

Hot electron behavior in n-type InSb under magnetic fields at 4.2 and 1.7 K, plotting current-voltage and current-Hall voltage characteristics, etc

19 p3388 A69-36544

InSb instabilities and time dependence of transverse breakdown, performing Hall effect measurements on n-type InSb at 77 K

19 p3389 A69-36546

Temperature dependence of g-value in spin resonance in partially degenerate region in pure n-type InSb and InAs

19 p3389 A69-36549

Low temperature energy band gap in n-type single semiconductor crystals of In-Sb-Bi alloys analyzed by measuring Hall constant and optical absorption coefficient

19 p3390 A69-36552

Charge transport in n and p type samples of beta phase semiconducting iron disilicide, noting effect of room temperature doping

19 p3390 A69-36556

Undoped n-type gallium arsenide single crystals edge emission spectral band shape dependence on crystal type and ambient temperature

19 p3392 A69-36610

- N-type GaAs optical properties after proton irradiation, noting transmission spectra dependence on initial electron concentration and irradiation dose
20 p3582 A69-36969
- Crystallization front topography and stratified structure of melt extracted n-type GaAs single crystals from anodic etching method
20 p3582 A69-37013
- Tunnel p-n junctions preparation by diffusing Zn into degenerate Te doped n-type GaSb between 580-600 C, measuring volt-ampere and capacitance characteristics
21 p3780 A69-39043
- Electron irradiation-temperature dependence of introduction rate and room temperature annealing of carrier-removal defects in Li-doped Si
24 p4360 A69-42647
- NA-300 AIRCRAFT**
U OV-10 AIRCRAFT
- NACELLES**
C-5 engine inlet development, presenting two phase nacelle forebody and five phase model tests, scale corrections inlet/cowl optimization and prototype tests [ASME PAPER 69-GT-52] 09 p1570 A69-22481
- Stratospheric balloons launching and nacelles for measurement of cosmic rays, at atmosphere high altitude characteristics, discussing French launching center
16 p2734 A69-31759
- Power plant installation on swept winged transport aircraft, discussing interference drag sources, high lift problems, unorthodox installations, nacelle effects, etc
17 p2898 A69-33214
- Aerodynamic characteristics of power plant installation, discussing nacelle design from viewpoint of aircraft performance and economic efficiency
17 p2898 A69-33215
- NAMING**
U NORMS
- NAPHTHALENE**
Q switched laser excitation flash spectroscopic analysis of naphthalene, describing equipment arrangement and experimental results
02 p0254 A69-11544
- NARCOSIS**
Auditory evoked response /AER/ as measure of narcosis induced at depth in diving personnel, discussing hyperbaric nitrogen and oxygen effects
14 p2407 A69-29302
- Physiological and psychological measurements of high pressure effects on man and animals, discussing decompression sickness, respiratory embarrassment, inert gas narcosis, helium tremble, etc
21 p3655 A69-38912
- NARCOTICS**
Mandrax and barbiturates effects on aircrew reaction time, response time and tracking ability
21 p3661 A69-39274
- NASA PROGRAMS**
NT APOLLO APPLICATIONS PROGRAM
NT APOLLO PROJECT
NT ECHO PROJECT
NT GEMINI PROJECT
NT MARINER PROGRAM
NT MARS 69 PROJECT
NT MERCURY PROJECT
NT NIMBUS PROJECT
NT ROVER PROJECT
NT SATURN PROJECT
NT SURVEYOR PROJECT
- Man machine relationship in V/STOL control display, discussing inflight simulators, emphasizing NASA X-14 and CH-3C programs
01 p0010 A69-10452
- National space program management, discussing NASA and NASA, lunar mission planning, procedures and program flexibility and responsibility
01 p0178 A69-10468
- Space technology contributions to medical problems, discussing organization and achievements of biochemical application program of NASA [UN PAPER 68-95417] 01 p0020 A69-10471
- Space biology, discussing U.S. research program, emphasizing gravity/organism reactions, biochronology and exobiology [UN PAPER 68-95345] 01 p0014 A69-10486
- Scientific advances from space research in communications astronomy, electronics, transportation, etc
01 p0151 A69-10498
- NASA university program, discussing participation in space and aeronautics development based on project oriented research grants and Sustaining University grants [UN PAPER 68-95413] 01 p0179 A69-10506
- NASA Technology Utilization Program, discussing information dissemination [UN PAPER 68-95131] 01 p0179 A69-10512
- NASA programs and opportunities for international cooperation in space [UN PAPER 68-95367] 01 p0179 A69-10516
- San Marco project, discussing Italian Space Commission and NASA cooperation, equatorial range concept and development [UN PAPER 68-95862] 01 p0180 A69-10518
- NASA programs impact on U.S. education [UN PAPER 68-95291] 01 p0180 A69-10519
- Aerospace management technology transferability to problems of society and government
02 p0355 A69-11754
- Weightlessness effects research during Soviet and U.S. manned space flights
02 p0199 A69-12120
- NASA Planetary Exploration Program to gather data on origin of solar system and life, discussing planetary evolution and extraterrestrial life
02 p0200 A69-12804
- NASA Plum Brook Reactor Facility /PBRF/ for determining radiation tolerance to support nuclear power application in space for propulsion and power
03 p0465 A69-13128
- NASA Space Application Program strategy, discussing research and development trend toward complexity, versatility and multidisciplinary use of larger spacecraft
03 p0511 A69-13427
- Cooperation between U.S. and Europe in space programs, discussing contracts and conditions
03 p0535 A69-13590
- Cooperation between U.S. and Europe in communication satellite programs
03 p0535 A69-13591
- NASA-Ames hybrid simulation software systems, subsystems and implementation
04 p0567 A69-15353
- NASA research on flexible and stiffened flexible wings, discussing range of applicability, aerodynamic characteristics and wind tunnel results
05 p0701 A69-15568
- Federal government contracting, discussing legality of NASA service contracts
05 p0850 A69-15987
- Proton beams uniformity available at NASA synchrocyclotron designed for radiation biology research by simulating space radiation environment
05 p0742 A69-15992
- NASA civil aviation electronics research program, discussing feasibility of V/STOL aircraft all-weather operations
05 p0850 A69-16718
- NASA scientific and technical information program for building technical data and literature repository for scientists, engineers and technical managers, describing IAA and STAR [UN PAPER 68-95317] 06 p1043 A69-17068
- Manned space flight programs, discussing U.S. technological, scientific and practical contributions
06 p1001 A69-17074
- U.S. space research program and achievements, describing practical aspects
06 p1005 A69-17562
- Arizona-NASA atlas of IR solar spectrum, reproducing photometric tracings obtained from CV-990 aircraft flights
06 p1008 A69-17808
- NASA atlas of IR solar spectrum, reporting B and 4 meter spectrometer recordings over band containing methane telluric absorptions
06 p1008 A69-17810
- Life raft thermal protection against exposure of aircrews to cold, noting chemically fueled heaters and IR reflective liners
06 p0883 A69-17841
- Multifunction Receiver System rationale, concepts, background requirements and technical justifications for tracking, telemetry and ranging data acquisition by Goddard Center
07 p1081 A69-19101
- Small Scientific Satellite program, discussing payload for investigating magnetosphere and near interplanetary space [IEEE PAPER 3C-1] 07 p1230 A69-19195
- NASA flight safety research, discussing size effects on aircraft handling and built-in response to failure modes
07 p1057 A69-19764
- Space boosters, performance of launch vehicles and requirements for future U.S. space launch capability from USAF vantage point
08 p1410 A69-20882
- NASA program in electric propulsion, noting applications for spacecraft position control and for small automated interplanetary spacecraft [AIAA PAPER 69-248] 09 p1561 A69-21216
- NASA long range planning of primary electric propulsion for automated space program [AIAA PAPER 69-247] 09 p1565 A69-21251
- Saturn 5 holddown and service arm electrical system design program optimized by integrating reliability and maintainability at initial design phase [AIAA PAPER 69-309] 10 p1670 A69-23043
- Integrated management information system /IMIS/, discussing logistics, reliability and quality assurance disciplines
11 p2005 A69-25304
- Ablation characteristics of heat shield materials measured in arc heated wind tunnels, considering influence of model scale, heating rate and pressure level
12 p2119 A69-26813
- NASA manned aerospace simulation techniques and equipment as used at Ames Research Center, noting applications to various types of manned vehicles [ASME PAPER 69-DE-56] 14 p2427 A69-28844
- NASA flight test of hingeless rotor compound helicopter to determine lift sharing characteristics, showing rotor lift dependence on airspeed
14 p2393 A69-29702
- Outer space law principle sources including divine law, UN and NASA contractors regulations
15 p2720 A69-31052
- NASA laser systems for satellite tracking, determining ranging accuracy by comparing laser and computed reference orbital data
15 p2571 A69-31312
- NASA planetary program, discussing Mars, Jupiter, Mercury, Venus and Saturn missions
15 p2723 A69-31318
- Report on U.S. space science program to COSPAR on stellar and solar astronomy, lunar and planetary research, upper atmospheric physics, etc
15 p2723 A69-31430
- Aeromedical developments by NASA biomedical applications program applied to general medical equipment including cardiac sensors, surgical sterilization, ballistocardiograph, etc
16 p2882 A69-32430
- Planetary quarantine constraints by NASA insuring low contamination probability from extraterrestrial biological exploration, giving contamination probability equations and sterilization procedures
16 p2746 A69-32435
- Space program design, discussing NASA centers and NASA R and D life sciences, technological developments and federal action
17 p3076 A69-34042
- Commercial utilization of space technology, discussing cost reduction and role of NASA Apollo Program
17 p3043 A69-34044
- NASA photogrammetric lunar activities, discussing imagery and control data by Lunar Orbiter and photogrammetric data reduction for preparing manned lunar landing
18 p3133 A69-34336
- Orbital astronomy support facility research requirements analysis, discussing objectives and measurement needs, instrumentation, spacecraft and facilities, etc
18 p3206 A69-34369
- Professional programs for aeronautics, rocketry and astronautics development
18 p3233 A69-34552
- Space exploration influence on science education, showing NASA instructional materials for teachers in biology, chemistry, physics, mathematics, industrial arts, etc
18 p3235 A69-35077
- NASA Pilot Program in instructional monographs to provide up-to-date material from current research for engineering education
18 p3236 A69-35078
- NASA technology utilization program for civilian economy benefit, discussing scientific and technical documentation and transfer across industrial, disciplinary and regional boundaries
18 p3236 A69-35105
- AIAA view on Post-Apollo space program, considering multiple goals, unmanned application satellites and manned space flight objectives
18 p3236 A69-35136
- NASA planetary entry parachute program for rocket launched and balloon deployment tests [AIAA PAPER 68-934] 19 p3247 A69-35952
- Industrial, scientific and commercial applications of NASA developed telemetry technology
19 p3455 A69-36258

NASA Earth Resources Survey Aircraft Program, describing aircraft and remote sensors characteristics
19 p3312 A69-36259

U.S. space program since establishment in 1958, NASA mission successes and management systems for future projects
20 p3641 A69-38116

Universities and public service education noting NASA requirements and programs
20 p3641 A69-38282

NASA Lunar Orbiter Program of lunar photography from orbiting spacecraft
21 p3794 A69-38377

Planetary atmosphere structure and mean molecular weight determination from onboard measurements tested at high altitude in earth atmosphere, based on NASA Program
[AIAA PAPER 68-1054] 21 p3715 A69-39023

PostApollo space goals based on manned and unmanned planetary exploration and space science programs, considering human factors and propulsion problems
21 p3856 A69-39167

NASA current awareness service SCAN/selected current aerospace notices/, promoting selectivity in information transfer to abstract journals, accession lists and bibliographies
21 p3856 A69-39581

Telemetry data processing, describing designation, tasks and possibilities of data reduction laboratory attached to NASA Goddard Space Flight Center
22 p3919 A69-40352

NASA structural analysis (NASTRAN) program applied to large radio telescopes, discussing static and dynamic analysis, problem formulation, finite element method, etc
23 p4232 A69-42145

NASA programs for space stations and base development, discussing housing and equipment capacity, manned and unmanned stations and shuttlecraft for interstation travel
23 p4224 A69-42456

NASA program for radio spectrum utilization in aerospace communication systems
23 p4128 A69-42502

Planetary exploration and NASA program objectives
[AAS PAPER 69-286] 24 p4379 A69-42810

Logistics management developed for Apollo Applications Program of NASA Manned Spacecraft Center
[AAS PAPER 69-204] 24 p4417 A69-42812

Earth resources surveys by space flights and plans for future satellites, describing results of EROS and ERTS programs
[AAS PAPER 69-058] 24 p4307 A69-42824

Launch vehicle upper stage requirements in space missions, discussing space engine for lunar, planetary and interplanetary exploration
[AAS PAPER 69-359] 24 p4418 A69-42828

Management system for safety in NASA Manned Space Flight Program, discussing hazard analyses and reduction precedence sequence
[AAS PAPER 69-522] 24 p4418 A69-42851

Pioneer F/G mission to Jupiter by NASA for exploring interplanetary medium, asteroid belt, planet and environment
[AAS PAPER 69-290] 24 p4381 A69-42863

Cape Kennedy space research and national priorities, indicating performance and progress of future space operations
[AAS PAPER 69-110] 24 p4419 A69-42879

NASA programs for development of high temperature alloys for advanced air breathing engines emphasizing cast Ni-base alloy
[ICAS PAPER 68-26] 24 p4335 A69-43718

NATIONAL AIRSPACE UTILIZATION SYSTEM

Government role in air transportation policy, considering growing demands on air traffic control
06 p1040 A69-16835

NATIONAL SEVERE STORMS PROJECT

Atmospheric turbulence in cloudless region above thunderstorms and relation between turbulence and radar pictures of storms
15 p2649 A69-31211

NATURAL FREQUENCIES

U RESONANT FREQUENCIES

NATURAL SATELLITES

NT DEIMOS
NT IAPETUS
NT MOON
NT PHOBOS

Jupiter outer satellites orbits determination with computer program based on modified Cowell/Moulton methods for adjusting initial conditions
01 p0158 A69-11330

Surface temperatures for Galilean satellites of Jupiter calculated through corresponding lunations, assuming synchronous orbits with respect to Jupiter
03 p0513 A69-13776

Europa control of decametric emission from Jupiter
05 p0813 A69-15605

Commensurability among pairs of mean motions of natural satellites of major planets and hypothesis of tidal evolution of satellite systems
07 p1223 A69-19638

Commensurability among pairs of mean motions of satellites of major planets and power law relation for orbital periods of satellites
07 p1224 A69-19639

Magnitude data for Saturn satellites compiled and analyzed, noting discrepancy for Iapetus
08 p1394 A69-20619

Intermediate orbits to construct motion theory of natural satellites of all planets
11 p1952 A69-24253

Io as unipolar inductor, analyzing interaction with Jupiter magnetosphere and decimetric synchrotron radiation
13 p2337 A69-27552

Jupiter decametric radio emission periodicity attributed to undiscovered satellite in unstable orbit, discussing application to satellite discovery
13 p2343 A69-27622

Natural terrestrial satellites existence suggested by telescopic and photographic observations and artificial satellites orbital perturbations
13 p2344 A69-27642

Photographic observations of fifth satellite and disk of Jupiter against stars background for mean motion and regression of nodes
13 p2345 A69-27653

Lunar surface and earth early satellite system, discussing maria distribution, satellite impacts and close passage collisions
13 p2345 A69-27654

Zonal harmonics of Legendre polynomial series of Jupiter attractive force function effects on motion of fifth satellite
14 p2521 A69-29463

Mimas-Tethys commensurability of motions and inclinations, calculating libration amplitude variation by numerical integration
16 p2861 A69-32241

Relativistic effect in pericenter motion of comets and natural satellites from major semiaxes and eccentricities of natural bodies
17 p3044 A69-34174

Catastrophic and noncatastrophic alternatives for earth capture of moon, discussing tidal action and spin-orbit resonance
18 p3198 A69-34823

Polar flattening influence of Jupiter on artificial satellite motion around Callisto noting orbital perturbations
18 p3199 A69-34913

Jupiter tenth satellite reobserved, discussing calculations and computer techniques for determining orbit
[AAS PAPER 68-140] 20 p3595 A69-37194

Jacobi integral and Hill criterion for analyzing motion stability of natural satellites and large planets inside gravitational sphere
20 p3596 A69-37314

Janus discovery, discussing solar distance, rotation period, diameter, opposition brightness and planetary parameters derived from pictures
20 p3597 A69-37337

Hansen method applied to Jupiter tenth satellite orbit correction and perturbations, describing computer program and formulas used
20 p3602 A69-37529

Optical properties and thickness of Saturn rings from observations during ring plane crossing of earth or sun, determining Tethys diameter and albedo
20 p3605 A69-37821

Jupiter mass determined by applying Cowell numerical integration to equations of motion for ninth satellite
21 p3795 A69-38468

Spacecraft-based navigation instruments for outer planet missions using celestial directions to outer planet natural satellites
[AIAA PAPER 69-902] 21 p3761 A69-39348

Perturbative effects of Jupiter moons on spacecraft flyby and postencounter heliocentric trajectories, noting precision targeting
[AIAA PAPER 69-932] 21 p3809 A69-39361

Light pressure induced secular effect contributing to planetary satellites and lunar orbits evolution calculated by numerical integration
22 p4033 A69-41084

Galilean satellites perturbing effect on motion of fifth Jupiter satellite
23 p4214 A69-41730

NAVIER-STOKES EQUATION

Asymptotic forms of Navier-Stokes equations for laminar motions of incompressible viscous fluid, discussing validity and applications
[ONERA-TP-651] 01 p0059 A69-10383

Boundary layer of MHD flow past semifinite plate, using Navier-Stokes equations
01 p0130 A69-10771

Two dimensional Navier-Stokes equations of axisymmetric motion of viscous incompressible fluid, giving integral and solutions for stream function
02 p0231 A69-12133

Mixed boundary value problem for system of Navier-Stokes equations for viscous incompressible fluid in stationary motion in vessel, noting rotating fluid
02 p0272 A69-12223

Exact solutions for Navier-Stokes equations for non-steady incompressible viscous flow near two dimensional or axisymmetrical stagnation point
02 p0233 A69-12527

Finite difference solution of time dependent Navier-Stokes equation for incompressible fluids, using velocities and pressure as variables
03 p0415 A69-13369

Difference schemes to solve Navier-Stokes equations for viscous incompressible fluid by substituting fourth order partial differential equation
03 p0415 A69-13650

Analysis of solution of Navier-Stokes equations describing two dimensional flow of viscous incompressible fluid by finite difference techniques and introduction of curl
03 p0416 A69-13652

Problem of viscous supersonic flow past blunt bodies based on Navier-Stokes equations formulated and solved numerically with explicit difference scheme
03 p0363 A69-13653

Navier-Stokes equations for self gravitating viscous fluid, discussing generalization based on irreversible thermodynamics
04 p0588 A69-14699

Algorithm for Navier-Stokes and continuity equations used to derive curvilinear coordinate system
04 p0564 A69-14858

Viscous incompressible fluid motion in two or more dimensions and with zero fluid velocity on domain boundary, determining lower bounds and uniqueness for solutions
04 p0626 A69-15311

Self similar solution for Navier-Stokes equations describing steady motion of submerged eddy jet of incompressible viscous fluid injected into half space
06 p0908 A69-16825

Cauchy problem for nonstationary linearized Navier-Stokes equations for fixed container partially filled with liquid
06 p0959 A69-17888

Computer solution of incompressible two dimensional time dependent Navier-Stokes equations for oscillating body with rectangular boundaries
[AIAA PAPER 69-185] 06 p0914 A69-18135

Time dependent technique for inviscid blunt body flows to analyze viscous rarefied shock layer regime using Navier-Stokes equations
[AIAA PAPER 69-139] 06 p0865 A69-18173

Motion of viscous incompressible fluid in interspace between rotating and parallel fixed permeable plane having supplementary fluid injection solved by Navier-Stokes equations
07 p1119 A69-18743

Navier-Stokes equations solved for viscous incompressible fluid flow due to laminar jet flow into channel in presence of magnetic field
07 p1120 A69-18997

Clebsch transformation application to equations describing viscous fluid, deducing canonical equations equivalent to Navier-Stokes equations
08 p1303 A69-20125

Integral of Navier-Stokes equations for steady three dimensional motion of incompressible viscous fluid, giving angular velocity vector projections
08 p1342 A69-20320

Statistical dynamics of turbulent incompressible fluid, discussing harmonic function in Navier-Stokes equation
08 p1303 A69-20323

Digital computer method for Navier-Stokes equation in prototype cavity flow problems, noting applications to biharmonic problems
08 p1305 A69-20831

Boundary value problem for linearized system of Navier-Stokes equations in three dimensional space, determining velocity vector and pressure
08 p1344 A69-21156

Navier-Stokes equations solution applicable to source type low Reynolds number flow through conical nozzles
09 p1482 A69-21976

Approximate solution method for Navier-Stokes equations for incompressible viscous fluids
10 p1718 A69-22861

Viscous fluids rotational flow in cylindrically symmetrical vessels, circumventing Navier-Stokes equations of motion by Wedemeyer approximation
10 p1677 A69-22896

Navier-Stokes boundary value problem bifurcation solution analysis, determining stability ranges
10 p1677 A69-22901

Requirements for numerical solution of Navier-Stokes equations by finite difference method found limited to Re values with no turbulence
10 p1678 A69-22917

Laminar boundary steady two dimensional constant velocity flow over curved surface equation derived from Navier-Stokes equation
11 p1867 A69-24375

Navier-Stokes equations for compressible gas, generalizing viscous channel flow of heat conducting gas to slip flow of rarefied gas
12 p2061 A69-25887

Smooth solutions to Navier-Stokes equation obtained by imposing bound on associated pressure pertaining to weak solution
12 p2124 A69-26971

Navier-Stokes equations of slow viscous fluid laminar flow near pipe inlet and exit with negligible mass forces, discussing velocity and pressure distribution
13 p2244 A69-27258

Turbulent fluid flow analysis described by Navier-Stokes equations, introducing asymmetric tensors for anisotropic cases
13 p2297 A69-27289

Incompressible uniform shear flows merging behind trailing edge of semiinfinite flat plate, using inner-outer expansion method based on Navier-Stokes equation
13 p2248 A69-28223

Numerical method for time dependent compressible Navier-Stokes equations applied to axisymmetric flow field produced by hypervelocity impact, examining viscous effects
[AIAA PAPER 69-354] 13 p2366 A69-28288

Flat plate turbulent boundary layer, noting Navier-Stokes equations solutions and formation of rotations to determine velocity field
13 p2251 A69-28632

Nonuniqueness in Hopf weak solutions for Navier-Stokes equations using solutions with rotational symmetry
14 p2428 A69-28900

Boundary value problem for linearized system of Navier-Stokes equations in three dimensional space, determining velocity vector and pressure
15 p2645 A69-31249

Monograph on Navier-Stokes equations with integral relations approximate solution and application to flow around flat plate of finite length
17 p2949 A69-32993

Statistical dynamics of turbulent incompressible fluid, discussing harmonic function in Navier-Stokes equation
17 p2952 A69-33313

Taylor vortices calculated as branching solutions of nonlinear Navier-Stokes boundary value problem
17 p2958 A69-34152

Transient uniform flow over sphere at intermediate Reynolds numbers with recirculatory wakes, utilizing difference approximation to time dependent Navier-Stokes equations
18 p3120 A69-34434

Shock wave profiles in molecular N-H gas mixtures in shock tube measured by optical electron beam method, noting disagreement with Navier-Stokes calculations
18 p3134 A69-34458

Convergence of discrete approximations of Navier-Stokes equations to solutions of corresponding differential equations
18 p3121 A69-34613

Transformed Navier-Stokes equations for incompressible fluids flow, deriving forces acting on surface of bounded region
18 p3122 A69-34830

Higher order boundary layer theory development from Prandtl simplification of Navier-Stokes equations to successive approximations for incompressible and compressible flows
18 p3123 A69-34923

Discrete fractional steps method for approximate solution to Navier-Stokes equations, noting perturbation
18 p3165 A69-35278

Laminar flow of viscous compressible fluid with density dependent on temperature, calculating steady state Navier-Stokes equations using vector function
19 p3297 A69-35852

Asymptotic form of axisymmetric solution with Dirichlet integral for Navier-Stokes equations applied to flow past bodies of revolution with smooth surfaces
19 p3298 A69-36143

Boundary conditions of incompressible fluid viscous flow on semiinfinite plate edge defined using difference methods for Navier-Stokes equations
19 p3299 A69-36394

Coupling conditions by distinct equations for two laminar flow regions, studying near wake and considering Euler, Navier-Stokes and Prandtl correlations [ONERA-TP-738]
19 p3299 A69-36649

Navier-stokes equation numerical integration for three dimensional incompressible flow, discussing annulus thermal convection and trigonometric transforms algorithm
21 p3694 A69-38770

Spheres impulsive starting in incompressible viscous fluid, including Reynolds number and investigation time parameters in Navier-Stokes equation
21 p3696 A69-39296

Laminar corner boundary layer flow with suction, discussing Navier-Stokes equations and steady state heat conduction problems
21 p3696 A69-39578

Oscillations of highly viscous incompressible fluid in partially filled cavity of body moving about fixed point, solving Navier-Stokes equations by asymptotic method
22 p3929 A69-40117

Navier-Stokes equations exact solutions for two dimensional steady flow of compressible viscous heat conducting perfect gas
22 p3929 A69-40117

Dynamics of viscous electrically charged gas using Navier-Stokes equation
22 p3931 A69-40686

Navier-Stokes equations numerical integration based on biharmonic operator inversion by alternating direction method of Douglas-Rachford type
22 p3932 A69-40928

Ionized plasma motion under plane piston action by self similar solution of Navier-Stokes equations
22 p3991 A69-41021

Mixed boundary value problem for system of Navier-Stokes equations for viscous incompressible fluid in stationary motion in vessel, noting rotating fluid
23 p4183 A69-41974

Turbulent flow, discussing light scattering techniques, correlation functions, statistical theory, modified Navier-Stokes equation, etc
23 p4153 A69-42314

Stokes stream function and forces acting on two spheres moving in contact along line of centers through viscous fluid
24 p4299 A69-42747

OMEGA airborne navigational computers, discussing earth ellipticity and phase variations problems for signal conversion into latitude and longitude coordinates
08 p1347 A69-20778

Control and recording device for parameters and information relating to takeoff and landing, using detection elements and cross wire on runway
08 p1347 A69-20780

Long range subsonic transport navigation systems accounting for reductions in horizontal separation on high density oceanic routes
08 p1348 A69-21062

Velocity meter for precision adjustment of orbits of vehicles in space for long periods using digital integrating accelerometer
08 p1348 A69-21063

Flight test performance of airborne Omega radio navigation system capable of worldwide coverage, discussing diurnal variations effects in phase velocity
08 p1348 A69-21191

National plan for air navigation covering R and D and operational aspects
08 p1348 A69-21192

Satellite navigation system feasibility for accurate and continuous navigation capability for Army tactical aircraft
08 p1349 A69-21193

Vector analog computer functions and applications in air traffic control, discussing area navigation equipped aircraft
08 p1349 A69-21195

Integrated inertial aircraft navigation with velocity and position aids, discussing in-flight calibration capabilities, performance under quick-reaction constraints and digital simulation results
08 p1349 A69-21196

Marine and aircraft satellite navigation techniques, discussing equipment requirements, related performance characteristics and limitations
08 p1349 A69-21198

Skorsky HH-3F helicopters electronic equipment, discussing communication and navigation aids, search and recovery missions, etc
10 p1662 A69-23222

Cockpit TV-radar for providing pilots with navigation, weather and traffic data, discussing safety factors and radar picture transmission quality
[SAE PAPER 690327] 11 p1833 A69-24506

Navy Navigational Satellite System for position location accuracy in marine and oceanographic exploration applications
[AIAA PAPER 68-471] 13 p2295 A69-27247

Litton LTN-51E inertial navigation system accuracy and reliability evaluated on basis of transpacific flights
[SAE PAPER 680299] 13 p2296 A69-28103

National plan for air navigation covering R and D and operational aspects
14 p2480 A69-29858

Dioscures project for telecommunication, ATC and navigation by satellites to provide continuous position determination
15 p2651 A69-30691

Navigational information display in aircraft, discussing moving map technique and mechanization
15 p2558 A69-30692

Terminal area navigation and landing guidance systems for V/STOL intercity transport aircraft, considering radio guidance, aircraft control and system interaction
17 p2897 A69-33210

Integrated trajectory error display /ITED/ for flight path control of helicopters and VTOL, describing principles governing display synthesis
[AHS PAPER 314] 17 p3001 A69-33541

AH-56A Cheyenne integrated avionics, armament and fire control system for precise weapons delivery and navigation
[AHS PAPER 312] 17 p2903 A69-33542

General purpose /GP/, differential digital analyzer /DDA/ and CORDIC /coordinate rotation digital computer/ computers for navigation system computations
17 p3003 A69-34100

Navigation equations, discussing earth geometry, coordinates, gravity, dead reckoning and radio computations with regard to LORAN
18 p3169 A69-34845

Navigational equations solution by airborne analog computer techniques, describing electronic, electromechanical, digital reset and mechanical integrations with respect to time
18 p3107 A69-34847

Artificial satellites as navigation aids, describing angle, range and range-angle systems, discussing orbital mechanics and communications difficulties
18 p3169 A69-34855

Automatic flight control, discussing equipment, components and relationship between autopilot and navigation system
18 p3170 A69-34856

Pictorial display area navigation system for air traffic control in terms of cockpit utilization, interface with ground navigation aids, parallel multiple routes, etc
[AIAA PAPER 69-798] 19 p3367 A69-35632

Earth orbit estimation by manual stadimeter, space sextant and small data processor, discussing orbital parameter errors due to instrument and environment uncertainties
19 p3369 A69-35793

Masking and standby redundancy approach to fault tolerance in space navigation computers with illustrations, discussing automatic maintenance
19 p3279 A69-35798

Star/horizon measurements for onboard spacecraft navigation without cloud cover obscuration, discussing sightings, data processing and evaluation
19 p3369 A69-35800

Computerized clock sequenced ATC system, area navigation /R Nav/ systems and STOL flight control
19 p3370 A69-36317

Optimal timing of measurements to minimize dispersion of navigational observation parameters by least squares method with application to Keplerian orbit elements
19 p3370 A69-36614

Inertial navigation systems technology, discussing man machine dialog, alignment, etc
19 p3371 A69-36703

IR equipment to aid air navigation, discussing detection cells, temperature direction finding, mobile source tracking, etc
19 p3371 A69-36705

Onboard navigation digital computer simulation to verify calculation principle and logic units during design and construction
20 p3502 A69-37398

Imaging radar applications noting military surveillance, navigation assistance, iceberg detection, sea rescue operations, all-weather traffic surveys, terrain mapping, etc
20 p3491 A69-37649

Balloon location by low orbit meteorological satellites, discussing balloon movement due to wind and geometric and nongeometric effects on errors
21 p3760 A69-38618

Guidance and navigation flight tests, demonstrating system performance improvements by onboard inertial system communicating with external navigation aid
[AIAA PAPER 69-842] 21 p3765 A69-39429

Moving map pictorial display system for on board capability of area navigation, noting crew reaction
[SAE PAPER 690393] 23 p4186 A69-41663

Spherical trajectories control by star height maintenance, analyzing resulting cycloid and cartographic representations
23 p4186 A69-42023

Maritime navigation hyperbolic charts for aircraft position determination
23 p4186 A69-42026

Surface and aerospace navigation by VLF radio network, discussing Omega transmitting station location, operational modes and daytime-nighttime accuracies
[AAS PAPER 69-405] 24 p4347 A69-42834

NAVIGATION INSTRUMENTS

NT BEACONS
NT GYROCOMPASSES
NT MAGNETIC COMPASSES
NT RADAR BEACONS
NT RADIO BEACONS
NT RADIO DIRECTION FINDERS

Gyroscope with rotational symmetry subjected to random input torques analyzed by Euler equation of motion
01 p0079 A69-10236

FAA coded broadcasting to transponder equipped aircraft for air traffic control, navigation, collision avoidance and airfield approach
04 p0629 A69-15478

Mechanical calculators for solving spherical triangle problem of navigation
07 p1135 A69-19207

Analytic platform or strapdown systems application, discussing closed and open loop leveling techniques
08 p1347 A69-19862

Polar flight navigation charts showing feasibility of three dimensional celestial positioning
09 p1538 A69-21406

Systematic errors caused by planet asphericity in measurements of orientation and motion parameters of orbiting object compensated by scanning navigation system
10 p1693 A69-23320

Differential equation for dynamic behavior of acrobatic flight navigation instruments in steep flight,

considering vertical gyroscopes, gimbal platforms and time optimal control
11 p1880 A69-24328

Optimal navigation system for supersonic Concorde aircraft, discussing in-flight and terminal navigation methods
14 p2480 A69-29859

Automatic navigation and sighting system for French specified Jaguar combat aircraft development
16 p2809 A69-31760

Measurement errors and geometry effects on navigational accuracy, determining maximum allowable error for measuring devices employed
17 p3002 A69-34098

Attitude and heading reference devices for aircraft navigation, describing instruments, gyroscopes and gravity sensors
18 p3169 A69-34853

Induced-emission oscillator navigation sensor with performance limitations, noting ring laser and nuclear maser gyro and laser accelerometer
19 p3369 A69-35795

Kalman recursive filtering method applied to inertial navigation systems resetting
19 p3286 A69-36645

Spacecraft-based navigation instruments for outer planet missions using celestial directions to outer planet natural satellites
[AIAA PAPER 69-902] 21 p3761 A69-39348

Aircraft navigation system requiring computer and display for approach guidance to circular orbit over fixed ground area
[AIAA PAPER 69-986] 22 p3978 A69-40366

Apollo 11 guidance and navigation systems involved in lunar landing, describing command and service modules design
24 p4295 A69-42550

NAVIGATION SATELLITES

NT EXPLORER 22 SATELLITE
NT TRANSIT 4A SATELLITE
NT TRANSIT SATELLITES

Nonmilitary marine uses of navigation satellites
[UN PAPER 68-95305] 01 p0112 A69-10469

Navigation Service Satellite System for aiding aircraft and ships at sea in Pacific Ocean, noting equipment and functions
[UN PAPER 68-95251] 01 p0112 A69-10470

Space applications program including communications and navigation meteorology, earth resources survey and geodesy
[UN PAPER 68-95437] 01 p0178 A69-10472

Navigation services satellite systems including position determination, communication and telemetry for ships and aircraft
[UN PAPER 68-95363] 01 p0113 A69-10479

Worldwide navigation system consisting of synchronous satellites equipped with pulse modulated microwave transmitters
[UN PAPER 68-95205] 01 p0113 A69-10514

Ship and aircraft traffic conditions in Japan and neighboring areas and requirements for navigation satellite system
[UN PAPER 68-95226] 01 p0113 A69-10520

Navigation by satellite systems, discussing vehicle position determination and communications link for traffic control with comment on French space program
02 p0278 A69-11912

Short baseline radiating satellite interferometer concept for reducing satellite navigation systematic errors for aircraft and ships
03 p0463 A69-13208

Transatlantic aircraft cross-track air navigation error reducible by augmenting Doppler system with satellite ranging system
03 p0464 A69-13237

Acronautical service satellites, considering communications, surveillance for navigation, traffic control, collision avoidance and search and rescue, weather and border control functions
04 p0666 A69-15295

Dioscures system for international air traffic control and navigation over North Atlantic by means of two geostationary satellites
[UN PAPER 68-95832] 06 p0954 A69-17063

Eole meteorological satellite secondary use, discussing cosmic rays monitoring, navigation purposes and oceanographic research
[UN PAPER 68-95833] 06 p1013 A69-17077

Navigation satellites system designed for ATC without requirement for onboard transmitter, discussing spectrum occupancy, satellite power, lane ambiguities and computational procedures
07 p1177 A69-19212

- Marine and aircraft satellite navigation techniques, discussing equipment requirements, related performance characteristics and limitations
08 p1349 A69-21198
- Radio location system based on measuring distance between object and two stationary satellites, noting application to air traffic over North Atlantic
09 p1537 A69-21269
- Satellite-borne terrestrial radiodetermination systems, noting VLF transmissions usage to overcome coverage problem
09 p1537 A69-21287
- Space vehicles and marine navigation using navigation satellites, radar, Doppler navigation, etc
13 p2296 A69-27918
- Dioscures project for telecommunication, ATC and navigation by satellites to provide continuous position determination
15 p2651 A69-30691
- Dioscures project for worldwide telecommunications, air traffic control and navigation by satellites, discussing technical, operational and economic characteristics
16 p2749 A69-31601
- North Atlantic aircraft navigation and traffic control system using satellites
16 p2809 A69-32054
- Artificial satellites as navigation aids, describing angle, range and range-angle systems, discussing orbital mechanics and communications difficulties
18 p3169 A69-34855
- Satellites and ground stations system providing transoceanic civil, air and marine traffic control in North Atlantic, discussing position determination, communication and navigation, etc
18 p3170 A69-35065
- Satellite systems for air traffic control, navigation, communications and telemetry in view of regulations of frequency allocations
18 p3103 A69-35089
- Sun-moon short term disturbances effect on synchronous equatorial navigation satellite orbits, noting fuel expenditure
[AIAA PAPER 69-927] 21 p3761 A69-39356
- Air traffic control transoceanic satellite system for minimizing navigation errors forcing wide separations, providing VHF voice communication and position surveillance
22 p3901 A69-41147
- Aircraft navigation by geostationary satellites, discussing Dioscures project
24 p4280 A69-42568
- NAVY**
- VFX fighter aircraft, discussing U.S. Navy requirements influence in VFX-1 and VFX-2 design
03 p0367 A69-13675
- U.S. Navy Numerical Value Rating System computing method of selecting lowest cost design approach to accomplish specific function
13 p2383 A69-28098
- Navy Navigation Satellite System (NAVSAT) applications, considering nonmilitary marine and air all-weather navigation and positioning
14 p2479 A69-29856
- Defense integrated management engineering system at California Naval Air Rework Facility
15 p2588 A69-30427
- Plastics applications in naval air systems command, discussing polymer families, nonstructural glass fiber-based products, radomes, electromagnetically transparent bodies, advanced composites, etc
21 p3751 A69-38532
- NC-130 AIRCRAFT**
U C-130 AIRCRAFT
- NEAR INFRARED RADIATION**
- Angular and spectral distribution of earth IR radiation near horizon from satellite observation and spectrograms
03 p0422 A69-13506
- Angular distribution measurements of visible and near IR radiation reflected from carbon dioxide cryodeposits formed on liquid nitrogen cooled surface in vacuum
[AIAA PAPER 69-63] 06 p0959 A69-18131
- Laser modulation at optical and near IR frequencies, discussing beam characteristics changes and information transmission
07 p1158 A69-19742
- Oscillator strengths of transitions in shock tube between nitric oxide Rydberg states in near IR
08 p1354 A69-20150
- Near IR transparent aluminocalcium glasses with improved spectral properties
08 p1336 A69-20386
- Quasi-stellar objects photometric selection in near IR
09 p1604 A69-22272
- Near field repeatable stimulator of infrared earth horizon sensors in variable environments and test levels, noting orbital conditions
[AIAA PAPER 69-322] 09 p1478 A69-22376
- Near IR radiation magnetooptic light modulators using Faraday effect in yttrium-iron garnet and in related compounds
11 p1886 A69-25057
- Night sky background observation by near IR radiation flux, using rocket-borne telescope and ground based equipment
13 p2342 A69-27600
- Weak emissions in near IR daytime airglow using rocket-borne spectrometers
16 p2776 A69-32094
- Spectral variations of red variable stars analyzed by objective-prism spectra in near IR
16 p2860 A69-32235
- Ice clouds near IR spectral reflectivity dependence on particle size, noting application to planetary atmospheres
18 p3126 A69-34283
- Carbon dioxide lasers near IR spontaneous emission spectra
19 p3339 A69-36697
- Pulsed Hg ion-He laser operation, revealing transition in near IR
23 p4171 A69-41393
- NEAR ULTRAVIOLET RADIATION**
- Astronomical wide field cameras of large aperture ratio to detect extended near UV light sources outside atmosphere
12 p2080 A69-26127
- Spectral transmission curves in near UV for optical glasses
12 p2130 A69-26599
- Atmospheric optical density vertical distribution curves in near UV from spectrophotometer data of Echo type satellites entry into earth shadow
16 p2787 A69-32638
- NEBULAE**
NT CASSIOPEIA A
NT CRAB NEBULA
NT PLANETARY NEBULAE
- Partial maser effect in recombination lines of hydrogen atoms in nebular plasma due to overpopulation of energy levels at thermodynamic equilibrium
01 p0148 A69-10042
- High velocity motions in diffuse nebulas connected with stellar wind, noting wind formation of 2-layer shell between two shocks
01 p0148 A69-10050
- IR emission in NGC 7027 spectrum and role of discrete line emissions, discussing magnetic dipole transitions, temperature and density
01 p0148 A69-10051
- Fe II lines relative intensities in eta Carinae spectrum, discussing possible intrinsic reddening of object and representation of visible and near IR continuum
07 p1217 A69-19253
- Rosette Nebula structure from high resolution observations at 178 MHz of galactic plane, deriving 8600 K electron temperature for Nebula, discussing Monoceros Nebulosity
07 p1223 A69-19625
- Electron-ion collisions during forbidden lines excitation in gaseous nebulae, using Hartree-Fock functions and variational principles
08 p1391 A69-20530
- Galactic H 56 alpha recombination radio line observation in Omega Nebula in millimeter band with radio telescope, obtaining electron temperature
08 p1397 A69-20771
- Electron temperature of Orion Nebula at 6750 K from intensities of hydrogen n alpha lines, discussing Stark broadening
08 p1398 A69-20776
- Chemical composition of diffuse Orion Nebula and stars compared for lighter elements, considering solar system formation from interstellar medium
08 p1402 A69-20908
- Hydrogen alpha emission nebulae catalog in western half of Cygnus X region, obtaining interstellar absorption from nebular distances determination
09 p1596 A69-22053
- High level hydrogen populations in gaseous nebulae, noting electron density range and temperature effect
09 p1604 A69-22406
- Radio spectra and structure of H II regions in emission nebula NGC 281 and unnamed nebula near NGC 2264
10 p1773 A69-22957
- Bright emission nebula components and electron temperature determined by radio telescope observation
10 p1778 A69-23603
- Double structure in IR near Trapezium region of M42 in Orion Nebula center
10 p1786 A69-24105
- IR spectral distribution from region between stars of Trapezium in Orion Nebula
10 p1786 A69-24106
- Nebular abundances allowing for temperature variations in nebula along line of sight, correcting changes in electron temperature along path of observation
10 p1787 A69-24116
- Hydrogenic recombination decrements in gaseous nebulae, discussing effects of Lyman line leakage, Balmer line self absorption, internal dust, optical depth, etc
10 p1787 A69-24118
- Radio nebula NRAO 591/593, discussing thermal and nonthermal source and models based on electron density distribution
10 p1790 A69-24136
- Expected IR line spectra of gaseous nebulae based on physical conditions, listing line intensities
13 p2342 A69-27595
- Dielectronic recombination influence on radio recombination lines of carbon under typical nebular conditions
13 p2346 A69-27703
- Excited hydrogen RF spectral lines from nebula NGC 6618, calculating frequency for transitions by Balmer formula
13 p2353 A69-28433
- H II alpha and beta radio recombination lines strengths predicted, noting role of calculations of hydrogen energy levels non-LTE populations
14 p2517 A69-29088
- Radio observations of emission nebulae for flux densities, deriving electron temperatures
[ASME PAPER 69-DE-46] 14 p2527 A69-29941
- Amplitude and scale of microscopic fluctuations of electron density within M8 from brightness ratios of O II lines, using multiple shell model
14 p2514 A69-29949
- Emissivity of two photons decay from metastable 2s level of pure hydrogen gaseous nebula, noting radiative and collisional excitation
14 p2529 A69-29975
- Filamentary nebula IC 443 observation by Fabry-Perot etalon with image converter, determining radial, expansion velocities and H alpha line half width
15 p2686 A69-30538
- RF spectral line detection from ortho hydrogen ions in Omega Nebula and NML Cygnus
16 p2864 A69-32571
- Photoelectric method to measure galactic reflection nebulae brightness, color and polarization used to explore interstellar grains physical nature
17 p3032 A69-33104
- Radio map of Orion A region, resolving M 42 and M 43 nebulae at 1.94 cm wavelength, noting optical photographs comparison
17 p3035 A69-33609
- RF recombination lines measurement of helium for abundance in nebulas, comparing optical and radio values for H II regions
18 p3190 A69-34293
- Book on Messier nebulae and star clusters covering current astronomical ideas, star maps, identification diagrams, telescope illustrations and astronomical data
18 p3206 A69-35471
- Magellanic clouds positions, associated gases, evolution, etc
19 p3401 A69-35757
- Forbidden lines emitted by gaseous nebulae, emphasizing relative intensities of O II and O III lines
19 p3422 A69-36220
- M8 electron temperature and internal kinematics from photoelectric Fabry-Perot spectrometric recording of H alpha line profiles and N II
19 p3424 A69-36334
- M 31 nebula radio continuum survey, describing discrete sources catalog and Andromeda nebula radiation distribution
20 p3601 A69-37493
- Star counts in Ophiuchus nebula darkened region /Scorpius-Ophiuchus/ and in comparison fields Corona Australis and Sagittarius
20 p3604 A69-37788
- H alpha line for emission nebulae analyzed by Fabry-Perot etalon, noting Doppler profile
20 p3607 A69-38039

Gas in H II regions and associated stars radial velocities correlation and systematic difference suggesting relationship between nebulae and stars

20 p3611 A69-38150

N I nebular doublet and auroral and nebular lines of O I obtained with multifilter scanning photometer in France, Norway and at magnetic equator

21 p3712 A69-38519

Evolution of diffuse nebulae, considering gas dynamic equations, shock and ionization fronts, models and numerical methods, radiation pressure, interstellar magnetic field, etc

21 p3810 A69-39504

Soviet collection of papers on nebulae and interstellar medium covering computer simulation, photometric observation results, etc

21 p3816 A69-39721

Catalog of reflection nebulae with known dimensions and flux characteristics noting spectrum characteristics

21 p3816 A69-39722

Computer simulation of radiation scattering of spherical nebula with central isotropic star, discussing proposed program and parameters

21 p3816 A69-39723

NGC 7023 nebula physical characteristics observation based on flux and brightness measurement, noting spectral energy distribution and causes

21 p3816 A69-39724

IC 2118 nebula luminosity study by polarimetry and photometry, showing role of light scattering and color properties

21 p3817 A69-39726

IC 349 nebula in Pleiades investigated with diffraction spectrograph, observing spectral energy distribution relationship to illuminating star

21 p3817 A69-39728

Spectroscopic analysis of nebula NGC 6302 for identification as highly excited gaseous nebula, noting He-H ratio

22 p4026 A69-40647

High radial velocity matter of bright region near Trapezium in Orion Nebula, determining electron density lower limit and mean velocity

22 p4029 A69-40769

Orion nebula isophotal contours optical observation for three continuum colors/blue, yellow and IR/ and H alpha

22 p4031 A69-40942

Galactic mass model and interstellar dust scattering data used to examine high latitude nebulae illumination possibility by integrated galactic light

22 p4033 A69-41059

OB stars near emission nebula RCW 103, describing galactic structure in Norma

23 p4220 A69-42384

NEGATIVE CONDUCTANCE

Negative differential resistance effect producing relaxation type oscillations in n-type gallium arsenide

01 p0138 A69-10557

Quantum devices operation analyzed by introducing quasi-linear negative conductance into system by active substance, deriving equations to characterize saturation effects

05 p0719 A69-16223

Stability of negative differential conductivity state with respect to small disturbances, based on hydrodynamic equations for two valley GaAs semiconductors

06 p0981 A69-17879

Stable negative RF conductance and oscillation conditions for n-GaAs crystals of low $n \times L$ product

07 p1197 A69-18448

Thin semiconductor plates negative differential resistance associated with captures at surface, describing electron gas by electron temperature

08 p1374 A69-21081

Precision measuring instrument for negative conductance of active element at microwave region

12 p2038 A69-26054

Stability of negative differential conductivity state with respect to small disturbances, based on hydrodynamic equations for two valley GaAs semiconductors

14 p2503 A69-28788

Injection phase-locking characteristics of LSA/limited space charge accumulation/ mode transferred-electron diode oscillators, employing negative conductance and equivalent circuit

14 p2421 A69-29544

Nonlinear voltage dependence on current in p-type indium selenide single crystals, detecting negative resistance under pulsed electric field

22 p3992 A69-40602

NEGATIVE FEEDBACK

NT SENSORY FEEDBACK

Integrated operational amplifiers for control systems, noting high stability and linearity through negative feedback

01 p0039 A69-10169

Phase-pulse multistable circuit reliability improvement by additional negative feedback increasing parametric variation tolerance, feeding voltages and temperature

23 p4143 A69-42338

Paradoxical inhibition negative feedback principle in oscillatory systems, using mathematical model of nerve membrane

23 p4112 A69-42444

NEGATIVE RESISTANCE CIRCUITS

Stability limits of regenerative echo amplifier during simultaneous variation of network capacitance and negative resistance

04 p0577 A69-14778

Bridge circuit n-type conductivity converter with internal compensation of parasitic effects

05 p0727 A69-15641

Cascaded avalanche diodes in negative resistance amplifying mode for increased output power and extended dynamic range

09 p1462 A69-21408

Equivalence and stability for negative impedance converter of bridge circuits by symmetrical amplifier design

09 p1467 A69-22559

Negative resistance effects computed for HF operation of SCL diodes, based on quantitative analysis of small signal response

12 p2038 A69-26349

LF negative resistance of X band Gunn diodes with lumped components, using coaxial circuit

12 p2039 A69-26387

Triode with emitter controlled negative resistance of GaAs as oscillator for microwave applications

22 p3911 A69-40010

NEGATIVE RESISTANCE DEVICES

Negative resistance behavior of InSb diodes at 77 K, extending double injection theory for insulators to extrinsic semiconductors

02 p0294 A69-11722

Punch-through microwave negative resistance diode explained and contrasted with similar Read and Shockley structures

02 p0215 A69-11938

Traveling high electric field domains in bulk semiconductors use in high speed integrated electronics, noting domain properties of GaAs and CdS

02 p0216 A69-12144

Nonisothermal space charge wave analysis of transit time mode oscillations in bulk GaAs, studying device reactance at given negative resistance

02 p0299 A69-12240

Epitaxial GaAs transferred electron oscillators pulsed operation at bias voltage ten times threshold voltage, noting power output and efficiency

03 p0402 A69-12854

Noise measure formula for negative resistance amplifiers imbedded in lossy passive network

05 p0735 A69-16731

Gallium arsenide double injection diode using vacuum deposited film electrode on single crystal substrate, noting current controlled negative resistance

06 p0893 A69-17156

Stability of negative differential conductivity state with respect to small disturbances, based on hydrodynamic equations for two valley GaAs semiconductors

06 p0981 A69-17879

External impedance controlled nucleation of Gunn effect domains studied theoretically by Nyquist criterion

06 p0981 A69-18217

Gunn effect pulse devices with resistive loading, discussing logic, circuits and low power consumption

07 p1097 A69-18453

Diffusion method for fabricating negative resistance diodes consisting of Cd doped silicon, introducing Cd into n-type silicon plates in evacuated vials

09 p1462 A69-21477

Series operation of Gunn devices with differing threshold currents at SHF

09 p1463 A69-21684

Current controlled negative differential resistivity observed during current-voltage measurements made with p-type Te at 77 K

09 p1557 A69-21747

Gunn diode field distribution with distributed capacitance electrode analyzed with one dimensional computer simulation

09 p1470 A69-22789

Transient characteristics of negative resistance zinc alloy diodes, investigating temperature effects

10 p1662 A69-23157

Semiconductors with negative differential conductivity, investigating decreasing current-voltage characteristics, S or N shaped curves, perturbation parameters, instability, etc

10 p1744 A69-23300

Current voltage characteristics in silicon carbide diodes having negative differential resistance

10 p1663 A69-23571

High current density filaments formation in silicon p-n-n avalanche diodes caused by incremental negative resistance in static current-voltage characteristics

12 p2036 A69-25916

Negative resistance parametric amplifier used as tracking filter, noting resonant frequency dependence on pumping frequency and input and idler circuits

13 p2225 A69-27183

Negative resistance in GaP electroluminescent diodes with p-i-n structure at low temperatures, noting oxygen role

13 p2226 A69-27194

Negative resistance formation in impurity compensated semiconductor diodes ascribed to injected carrier drift path increment with increasing current, deriving I-V characteristics

13 p2230 A69-27877

Capture centers effect on current-voltage characteristic of p-i-n diodes during injection, noting negative resistance appearance

13 p2236 A69-28525

Stability of negative differential conductivity state with respect to small disturbances, based on hydrodynamic equations for two valley GaAs semiconductors

14 p2503 A69-28788

Negative resistance amplifier with stabilizing resistor in compensating circuit for operation in microwave duct mismatched beyond amplifier passband range

15 p2573 A69-30118

Bulk negative resistance material stability, discussing amplifier skin effect limitation and instability beyond critical length

15 p2575 A69-30172

Diffusion method for fabricating negative resistance diodes consisting of Cd doped silicon, introducing Cd into n-type silicon plates in evacuated vials

15 p2578 A69-30722

Negative resistance converter with single differential input operational amplifier, discussing input and output signal

15 p2580 A69-31091

Negative resistance section of current-voltage curve for long diodes of p-type indium antimonide, noting magnetic field effects on electrical breakdown

15 p2581 A69-31149

Gunn device performance for various oscillator types, discussing cavity oscillator characteristics variation

21 p3681 A69-38394

Frequency and phase instability characteristics of negative resistance amplifier due to changes in circuit parameters

22 p3916 A69-40962

NEGATRONS

Cosmic ray negatron and positron spectra using balloon-borne magnetic spectrometer, obtaining absolute solar modulation of positron flux

08 p1380 A69-20728

NEODYMIUM

Selection of transverse oscillations of unstable Nd laser resonator modes with system of two mirrors and two variable focal length convex lenses

03 p0440 A69-13426

Neodymium glass properties degradation during laser operation due to short wave pumping radiation and stimulated emission

03 p0442 A69-14219

Refractive index and expansion thermal coefficients along axis of oriented Nd-YAG laser rod

04 p0609 A69-14293

Output characteristics of slowly Q switched neodymium in calcium tungstate laser

04 p0612 A69-15206

Glass lasers, discussing neodymium properties in glass, flexibility of glass in size, shape and optical excellence, temperature coefficient of index of refraction, etc

05 p0772 A69-16227

Laser emission of neodymium salt dissolved in polonium-chlorine, discussing fluorescence intensity

06 p0936 A69-17778

- Induced emission cross section of neodymium glass laser in quasi-steady mode measured as function of rod section, mirror reflectivity and output
07 p1156 A69-19161
- Stimulated emission of laser employing crystal and glass lasers doped with neodymium ions, using high temperature spectroscopy
08 p1323 A69-19944
- Stimulated emission of water cooled CW Nd doped lanthanum fluoride at room temperature
08 p1323 A69-19945
- Stimulated emission of trivalent Nd ions in glass base, explaining connection between efficiency and emission polarization by interaction of laser modes with ions
10 p1703 A69-23618
- Nd glass laser for emission of high radiance diffraction limited pulses, noting long path air breakdown and second harmonic generation
10 p1704 A69-23654
- Stimulated emission cross section measurement of Nd ions in calcium tungstate using Edwards method
11 p1938 A69-25049
- Transverse passive mode locking by dye technique for neodymium glass laser with confocal cavity
12 p2107 A69-26327
- Far IR electronic and vibronic transitions in single crystals of Nd ions in tysonite lanthanide fluorides
13 p2316 A69-27628
- Negative dispersion of light in neodymium activated calcium tungstate single crystal using neodymium glass laser source, analyzing interferential bands in spectral diagrams
15 p2632 A69-30051
- Passive mode locking of pulsed Nd-YAG laser using saturable absorber, noting two photon fluorescence contrast ratio
16 p2797 A69-32019
- Laser effect in neodymium glass, estimating efficiency of light energy output vs electric energy input
17 p2979 A69-32828
- Kr and Ar flash lamps pumping efficiencies compared for Nd-doped YAG and glass lasers
17 p2980 A69-32958
- Polymethine dyes in passive Q switches of neodymium lasers, noting effects of absorption band intensity, width and position on single pulse laser energy yield
17 p2983 A69-33968
- Stable passive Q-switch of neodymium laser, presenting single pulses energy, time and spectral characteristics
17 p2983 A69-33969
- Polarized emission from Nd activated glass, establishing S and P polarization component energy dependence on pumping energy
17 p2984 A69-33974
- Neodymium activated glass laser efficiency as function of absorption of pumping and emission energy by glass
22 p3964 A69-40797
- NEODYMIUM COMPOUNDS**
- Phonon states effective density in neodymium trichloride from vibronic spectra accompanying electronic transitions in trivalent Pr and Nd ions
03 p0473 A69-13907
- NEON**
- Rodents exposure to neon enriched atmosphere for three weeks in sealed recycling system, discussing body weight pregnancies and litter
01 p0019 A69-11342
- He/Ne ratio effect on performance of He-Ne laser in annular cavity
04 p0612 A69-15176
- Fluorescent light polarization of neon atoms subjected to gas discharge, static magnetic field and laser beam
[IEEE PAPER T-9]
07 p1155 A69-19084
- Total ionization cross section for symmetric collisions measured as function of energy by using neutral atomic beams of neon and krypton
08 p1356 A69-20740
- Nc and Xe in carbonaceous chondrites, noting large amounts of fission Xe and implications for galactic nucleosynthesis models
08 p1405 A69-20925
- Detection of micron Ne emission line from planetary nebula IC 418 using IR spectrometer
09 p1591 A69-21452
- O, Ne, Si and Fe ionization equilibria in low density plasma, including dielectronic recombination and autoionization processes in calculations
09 p1543 A69-22404
- Linear dependence of saturation parameter on active medium density of He-Ne laser explained by considering exchange collisions of neon atoms
09 p1521 A69-22687
- Neon discharges, discussing similarities in type p plasma ionization waves generated by pulsing
10 p1740 A69-23721
- Transport and balance coefficients in ionized neon and helium plasmas in homogeneous electric field, calculating electron mobility, diffusion coefficient, energy and collision parameters
10 p1740 A69-23722
- Neon discharge positive column at medium gas pressures, discussing calculated and experimental data concerning diffusion theory to interpret parameters
10 p1740 A69-23723
- Optical depth at under 110 A due to continuous absorption by N, O and Ne ions estimated in high excitation planetary nebulae
10 p1790 A69-24140
- Disaligning and velocity changing collisions influence on laser light induced saturation peaks or holes in velocity distribution of Ne atoms
12 p2105 A69-26317
- Laser interferometer determining spatial distribution of neon metastable state in He-Ne active discharge, discussing lens effects
12 p2108 A69-26636
- He/Ne ratio effect on performance of He-Ne laser in annular cavity
18 p3152 A69-34718
- NEON ISOTOPES**
- Saturated absorption by Ne inside 6328 A He-Ne laser, discussing selection of Ne isotopes in gain and loss tubes
07 p1149 A69-18898
- Upper bounds for electromagnetic transition rates for Ne 20 determined using Hartree-Fock wave functions
18 p3177 A69-35166
- Trapped Ne in carbonaceous chondrites and gas-rich meteorites, observing Ne 20/Ne 22 ratio variance
24 p3855 A69-43217
- NEOPLASMS**
- U CANCER**
- NEPHANALYSIS**
- Automated layered-nephanalysis and numerical total cloud cover prediction program using moisture data from Tiros 7 photographs
01 p0110 A69-10691
- NEPHELINE**
- Nepheline occurrence in unequilibrated chondrites, discussing crystallographic evidence from X ray powder patterns
04 p0659 A69-15010
- NEPHELOMETERS**
- Photoelectric equipment for nephelometric simulation studies of light scattering by cloud particles
06 p0953 A69-17993
- Vacuum exposure nephelometer system for materials contamination screening in space applications
24 p4297 A69-42931
- NEPHRITIS**
- Renal pathology of acute methylhydrazine intoxication in dogs, noting hemolytic anemia and hemoglobinuric nephropathy
06 p0883 A69-17847
- NEPTUNE [PLANET]**
- Two element interferometer observing Saturn, Uranus and Neptune at 3.12 cm, determining equivalent black body disk temperature
01 p0148 A69-10052
- Neptune mean diameter determination by photometric observations of stellar occultation by planet
01 p0150 A69-10386
- Pluto mass from observations of perturbation on motion of Neptune
02 p0315 A69-11808
- Neptune atmosphere height scale and density from photometric observation of star occultation
04 p0660 A69-15061
- Pluto mass from Neptune orbital longitude, comparing observations and theory
04 p0663 A69-15385
- Photoelectric observation of star occultation by Neptune for mean radius determination
06 p1007 A69-17693
- Photoelectric observation of star occultation by Neptune for scale height determination
06 p1008 A69-17694
- Radio telescope observations at 11.13 cm for polarized E vector intensities of Saturn and disk temperature of Uranus and Neptune
17 p3039 A69-33731
- Relative positions of Neptune and BD minus 17 degrees 4388 star determined by Yale-Columbia refractor and double star camera, noting ephemerides correction from stellar occultation
17 p3041 A69-33814
- Photoelectric observations of BD minus 17 degrees 4388 occultation by Neptune on 7 April 1968, studying light curves during immersion and emersion of star
17 p3041 A69-33815
- Neptune radius, density and atmosphere deduced from observations during occultation of BD minus 17 degrees 4388 by Neptune
17 p3041 A69-33816
- Diameter density and atmosphere of Neptune revised based on star eclipse, noting altitude and temperature
18 p3205 A69-35438
- Pluto mass and density accuracy, questioning values derived from Neptune observations
19 p3403 A69-35969
- Neptune equatorial radius, diameter, flattening and upper atmosphere optical properties determined from photometric curves of star BD-17 occultation
21 p3796 A69-38471
- Photographic observations of Neptune occultation of BD-17 degree 4388, Zodiac Catalog number 2232 in April 1968, noting geocentric separation and planet radius
23 p4221 A69-42388
- NERNST-ETTINGSHAUSEN EFFECT**
- Fermi surface topology effects on Nernst-Ettingshausen coefficient from measurements in magnetic fields to 3.3 tesla and 1.2-4.2 K temperatures in metallic tin
05 p0808 A69-16357
- Kinetic coefficients of carrier motion in semiconductor obtained by Boltzmann equation, considering impacts between carriers
09 p1554 A69-21468
- Indium arsenide electrical parameters analyzed by kinetic effects, considering conductivity, thermal and magnetothermal EMF and transverse Nernst-Ettingshausen effect
15 p2666 A69-30066
- Kinetic coefficients of carrier motion in semiconductor obtained by Boltzmann equation, considering impacts between carriers
15 p2669 A69-30713
- Transverse thermomagnetic EMF and Nernst-Ettingshausen coefficient in GaSb semiconductor with double conduction band and strong degeneracy of current carriers
21 p3783 A69-39558
- Nernst effect in pyrolytic graphite at low temperatures including thermal EMF, electrical conductivity, thermal conductivity and magnetoresistance coefficients
21 p3753 A69-39562
- NERNST HEAT THEOREM**
- U NERNST-ETTINGSHAUSEN EFFECT**
- NERVA [ENGINE]**
- U NUCLEAR ENGINE FOR ROCKET VEHICLES**
- NERVES**
- Neural buoyancy microelectrode for prolonged recording from single nerve units
02 p0202 A69-11865
- Morphological microchanges in solar plexus ganglia of white rats after X irradiation
12 p2019 A69-26347
- Optic nerve spikes elicited by acetylcholine application on isolated perfused retina of frog, varying response by prostigmine and atropine
23 p4084 A69-41465

NT SYMPATHETIC NERVOUS SYSTEM

NT SYNAPSES

NT THALAMUS

Human nervous system and vestibular and auditory
analyses functional changes under combined
hypokinesia and radial accelerations effects
02 p0197 A69-11496

Hypoxia effects on vestibular analyzer function of
rats in pressure chambers at simulated altitudes from
11,000 to 12,000 m
02 p0198 A69-11506

External observer effect on human behavior during
sensory deprivation tests conducted in isolation cham-
bers as factor in estimating personality
02 p0200 A69-11516

Steroid hormones effect on nervous system and
behavior from data on gonadectomized rats and mon-
keys treated with testosterone propionate
03 p0375 A69-13551

Human perception in space as function of nervous
relationships involving optic, kinesthetic, vestibular
and other analysors
08 p1263 A69-19938

Nervous system relations to insect flight musculature
of lift and thrust mechanism
21 p3651 A69-38780

Nervous system reactions and resistance to ionizing
radiation noting role of functional, morphological and
physicochemical changes in nerve tissues
21 p3659 A69-39061

Robot command and control by computer assembly,
describing engineering analog of vertebrate nervous
system
21 p3679 A69-39603

Model of nerve elements, discussing subthreshold
processes parameter system and analog investigation of
transient processes for various stimuli at model input
23 p4110 A69-41981

Respiration effects on heart rhythm emphasizing
direct mechanical influences
23 p4097 A69-42093

Paradoxical inhibition negative feedback principle in
oscillatory systems, using mathematical model of nerve
membrane
23 p4112 A69-42444

Sensory information processing model for tactile
perception using array of airjet and piezoelectric stimu-
lators applicable to display design and nervous system
investigation
24 p4276 A69-43273

NETHERLANDS

Netherlands space research covering solar and stellar
research, cosmic radiation, photometry and satellite
geodesy
15 p2725 A69-31464

NETS

U NEURAL NETS

NETWORK ANALYSIS

NT CRITICAL PATH METHOD

Passive circuit to transform voltage of indefinitely re-
peated positive or negative pulses using transistors,
diodes and magnetic cores
01 p0043 A69-10564

Electronic device networks periodic structures accu-
racy estimated by automatic measurement of complete
error spectrum of network spacings
01 p0045 A69-10732

Variable impedance matching device employing
lumped and homogeneous circuit elements and stub
line technique
01 p0046 A69-10740

Soviet collection of papers on electric circuits and
electromagnetic systems
01 p0046 A69-10744

Circuits with magnetic coupling, describing digital
computer algorithms for assembly of loop current
equations
01 p0036 A69-10745

Universal NOR element design with resistors, deter-
mining permissible combinations for static mode of
operation by computer method
01 p0037 A69-10746

Semiconductor switching diode, evaluating opera-
tion with nonlinear time delay equivalent circuit
01 p0046 A69-10747

Equivalent circuits for transient characteristics ap-
proximation of distributed RC circuits
01 p0046 A69-10779

Self adaptive control circuit diagram examination,
considering phase shift measurement reliability by
eliminating distortion caused by system nonlinearities
and noise
01 p0052 A69-10796

Spatial filtering effectiveness determination by
equivalent spatial operations, deriving expression for
SNR
01 p0052 A69-10799

Computer analysis of linear active nontime varying
circuits by two graph topological approach based on
Binet-Cauchy theorem
01 p0037 A69-11349

Shockley theory of field effect transistors, calculat-
ing characteristics in miniaturization problems by
removing geometric constraints with aid of electric
analog
02 p0215 A69-11781

Inverse Laplace transform determination method for
periodic functions applied to rectangular pulse train
and rectified sine wave
02 p0271 A69-11983

Noise generation and propagation in linear N
cascaded mismatched two port networks, noting appli-
cation to microwave measurements in low noise
technology
02 p0211 A69-12445

Analysis and design of synchronous filter compatible
with microelectronics requirements, switching N
monolithic RC thin film devices to signal source of re-
sistance
03 p0403 A69-13206

Direct and indirect synchronization of pulsed oscilla-
tor with interrupted synchronizing signal for spectral
purity of output waveform and locking range of system
03 p0404 A69-13301

Topological principles of gate and contact self cor-
recting circuits not using self correcting codes
03 p0410 A69-13421

Open and closed path orthogonal analysis for struc-
tural network
03 p0526 A69-13735

Active circuit analysis by state variable method,
defining state vector as set of voltages between nodes
and reference node
03 p0410 A69-13831

Plane of symmetry determination for generalized
junction gate field effect transistors extended to in-
clude impurity profiles and bias voltage conditions
04 p0574 A69-14344

Transistor circuits analysis with aid of signal flow
graphs
04 p0575 A69-14461

Varactor Q calculation from impedance vs bias mea-
surements, circumventing circuit loss problem by
procedure based on Weissfloch equivalent circuit of
lossy two port network
04 p0575 A69-14753

Lossless multiple beam forming device operational
principles, noting parallel plate radial transmission line
network construction
04 p0576 A69-14768

Hybrid loop properties determination using quadru-
pole algebra, noting frequency dependence of input im-
pedance and voltage transmission
04 p0582 A69-15072

Equipment for minimum cost laboratory for thin and
thick film hybrid circuits
04 p0559 A69-15198

Electric quadrupole parameters, discussing relation-
ship between voltages at terminals
04 p0579 A69-15228

Electrical circuits time domain analysis, describing
method for computer solution of circuit equations
05 p0737 A69-15766

Passive four terminal elements series connection
transmission characteristics, considering line losses
05 p0729 A69-16081

Engineering solution for integrodifferential equa-
tions of physical systems with electronic circuits
05 p0724 A69-16468

Nonlinear distortion of FM signal during passage
through multipath medium, using analysis of linear pas-
sive four terminal network
05 p0721 A69-16531

Book on electric elements and circuits for automatic
control, discussing electric machines as control loop
elements, stability criteria and synthesis, electric
drives, etc
05 p0739 A69-16545

Frequency and noise characteristics of gyrator cir-
cuits, analyzing Q factor, stability and oscillation sen-
sitivity
05 p0735 A69-16621

Ionizing radiation effects in microcircuits, using
lumped model technique to derive mathematical model
from electronic characteristics and boundary values of
each semiconductor
06 p0977 A69-16886

Square loop magnetic core model for computer
aided circuit transient analysis
06 p0899 A69-16888

Combined neutron degradation and gamma induced
effects on closed loop system simulated by SECURE
program
06 p0899 A69-16889

Soviet Orbita communication satellite system net-
work operation, design and technical and economic
aspects
06 p0886 A69-17043

Circuit and system theory - Conference, University
of Illinois, October 1968
06 p0901 A69-17391

Deterministic pattern classification algorithms
discussing abstraction problem, stochastic algorithms,
minimum error scheme and modified least squares
scheme
06 p0892 A69-17395

Requirements for analysis and synthesis of diagnostic
tests for detecting faults in combinational logic circuit
06 p0892 A69-17408

Linear network analysis by topological formulas for
derivation of k-tree terms without generation of k-trees
of graph
06 p0903 A69-17409

Self dual graphs and diagraphs enumeration and prop-
erties
06 p0947 A69-17410

Multivibrator with two widely different zones of
discontinuous oscillation
06 p0896 A69-17474

Voltage divider network board composed of compo-
site carbon resistors for measurement of terminal
voltage of 3 Mev Dynamitron electron accelerator re-
calibration
06 p0907 A69-17705

Harmonic oscillations in tunnel diode circuits for
three intersection points of loadline with characteristic
curve, discussing larger total positive circuit resistance
case
06 p0898 A69-17801

Automatic control textbook covering theoretical and
practical principles of control engineering, analysis,
design, servomechanisms and instrumentation
06 p0904 A69-17856

Energy transfer from pulse network to mass as-
sociated with propagating current sheet in linear pinch
discharge, discussing pulsed plasma accelerator effi-
ciency
[AIAA PAPER 69-113]
06 p0971 A69-18123

Microelectronics in astronautics, discussing prop-
erties of thick and thin film electronic devices, integrated
semiconductor circuits and hybrid circuits
07 p1089 A69-18256

Response curves of frequency changer circuits /mul-
tipliers and dividers/ using reactive nonlinearity calcu-
lated as function of filter mismatch
07 p1114 A69-18279

Control system analysis and synthesis by means of
generalized root-locus method on digital computer
07 p1114 A69-18291

Self organizing trainable logical networks /TLN/ as
stable controllers in multiaxis vehicle control problem,
reviewing TLN concepts and training theory
07 p1070 A69-18388

Circuit producing electrical and optical oscillations
simultaneously constructed by combining semiconduc-
tor laser diode with photodiode
07 p1148 A69-18688

Unified theory of normal mode analysis of RLC net-
works based on Tellegen theorem of Kirchhoff law,
discussing coupled networks
07 p1115 A69-18858

Linear noisy two port preceded by nonreciprocal
lossless network analyzed, showing existence of as-
sociated quantity invariant under lossless transforma-
tion
07 p1104 A69-18891

Diode pump type circuit without diodes in signal
path providing accurate transfer function analysis con-
sidered for spacecraft use
[IEEE PAPER 3A-3]
07 p1134 A69-19191

Algorithm for calculating Moore automaton or con-
nected network channel capacity and source of input
symbols for full capacity utilization
07 p1088 A69-19707

Feedback systems analysis, considering single phase
and polyphase coupled and uncoupled commutation
networks in forward loop and linear transfer function
feedback loop
08 p1295 A69-19853

Differentiating network with nonlinear resistance and capacitance elements, noting improvement in pulse shaping properties
08 p1295 A69-19910

Computer aided design program for testing equivalent circuits of bipolar transistors in static regime under various polarization conditions
08 p1280 A69-19972

Controlled charge models for computer calculation of electronic circuits, discussing tunnel diode static characteristics and equivalent transistor circuits
08 p1280 A69-19975

Computer aided automatic drawing of printed circuits, including design and manufacture of films for engraving
08 p1296 A69-19979

Parasitic reactance disturbing attenuation and return loss of reactance filters, discussing correction of numerator polynomial of characteristic function
08 p1283 A69-20128

Passive circuit components electrical properties at HF using equivalent circuit
08 p1283 A69-20135

Final stage of three phase DC/AC converter, noting three phase control circuit for power stages with germanium transistors
08 p1285 A69-20381

Book on analysis and synthesis of linear active networks covering filter design, negative resistance, network theorems and stability, amplifier role, etc
08 p1298 A69-20885

Vortex valves and amplifiers small signal analysis using mathematical model to describe quantitative effects of vortex parameter changes [AGARDOGRAPH-118]
08 p1257 A69-20953

Variable phase shifters and delay lines, discussing mechanical and electronic adjustments
08 p1290 A69-20978

Nonlinear capacitive parallel frequency converter circuit stability, using filtered circuit method
08 p1299 A69-21148

Delta functions spectrum in reciprocal time domain for LC and RC structures due to impulse response in distributed parameters
09 p1471 A69-21327

Transient analysis for uniform RC structures using impulse excitations in open and short circuit configurations
09 p1471 A69-21328

Nonlinear analysis of transistor networks using Kron mesh method, developing quasi-linear equations characterizing common emitter transistor
09 p1471 A69-21632

Decoupling by state variable feedback and determination of inverse extended to linear time varying multivariable system
09 p1472 A69-21680

Algorithms in electronic circuit analysis, establishing algebraic and topological analogs based on generation of fundamental relations
09 p1472 A69-21777

Linearized radio circuits frequency characteristics calculations using digital computers, noting system nodes number influence on computer rate
09 p1472 A69-21783

Circuit function determination from Laplace transforms without calculating transient state matrix, using numerical method
09 p1472 A69-21785

Digital computer algorithm for analyzing circuits represented as autonomous multiport networks
09 p1472 A69-21786

Noise factor of two port in terms of various sets of noise parameters and source immittances, giving table for conversion formulas
09 p1455 A69-21897

Soviet book on statistical theory of discrete signal demodulation, covering demodulator analysis and synthesis methods
09 p1455 A69-21933

Microwave interferometer circuits errors, considering interferometers with phase detector, logic counting circuits, frequency conversion and amplitude modulation
09 p1496 A69-22029

Ultimate state periodic analysis of nonlinear electric systems by approximation methods in calculus of variations, discussing functional concept
09 p1474 A69-22448

Density functions analytic solution for Fokker-Planck equation representing cascaded phase locked loops
09 p1474 A69-22450

Complex admittances and impedances of various networks determined by impedance bridge, describing frequency dependent limits of measurement parameters
09 p1501 A69-22578

Vortex amplifiers small signal analysis based on mathematical model and network theory
09 p1443 A69-22739

Simulation to correlate integrated logistic support recommendations for dynamic analysis of planned logistic network
10 p1668 A69-22975

Electronic circuit analysis by computer programming including system and program commands, network data, output control, discussing steady state circuit programming
10 p1659 A69-23143

Vortex amplifier as active element in analog circuits
10 p1639 A69-23556

Single circuit parametric oscillator excitation by small external narrow band signal, using method of slowly varying amplitudes
11 p1845 A69-24453

Passive structural units in fluidic circuits, discussing tesla diode and proportional amplifier
11 p1825 A69-24542

Minimum conversion loss in general mixer circuit configuration, noting dependence on time varying resistance and equal terminating impedances
11 p1845 A69-24550

Computer program for analysis of linear microwave multiport circuit by means scattering matrix equivalent
11 p1858 A69-24572

Estimation system distinction from adaptive system, discussing network of adaptive estimation systems
11 p1858 A69-24937

Rectangular RC distributed circuits with shaped electrodes, analyzing short circuit admittance parameters
11 p1858 A69-24938

Load admittance effect on low pass voltage transfer characteristics of RC lines, analyzing shaped lines at open circuit under terminated conditions
11 p1859 A69-24939

Hybrid matrix algorithm for electronic circuits analysis, showing applications to transistorized circuits
11 p1859 A69-24954

Log periodic dipole array antennas simulated with simple RLC circuit loading uniform transmission line
11 p1850 A69-24977

Transient behavior of transistor UHF oscillator, discussing network analysis for oscillation amplitude calculation by nonlinear transistor equivalent circuit diagram
11 p1854 A69-25613

Fluidic quantities analogous to electrical properties of lumped circuit elements in DC networks, noting validity of Kirchhoff node and mesh theorems
11 p1861 A69-25676

Narrow band LC 70 MHz IF filter design method
12 p2036 A69-25915

Steady state solution of periodically excited circuit, constructing Green function for use in convolution integral
12 p2036 A69-25918

Computer controlled network analyzer performing automatic microwave measurements of passive and active networks, based on signal splitting and detecting
12 p2037 A69-26048

Digital computer analysis of multivariable control system in frequency domain, using operational array technique programming method
12 p2046 A69-26064

Book on random signal analysis covering Fourier analysis, circuit analysis, Fourier transform theory, operators, probability, random variables, stochastic processes
12 p2031 A69-26632

Network method for Dirichlet problem of Laplace equation in regions with rounded corners, noting polar and composite errors
12 p2123 A69-26730

Transient response of transistor in common emitter circuit using charge method taking into account base current switching pulse parameters
12 p2043 A69-26884

Current driven AGC effectiveness in selective amplifiers, including conductance variation effect on pass-band instability and frequency response
12 p2043 A69-26887

Power losses of varactor frequency multipliers with series connected circuits including open circuit tuned to second harmonic
12 p2043 A69-26888

Computer determination of symbolic state equations for nonlinear circuits using FORTRAN notation
12 p2055 A69-27097

Power gain in TWT attenuators with linear tapered ends, considering conversion loss due to tapering
12 p2044 A69-27102

Ground station network and facilities for control of and acquisition and processing data from ESO 1 satellite
13 p2220 A69-27751

Ferrite parameters measurement in alternating fields based on continuous analysis of magnetic, magnetizing and measuring circuits for assessing errors
13 p2230 A69-27996

Molecular flow network theory extended to pulsed operation with gases mixtures having various molecular weights
13 p2247 A69-28085

MOS unitoron switching circuit operation subjected to nonlinear load, using analytic approximations of current-voltage characteristics
13 p2234 A69-28507

Transistorized DC amplifier circuit with reversible and controllable transfer constant based on voltage conversion principle
13 p2235 A69-28511

Transistor circuits analysis with aid of signal flow graphs
14 p2418 A69-28832

Small signal transient characteristics of semiconductor diodes analyzed by charge method, studying processes during p-n junction diode switching at low currents
14 p2419 A69-28918

Two stage amplifier with two differential feedbacks, investigating tuning sensitivity
14 p2426 A69-29147

Numerical solution of differential equations for two channel PFM with pulse element, applying Dirac pulse sequence to input
14 p2426 A69-29148

Pull-in performance of phase locked loops with phase comparator having asymmetric triangular characteristic
14 p2413 A69-29482

Performance of oscillating limiter driven by noise corrupted FM signals covering frequency deviations, carrier to noise ratio, etc
14 p2413 A69-29497

Algorithm for enumerating all circuits of linear graph, noting suitability for computerization without large computer memory
14 p2421 A69-29541

Topological circuit analysis by digital computer, using conductivity matrix determinant in form of sum of trees
15 p2582 A69-30112

Wideband transistorized amplifier frequency response analysis by simplified approximations, subdividing operational frequency range
15 p2573 A69-30113

Transistorized circuit operation with nonlinear feedback through tunnel diode analyzed by piecewise-linear approximation of I-V characteristics
15 p2573 A69-30114

Different parametric converters amplitude characteristics analysis for determining necessary pumping power, allowing for saturation
15 p2574 A69-30119

MOSFET/unitoron/ switching circuits classification in terms of load curve shapes obtained with different output connections of load elements
15 p2574 A69-30122

Push-pull circuit configurations for GaAs transferred electron oscillators, discussing CW X band and pulsed L band devices operation
15 p2574 A69-30168

Lumped and distributed parameter systems, discussing transfer matrix elements, connecting lines, etc
15 p2582 A69-30319

False alarm stabilization circuits efficiencies compared in unsteady Gaussian noise, considering phase autocorrelator performance
15 p2567 A69-30342

Equivalent circuit of single winding transformer, using distributed constant theory
15 p2578 A69-30793

Varactors for frequency conversion circuits, discussing efficiency and output power
15 p2578 A69-30797

Disturbances simulation in instrumentation utilizing digital integrated circuits for reliability computation in complex circuits
15 p2628 A69-30848

Hydraulic resistance, capacitance and inductance of fluidic element derived by analogy with electric circuits 15 p2552 A69-31060

Broadband microwave double balanced mixer/modulators, discussing bandwidth, conversion loss, noise figure, intermodulation and power dissipation 15 p2580 A69-31077

Approximate solution for coupled microstrip transmission lines in integrated circuits, discussing impedance, capacitance and testing 15 p2580 A69-31078

Similarity between semiconductor discrete devices and integrated circuits, considering materials, processing and failure modes 15 p2580 A69-31128

Linear high resolution gate function in blocking out analog signals or reproducing signal amplitudes at output, noting semiconductor elements utilization 15 p2581 A69-31523

Computerized finite element waveguide analysis for determining propagating modes and cut-off frequencies 16 p2760 A69-31942

Molecular flow network theory applicable to volumes interconnected by small orifices or porous membranes for transient pressure measurements 16 p2813 A69-32325

Nonlinear distortion of FM signal during passage through multipath medium, using analysis of linear passive four terminal network 16 p2753 A69-32473

Amplitude-frequency characteristic and noise bandwidth of electron tube reflex autodyne operating in over or under voltage mode and including IR feedback 16 p2761 A69-32477

Spacecraft antennas properties, structure and problems including frequency ranges, external influences, omnidirectional radiation, input impedance, etc 16 p2763 A69-32584

Scanning electron mirror microscope advantages over electron mirror and scanning electron microscopes for examining integrated circuits 17 p2971 A69-32891

German monograph on theoretical and experimental investigations of tubes and lumped fluidic elements covering equivalent circuit 17 p2903 A69-33573

Superconducting antenna factors and matching circuit equivalents developed for predicting efficiency and Q increase on basis of Pb surface resistance 17 p2937 A69-33784

Computer program and component part models for nonlinear DC circuit simulation at various temperatures 18 p3108 A69-34525

Circuits and systems - Conference, Pacific Grove, California, October-November 1968 18 p3109 A69-34671

Computerized analysis and design of nonlinear servomechanisms, using describing functions technique 18 p3110 A69-34672

Parameter sensitivity analysis of discrete suboptimal filters from optimal rmse estimate of actual system performance measure 18 p3110 A69-34675

Multiloop feedback in active distributed RC networks for low parameter sensitivity with low amplifier gain compared to single loop circuits 18 p3111 A69-34679

Network Analysis for Systems Application Program development for batch and on-line solution of circuit problems 18 p3111 A69-34680

Networks of ideal inductors, capacitors and periodically operated switches with no energy loss, deriving frequency-power formulas from response functions 18 p3111 A69-34682

Shadow effects on current-voltage characteristics of solar cell array circuits, developing mathematical models 19 p3254 A69-35709

Integrating filter analysis for effect of phase detector sawtooth characteristics on locking range of phase locked oscillator 20 p3486 A69-37011

Physical networks with lumped components and hydraulic, pneumatic, electric, thermal and elastic lines of transfer matrices [ASME PAPER 69-FE-15] 20 p3568 A69-37999

Data transmission of variables in deterministic networks 21 p3673 A69-38775

Electrical properties of passive line elements of hybrid integrated circuits on insulating substrates for radio systems 21 p3684 A69-39563

Analysis and synthesis of distributed transmission line networks with open or short circuited shunts or series stubs, describing composite transfer matrices 21 p3687 A69-39660

Network analysis for systems application program /NASAP/ in FORTRAN for batch and on-line analysis of electronic circuits 21 p3856 A69-39662

Correction to circuit theory textbooks concerning observable but not controllable modes and stability 22 p3917 A69-40135

Real time network support simulation allowing network configuration for nominal or perturbed trajectory for Saturn vehicles, applicable to any flight azimuth 22 p4020 A69-40319

Book on Smith chart electronic applications in waveguide, circuit and component analysis and synthesis 22 p3915 A69-40780

Spatiotemporal patterns learning among sensory and motor organs with linearly ordered components by nonlinear networks in terms of embedding fields theory 22 p3887 A69-41196

Frequency response of control systems analyzed by digital computer using operational arrays, noting extensions to time response and root locus computation 22 p3909 A69-41255

Periodic ladder type design delay equalizer for linear delay characteristics in millimeter waveguide systems 23 p4135 A69-41361

Recursion formula for multilayer interferometer derived, with allowance for multiwave interference, to calculate resonant circuit maxima and minima 23 p4165 A69-41729

Power combining network for high power UHF solid state satellite transmitters with low loss, compact size and input port selection capability 23 p4137 A69-41743

N-terminal parent networks with symmetry constraints derived for nonredundant one port configurations through combinatorial functions test patterns, using computer algorithm 23 p4134 A69-42524

Electromagnetic processes analysis in autonomous inverters simplified by linear graph method to derive characteristic equation 24 p4255 A69-42571

Logic networks of Boolean analogs analyzed by algebraic signal flow theory, introducing variational derivative for test detection in combinational and sequential networks [AAS PAPER 69-236] 24 p4288 A69-42811

On-off limit cycle controllers for reaction-jet controlled systems, investigating delay effects 24 p4291 A69-43271

Liapunov functionals for time delay systems by path integrals in state space, using convolution equations involving distributions with compact support 24 p4295 A69-43317

NETWORK SYNTHESIS

Nonlinear programming for optimal circuits design, discussing search method of ACOP/Automatic Circuit Optimization Program/ 01 p0035 A69-10067

Sensitivity of voltage transfer function relative to variation in value of components of resistance terminated reciprocal reactive network 01 p0049 A69-10069

Integrated circuit digital filters design characterized by weight coefficients containing Lanczos factor for application to processing of signal transmitted from space vehicles 01 p0038 A69-10071

Microstrip transmission line integrated circuits on seminsulating GaAs substrates, showing feasibility at millimeter wave frequencies 01 p0040 A69-10197

Digital loaded-line phase shift networks for microwave thin film applications, emphasizing design equations 01 p0040 A69-10198

Synthesis of infinite and finite Wiener optimal networks or equalizers using delay lines with feedforward and/or feedback taps 01 p0029 A69-10554

Wideband hybrid junctions synthesis from given parameters, suggesting matrix representation of ring circuits 01 p0043 A69-10593

Algorithms for linear system of first order differential equations, emphasizing equations associated with computer oriented circuit design 01 p0036 A69-10708

Data compression methods noting block and circuit diagrams 01 p0031 A69-10735

Dynamic system for self adaptive control of inertial plant described by differential equations, noting synthesis method eliminates distortion 01 p0052 A69-10797

Analytical expressions for transfer function matrices of four terminal signal shaping networks, assuming rational matrix spectral density of randomly polarized signal 01 p0031 A69-10880

Soviet book on design of multidimensional automatic control systems, covering structural circuit synthesis and individual element characteristics 01 p0053 A69-10995

Full multiplier design based on stable iterative array cells interconnected to provide logical functions, noting capabilities for binary numbers 01 p0048 A69-11138

Dynamic programming to demonstrate sufficient conditions of optimality in maximum principle when regular control synthesis is realized 02 p0225 A69-11975

Variation method for optimal solution of antenna synthesis problem for given radiation pattern 02 p0217 A69-12260

P-i-n structure isolation method for fabricating monolithic integrated circuits 02 p0222 A69-12471

Breadboard chip for use in computer aided design and analysis of integrated circuits, describing components and application to differential amplifiers 03 p0402 A69-13008

Generalized digital low pass filter synthesis by recursion technique, noting coefficient sensitivity simplification 03 p0403 A69-13227

Linear transistor models synthesis based on measured characteristics of four terminal admittance parameters 03 p0404 A69-13596

Self adaptive circuit parameters synthesis of systems using amplitude-frequency characteristic by Chaplygin theorem 03 p0410 A69-13685

Equivalent circuit for parallel conductor array based on array capacitance matrix 04 p0576 A69-14756

Optimal linear controller synthesis with minimized trajectory sensitivity achieved by using quadratic cost function 04 p0582 A69-14941

Reliability system design, emphasizing circuit design analysis, failure drifts and component failure modes by use of computer programs /ECAP, CIRC and IMAG/ 04 p0608 A69-15224

Digital nth order phase locked loop for FM demodulation 04 p0561 A69-15452

Unified lunar control photogrammetric network produced by mapping satellite in 28 day polar orbit, using recurrent partitioning 05 p0819 A69-15628

Time domain synthesis of multivariable automatic control with predetermined output signal shape, allowing for internal cross coupling effects 05 p0737 A69-15887

Synthesis of simulated aircraft cabin pure fluidic temperature control system [ASME PAPER 68-WA/FE-30] 05 p0705 A69-16103

Broadband LC filters having prescribed amplitude response and constant group delay, emphasizing IF filters for radio relays 05 p0732 A69-16343

Continuous parameter identification methods for parameter optimization in automatic control system analysis and synthesis, using modified steepest descent optimization 05 p0725 A69-16474

Controllable gyrator use in nonlinear network synthesis 05 p0735 A69-16620

Spherical gyroscope servosystem probabilistic synthesis ensuring minimum dispersion of random drift 05 p0764 A69-16669

Markov extremum drift dual compensation in optimal systems with learning experiments 05 p0741 A69-16671

3-terminal gyrator circuits using operational amplifiers, noting exact cancellation of negative by positive resistance and unattainability of LF unstable modes

06 p0893 A69-16936

Integrated circuit interconnection patterns computerized design, discussing automatic laser mask-making control

06 p0931 A69-17199

Metal oxide semiconductor random-access memories, discussing large scale integration and static and dynamic circuits chip size

06 p0894 A69-17203

Thermal management of integrated circuits design, noting dependence on circuit and component configurations and parameter variations

06 p0894 A69-17217

Multivariable self adaptive control system design using sensitivity methods, obtaining adaptation stability by Liapunov synthesis

06 p0900 A69-17352

Adaptive modeler to estimate state and future trajectory of unknown plant having automatically synthesized control

06 p0900 A69-17353

Learning control system design, using a priori information in subgoal selection, control situation grid extensions and controller initialization

06 p0900 A69-17355

Requirements for analysis and synthesis of diagnostic tests for detecting faults in combinational logic circuit

06 p0892 A69-17408

Radio channel circuit outlined for tracking interplanetary spacecraft and probes with signal delay time prediction

06 p0888 A69-17623

Automatic control textbook covering theoretical and practical principles of control engineering, analysis, design, servomechanisms and instrumentation

06 p0904 A69-17856

Digital computer circuit design book covering requirements of circuit for digital logic and memory functions and physical properties of components

06 p0892 A69-17869

Control system analysis and synthesis by means of generalized root-locus method on digital computer

07 p1114 A69-18291

Integration forms suitable for fabrication of hybrid and monolithic microwave integrated circuits

07 p1096 A69-18441

Coupled and uncoupled terminals series connection for reactive multiport network determined by transforming scattering matrix columns into coordinate vectors

07 p1100 A69-18529

Transversal equalizer circuit consisting of delay line and variable sampler and reinsertion coupler for microwave frequencies

07 p1102 A69-18671

Two signal four quadrant multiplier design having subnanosecond response

07 p1103 A69-18879

All-diffused process to build monolithic high power series voltage regulator with separately optimized DC and AC characteristics

07 p1103 A69-18881

Monolithic HF circuits stability in TV and HF devices noting need for appropriate amplifiers

07 p1103 A69-18883

Integrated frequency selective amplifier design for radio frequencies based on feedback configuration with positive real zero in loop transmission function

07 p1104 A69-18886

Montardi circuit with sectioned electrodes to simulate isotropically conducting still liquid for application in MHD pump, discussing potentials distribution

07 p1059 A69-19031

High data rate coherent telemetry systems synthesis, discussing multiphase modulation and demodulation to achieve bandwidth requirements

07 p1083 A69-19123

Computer aided circuit design by singular imbedding, beginning with prespecified topology and undetermined elements

07 p1115 A69-19148

DC servo system with torque feedback, discussing bang-bang system comparison, analog simulation, damping and quasi-optimum behavior

07 p1059 A69-19229

Frequency transformation allowing comb-line filters of narrow and wide bandwidth, using resonance type filters with lumped elements

07 p1108 A69-19487

RC converter filters and delay lines by expanding transfer function into series of components

07 p1113 A69-19677

Computer aided design methods for electronics and logic systems, noting linear circuits and one dimensional transistors

08 p1278 A69-19970

Computer aided design methods for electronic and mechanical materials, discussing basic concepts and problems

08 p1278 A69-19971

Sawtooth generators production based on equivalent circuit theory, calculating linearity errors in voltages

08 p1296 A69-20105

Pseudoexact Chebyshev response curves for bandpass filter design, discussing phase response and time delay characteristics

08 p1283 A69-20227

Nonlinearities identification in closed loop systems using harmonic balance principle for transforming measured block diagram into diagram of simple form

08 p1297 A69-20302

Design and construction of linear digital filters for signal processing, discussing digital filtering of various signals for space research

08 p1297 A69-20303

Transfer function and frequency response of notch filters used to achieve notch filter dimensioning and design

08 p1284 A69-20379

Synthesis method for UHF transistor oscillators tunable in wideband using Y-matrices

08 p1285 A69-20380

Pulse transformer design relationships and definitions, discussing core and winding structure choice

08 p1285 A69-20382

Tuning design optimization of single circuit LF automatic control systems, using transfer functions and phase amplitude graphs

08 p1297 A69-20418

Analog video processor in omnidirectional radar system for flight safety, discussing construction, transistorization and circuitry

08 p1276 A69-20605

Metal oxide semiconductor technology and applications, discussing gates, analog computers, switching circuits and inverters

08 p1286 A69-20833

Composite transistor simulation of circuit inductor effect for synthesizing frequency selective circuits

08 p1286 A69-20834

Nonlinear feedback shift register circuit design by logical sequences

08 p1298 A69-20835

Book on analysis and synthesis of linear active networks covering filter design, negative resistance, network theorems and stability, amplifier role, etc

08 p1298 A69-20885

Fluidics in UK, discussing digital control elements and systems and transmission lines in alternating flow hydraulics

[AGARDOGRAPH-118] 08 p1257 A69-20952

Ultrahigh speed systems and logic circuits specifications implementation into electrical design, discussing circuit selection, line propagation delays, noise margins and temperature effects

[AGARDOGRAPH-114] 08 p1298 A69-20985

Electrical design of low cost, highly maintainable general purpose computer optimized with respect to product of power and speed

[AGARDOGRAPH-114] 08 p1278 A69-20988

Spherical electronically tunable multiresonator YIG filters design using filter tables and coupling bandwidth charts

08 p1292 A69-21006

Equivalent circuit synthesis with six reactances- two terminal network bridges

08 p1295 A69-21166

All-pass transfer functions of new class type for design of quadrature filter networks, using Chebyshev approximation

08 p1277 A69-21167

Chebyshev filter with flat group delay obtaining transfer function, noting cascade synthesis and extended bisection theorem

08 p1299 A69-21169

Iterative Chebyshev approximation for computerized network design by linearizing original nonlinear programming

08 p1299 A69-21170

Transfer function of low pass filters with Chebyshev attenuation characteristic in stopband and predetermined phase or delay time realized by ladder network

08 p1300 A69-21171

Filter design using transformed frequency variables suitable for computer programs

08 p1300 A69-21172

Insertion-loss synthesis of narrow band crystal band-elimination filters, using narrow band approximation and pseudoreactance theory

08 p1300 A69-21173

Zero sensitivity integrated RC filter circuits design, exploiting capacitors and resistors property of having same temperature coefficient

08 p1300 A69-21174

Airborne digital computers for optimization of aircraft control and monitoring functions, discussing avionics and circuit technology

08 p1349 A69-21194

Linear shift register synthesis algorithm found to coincide with Berlekamp iterative algorithm for decoding BCH codes

09 p1470 A69-21317

Microwave power and low noise transistors, noting continuous wave output and circuit design

09 p1462 A69-21407

Equations adaptable to computer for RLC circuits containing linear and nonlinear n-terminal networks derived by nodal method

09 p1472 A69-21779

Low sensitivity electric circuits synthesis based on analytical and numerical analysis of sensitivity function characteristics of selective polynomial circuits

09 p1472 A69-21780

Linear electronic circuit canonical synthesis by computer, using algorithm based on linear and nonlinear programming

09 p1472 A69-21781

Soviet book on statistical theory of discrete signal demodulation, covering demodulator analysis and synthesis methods

09 p1455 A69-21933

Optimum timing extraction /bit synchronization/ in pulse code transmission, analyzing probabilistic structure by statistical parameter estimation and deriving system

09 p1455 A69-22115

Optimal receiving circuit determined for elliptically polarized signals in randomly polarized noise by deriving integral equation

09 p1456 A69-22285

RLC two terminal bridge network synthesis, considering two reactances, three resistances and constraints

09 p1464 A69-22291

Hybrid circuit technology application to packaging electronic systems

09 p1508 A69-22336

Thick film hybrid circuit technology and equipment reviewing conductors, resistors, and insulator inks

09 p1508 A69-22337

Wire, lead frame, direct bonding and beam lead techniques for interconnecting active elements into hybrid circuits

09 p1508 A69-22338

Precision trimmed RC active networks for high selectivity microelectronic filter fabrication for frequency division multiplex applications

09 p1466 A69-22452

Microelectronics for digital adaptive controls, discussing digital filter design and chips required in fabrication

09 p1474 A69-22453

Frequency modulation feedback demodulator design procedure for satellite communications, noting importance of nonideal implementation

09 p1457 A69-22464

Adaptive logic trees with two input gates for mechanization of any desired function of variable set, deriving multilevel representations of functions

09 p1475 A69-22583

Control system controllability under discontinuous control constraints, presenting optimal response rate linear system synthesis with continuous restriction on control function

09 p1475 A69-22670

Statistical theory and dynamic programming to synthesize optimal pulsed control systems having restrictions on control device storage capacity

09 p1476 A69-22673

Aircraft modal control systems synthesis to improve response characteristics by altering pairs of complex conjugate and real eigenvalues simultaneously

09 p1435 A69-22779

Pseudoexact bandpass filter response curves and electrical characteristics based on ripple Chebyshev responses

09 p1470 A69-22794

DC to DC converters design using HF transistors to achieve high switching speeds while reducing size and weight

10 p1635 A69-22983

Computer aided circuit design programs combining technical engineering skills with building block programs

10 p1659 A69-23141

Dynamic programming to demonstrate sufficient conditions of optimality in maximum principle when regular control synthesis is realized

10 p1666 A69-23884

Multiple loop feedback systems synthesis utilizing extended node introduction synthesis theory, considering filter response functions characteristics

10 p1667 A69-24037

Filter network synthesis for realization of rational functions, discussing numerator polynomial inclusion by choice of divisor polynomial and branch introduction and parallel systems

10 p1667 A69-24038

RC circuit with variable time constant using variable resistor

10 p1667 A69-24046

Antenna array statistical synthesis, investigating signal detection capacity for large phase fluctuations

11 p1833 A69-24439

Laser application to welding, drilling and other processes involving material removal for microelectronic circuits and components fabrication

11 p1846 A69-24600

Polyharmonic predictive and self tunable filters synthesis based on signal periodic components detection, noting role in information transmission and processing systems

11 p1849 A69-24966

Low pass filters synthesis based on Chebyshev polynomials properties noting requirements of critical frequency, frequency response decline rate and tolerance range

11 p1887 A69-25210

Linear active adjustable VLF filters for polynomial transfer functions

11 p1859 A69-25392

Microwave filters with lumped capacitances and coupled waveguides derived by frequency conversion from lumped filters circuits

11 p1855 A69-25628

Lumped element construction technique involving crossed coils to reduce ferrite produced heat in resonance isolators, using substituted YIG

11 p1856 A69-25632

Circuit designs using differential amplifier devices or operational amplifier integrated circuits

11 p1857 A69-25664

Narrow band LC 70 MHz IF filter design method

12 p2036 A69-25915

Feedback design for monotonically stabilized linear sampled data control system

12 p2045 A69-25961

Linear bridge circuits design having proportional output signal to first or second derivative of input signal envelope

12 p2037 A69-25962

Synthesis of multivariable control systems at minimal integral square quality functional

12 p2046 A69-26061

Multivariable control system decoupling by appropriate choice of decoupling network structure and location in system

12 p2048 A69-26074

Nonlinear multivariable control systems synthesis, considering synthesis expressibility in known linear formulation

12 p2048 A69-26077

Shutter drive circuits for image converter camera noting focusing, deflection system, applications in plasma research, etc

12 p2082 A69-26138

Equivalent subsystems for designing multivariable linear automatic control system

12 p2052 A69-26280

Multiinput sine comparators graphical analysis and design considerations, emphasizing semiconductor circuit providing quadrilateral polar characteristic on impedance plane

12 p2039 A69-26350

Ultra lowpass filter circuit with two point contact Ge diodes and capacitor

12 p2039 A69-26379

Analytical expressions for transfer function matrices of four terminal signal shaping networks, assuming rational matrix spectral density of randomly polarized signal

12 p2031 A69-26644

Asymptotically stable discrete time closed loop linear systems synthesis, presenting feedback matrix as illustration

13 p2287 A69-27238

Pulse frequency integral estimate devices with integrating chemotron tetrodes for automatic systems metering applications

13 p2227 A69-27522

Microwave filters for canonical realization of non-minimum phase transfer functions, combining magic-T or hybrid junction with ladder structure network

13 p2228 A69-27668

Multiaperture waveguide directional couplers analyzed by four port equivalent circuits, discussing synthesis method for optimizing coupling directivity

13 p2228 A69-27669

Microstrip circulator size reduction attained by tight inductive ferrite coupling for incorporation with microwave integrated circuits

13 p2230 A69-27679

Solid state radar feasibility, discussing circuit components, circuit design problems involving striplines and monoblocks, phase controlled antenna, solid state computers, etc

13 p2230 A69-27928

Transmission line all pass equalizers theory and design for operation in TEM, TE or TM modes

13 p2233 A69-28065

Two idler parametric amplifiers bandwidth properties investigated using equivalent circuit, noting role of idler circuit design

13 p2233 A69-28066

Chebyshev polynomial of even order used in synthesis of equally terminated low pass lumped and distributed filters of even order

13 p2233 A69-28068

Synthesis for asymmetrical branch guide directional coupler-impedance transformers, noting application in antenna design

13 p2233 A69-28069

TEM mode networks design for producing phase coherent pulse modulated microwave signals through spectrum S band

13 p2234 A69-28073

Asynchronous finite state sequential nonlinear controller synthesis with few flip-flops for dynamic space vehicle systems [AIAA PAPER 67-988]

13 p2225 A69-28201

Tunnel diode slideback sampling gate circuits, discussing response characteristics and operational specifications

13 p2236 A69-28538

Two stage tunnel diode amplifier synthesis with gain stabilization circuit widening passband, discussing operating frequency and maximally flat amplitude frequency response

13 p2236 A69-28575

Optimization criterion for synthesizing discrete nonlinear control system subjected to random controlling and perturbing effects

14 p2425 A69-28825

Trigger demodulator theory, design and circuits

14 p2419 A69-28907

Compensating /feedback/ loops determination method for linear two dimensional control system, achieving self regulation

14 p2425 A69-28908

Statistical synthesis of optimal control for quasi-harmonic systems by extending asymptotic method to include unremovable measurement error in output value

14 p2426 A69-29420

Optimum nonlinear digital filter synthesis for smoothing, predicting and differentiating measured quantity having uniform probability distribution over finite number of discrete values

14 p2426 A69-29421

SHF solid state phased array radar with Gunn effect modular microwave IC design, discussing air and ground applications

14 p2420 A69-29435

Optimized receivers synthesized for narrow band radio signal filtration, comparing noise rejection properties of various pulse modulation types during speech transmission

14 p2413 A69-29464

Notch filter construction by single operational amplifier, adjusting notch bandwidth by varying ratio of resistors and capacitors

14 p2421 A69-29550

Capacitors pi network representation of series gap in center conductor of matched coaxial transmission line

14 p2424 A69-29766

Digital notch filters synthesis based on bilinear transformation method

15 p2575 A69-30182

Nanosecond pulse generator for powering semiconductor lasers, examining circuit diagram and elements design

15 p2633 A69-30234

Thermistor thermometer with low energy dissipation for flow measurements, discussing design considerations

15 p2608 A69-30296

Differential equations for optimum reception to synthesize detectors of deterministic signals against nonGaussian background noise using Markov process

15 p2567 A69-30340

Electron beam exposure system to photoetch integrated circuit patterns without photomasks, using electronic computer for automatic pattern generation and registration

15 p2579 A69-31039

Stripline microwave integrated circuits in terms of building blocks and components, discussing hybrids, backward wave coupler, balanced modulators and mixers, etc

15 p2579 A69-31075

Hybrid coupled low power digital microwave phase shifters design, discussing lumped element L-C and variable C shifter theories, power limitations and construction techniques

15 p2580 A69-31076

Pseudoexact bandpass filter design, presenting graphs for passband loss, voltage standing wave ratio and time delay as function of frequency

15 p2581 A69-31526

Mathematical optimization to achieve near equal-ripple response in passband for coaxial low pass filters having unequal line lengths

16 p2757 A69-31583

Demand assigned frequency division multiple access-PCM system designed by COMSAT for satellite communication

16 p2749 A69-31602

High voltage thin film transistor, discussing design criteria, fabrication, I-V characteristics and switching speed

16 p2757 A69-31614

Logic circuits abstract synthesis for detecting signals against noise background using known conditional quantized signal distributions

16 p2749 A69-31627

Microwave bandpass linear phase filters design and synthesis for simultaneous flat amplitude and delay response

16 p2759 A69-31941

Equal ripple nonuniform tapered line coupler design and computed performance by evaluating cascade matrix as function of frequency

16 p2760 A69-31944

Autooscillatory process in n-circuit tunnel diode LC oscillators acted upon by external sinusoidal voltages

16 p2764 A69-32256

Wideband selective amplifier design methods proposed by Martini and Schiaffino

16 p2761 A69-32442

Microelectronic S band upconverter designed and fabricated in microstrip on alumina substrate

16 p2762 A69-32562

Lumped element circuit producing directional coupling by electric and magnetic coupling of reactance quadrupoles, discussing insufficient coverage of calculated frequency range

16 p2763 A69-32581

Broadband continuously variable phase shifter with microstrip construction, describing phase rotation via stripline connected directional couplers

16 p2763 A69-32582

Short backfire antenna based on yagi type equipped with end reflector, noting fewer elements and low sidelobe advantages

16 p2763 A69-32586

Network synthesis technique applied to structural dynamics design, using topological formulas to express systems response transfer functions

17 p2933 A69-33709

Active antenna impedance matching network constituting low noise device for electromagnetic interference measurements useful for automatic or manual scanning

17 p2943 A69-34131

Airborne communication receiver solid state interference blanker circuitry comprising black box insertable between antenna and RF input

17 p2943 A69-34132

Vibration-proof devices obtained by relating variance determination errors in selective filter response, modulating process bandwidth and spectral analyzer passband

18 p3109 A69-34584

Circuits and systems - Conference, Pacific Grove, California, October-November 1968

18 p3109 A69-34671

Analytical, graphical and graph-analytical methods for synthesis of passive circuits ensuring air removal from chambers of pneumatic logic control and servomechanisms

18 p3093 A69-34831

Functional signal conversion operations in microelectronic radio equipment, examining components in analog and pulsed devices synthesis

18 p3109 A69-35162

Current generator circuit designed for semiconductor laser excitation with pulses modulated by sinusoidal signals at 4.75 MHz

18 p3153 A69-35256

Nanosecond pulse generator circuits based on four layer Si diodes designed for semiconductor laser excitation

18 p3153 A69-35257

Solid state S band to VHF converter design to obtain optimum system noise for radio telemetry, discussing cost effectiveness and system performance

19 p3270 A69-36238

High bit rate signal conditioning, bit and group synchronization of NRZ PCM, considering gain and power bandwidth limitations and delays

19 p3271 A69-36247

Phase locked loop design of desensitized monolithic integrated circuits for FM multiplex signal filtering and demodulation, describing external tuning

19 p3273 A69-36274

Information theory, circuit optimization and computer aided design in radio wave information transmission

19 p3286 A69-36432

Single loop directional stripline filters synthesis, including general expression for frequency characteristics based on wave matrices

19 p3284 A69-36570

Pneumatic control circuits design based on logic functions and truth tables, noting fluid logic application

19 p3256 A69-36714

Dispersive quadrupole network design using algorithm method

19 p3287 A69-36740

Quasi-optimal synthesis for reception indicator used in radio interferometers for measuring signal amplitudes in presence of normal noise

20 p3504 A69-37009

Voltage variation frequency analysis for narrow-band sweep oscillators circuit design

20 p3486 A69-37010

Time division multiplexing of asynchronous digital signals from independent sources in continuous or bit stuffing mode, evaluating reliability and efficiencies

20 p3493 A69-37715

Equivalent circuit for microwave cavity containing active GaAs device applied to waveguide and radial mode cavity design

20 p3508 A69-37900

Near constant phase variable attenuator for RF signal containing Doppler information, centering design around p-i-n diode as control element

21 p3681 A69-38410

Multiplexer network synthesis based on arbitrary divisibility of frequency range and obtainability of input impedance at all frequencies

21 p3681 A69-38530

Radiometer for 4 cm wavelength range with receiver circuit incorporating tunnel and parametric HF amplifiers, describing design and operation including sub-units

21 p3724 A69-39076

Ionization manometer flange transducer with axial cathode and collector for high vacuum measurements, describing air resistant yttrium oxide coated cathode with Ir core

21 p3724 A69-39077

Automatic frequency control circuit for stabilizing beat emissions of coupled multifrequency gas lasers

21 p3738 A69-39079

Antenna synthesis problems in mathematical physics, discussing radiation pattern, shape and source and optimal solution via operators spectral theory

21 p3682 A69-39124

Synthesis by differential equation technique for linear antenna arrays of identical radiators radiation patterns

21 p3682 A69-39125

Computer program for generation of test patterns for multiterminal devices and networks

21 p3679 A69-39604

Analysis and synthesis of distributed transmission line networks with open or short circuited shunts or series stubs, describing composite transfer matrices

21 p3687 A69-39660

Stable linear system /shaping filter/ synthesis transforming stationary white noise into random process having given covariance function

21 p3688 A69-39661

Optimal control synthesis by determining conditions for absolute minimum in quick response having no regular constraints on phase coordinates

21 p3689 A69-39863

Computerized algorithm facilitating automatic synthesis of time invariant linear compensation for highly complex multiloop control systems [AIAA PAPER 69-941]

22 p3917 A69-40324

Linear flight control system synthesis by using optimal control theory associated with quadratic performance index

22 p3864 A69-40588

Book on Smith chart electronic applications in waveguide, circuit and component analysis and synthesis

22 p3915 A69-40780

Time varying resistance wire to arrest oscillations in pulsed capacitor discharge circuit, deriving over, under and critical damping conditions

22 p3917 A69-41228

Distributed RC networks combined with lumped passive and active elements to produce distributed-lumped-active /DLA/ networks for filter requirements

23 p4144 A69-41401

Electromagnetic compatibility /EMC/ filter design and test methods to achieve effectiveness and reliability, emphasizing transfer impedance characteristics

23 p4142 A69-42233

High efficiency boost regulator design and tests for planetary spacecraft, considering input and output voltages

23 p4075 A69-42302

Phase-pulse multistable circuit reliability improvement by additional negative feedback increasing parametric variation tolerance, feeding voltages and temperature

23 p4143 A69-42338

Electrical power system synthesis for manned lunar base for surface explorations of increasing energy requirements and duration, discussing thermal control, reliability, etc

23 p4076 A69-42541

Hybrid techniques to produce thin and thick film microcircuits and logic system parameters

24 p4286 A69-42906

Optimum control synthesis for nonlinear plant subject to white noise perturbation, using integral estimates of phase coordinate functions

24 p4289 A69-42949

Nonblocking switching networks operating in ordinary and in simultaneous switching regime, including control algorithms for optimal space communication

24 p4289 A69-43138

Materials problems in microelectronic circuits, discussing multilayer interconnection arrays production by thick film or print-and-fire process

24 p4333 A69-43212

On-off limit cycle controllers for reaction-jet controlled systems, investigating delay effects

24 p4291 A69-43271

Fluid logic feedback control circuit synthesis using synthesis table, describing procedure to assign memory valves and switching signals

24 p4292 A69-43290

General purpose computer program for synthesis of multivariable systems decoupled by state feedback

24 p4294 A69-43307

Laser beam circuitry miniaturization facilitating laser circuit assembly isolation from thermal, mechanical and ambient changes

24 p4328 A69-43327

On-board digital filtering applied to spectral estimation and data compression, discussing theory, techniques, computerized implementation and prototype design [AIAA PAPER 69-969]

24 p4285 A69-43510

NEUMANN PROBLEM

Dirichlet and Neumann problems solvability using potential theory methods, limiting study to three dimensional domains

07 p1173 A69-18496

Electric analogy technique for torsion and flexure functions of uniform beams with terminal loads, considering Neumann boundary value problem

11 p1995 A69-25649

Simultaneous Wiener-Hopf equations for electromagnetic wave diffraction, giving cyclic matrix solutions for Dirichlet and Neumann mixed boundary value problems

13 p2287 A69-27299

NEURAL NETS

Mathematical model of spike activity of auditory neurons constructed from functional point of view

07 p1070 A69-18384

Hypothalamic motivational systems and stimulation, discussing behavior patterns and plasticity

09 p1444 A69-21310

NEUROLOGY

Head injury clinical and laboratory long term follow-up data, discussing conscious state alterations, focal neurological deficit, EEG abnormalities, etc

01 p0022 A69-11346

Radiological properties of high energy proton beams from synchrocyclotron in tumor treatment and neurosurgery

03 p0373 A69-13495

Neurological impairment in baboons exposed to prolonged decompression simulating high altitude aircraft cabin structural failure, noting neuropathological examination results

07 p1067 A69-19426

Jet fighter pilot spatial disorientation during flight and on ground, emphasizing vestibular neuronitis diagnosis

10 p1649 A69-23382

Hypokinesia effects on human neurology on extended space flights simulated by 72-day bed rest

10 p1646 A69-23506

Neurological changes in men due to hypokinesia, analyzing tremor data, EEG recordings and stabilography fluctuations

10 p1647 A69-23585

Soviet book on nervous mechanisms of vestibular reactions emphasizing mathematical description of operation, neurophysiologic changes in cerebral cortex and oculomotor activity modeling

16 p2746 A69-32605

Valsalva maneuver produced abrupt onset of ptosis and proptosis caused by ethmoidal air cell rupture, discussing oticlogies

17 p2909 A69-33186

Book on neurocybernetics and neurobiology covering mathematical and physiological models, artificial neurons, image recognition theories, biological control systems, etc

19 p3263 A69-36747

Motion sickness as sensory rearrangement phenomenon, proposing neural mismatch hypothesis to account for symptom pattern

20 p3483 A69-38266

NEUROMUSCULAR TRANSMISSION

Neuromuscular actuation system model, noting compatibility with human physiological and anatomical data in tracking tasks

02 p0202 A69-11952

Man machine integration, detailing sensory input and motor /or output/ systems, control loop and social structure impact

11 p1831 A69-25656

Nerve and muscle tissues subthreshold reactions on analog model, discussing transient characteristics under various excitations

23 p4109 A69-41980

Training effect on fast muscle isometric contraction in rats, discussing mechanical characteristics

23 p4097 A69-42095

NEURON TRANSMISSION

U BIOELECTRICITY

NEURONS

Neutral buoyancy microelectrode for prolonged recording from single nerve units

02 p0202 A69-11865

Cerebral cortical neurons response to visual stimuli during stationary and rapid eye movement

03 p0369 A69-13360

Mathematical model of spike activity of auditory neurons constructed from functional point of view

07 p1070 A69-18384

Oxidative and dephosphorylating enzymes and esterase in rat and squirrel monkey cerebral cortexes, noting neuron activity

12 p2018 A69-25773

Histochemical studies on nucleus basalis of Meynert of squirrel monkey

12 p2018 A69-25774

High altitude environmental effects on adrenal glands and hypothalamic neurosecretion in rats

13 p2211 A69-28615

Miniaturized FM telemeter for transmitting electrical activity of single nerve cells in brain of awake and unrestrained animal

19 p3261 A69-36270

- Electrical response of frog and human visual cortex neurons to thermal vestibular and light flash stimulation
20 p3469 A69-37242
- Labyrinth polarization effect on stimulation and neuron activity in visual cortex of cats, using electroencephalograph
20 p3469 A69-37244
- Multilevel mathematical model of oculomotor apparatus using neuron networks and complex activators, including computer analysis
20 p3470 A69-37245
- Vestibular neurons activity in decerebrized cats under ipsilateral and contralateral labyrinth polarization combined with acoustic and caloric stimulation
20 p3471 A69-37254
- Cats vestibular neurons reactions to labyrinths mon- and binaural polarization and caloric stimulation
20 p3471 A69-37255
- Neuron activity simulation applied to vestibular neurons electrical activity analysis, discussing feedback circuitry and cathodic depression
20 p3471 A69-37256
- Neuronal organization of initial afferent inflow in thalamic visual center /lateral geniculate body /LGB/ of unanesthetized cats/, noting unit activity
22 p3879 A69-40845
- Psychopharmacological drug effects on retinal neuron activity in cats measured by microelectrodes, noting spontaneous activity decrease
22 p3879 A69-40846
- Statistical critique of Polyak values for tangential dendritic spread of primate retinal neurons
22 p3880 A69-40848
- Retinal topography relation to blue arcs phenomenon, assessing disparity in photoreceptor location and associated neurones for analysis of critically sited plots
22 p3882 A69-40872
- Functional relation between primary response individual phases and neurons activity in cats cerebral cortex
22 p3886 A69-41067
- D-amphetamine effect on single tectal neurons activity of cat opticum recorded by steel microelectrodes before and after intravenous injection
23 p4084 A69-41466
- Stimulus correlated with neuronal discharge periodicities in colliculus inferior, deriving structure models, discussing acoustic channel below geniculatum mediale
23 p4096 A69-42089
- NEUROPHYSIOLOGY**
- Surgical radiolesion in human brain by high energy protons
03 p0374 A69-13501
- Analytical model for frog retinal bug detector cell to make possible signal measurement in frog optic fibers
07 p1070 A69-13833
- Central adrenergic mechanisms role in neurosecretory function of hypothalamo-hypophyseal system of rabbits under transverse accelerations in centrifuge
15 p2554 A69-30055
- Book on neurocybernetics and neurobionics covering mathematical and physiological models, artificial neurons, image recognition theories, biological control systems, etc
19 p3263 A69-36747
- Cerebral subcortical structures controlling effect on central and peripheral nervous systems, discussing motion coordination, space orientation, search reflexes and physiological sleep
22 p3889 A69-41275
- NEUROPSYCHIATRY**
- Steroid hormones effect on nervous system and behavior from data on gonadectomized rats and monkeys treated with testosterone propionate
03 p0375 A69-13551
- Magnetic fields role in neuropsychiatric and physiological experiments, noting effect on phagocyte activity
05 p0715 A69-16627
- Man psychic activity interference resistance, discussing stress effects characterized by theta and delta rhythms
08 p1262 A69-19839
- Human adaptation to various environments, emphasizing experimental space psychoneurology role in human behavior examinations during space missions
10 p1647 A69-23587
- NEUROSCIENCE**
- U NEUROLOGY**
- NEUROSES**
- NT NEUROTIC DEPRESSION**
- Military flying career choice as neurotic compensation for personality defects, stressing personality screening during interview
12 p2023 A69-26492
- Psychiatric morbidity as absenteeism cause among ground and flight personnel in civil aviation, recommending psychotherapy and chemotherapy
24 p4266 A69-43378
- NEUROSPORA**
- Accelerated helium and carbon ions effects on mutation-induction and nuclear inactivation in *Neurospora crassa* compared with X rays, discussing relative biological effectiveness /RBE/
03 p0373 A69-13490
- Structural phospholipoprotein isolated from *hydrogenomonas facilis* and *neurospora crassa*
22 p3871 A69-40049
- NEUROTIC DEPRESSION**
- Psychological study of stewardesses for depressive, neurotic and psychosomatic episodes, discussing psychopathological structures corresponding to biological sequences
07 p1067 A69-19434
- Psychotherapeutic treatment of depressions and neuroses in flight crews, noting face to face method effectiveness
23 p4086 A69-41690
- NEUTRAL BEAMS**
- NT MOLECULAR BEAMS**
- Average ionization cross sections of atomic and molecular H and He beams ionized by plasma electrons with Maxwellian velocity distribution
12 p2138 A69-26542
- Three component fast neutral beam for hydrogen plasma ion density and electron temperature determination, improving accuracy and reliability
14 p2452 A69-29812
- Secondary electron emission from gas covered metal surfaces, discussing results of neutral beam investigations
17 p3008 A69-33000
- NEUTRAL PARTICLES**
- NT COLD NEUTRONS**
- NT FAST NEUTRONS**
- NT NEUTRONS**
- NT PHOTONEUTRONS**
- NT THERMAL NEUTRONS**
- Radioactive decay of neutral pions generated in metagalactic cosmic ray interactions as source of high energy isotropic gamma rays observed by OSO-3
02 p0308 A69-12092
- Screening of high density plasma from penetration by neutral gas, discussing prevention of high energy losses by charge exchange collisions
02 p0288 A69-12170
- Automatic recording of neutral atom temperature and free electron density of partially ionized gas by Fabry-Perot interferometer
03 p0428 A69-13111
- Electron scattering by neutral acceptors in semiconductors, noting relaxation time for Ge at very low temperatures
03 p0484 A69-13280
- Electron, ion and neutral particle temperatures of upper atmosphere
04 p0592 A69-14975
- F 2 layer formation and fast neutral particles ionization source due to charge exchange between solar wind protons and moving interstellar hydrogen
04 p0592 A69-15009
- Pumping requirements for nozzle skimmer region of neutral particle nozzle beam source, using two stage mechanical pump
04 p0600 A69-15026
- Diurnal variations of neutral and charged particle temperatures in equatorial F region
05 p0755 A69-16270
- Neutral interstellar matter particle fluxes and densities for earth, noting effects on upper atmosphere gas densities
05 p0828 A69-16653
- Energy flux into earth thermosphere due to fast corpuscular neutrals arising from charge transfer collisions between solar protons and neutral interstellar H
05 p0817 A69-16654
- Neutral hydrogen distribution and dynamics in galaxies, discussing observations by spectrographic transit telescope, data processing and profiles
07 p1224 A69-19711
- Chain mechanism of arc discharge development in crossed electric and magnetic fields explained by direct ionization of neutral particles by ions
11 p1932 A69-25540
- Electrohydrodynamic flows at large electric Reynolds numbers, obtaining Bernoulli and Cauchy-Lagrange integrals
13 p2305 A69-27379
- Finite Larmor radius and collision with neutral atoms simultaneous effects on plasma gravitational instability
13 p2346 A69-27708
- Neutral hydrogen cloud observed at high galactic latitude, discussing top intensity velocity, peak intensity dispersion, age, hydrogen mass and density
13 p2347 A69-27719
- Residual gas analyzer and leak detector by time of flight measurements on neutral metastable atoms and molecules between pulsed electron gun and auger surface detector
13 p2262 A69-28006
- Oscillating electron ion discharge in magnetic field in system of alternating positive and negative electrodes to obtain fast neutral particle fluxes
13 p2311 A69-28109
- Neutral gas pressure in positive column plasma between two coaxial insulated cylinders as function of cylinders radii
14 p2490 A69-29036
- 21 cm line emission surveyed for spatial distribution of random velocities of neutral hydrogen in solar neighborhood
14 p2520 A69-29371
- Electron scattering by neutral acceptors in semiconductors, noting relaxation time for Ge at very low temperatures
14 p2508 A69-29653
- Ionospheric models for motion of slightly ionized homogeneous cold plasma influenced by electrostatic field and neutral particles flow, considering geomagnetic effects
14 p2499 A69-29863
- Neutral hydrogen in dark dust clouds in 21 cm line, showing hydrogen excesses and deficiencies
15 p2691 A69-30763
- Neutral hydrogen high velocity clouds as possible extragalactic objects in Local Group not contracted to galactic dimensions or densities
15 p2694 A69-30785
- Low energy neutral bremsstrahlung cross sections for Ne, Ar and Xe, using rapid scanning spectrometer
15 p2657 A69-31159
- Radiative scattering cross sections of electrons from neutral O and atomic and molecular N using rapid scanning spectrometer for bremsstrahlung intensity
15 p2657 A69-31160
- Interstellar particle penetration into solar system, discussing impact ionization of earth ionosphere by interstellar neutral hydrogen and helium
15 p2699 A69-31390
- Xenon atom and ion densities downstream from coaxial plasma gun measured using vacuum UV emission, absorption spectroscopy and Langmuir probe
16 p2819 A69-31690
- Perturbation theory for nonlinear oscillations in ionized plasma, treating electron-neutral collisions effect by Boltzmann-Vlasov equation relaxation term, noting distribution function
16 p2820 A69-31702
- Ion momentum transfer through charge exchange in mixture of ion gases and parent neutral gases under thermal nonequilibrium, noting role of Boltzmann equation
16 p2822 A69-32108
- Combined midlatitude neutral air wind and equatorial electrodynamic drift effect on F 2 layer diurnal variations
16 p2781 A69-32316
- Electron impact broadening of isolated spectral lines emitted by neutral atoms in plasma
16 p2823 A69-32468
- High energy neutral molecule beam for gas-surface interaction studies generated in electron bombardment ion source
19 p3376 A69-36176
- Earth satellite sweeping mass spectrometer for measuring atmospheric neutral particle and positive ion concentration
19 p3314 A69-36681
- Lower thermosphere ion and neutral minor constituent concentrations in nighttime auroral zone, considering ionization due to electron precipitation and bremsstrahlung
21 p3704 A69-38365
- Neutral components of arctic thermosphere measured with rocket-borne RF mass spectrometers, discussing origin of atomic hydrogen and water lines
21 p3704 A69-38367

Neutral particle density ratios in thermosphere by rocket-borne monopole mass spectrometers

21 p3704 A69-38368

Universal dependence of density fluctuations on specific entropy derived from equation describing material composed of neutral particles and equal number of charged and antiparticles

21 p3771 A69-38995

NEUTRALIZERS

Plasma generator for maintenance of space vehicle electrical neutrality during ejection of high velocity electron pulses

[AIAA PAPER 69-273]

09 p1567 A69-21263

DNA denaturation without variance from pH 7.0 by adding NaOH observed with viscosity measurements, obtaining similar results with hydrochloric acid

24 p4263 A69-43225

NEUTRINOS

Viscous effects of neutrinos in anisotropic cosmological models examined using Boltzmann equation with simple collision term

01 p0148 A69-10053

Weakly interacting neutrinos in anisotropic cosmological models with emphasis on equilibrium period, noting energy increment

01 p0123 A69-10348

Neutrino radiation in universe with emphasis on stellar neutrino radiation, analyzing emission during nuclear fusion of C-N, He and Ne-Na cycles

01 p0145 A69-10754

Solar neutrino flux dependence on rotation rate of solar core and fractional mass involved in interior mixing

02 p0325 A69-12600

Muons in EAS, single unaccompanied muons, underground muons and experiments involving neutrinos

03 p0499 A69-12946

Mixing effect on solar neutrino fluxes, assuming solar convective core with rapid thorough mixing

06 p1001 A69-17192

Null solar neutrino flux possible relation to 2 year solar cycle, discussing energetic disturbances at solar core and sunspots

08 p1377 A69-19902

Neutrino emission and carbon burning onset in 1.45 solar mass stellar models with pure He envelope, He burning shell and degenerate C-O core

08 p1384 A69-20059

Star collapse under energy losses due to neutrino emission, analyzing self similar asymptotic solutions

09 p1587 A69-21359

Solar neutrinos and convective core mixing on short time scale resulting in flux reduction

09 p1574 A69-21453

Brans-Dicke gravitation theory effects on solar evolution and neutrino flux, discussing solar luminosity

09 p1605 A69-22415

Neutrino loss effects on evolution of pure iron stars, considering white dwarf, presupernova models and iron-helium transition

09 p1606 A69-22420

Neutron proton plasma properties in massive stars and supernovae, discussing neutrino emission

10 p1756 A69-22814

Superhigh energy cosmic ray interaction with neutrinos in universe, shape of cosmic ray spectrum and universe development

10 p1757 A69-22826

Neutrino groups generation in internal regions of sun, analyzing flux ambiguities due to error of cross section parameter of nuclear reactions

10 p1757 A69-22827

Red supergiants as old derivatives of main sequence O and B stars, discussing neutrino emissions and carbon core contraction

10 p1788 A69-24125

Superdense stars energy yield from neutrino emission, assuming incomplete degeneration of elementary particle Fermi gas

13 p2336 A69-27435

Structure and thermometry of solar interior from measuring neutrino fluxes intensities emitted by unit mass

13 p2333 A69-28434

Neutrino and antineutrino emission by URCA process calculated, assuming nuclear reactions in static and beta processes in kinetic equilibrium

15 p2674 A69-30542

Solar neutrino fluxes sensitivity to localized changes in opacity and equation of state, discussing solar models

15 p2675 A69-30768

Turbulent diffusion inside sun as explanation of solar spindown, Li depletion at surface and neutrino discrepancy, discussing diffusion coefficient and stellar evolution

16 p2866 A69-32814

Solar thermonuclear reactions studied by emitted neutrinos detection, plotting energy spectra for sensitivity of CI 37 detection system

18 p3185 A69-34278

Solar energy release by quark fusion catalysis of alpha reaction without production of neutrinos, noting temperature dependent reaction rate

18 p3186 A69-34643

Star collapse under energy losses due to neutrino emission, analyzing self similar asymptotic solutions

18 p3197 A69-34749

Neutrino-pair bremsstrahlung for hot degenerate electron gas during Coulomb scattering on imbedded nuclei in stellar regimes including lattice structure effects

18 p3176 A69-35004

Solar neutrinos capture rate estimation by using Li 7 as detector

20 p3588 A69-37420

Solar He abundance limits and discrepancies of CI 37 solar neutrino count experiment

20 p3592 A69-38068

Solar neutrinos emission mechanism for information on central region of sun, discussing detection and flux density

21 p3790 A69-38827

Lepton nonconservation implications for experiments involving solar neutrinos, showing effect on capture rate at earth for pep neutrinos

23 p4194 A69-41596

Complex phenomena in theoretical astronomy including neutrino pair emission in stellar interiors, molecular H in interstellar gas, neutron stars, etc

23 p4217 A69-42316

Stellar neutrino energy loss due to electron-electron neutrino bremsstrahlung in nondegenerate gas determined from transition probability for charged baryons or leptons interaction

24 p4351 A69-42794

NEUTRON ACTIVATION ANALYSIS

Replicate neutron activation determinations of Ga, Ge, In and Ir in L group chondrites, proposing model which accounts for observations

01 p0155 A69-10976

Meteoritic materials investigated for Sc, Ce and Eu content and distribution in various phases, using neutron activation analysis

01 p0026 A69-11376

Stony meteorite Krahenberg, determining isotopic composition, rubidium and strontium age of dark and light portions by neutron activation analysis

05 p0826 A69-16439

Rare earth elements and yttrium in meteoritic chondrites determined by radiochemical neutron activation analysis

08 p1403 A69-20916

Antimony bromine and mercury abundances in meteoritic materials determined by neutron activation analysis

08 p1404 A69-20919

Chlorine as indicator of terrestrial contamination in iron meteorites, using neutron activation analysis and metallographic observation

08 p1405 A69-20923

Aluminum abundances in stony meteorites measured using nondestructive instrumental neutron activation analysis

11 p1952 A69-24334

Meteoritic trace elements with varying chemical and physical properties investigated for abundance by neutron activation technique

19 p3407 A69-36080

Ar 39-Ar 40 method using neutron activation and inert gas mass spectrometry to investigate meteoritic thermal histories

19 p3412 A69-36105

K and Ar 40 determination in iron meteorites by neutron activation for K/Ar dating

19 p3412 A69-36106

Neutron activation method for Mn 53 in meteoritic Fe by X ray and gamma counters, noting extraction of Mn 54 free reference source

20 p3601 A69-37504

Neutron activation analysis for oxygen determination in Be by gamma emission intensity from nitrogen 16, noting bound oxygen

20 p3544 A69-37811

NEUTRON COUNTERS

Cosmic ray neutron integrated flux measurements up to 350 km for energies to 15 Mev, determining neutron leakage flux

01 p0146 A69-11223

Atmospheric temperature and water vapor variations and seasonal environmental changes effects on cosmic ray neutron and meson monitor counting rates

03 p0498 A69-12936

Barometric coefficients of multiplicities calculated using cosmic ray interactions model and neutron monitors response to secondary nucleons

03 p0425 A69-14025

Neutron counter for measurements of atmospheric and earth leakage flux of secondary cosmic ray neutrons, discussing design and calibration

07 p1209 A69-19454

Ground level solar proton event recorded by neutron monitors

10 p1766 A69-23761

Forbush decrease associated with July 7 1966 proton event from cosmic ray intensity variation measurements by neutron monitors

10 p1768 A69-23774

Scintillation counter to determine neutrons number and distribution in time in pulses generated in hot plasma

14 p2452 A69-29809

Solar neutrons upper limits measured for 28 July 1967 importance 1 flares

18 p3187 A69-34959

OGO-F neutron monitor for measuring cosmic ray neutron flux near earth, locating sensor on boom to minimize spacecraft produced neutrons

19 p3314 A69-36678

Radiocarbon natural production by cosmic ray neutrons, utilizing proportional counters filled with N atmospheres

22 p4003 A69-40095

Errors due to neutron counter radioactivity in cosmic rays nucleon measurements analyzed in reducing readings to barometric pressure

23 p4206 A69-41855

NEUTRON CROSS SECTIONS

S-process nucleosynthesis and temperature averaged neutron capture cross sections studied in relation to solar system, considering elemental and specific isotopic abundances

08 p1357 A69-20896

Resonances and doublets observation by neutron radiative capture and transmission of W and Zr isotopes in kev region, noting partial wave strength functions

18 p3175 A69-34314

Group cross section generating techniques to calculate neutron capture rates and spatial capture distribution in depleted thick U slab, using GAROL program

18 p3177 A69-35179

Threshold photoneutron cross section for Mg 26, discussing resonances as primary production mechanism for stellar neutrons

21 p3788 A69-38599

Thermal neutron capture cross section at high temperature irradiations determined for W 184, describing radiochemical separation and flux counting techniques

24 p4315 A69-43192

NEUTRON DECAY

Magnetic field effect on neutron beta decay rate, considering calculations applicability to elementary particle production

15 p2690 A69-30694

Cosmic ray albedo neutron decay /CRAND/ source for trapped protons, showing disagreement with intensities in inner zone measured on OVI 2 spacecraft

22 p4005 A69-40512

NEUTRON DIFFRACTION

Long range order formation in Ni-Cr alloys analyzed by direct neutron diffraction, considering disorder-order transition temperature and chemical composition

10 p1714 A69-23964

Nondestructive detection of titanium hydride formation in threaded joints of Ti alloy pressurization tanks by neutron radiography

24 p4320 A69-42998

NEUTRON DISTRIBUTION

Fast and slow neutron latitude variation at aircraft altitudes during solar minimum, noting environment effects on measurement

09 p1574 A69-21402

Kinetic equation solved for radiation propagation in atmosphere, considering neutron density variations and spatial distribution

12 p2149 A69-26683

Scintillation counter to determine neutrons number and distribution in time in pulses generated in hot plasma

14 p2452 A69-29809

Fissioning plasma generated in shock tube with 235 uranium hexafluoride gas, selecting tube diameter, reflector depth and initial gas density for specific neutron multiplication

18 p3180 A69-34455

Group cross section generating techniques to calculate neutron capture rates and spatial capture distribution in depleted thick U slab, using GAROL program

18 p3177 A69-35179

Franco-Soviet rocket probe launchings for measuring daytime/nighttime ions and neutrons

18 p3210 A69-35282

Sayan Sun Observatory experimental equipment, discussing instruments for solar observation, earth currents measurement and cosmic ray neutron components recording

22 p3943 A69-39997

NEUTRON EMISSION

Thermonuclear neutron emission from high temperature deuterium plasma produced by focusing high power laser radiation on lithium deuteride surface [IEEE PAPER O-11]

07 p1153 A69-19072

Neutron emission anisotropies in capacitor discharge produced plasma focus, detailing coaxial plasma gun energy spectrum and flux measurement

11 p1930 A69-25321

Solar cosmic ray flare of 28 January 1967 observed by neutron monitors, determining emission and particle spectrum at atmosphere boundary

14 p2513 A69-29066

Plasma ion temperature measurement based on integral neutron yield, noting density determination

14 p2498 A69-29808

Monte Carlo method application to neutron streaming in hemispherical air-filled ducts in water tank to determine leakage through nuclear reactor shields

18 p3171 A69-35178

Threshold photoneutron cross section for Mg 26, discussing resonances as primary production mechanism for stellar neutrons

21 p3788 A69-38599

Solar flare optical, neutron and gamma emission, discussing ionization losses and nuclear interaction of accelerated particles in flares

22 p4003 A69-40296

NEUTRON FLUX

U FLUX [RATE]

NEUTRON FLUX DENSITY

Cosmic ray neutron integrated flux measurements up to 350 km for energies to 15 Mev, determining neutron leakage flux

01 p0146 A69-11223

Fast neutron fluxes at various atmospheric levels and geomagnetic northern midlatitudes measured by proportional counters using boron trifluoride

03 p0501 A69-13528

High energy proton and neutron fluxes and spectra from nuclear emulsion stacks on Cosmos satellites, calculating cosmic radiation doses

05 p0814 A69-16051

Neutron counter for measurements of atmospheric and earth leakage flux of secondary cosmic ray neutrons, discussing design and calibration

07 p1209 A69-19454

Energy density of neutron star matter from Brueckner theory calculations of nuclear matter and pure neutron gas, determining proton relative density

08 p1381 A69-19785

Fast and slow neutron latitude variation at aircraft altitudes during solar minimum, noting environment effects on measurement

09 p1574 A69-21402

Solar neutron flux measurement at earth in energy region 20-120 Mev by detector in balloon flight

11 p1945 A69-24421

Postirradiation investigation of uranium dioxide fuelled thermionic emitters by evaluating released fission gases, noting different neutron fluxes metallurgical effects

14 p2481 A69-29200

Fast atmospheric neutrons flux and spectrum measurement during two balloon flights, tabulating results and evaluating albedo flux during quiet sun period

16 p2851 A69-32616

Boron 10 absorption cross sections from counting rates measurements of boron trifluoride proportional counter used to monitor neutron fluxes

17 p3008 A69-33753

Solar neutrons upper limits measured for 28 July 1967 importance I flares

18 p3187 A69-34959

OGO-F neutron monitor for measuring cosmic ray neutron flux near earth, locating sensor on boom to minimize spacecraft produced neutrons

19 p3314 A69-36678

High energy proton and neutron fluxes and spectra from nuclear emulsion stacks on Cosmos satellites, calculating cosmic radiation doses

20 p3591 A69-37961

Thermal neutron flux perturbations in cylinders in test reactors, using regression analysis to obtain polynomials for flux perturbation, depression, self shielding factors, etc

20 p3575 A69-38274

Diurnal variations of cosmic ray neutrons corrected for barometric and temperature effects by harmonic analysis

21 p3791 A69-38840

Cosmic ray neutron studies of atmospheric nucleon component equilibrium and flux fluctuations at atmosphere top

22 p4002 A69-40092

Environmental neutron flux measured by various techniques, studying effects of soil and moisture on density

22 p4002 A69-40094

Neutron flux measurements on Cosmos 53, discussing equipment and calculation of secondary neutrons due to bombardment of satellite components

22 p4003 A69-40274

Thermal neutron capture cross section at high temperature irradiations determined for W 184, describing radiochemical separation and flux counting techniques

24 p4315 A69-43192

NEUTRON IRRADIATION

Irradiation influence on chromium transition temperature explained by defect clusters and embrittling impurity redistribution

01 p0095 A69-10604

Neutron and gamma irradiation effects on CdS crystals structure and properties, outlining electron energy level scheme

02 p0298 A69-12119

Isochronic annealing effect on coercive force of Mo Permalloy samples bombarded with neutrons in nuclear reactor

05 p0783 A69-16815

Carrier scattering from defects in neutron irradiated semiconductors, noting mobility and relaxation time

06 p0974 A69-16864

Neutron irradiation produced defects in p-type Si at 76 K, measuring Hall effect and electrical conductivity

06 p0975 A69-16868

Majority and minority carrier trapping in neutron irradiated Si diodes, measuring transient junction capacitance recovery

06 p0975 A69-16869

Rapid annealing data for silicon transistors after reactor neutron pulse, deriving equation for defect recombination in cluster and subsequent diffusion outside cluster

06 p0975 A69-16870

Recombination statistical model for neutron irradiated Si transistors, considering diffusion potential, junction voltage, temperature, activation energy and capture ratio for holes and electrons

06 p0975 A69-16871

Neutron irradiated Si transistors radiation and annealing characteristics determined for inverse configuration

06 p0975 A69-16872

Thermal time constant in Si diffused transistors decreases with increased neutron dosage

06 p0975 A69-16873

Nearly abrupt X band Si avalanche IMPATT diodes irradiated by fast neutrons, noting effects on DC and microwave characteristics

06 p0976 A69-16874

Neutron radiation effects on MOSFET, presenting model for neutron produced ionization in oxide layer

06 p0976 A69-16875

Combined neutron degradation and gamma induced effects on closed loop system simulated by SECURE program

06 p0899 A69-16889

Neutron and X ray radiation effects upon gallium arsenide devices including Gunn oscillators, transistors, Schottky barrier diodes and optoelectronic pulse amplifiers

06 p0978 A69-16890

Instrumentation design problems connected with NERVA, considering high gamma and neutron radiations and temperature environments [IEEE PAPER 2D-5]

07 p1134 A69-19189

Dislocation channeling process in polycrystalline Nb subject to tensile deformation after neutron irradiation

09 p1521 A69-21345

Ionization and recombination processes in He 3 plasmas produced by neutron irradiation of H 3

10 p1738 A69-23488

Diffusion processes during annealing of metals irradiated by electrons and neutrons, discussing crystal damage, recovery and recrystallization

11 p1891 A69-24800

Compact device for low temperature neutron irradiation of deformed specimens under tensile stress, emphasizing specimen carrier

11 p1862 A69-24901

Neutron irradiation and temperature effects on ferrite and Permalloy memory cores hysteresis loops

12 p2142 A69-26259

Neutron irradiated Nb single crystals tensile tested over temperature range, discussing athermal radiation hardening

13 p2275 A69-27368

Critical parameters of isothermal quasi-degenerate white dwarfs calculated by energy method, allowing for relativity theory error and neutron irradiation effect

13 p2351 A69-27871

Forward current decrease in Si mesa diodes under fast neutron irradiation ascribed to increase in base resistance

13 p2236 A69-28549

Neutron irradiation effect on efficiency and other parameters of IMPATT diode

14 p2423 A69-29761

Slow neutrons irradiation compensated high resistivity p-InSb current instability

15 p2666 A69-30058

Neutron bombardment and ionizing radiation resistance of aluminum oxide MOS devices using gate insulator fabricated by plasma anodization

17 p2935 A69-32888

Fast neutron irradiation effect on niobium nitride current carrying capacity, showing enhancement

17 p3008 A69-33765

Radiation resistant devices for minimizing neutron and gamma radiation effects on military electronic components, discussing selection features and sampling lot sizes

18 p3144 A69-34491

Solar cells designed to survive exposure to fission/fusion neutrons and electromagnetic spectrum products of nuclear weapon detonation

19 p3251 A69-35689

Photoresponse and minority carrier diffusion length long term stability of Li doped solar cells after proton, neutron and electron irradiation

19 p3252 A69-35697

Injection level effects on minority carrier lifetimes in lithium-doped devices and solar cells irradiated by electrons and reactor neutrons

19 p3252 A69-35698

Meteorite Li isotopic composition variations to determine neutron role in nucleosynthesis of solar system light elements

19 p3408 A69-36084

Supralethal doses of pulsed mixed gamma-neutron radiations from TRIGA reactor administered to unshielded, head shielded and trunk shielded beagles

19 p3259 A69-36459

RBE of fast neutrons on mice, rats and guinea pigs, discussing suppression of mitosis in isolated cells

20 p3478 A69-37629

Fast neutron irradiation effect in Ge crystals, using X ray diffraction and volumetric measurements

20 p3584 A69-38125

Structural defects of neutron irradiated W wire noting microstress relaxation using autoionic microscope

21 p3749 A69-39623

Radioactive decay and conductivity changes with time in high and low resistivity CdS single crystals after irradiation with 14 Mev and reactor fast neutrons

22 p3993 A69-40728

Hemoglobin inhomogeneity in rats irradiated with lethal doses of X rays and fast neutrons, using fractions prepared by column chromatography

22 p3888 A69-41274

Radiation hardened microcircuits and transistors for protection against transient radiation released by nuclear weapons

23 p4135 A69-41528

Fast neutron irradiation effect on IR absorption in single crystal GaAs for various fluences
23 p4198 A69-41540

Plane strain fracture toughness of S-200 grade Be for 77-533 K temperature range, noting effects of loading, heat treatment and neutron irradiation
23 p4178 A69-42450

NEUTRON SCATTERING

High energy neutron transport calculated using one dimensional discrete ordinates code with anisotropic scattering, comparing results with nucleon transport code calculations
14 p2481 A69-29592

Computer codes describing nuclear weapons effects associated with X ray transport, neutron transport and X ray interactions with material, fireball, blast environments, etc
15 p2652 A69-30381

NEUTRON SOURCES

Whirling liquid hydrogen layer thermal and hydrodynamical conditions, noting application to cold neutrons source in high flux beam reactor
05 p0849 A69-16818

NEUTRON SPECTRA

Slow atmospheric neutron energy spectrum determined by resonance detectors and λ/ν detectors, measuring cadmium ratio dependence on longitude and latitude
10 p1758 A69-22831

Solar neutron flux measurement at earth in energy region 20-120 Mev by detector in balloon flight
11 p1945 A69-24421

Solar cosmic rays diffusion enclosure in interplanetary space magnetic boundary suggested from balloon, satellite and ground observations of solar flare neutron component
14 p2513 A69-29067

Fast atmospheric neutrons flux and spectrum measurement during two balloon flights, tabulating results and evaluating albedo flux during quiet sun period
16 p2851 A69-32616

Fast neutron spectrum for subcritical section of homogeneous U 235-polyethylene thermionic critical assembly measured by pulsed source time-of-flight method
18 p3170 A69-34313

Neutrons energy spectrum at sea level calculated and proved consistent with satellite cosmic ray data
23 p4205 A69-41701

NEUTRON STARS

Pulsar discovery at position of suspected supernova remnant, suggesting pulsars as rotating neutron stars formed in stellar explosion
01 p0149 A69-10268

Pulsars features explained by model based on binary system of neutron stars, discussing associated stellar plasmas as directional HF radio wave source
01 p0156 A69-10981

Gas accretion on neutron star surface as energy source for X ray radiation
05 p0814 A69-15847

Spinning neutron star model for pulsars based on slowing down of pulse rate, proposing emission mechanism for radio energy and relativistic gas
05 p0825 A69-16351

Pulsar model based on rapidly rotating neutron star with radiating attached plasma, discussing test of radiation mechanism by means of coherence of emission
06 p1012 A69-18226

Superdense matter possibly present in neutron stars, discussing relation with Einstein theory and nuclear physics
06 p1012 A69-18240

Energy density of neutron star matter from Brueckner theory calculations of nuclear matter and pure neutron gas, determining proton relative density
08 p1381 A69-19785

Pulsar emission possible connection with rotating neutron stars, discussing rotational energy transfer to circumstellar plasma and production of periodic shock waves
08 p1383 A69-19895

Rotating and oscillating magnetic neutron stars causing pulsars radio and optical signals, stressing UV line emissions theory
08 p1394 A69-20624

Radio emission from magnetic neutron stars as possible model for pulsars, noting optical and IR emission bands
08 p1397 A69-20729

Instability of stellar structures intermediate between white dwarfs and neutron stars shown by stellar models, discussing pulsar signals periodicities
08 p1397 A69-20770

Rotational energy conversion of neutron star into relativistic electrons energy suggested by increasing period of pulsating radio source in Crab Nebula
09 p1591 A69-21454

Pulsars rotating neutron star model analyzed on basis of magnetic dipole rotating in vacuo
09 p1592 A69-21463

X ray universe, considering contribution of X ray astronomy to phenomena of big bang, supernovae, neutron stars, exploding galaxies, etc
10 p1760 A69-22869

Ferromagnetic transition in superdense nuclear matter and neutron stars, developing relativistic equation of state
11 p1965 A69-25564

Magnetic models of pulsars and rotating neutron stars to explain narrowness of radiation beam in polar diagram
12 p2172 A69-27168

Gravitational parameters of highly condensed objects, considering white dwarf evolutionary stages, density and upper mass limit
13 p2334 A69-27190

Superdense stars energy yield from neutrino emission, assuming incomplete degeneration of elementary particle Fermi gas
13 p2336 A69-27435

Pulsars and neutron star formation based on stellar evolution theory, suggesting massive O stars as origin
13 p2337 A69-27517

Pulsars suggested as magnetic rotating neutron stars with unstable oscillations
13 p2352 A69-27912

Neutron star atmosphere and X ray emission spectrum, computing incident protons mean free path for two assumptions
15 p2686 A69-30535

Pulsar clock mechanisms on basis of relativistic gravitational effects, considering white dwarfs and neutron stars
15 p2694 A69-30855

Energy release efficiency in gravitational collapse, estimating rest energy fraction from energy conservation, neutron star stability and spherically symmetrical systems collapse considerations
16 p2853 A69-31594

Superfluidity and superconductivity under cosmic conditions, discussing Bose-Einstein condensation, Fermi particles, boson systems, neutron stars, etc
16 p2853 A69-31595

Pulsars properties, nature and utilization for interstellar medium study including radiation mechanisms, white dwarf stars and neutron star development
16 p2855 A69-31762

Superfluidity and superconductivity under cosmic conditions, discussing Bose-Einstein condensation, neutron stars, white dwarfs, etc
16 p2856 A69-31950

Spin down effects on neutron stars, discussing decrease of period of PSR 0833-45 as result of differential rotation instability
16 p2865 A69-32803

Superdense stars torsional oscillations and crystallization among nuclei from comparison with melting temperature and transverse shear wave velocities of dense conventional matter
17 p3037 A69-33643

Pulsars properties and distribution in galactic coordinates, deriving interstellar medium properties and physical nature of objects based on neutron star rotation
17 p3040 A69-33800

Models for pulsars periodicity and period range due to nonradial gravity wave in almost adiabatic matter of degenerate neutron stars
18 p3196 A69-34645

Pulsars cosmic ray mass and charge spectra analyzed for evidence of neutron star origin
20 p3588 A69-37487

Radial pulsations of neutron star losing mass, interpreting Crab Nebula pulsar observed period and secular increase of period
20 p3604 A69-37573

Rotating neutron star model to fit pulsar data, considering star crust formation and properties, angular velocity changes and starquake effects
21 p3798 A69-38544

Normal radial vibrations in Newtonian and general relativistic stellar objects and dynamic instability, determining modes and natural frequencies
22 p4014 A69-40142

Rotating neutron stars with magnetic fields symmetric about rotation axis considered for pulsar model
22 p4027 A69-40657

Complex phenomena in theoretical astronomy including neutrino pair emission in stellar interiors, molecular H in interstellar gas, neutron stars, etc
23 p4217 A69-42316

Pulsars models and radiation mechanism, noting neutron stars with rotating magnetospheres
23 p4218 A69-42326

Neutron star formation, discussing influence of supernova explosions and need of pulsar study
23 p4222 A69-42393

Crab Nebula pulsars radio properties, possible neutron star origin, interstellar gas and magnetic fields, etc
24 p4375 A69-42556

Pulsar model with seat as rotating neutron star having dipolar magnetic field not parallel to rotation axis
24 p4377 A69-42666

Rotating neutron stars, pulsars and cosmic X ray sources, accounting for large and small diameter sources by rotating neutron star losing mass in magnetic field
24 p4369 A69-43222

NEUTRON THERMALIZATION

Thermal-neutron flux generated by high energy protons in water moderator surrounding thick targets calculated as function of position
02 p0279 A69-11837

NEUTRON TRANSMUTATION

U NUCLEAR REACTIONS

NEUTRONS

NT COLD NEUTRONS
NT FAST NEUTRONS
NT PHOTONEUTRONS
NT THERMAL NEUTRONS

Amplitude and phase of cosmic ray meson diurnal variation, noting less variation in neutron diurnal variation
04 p0648 A69-14374

Solar neutron production and propagation to earth, discussing particle detectors
06 p0989 A69-17281

Multiplicity of secondary neutrons counted by IGY neutron monitor detecting cosmic radiation
06 p0925 A69-17297

Lunar photon leakage spectrum due to photons from capture and inelastic scattering of neutrons by galactic cosmic rays
09 p1597 A69-22088

Asymmetrical solar wind volume variations of magnetic inhomogeneities and cosmic ray absorption in earth atmosphere, including barometric coefficients of neutron component
10 p1760 A69-22844

Neutron radiography facility for production non-destructive testing inspection of aerospace components, noting collimation, neutron/gamma ray ratio optimization and neutron source
[AGN-TP-229] 10 p1699 A69-23051

Neutrons overloaded nuclei role studied for neutronization of matter at high densities in statistical equilibrium with respect to nuclear reactions
11 p1957 A69-24404

Neutron production cross sections prediction at proton bombarding energies below 50 Mev and above threshold for multiple nucleon emission
12 p2192 A69-26299

Tritium contamination reduction in small ion accelerators for neutron production, discussing pumping problems and vacuum systems
12 p2059 A69-26499

Similarity method applied to linear integrodifferential equations of neutron transport in homogeneous space
19 p3361 A69-36774

Neutrons overloaded nuclei role studied for neutronization of matter at high densities in statistical equilibrium with respect to nuclear reactions
24 p4391 A69-43794

NEW JERSEY

Redevelopment program for Newark airport noting runway construction, underground fuel system and passenger terminal complex
01 p0057 A69-11275

NEW MEXICO

White Sands Missile Range space and missile test facilities and support facilities for space exploration
02 p0227 A69-11761

Lower thermosphere composition over New Mexico, discussing rocket flight mass spectrometer measurements during summer 1967
03 p0425 A69-14009

NEW YORK

Shuttle VTOL airport access system analysis for New York area
[AIAA PAPER 69-804] 19 p3288 A69-35592

STOLport policy for New York City including travel time analysis, ground transport systems, political and community acceptance, aircraft noise, etc.
[RAES PAPER 3] 22 p3927 A69-40484

NEWTON PRESSURE LAW

Axisymmetric bodies longitudinal contours for hypersonic flow minimum drag, considering Newtonian pressure distribution and skin friction
10 p1632 A69-23886

NEWTON-RAPHSON METHOD

Multilevel optimization techniques for dynamic systems control evaluated, developing second level Newton-Raphson controller
01 p0051 A69-10440

Convergence theorems for perturbed Newton methods for solution of nonlinear equation systems, suggesting algorithm holding Jacobian matrix elements constant during iterations
01 p0106 A69-10988

Lambert problem of fitting conic to two position vectors with specified time interval solved numerically by Newton-Raphson iteration
03 p0518 A69-14250

Shallow shell deformations based on nonlinear equations solved by Newton-Raphson iteration
04 p0674 A69-14591

Newton-Raphson technique development for determining stability derivatives from flight data, noting use of a priori wind tunnel information
[AIAA PAPER 69-315] 09 p1434 A69-22379

One parameter operator imbedding to modify Newton method for solution of nonlinear equations
10 p1719 A69-23519

Finite difference Newton-Raphson algorithm extension to solve variational equations for simultaneous optimization of trajectories and associated parameters
[AIAA PAPER 68-115] 13 p2353 A69-28203

Modified Newton-Raphson methods for preliminary orbit determination, showing fast convergence and short computation times
19 p3397 A69-35613

Newton-Raphson function space algorithm for optimizing control systems with discontinuities and terminal constraints, discussing spacecraft examples
22 p3918 A69-41009

Newton method providing continuing solutions of nonlinear differential equations through limit or bifurcation points, discussing elastic stability applications
[ASME PAPER 69-APMW-14] 24 p4401 A69-43102

Optimal control for systems with discontinuities and terminal constraints using Newton-Raphson algorithm/successive sweep method/
24 p4294 A69-43306

NEWTON THEORY

Gravitation theory similar to special relativity and Newtonian theories, noting gravitational potential, metric and Newtonian charts
01 p0115 A69-10340

Newtonian theory of rotating configurations, noting use of algebraic equations
05 p0826 A69-16427

Special and general relativity theories following Newtonian mechanics and gravitation theories, discussing metric tensor, sun oblateness and experiments with gyroscope spin axis precession
07 p1181 A69-18928

Isotropic Newtonian cosmological models symmetry shown to have velocity distribution obtainable from solution of Vlasov equation
08 p1386 A69-20073

Hydrodynamic equations and conservation laws for nonviscous fluid in postNewtonian approximation of Brans-Dicke theory applied to gaseous mass dynamic instability
10 p1789 A69-24130

Test particle classical dynamics in closed expanding universe, discussing Newtonian inertial mass decrease and canonical methods for determining momentum, velocity and energy
11 p1920 A69-25561

Linear automatic control optimization by modified Newton method for determining real function zero value of real argument
13 p2239 A69-28436

Increases of Newtonian potential, gradient and second derivative on gravitating body, considering positive and negative masses
13 p2300 A69-28545

Electrodynamic law between current elements consistent with Newtonian dynamics, noting consequences in discharge and plasma control
14 p2485 A69-29320

Galactic formation in Lemaitre universe from statistically probable density fluctuations, using perturbation theory and Newtonian cosmology
14 p2520 A69-29373

Inertial and gravitational mass equality reexamined, considering Galileo, Newton and Eotvos experiments
14 p2486 A69-29647

Small perturbations propagation in plasma at Newtonian acoustic velocity, determining temperature, pressure and current densities
15 p2663 A69-30993

Discrepancy between Kepler first two laws and corresponding Newton propositions, noting necessary substitution of ovals for elliptical orbits
15 p2695 A69-31011

Newtonian invariant mechanics, giving inertial interpretation of gravitation and Hubble expansion of universe
15 p2654 A69-31214

Generalized Newtonian theory of gravitation, stressing internal solutions of gravitational field equations and incompressible fluid configuration in state of equilibrium
16 p2865 A69-32599

Steady motion stability of satellite gyroscope in Cardan suspension traveling along circular orbit in Newtonian central force field
18 p3135 A69-34585

Hard cosmic radiation hypothesis for Newton gravitation law for neighboring bodies, obtaining gravitational energy quanta and propagation velocity relationship
18 p3172 A69-34627

Hydrogen atom excess charge creating universal repulsive force in analyzing cosmological gravitational contraction in terms of Newtonian mechanics
18 p3206 A69-35469

Translating Tolman problem of cosmic dust motion into centrally symmetrical reading system, showing relativistic and Newtonian motion laws coincidence
20 p3594 A69-37079

Newtonian and general relativistic orbits of point mass in inverse square law force field, noting radar determination of spacecraft orbits
[AAS PAPER 68-098] 20 p3595 A69-37176

Hydrostatic instability in high temperature stars in postNewtonian approximation
20 p3580 A69-37926

Five dimensional theory applied to Einstein generalized gravity equations for spherically symmetrical gravitational waves, yielding gravity constant variation from Newton approximation
21 p3802 A69-38842

Statistical analysis of galactic structures subject to Newton gravitation covering globular clusters and spiral disk and rotating bar galaxies
21 p3803 A69-38924

Normal radial vibrations in Newtonian and general relativistic stellar objects and dynamic instability, determining modes and natural frequencies
22 p4014 A69-40142

NEWTONIAN FLUIDS

Laminar flow of anisotropic Ericksen fluid near wall at large Reynolds numbers, discussing Newtonian behavior, viscosity coefficient and particle orientation
02 p0231 A69-12141

Lift and drag parameters of axisymmetric bodies in Newtonian flow at random incidence by summation of appropriate portions
04 p0542 A69-14745

Velocity and temperature fields in Newtonian fluid in motion past stationary obstacle in gravitational field, noting similarity parameters reduction
09 p1429 A69-21686

Incompressible Newtonian flow between two parallel planes, noting marginal stability condition, mean velocity profile and turbulence
10 p1678 A69-22909

Numerical solutions for incompressible Newtonian flow around circular cylinder for various Reynolds numbers
11 p1867 A69-24279

Laminar Newtonian flow heat transfer to fluids with variable physical properties in vertical tubes with constant wall heat flux, considering viscosity and density
11 p2000 A69-25164

Analog problem solution for semiinfinite medium with Newtonian cooling at boundary, noting first term of asymptotic expansion in heat conduction equation
22 p4052 A69-41126

NICHROME [TRADEMARK]

Nichrome bars production dispersion hardened by alumina and zirconia inclusions, noting extrusion temperature influence
01 p0085 A69-10397

NICKEL

Saturation solubility of carbon in cobalt and nickel with respect to graphite determined by vapor transport experiments over large temperature range
01 p0092 A69-10066

Electroless deposition of various metals with emphasis on nickel, discussing mechanism, plating solutions, substrates, deposit properties and applications
01 p0099 A69-11066

Angular correlation between inelastically scattered 42 Mev alpha particles and emitted gammas from 2-plus Ni 58
03 p0470 A69-13100

Dispersed hard particles effect on high strain fatigue behavior of nickel at room temperature
03 p0443 A69-13121

Recovery behavior of nickel strain hardened by impact loading by aluminum projectiles, showing microstructure correlation with stress levels
03 p0447 A69-13620

Nickel reinforced with mullite whiskers produced by hot pressing
05 p0782 A69-16794

Nickel structure alterations during interaction with high speed air flow at elevated temperatures
05 p0783 A69-16812

Interaction of nitrogen oxides and carbon dioxide on nickel crystal surface using low energy electron diffraction and mass spectrometer, discussing work function
08 p1268 A69-20138

Nodal precipitation and cellular solidification substructure in commercial purity nickel, discussing supercooling, NiO and eutectic composition
08 p1332 A69-20289

Tensile and creep behavior of nickel at 600 C after oxidation at 1200 C, correlating results with structural differences caused by oxidation
08 p1333 A69-20556

Physical properties control in nickel powders obtained by hydrogen reduction of nickel diamine sulphate solutions
08 p1334 A69-21057

Temperature dependence of conductivity and Hall constant of GaAs single crystals with nickel impurity, noting diode structure and I-V curve shapes
09 p1555 A69-21475

Metal composites of Ni or Mo fibers in Be matrix, discussing chemical compatibility in terms of reactions, solid solubility and diffusion at various temperatures
10 p1707 A69-22991

Existing predictive methods for determining high temperature low cycle fatigue life reexamination based on experiments on nickel
10 p1796 A69-23068

Molybdenum fiber sintering activation by adding nickel, noting decrease in impact viscosity
10 p1711 A69-23336

Peaked electron emission from nickel surface with large work function under laser radiation, discussing emission pulses, electron currents and surface temperature time variations
10 p1703 A69-23572

Diffusion constant of Ni in Ti alloys with Al, Mo and Nb, considering beta phase
11 p1902 A69-24274

Molybdenum additive role in deformed carbonylic nickel recrystallization process
12 p2114 A69-26454

Tishomingo iron metcorite metallography, noting nickel content and martensitic microstructure evolution
13 p2353 A69-28159

Shock hardening in Ni at high pressure observed by electron microscopy showing dominating thermal effects on microstructure
15 p2637 A69-30225

Temperature effects on magnetomechanical damping in Fe, Ni and mumetal, noting behavior difference due to domain structures
15 p2639 A69-30586

X pocket Fermi surface of ferromagnetic Ni, considering magnetic breakdown effects
15 p2668 A69-30687

Temperature dependence of conductivity and Hall constant of GaAs single crystals with nickel impurity, noting diode structure and I-V curve shapes
15 p2669 A69-30720

Boron effect on sintered porous Ni friction at high sliding velocities and temperatures, analyzing oxide film destruction restraint by decreased Ni plasticity
15 p2641 A69-31187

Materials integral hemispheric radiative capacity determination based on cooling rate of thin walled specimen in vacuum, considering stainless steel, Ni and Cu
18 p3156 A69-34698

Dislocation structure of pure polycrystalline nickel subjected to high temperature creep, using electron microscopy following cold working and room temperature annealing
18 p3157 A69-35254

Preprogrammed deformation temperature influence on Ni creep strength, emphasizing smoothly changing loads effects
18 p3160 A69-35455

High field susceptibility in Fe and Ni and high field Mossbauer study in Fe relating results to band structure and models of ferromagnetism
19 p3383 A69-36050

Dynamic recrystallization in Ni and Ni-Fe alloys during torsional high temperature deformation
19 p3344 A69-36147

Recrystallization in thoria dispersed Ni sheet as function of strain-anneal cycles, using electron transmission technique quantitative determination
20 p3557 A69-36958

Polycrystalline nickel foil microstructure after explosive shock loading and heat treatments, using transmission electron microscopy
20 p3563 A69-38126

Bright nickel plating, examining brighteners and antipitting additions effect on deposition mechanism
22 p3959 A69-41264

Creep strength as function of oxygen pressure for Ni at 510 and 600 C, dropping creep rupture life to plateau of nearly constant life
23 p4176 A69-41504

Active Ni centers properties in Si with emphasis on increasing and reducing minority carrier lifetime in silicon integrated circuits, discussing energy levels
24 p4360 A69-42759

Wear protection of pressure loaded Ti-Mn alloy by heat diffused lubricated electrodeless Ni coatings
24 p4331 A69-42786

NICKEL ALLOYS

NT HASTELLOY [TRADEMARK]
NT INCONEL [TRADEMARK]
NT KAMACITE
NT MANGANIN [TRADEMARK]
NT NICHROME [TRADEMARK]
NT WASPALOY

Irradiation influence on yield stress of Ni-Al intermetallics noting temperature dependence and electron dosage
01 p0095 A69-10608

Zirconium corner of Zr-Mo-Ni phase diagram using metallographic analysis, hardness and microhardness methods, constructing isothermal sections for high temperatures
02 p0264 A69-11855

Nickel-rich region of Al-Ni-Y ternary system, emphasizing identification of solid phase equilibria through analysis of equilibrated alloy specimens
02 p0265 A69-12004

Martensite transformation by simple shear in equiatomic Ni-Ti alloy, using transmission electron microscopy
02 p0265 A69-12024

Cooling rate effect during aging on heat resistance of forged blanks of nickel based chromium alloy
02 p0266 A69-12125

Structural influence on superconductivity of niobium-titanium alloys, using electron microscopy and measurements of current density vs magnetic field strength
02 p0269 A69-12763

Electron band structure of copper-nickel alloys, discussing thermoelectric properties, energy ranges and effect of alloying additions
02 p0301 A69-12765

Creep relaxation and kinking of aluminum-nickel whiskers at elevated temperature, noting permanent plastic deformation after heat treatment
03 p0443 A69-13119

Interfaces role in Ni-base superalloy, discussing grain boundaries and coherent/incoherent phase boundaries
03 p0449 A69-13878

Alloying elements effect on mechanical and refractory properties and structure of forging of age hardenable Ni base alloys
03 p0452 A69-14122

Nickel-cobalt fcc alloys rolling and recrystallization textures established with filtered Aco K-alpha radiation, considering stacking fault energy effects
04 p0615 A69-14643

Solid phase equilibria in nickel-aluminum-scandium system at 1000 C
05 p0779 A69-15833

Hot working temperature effects on Rene 63 mechanical properties and microstructures, using tensile and stress rupture tests, electron microscopy and X ray diffraction analysis
05 p0781 A69-16446

Long term creep behavior of nickel-chromium-molybdenum alloy, noting temperature effect on grain boundaries
05 p0781 A69-16500

Low carbon maraging steel, studying age hardening behavior of iron-manganese-nickel alloys with titanium additions
05 p0781 A69-16541

Sintered W-Ni-Fe alloys strength and precipitation hardening characteristics for various compositions and cooling conditions
05 p0782 A69-16798

Structural characteristics of Ni-Mo alloys analyzed using electron microscopy and X ray diffusion scattering
05 p0782 A69-16808

Dynamic measurements of modulus of elasticity for polycrystalline nickel-tungsten alloys at elevated temperatures
06 p0943 A69-17232

Microstructure of diffusion zone during contact fusion in magnesium-nickel system at high temperatures
06 p0945 A69-17895

Charge and degree of ionization of nickel alloyed with molybdenum analyzed by electrolytic ion migration method
07 p1159 A69-18535

Ductility as principal cause of postweld heat treated stress relaxation cracking in nickel based Waspaloy and alloy 718
08 p1318 A69-19964

Statistical techniques to develop nickel base superalloy with high temperature capabilities for jet engine turbine bucket applications
08 p1329 A69-20001

Electrical resistivity of commercial nickel base alloys containing iron, chromium and molybdenum, noting anomaly in 20 percent chromium alloy
08 p1329 A69-20003

Temperature dependence of single crystal elastic constants of nickel aluminide determined by ultrasonic wave propagation measurement
08 p1332 A69-20288

Hydrogen solubility in solid and liquid phases of nickel-molybdenum and nickel-tungsten alloys at high temperatures
08 p1333 A69-20448

Self diffusion coefficients measurements for cobalt in nickel-cobalt alloys, using cobalt radioisotope 60
08 p1334 A69-20577

Monograph on precipitation hardening and mechanical properties of various heat resistant alloys with Co contents to 35 percent
08 p1334 A69-20763

Crystal lattice and orientation of precipitate responsible for hardening water quenched Ni-Cr-Nb alloy
08 p1334 A69-20852

Heat resistant nickel alloys for castings, tabulating chemical composition, mechanical properties, heat treatment, weldability, etc
09 p1522 A69-21608

Heat resistant nickel alloys static and dynamic properties at high temperature, creep-fatigue interaction, etc
09 p1523 A69-21609

Alloying elements effects on structure, mechanical properties, aging and composition of precipitation hardening intermetallic phases in Ni and Fe based alloys
09 p1525 A69-22143

Joining methods for fabricating thoria dispersion strengthened nickel and nickel chromium materials
09 p1509 A69-22342

Nickel base superalloys for aircraft gas turbines, considering strengthening mechanisms for creep resistance [ASME PAPER 69-GT-7]
09 p1527 A69-22506

Nickel alloy high temperature tests, noting coagulation of precipitated gamma prime phase, vacancies and creep rate increase
09 p1528 A69-22733

Microstructure and crystallography of lamellar eutectic alloy of Ni and intermetallic Ni-Ti compound
10 p1707 A69-22986

Supersaturation of dissolved B in splat quenched Fe-Ni-B alloys, noting interstitial and substitutional B in martensitic and austenitic phases
10 p1707 A69-22987

Intermediate Ni-Nb intermetallic formation as decomposition product from supersaturated Ni rich Ni-Nb solid solution aged above room temperature
10 p1708 A69-22993

Substructural changes during fatigue due to stacking fault energy variations related to morphology of fracture surface in solid solution Ni-Co alloys
10 p1795 A69-23060

High temperature effect on fatigue deformation and fracture of nickel base superalloy in single crystal and columnar grained forms
10 p1709 A69-23073

Composition and sintering temperature cooling effects on fracture properties of W-Ni-Fe alloys, using electron microscope fractography
10 p1711 A69-23333

High temperature metallic material strengthening methods, noting metallurgical factors and temperature effects on mechanical properties
10 p1712 A69-23630

Initial aging stage in Fe-Ni-Ti alloys using diffuse X ray scattering with electron microscopy of thin foils
10 p1712 A69-23720

Long range order formation in Ni-Cr alloys analyzed by direct neutron diffraction, considering disorder-order transition temperature and chemical composition
10 p1714 A69-23964

Nickel base wrought and cast superalloys examined to determine minor phases and microstructure thermal stability in high temperature heat treated condition
10 p1714 A69-23977

Vacuum deposition of Cr-Al film on Ni-Mo alloys, describing operating pressure, temperature and film thickness
10 p1715 A69-24013

Vanadium side of V-Ni phase diagram, using X ray analysis, differential dilatometry, thermal analysis and metallographic methods
11 p1903 A69-24579

Molybdenum, titanium and cobalt effects on nickel maraging steel strength and ductility
11 p1904 A69-24643

Young modulus temperature dependence and order-disorder transformations in ternary nickel alloys
11 p1904 A69-24705

Order-disorder transformations in nickel alloys under loading operations
11 p1904 A69-24706

Weld cracking sensitivity of Inconel 713C investigated for determining aluminum content effect on weldability of nickel base heat resistant alloys
11 p1906 A69-25577

Ni-Ti alloy intergranular deformation at constant tension within wide temperature range
12 p2113 A69-26044

Reaction between nickel-base alloy and hydrogen sulphide at high temperatures under atmospheric pressure, discussing activation energy
12 p2115 A69-26617

Gamma prime phase coherent equilibrium solubilities in Ni alloys of Al, Si and Ti from magnetic studies of particle coarsening and electron metallographic observations
13 p2276 A69-27370

Structural features of Fe-Ni massive martensite observed by light, electron and hot stage microscopies showing parallel block packet
13 p2276 A69-27401

Crystal microstructure and mechanical properties of unidirectionally solidified Ni-Ni-Nb intermetallic eutectic alloy at high temperature, examining deformation and fracture modes
13 p2276 A69-27402

Nickel base superalloys long time carbide and intermetallic phases stability at high temperatures
13 p2277 A69-27405

Temperature effects on mechanical properties and fracture behavior of lamellar Ni-nickel titanide intermetallic eutectic alloy showing dependence on intermetallic constituent
13 p2277 A69-27406

Composition, gamma structure and mechanical properties of three unidirectionally solidified eutectics within Ni-Al-Cb, Ni-Al-Zr and Ni-Al-Ti systems
13 p2277 A69-27407

Quantitative separation of elements in gamma prime from precipitation hardened high temperature nickel-base alloys by anodic dissolution
13 p2277 A69-27408

Matrix grain size relation to dispersed particle size distribution and Zener-McLean equation description of microduplex structure in superplastic Ni-Fe-Cr alloy
13 p2278 A69-27411

Small strain plasticity theory for planar slip in specific nickel base alloy deformation
13 p2362 A69-28120

Metallographic study of microstructure recrystallization of 50 Ni-50 Fe alloy during annealing using special etchants and methods
13 p2281 A69-28155

Metallographic analysis techniques for high aluminum activity pack cementation coating on nickel-base alloy
13 p2282 A69-28163

Nital etchant and sodium bisulfite stain for morphology of quenched dilute alloy Fe-Ni martensite
13 p2282 A69-28166

Ni alloys phase precipitation and Fe substitution effects on heat resistant alloys
13 p2283 A69-28488

Tungsten alloy fiber reinforced nickel base alloy composites stress-rupture strength, oxidation and impact resistance for high temperature turbojet engine buckets
14 p2462 A69-29010

Thoria strengthened Ni-Cr alloys high temperature stability, noting thoria particle size influence
14 p2465 A69-29682

Crystal structures of Ni-rich rare earth/Ni phases, including high temperature forms
15 p2637 A69-30213

Sintered mixtures of Ni-Mo powder noting electrical resistance, alloy and shear strength and impact viscosity
15 p2638 A69-30280

Temperature effects on magnetomechanical damping in Fe, Ni and mumetal, noting behavior difference due to domain structures
15 p2639 A69-30586

Electrode potentials of pure metals, Ni-Cr and Ni base alloys in molten salts applied to corrosion studies
17 p2990 A69-33650

Polygonization and strengthening effects simultaneous action at grain boundaries increased thermal stability of thermomechanically treated Ni-Cr alloy
17 p2991 A69-33940

Cumulative rapid thermal cycling influence on progressive disappearance martensitic transformation in 18 percent nickel maraging steel
18 p3155 A69-34650

Nickel solid solutions strengthening under cold deformation studied by X ray, noting screw and edge dislocations role
18 p3157 A69-35246

Soviet collection of papers on strength and plasticity of Ni and Ti and alloys covering high temperature internal friction, deformation and creep characteristics
18 p3158 A69-35442

Annealing temperature effect on Ni-Ti alloys internal friction, noting peak connected with solid solution grain boundaries
18 p3158 A69-35443

Annealing time effects on creep properties of Ni at various temperatures after work hardening
18 p3159 A69-35445

Phase shape deformation and austenite stabilization in Fe-Ni and Fe-Ni-Ti alloys following secondary alpha phase of reversed martensite-austenite transformation
18 p3159 A69-35448

Metal purity effect of nickel and Ni-Mo alloy on nucleation and recrystallization nuclei growth following 80 percent plastic deformation
18 p3159 A69-35449

Mechanical properties associated with 55-Nitinol memory effect, presenting stress-strain and electrical resistivity as function of temperature
19 p3340 A69-35523

Tensile and stress rupture strengths of diffusion bonded Ni superalloys, using spin tests of simulated hollow turbine disks
19 p3320 A69-35559

Nickel base superalloy high temperature fatigue properties, comparing crack initiation and propagation in directionally solidified and conventionally cast forms
19 p3342 A69-35919

Ni-Cr alloy unidirectionally solidified, grain and eutectic structure and alloy strength
19 p3343 A69-35921

Stoichiometric NiAl slip line and dislocation structures during creep at high temperatures, considering possible creep mechanisms
19 p3343 A69-35923

Ni base superalloy stacking fault energy, studying effects of various solute additions
19 p3343 A69-35925

Dynamic recrystallization in Ni and Ni-Fe alloys during torsional high temperature deformation
19 p3344 A69-36147

Stress corrosion cracking of stainless steels and Inconel and Inconel alloys in chloride, caustic, oxygenated and miscellaneous environments
19 p3349 A69-36890

Tungsten influence on morphology and lattice parameter of fcc gamma prime phase in Ni-Cr-Ti-Al alloys
20 p3558 A69-36962

Elements substitution for Al in gamma prime of Ni-Al alloy to change aged hardness by gamma prime mismatch and coherency strains
20 p3558 A69-36963

Supersaturated solid solution decomposition in Ni-Cr-Ti system, discussing precipitation mechanism of eta phase
20 p3558 A69-36968

Smooth and notched tensile properties of Fe-Ni alloys in liquid Hg, discussing ductility and toughness
20 p3563 A69-38025

Repair welding methods for trailing edge cracks in nickel base superalloy used in turbine vanes, emphasizing plasma arc fusion welding
20 p3551 A69-38137

B fiber reinforced Ni failure characteristics at high temperature, discussing plastic deformation and matrix role in crack inhibition
21 p3743 A69-38616

Flow stress temperature dependence of Ni-Cr-Al alloys consisting of gamma prime dispersion in Ni base solid solution
21 p3744 A69-38738

Slip band etching procedure revealing Ni-base superalloy plastic deformation, accentuating slip bands and subgrain boundaries by electropolishing
21 p3744 A69-38741

Creep resistance increase of Ni refractory alloy by thermovibrational treatment under stress relaxation conditions
21 p3744 A69-38869

Powder metallurgy all inert processing method for producing nickel base superalloys forgings, discussing microstructure, reproducibility, mechanical properties, etc
21 p3745 A69-38929

Minor element effects on Ni alloy weldability - Conference, Houston, October 1967
22 p3966 A69-39878

Minor element influence on high temperature weldability of high Ni alloys and weld quality
22 p3967 A69-39879

C and B influence on heat affected zone hot cracking and postweld heat treatment on Ni base superalloys
22 p3967 A69-39880

Minor elements effect on weld-metal cracking resistance of wrought Ni-base heat resistant alloy by Circular Patch Test
22 p3967 A69-39882

Ti, Al, S and P influence on Ni alloys weldability, discussing chemical composition, susceptibility to hot cracking and ductility temperatures
22 p3967 A69-39884

Composition and thermal treatment effects on weldability of precipitation hardened Ni base alloy, analyzing heat affected zone cracking sensitivity
22 p3968 A69-39885

Burner rig hot corrosion test facility for evaluating Ni-Co alloys used in gas turbine engines operating in marine environment
22 p3928 A69-40673

Extrastrong maraging steel based on 18 percent Ni, noting alloying elements percentages, mechanical properties and applications
22 p3971 A69-40833

Al-Ni-Co alloys precipitation mechanism effect on magnetic properties, including heat treatment and Ti alloying effects
23 p4175 A69-41298

Ternary diffusion at high temperature in Fe-Co-Ni alloy system covering entire ternary phase diagram, including computed interdiffusion coefficients
23 p4176 A69-41505

Ni based superalloy mechanical properties, determining chromium carbide discontinuous precipitation effects at various temperatures
23 p4176 A69-41507

Ni-Nb alloys precipitates tetragonal structure as function of time and temperature using electron and X ray diffraction
24 p4331 A69-42903

NASA programs for development of high temperature alloys for advanced air breathing engines emphasizing cast Ni-base alloy
24 p4335 A69-43718

NICKEL CADMIUM BATTERIES

ESRO satellites power supply design, operation and characteristics
05 p0829 A69-15919

Nickel-cadmium and Ag-Cd storage batteries performance, discussing methods to lengthen battery life and improvement of characteristics
08 p1261 A69-21051

Rechargeable nickel cadmium batteries state of charge determination by monitoring capacitance
09 p1435 A69-21425

Design aspects and relation to optimum operation on overcharge in Ni-Cd cells
10 p1639 A69-23991

Sealed nickel-cadmium cell design optimization, evaluating effects of various electrochemical treatments on energy density of nickel oxide positive electrode
10 p1639 A69-23992

Signal electrode charge control of sealed Ni-Cd batteries, discussing signal voltage for overcharge control
10 p1640 A69-23993

Maintenance free high rate sealed Ni-Cd battery power system compatible with existing aircraft electrical systems
10 p1640 A69-23994

Power supplies for balloon-borne instruments, describing light flexible NiCd batteries and solar cells used in EOLE project
16 p2736 A69-31745

Ni-Cd and Ag-Cd storage batteries for space applications, discussing performance, life and reliability
16 p2740 A69-32422

Gamma radiation effects on behavior of nickel and cadmium electrodes in alkaline solution
20 p3466 A69-38072

Ceramic-sealed Ni-Cd secondary batteries space environmental behavior testing to determine heat dissipation during spaceborne operation
22 p3869 A69-40591

Aerospace NiCd batteries charge control, discussing depth of discharge, limiting voltage and environmental temperature interrelationship
23 p4071 A69-42282

Scaled Ni-Cd battery with bipolar construction to reduce internal resistance and increase power bursts capacity, emphasizing electrical characteristics and economic considerations
23 p4072 A69-42283

Space vehicle flight performance of Ni-Cd batteries noting reliability, consistency and predictability
23 p4072 A69-42285

NICKEL COMPOUNDS

NT COHENITE

NT SCHREIBERSITE

Cross slip model for work hardening of nickel aluminate crystals, discussing temperature dependence
05 p0779 A69-15760

Microstructure and crystallography of lamellar eutectic alloy of Ni and intermetallic Ni-Ti compound
10 p1707 A69-22986

Intermediate Ni-Nb intermetallic formation as decomposition product from supersaturated Ni rich Ni-Nb solid solution aged above room temperature
10 p1708 A69-22993

Monograph on vanadium selenides and tellurides with NiAs structure covering existence regions, superstructures and equiatomic compounds from viewpoint of thermodynamics
15 p2667 A69-30602

Synthetic ferrites and sulfides of Ni and Co sulfated in presence of molten sodium pyrosulfate and sodium bisulfate
16 p2747 A69-32567

Percorite phase in nickel analog of clinohrosyllite formed under hydrothermal conditions in Wolf Creek meteorite cracks
18 p3199 A69-34824

TiNi compound alloying with Al and Fe, considering effect on hot hardness at various temperatures
18 p3157 A69-35249

NICKEL FLUORIDES

Parametric excitation of spin waves during parallel pumping of rubidium nickel fluoride ferrite, relating relaxation time and temperature
21 p3781 A69-39069

NICKEL OXIDES

Aluminothermic reduction of Ti and Ni oxides for obtaining Ti-Ni-Al system
22 p3969 A69-40070

NICKEL PLATE

Ni plated 40-cm lightweight Al alloy telescope mirror, noting weldment stress relief by annealing
23 p4164 A69-41624

NICKEL STEELS

Kinetic features of martensitic transformation of nickel steels dependent on plastic deformation degree at 525 C
02 p0267 A69-12190

Fracture toughness of Ni maraging steel weldments, using bending tests
[AIAA PAPER 68-507]
03 p0450 A69-13910

Properties of Ni-Mo-Al age hardening steels, discussing data confirming validity of low carbon low aluminum approach
04 p0613 A69-14527

Nitrogen solubility measured in liquid Fe-Cr-Ni-Al alloys, noting solubility increase with increasing Al content
06 p0942 A69-17228

High strength 18 percent nickel maraging steel with 350 ksi yield strength
08 p1330 A69-20009

Monograph on effect of nitrogen on precipitation behavior of austenitic chromium-nickel steel covering carbides, intermetallics, phase transportations, corrosion resistance, etc
11 p1902 A69-24369

Molybdenum and vanadium effects on nickel steel properties, stressing brittleness avoidance and quenchability
11 p1904 A69-24642

Aging effects on hardness and tensile strength of nickel-chromium steels at various high temperatures and time periods
11 p1906 A69-25439

Highly alloyed steels weldability, considering nickel maraging and precipitation hardening stainless steels
12 p2111 A69-25829

Homogenization of martensite formation in nickel 300 grade maraging steel, analyzing anisotropic transformation strains during thermal cycling
13 p2278 A69-27410

Plastic deformation effects by hydrostatic fluid extrusion on mechanical properties of Ni maraging steels
13 p2278 A69-27414

Nickel maraging steel polarization behavior in acidic solutions, noting corrosion potential dependence on pH
13 p2282 A69-28188

Rolling direction tensile tests of alloy steel plate displaying various fracture configurations over distinct temperature ranges, noting stress state, void formation and anisotropy
[ASME PAPER 68-WA/MET-1]
14 p2464 A69-29440

Damping, fatigue and optimal heat treatment of Cr-Ni steel for compressor blades operating at temperatures up to 500 K
17 p2990 A69-33933

Nickel maraging steel weld metal impact strength and fracture toughness improved by heat treatment
18 p3151 A69-35430

Ni-Ti maraging steel hardness impact strength and thermal EMF changes during quenching
19 p3345 A69-36154

Cutting loads measured as function of cutting rate and cutting tool geometry during boring of Cr-Ni steel pipe blanks
21 p3731 A69-38878

Metallurgy and properties of quenched and tempered high strength Ni-Co steels, discussing welding and aerospace applications
23 p4175 A69-41299

NIGHT

Nighttime equatorial Pi 2 micropulsations, noting seasonal and diurnal distributions and dependence on three hour index of magnetic activity
07 p1125 A69-18841

Nighttime latitude variations in Danjon astrolabe observations at Poltava, noting decrease from early evening to midnight
17 p2959 A69-32870

Limb darkening on earth night side observed by Aerobee rocket, with explanation based on atmospheric opacity in water vapor and carbon dioxide bands
17 p2960 A69-33167

NIGHT AIRGLOW

U AIRGLOW

NIGHT E LAYER

U E REGION

U NIGHTGLOW

NIGHT F LAYER

U F REGION

NIGHT SKY

H alpha emission symmetrical spatial distribution of night airglow observed with high transmission diffraction spectrographs
01 p0062 A69-10128

Night ionosphere electron content changes in Southern Hemisphere, discussing diffusion from exosphere and corpuscular radiation as sources of ionization
01 p0063 A69-10423

Soviet rocket and satellite night, twilight, airglow and auroral studies, discussing day sky brightness, night airglow and atmospheric stratification
01 p0066 A69-10941

Nighttime sporadic E rocket measurements, discussing descending layer thickness and electron density and lower boundary
01 p0071 A69-11165

Ionic composition and temperature of nighttime topside ionosphere from analysis of incoherent backscatter spectra, discussing solar activity effects
01 p0076 A69-11233

Far IR rocket observations of night sky background radiation
01 p0121 A69-11249

Ion concentrations and temperature measurements by magnetic trap on Cosmos 5 between 1000-1200 km
02 p0306 A69-11656

Lower ionosphere vertical motions found responsible for nighttime variation of radio waves total field strength
02 p0207 A69-11689

Tropical night F layer maintenance mechanism, noting airglow enhancement and ionization source association with plasma drifts
02 p0242 A69-11825

Electron and positive ion density measurements during nighttime auroral absorption event
03 p0421 A69-13327

Geomagnetic field topology of nighttime magnetosphere, showing pi 2 pulsations excitation mechanism in terms of Alfvén waves resonance in external cavity
03 p0423 A69-13524

Midlatitude nighttime total ionospheric electron content during magnetically disturbed periods from geostationary satellites Canary Bird and ATS 3
03 p0426 A69-14030

Light polarization of night sky components scattered by troposphere
04 p0595 A69-15247

Reaction rates coefficients of oxygen ions with molecular oxygen and nitrogen in nighttime F region over Moscow based on loss coefficient estimate
06 p0919 A69-17724

Night sky surface brightness and polarization measurements as basis for zodiacal dust cloud particle density distribution normal to ecliptic plane
07 p1222 A69-19588

Cosmos 92 satellite observation of night airglow flare, discussing NO bands emission and origin
09 p1485 A69-21533

Regular disturbance in topside ionosphere on summer nights from continuous records of ionospheric electron content, discussing magnetic activity and sunspot number effects
09 p1489 A69-21703

Nighttime electric fields and vertical ionospheric drifts near magnetic equator concurrent measurements
09 p1489 A69-21705

Quasi-trapped particle currents having discontinuities on daytime and nighttime sides of earth
09 p1577 A69-21767

Nighttime ionospheric recombination studies by model reference heights varying diurnally, seasonally and with solar flux and geographic location
10 p1685 A69-23834

VHF radar observations of electron density irregularity in nighttime equatorial electrojet, comparing day and night time electron drift rates and directions
10 p1769 A69-23837

Aeronomical phenomena observed near Altair and theta Aquila ascribed to Apollo 8 lunar flight
11 p1957 A69-24411

Aerobee rocket-borne liquid helium cooled telescope for IR night sky observations
11 p1885 A69-24852

Nighttime distribution of nitrogen ion and lambda 5755 emission in ionosphere with incidence of aurora
12 p2066 A69-26110

H beta emission line in night sky spectrum measured with gas pressure scanned Fabry-Perot interferometer in Italian alps
12 p2074 A69-26963

NIGHT VISION

Night sky background observation by near IR radiation flux, using rocket-borne telescope and ground based equipment
13 p2342 A69-27600

Magnetospheric corpuscular fluxes night ionization role in E and D region, considering precipitation from outside, trapped and dumped particles of radiation belts
13 p2254 A69-28333

Ion concentrations and temperature measurements by magnetic trap on Cosmos 5 between 1000-1200 km
13 p2333 A69-28687

Lower ionosphere vertical motions found responsible for nighttime variation of radio waves total field strength
13 p2224 A69-28720

Night airglow variations observed during Cosmos 92 satellite orbits, determining atmospheric albedo wavelength dependence for solid and medium cloudiness and clear skies
14 p2435 A69-29042

Forbidden NI transitions in nighttime upper atmosphere observed with Fabry-Perot spectrometer
14 p2440 A69-29120

Nocturnal development of air mass stratus clouds in Texas and mechanism of formation, discussing turbulent mixing theory
15 p2649 A69-30893

Hydroxyl band contamination of emission and background radiation from night sky
16 p2774 A69-31987

Thermosphere neutral wind speed measured from observing Doppler shift in O I 6300 night airglow line with Fabry-perot interferometer
16 p2776 A69-32093

Portable photometer with red-sensitive photocathode and high SNR for O I 6300 airglow experiments
16 p2777 A69-32107

Night sky far IR observation by rocket-borne telescope, discussing minimum signal detection and origin
16 p2781 A69-32445

Cosmos 92 satellite observation of night airglow flare, discussing NO bands emission and origin
16 p2783 A69-32528

Atomic nitrogen and nitric oxide density in upper atmosphere during nighttime calculated, allowing for atomic and molecular diffusion
16 p2785 A69-32622

Faraday rotation measurements in ionosphere by geostationary satellite ATS-3 as evidence of considerable nighttime electron transport
17 p2959 A69-32926

Day sky brightness at altitude above 100 km obtained during rocket flight compared to night sky viewed from ground
17 p3037 A69-33664

Metagalactic light measurements by lunar based night sky photography
18 p3189 A69-34242

Radiative recombination of atomic oxygen ions in nighttime F region UV radiation detected by polar-orbiting OGO 4 satellite
18 p3129 A69-34957

Nighttime ionospheric F region velocity component and recombination coefficient computer calculation
20 p3521 A69-37049

Spectral intensity distribution of night airglow, noting visual spectra distribution difference from G2 stars
20 p3522 A69-37057

Residual nighttime radio wave absorption in ionosphere, noting absorption-magnetic activity relation existence
20 p3528 A69-37678

Nighttime F region nonlinear recombination and variable drift effects, suggesting empirical model
21 p3715 A69-38559

Nighttime atmospheric shape analysis created by lightning and propagating in earth lower ionosphere waveguide
22 p3941 A69-40961

Nighttime F region time-altitude variations in aeronomical parameters calculated under conditions close to solar activity maximum
23 p4156 A69-41844

NIGHT VISION

Xenon plasma continuous illumination sources design and operation for night and color aerial photography covering photogrammetric resource surveys, ground traffic, flight paths, etc
22 p3950 A69-41000

B-747 safety assurance program, discussing organization, management, hazard sources, accident statistics, night visual approach and maintainability
22 p3867 A69-41135

Night vision requirements of Vietnam combat pilots investigated for relationship to Skyraider fatal crash during target strafing and H-34 helicopter crash landing
23 p4107 A69-41807

NIGHTGLOW

Tropical 6300 angstrom red oxygen nightglow enhancements related to variations in height of nighttime F 2 layer, noting implications for layer structure and physics
01 p0068 A69-11113

Polarization of nightglow, line vs continuum
02 p0235 A69-11428

Rocket sounding for studying positive ions nighttime composition in E layer after magnetic storm at midlatitudes
02 p0239 A69-11686

Nighttime E layer mean variations noting critical frequencies, electron density and seasonal and solar activity effects at sunset, midnight and sunrise
03 p0398 A69-13899

Night airglow spectrum between four and four microns, noting sequence of hydroxyl bands
03 p0426 A69-14251

Attitude stabilized balloon telescope for measuring interplanetary scattered light and nightglow
06 p0999 A69-16972

Nightglow intensities correlated with atmospheric ozone concentration and stratospheric temperatures
07 p1123 A69-18675

Differential brightness of night airglow spectrum, obtaining rotational temperature by comparison with synthetic spectra
09 p1488 A69-21656

Nighttime Venus ionosphere models compared with Mariner 5 observations, discussing implications with regard to He and H abundance consequences and nightglow
09 p1594 A69-21695

Photoelectric measurements of nightglow intensities during sunspot minima by zenith photometer, considering background continuum
11 p1877 A69-24584

Nightglow intensity variations at sunspot minimum from measurements in South West Africa, considering relationship to ionospheric vertical movements and density variations
12 p2066 A69-26133

Magnetospheric corpuscular fluxes night ionization role in E and D region, considering precipitation from outside, trapped and dumped particles of radiation belts
13 p2254 A69-28333

Rocket sounding for studying positive ions nighttime composition in E layer after magnetic storm at midlatitudes
13 p2258 A69-28717

IQSY night airglow photometric observations, summarizing zenith intensity and north/south intensity ratio data
15 p2594 A69-30019

Hydrogen Lyman alpha nightglow models, discussing solar photon scattering in geocorona and hydrogen vertical distribution
15 p2595 A69-30191

Photometric observations of zodiacal light, noting dust in earth-moon environment
15 p2599 A69-31334

Sporadic E layer nighttime electron density profiles obtained by Langmuir probe equipped sounding rockets
15 p2603 A69-31398

Photoionizing effect of hydrogen and helium UV glow in nighttime ionosphere compared with ground based IF ionosonde and sounding rocket observations
15 p2605 A69-31436

Vertical wind effects in atmosphere on 5577 A radiance, showing dependence on atomic oxygen density
16 p2778 A69-32185

Relationship between sporadic E and 5577 A nightglow emission attributable to ionization redistribution in E region due to dynamic processes
16 p2788 A69-32782

Rocket photometer observations of midnight atomic oxygen glow at 6300 A during ascending and descending flights
21 p3703 A69-38360

Spectrum, latitude dependence and diurnal variation of night airglow emission, noting space and time correlation and magnetic activity relationship to luminous intensity
21 p3711 A69-38514

Nocturnal electron/ion density balance in F region ionosphere from examining 6300 A emission
21 p3712 A69-38518

N I nebular doublet and auroral and nebular lines of O I obtained with multifilter scanning photometer in France, Norway and at magnetic equator
21 p3712 A69-38519

Intensity changes of OI nightglow emission at 100 km by transport associated with tides, gravity waves and turbulent mixing
21 p3713 A69-38526

Far IR nightglow emission from atomic oxygen observed by rocket-borne liquid He-cooled telescope
22 p3940 A69-40521

Herzberg bands synthetic spectra matched to various spectrograms to determine vibrational populations of molecular O state in nightglow
24 p4310 A69-43186

NIMBUS PROJECT

NIMBUS program individual missions characteristics emphasizing NIMBUS 3 results and weather forecasting improvements
[AAS PAPER 69-421] 24 p4392 A69-42835

NIMBUS SATELLITES

Selective chopper radiometer for remote atmospheric temperature sounding, discussing satellite versions for Nimbus D and Nimbus E
[UN PAPER 68-95797] 01 p0080 A69-10531

IR spectrometer for Nimbus meteorological satellite for terrestrial spectral radiance data for atmospheric temperature profiles
06 p0926 A69-17621

Satellites in meteorological service, describing TOS, ESSA and Nimbus satellites operation methods
08 p1409 A69-19960

Nimbus D meteorological satellite construction, control system, orbit, etc
13 p2356 A69-27832

Regression generated radiometric and contour height fields of North American Continent using Nimbus 2 IR equivalent black body temperature and geopotential data
24 p4343 A69-42896

NIMBUS 3 SATELLITE

NIMBUS program individual missions characteristics emphasizing NIMBUS 3 results and weather forecasting improvements
[AAS PAPER 69-421] 24 p4392 A69-42835

NIMONIC ALLOYS

Ni-Cr-Ti-Al /Nimonic/ alloy single crystal mechanical properties at room temperature, determining importance of structure
02 p0268 A69-12192

Nimonic alloys high temperature annealing effect on dislocation structure stability created by thermochemical treatment, using transmission microscopy
04 p0615 A69-14636

Nimonic alloys recovery analyzed by X rays and electrolytic phase separation, showing precipitated gamma phase effect
07 p1159 A69-18533

Nimonic alloy single crystals strengthening during plastic deformation, analyzing jump phenomenon at high and low temperatures
12 p2112 A69-26038

Growth kinetics, lattice constant changes and hardness during aging of nimonic alloy from X ray diffraction diagrams
14 p2463 A69-29310

Preliminary plastic deformations effect on dispersion hardened nimonic-80 alloy creep properties
18 p3159 A69-35446

NIMPHE (ENGINE)

U HYDRAZINE ENGINES

NIOBATES

Ferroelectric strontium barium niobate as sensitive detector of single pulse IR radiation, noting application to Q switched carbon dioxide laser output
02 p0300 A69-12623

Ferroelectric domain structure to explain microcracks nucleated at twinband intersections in mechanically deformed lithium niobate
03 p0486 A69-13618

Longitudinal elastic wave damping, excitation and propagation in lithium niobate crystals at frequencies from 200 to 2000 MHz
03 p0487 A69-13729

Lithium niobate single crystals for holographic storage, noting use for optical information storage, processing and display devices
03 p0432 A69-14184

Electro-optic properties of tungsten-bronze niobate ferroelectric crystals
[IEEE PAPER F-7] 05 p0808 A69-16313

Emission of Nd giant pulse laser with high repetition rate and peak power to generate second harmonic radiation in lithium niobate single crystals
07 p1144 A69-18469

Li niobate crystal emission excited by Ar laser beam, deriving laser action formulas
08 p1323 A69-19941

Second harmonic generation conversion efficiencies at 5300 A with KDP and lithium niobate crystals, using Nd-glass laser of high radiance and narrow bandwidth
09 p1514 A69-21333

Nonlinear optical properties of barium sodium niobate in ferroelectric tetragonal phase above room temperature, noting spontaneous parametric emission
09 p1515 A69-21354

Ferroelectric Li niobate single crystals internal magnetic field analysis by acoustic EPR, establishing field induced hypersound resonance absorption in spin systems
09 p1556 A69-21563

Microwave frequency room temperature acoustic surface wave propagation losses in lithium niobate measured by laser light deflection, discussing propagation and insertion losses
10 p1703 A69-23511

Optical rectification effect in lithium metaniobate crystals under neodymium laser radiation, comparing results with data for potassium dihydrophosphate crystals
14 p2458 A69-29168

Noncollinear single cavity optical parametric oscillation with specified energy conversion using ruby laser-pumped lithium niobate, discussing tuning
14 p2460 A69-29605

Elastic microwaves propagation attenuation along lithium niobate crystals trigonal axis at various temperatures
15 p2665 A69-30040

Rare earth niobates magnetic properties measured in pulsed magnetic fields
15 p2667 A69-30195

NIOBIUM

Surface structure effect on flux penetration and AC losses in superconductive niobium
02 p0298 A69-12031

Strain rate effect on dislocation substructure in deformed niobium single crystals, investigating relationship between mechanical properties and dislocation substructure
02 p0268 A69-12287

Rhenium-niobium cylindrical thermionic converters with mechanically polished or electroetched emitters, comparing performance
03 p0368 A69-13126

Relaxation mechanism of low temperature internal friction peaks in niobium quenched to room temperature
03 p0447 A69-13617

Internal friction temperature effects on amplitude dependence in niobium and molybdenum
04 p0614 A69-14635

Carburization structure on surface of Mo and Nb castings cast in graphite molds showing changes in plastic properties of metals
04 p0619 A69-15391

Relationship between microhardness of niobium and other variables characterizing superconductivity
05 p0810 A69-16805

Chemisorption of H onto Nb (110) surface, measuring low energy electron diffraction and inelastic electron scattering from clean and H-covered surfaces
06 p0980 A69-17758

Structural defects in annealed niobium crystals observed by optical microscopy, discussing etch pits
07 p1169 A69-19603

Thermally activated processes influence on dislocation interaction and on temperature dependence of flow stress in niobium single crystals
08 p1333 A69-20446

Dislocation channeling process in polycrystalline Nb subject to tensile deformation after neutron irradiation
09 p1521 A69-21345

Comparative performance of niobium cylindrical thermionic converters with vapor deposited rhenium, stressing emitters surface preparation
09 p1438 A69-21816

Cylindrical thermionic converter with vapor deposited rhenium emitter and niobium collector, measuring efficiency and power density
09 p1438 A69-21817

Microsectioning technique applied to measurement of diffusion coefficients of Cr 51 in polycrystalline Nb at 1220-1766 K temperature range
11 p1903 A69-24577

Diffusion coefficients of carbon in tantalum, niobium and vanadium by sectioning method, using carbon 14 as tracer
11 p1906 A69-25575

Neutron irradiated Nb single crystals tensile tested over temperature range, discussing athermal radiation hardening
13 p2275 A69-27368

X ray investigation of niobium, aluminum and niobium-aluminum systems to obtain K-spectra and L-spectra
14 p2508 A69-29664

Strain aging of polycrystalline Nb containing interstitial impurities as function of temperature, discussing interstitial role in recovery substages
15 p2636 A69-30194

N precipitation kinetics in deformed Nb, finding constant in rate equation dependent on temperature and correlated to precipitates nature
15 p2639 A69-30585

Flexure of Ta and Nb thin rectangular specimens during high temperature oxidation, showing stress generation due to O dissolution into metal surface [ECS PAPER 87]
15 p2641 A69-31541

German monograph on yttrium addition effects on tension and compression behavior of Nb and Mo at high temperature in vacuum
17 p2990 A69-33570

Tunnel junctions with low background currents made by reacting active gas layer adsorbed on Nb film surface with Pb upper film to form barrier
17 p3016 A69-33788

Optimum conditions for producing Ti-V alloy sheet plated on one side with Nb by hot rolling
18 p3155 A69-34652

Carburization structure on surface of Mo and Nb castings cast in graphite molds showing changes in plastic properties of metals
18 p3156 A69-35019

Nb single crystals plastic deformation influencing tensile strength, noting rolling directions
18 p3160 A69-35454

Depth dependent variations in texture in Nb due to inhomogeneous plastic deformation during cold rolling
21 p3744 A69-38737

Nb supersaturated solid solution in Co precipitation mechanism analyzed by X rays and electron microscope, noting diffusive scattering effects
21 p3750 A69-39788

Nb single crystals oxidation in dry oxygen at high pressure and temperature indicating suboxide platelets existence as function of temperature
23 p4177 A69-42357

Mechanical properties and dislocation configurations and densities of Nb single crystals measured at various strain rates
24 p4332 A69-43030

NIOBIUM ALLOYS

Nb-W alloy solution hardening and deformation, noting flow stress dependence on strain rate and temperature plus activation energy of deformation
01 p0095 A69-10488

Metallographic and radiographic analysis of zirconium corner in Zr-Bc-Nb system, discussing phase transformation during quenching
02 p0262 A69-11843

Zirconium corner of Zr-Nb-Mo system phase diagram, using microstructure, microhardness, hardness and radiographic methods
02 p0264 A69-11856

Superconductivity of niobium-titanium-oxygen alloy wires containing 40 percent minimum niobium weight, noting thermomechanical aging effect on critical current density
03 p0484 A69-13118

Nb and Cr additions effects on Hadfield type steel mechanical properties, noting improvement especially at low temperatures
04 p0614 A69-14579

Niobium based alloys modulus of elasticity temperature stability, investigating admixture effects
04 p0615 A69-14642

Be, Ce, V and Ti additions effect on oxidizability of cast, forged and cold worked Nb-Cr-Mo alloys
04 p0618 A69-15081

X ray diffraction studies of deformation effects on bcc niobium alloys in terms of particle size, strain, faulting probability and dislocation density
04 p0618 A69-15202

Metastable phases of binary zirconium-niobium system, defining decomposition of solid solution in cooling
05 p0781 A69-16614

Structure and critical superconductivity current of titanium niobium alloy as function of heat treatment and deformation
07 p1158 A69-18532

Columbium alloys properties, discussing creep strength, oxidation resistance, costs, production, etc
07 p1164 A69-18791

Zirconium niobium alloys thermodynamic properties measured by Knudsen effusion method using zirconium
07 p1165 A69-18940

Metallographic and X ray study of cellular decomposition and precipitation in superconducting niobium zirconium alloy, noting heat treatment effect on current carrying properties
08 p1331 A69-20192

Oxidation kinetics of niobium titanium alloy in air and oxygen at 1000 C, analyzing nitrogen and pressure effects
08 p1331 A69-20193

Oxidation kinetics of niobium titanium alloy in air and oxygen between 650 and 1000 C, analyzing activation energies and nitrogen effects
08 p1331 A69-20194

Phase identification and microstructural effects of gaseous nitrogen reaction with binary Nb-Ti alloys at 1000 C
08 p1331 A69-20195

Heat resistant alloying of niobium with group 4A, 5A and 6A elements, studying elements diffusion mobility dependence on melting point
09 p1525 A69-22144

Nb H alloys embrittlement, discussing hydride formation and resistance variation with temperature
10 p1707 A69-22989

Intermediate Ni-Nb intermetallic formation as decomposition product from supersaturated Ni rich Ni-Nb solid solution aged above room temperature
10 p1708 A69-22993

Creep of high purity Nb-Mo alloys in 800-1300 C range and at 1500-13000 lb/square inch stresses, giving activation energy for creep
10 p1711 A69-23375

Ti-Nb alloy structure in heat treatment states analyzed by diffuse scattering of X ray lines and by electron microscope
12 p2112 A69-26036

Quenched titanium-niobium alloy structure effect on superconductivity properties, using electron microscope and X rays
12 p2112 A69-26040

Anodic stain etching technique for carbide precipitates of niobium-base alloy Cb 132, noting X ray diffraction
13 p2282 A69-28162

Electrical resistivity decrease in niobium-hydrogen alloys during isothermal aging at low temperature attributed to hydride precipitation, noting reaction rate and activation energy
14 p2463 A69-29288

Hard metals and materials containing NbC and HfC, noting X ray studies of pseudoternary and pseudoquaternary systems
14 p2464 A69-29323

Nb-Ta alloys oxidation kinetics at high temperature and structure and composition of oxide films and scale layers, discussing anomaly in oxidation rate temperature dependence
14 p2464 A69-29650

Mu phase lattice constants and cell volume in Nb-Zn system
15 p2636 A69-30086

Maximum strengthening due to second phase precipitation within operating temperatures maintainable to 20 hr during aging of Nb-Hf-O and Nb-Zr-O alloys
15 p2640 A69-30632

Phase equilibria in ternary systems Nb-Fe-B and Nb-Co-B, determining structural types and lattice constants by using X ray and microstructural analysis
15 p2641 A69-31246

Hall effect and transverse voltages in type II superconductors in mixed state, considering cold rolled Nb-Zr alloys
16 p2827 A69-31827

Optical constants of Ta-W and Nb-Mo measured in IR and visible ranges as function of incandescent temperatures
17 p2990 A69-33574

Steady state flux jumping for thin walled tubular superconducting NbTi subjected to coaxial superimposed AC and DC magnetic fields, discussing effective resistivity
17 p3016 A69-33787

Binary Nb-Hf system phase diagram below solidus line noting lattice parameters and oxygen and nitrogen effects on phase equilibrium boundaries
18 p3157 A69-35247

Nb corner of Nb-Mo-Cr alloy phase diagram and oxidizability in air at high temperature
18 p3157 A69-35248

Carbon diffusion parameters in alloys of Nb with Ti, Zr, W and Mo, using radioactive carbon 14
18 p3157 A69-35250

Creep behavior of dispersion strengthened Nb base bcc alloy, studying temperature and stress effects on steady state creep rate
19 p3343 A69-35924

Tempering time and temperature effect on microstructure, superconductivity, tensile strength and electrical conductivity of recrystallized Nb-Ti alloy
19 p3345 A69-36302

Heat treatment effect on superconducting properties of deformed Nb-Ta alloys, noting critical current density
19 p3345 A69-36303

Oxidation resistant coating methods and systems for Cb base materials protection for aerospace vehicles and aircraft propulsion systems structures
21 p3730 A69-38672

Dislocation structures in Nb-Ti alloys formed after annealing
21 p3747 A69-39163

Multicomponent Nb alloy creep and rupture strength under loads after heat treatment, determining creep rates dependence on temperature
22 p3969 A69-40073

Niobium solution hardening by nitrogen and oxygen, noting grain size effects in electron beam refining
23 p4178 A69-42362

Ni-Nb alloys precipitates tetragonal structure as function of time and temperature using electron and X ray diffraction
24 p4331 A69-42903

NIOBIUM CARBIDES

Monocarbide phases high temperature vaporization from open metal surfaces into vacuum, obtaining temperature dependence
02 p0260 A69-11583

Vanadium-carbon and niobium-carbon binary systems revised phase diagrams, noting effect of sublattice order transformations
05 p0779 A69-15988

Preparation and properties of NbC-WC and TaC-WC carbides, analyzing hardness, resistivity, thermal expansion and dihedral angle
05 p0782 A69-16796

Zirconium and niobium carbide behavior during plasma spray coating, noting optimum oxygen content and mean carbide particle diameter in spray
07 p1165 A69-18933

Temperature vs compactness relationship in NbC compacts having nonstoichiometric composition and approximately equal specific surface, determining self diffusion coefficients
10 p1711 A69-23337

Homogeneous NbC and TiC specimens physical properties, discussing current carrier density and mobility dependence on composition
14 p2462 A69-28976

Hard metals and materials containing NbC and HfC, noting X ray studies of pseudoternary and pseudoquaternary systems
14 p2464 A69-29323

Nb and Ti carbides investigated for lattice parameters, microhardness and resistivity in homogeneity domain
15 p2638 A69-30282

Electrical resistance and temperature coefficient dependence on phase composition of Ti, Zr and Nb carbides
15 p2641 A69-31047

Carburizing spherical powders of Nb, Mo and W to obtain carbides, noting agreement between theoretical and experimental data
19 p3345 A69-36162

Nb-Ti-C alloys electrical resistivity and thermal EMF noting nearly linear variations with temperature
20 p3558 A69-36976

Zr and Nb carbide coatings on Nb, Ta Mo and W, investigating methods for coating and base metal combinations 20 p3560 A69-37362

Niobium carbide formation on graphite from gaseous niobium pentachloride and Ar mixtures, discussing parameters affecting layer growth rate 20 p3566 A69-37367

Niobium carbide deposition from gaseous halogen compounds on graphite particles in pseudoliquidified state, noting stoichiometric coatings 20 p3566 A69-37369

Recrystallization during sintering of free flowing Nb and Ti carbide powders, determining grain growth dependence on temperature and activation energy 22 p3970 A69-40636

NIOBIUM COMPOUNDS NT NIOBATES

Niobium hydride and tantalum hydride formation using metal powders, noting solid phases during dehydrogenation 09 p1448 A69-21599

Intermediate Ni-Nb intermetallic formation as decomposition product from supersaturated Ni rich Ni-Nb solid solution aged above room temperature 10 p1708 A69-22993

Analytical, IR absorption and polarographic analysis of cyclic niobium (V) and tantalum (V) esters 11 p1832 A69-24575

Niobium aluminide-niobium germanide alloys superconductivity and heat treatment influence on critical temperature 13 p3216 A69-27659

Transition metal interstitial compounds thin film preparation and superconducting properties, emphasizing high critical temperature, rock salt structure and NbN base 13 p3221 A69-28009

Niobium deposition on graphite from vapor-gas phase assuming heterogeneous process 15 p2629 A69-30992

Fast neutron irradiation effect on niobium nitride current carrying capacity, showing enhancement 17 p3008 A69-33765

NbN thin film production by refined reactive sputtering technique, discussing Pauli spin paramagnetism and spin orbit scattering in high field superconductivity 17 p3016 A69-33790

Nuclear magnetic resonance of epsilon and delta phases in NbN system with nitrogen mole fractions 19 p3383 A69-36445

Nb-gaseous Nb chlorides equilibrium from transpiration measurements at 800-1400 C, confirming importance of Nb pentachloride, Nb tetrachloride and Nb trichloride 23 p4112 A69-41339

NIOBIUM OXIDES

Thin films of niobium oxide vapor-deposited on silicon and quartz substrates, discussing optical and dielectric measurements, dispersion and absorption coefficient [ECS PAPER 17] 08 p1372 A69-20365

NbO presence uncertainty in S type stars due to close coincidences with ZrO bandheads, noting 6484 and 6591 lines in R Cygni spectrogram 19 p3403 A69-35964

NIOBIUM STANNIDES

Temperature dependent isomer shift and anharmonic binding of Sn 119 in niobium stannide, measuring Mossbauer recoil free fraction 01 p0134 A69-10009

NITRATES

NT AMMONIUM NITRATES
NT CELLULOSE NITRATE
NT NITROGLYCERIN
NT PETN
NT SILVER NITRATES

Chlorella enzymes activity in reducing nitrate to nitrite and nitrite to ammonia 24 p4263 A69-43136

NITRIC ACID

Balloon-borne IR spectrometry to study atmospheric nitric acid vapor compared with absorption by ozone and methane 11 p1879 A69-25407

Ignition delay of paraphenylenediamine associated with nitric acid, showing relation between grain diameter and hypergolic ignition mechanism, noting oxidizer concentration effects 15 p2561 A69-30185

Valence force constants for nitric acid evaluated from fundamental mode vibration spectra by matrix method 15 p2561 A69-30467

Nitric acid vapor in atmosphere as function of altitude from spectrograph, predicting downward diffusion 23 p4155 A69-41634

Absorption observation of solar radiation at sunset by nitric acid in three wavelength intervals on different balloon flights 24 p4308 A69-42969

Solid fuel ablation by nitric acid, controlling reaction interface displacement rate by mass and heat transfer phenomena 24 p4363 A69-43568

Intermediate hydrazine-RFNA reaction product formed on injector nozzle and combustion chamber surfaces after fuel injection without ignition analyzed by various methods 24 p4365 A69-43669

NITRIC OXIDE

Electron paramagnetic resonance study of interaction between adsorbed nitric oxide and NaY and deca-tionized Y zeolites surfaces, considering catalytic activity 02 p0205 A69-11900

Enhanced light emission rate in adiabatically expanded NO-O reaction ascribed to molecular clusters 04 p0555 A69-14864

Evening twilight nitric oxide density profile in gamma bands deduced from rocket measurements 07 p1125 A69-18842

Oscillator strengths of transitions in shock tube between nitric oxide Rydberg states in near IR 08 p1354 A69-20150

Atomic N and NO daytime upper atmosphere density profiles, discussing production and loss mechanisms 08 p1307 A69-20185

Recombination rate of nitrogen atoms using NO titration method, tabulating reactions and emissions during various stages of titration 08 p1309 A69-20454

Radio wavelength range observations of NO molecule lines in interstellar space 09 p1590 A69-21377

HNO role in hydrogen-NO reaction rate data reexamined by numerical integration of governing differential equations 13 p2218 A69-28457

Sodium atoms and NO molecules role in atomic O 6300 and 5577 A emissions in comet Mrkos 1957d due to charge exchanges and dissociative recombination 14 p2523 A69-29707

Electron pulse radiolysis of NO, determining absolute yields and rates of formation of nitrogen dioxide and nitrogen trioxide 14 p2410 A69-29928

D region ionizable constituent density /presumably nitric oxide/ measured, using blunt probe to detect changes in conductivity produced by Lyman alpha ionizing radiation 15 p2598 A69-31316

Atomic nitrogen and nitric oxide density in upper atmosphere during nighttime calculated, allowing for atomic and molecular diffusion 16 p2785 A69-32622

Radio wavelength range observations of NO molecule lines in interstellar space 18 p3198 A69-34765

Distributions, seasonal variations and ionospheric implications of mesospheric nitric oxide concentration 21 p3703 A69-38364

Absorption spectrum of NO molecule, analyzing f complexes electron structure, ionization potential and quadrupole moment 22 p3984 A69-40477

NITRIDES

NT ALUMINUM NITRIDES
NT BORON NITRIDES
NT SILICON NITRIDES
NT TANTALUM NITRIDES
NT TITANIUM NITRIDES
NT ZIRCONIUM NITRIDES

Vacuum melting effect on O concentration in heat resistant alloys, outlining conditions for nitrides formation in equilibrium with melt 09 p1524 A69-22136

Group 4A carbides and nitrides formation in Mo by arc melting, determining threshold solute metal-interstitial atom ratios 12 p2117 A69-27136

Fast neutron irradiation effect on niobium nitride current carrying capacity, showing enhancement 17 p3008 A69-33765

NbN thin film production by refined reactive sputtering technique, discussing Pauli spin paramagnetism and spin orbit scattering in high field superconductivity 17 p3016 A69-33790

Nuclear magnetic resonance of epsilon and delta phases in NbN system with nitrogen mole fractions 19 p3383 A69-36445

K-alpha band characteristics of N spectra stimulated in nitrides of transition metals by X rays 22 p3974 A69-41118

NITRIDING

Nitriding effect on heat resistance and transition temperature of molybdenum alloys 01 p0093 A69-10212

Ion nitrided binary iron alloys and steels electron microscopic studies reveal particle formation during hardenings 06 p0942 A69-17224

Ion nitride hardening of Mo-Ti alloy at 1300 degrees C in cathode glow discharge tube 15 p2637 A69-30212

Nitriding effect on heat resistance and transition temperature of molybdenum alloys 15 p2637 A69-30268

Diffusion saturation of Mo and Mo alloys by nitrogen in ammonia with formation of nitride films, noting surface hardness 18 p3158 A69-35288

Titanium alloys wear and fatigue resistance as functions of time and temperature of nitriding by purified nitrogen 19 p3347 A69-36743

Silicon nitride ceramics fabrication technology and dimensional stability during nitridation, discussing applicability to aerospace precision or joined ceramic shapes 24 p4336 A69-43211

Rotational bending fatigue strength of plain and notched conventional and maraging steels, evaluating gas nitriding effects 24 p4335 A69-43802

NITRILES

NT ACRYLONITRILES

Photolytic cleavage of vic-triazole ring when unsubstituted at N, finding phenylacetonitrile production mechanism 19 p3264 A69-35971

Acetonitrile ion-molecule chemistry using ion cyclotron resonance, discussing reaction of vibrationally excited methyl ions from electron impact 19 p3265 A69-36290

NITRITES

Amyl nitrite inhalation effects on cardiovascular system, discussing tachycardia and carotidograms 21 p3661 A69-39278

Chlorella enzymes activity in reducing nitrate to nitrite and nitrite to ammonia 24 p4263 A69-43136

NITRO COMPOUNDS

NT NITROGLYCERIN
NT NITROMETHANE
NT TETRYL
NT TRINITRO COMPOUNDS

Gas chromatography used to determine residual solid propellant stabilizers content and nitro derivatives, including thin film chromatography 02 p0303 A69-11528

Heat resistant DIPAM and HNS explosives in aerospace applications, considering mild detonating fuse and core loading 10 p1750 A69-23014

NITROBACTER

Consecutive reaction equations for idealized soil column solved for nitrifying metabolite concentrations as functions of time and depth 19 p3264 A69-35606

NITROCELLULOSE

U CELLULOSE NITRATE

NITROGEN

NT LIQUID NITROGEN

Nitrogen compressibility and thermodynamic functions up to 10,000 atm pressure and 400 C 01 p0175 A69-10366

Pulsed nitrogen laser design involving gas discharge tube fed by low impedance parallel plate transmission line 01 p0091 A69-10842

Nitrogen and helium as factors affecting human decompression stress severity, using urinary measurements reflecting various endocrine and metabolic changes 01 p0018 A69-11338

Intensity ratio of first negative nitrogen band and oxygen line varies in auroral displays 02 p0235 A69-11425

Radiative lifetimes for four N II excited states emitting UV during transition to lower level 02 p0280 A69-11928

Heat of solution and diffusivity of nitrogen in molybdenum analyzed by quenching technique and resistivity measurements at liquid helium temperature
02 p0267 A69-12188

High resolution spectroscopic study of stimulated rotational transitions of nitrogen molecules using crossed grating Echelle spectrograph
02 p0284 A69-12621

Pressure induced microwave absorption in molecular N for various temperatures, determining dielectric loss, absorptivity and quadrupole moment
03 p0472 A69-13317

Reentry plasma sheath simulation in wind tunnel by injection of nitrogen plasma from model vehicle nose
03 p0412 A69-13679

Chemical nitrogen fixation methods for life support systems, discussing organometallic chlorides and bromides
03 p0382 A69-14198

Superradiant and laser spectroscopy in second positive system of molecular nitrogen
04 p0609 A69-14285

Emission cross sections of first negative band system of nitrogen under electron impact excitation
05 p0795 A69-15617

Low collision energy charge transfer and dissociative charge transfer between rare gas ions and molecular nitrogen, measuring nitrogen ion kinetic energy distributions
05 p0796 A69-15909

Nitrogen abundances in chondritic meteorites determined by carrier gas fusion extraction
05 p0825 A69-16301

Nitrogen solubility in liquid Fe-Cr-Ni alloys increases with increased Cr concentration between 1550-1700 C and at one atm N pressure
06 p0942 A69-17229

Alloying elements effect on nitrogen solubility in liquid Fe-Cr-Ni alloys, defining quantitatively changes in solubility
06 p0943 A69-17234

Depolarized Rayleigh line widths measured for carbon dioxide, nitrogen and hydrogen, using measurements to calculate reorientation cross sections [IEEE PAPER B-11]
07 p1157 A69-19485

Pressure-temperature dependence of nitrogen solubility in tungsten at 2400-3000 C
07 p1168 A69-19602

Phase identification and microstructural effects of gaseous nitrogen reaction with binary Nb-Ti alloys at 1000 C
08 p1331 A69-20195

Absolute excitation cross sections for emission of second positive bands of nitrogen under electron impact
08 p1355 A69-20208

Near resonant transfer of vibrational energy from carbon dioxide nu 3 mode to N 14 and N 15 molecules in collisions
08 p1358 A69-21011

Light polarization from stimulated Brillouin effect in compressed gaseous nitrogen, presenting depolarization variations as function of gas density and laser power
09 p1516 A69-21691

Nitrogen diffusion coefficients in TiN and alpha-Ti determined by metallographic and roentgenographic analyses, establishing linear equations for temperature dependence
09 p1523 A69-21736

Lowest valence and Rydberg states assigned to ungerade singlet states in dipole allowed absorption spectrum of molecular nitrogen
09 p1542 A69-21916

Nonadiabatic collision broadening theory for IR spectral lines applied to carbon dioxide-carbon dioxide and carbon dioxide-nitrogen collisions, estimating rotational line widths
09 p1543 A69-22250

Nitrogen solubility in molten niobium and molybdenum at high temperatures in argon flow
10 p1710 A69-23213

Nitrogen impurities effect on electron energy balance in DC arc burning in inert gas
10 p1732 A69-23442

Monograph on effect of nitrogen on precipitation behavior of austenitic chromium-nickel steel covering carbides, intermetallics, phase transportations, corrosion resistance, etc
11 p1902 A69-24369

Optical cross section measurements for electron excitation from ground state of nitrogen
12 p2132 A69-26246

IR absorptance data for atmospheres of ammonia and ammonia nitrogen mixtures at various wavelengths

indicating absorption in strong line region for gas pressures used
12 p2132 A69-26247

Electromagnetic field induced plasma oscillation amplitude dependence on field frequency as function of field amplitude and discharge current at low N pressures
13 p2313 A69-28332

Ionization of rare gases /H and N/ by nitrogen ions, determining cross sections of formation of slow ions and electrons
13 p2304 A69-28440

Diffuser performance in hypersonic shock wind tunnel for nitrogen flow, discussing steady shock wave and separation zone formation time
14 p2391 A69-29622

N precipitation kinetics in deformed Nb, finding constant in rate equation dependent on temperature and correlated to precipitates nature
15 p2639 A69-30585

Temperature profiles in laminar boundary layer with endothermal reaction investigated using nitrogen plasma jet in rarefied gas wind tunnel
16 p2821 A69-31833

Leak rate measurement accuracy of rate-of-rise technique for nitrogen, methane and He between millionth and thousandth torr
16 p2791 A69-32326

Nitrogen reaction with excess fuel in ramjet engines, noting kinetic limitations in applications [WSCI PAPER 69-12]
16 p2831 A69-32351

Continuum radiation measurements for bremsstrahlung and recombination of neutral and ionized nitrogen
16 p2823 A69-32466

Prebreakdown currents measurement in H and N for deducing ionization coefficients via Townsend and Lucas equations respectively, noting validity by digital computer technique
16 p2815 A69-32574

Nitrogen density measurements up to 4000 atm and 1000 C, examining possible error sources
17 p3073 A69-33393

Emission intensity ratio change as function of polar auroral height compared to variation in atmospheric concentration ratio of oxygen to nitrogen
17 p2963 A69-33956

Electric quadrupole coupling for N 14 in aminedisulfonate studied by observation of second order transitions in electron spin resonance spectra
18 p3178 A69-35474

Molecular N rotational temperature effect on rare gases scattering cross section
19 p3377 A69-36184

IR spectra of Eta Carinae, confirming nitrogen and sulfur abundance
19 p3423 A69-36229

Deactivation rate constants of carbon dioxide vibrationally excited by high temperature collision with carbon dioxide or nitrogen molecules, describing laser apparatus and reaction cells
20 p3578 A69-36937

Nondissociating vibrationally excited dense N, analyzing compressibility factor, internal energy, enthalpy, entropy, sound speed and specific heat by state equations
20 p3631 A69-37214

Vibrational temperature of low density nitrogen measured by electron beam method, discussing relationship to ratio of integrated vibrational band intensities
20 p3579 A69-37222

Electron band forces probable values of Meinel system positive N molecules and first positive system of nitrogen molecules at high temperatures
20 p3579 A69-37307

Molecular rearrangements of nitrene intermediates, suggesting role in bond formation and breaking at nitrogen
20 p3484 A69-37485

Ambient atmospheric temperature and molecular nitrogen density measured simultaneously by rocket-borne electron beam luminescence method
20 p3543 A69-37799

Nitrogen gas breakdown threshold dependence on pressure during picosecond ruby laser pulse, discussing photoionization leading to breakdown in electromagnetic wave field
20 p3555 A69-38067

Nitrogen diffusion coefficients in TiN and alpha-Ti determined by metallographic and roentgenographic analyses, establishing linear equations for temperature dependence
20 p3564 A69-38214

N I nebular doublet and auroral and nebular lines of O I obtained with multfilter scanning photometer in France, Norway and at magnetic equator
21 p3712 A69-38519

Luminous efficiency for electron induced molecular nitrogen bands, discussing thick- and thin-target measurements of fluorescent efficiencies
21 p3774 A69-38521

Decompression research on inert gas transport in body, discussing solubility factors in decompression damage
21 p3655 A69-38913

Electron energy loss spectrum of nitrogen, suggesting atmospheric auroral nitrogen emissions compatibility with low energy electron impact excitation mechanisms
22 p3935 A69-39970

Rocket measurements of diurnal variations of F region concentrations and temperature of molecular N and O, showing disagreement with satellite drag data
22 p3939 A69-40515

Vapor pressure equation for oxygen and nitrogen derived by adding nonanalytic term, correlating equation with observed data [NAS-NRC PAPER H-1]
22 p4051 A69-40628

Collision processes in gaseous nitrogen leading to production of positive triatomic, diatomic and monatomic nitrogen ions
22 p3986 A69-40722

Molecular N UV spectrum at various pressures, showing absorption band dependence on pressure induced dipole transitions
22 p3986 A69-40723

K-alpha band characteristics of N spectra stimulated in nitrides of transition metals by X rays
22 p3974 A69-41118

Hypoxia reaction elimination in human beings by repeated exposure to hypoxia, discussing nitrogen inhalation experiments and adaptive behavior of respiratory system
23 p4214 A69-41789

Raman spectrum of solid alpha-nitrogen at low temperatures, calculating scattering intensities and Raman active librational lattice vibrations
23 p4194 A69-42204

Raman spectra analysis of solid carbon dioxide, nitrous oxide, nitrogen and CO, determining lattice mode intensities from oriented gas model
23 p4194 A69-42205

Niobium solution hardening by nitrogen and oxygen, noting grain size effects in electron beam refining
23 p4178 A69-42362

N or He additions effects on carbon dioxide laser design and power output
24 p4327 A69-42640

Ionization and light emission cross sections for collisions of protons and hydrogen atoms with atmospheric nitrogen used to analyze auroral events
24 p4368 A69-43177

Gradually decreasing N concentration effects on composition, tissue production and oxygen yield of unicellular algae in continuous culture
24 p4263 A69-43201

Ionization rate limiting processes behind strong shock waves in pure N, plotting electron density profile diagrams
24 p4302 A69-43367

Mechanism for pink afterglow accompanying microwave discharge in pure nitrogen, emphasizing gas kinetic temperature role
24 p4353 A69-43749

NITROGEN ATOMS

Solar emission line absorption by oxygen and nitrogen atomic lines, discussing effect on upper atmosphere composition measurements
03 p0425 A69-14019

Second virial coefficient of atomic nitrogen and oxygen, discussing thermodynamic properties of dissociating mixtures
03 p0473 A69-14158

Photoelectric absorption studies on molecular nitrogen indicate predissociation contributing to atomic nitrogen production in upper atmosphere
05 p0756 A69-16282

Pulsed laser emission of atomic N in mixture of molecular N and He, noting effects of pressure and frequency and duration of excitation pulses
06 p0933 A69-17258

Atomic N and NO daytime upper atmosphere density profiles, discussing production and loss mechanisms
08 p1307 A69-20185

Recombination rate of nitrogen atoms using NO titration method, tabulating reactions and emissions during various stages of titration
08 p1309 A69-20454

Vibrationally excited nitrous oxide formation in reaction of N atoms with nitrogen dioxide, noting IR emission and vibrationally excited nitric oxide
11 p1832 A69-24880

Forbidden NI transitions in nighttime upper atmosphere observed with Fabry-Perot spectrometer
14 p2440 A69-29120

Atomic nitrogen and nitric oxide density in upper atmosphere during nighttime calculated, allowing for atomic and molecular diffusion
16 p2785 A69-32622

Rate coefficient for primary process in removing molecular nitrogen in high vibrational levels from active nitrogen by N atoms
19 p3379 A69-36424

Atomic nitrogen collisional ionization and recombination rates under assumed quasi-steady nonequilibrium distribution of electron state populations
24 p4353 A69-43700

NITROGEN DIOXIDE

LCAO-MO-SCF wave functions determined for ground and excited states of nitrogen dioxide at five different ONO angles
06 p0960 A69-17109

Vibrationally excited nitrous oxide formation in reaction of N atoms with nitrogen dioxide, noting IR emission and vibrationally excited nitric oxide
11 p1832 A69-24880

Nitrogen dioxide molecular ions formation in air, discussing absence at lower pressures and early afterglow dominance in air ionized and dissociated by microwave pulses
11 p1879 A69-25158

Photodetachment of electrons from nitrogen dioxide ions by light in violet portion of visible spectrum, noting wavelength dependence
22 p3985 A69-40575

NITROGEN FLUORIDES

Monograph on kinetic study of fast gas reactions with shock waves covering thermal decomposition of nitrous oxide, hydrazine tetrafluoride and nitrogen tetrafluoride
08 p1304 A69-20707

NITROGEN IONS

Metastability of 1D state of negative N ion, instability of 3P state and energies of both states
02 p0284 A69-12598

Emission continuum intensity of negative nitrogen ion in nitrogen and air plasmas
04 p0639 A69-15370

Radiation intensity distribution from first negative and positive nitrogen system in equilibrium gas flow behind propagating shock front, discussing kinetics mechanism and electronic states
05 p0745 A69-15890

Molecular jets obtained by charge exchange of triatomic ion beams consisting of hydrogen, deuterium and nitrogen, noting formation, energy level, etc
05 p0797 A69-16339

Ratio of volume emission rate of 5577 A photons to volume emission rate of one band of positive nitrogen molecule first negative system in aurora
05 p0756 A69-16360

Electron impact excitation cross sections for emission from first negative bands of positive N molecule ion
06 p0961 A69-17135

Nitrogen ion number density time dependence by mass spectrometric probing of decaying nitrogen plasmas, noting molecular ion production by colliding metastable nitrogen molecules
07 p1184 A69-19141

Ion number densities time dependence in pink afterglow of N measured with quadrupole mass spectrometer
08 p1308 A69-20292

Vibrational excitation in He, H and N ion-molecule collisions on nitrogen first negative system, studying relative band intensities
08 p1356 A69-20739

Ratio of volume emission rates of 5577 A and band of positive N molecular ion first negative system for use in auroral observations
09 p1491 A69-22607

Auroral spectrum observations for absolute brightness of nitrogen Meinel and 1NG systems, considering background night airglow and atmospheric extinction
10 p1681 A69-23161

Optical depth at under 110 A due to continuous absorption by N, O and Ne ions estimated in high excitation planetary nebulae
10 p1790 A69-24140

Nighttime distribution of nitrogen ion and lambda 5755 emission in ionosphere with incidence of aurora
12 p2066 A69-26110

Nonequilibrium radiation from first negative band of molecular nitrogen ion excited by shock wave electron impact
13 p2245 A69-27380

Drift velocity and longitudinal and transverse diffusion coefficient for low energy N ions in N gas in mass spectrometer at room temperature
13 p2302 A69-27458

Ionization of rare gases /H and N/ by nitrogen ions, determining cross sections of formation of slow ions and electrons
13 p2304 A69-28440

Emission continuum intensity of negative nitrogen ion in nitrogen and air plasmas
16 p2822 A69-32117

Energy spectrum of secondary electrons and fluorescent efficiency in 3914 A band, obtaining ionization cross section
16 p2850 A69-32315

Beam foil technique to measure energy transition levels radiative lifetime for nitrogen ions
17 p3009 A69-34154

Mean life of D energy level in N IV, discussing Be I isoelectronic sequence
17 p3009 A69-34187

Recombination coefficients of oxygen and nitrogen ions with electrons related to electron temperature, using microwave afterglow/mass spectrometer
18 p3176 A69-34789

Transition probabilities of N I far UV multiplets, comparing experimental and theoretical results
18 p3178 A69-35413

M8 electron temperature and internal kinematics from photoelectric Fabry-Perot spectrometric recording of H alpha line profiles and N II
19 p3424 A69-36334

Upper atmospheric temperature by spectroscopy, considering rotational, OH nightglow, nitrogen cation dayglow and twilight temperatures
21 p3712 A69-38516

Exponential decay and mean lives of lowest P levels in N V measured with beam foil source, noting agreement with theories taking configuration interaction into account
21 p3774 A69-38760

N II 4176 A emission line occurrence in connection with type B auroras, studying secondary electrons energy spectra
24 p4309 A69-43012

NITROGEN OXIDES

NT NITRIC OXIDE
NT NITROUS OXIDES

Monograph on kinetic study of fast gas reactions with shock waves covering thermal decomposition of nitrous oxide, hydrazine tetrafluoride and nitrogen tetrafluoride
08 p1304 A69-20707

Oxygen and NO ions yields produced by dissociative attachment of electrons to nitrogen dioxide as function of electron energy, considering electron affinities lower limits
13 p2301 A69-27363

Quantitative IR spectral emissivity measurements of NO between 300-800 K made in absorption, correlating observed absorbance with optical path length and gas pressure
17 p3009 A69-34156

NITROGEN PLASMA

Nonequilibrium nitrogen plasma spectral line intensities calculated assuming optically thin plasma
01 p0124 A69-10960

Nitrogen plasma thermal radiation in spectral region from 0.5 to 1.1 micron, noting plasma state near local thermodynamic equilibrium
07 p1189 A69-18283

Franck-Condon factors for high rotational levels of nitrogen calculated in Morse potential approximation for application to plasma diagnostics
07 p1185 A69-19169

Nitrogen plasma total radiation intensity under pressure and at high temperatures calculated from radiation spectrum
11 p1922 A69-24231

N and H plasmas and N-H plasma mixtures thermodynamic properties calculation, discussing numerical methods and corrections for electrostatic interactions
21 p3847 A69-38421

Emissivity of nitrogen, oxygen and air plasmas in vacuum UV region of spectrum by photographic measurement, using He recombination radiation as brightness standard
21 p3774 A69-38944

Ionization formula linking nitrogen ion charge density ratio to plasma temperature
22 p3990 A69-40714

NITROGEN TETROXIDE

Bipropellant propulsion systems using Aerozine 50 and nitrogen tetroxide for Symphonie telecommunications satellite
16 p2828 A69-31733

Stress corrosion cracking of alpha Ti in liquid nitrogen tetroxide and various methanol environments, considering failure mechanisms
19 p3352 A69-36906

Impurities effect on corrosivity of nitrogen tetroxide with tank construction metals, Al, stainless steel and Ti-Al-V alloy, noting temperature aging and concentration
21 p3748 A69-39488

Heat transfer during nitrogen tetroxide nucleate boiling at various pressures and heat fluxes [ASME PAPER 69-HT-58]
24 p4411 A69-43536

NITROGEN 16

Neutron activation analysis for oxygen determination in Be by gamma emission intensity from nitrogen 16, noting bound oxygen
20 p3544 A69-37811

NITROGLYCERIN

Heat production rate equivalence to heat removal rate during ignition of ballistite powder by incandescent wires
02 p0354 A69-12668

NITROMETHANE

Detonation velocity variation in nitromethane with initial pressure, discussing relationships
22 p4051 A69-40713

NITRONIUM PERCHLORATE

Nitronium perchlorate thermal decomposition under overpressure of He and O between 80 and 170 degrees noting weight loss processes and crystal phase change
02 p0303 A69-11897

Intentional impurities effects on nitronium perchlorate thermal stability explained by change in cation and anion vacancies
02 p0304 A69-11899

NITROSO COMPOUNDS

Nitrosoazomethine derivatives deoxygenation for generation of azomethine nitrenes, discussing preparation by oxidation and dehydrogenation of secondary amidoximes
10 p1651 A69-23305

C-nitroso compounds chemistry covering various nitrosation reactions connected with reduction and deoxygenation
20 p3484 A69-37486

NITROUS OXIDES

- Intermolecular collision induced vibration to vibration energy transfer in nitrous oxide in various gas mixtures, measuring fluorescence and relaxation rates
01 p0123 A69-10684
- Nitrous oxide absorbance, deriving analytical expressions for transmission spectra
02 p0236 A69-11452
- Negative ion-molecule reactions in nitrous oxide using mass spectrometer, noting negative ion concentration pressure dependence
06 p0960 A69-17106
- Radiative lifetime for nitrous oxide 001-100 transition, laser level absolute population densities and saturation parameter measured in nitrous oxide-nitrogen-He laser
[IEEE PAPER G-10] 07 p1151 A69-19057
- Vibrationally excited nitrous oxide formation in reaction of N atoms with nitrogen dioxide, noting IR emission and vibrationally excited nitric oxide
11 p1832 A69-24880
- Nitrous oxide-CO bimolecular reaction and O-CO recombination in single pulse shock tube
16 p2748 A69-32793
- Shock wave studies of gaseous NO thermal ionization in Kr as function of temperature, using time-of-flight mass spectrometer
18 p3099 A69-34464
- Central tuning dip on rotation-vibration transitions of nitrous oxide and carbon dioxide laser with nitrogen, noting frequency discriminator generation
19 p3339 A69-36698
- Excited states lifetime of carbon dioxide and nitrous oxide ions deduced from spontaneous radiative deexcitation in vacuum after passage through gaseous target
22 p3985 A69-40715
- Raman spectra analysis of solid carbon dioxide, nitrous oxide, nitrogen and CO, determining lattice mode intensities from oriented gas model
23 p4194 A69-42205

NOBLE GASES

U RARE GASES

NOBLE METALS

NT COPPER
NT GOLD
NT SILVER

Less common refractory metals /rhenium, technetium, hafnium, noble metals/ properties, phase equilibria, etc
07 p1165 A69-18793

NOCTILUCENCE

U LUMINESCENCE

NOCTILUCENT CLOUDS

- Visual observations data on noctilucent clouds /1963-1967/
04 p0595 A69-15307
- Artificial noctilucent clouds or meteor trails positions determined by transforming photogrammetric coordinates
12 p2154 A69-25822
- Mesopause wind measurements at high latitude locations by sounding rockets noting relation to noctilucent clouds
13 p2294 A69-28466
- Aerosol content of mesosphere with noctilucent clouds measured with optical radar in Norway
14 p2444 A69-29877
- Noctilucent clouds thickness determinable from angular dimensions of visible edge
15 p2598 A69-31254
- Statistical data concerning noctilucent clouds formation during IQSY, noting tendency to form along geographic longitudes and day and night existence
15 p2598 A69-31255
- Inflight shadowing device incorporated into dust particle collection devices borne in Aerobee rocket sampling noctilucent cloud display over Fort Churchill
15 p2602 A69-31386
- Noctilucent clouds seasonal frequency, considering meteor shower effects and temperature dependence role
16 p2781 A69-32453
- Noctilucent cloud layer spectral brightness and transparency in E region determined from transhorizon rocket observations
18 p3130 A69-35148
- Noctilucent clouds morphological and kinematic characteristics based on photographs
18 p3132 A69-35335
- Visibility degree of noctilucent cloud determined from ratio of brightness contrast against sky to eye contrast threshold
19 p3362 A69-36410

Noctilucent clouds formation relation to ice sublimation, discussing rocket soundings
21 p3701 A69-38345

Noctilucent cloud particles nucleation and growth, noting time dependence and water vapor mixing ratio
21 p3702 A69-38346

Noctilucent clouds total or partial extraterrestrial origin, deriving minimum particulate influx from satellite and rocket data
21 p3702 A69-38347

Piezoelectric microphone sensor flown on rocket for recording micrometeoritic impacts during noctilucent cloud display, determining cosmic dust particles flux
21 p3793 A69-38348

Mesospheric circulation related to noctilucent cloud data, discussing seasonal variations
24 p4307 A69-42965

NODES [STANDING WAVES]

Cluster star color indices determination by measuring intensities at nodes of extrafocal star spectra
08 p1387 A69-20122

Deformation functions for finite beam analysis allowing continuity at nodes and accurate eigenvalues
15 p2710 A69-30869

NOISE

Nonlinear estimation with noisy data, considering least squares fit, sequential /Kalman/ estimate and iterated sequential scheme
21 p3686 A69-39370

NOISE [SOUND]

NT AERODYNAMIC NOISE
NT AIRCRAFT NOISE
NT ENGINE NOISE
NT JET AIRCRAFT NOISE
NT SONIC BOOMS
NT THERMAL NOISE

Noise and relations between environment and man, discussing sound perception, measurement and judgment of noise annoyance and harm
01 p0020 A69-10741

Impulse noise damage risk criteria, discussing maximum tolerable exposure, hazardous exposure and methods of impulse noise measurement
07 p1066 A69-19171

Turbomachinery multiple pure tone noise associated with acoustic resonance of inlet cavities examined by narrow band filter tracking integer multiples of rotative speed
[ASME PAPER 69-GT-2] 09 p1572 A69-22509

Auditory temporal masking of tonal signal by narrow band noise and perception of temporal order noting effects of intensity, frequency and time
11 p1830 A69-24795

Physiopathological reactions of humans exposed to infrasonic vibrations applied via auricular canal, observing cardiac and circulatory hemodynamic troubles
13 p2215 A69-28590

Noise as public health hazard - Conference, Washington, D.C., June 1968
14 p2541 A69-29149

Noise measurement and scales in studying psychological and nonauditory physiological effects on human functioning
14 p2485 A69-29150

Heart murmurs frequency analysis on patients to improve detection of aortic insufficiency in presence of mitral stenosis
24 p4279 A69-43800

NOISE HAZARDS

U HAZARDS

NOISE INJURIES

Impulse noise damage risk criteria, discussing maximum tolerable exposure, hazardous exposure and methods of impulse noise measurement
07 p1066 A69-19171

Mechanical vibrations and noise effects on acetylcholine concentration, esterase activity and synthesis ability in rat brain
23 p4079 A69-41381

Noise levels in twin engine general aviation light aircraft cockpits, discussing protection against possible hearing damage
24 p4252 A69-42902

NOISE INTENSITY

Aircraft noise suppression, discussing community aspects of jet and fan noise and physical mechanisms of jet noise
01 p0009 A69-10349

Atmospheric noise at millimeter wavelengths, discussing solar radiation and antenna near and far field patterns
01 p0028 A69-10420

Matrix representation of linear active two port noise figures and charts in terms of power wave variables
02 p0211 A69-12444

Noise emitted by gas filled cavity perturbed by strong coherent signal computed by Nyquist equation
02 p0211 A69-12448

Microwave oscillator AM and FM noise measurement using Schottky barrier diode detector, discriminator, storage oscilloscope and wave analyzer
02 p0220 A69-12453

Human reaction to aircraft engine noise, evaluating effective perceived noise level and constraints on engine design
02 p0204 A69-12766

Frequency dependence of atmospheric noise intensity from 1 to 1000 kHz at low and medium latitudes
05 p0758 A69-16410

High power microwave oscillator /carpenter/ for pure or FM signal amplification, noting low output noise level
07 p1096 A69-18437

Cosmic radio noise intensity measurements by ATS 2 satellite-borne radiometer
07 p1224 A69-19715

Error in receiver sensitivity calculation using approximate equation for noise power at input
08 p1275 A69-20226

Mathematical formulation of Noy tables, noting more efficient programming and minimal disagreement with original tables
08 p1266 A69-20403

Noise power ratio at output of wideband amplifier with angle modulated multicarrier input, obtaining intermodulation products from Bessel functions expansion
08 p1285 A69-20595

Interference capability of noise of different frequency bandwidths, comparing weighted sound pressure to loudness level
08 p1276 A69-20857

Antenna noise temperature at earth station due to rain on radomes, solar and cosmic noise, noting SNR degradation
09 p1461 A69-21283

Propagation and noise effects on frequency choice for communication satellite service to aircraft and ships, noting tropospheric and ionospheric attenuation considerations
09 p1451 A69-21288

VLF emissions intensity and spectra variations compared with energetic electron fluxes variations during magnetosphere storm periods
09 p1488 A69-21698

Transistorized amplifier stage noise factor dependence on parameters and modes of operation of transistors
09 p1463 A69-21724

HF excess noise and equivalent circuit representation of MOSFET with n-type channel, noting local mobility fluctuations effect
09 p1463 A69-22094

Transmit-receive device noise contribution effect on receiving system noise factor for device insertion immediately before low noise microwave amplifier
09 p1469 A69-22605

Tunnel diode amplifier operation in presence of noise
09 p1469 A69-22630

Autodyne frequency converters minimum noise and conversion factor calculation and optimal mode determination
09 p1469 A69-22631

Jet airliners noise characteristics, calculating spectral content and duration of perceived noise level and total noise level
09 p1435 A69-22637

Noise level perception and subjective judgments for broadband noise with single, modulated and multiple tones, considering tone correction procedures
11 p1830 A69-24796

Noise level criteria for acceptable voice communications in office environment, noting acclimatization
11 p1830 A69-24797

Microwave amplifiers and receivers noise performance factors measurement noting thermal noise, definitions of noise temperatures and noise figure, noise generators, etc
11 p1840 A69-25301

Annoyance caused by noise near airports, discussing PNdB /perceived noise dB/, evaluation criteria, and French, British, American and German methods
13 p2214 A69-28588

Aircraft noisiness estimation methods
13 p2216 A69-28660

Noise duration and spectral complexity effect on subjective rating of disturbance level

14 p2408 A69-29152

Mean-minute thermal noise intensity distribution in telephony channels of tropospheric radio relay systems

14 p2412 A69-29425

Optimum thermal and nonlinear noise intensities distributions in frequency division multiplex satellite communications systems, relating relay station power, frequency band and channels

14 p2412 A69-29426

Potential noise stability of reception in binary communications system with active pause in channel for unknown signal arrival time

15 p2563 A69-30134

Pulsed noise sensitivity in radar receivers having noise limiter for simple and complex signals

15 p2563 A69-30137

Fast visual task performance indoors found dependent on sound pressure level

15 p2550 A69-30305

Near field flow noise generated in boundary layer of water vehicle measured for rotating cylinder, ship and buoyant unit using hydrophone

17 p3004 A69-32953

Noise levels due to long range tropospheric transmission calculated for microwave radio systems

17 p2919 A69-33146

Noise intensity measurements in far field of circular nozzle for jet noise composition

17 p2957 A69-33602

VHF band surface incidental radio noise levels over metropolitan areas compared with airborne data

17 p2921 A69-33672

Noise during frequency combination and conversion in mixer

17 p2931 A69-33911

Intermittent noise effects on human target detection to test neutral ratio dependence on noise intensity level, noting attention flexibility

17 p2911 A69-34008

Aircraft noise acceptability tests based on listening in absence and presence of speech

18 p3097 A69-34325

Daily solar radio noise intensity at 10.7 cm with slowly varying components and quiet sun emission, revealing rise only and absorption bursts

19 p3401 A69-35758

False signals formation during random pulse noise in single command channels with PTM coding, noting code value and redundancy

19 p3278 A69-36595

Transistorized amplifier stage noise factor dependence on parameters and modes of operation of transistors

20 p3505 A69-37460

STOL aircraft characteristics emphasizing ground and air space operations requirements and noise levels

22 p3863 A69-40430

Commercial aircraft peak cockpit noise level during cruise and high speed descent, discussing damage risk criteria and inter-pilot speech interference

23 p4102 A69-41682

Supersonic aircraft sonic bang loudness level calculations by model waveforms with allowance for interaction between incident and ground reflected shock waves

23 p4063 A69-42454

Noise level effects on pharmacological effectiveness of centrally acting drugs in rats

24 p4262 A69-42947

Continuous noise level effects on stabilized escape conditioning in male albino rats

24 p4262 A69-42948

Negative surface potential effect on noise and photoconductivity in Ge doped p-type InSb single crystals at low temperature in vacuum

24 p4362 A69-43738

NOISE MEASUREMENT

U ACOUSTIC MEASUREMENTS

NOISE METERS

Transistor HF noise factor measurement by semiautomatic device with saturated diode comparison noise source heater current automatically controlled

07 p1090 A69-18292

AM-FM calibration modulator for microwave oscillator noise measurement

11 p1856 A69-25631

NOISE PROPAGATION

Measured noise temperature in argon tubes vs theoretical electron temperature for gas discharge noise sources

02 p0210 A69-12437

Noise generation and propagation in linear N cascaded mismatched two port networks, noting application to microwave measurements in low noise technology

02 p0211 A69-12445

Noise sources representation in pumped nonlinear systems simplifies noise analysis and noise propagation

05 p0720 A69-16345

Noise rejection in multichannel telephone signal reception with FM and multiplexing, determining SNR dependence on SNR at receiver input

09 p1459 A69-22640

Simultaneous transmission of information signals and pseudonoise synchronization waveforms in common bandwidth

[IEEE PAPER 67-TP-1173-COM]

10 p1655 A69-23532

Radio signals and concentrated noise amplitudes probability distributions reflected from ionosphere and scattered in troposphere calculated for Rayleigh and log-normal fading

11 p1833 A69-24440

Artificial triggering of VLF magnetospheric noise by NAA Morse code transmission during whistler duct drift across magnetic shells on 17 June 1965

11 p1878 A69-25154

Artificial magnetospheric VLF noise triggering by Morse code dots at 14.7 kHz from NAA verified at Antarctica

11 p1878 A69-25155

Soviet monograph on intrinsic noise emission in radio channels covering noise temperature at receiver input, thermal microwave radiation, etc

13 p2219 A69-27304

Equipment and test installations for turbojet noise studies, discussing noise from rotating parts, pure jet noise and air propagation of noise

13 p2325 A69-28589

Noise emission and Landau damping of plasma resonances related by network theory including Nyquist formula, discussing noise temperature in free fall region

16 p2822 A69-32038

Noise transmission from turbulent boundary layer through flexible plate into closed cavity, emphasizing nonlinear plate stiffness and mutual interaction between plate and airflow

17 p3006 A69-33409

Far field helicopter rotor noise radiation, analyzing blade slap, rotation noise, vortex noise effects and loading harmonics utilizing computer program

18 p3090 A69-34322

Microwave reflection and noise emission from cylindrical rare gas afterglow plasmas in axial magnetic field measured near electron cyclotron resonance

18 p3127 A69-34436

Terrestrial radio noise source aspects including atmospheric, propagation influence, lightning-generated noise and whistlers, radio interference, etc

19 p3276 A69-36434

ELF atmospheric propagation, determining slow-tail atmospheric group velocity, relating characteristics to spectral characteristics of lightning

23 p4114 A69-41362

NOISE REDUCTION

Aircraft engine noise reduction in test runs by sound insulating hangar

01 p0054 A69-10033

Aircraft noise suppression, discussing community aspects of jet and fan noise and physical mechanisms of jet noise

01 p0009 A69-10349

Optimal coherent reception of frequency diversity signals in multipath channels investigated for noise immunity

01 p0028 A69-10375

Coherent diversity reception of discrete signals in presence of concentrated noise investigated for use of optimal solution circuits for noise elimination

01 p0028 A69-10376

Mechanical behavior of synthetic layer coatings for damping instrumental vibration and noise

01 p0168 A69-10399

VTOL aircraft design for noise reduction, discussing localities tolerance, noise sources, operating cost, etc

01 p0009 A69-10421

Aerodynamic configurations to reduce sonic boom at supersonic speeds

01 p0007 A69-11028

RF feedback amplifier analytical design, deriving open and closed loop feedback noise figure expressions by use of equivalent noise model

02 p0217 A69-12150

Large amplitude Pc 1 events at College, Alaska, noting more ionospheric cosmic noise absorption accompanying large events

[AFCL-69-0059] 02 p0244 A69-12397

Ultra cone system for ultralow noise reception of RF space communication from Mariner 5 during occultation by Venus

[JPL-TR-32-1340] 02 p0220 A69-12429

Gas discharge tubes and waveguide mounts as reference noise accuracy standards for S, C and X bands in WR284, WR137 and WR90 waveguides

02 p0210 A69-12439

Injection phase locking for synchronizing oscillators and reducing FM noise

02 p0220 A69-12450

Cavity stabilization of microwave oscillator for noise reduction

02 p0220 A69-12451

Low noise high power transistor oscillator using directional coupler, noting isolated port for injection phase locking

02 p0220 A69-12452

Gradual memory system for noise reduction in adaptive control system

02 p0212 A69-12606

Low noise microwave amplifiers for radio astronomy and satellite communications receiving system preamplification

03 p0402 A69-13017

Noise reduction techniques in digital and analog data transmission over space program distances, emphasizing deep space missions

03 p0394 A69-13398

Soviet MI-8 and MI-4 passenger helicopters noise characteristics with turboprop and piston engines and during landing takeoff and horizontal flight

03 p0366 A69-13417

Weak periodic signal separation from noise using single and multichannel analog adders

04 p0597 A69-14848

Telemetry technique utilizing thermocouple sensors for base heating determinations on free flight blunt cone in shock tunnels, noting electrical noise reduction

[AIAA PAPER 68-407] 04 p0604 A69-15514

Jet engine inlet noise control by modification of inlet guide vanes

05 p0811 A69-15622

Noise reduction in parametric electron beam amplifier by cooling two frequency resonator noise to liquid nitrogen temperature

05 p0728 A69-15654

Frequency stabilization and noise suppression in argon FM laser

[IEEE PAPER P-7] 05 p0775 A69-16325

Sonic boom reduction devices, discussing supersonic electroaerodynamic flow with shock waves, gas discharge one dimensional continuum analysis, power expenditure and aerodynamic interaction

[AIAA PAPER 69-38] 06 p0869 A69-18150

FM noise in two and three chamber klystron oscillators, discussing tubes to reduce noise and relative merits of active or passive stabilization circuits

07 p1096 A69-18438

Injection locking method for reducing FM noise in Gunn effect oscillators

07 p1102 A69-18862

Helicopter rotor noise generation, propagation reception and reduction, discussing design charts for rotational noise spectra as function of design and flight variables

[AIAA PAPER 69-195] 07 p1055 A69-19563

Peak acoustic attenuation frequency shifts and peak power insertion losses in air flow ducts related to air specific weight changes

07 p1117 A69-19700

Acoustical measurements on MD-12 passenger aircraft before and after application of insulation for noise suppression

07 p1057 A69-19704

Anti-interference TV circuit using delay lines applied to radar systems, discussing false alarm probability and detection probabilities

08 p1271 A69-19919

Field noise reduction frequency spectra afforded by spacecraft shroud, basing estimating criterion on flight test data

09 p1609 A69-21892

Sonic boom reduction by azimuthal redistribution of supersonic aircraft pressure field variation

[AIAA PAPER 68-159] 09 p1434 A69-21948

Fan compressor noise reduction indicating effects of design, number of blades, vane/blade ratio, aerodynamic parameters and blade spacing

[ASME PAPER 69-GT-9] 09 p1571 A69-22505

Noise rejection in linear amplitude detector during weak harmonic signal reception improved by limiting threshold voltage
09 p1460 A69-22645

Noise in instrumentation systems, considering coupling and current noise source and reduction by isolation and filtering
10 p1691 A69-23231

Solar cosmic ray event of July 7 1966, noting sudden cosmic noise absorption reduction and particle absorption domination start at 0120 UT
10 p1768 A69-23771

Metals with combined high damping and good mechanical properties for solving fatigue, noise and vibration problems
10 p1715 A69-24044

DC conversion amplifier commutation induced noise and signal ratio as function of shunt capacitance across vibrator load investigated for increased noise stability
11 p1845 A69-24555

Frequency noises suppression in Gunn diode oscillators by frequency stabilization, using high Q external cavity
11 p1853 A69-25608

Concorde jet engine silencer concept and characteristics
[AIAA PAPER 67-391] 12 p2148 A69-26759

Rolls Royce noise and compressor test facility for continual lowering of engine sound pressure levels, considering sound generating mechanisms
13 p2240 A69-27616

Matched diodes in monolithic balanced mixer by diode array fabrication for noise suppression
13 p2233 A69-28071

Phase distortion, conversion of delay coefficients into channel noise and determination of waveguide delay coefficients for FM satellite communication systems
[IEEE PAPER 68-TP-382-COM] 13 p2222 A69-28153

Reduction of noise from underexpanded axisymmetric jet flows using radial jet flow impingement
[AIAA PAPER 68-81] 13 p2248 A69-28212

Input signal random amplitude fluctuations suppression by parametric power limiter, discussing limiting frequency determination and dependence on signal amplitude
13 p2236 A69-28573

L-band parametric amplifier operated in liquid N for noise reduction, discussing measurement circuit for gain, bandwidth and noise figure
13 p2237 A69-28644

Aircraft noise alleviation through flight procedures improvement, home building modification and noise standards legislation
14 p2392 A69-29154

Aircraft noise control at source through high bypass ratio engine modification, FAA decibel standards and higher capacity aircraft for increased traffic density
14 p2509 A69-29156

Urban noise control over transportation systems including aircraft and highway traffic operating beyond local noise ordinance purview
14 p2541 A69-29157

Noise reduction techniques using injection phase locking and high-Q cavities for HF oscillator high order multiplier and avalanche diode oscillator microwave sources
14 p2420 A69-29458

Optimized receivers synthesized for narrow band radio signal filtration, comparing noise rejection properties of various pulse modulation types during speech transmission
14 p2413 A69-29464

Airport noise control responsibility for airport and community planners using perceived noise level, noise and number index and community annoyance index as planning criteria
14 p2541 A69-29506

TR tubes spurious harmonic power generation investigated for intersystem interference reduction and investigation criteria, discussing effects of incident power, gas pressure and tube geometry
15 p2573 A69-30032

Ferrite frequency mixers used with heterodyne receiver, studying combination and cross noise rejection efficiency
15 p2574 A69-30129

Weak periodic signal separation from noise using single and multichannel analog adders
15 p2607 A69-30241

Jet noise causes and suppression, discussing nozzle exit area geometry
15 p2671 A69-30372

Aircraft noise environmental problem, discussing improvement through source, transmission and receiver control options
15 p2585 A69-30373

Noise sources in S band parametric amplifier with GaAs varactor diode measured at liquid nitrogen temperature, considering noise reduction
15 p2578 A69-30636

Three dimensional effects of potential minimum near cathode emitting axisymmetric beam, relating electric fields distribution to noise reduction coefficient
15 p2568 A69-30794

Slender body aerodynamics combined with wave propagation theory for sonic booms of aircraft configurations, propeller and helicopter noise, sonic boom alleviation, etc
16 p2732 A69-31867

Aircraft noise assessment, discussing computer programmed formula, noise contours and duration calculation, with appendices presenting engine noise characteristics, air and ground attenuation, etc
16 p2735 A69-32021

Unsuccessful space charge noise suppression measurements on field emission tubes, obtaining diffusion and shot noise measurements at high currents
16 p2752 A69-32384

Noise reduction in parametric electron beam amplifier by cooling two frequency resonator noise to liquid nitrogen temperature
16 p2762 A69-32511

Test rig vehicle design for noise research on single stage high bypass ratio fans for quieter turbofan powerplants
[AIAA PAPER 69-492] 16 p2767 A69-32727

Noise abatement and smoke emission reduction from aircraft engines
[AIAA PAPER 69-489] 16 p2746 A69-32764

Helicopter noise characteristics, discussing effects of noise reduction measures on design and operations
[AHS PAPER 352] 17 p2915 A69-33525

Microphonic noise measuring systems for airborne radar system design for noise reduction
17 p2937 A69-33628

Cryogenic applications to low noise reception development in radio astronomy, planetary radar and communication with deep space probes
17 p2921 A69-33685

Sonic boom theory for steady flight in atmosphere without winds, discussing sonic boom reduction by aerodynamic means
17 p2902 A69-34017

Jet and compressor noise, discussing noise suppression techniques and engineering applications
[AIAA PAPER 68-550] 17 p3022 A69-34019

Helicopter rotor vortex noise data analyzed for noise suppression, obtaining sound power equations
17 p2896 A69-34034

Airborne communication receiver solid state interference blanker circuitry comprising blank box insertable between antenna and RF input
17 p2943 A69-34132

All-weather operations, aircraft size, air traffic and noise as airport design factors, discussing financing priorities for runway construction, facilities and personnel
17 p3004 A69-34207

Aircraft noise abatement oriented toward compatibility between airports and adjacent metropolitan environs, analyzing results for theoretical and actual airports
[AIAA PAPER 69-800] 19 p3453 A69-35593

Quiet military aircraft design factors, considering human hearing characteristics, noise suppression methods, propeller noise-performance relationships and jet engine noise nature
[AIAA PAPER 69-792] 19 p3243 A69-35637

Technology trends in airbreathing propulsion, discussing noise control for subsonic jet transports, turbine blade cooling, etc
[AIAA PAPER 69-774] 19 p3244 A69-35648

Equivalent circuit demonstrating noise reduction through input transistor integration into passive receiving antenna, stressing circuit loss control and preamplification role
19 p3281 A69-35764

Finite difference scheme for primitive equation model, emphasizing two grid internal noise suppression to improve gradient force expression accuracy
19 p3364 A69-36507

Low noise microwave devices performance and price, discussing transistor and tunnel diode amplifiers, traveling wave tubes and price reductions via manufacturing methods
20 p3504 A69-36913

Photon actuated switch consisting of 10 input binary logic gate and solid state relay to reduce aerospace vehicles self generated noise
20 p3505 A69-37289

Transistorized low noise reception antennas with built-in amplifying elements, discussing radiation patterns and noise problems
21 p3683 A69-39264

Dornier Do 31 VTOL jet aircraft noise alleviation in far field, discussing shielding, interference, ground attenuation and reflection
22 p3862 A69-39932

Airport design for noise reduction, considering aircraft noise, runway orientation and flight paths
22 p3926 A69-40433

Noise reduction research for hydraulic machines, examining piston pumps noise generating mechanism
22 p3870 A69-41238

Commercial jet aircraft thrust reversers and noise suppressors developed by Rolls-Royce, discussing compatibility, reliability and applications
[SAE PAPER 690410] 23 p4200 A69-41638

Low noise nuclear precession magnetometer noise rejection optimization design specifications for measuring geomagnetic field components
23 p4165 A69-41868

Noise elimination by filtering in high power microwave transmitters, noting practical design tradeoffs
23 p4142 A69-42235

Wideband vertical electric field noise reduction in ELF/VLF atmospheric receiving systems using bucking, delayed feedback and frequency rejection units
23 p4128 A69-42504

NOISE SPECTRA

Noise resistance investigation of period synchronization systems described by Markov chains, determining phasing error for circuits
01 p0031 A69-10881

Ruby laser limiting gain, stimulated emission loss, noise loss and spectral distribution determined by radiation intensity, pumping power and mirror reflection
02 p0256 A69-12000

3.3 mm radiometer long integration time performance and output noise spectral distribution
02 p0220 A69-12433

Calibration of coaxial line noise sources in terms of rectangular waveguide standard, discussing use of adapter for comparison
02 p0210 A69-12436

Mismatched errors associated with Y factor power ratio measurement effect on microwave noise-temperature calibrations
[JPL-TR-32-1345] 02 p0211 A69-12442

Thermal noise from passive linear multiports, noting influence of temperature and absorption coefficients
02 p0211 A69-12443

Microwave measurements of AM and FM noise spectra with video frequency and RF coverage flexibility and high sensitivity
02 p0221 A69-12455

Amplitude noise spectra of X band microwave oscillators with Si avalanche diodes, noting various contributions and dependence on circuit and operating parameters
02 p0221 A69-12456

Probability density function measurement for microwave noise generator
02 p0221 A69-12459

Voltage probability density of wideband microwave noise, discussing measurement technique of dividing spectrum down by noise bandwidth
02 p0211 A69-12460

Pseudonoise generator producing controllable repetitive random signal patterns used to evaluate instrumentation system
03 p0403 A69-13188

Ariel 3 receiver for measuring galactic noise spectrum, discussing loop antenna use with swept receiver, false terrestrial signals, etc
03 p0404 A69-13581

Propagation of long electromagnetic waves in ionosphere and exosphere, discussing thunderstorm noise spectrum
03 p0396 A69-13702

Noise correlation effect on noise stability of diversity reception receiver with weighted coherent summation of signals
04 p0557 A69-14789

Equivalent noise circuit for resonant transistor amplifier, deriving expression for noise factor
05 p0729 A69-16084

Continuous and triggered audio frequency noise bands associated with ionospheric lower hybrid resonance frequency observed on OGO 2
05 p0754 A69-16257

Audio frequency noise in p channel MOST at cryogenic temperatures, noting trap contribution
06 p0979 A69-17151

Linear regression and related procedures in identifying dynamic processes
06 p0901 A69-17360

Noise characteristics of transistorized feedback amplifier stages for application in amplifier design
07 p1090 A69-18284

Magnetospheric ELF noise, discussing OGO 3 spectrum analysis
07 p1124 A69-18834

Noise generator design employing diffused Ge avalanche transit time diode
07 p1107 A69-19156

Semiconductor diode noise experimental measurements indicating fluctuation-dissipation theorem /FDT/ inapplicability to all quasi-equilibrium systems
07 p1113 A69-19596

Spectral distribution of intermodulation noise of AM and FM transmission systems calculated by probability theory
08 p1271 A69-19916

Noise properties of junction diodes and bipolar transistors as basis for low noise amplifiers design
08 p1286 A69-20839

Turbomachinery multiple pure tone noise associated with acoustic resonance of inlet cavities examined by narrow band filter tracking integer multiples of rotative speed
[ASME PAPER 69-GT-2] 09 p1572 A69-22509

Intrinsic amplitude and frequency fluctuations in transistor autooscillator, examining natural additive noise influence
09 p1469 A69-22632

Jet airliners noise characteristics, calculating spectral content and duration of perceived noise level and total noise level
09 p1435 A69-22637

Quantum phase noise in He-Ne laser, considering amplitude fluctuation, spontaneous emission and oscillator linewidth
10 p1704 A69-23669

Temperature effects on noise levels in field effect transistors, discussing Lorentz spectrum
11 p1853 A69-25391

Coaxial radiator as feed for low noise paraboloid antennas, presenting pattern synthesis
11 p1856 A69-25635

Critical review of statements concerning previous paper on noise in transistor mixers at HF
11 p1857 A69-25662

Amplitude spectra of periodic pulse sequences or pseudonoise sequences calculated using weighting and shape functions
12 p2030 A69-26389

LF generation-recombination noise in MOS transistors with depletion region impurity centers, analyzing noise resistance saturation and drain-voltage dependence
12 p2041 A69-26627

Noise resistance of period synchronization systems described by Markov chains, determining phasing error for circuits
12 p2031 A69-26645

Noise rejection and carrying capacity of wideband and narrowband discrete systems transmitting complex signals in concentrated noise spectrum
13 p2218 A69-27213

Common source and common gate FET connections showing equivalent noise figures
13 p2227 A69-27237

Noise duration and spectral complexity effect on subjective rating of disturbance level
14 p2408 A69-29152

Aircraft noise alleviation through flight procedures improvement, home building modification and noise standards legislation
14 p2392 A69-29154

Millimeter and submillimeter microwave spectrometric studies of high temperature plasmas and noise emission, discussing instrumentation and absolute measurements
14 p2451 A69-29786

Collisionless Ce and K plasmas measurements to determine steady state parameters and LF oscillations, noting noise relationship to drift instability
14 p2499 A69-29849

Potential noise stability of reception in binary communications system with active pause in channel for unknown signal arrival time
15 p2563 A69-30134

Wideband PM communication system with synchronous reception and automatic control of reception bandwidth, providing improvement in noise stability
15 p2564 A69-30147

Spectral correlation characteristics of amplitude modulated signal with background noise at envelope detector output
15 p2576 A69-30348

Vibration/acoustics digitally controlled environmental testing, describing configuration and operation of control system and statistical requirements for noise generation
15 p2587 A69-30388

Simultaneous particle flux and VLF noise spectrum measurements by rocket sounding, discussing equipment, telemetry and calibration systems and experimental data
15 p2605 A69-31423

Spectrum of clipped noise in optical spectroscopy, considering double clipping at zero photon number
15 p2571 A69-31486

Photon bunching effect in spatially coherent noise field enhanced by superposing monochromatic coherent signal and/or shaping incident noise spectra
16 p2749 A69-31694

Fluorescence noise in Q switched ruby laser atmospheric backscattering experiments, noting relation to optical radar spurious and enhanced returns
16 p2777 A69-32183

Gaussian amplitude distribution of 1/f noise by oscilloscope display and scanning with movable slit
16 p2752 A69-32383

Amplitude-frequency characteristic and noise bandwidth of electron tube reflex autodyne operating in over or under voltage mode and including IR feedback
16 p2761 A69-32477

Geomagnetic field effects on microwave noise spectrum in earth-ionosphere resonator, calculating field energy spectrum near resonance maximum, discussing excitation by lightning
17 p2918 A69-33034

Acoustic spectrum averager for Mariner spacecraft environmental tests, calculating rms average 1/3 octave spectrum bands in real time
[JPL-TR-32-1442] 17 p2946 A69-33658

Beat frequency measurements in far IR due to harmonic mixing of klystrons, discussing noise role
17 p3006 A69-33674

Earth-ionosphere waveguide excitation by lightning discharges and geomagnetic field influence on ELF noise spectrum
17 p2928 A69-33865

Spectral analyzer for structural noise spectrum of scanning ray TV transmitter
17 p2939 A69-33909

He-Ne laser light noises due to discharge current fluctuations and random mode beat
19 p3330 A69-35760

IR detector limiting noise voltage /photon noise/ due to photon arrival fluctuations at responsive element determined using Planck radiation law
19 p3309 A69-36059

Alouette satellite VLF observations data of ionosphere ion composition determined from ion whistlers and noise bands with LF cut-off
20 p3530 A69-37873

Ionospheric background noise levels and sources determined from Alouette data
20 p3495 A69-37874

ELF noise band observed by Alouette 2 receiver interpreted in terms of electrostatic proton cyclotron harmonic waves, using digital power spectrum techniques
20 p3497 A69-38079

VLF and LF emission characteristic features and origin mechanism in auroral regions of ionosphere, discussing satellite observation of noise spectrum in space
21 p3708 A69-38495

Noise influence on heart rate and oxygen consumption of young male subjects under simultaneous physical stress
21 p3654 A69-38908

Antenna noise spectrum in collisionless isotropic plasma, considering plasma fluctuation theory and reciprocity theorem
21 p3683 A69-39284

Generation-recombination noise due to trapped charge fluctuation at impurity centers in Si junction
15 p2719 A69-30374

gate field effect transistors transition regions, using lumped equivalent circuit
22 p3911 A69-40009

Quadrupole self and cross correlations of directional jet noise patterns, including frequency spectra and correlations
22 p3931 A69-40891

Nonlinearity effect on spectral shape and bandwidth in connection with frequency modulation by noise
22 p3900 A69-40923

Speech interference aspects of noise measured as function of level and spectrum of speech and noise at listener ear, using simplifying nomogram
23 p4101 A69-41495

Natural and man-made radio noise measurements, including formula for calculating signal strength of coherent interference
23 p4126 A69-42217

Digital data transition tracking loop mean square phase noise computed as function of input SNR by Fokker-Planck technique
23 p4130 A69-42514

NOISE STORMS

Solar noise storms structure and movement, discussing localization of type 1 burst emission into zones in solar corona
02 p0315 A69-11824

Structure of sources of noise storm enhancements and stationary type 4 bursts, discussing head and tail components
02 p0328 A69-12753

Solar atmosphere physical properties tabulated to interpret radio bursts and noise storms
02 p0329 A69-12786

Solar flare flux density and dynamic spectrum on 30 October 1968 at 80 MHz, showing noise storm positions and type II-III burst sources
17 p3025 A69-33807

NOISE THRESHOLD

Human auditory function during exposure to prolonged low barometric pressure unaffected with normal oxygen partial pressure
03 p0378 A69-14206

Phase locked loop discriminator in threshold region, discussing effects of loop parameters, detuning error and modulation
04 p0580 A69-15471

Phase error mean square value in phase lock loop determined from linear differential equations to determine output SNR and noise threshold
05 p0720 A69-16342

IC selection for minimum thermal effects, discussing speed, power dissipation, maximum operating frequency and noise threshold
06 p0894 A69-17219

Pure tone threshold determination based on pulse tone technique with modified audiometer
06 p0882 A69-17836

Hearing at LF, comparing noise and tone thresholds
21 p3664 A69-38986

Tradeoffs between measurement accuracy, false alarm and detection probability in practical setting of thresholds for Neyman-Pearson criterion, analyzing noise samples
22 p3902 A69-41221

Envelope detection threshold levels definition for low input SNR based on apparent modulation depth reduction
22 p3902 A69-41225

NOISE TOLERANCE

Noise and relations between environment and man, discussing sound perception, measurement and judgment of noise annoyance and harm
01 p0020 A69-10741

Impulse noise damage risk criteria, discussing maximum tolerable exposure, hazardous exposure and methods of impulse noise measurement
07 p1066 A69-19171

Interference capability of noise of different frequency bandwidths, comparing weighted sound pressure to loudness level
08 p1276 A69-20857

Noise level criteria for acceptable voice communications in office environment, noting acclimatization
11 p1830 A69-24797

Airport noise control responsibility for airport and community planners using perceived noise level, noise and number index and community annoyance index as planning criteria
14 p2541 A69-29506

Human noise tolerance laboratory and community studies, discussing proposed tone corrections for aircraft noise
15 p2719 A69-30374

Continuous and intermittent noise effects on audiovisual checking task performing subjects, considering omission errors
17 p2911 A69-34009

Jet engine noise technology evaluation, noting effects on airport neighbor
[RAES PAPER 13]
22 p3999 A69-40492

Optimum linear adaptive design of dominant-type systems with large parameter variations assuring system response within prescribed bounds by reducing internal noise sensitivity
22 p3918 A69-41011

Regression process in acetylcholine level in rats after mechanical vibrations and noise exposure
23 p4079 A69-41382

Acoustic analyzer response of man during prolonged noise effect of varying pitch and intensity
24 p4278 A69-43408

NOMENCLATURES

Differences concerning utilization of IR detectors, discussing nomenclature, fluctuations and definitions of detection, translation and readout
19 p3308 A69-35905

NOMINAL VALUES
U APPROXIMATION

NOMOGRAMS
U NOMOGRAMS
NOMOGRAPHS

Nomograph for planning circular planar aperture antenna arrays, discussing element totalling and spacing, layout geometry, sidelobe suppression and scan loss from broadside
01 p0037 A69-10017

Nomogram for nozzle thrust coefficient evaluation
03 p0365 A69-14102

Range measurement accuracy of radar automatic equipment, discussing nomograms for split-gate tracker, cyclic and pulse length errors and multipath reflections
08 p1275 A69-20228

Approximate nomography problem solution based on application of graph theory
08 p1343 A69-20663

Nomogram for aircraft rudder pedals design and construction, considering thigh and knee angles
10 p1649 A69-23377

Molten iron plane melt flow duration and mass in bimetallic castings production determined using nomogram
18 p3149 A69-35289

Solar activity effect on F 2 layer geometrical parameters, plotting prognostic maps using nomographic methods
20 p3526 A69-37663

Nomograph for rapid estimation of pressure drops across orifices in pneumatic systems using real gas data with illustration for nitrogen
20 p3467 A69-38186

Nomograms for spectral transparency of atmosphere at 2.8-5.6 microns
21 p3759 A69-39117

NONADIABATIC CONDITIONS
U ADIABATIC CONDITIONS

NONADIABATIC THEORY

Nonadiabatic reacting homogeneous system undergoing density changes, predicting chemical reaction rates and intermediate combustion products from chain reaction kinetics
[AIAA PAPER 69-87]
06 p1036 A69-18054

Nonadiabatic and stochastic mechanisms for cyclotron resonance trapping and heating in magnetic mirror geometries
08 p1364 A69-20518

Unsteady nonadiabatic shock waves in stellar gas dynamics, analyzing energy losses due to ionization at shock fronts by extended Chiznell-Wisem method
15 p2682 A69-30508

NONAXISYMMETRY
U ASYMMETRY

NONCONDUCTORS
U ELECTRICAL INSULATION

NONCONSERVATIVE FORCES

Energy transfer in circulatory force fields, noting mechanism changes for simultaneously operative original field and adjoint field energy sources
04 p0671 A69-14415

Damping effects on elastic systems stability under nonconservative forces, correlating stability and quasi-stability regions
22 p4040 A69-39981

Lepton nonconvergence implications for experiments involving solar neutrinos, showing effect on capture rate at earth for pep neutrinos
23 p4194 A69-41596

NONDESTRUCTIVE TESTS
NT PRELAUNCH TESTS
NT STATIC FIRING

Ultrasonic holography applications in nondestructive testing, describing conversion of ultrasonic field into optical field
01 p0078 A69-10132

Nondestructive testing of brazed liquid propellant rocket engine components and assemblies, describing radiographic, ultrasonic, thermographic, and leak test methods
01 p0085 A69-10534

Mass spectrometer helium leak testing of cryogenic storage vessels, noting procedures and insulation and evacuation of jacket space
02 p0252 A69-11811

X ray spectrographic camera for nondestructive spectrum analysis of small samples
03 p0427 A69-13101

Beryllium nondestructive tests, discussing eddy current inspection, ultrasonics, film radiography and scintillation
[SAE PAPER 680652]
03 p0444 A69-13546

Nondestructive measurement of thin transparent film thickness by interference method, noting diffusion profiles
03 p0430 A69-13634

High temperature eddy current crack detection technique for atomic reactor components under high thermal gradients
04 p0607 A69-14972

Nondestructive testing of quality of electroexplosive devices based on determination of heat flow between bridge wire and surroundings
04 p0607 A69-14973

HF inductive analyzer of concentrations of electrically conducting solutions and nonconducting mixtures
05 p0763 A69-15994

Nondestructive technique to measure residual and working stresses in machine parts, using specially designed circuit
06 p0926 A69-17497

Holography for display devices, nondestructive testing, quality control, high speed, microscopy, acoustic testing, sonar, data storage, etc
06 p0928 A69-17873

Nondestructive testing of welds - Conference, Chicago, January-February 1967
07 p1139 A69-18794

Ultrasonic search units in nondestructive tests, discussing piezoelectric materials and contact and immersion services
07 p1139 A69-18795

Nondestructive tests for determining braze bond quality of open face honeycomb seal rings, using low viscosity liquids with fluorescent additives
07 p1140 A69-18797

Nondestructive weld tests of propellant tanks in Saturn V-S-1C stage
07 p1140 A69-18798

Chromium steel /E1961/ susceptibility to structural damage under cyclic loads by nondestructive inspection of magnetic hysteresis and eddy current losses
07 p1141 A69-19316

Weld defects, discussing criteria for rejection, harmful and harmless defects, welding process and procedures and weld vs base metal defects
07 p1143 A69-19696

Magnetic tape recording of ultrasonic test information with oscilloscope used for playback
07 p1117 A69-19697

IR evaluation of multilayer etched circuit boards, discussing testing of circuit distributive properties and individual layers
07 p1117 A69-19698

Integrated nondestructive testing systems to ensure welded assemblies reliability for Saturn 5 program, including surface defect detection
07 p1117 A69-19699

Nondestructive testing methods for civilian transport aircraft production, overhaul and maintenance
07 p1143 A69-19702

Holography combined with laser interferometry for nondestructive testing in materials, components and assemblies
07 p1137 A69-19777

Acoustic emission from welds in stainless steel plates used for detecting defects in single and multiple pass machine welds
08 p1318 A69-19963

Nondestructive testing methods application to fiber-bonded composites, noting X ray diffraction, radiography and ultrasonics
08 p1339 A69-20498

Microwave techniques for bondline defects and thickness of reentry elastomeric heat shield material bonded to titanium alloy
09 p1499 A69-22306

IR nondestructive, in-process microweld evaluator, discussing energy correlations and tensile strength
09 p1510 A69-22347

Tumbling motion for testing gyroscopic devices quality
10 p1689 A69-22927

Pulse echo ultrasonic nondestructive testing of C-5 adhesive bonded aluminum composites with multiple bond lines
10 p1698 A69-23047

FM Lamb wave system for flaws and defects detection in thin metal sheets
10 p1699 A69-23048

Nondestructive testing methods for Saturn 5 space vehicle with emphasis on NDT equipment for Apollo program
10 p1699 A69-23050

Neutron radiography facility for production nondestructive testing inspection of aerospace components, noting collimation, neutron/gamma ray ratio optimization and neutron source
[AGN-TP-229]
10 p1699 A69-23051

Liquid crystal coatings for determining fracture initiation flaws in material structures, considering stress concentration and hysteresis heating
10 p1699 A69-23053

Radiographic, ultrasonic, thermographic and leak test quality control for brazed liquid propellant rocket engine components
10 p1699 A69-23054

Two fold congruency method for statistical evaluation of fluorescent flaw detection penetrant sensitivity and reproducibility
10 p1700 A69-23374

Holographic techniques for acoustical imaging to obtain three dimensional images of opaque objects encountered in nondestructive testing
10 p1695 A69-23544

Nondestructive thermal tests using liquid crystals thermal sensitivity for measurement of temperature changes and visualization of temperature gradients
11 p1892 A69-25293

Coherent optical flaw detection and surface microstrain measurement techniques including holographic interferometry, optical correlation and diffraction
12 p2180 A69-26305

Electrical conductivity measurements combined with indentation hardness measurements for nondestructive evaluation of commercial precipitation hardenable aluminum alloys
12 p2114 A69-26307

Tempered glass plates strength nondestructive testing by scattered light photoelastic method, discussing application to aircraft windshield sandwich structures
[AIAA PAPER 68-323]
12 p2118 A69-26768

Soviet book on quality control of materials and machine parts by ionizing radiation covering radiation hazards and protection
13 p2268 A69-27935

Radioactivity induced in solid materials for components microautoradiography and radiograph information quantitative evaluation
13 p2297 A69-28157

Electron fractography used in machine parts failure analysis to detect internal and surface cracks, forging defects, stress corrosion, fluid leakage sources, etc
13 p2269 A69-28182

Ultrasonic images detection for nondestructive testing including surface-relief technique, Pohlman cell and scanning with piezoelectric transducers
13 p2269 A69-28661

Stainless steels stress corrosion susceptibility, detecting chromium carbide in martensitic matrix by galvanic nondestructive test method
14 p2466 A69-29935

High speed picture thermography in nondestructive testing, describing IR scanning frame rate and thermal image recording
15 p2618 A69-30316

Radiology and thermography in nondestructive reliability testing of electronic equipment
15 p2610 A69-30850

Nondestructive testing - Conference, Montreal, May 1967
15 p2630 A69-31502

Controlled electric field capacitance probes for nondestructive testing, discussing field projection pattern and direction effective depth of field, applications, etc
15 p2616 A69-31503

IR techniques for nondestructive testing, discussing applications to heat injection and generation and IR test equipment capabilities

15 p2630 A69-31504

Generalized parametric form of IR radiometric scan method applied to void detection problems, designing test techniques and establishing inspection procedure

15 p2631 A69-31506

Cholesteric liquid crystal film application to test surfaces for thermal mapping, giving technique for flow pattern determination

15 p2631 A69-31507

Delta technique for ultrasonic weld inspection, noting ability to detect randomly oriented weld defects

15 p2631 A69-31508

Schlieren and photoelastic methods for continuous and pulsed ultrasonic waves propagating in transparent media, discussing nondestructive testing applications

15 p2617 A69-31510

Mechanical testing of high temperature materials subjected to thermal cycling by high power pulsed laser beam

15 p2636 A69-31512

Eddy current and ultrasonic applications to aircraft engine inspection, discussing electric and magnetic methods for quality control during fabrication

15 p2632 A69-31516

Ultrasonic probe selection and standardization for nondestructive testing, discussing instrument sensitivity and probe losses

15 p2617 A69-31517

Book on ultrasonic testing of materials covering ultrasonics application to nondestructive testing, flaw detection and quality control

16 p2790 A69-32125

Nondestructive ultrasonic, spectroscopic and TV test methods reducing time for inspection and increasing reliability of turbines

17 p2978 A69-33330

Nondestructive tests for glass filament wound composites void content, considering test methods and mechanical properties prediction role

17 p2979 A69-33656

Nondestructive testing education, current programs available and future needs

18 p3232 A69-34518

Nondestructive eddy current testing of chromium steel for early stage fatigue damage of aircraft components

18 p3136 A69-34777

Betatrans for nondestructive quality control for materials and products under special conditions

18 p3136 A69-34779

Deformation detection by stress wave analysis technique /SWAT/, noting pressure vessel applications

18 p3223 A69-35080

Integral scalar equation describing signal attenuation by acoustically soft disk for mirror-shadow method of ultrasonic flaw detection

18 p3137 A69-35109

UV excitation intensity increased for improving luminescent nondestructive testing, describing UV dosimeter and irradiation standards

18 p3138 A69-35115

Oriented glassfiber reinforced plastics elastic moduli and tensile strength along anisotropic axes determined nondestructively, considering component content and material porosity

18 p3162 A69-35359

Signature analysis diagnostic methods for reliability tests involving final product checkout and early fault detection

19 p3322 A69-35574

Radioactive Kr as gaseous penetrant for nondestructive test inspections, noting high sensitivity

19 p3322 A69-35575

Holographic interferometry for nondestructive testing of aircraft materials, discussing applications to quality control

19 p3322 A69-35576

Ultrasonic nondestructive testing technique for fatigue induced damage location and criticality in filament wound fiberglass cylinders, correlating damage to residual life

19 p3322 A69-35577

Echo amplitude measurements in ultrasonic testing to estimate flaw sizes and difficulties from artificial reflecting targets

19 p3323 A69-35578

Nondestructive testing methods for Saturn 5 space vehicle with emphasis on NDT equipment for Apollo program

19 p3431 A69-36329

Fracture mechanics application to pressure vessel design and analysis, reviewing nondestructive inspection techniques

19 p3439 A69-36438

Nondestructive test method using transducer action of flow in stress field causing plastic deformation with energy release as acoustic emission

19 p3314 A69-36634

Optical devices for nondestructive testing of large piston engine equipment

20 p3547 A69-36921

Acoustic visualization for nondestructive testing, describing image formation by lenses, reflectors, holography, Bragg diffraction and phase contrast

20 p3512 A69-38269

Acoustic emission signals for nondestructive testing and material evaluation, determining critical stress intensity factor for stress corrosion cracking

20 p3512 A69-38270

Three dimensional X ray pictures of flaws shape and location in various materials

20 p3551 A69-38311

Spectrographic analysis for ferrous and nonferrous alloys as nondestructive testing

20 p3551 A69-38313

Eddy current machine /nondestructive testing device/ for aircraft structures surface cracks detection

21 p3719 A69-38391

X ray diffraction as nondestructive technique for measuring residual surface stress

21 p3845 A69-39476

Nondestructive testing for aerospace corrosion, discussing light, penetrants, X rays, sound, ultrasounds, electrical conductivity, magnetic reaction and radiation backscatter methods

21 p3733 A69-39495

Scattered light mean intensity determination in twilight aerosol atmosphere from satellite observations, formulating boundary value problem

21 p3717 A69-39656

Reliability testing as complex element of reliability engineering noting nondestructive, destructive and selective demonstration testing, stress-time correlations, risk levels optimization, etc

22 p3952 A69-40022

Nondestructive testing techniques for flaw and defect detection, discussing radiography, ultrasonics, penetrants, thermal and magnetic methods, etc

23 p4169 A69-41529

Nondestructive testing for fatigue cracks, considering X ray, magnetic particle, penetrant, ultrasonic and eddy current inspection techniques

23 p4234 A69-42451

Scattered light methods inaccuracies for nondestructive analysis of generally stressed photoelastic models, noting modified Mini-max method

24 p4396 A69-42737

Nondestructive thermal method of measuring wall thickness and channel blockage in investment castings used in aircraft parts production

24 p4312 A69-42754

IR inspection system for detecting interstitially caused alpha segregation in Ti alloy disks

24 p4318 A69-42757

NDT techniques relation to engineering design problems with failure potential, discussing management planning and cost analysis

24 p4318 A69-42769

Nondestructive detection of titanium hydride formation in threaded joints of Ti alloy pressurization tanks by neutron radiography

24 p4320 A69-42998

NONEQUILIBRIUM CONDITIONS

Nonequilibrium carriers during semiconductor depolarization, noting microwave oscillation energy absorption in silicon and zinc sulfide crystals

01 p0138 A69-10434

Algorithms for three dimensional supersonic gas flow incident on bodies applied to calculating oxygen flow in asymmetric nozzle

01 p0060 A69-10724

Free bounded continuum processes effect in nonequilibrium gases of finite continuous opacity, noting curves of growth for finite plane parallel layer emission lines

01 p0121 A69-10959

Thermodynamics of ideal multiatomic gases in local nonequilibrium, approximating real gas system by ergodic subsystems grouped by degrees of freedom

02 p0350 A69-11552

Altitude effects on radar attenuation in nonequilibrium solid propellant afterburning rocket exhaust plumes

04 p0685 A69-14730

Oxygen index test for precise flammability ratings of plastics on numerical basis, eliminating drawbacks of ignition, end point and nonequilibrium conditions operation

04 p0621 A69-14957

Nonequilibrium statistical physics for kinetic theory of gases and statistical mechanics, noting irreversibility and entropy

05 p0793 A69-15769

Nonsteady combustion models for gases, liquid fuels and solid propellants, reviewing errors in physics and mathematics [AIAA PAPER 69-178]

06 p1037 A69-18100

Nonequilibrium electron temperature, concentration and reflection in reentry boundary layers, discussing heat transfer and ionization energy diffusion [AIAA PAPER 69-82]

06 p0915 A69-18190

Phase transformations in titanium alloys under nonequilibrium conditions

07 p1162 A69-18774

Oxygen index test for precise flammability ratings of plastics on numerical basis, eliminating drawbacks of ignition, end point and nonequilibrium conditions operation

08 p1335 A69-20114

Atomic and molecular excitation mechanisms in nonequilibrium gases up to 20000 K

08 p1354 A69-20146

High enthalpy air flow in hypersonic conical nozzle, calculating chemical and thermodynamic nonequilibrium effects with computer program

09 p1433 A69-22610

Fluctuation kinetics of electron system in nonequilibrium state arising in semiconductor in strong electric field, considering lattice and interelectron scattering

16 p2824 A69-31569

Nonequilibrium initial condition combustion effects on propellant performance for hydrazine/ chlorine pentafluoride and hydrogen/fluorine with equilibrium, kinetic and frozen nozzle flow [AIAA PAPER 69-469]

16 p2832 A69-32659

Nonequilibrium inlet conditions effect on combustor performance during H and vitiated air combustion, studying ignition delays [AIAA PAPER 69-457]

16 p2881 A69-32767

Nonlinear rarefied gas flow problems with thermal nonequilibrium solved by numerical methods, considering intermolecular collisions effect

17 p2952 A69-33325

Nonequilibrium processes behind shock wave in shock tube supersonic air and nitrogen flow, using photoelectrical shadow method

21 p3695 A69-38961

Entropy definition for nonequilibrium states, using mathematical theory of stability of motion applied to kinetic equations of irreversible processes

23 p4238 A69-41366

Nonlinear plasma physics, discussing nonequilibrium effects, wave-wave coupling, wave- particle interactions, single nonlinear wave behavior, etc

23 p4197 A69-42312

Low pressure arc discharge motion between concentric electrodes in transverse magnetic field, noting Lorentz, stationary and retrograde modes due to temperature nonequilibrium [AIAA PAPER 68-708]

24 p4359 A69-43644

NONEQUILIBRIUM DRAG

U FRICTION DRAG

NONEQUILIBRIUM FLOW

Hypersonic flow of nonequilibrium diatomic gas on and near wedge, studying shock curvature variations

01 p0005 A69-10161

Molecular velocity distribution function in nonequilibrium flows, detailing asymptotic expansions in different velocity domains for weak shock

01 p0059 A69-10330

Numerical solution of chemically reacting boundary layer equations, noting loss of accuracy due to numerical cancellations

04 p0588 A69-14737

Variational methods for nonequilibrium thermodynamic processes noting fluctuation theory introduction

04 p0551 A69-15314

Linear theory of equilibrium and nonequilibrium gas flows applied to steady two dimensional nonequilibrium flow of inviscid nonheat-conducting gas

06 p0909 A69-17327

Nonequilibrium supersonic flow calculation of detonating mixture past blunt bodies applied to flow of hydrogen-oxygen mixture past sphere

06 p0859 A69-17343

Chemical nonequilibrium, mass transfer and viscous interaction effects on spherically blunted cones at hypersonic conditions, emphasizing stagnation point [AIAA PAPER 69-168] 06 p0862 A69-18047

Experimental and numerical nonequilibrium shock layer around cones in hypersonic pure oxygen flows with simultaneous rotational, vibrational and dissociation relaxation [AIAA PAPER 69-136] 06 p0864 A69-18141

Nonequilibrium chemical reaction effect on decay in spontaneous explosion for reactive expelled gas and inert expelling gas 07 p1119 A69-18705

Laminar boundary layer on axisymmetric blunt body in dissociated air taking into account nonequilibrium homogeneous chemical reactions 07 p1050 A69-18734

Optimum profile of supersonic nozzle with nonequilibrium flow 07 p1119 A69-18737

Linearized unsteady nonequilibrium flows produced by unsteady motion of thin foil or circular cylindrical shell in compressible gas 07 p1119 A69-18738

Flow diagnostics for high enthalpy nonequilibrium gas flows in shock tubes using long pulse ionized Ar gas laser 08 p1323 A69-19879

Characteristic equation obtained by considering world line vector, basic thermodynamic variables and metric tensor as functions of Lichnerowicz class 09 p1480 A69-21614

Sonic transmission of diatomic nitrogen during nozzle flow, presenting density dependence of natural oscillation energies and temperature 10 p1632 A69-22912

Chemical species and reactions determined for propellants in calculating nonequilibrium rocket engine performance 11 p1940 A69-24905

Gas dynamics for supersonic nonequilibrium flows, discussing method for determination of nozzle contours for maximum thrust 11 p1820 A69-25475

Relaxing gas nonequilibrium flow in plane expansion, comparing partial differential equations with method of characteristics 13 p2244 A69-27322

Chemically reacting flow field and solid surfaces, formulating nonequilibrium laminar boundary layer equations for two dimensional and axisymmetric flows 13 p2377 A69-28147

Diagnostic measurements in nonequilibrium nozzle flows compared to finite rate expansion calculations, measuring pressure, temperature and density [AIAA PAPER 69-328] 13 p2200 A69-28263

Gas and polydispersed condensate parameters of nonequilibrium two phase flow in Laval nozzle, considering particle collisions and coagulation, energy exchange and momentum exchange 14 p2391 A69-29621

Optimum nonequilibrium nozzle performance for hydrogen-fluorine propellant system, considering contour, engine/nozzle weights and recombination kinetics [AIAA PAPER 69-472] 16 p2733 A69-32652

Nonequilibrium ionized gas flow past insulated wall with corners under magnetic field, discussing flow characteristics 17 p3010 A69-32865

Compressible hypersonic turbulent boundary layers solution by finite difference method, relating mixing length to velocity profile shape factor [AIAA PAPER 69-684] 17 p2955 A69-33474

Adiabatic compressible turbulent equilibrium boundary layer integral method analysis extended to study nonequilibrium laminar flows, deriving dissipation integrals, presenting numerical solutions [AIAA PAPER 69-689] 17 p2955 A69-33481

Time dependent analysis for quasi one dimensional, vibrational and chemical nonequilibrium nozzle flows approaching steady state solution by finite difference technique [AIAA PAPER 69-668] 17 p2893 A69-33491

Nonequilibrium, real gas and nose bluntness effects on hypersonic slender body flows, analyzing similitudes, free stream temperature, velocity and relaxation [AIAA PAPER 69-708] 17 p2894 A69-33501

Transport processes effect in shock wave on hypersonic flow past blunt body in neighborhood of stagnant point, noting heat transfer 18 p3086 A69-34910

Nonlinear differential equations for nonequilibrium gases with internal degrees of freedom, considering

spatially homogeneous gas and oscillatory relaxation in harmonic oscillators 18 p3122 A69-34911

Nonequilibrium behavior of shock standoff distance ahead of spheres at low supersonic Mach number 18 p3089 A69-35385

Vibrational deexcitation shocks in expanding nonequilibrium nozzle flows extended to include embedded adiabatic shock 18 p3089 A69-35386

Electrostatic probes in nonequilibrium collision dominated ionized gas flow ballistic ranges 19 p3291 A69-35716

Electron concentration in hypersonic nonequilibrium shock layer flow by two wavelength laser interferometry, noting wavelength dependence of refractivity 19 p3306 A69-35742

Nonequilibrium laminar boundary layer of dissociating air on axisymmetric body determined using concentration profiles of oxygen and nitrogen components 19 p3239 A69-36395

Relaxing polyatomic gases transport properties from Boltzmann equations obtained without knowing excitation probabilities of internal molecular degrees of freedom 19 p3300 A69-36787

Ordered sets of Massieu thermodynamic characteristic speeds for reacting gas mixtures relevant to nonequilibrium flow fields compared to Laplacian and Newtonian speeds 19 p3452 A69-36802

Radiating gas flows during hypersonic planetary reentry, discussing atmospheric composition, shock layer characteristics, nonequilibrium flows, etc 20 p3513 A69-36982

Modified model for vibration-dissociation relaxation coupling phenomena in nonequilibrium high temperature gas flow, discussing parameter U variation with kinetic temperature 20 p3514 A69-37208

Quasi-one dimensional analysis for nonequilibrium flow of dissociated diatomic gas through converging-diverging nozzle, discussing critical mass flow rate 22 p3927 A69-40583

Ionized He and Ar plasmas nonequilibrium nozzle flows, noting temperature difference between electron gas and atom-ion gas, calculating flow parameters 22 p3861 A69-41047

Dissociational nonequilibrium transonic flow near nozzle throat analyzed for diatomic gas with equilibrium vibrational energy, using perturbation method 22 p3861 A69-41177

Nonequilibrium boundary layer of dissociated diatomic gas over catalytic flat plate in hot hypersonic uniform flow 22 p3934 A69-41181

Linear small perturbation approximation for supersonic nonequilibrium flows past oscillating airfoil in two dimensional wind tunnel, noting Laplace transform solution 23 p4061 A69-42349

Viscous shock wave chemical relaxation for diatomic nonequilibrium dissociating gas flow, using Navier-Stokes and chemical kinetics equations 24 p4302 A69-43487

Charring ablator char zone nonequilibrium flow and chemical reaction kinetics as function of temperature, using thermal environment simulator 24 p4409 A69-43512

NONEQUILIBRIUM IONIZATION

Inert gas nonequilibrium MHD power generation in shock tube 02 p0196 A69-12425

Quasi-one dimensional analysis of MPD arcs with nonequilibrium ionization taking into account finite rate processes and variable area [AIAA PAPER 68-87] 02 p0291 A69-12505

Thermodynamic comparison of MHD generators using Brayton and Rankine cycles, showing Rankine cycle conversion at higher channel Mach numbers for nonequilibrium ionization 03 p0369 A69-14154

Nonequilibrium ionization rate in arc discharge, studying perturbations effect in near cathode Langmuir layer 04 p0635 A69-14763

Radiation intensity distribution from first negative and positive nitrogen system in equilibrium gas flow behind propagating shock front, discussing kinetics mechanism and electronic states 05 p0745 A69-15890

Nonequilibrium low temperature plasma theory for ionization and particle distribution based on discrete

and continuous spectra states, discussing electron distribution function 06 p0969 A69-17906

Linear approximation of ionization instability in disk channel of nonequilibrium MHD generator, calculating interatomic collisions frequency as function of temperature 06 p0871 A69-17911

MHD generators with nonequilibrium conductivity, taking into account ionization instability of plasma 06 p0871 A69-17912

Nonequilibrium electron temperature, concentration and reflection in reentry boundary layers, discussing heat transfer and ionization energy diffusion [AIAA PAPER 69-82] 06 p0915 A69-18190

Statistical theory of ionization for magnetoactive plasma with nonequilibrium concentration level and nonequilibrium energy distribution 07 p1193 A69-19142

Electrical characteristics of linear Faraday generator using binary mixture of noble gases with nonequilibrium ionization 08 p1359 A69-19880

Nonequilibrium three dimensional boundary layer over slightly yawed cone analyzed for air dissociation and ionization parameters, noting binary scaling application 09 p1430 A69-21965

Nonequilibrium ionization in central regions of low temperature plasma, describing charged particle drift by using diffusion time concept 10 p1732 A69-23440

Electrical conductivity, electron density and population temperature as functions of current density in Cs-He thermal plasma studied with nonequilibrium ionization model 10 p1732 A69-23443

Excitation and ionization relaxation of cesium seeded argon gas computed for stepwise increase of electron temperature 10 p1732 A69-23444

One dimensional analysis of stationary argon flow in linear Hall generator from continuity, momentum and energy equations, discussing electron heating and nonequilibrium ionization 10 p1736 A69-23465

Toshiba blowdown MHD test facility experiments on nonequilibrium ionization, using K seeded He for working gas 10 p1673 A69-23477

Nonequilibrium ionization effects on performance of subsonic constant area MHD generator, using closed cycle blowdown loop facility 10 p1637 A69-23481

Magnetic field induced nonequilibrium argon plasma ionization relaxation processes obtained with allowance for flow parameters change in relaxation zone 11 p1922 A69-24225

Supersonic air flow past blunt body of revolution in presence of nonequilibrium chemical reactions, ionization and molecular excitation 11 p1820 A69-25474

Kinetics of air plasma formation in wake of shock wave propagating in air, taking into account nonequilibrium ionization 12 p2062 A69-26674

Load factor role in nonequilibrium ionization process in Faraday-type generator, determining relationship with conductivity 13 p2314 A69-28361

Lower ionospheric homonuclear O combinations nonequilibrium processes by simplified balance equations, determining height distributions and ozone concentration 13 p2255 A69-28542

Electron energy distribution function and nonequilibrium ionization rate in near cathode layer of thermionic converter 14 p2404 A69-29255

Nonequilibrium multicomponent ionization calculations for stagnation merged shock layer of hypersonic blunt body by successive accelerated replacement [AIAA PAPER 69-655] 17 p2892 A69-33469

Electron energy distribution for Cs plasma in emitter region of ignited mode thermionic converter, noting nonequilibrium ionization effect 19 p3380 A69-36442

Closed cycle MHD with gaseous working fluids and steady state nonequilibrium ionization 21 p3777 A69-39479

Electron temperature profile across shock wave in weakly ionized nonequilibrium argon by numerical integration of energy conservation equation, noting three body recombination 21 p3698 A69-39791

Radiation emission and ionization in precursor and nonequilibrium region behind shock wave during approach to equilibrium in argon-like gas
22 p4006 A69-40526

Optimization of Faraday MHD generators with nonequilibrium ionization and plasma turbulence, assuming electrons at Saha equilibrium at elevated temperatures
24 p4256 A69-43682

NONEQUILIBRIUM PLASMAS

Nonequilibrium nitrogen plasma spectral line intensities calculated assuming optically thin plasma
01 p0124 A69-10960

Statistical description of nonelastic processes in nonequilibrium plasma in transverse magnetic field, using kinetic equations for distribution functions
03 p0476 A69-13412

Magnetoconductance of nonequilibrium plasmas in indium antimonides, noting anisotropy effect of electric and magnetic field orientation
03 p0486 A69-13463

Electrons relaxation caused by ionization and recombination in nonequilibrium plasma, using Kerrebrock model
03 p0477 A69-13609

Relaxation method for separation of continuous electron/ion recombination spectrum from electron spectrum in nonequilibrium gas discharge plasma
04 p0639 A69-15369

Free electron kinetic equation including inelastic electron-atom collisions derived for nonequilibrium low temperature plasma, showing interrelated electronic and atomic energy distribution
05 p0802 A69-15889

Nonequilibrium low temperature plasma theory for ionization and particle distribution based on discrete and continuous spectra states, discussing electron distribution function
06 p0969 A69-17906

Nonequilibrium of electron and gas temperatures and reaction process for force-free plasma parallel beam produced in burner by expansion of argon plasma [DVL-875]
07 p1188 A69-18277

Kinetic model describing collisions in nonequilibrium multicomponent plasma, studying pair collisions effect on stability of plasma-beam system
07 p1189 A69-18539

Two fluid approximation of one dimensional steady state flow of inviscid plasma with thermal gradients, considering ionization and recombination processes
07 p1189 A69-18691

Stationary supersonic nonequilibrium plasma source in gas vacuum expansion and nozzle flows
07 p1191 A69-18986

Statistical theory of ionization for magnetoactive plasma with nonequilibrium concentration level and nonequilibrium energy distribution
07 p1193 A69-19142

Jump conditions across MHD shock waves, reducing relations to identities applicable to nonequilibrium situations
07 p1193 A69-19242

Discharge structure and stability of nonequilibrium plasma undergoing supersonic flow through linear MHD channel
08 p1366 A69-20788

Toroidal plasma nonequilibrium in multiple confinement devices with conventional magnetically shielded supports
08 p1369 A69-20819

Electrothermal instabilities of ionization region of nonequilibrium MHD generator in presence of magnetic field
09 p1548 A69-29191

Nonequilibrium distribution functions for neutral atoms excited states in optically thin low temperature singly ionized plasma containing ions, electrons and neutrals
10 p1731 A69-23437

Two temperature plasma model applicability in analyzing nonequilibrium MHD generator
10 p1731 A69-23438

Electrical conductivity, electron energy balance, ionization equilibrium time and channel parameters in pulse discharge nonequilibrium Cs plasma containing inert gas addition
10 p1731 A69-23439

Ar-K plasma studied as possible MHD generator working fluid by investigating influence of emission and external magnetic field on nonequilibrium electrical conductivity
10 p1732 A69-23441

Electrothermal instabilities in small magnetic Reynolds number limit and ionization equilibrium at

electron temperature using quasi-linear plane wave analysis
10 p1734 A69-23456

Linear nonequilibrium MHD generator operating at Mach 2 and Hall parameter of 3 using cesium seeded helium as working fluid
10 p1636 A69-23471

Power conversion efficiency of diverging channel nonequilibrium MHD generator with small electrode losses, examining influence of channel design
10 p1637 A69-23472

MHD generator performance operating on nonequilibrium Ar plasma with K additions in presence of electric fields
10 p1637 A69-23480

Faraday type MHD energy converters in nonequilibrium conduction mode, analyzing two dimensional current and potential distributions in plane normal to magnetic field
11 p1826 A69-25397

Nonlinear algebraic equation system describing populations of excited atoms of low pressure nonequilibrium cesium plasma, determining ionization coefficient and molecular ion concentration
11 p1934 A69-25567

Radiative energy losses in nonequilibrium plasmas, considering plasma geometries and distributions of Planck's function
13 p2305 A69-27374

Laminar MGD electrode boundary layer of thermal nonequilibrium plasma from collisionless Langmuir sheath and continuum theories
13 p2310 A69-28031

Correlation functions of fluctuations in electrical characteristics of nonequilibrium electron gas during scattering, determining spectral densities and populations by kinetic equation Green function
13 p2314 A69-28445

Spectral distribution of fluctuations in stable plasma in absence of external fields, emphasizing electric field fluctuations, quasi-steady states, isotropic plasmas and thermodynamic equilibrium
14 p2490 A69-29103

Electron concentration in low temperature nonequilibrium steady state plasma, including Saha equation applicability criterion
15 p2662 A69-30975

Current distribution and Hall voltage in crossed fields discharge with split electrodes in nonequilibrium Ar and Cs plasmas
15 p2663 A69-30980

Nonequilibrium plasma boundary layer along channel insulator wall, noting different electron and heavy particle temperatures [AIAA PAPER 68-134]
16 p2821 A69-31873

Relaxation method for separation of continuous electron/ion recombination spectrum from electron spectrum in nonequilibrium gas discharge plasma
16 p2822 A69-32116

Electron heat transfer and spherical probe characteristics in moving nonequilibrium plasma analyzed at stagnation region as function of solid surface potential [AIAA PAPER 69-699]
17 p3011 A69-33475

Kinetic model describing collisions in nonequilibrium multicomponent plasma, studying pair collisions effect on stability of plasma-beam system
21 p3776 A69-38691

Differential approximation for radiant energy loss in nonequilibrium plasma generated from truncated Taylor series expansion of radiation source function
22 p3988 A69-40102

Thermal nonequilibrium state and effective collision frequency between protons and electrons in solar wind plasma, explaining abnormal dissipation
24 p4368 A69-43187

NONEQUILIBRIUM RADIATION

Visible and IR nonequilibrium radiation from dilute gases of upper atmosphere, describing laboratory, ground, aircraft and rocket observations of reactions and interactions
02 p0247 A69-12810

Nonequilibrium radiation from first negative band of molecular nitrogen ion excited by shock wave electron impact
13 p2245 A69-27380

Nonequilibrium conductivity and radiation of CdS, GaAs and PbS single crystals in waveguide cell under electron beam
13 p2318 A69-27886

Radiative instability problem of stream plasma system in kinetic regime, discussing Fung letter
14 p2502 A69-29960

NONEQUILIBRIUM GEOMETRY

U DIFFERENTIAL GEOMETRY

NONFLAMMABLE MATERIALS

Bromine containing unsaturated polyesters for fire retardancy and physical strengths, noting use in reinforced plastics for laminates, molding and corrosion
08 p1340 A69-20504

Flame resistant chlorine containing polyester resins, discussing preparation, curing characteristics, physical properties and reinforced plastics application
08 p1340 A69-20505

Fire retardant brominated epoxy systems for wet filament winding process, noting viscosity, pot life and NOL ring mechanical properties
08 p1340 A69-20506

Polyimide glass fabric laminates with nonflammable characteristics for high O concentration spacecraft environments applications
09 p1531 A69-22366

NONGRAY ATMOSPHERES

Composite heat transfer by conduction and radiation in nongray medium, outlining electronic computer program for numerical solutions
03 p0533 A69-13884

Correlations of stagnation point radiative heat transfer for earth reentry, noting use of nongray absorption coefficient models
04 p0685 A69-14736

Nongray radiation absorption coefficients reformulation employing alternative angular moment averaged absorption coefficients with emission [Planck]
04 p0686 A69-14744

Radiative heat transfer between parallel plates separated by nongray gas with picket fence absorption coefficient using integral equations
06 p1033 A69-17554

IR radiative heat transfer in nongray gases for non-black bounding surfaces, considering diatomic gases with single vibration rotation band
06 p1033 A69-17559

Diurnal thermal wave form driven by harmonically oscillating ground temperature in nongray atmosphere, calculating results for terrestrial and Martian atmospheres
07 p1126 A69-19036

Nongray radiation effects on compressible turbulent free jet mixing of nonsimilar gases, using stepwise spectral absorption coefficient and Beer law
08 p1253 A69-20844

Nongray models of atmospheres of early stars, giving Avrett-Krook method of correcting temperature distribution
11 p1954 A69-24361

Dwarf and subdwarf stars limb darkening tables for unblanketed nongray radiative model atmospheres
12 p2171 A69-27153

Nonlinear limb darkening corresponding to nongray stellar atmosphere model applied to light curve for compact eclipsing binary systems
15 p2689 A69-30563

Radiative energy transfer through nongray absorbing and emitting medium generating heat with graphical presentation of temperature distribution and flux
15 p2718 A69-31153

Nongray equilibrium radiative heat transfer in viscous radiating shock layer around blunt body entering high temperature nonisothermal carbon dioxide-nitrogen atmosphere [AIAA PAPER 69-636]
17 p3070 A69-33255

Nongray absorption and radiation cooling on smooth symmetric blunt bodies included in modified Maslen flow field method for radiation and large blowing [AIAA PAPER 69-637]
17 p2891 A69-33290

Fluxes and luminous efficiencies tabulated for main sequence and subgiant stars within reflection effect problem in eclipsing binaries and Chandrasekhar non-gray atmospheric models
20 p3600 A69-37479

Atmospheric structure, greenhouse effect and convective instability in window gray and nongray planetary atmospheres
20 p3615 A69-38257

Temperature structure of nongray planetary atmospheres, discussing scattering and absorption of solar energy by gas molecules, cloud aerosols and ground
20 p3615 A69-38258

Nongray greenhouse model of Venus atmosphere possessing IR opacity due to carbon dioxide, water and diatomic N compatible with Mariner 5 and Venera 4 results
20 p3615 A69-38259

Nongray models representing atmospheres of F and G supergiants computed and tabulated for 5400-6600 K and various surface gravities
22 p4015 A69-40152

Radiative transport in nongray cylindrical medium using total band absorptance [ASME PAPER 69-HT-38] 24 p4411 A69-43534

Stagnation region heat transfer with nongray gas subjected to external radiation using two step continuum absorption coefficient model 24 p4415 A69-43590

Quasi-isotropic semigray radiative transfer prediction using nongray model in bounded plane-parallel geometries for gas with spectrum from free-free processes 24 p4415 A69-43673

NONHOLONOMIC EQUATIONS

Nonholonomic congruences of trihedrons in metric theory of straight line complex 03 p0457 A69-13865

Equations of motion of nonholonomic mechanical systems in Poincare-Chetaev variables 05 p0793 A69-15778

Stability of steady state motions of nonholonomic mechanical systems, noting Chetaev method for construction of Liapunov functions 11 p1920 A69-25742

Nonholonomic coupling effect on mechanical system stabilization characteristics in terms of generalized coordinates 14 p2482 A69-28814

NONLINEAR EQUATIONS

NT CUBIC EQUATIONS

NT DUFFING DIFFERENTIAL EQUATION

NT QUADRATIC EQUATIONS

Bounds from asymptotic behavior of solutions of nonlinear integrodifferential equation arising from nonlinear oscillators in acoustics 01 p0103 A69-10001

Incompressible fluid steady motion in curved tube investigated by Fourier series, solving coupled nonlinear equations numerically 01 p0058 A69-10142

Nonlinear circuit equations describing initial phase of exploding wire, noting solution for wire resistance variation with internal energy 01 p0117 A69-10656

Transient process in n stage nonlinear amplifiers analyzed on basis of structural circuit 01 p0047 A69-10781

Power spectrum for energy transfer region in HF turbulent plasma by nonlinear equations, with results applied to subsonic ray acceleration 01 p0145 A69-10790

Convergence theorems for perturbed Newton methods for solution of nonlinear equation systems, suggesting algorithm holding Jacobian matrix elements constant during iterations 01 p0106 A69-10988

Smoothing and prediction of satellite orbit elements by stochastic approximation method, solving nonlinear equations system 01 p0158 A69-11319

Boundedness theorem for all solutions of class of nonlinear second order differential equations 02 p0271 A69-11549

Iterative process for determining periodic solutions of nonlinear nonautonomous periodic differential equations without weak nonlinearity hypothesis applied to nonlinear synchronization 02 p0271 A69-11550

Existence of smooth solution for system of equations describing nonlinear oscillations of thin plate and shallow shell 02 p0337 A69-11654

Numerical calculations for oscillatory solutions of system of nonlinear differential equations, noting circularly polarized magnetic oscillations observed near earth bow shock front 02 p0241 A69-11729

Periodic cubic differential equation of motion solved with special reference to location of fixed points and stability of solutions 02 p0280 A69-11816

Optimal control problems for Markov chains solved by iterative method, using nonlinear finite difference equations to approximate degenerate elliptic functions 02 p0224 A69-11963

Asymptotic and approximate waves constructed for system of nonlinear partial differential equations for phases corresponding to multiple characteristics 02 p0271 A69-12034

Nonlinear boundary value problems direct generalized solutions based on linearization of Bubnov-Galerkin and Ritz method 02 p0272 A69-12136

Normal derivative of solutions to Dirichlet problem for elliptic quasi-linear equation and construction of given mean curvature hyperspace in curved space 02 p0272 A69-12221

Nonlinear integrodifferential equations of parabolic type with delayed argument, discussing boundary value problems with caloric and hereditary operators 02 p0273 A69-12249

Nonlinear first order equations solution by reduction method, using nonlinear transformation of dependent variable, noting two axis gyro drift 02 p0273 A69-12541

Method of particular solutions for use with quasi-linearization in solving nonlinear boundary value problems 02 p0273 A69-12550

Independent variables reduction in nonlinear partial differential equations, detailing group theory method 03 p0456 A69-13740

Single and double resonance in system of coupled nonlinear differential equations describing vibration phenomena in mechanical and similar systems 03 p0527 A69-13748

Integrals of nonlinear equations of evolution and solitary waves, discussing double wave solutions of Korteweg-de Vries equation 03 p0468 A69-13825

Nonlinear constitutive equations for mixture of two elastic solids linearized, assuming small displacements and subsequent temperature changes 03 p0529 A69-14063

Variational principle for solving nonlinear equations in elasticity theory, theoretical mechanics and mathematical physics 04 p0668 A69-14273

Ordinary nonlinear differential equations with linear boundary conditions, discussing formulation and proof of lemma and theorems to demonstrate existence 04 p0621 A69-14416

Book on nonlinear ordinary differential equations in transport processes, noting iterative and numerical methods for diffusion, conduction, fluid mechanics and chemical kinetics 04 p0622 A69-14599

Numerical solution of nonlinear two point boundary value problems of boundary layer type, noting shock wave formation in supersonic nozzle 04 p0544 A69-14889

Asymptotic oscillation results for solutions to first order nonlinear differential-difference equations, obtaining existence-uniqueness theorems 04 p0624 A69-14950

Averaging error of system of nonlinear differential equations with time periodic right-hand sides 04 p0624 A69-15097

Method of lines for parabolic differential equations, transforming boundary value problems into initial value problem for system of ordinary differential equations 04 p0625 A69-15132

Algorithm for simultaneous nonlinear equations solution on computer, noting quadratic convergence for convex space 04 p0565 A69-15335

Hybrid assumed mode solution of nonlinear partial differential equations/initial value problems/ in time-like independent variable 04 p0566 A69-15345

Reissner nonlinear equations for nonshallow symmetrically loaded shells of revolution 04 p0684 A69-15538

Existence and uniqueness of solution to Cauchy problem for class of second order nonlinear differential equations, applying results to mixed boundary value problem 05 p0786 A69-16061

Finite plane deformation of solid body, arbitrary deformation law and arbitrary hydrostatic stresses dependence on volume change solved by nonlinear equation 06 p1021 A69-17175

Design algorithm for adaptive control of systems using nonlinear integral equations with bounded input functions, formulating optimization as conditional minimization problem 06 p0900 A69-17351

Asymptotic solutions for nonlinear differential equations with gradually varying coefficients of great resistivity 06 p0947 A69-17392

Nonlinear equations of motion for rendezvous in circular orbits, pursuer using minimum fuel and pursued having no propulsion 06 p1014 A69-17571

Variational solutions of one dimensional nonlinear Poisson-Boltzmann boundary value problems in theory of colloids and plasmas 06 p0968 A69-17784

Nonlinear equations of motion approximate solution, determining ordnance weapons aerodynamic stability coefficients from angular motion as functions of angle of attack [AIAA PAPER 69-135] 06 p0863 A69-18120

Dirichlet problem for nonuniformly second order elliptic quasi-linear equation for case of arbitrary coefficient growth 07 p1173 A69-18500

Axisymmetric jet impingement against solid plane from tube at finite distance, using nonlinear partial differential equation in finite difference form [AICHE PAPER 31F] 08 p1302 A69-19847

Mathematical methodology for nonlinear equations of transport processes, discussing group concept and similarity, boundary value conversion to initial value, etc [AICHE PAPER 31A] 08 p1302 A69-19849

Stability theorem for nonlinear mixed integral equations in boundary value problems 08 p1343 A69-20355

Supersonic flutter of circular cylindrical heterogeneous orthotropic thin panels of finite length, obtaining nonlinear flutter equation 08 p1413 A69-20404

Simultaneous nonlinear equation solving in absence of Jacobian elements 08 p1344 A69-20832

Unsteady atmospheric motions on planetary scale using Legendre polynomials 08 p1311 A69-21158

Nonlinear control theory for constant temperature hot-wire anemometers with large velocity fluctuations, noting second harmonic generation 09 p1493 A69-21421

Nonlinear analysis of transistor networks using Kron mesh method, developing quasi-linear equations characterizing common emitter transistor 09 p1471 A69-21632

Third order nonlinear ordinary differential equation solutions oscillatory and nonoscillatory behavior for conditions on variable coefficients 09 p1533 A69-22772

Two point boundary value problems solution for parameter dependent nonlinear differential equations, noting application to hinged rod bending 10 p1718 A69-22846

Nonlinear second order elliptic difference equations in associated variational problems, considering differentiable solution of Dirichlet problem 10 p1718 A69-22879

Transient process in n stage nonlinear amplifiers analyzed on basis of structural circuit 10 p1661 A69-23110

One parameter operator imbedding to modify Newton method for solution of nonlinear equations 10 p1719 A69-23519

Comparison theorem for nonlinear real vector ordinary differential equation 10 p1720 A69-23638

Nonsymmetric periodic solutions of second order nonlinear differential equations 10 p1721 A69-23641

Existence and uniqueness of solution to Cauchy problem for class of second order nonlinear differential equations, applying results to mixed boundary value problem 10 p1721 A69-23885

Periodic solutions of strongly nonlinear differential equations for behavior of automatic control systems with delayed argument, noting autonomous and nonautonomous systems 11 p1916 A69-24765

Oscillatory properties of solutions to second order nonlinear differential equations with delayed arguments 11 p1908 A69-24767

Asymptotic series solutions for initial value problem involving nonlinear ordinary differential equation with small parameter epsilon 11 p1908 A69-24881

Solution existence of nonlinear two point boundary value problems from uniqueness

11 p1909 A69-24883

Synthesis for nonlinear second order differential equations with terms satisfying Lipschitz condition, using two person games optimal strategy

11 p1910 A69-25602

Nonstiffness of nonshallow spherical dome using asymptotic method, applying nonlinear Reissner equations to finite symmetric deformation of thin shells of revolution

11 p1996 A69-25733

Nonlinear equations solvability for elastic cylindrical shells found existing for arbitrary load and clamping conditions

12 p2177 A69-25881

Nonoscillatory solutions of second order nonlinear differential equations

12 p2120 A69-26033

Nonlinear multivariable control systems synthesis, considering synthesis expressibility in known linear formulation

12 p2048 A69-26077

Cauchy problem solution for linear/nonlinear differential equations with analytic right hand sought in form of power series

12 p2120 A69-26199

Liapunov function construction with numerical algorithm, considering systems described by dx/dt equals y and dy/dt equals $f(x,y)$

12 p2122 A69-26520

Parametric variations method for solving nonlinear algebraic and transcendental equations, determining number of solutions in complex space

12 p2123 A69-26608

Nonlinear hyperbolic partial differential equations with dissipation term for periodic solutions

12 p2124 A69-26929

Analytical expressions for nonlinear partial differential equation of heat conduction in solids, giving temperature as function of time and location

13 p2372 A69-27434

Matrix eigenvalues for nonlinear simultaneous algebraic equations, discussing computer program for numerical integration

13 p2289 A69-28227

Energy transfer by simultaneous conduction and radiation between two media in intimate contact, detailing numerical solution method for resulting coupled nonlinear integrodifferential equations

13 p2378 A69-28340

Boundary value problem for nonlinear functional differential equations, discussing matrix and general operators

14 p2470 A69-28906

Two point boundary value problem converted into Cauchy problem, deriving power series solution method and algorithms for nonlinear problems

14 p2430 A69-29362

Singularity-free global solutions to nonlinear differential equations associated with variational principles, deriving necessary condition for existence from dilatation invariance considerations

14 p2470 A69-29367

Algorithm for solving Dirichlet problem of nonlinear elliptical differential equations representing atmospheric dynamics balance equation

14 p2470 A69-29401

Polynomial and nonlinear equations of state for solids and liquids analyzed using uncommon statistical and least squares methods

14 p2486 A69-29470

Beam-plasma interactions by nonlinear Vlasov equation, describing amplification of longitudinal waves

14 p2493 A69-29692

Nonoscillatory solution to nonlinear differential equation, presenting theorem describing sufficient condition for nonoscillation

14 p2471 A69-29950

Averaging procedure for solving Cauchy problem applied to two point boundary value problem for nonlinear differential equations

15 p2644 A69-30449

Numerical solution of nonlinear Volterra integral equation by Runge-Kutta-Felberg method

15 p2644 A69-30657

Taylor expansion applied to solution of nonlinear simultaneous algebraic equations in analyses of nonlinear structural systems using finite differences or elements

15 p2711 A69-30871

Singular and sliding modes /unique extremals/ in calculus of variations for optimal control problems with nonlinear equations and linear control

16 p2764 A69-31629

Starting weight increments in aircraft designs having various structural features and dimensions

16 p2735 A69-32144

Stochastic differential game theory, discussing nonlinear partial differential equations for solution, dynamic programming validity conditions, finite difference scheme, etc

17 p2994 A69-32844

Nonlinear differential equations describing one degree of freedom systems oscillations, allowing for dry friction and internal friction in elastic element

17 p3007 A69-33913

Nonlinear differential equations of mechanical systems with restoring forces approximated by odd power displacement functions and energy dissipation approximated by displacement and velocity functions

17 p3007 A69-33914

Alternating direction iteration method for nonlinear systems of equations applied to steady state heat conduction problem with nonlinear boundary conditions

18 p3163 A69-34329

Convergence of methods of tangential parabolas and hyperbolas used in nonlinear equation solution with nondifferentiable operators

18 p3164 A69-34707

Nonlinear differential equations for nonequilibrium gases with internal degrees of freedom, considering spatially homogeneous gas and oscillatory relaxation in harmonic oscillators

18 p3122 A69-34911

Nonlinear Maxwell equations applied to non-monochromatic emission for nonlinear crystal situated in resonator, examining generation of second optical harmonic

19 p3332 A69-35869

Transverse vibration and wave solutions for nonlinear equations governing transverse motions of spinning circular membrane disks

19 p3440 A69-36637

Bending of normally loaded simply supported rectangular plates in large deflection range solved by nonlinear differential equations and minimum potential energy principle

19 p3445 A69-36828

Theorem extending results of techniques for analytical solutions of nonlinear ordinary differential equations applied to terrestrial brachistochrone problem

20 p3575 A69-37205

Optimal controls for systems governed by elliptic or parabolic nonlinear equations or inequalities for differential operator, boundary conditions or unilateral constraints

20 p3568 A69-37324

Averaging methods applied to nonlinear equations in mechanics, discussing solution convergence estimation

20 p3576 A69-37440

Particular solutions and quasi-linearization combined to solve nonlinear two point boundary value problems, illustrating method with Falkner-Skan equation

20 p3515 A69-37532

Power spectrum for energy transfer region in HF turbulent plasma by nonlinear equations, with results applied to subcosmic ray acceleration

20 p3591 A69-38008

Computer solutions for nonlinear partial differential equations governing compressible flow patterns with shocks, using Lagrange coordinates

20 p3569 A69-38212

Nonlinear partial differential equations numerical solution applied to solving Cauchy problem encountered in Goursat problem

20 p3569 A69-38293

Asymptotic method applied to nonlinear equations, determining thermal conductivity coefficient for temperature distribution in moving anisotropic media

21 p3848 A69-38642

O conductance nonlinear equation solution applied to O uptake at sea level and at altitude, noting blood transport problems

21 p3654 A69-38906

Ludwig method generalized for iterative solution of nonlinear equations systems

21 p3755 A69-39002

Near resonant and nonresonant solutions of nonlinear equation describing rotating pendulum motion under periodic disturbance

21 p3771 A69-39004

Variational problem for nonlinear functionals connected with finite plasticity, extending existence and uniqueness theorems to limit analysis

21 p3837 A69-39157

Constitutive equation for nonlinear viscoelastic materials, noting validity for short times, slow motions or small deformations

21 p3840 A69-39288

Nonlinear transport equations solution methodology covering transformations, invariants, boundary value problems, numerical methods, etc

21 p3697 A69-39729

Nonlinear shallow shell theory of stress and strain formulated via shell of revolution problem

22 p4048 A69-41198

Homogeneous equilibrium equations of nonlinear shallow shell theory, obtaining six stress function solutions for strain measures

22 p4048 A69-41199

Bogoliubov method of partial averaging for nonlinear integral equations, noting application to automatic gain control theory

23 p4181 A69-41731

Normal derivative of solutions to Dirichlet problem for elliptic quasi-linear equation and construction of given mean curvature hyperspace in curved space

23 p4182 A69-41972

Nonlinear loaded integrodifferential equation analytical and formal solutions, noting role of characteristic number relation to unity

24 p4339 A69-42595

Newton method providing continuing solutions of nonlinear differential equations through limit or bifurcation points, discussing elastic stability applications [ASME PAPER 69-APMW-14]

24 p4401 A69-43102

Numerical methods for nonlinear Volterra integral equations of second kind avoiding special starting procedures, giving convergence theorem

24 p4340 A69-43228

NONLINEAR FEEDBACK

Nonlinear negative definite feedback control systems governed by parabolic partial differential equation, deriving asymptotic stability

01 p0050 A69-10239

Absolute input-output stability of time varying nonlinear feedback system established by frequency domain test similar to Popov test

01 p0054 A69-11414

Linear equivalent gain matrix of multivariable nonlinearity evaluated with equivalent gain concept for monovariable nonlinear stochastic process

07 p1114 A69-18286

Sufficient conditions for periodic motion existence of autonomous nonlinear feedback systems derived in terms of linear system frequency response

13 p2238 A69-27923

Transistorized circuit operation with nonlinear feedback through tunnel diode analyzed by piecewise-linear approximation of I-V characteristics

15 p2573 A69-30114

Stochastic saturating systems optimal control computation, considering attitude control and tracking system design by elliptical differential equation of dynamic programming

15 p2582 A69-30601

Multiple input and output nonlinear time invariant feedback system under almost constant inputs

17 p2944 A69-33743

Frequency domain and Liapunov instability criteria for attitude control system design of large booster, noting nonlinear feedback

21 p3687 A69-39381

NONLINEAR FILTERS

Ultrashort light pulses in lasers with nonlinear absorber, evaluating random intensity peak probability created by intensity fluctuations and axial modes buildup

01 p0090 A69-10791

Book on filtering for stochastic processes with applications to guidance covering asymptotic properties, nonlinear filtering, mathematical models, etc

04 p0580 A69-14386

Linear and nonlinear filtering, discussing models for signal process, linear white noise problem, optimal estimates, colored noise and finite dimensional approximation

04 p0581 A69-14696

Phase locked automatic frequency control system with additional frequency control loop and nonlinear filter in phase control loop, analyzing dynamics

04 p0559 A69-15140

Phase lock loops design with nonlinear filtering elements in low signal to noise region, considering signal demodulation, lock range and threshold

06 p0902 A69-17398

Continuous time nonlinear dynamical system states variables estimated suboptimally from discrete noisy measurements with second order nonlinear filter, deriving dynamical equations

06 p0904 A69-17939

Optimal estimation of conditional mean of posterior probability density function in multistage nonlinear filters, using Monte Carlo techniques and Bayes theorem
10 p1667 A69-24039

Optimum nonlinear digital filter synthesis for smoothing, predicting and differentiating measured quantity having uniform probability distribution over finite number of discrete values
14 p2426 A69-29421

Parameter sensitivity analysis of discrete suboptimal filters from optimal rmse estimate of actual system performance measure
18 p3110 A69-34675

Nonlinear filter theory application to PCM bit synchronization, relating bit error rates to SNR and timing jitter
19 p3270 A69-36245

Nonlinear filter theory applied to digital telemetry binary processes, using continuous time stochastic process
19 p3274 A69-36281

Lock-on band of phase locked AFC system calculated by asymptotic method, considering frequency integrating filters with nonlinear capacitances
19 p3277 A69-36569

Ultrashort light pulses in lasers with nonlinear absorber, evaluating random intensity peak probability created by intensity fluctuations and axial modes buildup
20 p3555 A69-38009

Nonlinear filter for optimal estimation of mean, covariance and third central moments of system, noting simulation tests stability for orbital navigation [AIAA PAPER 69-852]
21 p3686 A69-39380

Quadratically nonlinear filtering systems analysis and synthesis by linear methods, discussing application to partially coherent transilluminated optical systems
24 p4350 A69-42971

NONLINEAR PROGRAMMING

Nonlinear programming for optimal circuits design, discussing search method of ACOP /Automatic Circuit Optimization Program/
01 p0035 A69-10067

Optimum control with respect to minimum fuel and power consumption involving constraints based on Kuhn-Tucker conditions and saddle point theorem
02 p0223 A69-11564

Mathematical programming in optimized truss design noting reduction of components under buckling
02 p0347 A69-12536

Nonlinear programming of optimization of parameters and control functions of dynamic systems
03 p0408 A69-12974

Optimum structural design based on linear, nonlinear and dynamic programming [SAE PAPER 680752]
03 p0525 A69-13437

Book on nonlinear programming covering models for weapon systems assignment, alkylation process optimization, chemical equilibrium, launch vehicle design, etc
04 p0621 A69-14362

Book on nonlinear programming, discussing transforming of constrained minimization problem into sequence of unconstrained minimizations of appropriate auxiliary functions
04 p0563 A69-14421

Optimization of bounded feedback gains with respect to arbitrary integral performance criterion, using nonlinear programming [ASME PAPER 68-WA/AUT-8]
05 p0738 A69-16180

Nonlinear programming computational algorithm for recursive optimal estimates of constrained states of linear system
06 p0902 A69-17403

Nonlinear computer analysis of TWT small amplitude compression and small AM to PM conversion, noting coupling and circuit breaker effects
07 p1094 A69-18422

Quadratic programming and theory of elastic perfectly plastic structures under holonomic laws, proving theorems of limit analysis
07 p1235 A69-19443

Linear electronic circuit canonical synthesis by computer, using algorithm based on linear and nonlinear programming
09 p1472 A69-21781

Nonlinear programming for calculating static and kinematic failure of one dimensional structures by extending results from linear programming
14 p2418 A69-29597

Nonlinear least squares optimization program applied to atmospheric temperature sounding, solving for

temperatures at various altitudes from simulated carbon dioxide intensity measurements
17 p2960 A69-33156

NONLINEAR SYSTEMS

Gas laser amplifier nonlinear behavior in axial magnetic fields and operating with two polarized light signals of strong or weak intensities
01 p0088 A69-10010

Conditions for nonlinear control systems observability determined for use in identification procedure and in designing control unit
01 p0049 A69-10206

Geometrical existence proof of elastically coupled nonlinear systems normal mode vibrations demonstrated by existence of extremal arcs in Riemann space
01 p0166 A69-10232

Nonlinear time dependent parameters systems, analyzing governing differential equations in terms of elliptic functions
01 p0050 A69-10237

Stochastic Lurie type systems stability using Liapunov method
01 p0050 A69-10240

Time optimal control formulated for interconnected nonlinear controlled system described by fourth order differential equations
01 p0050 A69-10354

Matrix procedures for stability of nonlinear control with nonlinearities, discussing system with three actuating elements
01 p0050 A69-10355

Partial avoidance of jump resonance in nonlinear feedback system, applying procedure to feedback amplifier circuit
01 p0051 A69-10442

Controllability of dynamic systems obtained by studying vector function increments along system trajectories
01 p0051 A69-10698

Finite difference method for boundary value problem for second order differential equation, demonstrating convergence
01 p0105 A69-10721

Variational law of control elements for automatic control systems with parameters subject to random changes
01 p0052 A69-10800

Automatic control systems correction by compensating for nonlinear statistical dynamic characteristics with aid of nonlinear devices
01 p0053 A69-10801

Multidimensional nonlinear plants adaptive control by direct integration, identifying differential equations coefficients
01 p0053 A69-10875

Nonlinear buckling analyzed by mathematical models and computational procedures using organized matrix approach to structural analysis based upon finite element
01 p0171 A69-10964

Zero memory frequency independent nonlinearities response to modulated input noting FM limiter, bandpass limiter and AC carrier control systems
01 p0034 A69-11142

Stability of weakly inhomogeneous plasmas with free energy available for nonlinear resonant three wave interactions
01 p0133 A69-11212

Moderately strong electromagnetic wave propagation in fully ionized plasma, noting nonlinear effects for frequency near plasma frequency
01 p0133 A69-11213

Landau damping in plasma, noting competing effects of nonlinearities and collisions on formation of plateau in spatially homogeneous distribution function
01 p0133 A69-11215

Garden hose instability quasi-linear stabilization employing macroscopic viewpoint, discussing fluid model
01 p0133 A69-11217

Expanded describing functions used in studying nonlinear control systems with multiplication points, considering systems with/without integral response
01 p0054 A69-11359

Absolute input-output stability of time varying nonlinear feedback system established by frequency domain test similar to Popov test
01 p0054 A69-11414

Ultraspherical potential approximation in nonlinear symmetric free oscillations applied to systems with hardening and softening cubic nonlinearities
01 p0107 A69-11418

Zener diode function generators used in analog computers for solution of complex problems involving nonlinear relationship
02 p0214 A69-11595

Frequency domain stability criterion for nonlinear feedback system consisting of nonlinear amplifier, linear dynamical system and transducer with backlash
02 p0225 A69-11968

Off-axis circle criterion for frequency domain stability of feedback systems with single monotonic nonlinearity, noting relation to Popov criterion
02 p0225 A69-11969

Nonlinear boundary value problem, discussing existence and uniqueness of solutions
02 p0272 A69-12131

Book on dynamics of linear and nonlinear systems covering mathematical methods for control system design
02 p0225 A69-12228

Critical points separating stable and unstable branches of equilibrium curve of nonlinear elastic systems, discussing flexible shallow conical shell in temperature field
02 p0341 A69-12256

Optimum critical impulse for snap-through of nonlinear dissipative dynamical system of one degree of freedom [AIAA PAPER 68-143]
02 p0346 A69-12508

Frequency of periodic solutions of autonomous nonlinear systems determined by method using Duffing approximation
02 p0348 A69-12612

Noninstantaneous, nonlocal nonlinear responses of momentum and energy flows to thermodynamic forces in single component simple fluid with memory
03 p0413 A69-12921

Statistical linearization of nonlinear memory type elements with stationary Gaussian input, applying Wiener method to one class of problems
03 p0409 A69-13005

Nonlinear optics - Conference, Novosibirsk, U.S.S.R., June 1966
03 p0435 A69-13034

Tracking conditions for observability of nonlinear controlled systems with smooth characteristics
03 p0409 A69-13069

Tracking breakdown probability during unsteady operation of nonlinear automatic control system analyzed by statistical linearization techniques and Fokker-Planck equation
03 p0409 A69-13070

Statistical linearization coefficients for arbitrary nonlinearities in automatic control systems via techniques applying characteristic functions
03 p0409 A69-13071

Stability criteria for closed rigid feedback systems with stable linear part connected in series with parametric quick response nonlinear element
03 p0410 A69-13683

Self oscillating pulse relay control system investigated by approximate method for harmonic linearization of nonlinearities, noting external effects
03 p0410 A69-13684

Single and double resonance in system of coupled nonlinear differential equations describing vibration phenomena in mechanical and similar systems
03 p0527 A69-13748

Nonlinear problems in mechanics of deformable media and qualitative analysis of properties of mathematical models of physical processes involved
03 p0467 A69-13749

Nonlinear system on-line identification in presence of noise, using stochastic methods and analog equipment
03 p0401 A69-13764

Nonlinear oscillatory systems with constant delay under random forces action, noting use of stochastic difference-differential equations
03 p0468 A69-13866

Symmetric structure stability with first and second order imperfections, analyzing discrete system with n degrees of freedom
03 p0529 A69-14062

Aperiodic hydrodynamic beam instability development and energy losses, discussing plasma oscillation enhancement and nonlinearities
03 p0480 A69-14137

Supercritical damping of nonlinear mass elastic system with damping force function dependent on fractional powers of velocity, noting impact deceleration
04 p0671 A69-14413

Motion control for nonlinear system with small initial perturbation
04 p0583 A69-15096

Stability of nonlinear time varying feedback systems, using passive operator technique
04 p0583 A69-15110

Global and nonglobal stability of continuous systems with multiplicative feedback
04 p0583 A69-15112

NONLINEAR SYSTEMS

Dynamics of single loop nonlinear sampled data systems with integrator, deriving equations of periodic motions and stability conditions by means of point transformations
04 p0583 A69-15135

Synchronization problem for quasi-harmonic oscillator with nonlinearity in form of cubic parabola, discussing existence and stability of periodic solutions
04 p0578 A69-15136

Nonlinear phase locked automatic frequency control system dynamics, noting asymptotic stability of equilibrium state in whole
04 p0559 A69-15137

Creep behavior of nonlinear rigid polyurethane foam under combined stress and applicability of multiple integral and modified superposition principle
04 p0680 A69-15155

Perturbed nonlinear systems with many degrees of freedom, analyzing resonant oscillatory and rotary motions
04 p0631 A69-15536

Field distribution and potential drop in semiconducting field emitter, noting nonlinear effects in indium trisulfide, electron mobility and multiplication factor
05 p0806 A69-15630

Natural longitudinal single frequency oscillations of system of n material points connected in series by nonlinear elastic threads and with energy dissipation
05 p0832 A69-15687

Nonlinear optics noting harmonic generation of light, optical modulation, parametric oscillators, stimulated scattering, self focusing of light and resonance phenomena
05 p0770 A69-15704

Nonlinear operation of pulse control system by means of triple modulation
05 p0736 A69-15764

Nonlinear physics - Conference, Munich, June-July 1966
05 p0792 A69-15767

Nonlinear field theories for continuum mechanics noting heat, kinematics, isotropic materials, viscometric flows, elastic bodies, thermodynamics and wave motion
05 p0792 A69-15768

Nonlinear optics, noting polarization induced by electromagnetic waves, wave propagation, light wave coupling in dispersive medium and coupled laser modes
05 p0793 A69-15771

Quantum geometrodynamics in superspace, noting dynamical evolution of geometry with no real mass energy sources
05 p0793 A69-15773

Stabilization of steady motions of nonlinear controlled systems with two purely imaginary roots, using Liapunov stability theory
05 p0794 A69-15790

Nonlinear system identification by learning model, assuming discrete on-line operation and Hammerstein form
05 p0737 A69-15805

Nonlinear steady state vibration of single degree of freedom system, obtaining relationships between non-dimensional π parameters of differential equation of motion
[ASME PAPER 68-WA/DE-7]
05 p0839 A69-16172

Identification of nonlinear control systems, determining nonlinearities in differential equation by curve fit or iteration method
[ASME PAPER 68-WA/AUT-19]
05 p0738 A69-16173

Invariant imbedding and sequential interpolating filters for nonlinear processes
[ASME PAPER 68-WA/AUT-3]
05 p0738 A69-16183

Variational principles for differential equations and initial and boundary value problems in dynamic geometrically nonlinear elasticity theory
05 p0840 A69-16202

Stress-strain state for two dimensional physically nonlinear multiply connected elastic regions, noting plate with two identical circular holes
05 p0841 A69-16203

Stability of unsteady motion of nonlinear systems during limited time interval, applying differential inequalities method to Liapunov function
05 p0794 A69-16209

Method of finding new nonlinear optical materials using anharmonic oscillator model
[IEEE PAPER F-5]
05 p0808 A69-16312

Noise sources representation in pumped nonlinear systems simplifies noise analysis and noise propagation
05 p0720 A69-16345

Discrete time positive real functions defined for analyzing system stability with memoryless feedback
05 p0739 A69-16349

Monograph on nonlinear sampled data systems covering Liapunov method, discrete systems, finite difference, flow graphs, Laplace transformations, etc
05 p0739 A69-16544

Stability analysis of nonlinear and time varying discrete feedback systems
05 p0740 A69-16600

Controllable gyrator use in nonlinear network synthesis
05 p0735 A69-16620

Random search and multiple integral based Monte Carlo method for computer solution of nonlinear aerodynamic problems
06 p0858 A69-17334

Finite amplitude longitudinal wave propagation in lattices analyzed by study of compressive wave in chain of mass points with nearest neighbor interaction
06 p1022 A69-17367

Approximate optimal control of nonlinear dynamical system with state dependent variables, using stochastic linearization of system
06 p0902 A69-17404

L super P stability conditions for nonlinear time varying feedback systems derived with transformation technique and small gain theorem
06 p0903 A69-17411

Continuous time nonlinear dynamical system states variables estimated suboptimally from discrete noisy measurements with second order nonlinear filter, deriving dynamical equations
06 p0904 A69-17939

Rearrangement inequalities for positivity of nonquadratic transformations, discussing stability of nonlinear feedback loop described by difference equations
06 p0904 A69-17943

Absolute stability of dynamic control systems with single nonlinear element function of two feedback state variables, giving sufficient conditions
06 p0905 A69-17948

Circle criterion for stability of nonlinear time varying systems, considering integrator and infinite sequence of impulses in impulse response
06 p0905 A69-17949

Linear equivalent gain matrix of multivariable nonlinearity evaluated with equivalent gain concept for monovariate nonlinear stochastic process
07 p1114 A69-18286

Root-locus curve characterization of dynamic behavior of nonlinear control system, considering effects of changes in perturbing variable or reference input
07 p1114 A69-18290

Quantum electronics trends, discussing output power, mode control, stability and lifetime of CW and Q switched lasers and parametric interactions in nonlinear optics
07 p1144 A69-18468

Stress-strain response up to ultimate failure and ultimate strength of laminated composite with nonlinear orthotropic lamina
07 p1170 A69-18710

Technique for compressive mechanical behavior of viscoplastic nonlinear composites, discussing rate dependence and one dimensional stress-strain time properties
07 p1159 A69-18721

Absolute stability of distributed control system with nonlinear elements of backlash type analyzed by distributed parameters method
07 p1115 A69-19758

Differential method with invariance principle used to analyze nonlinear invariant systems, determining physical realizability conditions
08 p1296 A69-20234

Nonlinear controller design by dynamic programming method, discussing block diagram
08 p1296 A69-20236

Nonlinearities identification in closed loop systems using harmonic balance principle for transforming measured block diagram into diagram of simple form
08 p1297 A69-20302

Time response of second order nonlinear overdamped systems calculated by Krylov-Bogoliubov method of variation of parameters
08 p1297 A69-20356

Stability analysis of model reference adaptive control system with sinusoidal inputs, using reformulation of fourth order Runge-Kutta method
08 p1297 A69-20357

Stability region of second order nonlinear autonomous system determined by numerical computational method
08 p1297 A69-20358

Transient response spectrum of nonlinear cubic spring mass system subjected to step function input, discussing viscous damping effects on peak response
08 p1413 A69-20402

Dynamic programming for nonlinear suboptimal control system with minimum Q factor, developing nonlinear functional with controller motion restraint
08 p1297 A69-20416

Nonlinear optical effects in He-Ne and ruby lasers noting laser gain, frequency splitting, frequency differences in coupled lasers and frequency band narrowing
08 p1327 A69-20768

Nonlinear behavior of two stream instability between cold electron and ion streams
08 p1367 A69-20800

Nonlinear feedback shift register circuit design by logical sequences
08 p1298 A69-20835

Differential dynamic programming algorithms of second and first order for optimal control, considering nonlinear unconstrained and constrained problems
09 p1531 A69-21415

Particular solutions in nonlinear two point boundary value problems, showing convergence for uncontrolled and controlled systems
09 p1531 A69-21416

Equations adaptable to computer for RLC circuits containing linear and nonlinear n -terminal networks derived by nodal method
09 p1472 A69-21779

Perturbation theory for analyzing nonlinear boundary value problems
09 p1540 A69-21894

Transistor large signal saturation time constant dependence on injection ratio, noting nonlinear response and saturation transistor switch storage time
09 p1464 A69-22117

Nonlinear optics, discussing materials, polarization, harmonic generation, light mixing, parametric amplification and oscillation, stimulated scattering, absorption, reflection, refractivity and self focusing
09 p1518 A69-22124

Conjugate gradient and Davidson-Fletcher-Powell methods applied to nonlinear optimization problems
09 p1474 A69-22442

Van der Pol nonlinear oscillation theory adapted to microwave reflex klystrons, explaining locked and unlocked monotonic operational modes
09 p1466 A69-22444

Ultimate state periodic analysis of nonlinear electric systems by approximation methods in calculus of variations, discussing functional concept
09 p1474 A69-22448

Solutions boundedness in autonomous nonlinear systems with single nonlinearity, using Lure type Liapunov functions to prove theorems
09 p1533 A69-22449

Nonlinear one element control system design based on correlation between responses of linear systems
09 p1475 A69-22537

Frequency domain stability criteria accuracy for application to fourth order nonlinear position control system
09 p1475 A69-22591

Nonlinear control plants model with pure delay effect identified by harmonic balance method
09 p1475 A69-22669

Stability conditions for nonlinear pulse width and pulse time modulation systems, considering pulse element properties and system continuous part frequency characteristic
09 p1476 A69-22672

Stability and dissipativity conditions for nonlinear controlled systems subjected to parametric and continuously acting disturbances
09 p1476 A69-22717

Geometrical stability criterion similar to Popov criterion for single loop time varying nonlinear control systems analysis
09 p1476 A69-22784

Nonlinear Lagrange equations and iterative solutions for studying strain state of mechanical structures on basis of very small displacements
10 p1793 A69-22888

Plasma electron beam nonlinear interaction, considering equations of motion of electron distribution function, plasma wave spectrum and mode coupling effects
10 p1729 A69-23407

- Electrothermal instabilities in small magnetic Reynolds number limit and ionization equilibrium at electron temperature using quasi-linear plane wave analysis
10 p1734 A69-23456
- Gas laser with nonlinear absorbing cell in resonator, discussing effective gain dependence on squared field amplitude, hysteresis phenomena and output power
10 p1704 A69-23625
- Differential game for determining singular fuel optimal control of plant with uncertainty in dynamic equation
10 p1667 A69-24041
- Optimal controls for differential system nonlinear in state function and linear in control function
10 p1667 A69-24057
- Response and stability of self sustained two degrees of freedom system with nonlinear damping, noting harmonic oscillations
[ASME PAPER 69-VIBR-24]
10 p1806 A69-24171
- Nonlinear large amplitude vibrations of flexible beam with pinned ends supported simply on rigid base noting frequencies, modes, waveforms and stress distribution
[ASME PAPER 69-VIBR-43]
10 p1807 A69-24181
- Parametric amplifying systems with lumped reactive nonlinear elements, emphasizing UHF systems
11 p1844 A69-24448
- Second order dynamic systems stability, analyzing nonlinear and self excited oscillations by using two differential equations
11 p1915 A69-24535
- Differential equations for effect of sinusoidal force with slowly varying frequency on dynamic behavior of nonlinear vibrator, using phase surface technique
11 p1916 A69-24760
- Random periodic forces effect on single frequency oscillations of nonlinear nonautonomous system with distributed parameters, discussing perturbed boundary value problem
11 p1916 A69-24761
- Periodic solutions of strongly nonlinear differential equations for behavior of automatic control systems with delayed argument, noting autonomous and nonautonomous systems
11 p1916 A69-24765
- Asymptotic method for single and multifrequency oscillations of quasi-linear control systems with distributed parameters and delayed time coordinate
11 p1916 A69-24766
- Random oscillations of nonlinear elastic system described by nonlinear partial differential equations
11 p1918 A69-24781
- Stress concentrations in physically nonlinear multiply connected elastic media, discussing rods, thin plates and bodies with cavities
11 p1976 A69-24783
- Existence theorems for hyperbolic genuinely nonlinear systems of conservation laws, studying Cauchy problem
11 p1909 A69-25163
- Initial conditions estimation problem for nonlinear system asymptotic stability and satisfaction of output constraints on state variables
11 p1909 A69-25290
- Nonlinear DC magnetic fields for nonhomogeneous isotropic current free regions in presence of ferromagnetic materials, discussing analytic solutions of boundary value problems
11 p1888 A69-25311
- Nonlinear bang-bang optimal control problems solution based on differential dynamic programming, noting use of Pontryagin adjoint variables
11 p1860 A69-25444
- Stability of systems with sector nonlinearities determined by converting feedback equation into positive operators equation and by introducing appropriate multiplier
11 p1860 A69-25450
- Mathematical model for initial conditions of asymptotically stable nonlinear control system to estimate region of acceptable motions
11 p1861 A69-25453
- Numerical prediction for nonlinear transient response of structures, considering geometric and material nonlinearities in systems with line elements
11 p1993 A69-25526
- Periodic solutions of quasi-linear self contained system with several degrees of freedom in case of commensurate frequencies, showing coordinates functions breakdown
11 p1920 A69-25749
- Recursive estimation of noisy nonlinear multivariable systems in white noise by Kalman, second order nonlinear and iteration filters
12 p2046 A69-26062
- Perturbation theory of nonlinear control systems with periodic coefficients and small perturbation terms, exemplifying satellite attitude control
12 p2173 A69-26067
- Nonlinear multivariable control systems synthesis, considering synthesis expressibility in known linear formulation
12 p2048 A69-26077
- Uncontrollable modes effect on transient/steady behavior and limit cycles characteristics of nonlinear multivariable control system
12 p2048 A69-26078
- Liapunov functions applied to stability analysis of nonlinear multivariable direct and indirect control systems with time lags
12 p2048 A69-26079
- Dynamic behavior of nonlinear continuous multivariable systems represented by equations derived from block diagram, stressing digital computer properties
12 p2049 A69-26081
- Book on nonlinear systems analysis and design covering parameter mapping, symmetrical, transient and forced oscillations and stability analysis
12 p2129 A69-26121
- Liapunov function construction with numerical algorithm, considering systems described by dx/dt equals y and dy/dt equals $f(x,y)$
12 p2122 A69-26520
- Approximate solution of boundary value problems for Fokker-Planck equation to determine probability of exceeding limits in nonlinear automatic control systems
12 p2054 A69-26653
- Computationally stable solution of finite element analysis of elastic-plastic response of nonlinear discrete structures loaded beyond yield load
12 p2185 A69-26819
- Shallow hyperbolic paraboloidal shell with large deflections, analyzing nonlinear behavior with numerical method based on integral equations
12 p2185 A69-26820
- Linear plate theory deficiency for large plate deflections, considering approximation of nonlinear behavior permitting changes in form without additional terms
12 p2185 A69-26822
- Soviet collection of papers on nonlinear optics, discussing lasers, electromagnetic interactions, Q switching, dynamics, etc
12 p2109 A69-26905
- Monograph on nonlinear servosystems covering nonlinearity with/without inertia, self oscillations, linearization by forced oscillations, stability theorems and Liapunov function choice
12 p2054 A69-26966
- Computer determination of symbolic state equations for nonlinear circuits using FORTRAN notation
12 p2055 A69-27097
- Nonlinear systems disturbed by random white noise analyzed by Fokker-Planck equation for probability density in state space
12 p2124 A69-27141
- Nonlinear control systems error signals convergence to steady states in frequency domain, applying step or ramp functions to single feedback system
13 p2237 A69-27188
- Nonlinear control systems analysis by successive approximations, separating dominant component in transfer function of linear part
13 p2237 A69-27252
- Natural stress concept for analysis of nonhomogeneous strains fields exhibiting geometrical nonlinearity
13 p2359 A69-27259
- Nonlinear theory for whirling of heavy string under constant axial tension, considering orbitally stable modes for eigenvalues of rotation
13 p2359 A69-27264
- Relay control systems limit cycle calculations, comparing classical differential equation, Laplace transformation and state and phase space analysis methods
13 p2238 A69-27396
- Analog simulation of nonlinear functions of single independent variable compared digital to analog representation principles
13 p2224 A69-27531
- Stationary vibration modes of systems subject to nonlinearities using finite sums of Fourier series
13 p2361 A69-27615
- Observability of phase state of nonlinear control system noting Liapunov function
13 p2238 A69-27742
- Stabilization of nonlinear control systems steady motions for two pairs of imaginary roots
13 p2298 A69-27745
- Sufficient conditions for periodic motion existence of autonomous nonlinear feedback systems derived in terms of linear system frequency response
13 p2238 A69-27923
- Trajectory terminal state error analysis using adjoint-generated sensitivities in nonlinear time-varying systems
13 p2296 A69-27940
- Asynchronous finite state sequential nonlinear controller synthesis with few flip-flops for dynamic space vehicle systems
[AIAA PAPER 67-988]
13 p2225 A69-28201
- Autonomous and nonautonomous transient processes in conservative and nonconservative nonlinear systems, deriving equations describing perturbations under loads, solving by asymptotic method
13 p2300 A69-28529
- Conditions for nonlinear control systems observability determined for use in identification procedure and in designing control unit
14 p2424 A69-28742
- Tracking conditions for observability of nonlinear controlled systems with smooth characteristics
14 p2424 A69-28751
- Tracking breakdown probability during unsteady operation of nonlinear automatic control system analyzed by statistical linearization techniques and Fokker-Planck equation
14 p2424 A69-28752
- Statistical linearization coefficients for arbitrary nonlinearities in automatic control systems via techniques applying characteristic functions
14 p2424 A69-28753
- Periodic solution to equations describing nonlinear autonomous time lag system close to Liapunov systems
14 p2482 A69-28799
- Control systems synthesis for nonlinear plants with known Liapunov functions and constraints, considering stability
14 p2424 A69-28819
- Dynamic process during rms deviation of nonlinear system from prescribed trajectory described by nonlinear differential equations
14 p2425 A69-28822
- Extremal system of adaptive circuits adjusted by random search with varying random step distribution function
14 p2425 A69-28824
- Optimization criterion for synthesizing discrete nonlinear control system subjected to random controlling and perturbing effects
14 p2425 A69-28825
- Single-sideband signal nonlinear distortion and graphical methods for calculation of oscillator tube plate current pulse components
14 p2418 A69-28828
- Root locus method for nonlinear systems analysis, determining existence, stability and parameters of periodic solutions
14 p2445 A69-28919
- Statistical linearization of strong nonlinearity in series with random-gain amplifier element, deriving formulas for statistical gain parameters
14 p2425 A69-28920
- Iterative identification method for nonlinear control systems with single element, based on criterial functional
14 p2426 A69-29306
- Vibration damping and elastic bond positioning in nonlinear systems with coincident centers of gravity and rigid damping
14 p2537 A69-29746
- Digital simulation for radio systems nonlinear elements, outlining procedures to obtain algorithms
15 p2582 A69-30111
- Air masses transformation, solving nonlinear simultaneous system of equations of motion, heat influx and turbulent energy balance
15 p2649 A69-30647
- Sufficient conditions for asymptotic stability of motion in finite and whole of nonlinear systems by Liapunov second method
15 p2652 A69-30660
- Recognition systems nonlinear discriminant function for separating linear inseparable patterns, describing orthogonal representation, correlation ratio and average variance criteria
15 p2645 A69-30806
- Taylor expansion applied to solution of nonlinear simultaneous algebraic equations in analyses of non-

linear structural systems using finite differences or elements 15 p2711 A69-30871

Nonlinear boundary value problems for isotropic plasma with known magnetic field, examining electromagnetic waves scattering at magnetic fluctuations 15 p2569 A69-30938

Steady oscillations of active nonlinear system of nonisothermal plasma and charged particle flux, noting steady ion-acoustic waves 15 p2662 A69-30947

Oscillations analysis in quasi-linear autonomous system with two degrees of freedom, using point mapping for case of resonance 15 p2653 A69-31193

Hamilton modified principle applied to nonlinear control problems including time delay, servosystem with ideal relay and liquid level control 15 p2583 A69-31304

Nonlinear discrete on-off system phase plane system analysis by motion separation method 16 p2763 A69-31628

Nonlinear nonconservative systems asymptotic stability analysis, emphasizing Zubov construction procedure for Liapunov functions 16 p2873 A69-32059

Acceleration waves propagation in nonlinear conducting thermoelastic solid, treating homogeneously deformed and undeformed media 16 p2873 A69-32060

Book on correlation theory of statistically optimal systems covering linear continuous, discrete, nearly optimal, nonlinear, decision element and adaptive systems 16 p2764 A69-32114

Stability determination for nonlinear automatic control systems, describing mathematical methods based on Liapunov functions 16 p2804 A69-32242

Nonlinear mechanical systems vibrations damping emphasizing energy dissipation 16 p2874 A69-32245

System kinetics synthesis for nonlinear multiple lumped parameter system having responses in boundary region of phase-time space 16 p2812 A69-32247

Distribution function, harmonic and statistical linearization methods applied to study forced oscillations in nonlinear oscillatory system 16 p2813 A69-32284

Almost periodical oscillations of nonlinear systems containing quasi-cyclic coordinates 16 p2813 A69-32286

Stability and dissipativity conditions for nonlinear controlled systems subjected to parametric and continuously acting disturbances 16 p2765 A69-32550

Numerical absolute stability test for nonlinear discrete systems using bilinear transformation 17 p2994 A69-32848

Modulation transfer function based on Fourier techniques, discussing nonlinear film development process 17 p3005 A69-33080

Oscillations of nonlinear dissipative mechanical system with two degrees of freedom, possessing structural damping at joints between moving masses and base 17 p3064 A69-33915

Random excitations effects on vibrating nonlinear single degree of freedom system, statistically estimating resonance mode probability 18 p3171 A69-34554

Parametric variations of nonlinear system moving in medium with nonlinear drag, using Bogoliubov-Krylov asymptotic method 18 p3171 A69-34564

Nonlinear systems of differential equations to free oscillations about equilibrium, obtaining periodic solutions 18 p3172 A69-34591

Finite element analysis of nonlinear elastoplastic material-geometric behavior problems, describing computer program and incremental stiffness matrices 18 p3219 A69-34664

Computerized analysis and design of nonlinear servomechanisms, using describing functions technique 18 p3110 A69-34672

Exponential boundedness of system motion for Lure type forced systems, using quadratic Liapunov functions 18 p3164 A69-34674

Suboptimal closed loop control of nonlinear systems subject to quadratic performance indices by invariant imbedding concepts and maximum principle 18 p3111 A69-34678

One degree of freedom systems nonlinear oscillations differential equations periodic solutions by successive approximations, obtaining proof for convergence 18 p3174 A69-35311

Human ear frequency discrimination, discussing nonlinear functional modeling systems 18 p3097 A69-35440

Two dimensional thermoelasticity problem for nonlinear media, obtaining solutions for thermal stress concentration and boundary value problems 19 p3436 A69-35848

Nonlinear free motion of conservative oscillator with one degree of freedom calculated by collocation method 19 p3438 A69-36308

Free oscillation period of nonlinear oscillators with one degree of freedom, discussing approximation method 19 p3373 A69-36310

Steady resonance operation modes of nonlinear oscillatory and rotational systems described by differential equations with deviating argument, using averaging procedure 19 p3374 A69-36469

Observation space transformed from statistical synthesis of nonlinear closed systems to multiple control system subjected to statistically assigned perturbations 19 p3287 A69-36662

First harmonic approximation method reformulated to interpret nonlinear characteristic directly, discussing oscillation stability of servosystems 19 p3287 A69-36709

Nonlinear rotational viscoelastic membranes creep rupture and failure found dependent on function of accumulated energy and power dissipation during deformation 19 p3444 A69-36806

Periodic orbits in nonlinear dynamical system constructed with iterative method based on modification of generalized Newton-Raphson technique [AAS PAPER 68-085] 20 p3595 A69-37171

Nonlinear roll-yaw attitude motion of spinning symmetric satellite in elliptical orbit near internal or external resonance [AAS PAPER 68-124] 20 p3616 A69-37178

Nonlinear viscoelastic material properties evaluation from experimental data with illustration for polymers, deriving equations from thermodynamic principles 20 p3626 A69-37719

Variational or optimal control for delayed systems, involving integrated maximum principle for problems with nonlinear functional differential systems 21 p3754 A69-38429

Existence and uniqueness of optimal feedback control proved for autonomous nonlinear differential equations, allowing any finite number of variables 21 p3685 A69-38433

Nonlinear theory of elastic membranes accounting for thickness effects, obtaining field equations and constitutive relations for various cases 21 p3832 A69-38465

Nonlinearly elastic plates with reinforced edges, deriving differential equations for boundary conditions 21 p3833 A69-38574

Taylor instability nonlinear oscillations, obtaining uniform solutions for wavenumbers near and larger than cut-off 21 p3693 A69-38703

Dynamic system absolute stability and sensitivity to parameter variations in linear part of system calculated by graphical and analytical techniques 21 p3685 A69-38729

Nonlinear computing schemes examined for necessary and sufficient conditions of stability as derived from Miklin linear operators and Frechet derivatives 21 p3678 A69-38746

Continuity of optimal control of nonlinear plant, noting search time 21 p3686 A69-38884

Spring mass nonlinear systems under constant force excitation, studying step function responses of systems with various restoring force characteristics 21 p3836 A69-38985

Sequential filter equations for nonlinear system dynamics and observational model with linear estimator, comparing difference between white and colored noise filter results [AIAA PAPER 69-840] 21 p3686 A69-39371

Nonlinear filter for optimal estimation of mean, covariance and third central moments of system, noting simulation tests stability for orbital navigation [AIAA PAPER 69-852] 21 p3686 A69-39380

Stability of nonlinear systems with state variable feedback applied to fuel valve servomechanism 21 p3687 A69-39460

Nonlinear electromagnetic wave propagation by perturbation method previously employed to treat nonlinear boundary value problems involving partial differential equations 21 p3677 A69-39465

Electromagnetic wave propagation in nonlinear media, considering evolution and decay of electromagnetic shocks 21 p3697 A69-39670

Nonlinear compensator characteristics determination for modifying compensated system output signal under various disturbances with inputs subjected to white noise 21 p3688 A69-39862

Numerical method for solution of nonlinear systems applied to damped and undamped motion with symmetrical and asymmetrical elasticity under harmonic excitation 22 p4040 A69-39937

Nonlinear system oscillations analysis based on small parameter method and difference equations, including resonant case and stability criterion for periodic solutions 22 p3980 A69-40108

Ionization wavefronts nonlinear analysis including energy effects and ionization wave structure, discussing Joule heating due to transverse electric field 22 p3990 A69-40758

Stability boundaries of discrete circuits employing delay lines with forward and feedback links, deriving equations 22 p3918 A69-40957

Second harmonic influence on traveling wave amplifier operation employing distributed nonlinear active medium 22 p3916 A69-40963

Pairs existence of symmetrical equilibrium forms in nonlinear shallow shell under load made applicable to nonshallow shells equilibrium 22 p4047 A69-41062

Spatiotemporal patterns learning among sensory and motor organs with linearly ordered components by nonlinear networks in terms of embedding fields theory 22 p3887 A69-41196

Dynamic characteristics of nonlinear discrete systems by motion division method, using discontinuous Liapunov function for stability criteria 23 p4144 A69-41956

Nonlinear formulation for rigid jointed space frame comprised of prismatic linear elastic members, using Newton-Raphson and successive substitution methods 23 p4232 A69-42142

Absolute invariance of perturbations affecting dynamic plant achievable by inertial measurement of highest derivatives 23 p4145 A69-42369

Absolute invariance conditions for closed isolated subsystem of nonlinear differential equations of Cauchy normal form 23 p4183 A69-42372

Plasma resonances driven into nonlinear regime, using models of cold plasma driven by wave source and unmagnetized Vlasov plasma by two grid source 23 p4197 A69-42418

Sufficient conditions derived for absolute stability of dynamic systems containing nonlinear functions of several state variables 23 p4145 A69-42445

Recursive estimation of noisy nonlinear multivariable systems in white noise by Kalman, second order nonlinear and iteration filters 23 p4146 A69-42447

All-electric nonlinear actuator steering advanced tactical missiles, noting 99.29 percent delivered unit reliability during mass production 23 p4225 A69-42458

Motion equations of quasi-linear nonautonomous systems with many degrees of freedom, obtaining periodic solutions by asymptotic integration 23 p4183 A69-42477

Pattern classification and iterative methods of linear/nonlinear dynamic plants identification, introducing phi machine as universal plants model 24 p4284 A69-42672

Optimum control synthesis for nonlinear plant subject to white noise perturbation, using integral estimates of phase coordinate functions 24 p4289 A69-42949

Empirical determination of equivalent frequency characteristics of nonlinear system in random noise, assessing measurement errors
24 p4289 A69-42950

Time optimal control of soft spring showing switching locus changes
24 p4289 A69-42955

Digital analysis of nonlinear control systems dynamic stability under small perturbations, using linearized differential equations
[IS-ERI-71] 24 p4285 A69-42984

Separation theorem for arbitrary nonlinear measurements to find optimal stochastic control without dynamic programming
24 p4291 A69-43269

Multidimensional approximation algorithm for parameter optimization of nonlinear stochastic systems, detailing application to space vehicle attitude controller
24 p4291 A69-43275

NONLINEARITY

Stress concentration near arbitrary hole, assuming small deformations and physical nonlinearities
04 p0667 A69-14268

Book on nonlinear boundary value problems for ordinary second order differential equations, illustrating difference between linear and nonlinear problems concerning existence and uniqueness
04 p0622 A69-14600

Articles on automatic control systems stability, discussing relation between method of Lure and Popov criteria
05 p0740 A69-16667

Energy losses of clusters of charged particles moving through unbounded isotropic plasma manifesting nonlinearity in interaction of particle generated fields
07 p1189 A69-18528

Differentiating network with nonlinear resistance and capacitance elements, noting improvement in pulse shaping properties
08 p1295 A69-19910

Elastic potential for obtaining localized strain theory, describing deformation characteristics of compressible and incompressible orthotropic materials with physical nonlinearity
08 p1412 A69-20328

Convergence extensions in quasi-linearization for optimal control, showing results for brachistochrone and reentry trajectory problems
09 p1590 A69-21414

Singular surface theory combined with ray theory for propagation of weak discontinuities in nonlinear anisotropic media applied to MGD
09 p1547 A69-21613

Nonlinear A/x/ operators in reflexive Banach space Y characterized by weak closure of values, defining solvability conditions for equations having such operator
10 p1720 A69-23563

Long and short duration pulses interactions with nonlinear dielectric, calculating frequency variations and spectral transformations
10 p1658 A69-23953

Two photon and resonance parametric lasers nonlinear polarization theory, deriving equations for electromagnetic field oscillations
12 p2110 A69-26910

Nonlinear distortions in TWT for communication satellites applications, discussing relationship with efficiency
13 p2232 A69-28060

Nonlinear effects and turbulent behavior in beam plasma instability, studying interactions in magnetic field
15 p2660 A69-30917

Physical mechanisms for nonlinearities in electromagnetic wave propagation, analyzing plane wave instability, self focused beams propagation and laser oscillations
17 p2928 A69-33867

Book on nonlinear plasma theory covering nonlinear wave, wave-particle and wave-particle nonlinear interactions and weak plasma turbulence
18 p3180 A69-34930

Fourth rank tensors analysis describing nonlinear optical effects for 32 classes of crystalline substances
19 p3334 A69-35882

Telemetry transmitter-receiver RF links quality determination, emphasizing nonlinear effects measurement by notch noise tests
19 p3270 A69-36239

Heat conduction in medium with phase transitions, solving one dimensional nonlinear problem by calculation of isotherms and reduction to Cauchy problem
19 p3453 A69-36838

Signal amplitude no memory nonlinearity effect on performance of synthetic aperture terrain imaging radar systems and simulation of CRT film systems
20 p3490 A69-37643

Nonlinear optics, properties, light waves interaction, forced scattering and application in laser technology
20 p3555 A69-38014

Nonlinearity effect on spectral shape and bandwidth in connection with frequency modulation by noise
22 p3900 A69-40923

Hologram film nonlinearity effect on reconstructed image, discussing role of illumination type
23 p4165 A69-41636

NONNEWTONIAN FLOW

Elastoviscous flow in curved channels, analyzing nonNewtonian effects for case of circular and elliptic walls
02 p0234 A69-12608

Slow nonNewtonian flow in separation zone analyzed using finite difference scheme
04 p0587 A69-14594

Flow and heat transfer on nonNewtonian fluid about disk rotating with time dependent velocity, using Runge-Kutta-Gill technique for numerical integration
05 p0745 A69-15793

NonNewtonian effects in axisymmetric rotational flows of elastico-viscous liquids
07 p1180 A69-18815

Viscous incompressible nonNewtonian fluids flow with treatment for steady rotational problems and oscillatory motion, considering primary and secondary motions
20 p3519 A69-38319

NONNEWTONIAN FLUIDS

Heat transfer, suction and injection in plane Couette flow analyzed for Rivlin-Ericksen fluid, using perturbation method
04 p0589 A69-14970

Laminar flow of nonNewtonian fluids described via rheological three parameter model
05 p0744 A69-15678

NonNewtonian hydrodynamics equations for nonlinearly viscous and viscoelastic media, analyzing dependence on rheological model
05 p0745 A69-15786

Flow and heat transfer on nonNewtonian fluid about disk rotating with time dependent velocity, using Runge-Kutta-Gill technique for numerical integration
05 p0745 A69-15793

Turbulent flow of viscous nonNewtonian fluids in smooth pipes, noting effects of viscous stresses
09 p1481 A69-21929

Hydromagnetic laminar natural convection flow and heat transfer of nonNewtonian fluid between parallel electrically conducting walls
10 p1728 A69-23237

Differential equation for laminar flow of nonNewtonian fluid in annulus with porous walls of nonuniform permeability, considering inelastic and suction Reynolds numbers
10 p1680 A69-23690

Nonnewtonian solid propellant viscosity and pseudoplasticity utilizing rheological characterization for optimal casting and pot life determination
[AIAA PAPER 69-518] 16 p2833 A69-32665

Transformation of two dimensional boundary value equations for laminar power law nonNewtonian fluid flow to yield similar solutions
17 p2957 A69-34016

NonNewtonian power law fluids flow behavior in circular pipe entry region, taking into account energy loss due to viscous dissipation in boundary layer
19 p3240 A69-36472

Quasi-linear ordinary differential equations solutions for steady two dimensional stagnation point flows of nonNewtonian power law fluids
21 p3697 A69-39674

Linear stability criteria for two dimensional wave perturbations effects on nonNewtonian fluid flow between parallel plates
22 p3933 A69-41108

NONOHMIC EFFECT

Nonohmic microwave conductivity in semiconductor posts in rectangular waveguide, measuring incident, transmitted and reflected microwave powers
08 p1373 A69-20859

NONOSCILLATORY ACTION

Nonoscillatory solutions of second order nonlinear differential equations
12 p2120 A69-26033

NONPARAMETRIC STATISTICS

Nonparametric ranking procedures /based on order statistics/ guaranteeing preassigned probability for selection from random samples populations as good as control
08 p1342 A69-20172

NONPOLAR GASES

Collisionally induced microwave absorption by nonpolar gases, discussing dimer absorption
06 p0962 A69-17816

Nonpolar gases solubilities in aqueous KOH solutions in temperature range 25 to 100 C, noting activity coefficients, salting out coefficients and heats of solution
10 p1651 A69-22937

Viscosity, thermal conductivity and diffusion predicted for dilute nonpolar, polar and mixed gases, discussing methods for rotational relaxation collision numbers and resonant correction
21 p3850 A69-38951

NONREFLECTION

U ENERGY ABSORPTION

NONRELATIVISTIC MECHANICS

Isotropic Newtonian cosmological models symmetry shown to have velocity distribution obtainable from solution of Vlasov equation
08 p1386 A69-20073

Radiation spectrum in nonrelativistic fully ionized gas in thermal equilibrium, obtaining dispersion relation for transverse electromagnetic waves and dielectric constant
08 p1357 A69-20748

Ground state energy inequalities for N particle nonrelativistic quantum mechanical system, showing non-saturating gravitational forces and increasing binding energy per particle
17 p3028 A69-32900

Newtonian and general relativistic orbits of point mass in inverse square law force field, noting radar determination of spacecraft orbits
[AAS PAPER 68-098] 20 p3595 A69-37176

Hydromagnetic waves equations of motion for nonrelativistic case, discussing particle and fluid flow models
20 p3616 A69-38317

NONRESONANCE

Continuous nonresonant visible radiation from Ar ion laser by utilization of wide bore, wall stabilized gas discharges, noting long time frequency stability
01 p0091 A69-10815

Nonresonance parametric phenomena in distributed systems, discussing interaction between signal and parameter wave at supertlight velocity
17 p2928 A69-33868

NONRIGIDITY

U FLEXIBILITY

NONSTABILIZED OSCILLATION

Saturn 5 unstable longitudinal oscillation due to coupling of structure and LOX line frequencies solved by helium injection
11 p1967 A69-25497

Thermally induced oscillatory instabilities in spacecraft booms, rederiving thermal torque equation to predict finite twist response
11 p1994 A69-25531

Unsteady oscillations after rupture in thin homogeneous isotropic elastic plate, assuming deflection amplitude smaller than thickness
16 p2873 A69-32033

Natural oscillations frequency spectrum of turbomachine impeller blades subjected to random variations determined with frequency distribution function obtained by moments method
19 p3436 A69-35844

NONUNIFORM FLOW

Flow nonuniformity measured in shock tubes by determining heat transfer rate to fine wire probes
01 p0062 A69-11219

Oblique shock wave propagation through two dimensional steady nonuniform incoming flow, discussing higher order theory via irrotational or rotational disturbances of arbitrary amplitude
[AIAA PAPER 69-39] 06 p0913 A69-18103

Expansion tube modification incorporating nozzle plate at secondary diaphragm for reducing flow nonuniformity and contamination
[AIAA PAPER 68-371] 09 p1477 A69-21960

Nonuniform propagation of imploding shock waves by extending self similar solution to earlier times in implosion process when shock strength is finite
10 p1678 A69-22931

Imaging for flowfield of nonuniform parallel streams with thin airfoil represented by vorticity distribution, noting change of lift and moment
12 p2012 A69-26775

Nonuniform gas flow past axisymmetric body from supersonic source simulating jet discharging into vacuum, using power series of stream function
19 p3238 A69-35851

Nonuniform supersonic flow of ideal inviscid gas impinging on plane obstacle, discussing flowfields and shock wave production in impact
19 p3239 A69-36397

Interaction effects between mixing and pressure distribution of heterogeneous flow in channel, deriving criteria for predicting pressure variation sign
19 p3300 A69-36785

Incompressible fluid flow inhomogeneities effect on oscillations of airfoils cascade, noting occurrence of parametric resonance in turbine engine blades
24 p4245 A69-43479

NONUNIFORM MAGNETIC FIELDS

Penning discharge in inhomogeneous magnetic mirror field, observing high burning voltage at low current in rarefied hydrogen plasma
01 p0133 A69-11218

Quasi-neutral, steady, inviscid and nonheat conducting flow of conducting gas with high magnetic Reynolds number in plane channel with transverse magnetic field
04 p0636 A69-14984

Deceleration of conducting plasmoids moving in channels in nonuniform magnetic field
05 p0801 A69-15781

Ion cyclotron resonance acceleration and higher harmonic acceleration in axially nonuniformly magnetized plasma under influence of RF electric field
08 p1360 A69-20079

Magnetic field decay modes due to nonuniform rotation having angular velocity as increasing function of distance from axis in infinite circular conducting fluid cylinder
08 p1369 A69-20999

Plasma instability in inhomogeneous magnetic field noting wavefront structure role
09 p1546 A69-21571

Interplanetary magnetic fields characteristics and magnetic inhomogeneities spectra from cosmic ray variation studies used to obtain scattering mean free path
10 p1757 A69-22824

Microwave magnetoelastic wave propagation in ferromagnet subjected to pulsed magnetic field using coupled mode approach
10 p1746 A69-23655

Nonuniformity of magnetic field effect on steady flow of incompressible inviscid electrically conducting fluid in duct, considering Reynolds and Alfvén numbers [JPL-TR-32-1376]
11 p1923 A69-24291

Dense plasma flow across transverse inhomogeneous magnetic field, proving adiabatic nature of motion
12 p2137 A69-26528

Hydromagnetic waves propagation in finitely conducting fluid mass immersed in nonuniform magnetic field, using curvilinear coordinates based on lines of force
14 p2491 A69-29336

Magnetic mirrors, Doppler and relativistic effects, wave attenuation and radiation pressure during gyroresonant particle acceleration in nonuniform magnetostatic and HF fields
14 p2499 A69-29845

Deceleration of conducting plasmoids moving in channels in nonuniform magnetic field
18 p3181 A69-35033

Conducting gas flow parameters in coaxial duct, considering magnetic nonuniformity, Hall currents and fields distortion near electrodes
19 p3381 A69-36772

NONUNIFORM PLASMAS

Alfvén and magnetoacoustic waves propagation in inhomogeneous stable plasma situated in field with helical lines of forces
01 p0130 A69-10742

Anisotropic two component plasma relaxation taking into account dynamic shielding collective effects
01 p0134 A69-11419

Heating of nonuniform plasma cylinder in constant magnetic field by magnetic pumping with oscillating magnetic field, determining energy absorption
02 p0288 A69-12167

Diffusion across magnetic field of unstable plasma with highly inhomogeneous density
03 p0478 A69-13840

Microwave Fabry-Perot resonator for anisotropic plasma diagnostics in presence of static magnetic field
04 p0635 A69-14757

HF interaction of relativistic electron beam and plasma extended to include arbitrary variation of plasma density
04 p0637 A69-15046

Flow characteristics and sound velocity in two temperature plasma
05 p0802 A69-15796

Alfvén waves observed propagating along lines of force in inhomogeneous plasma in presence of homogeneous gravitational field
05 p0805 A69-16706

Spatial and temporal characteristics of two component electron-ion nonisothermal plasma and penetration of external LF electric field into plasma
05 p0806 A69-16745

Moment equations of Vlasov plasma used for pressure effects on gravitational flute instability of nonuniform plasma
06 p0965 A69-17515

Electrostatic waves in inhomogeneous plasma in finite magnetic field, noting dispersion relation for cold plasma and stabilization of instability
06 p0967 A69-17761

Kinetic description of inhomogeneous plasma in ring approximation, discussing Vlasov equation and velocity distribution function
07 p1193 A69-19034

Cylindrical and spherical waves propagation in weakly inhomogeneous plasma treated by geometrical optics, noting caustic surfaces
07 p1195 A69-19747

Inhomogeneous collision plasma drift instabilities in strong magnetic field analyzed by solving nonlinear equations
08 p1365 A69-20549

Wave behavior in warm inhomogeneous plasma with magnetic field perpendicular to density gradients of unperturbed plasma, solving Maxwell-Vlasov equations by perturbation methods
08 p1365 A69-20744

Symmetric Alfvén waves propagation in hydrogen plasma with nonuniform density distribution, deriving dispersion relations for fully ionized plasma
08 p1367 A69-20794

Alfvén oscillations in inhomogeneous decaying plasma from pulsed discharge with oscillating electrons
09 p1550 A69-22020

Boltzmann plots derived from spatially integrated spectral line intensities emitted from nonuniform gaseous plasmas, discussing Boltzmann temperature
09 p1552 A69-22251

Unstabilizing effect of inhomogeneities on magnetoacoustic waves in slightly ionized gases with current perpendicular to magnetic field
10 p1734 A69-23459

Pulse and CW breakdown criteria for plasmas subject to spatially nonuniform electric fields, using variational formulation
10 p1739 A69-23650

Radiative transfer equation in nonuniform magnetoactive medium derived from continuity equation for radiative energy density in space of coordinates and wave vectors
10 p1742 A69-24143

Nonlinear confining and deconfining forces of laser light interaction with inhomogeneous plasma, analyzing macroscopic motion based on ponderomotive force description
11 p1923 A69-24297

Electric field fluctuations in inhomogeneous plasma calculated by test particle method, interpreting results in convective modes terms in plasma control and stability
11 p1924 A69-24301

Normal mode dispersion at upper hybrid frequency propagating parallel to uniform magnetic field in spatially inhomogeneous plasma
11 p1924 A69-24302

Computer calculated phase velocities for surface wave and waveguide modes given for circular waveguide filled with inhomogeneous electron plasma
11 p1844 A69-24437

Plasma microwave diagnostics by multifrequency probes in geometric optics approximation, assuming inhomogeneous and semiinfinite plasmas with sharp boundaries and nonunity permittivities
11 p1926 A69-24602

Transient signal propagation through cold inhomogeneous plasma with electron density decreasing exponentially in direction of propagation
11 p1836 A69-24990

Normal mode representation of HF properties of inhomogeneous plasma, analyzing Vlasov equation for free oscillations under external driving field
11 p1929 A69-25269

Asymptotic solution for Fokker-Planck equation at low collision frequency, studying electron-ion collisions effect on universal instability in inhomogeneous plasma
11 p1930 A69-25358

HF electrostatic waves propagation in nonuniform plasma in uniform magnetic field, obtaining solutions of dispersion relation
11 p1931 A69-25360

HF electrostatic waves propagation excited by electron beam in hot inhomogeneous plasma in magnetic field, studying wave transformation and absorption
11 p1931 A69-25364

Current carrying inhomogeneous dense plasma instabilities confined in magnetic field, deriving dispersion relations in geometric optics approximation
11 p1932 A69-25537

Flute oscillation instability of dense plasma cylinder under nonuniform electric field, analyzing oscillation spectrum properties
11 p1934 A69-25707

Electron motion effects along magnetic field lines on axisymmetric torsional hydromagnetic oscillations in inhomogeneous low beta plasma, discussing resonance trapping
12 p2076 A69-27107

Multifrequency interferometer for inhomogeneous plasma density soundings
14 p2497 A69-29795

Longitudinal inhomogeneities in plasma of Q machines caused by ion emission from hot plate at different radial positions
14 p2502 A69-29959

LF electrostatic oscillations of inhomogeneous solid state plasma with small number of current carriers in parallel external electric and magnetic fields
15 p2665 A69-30042

Drift wave instability due to particle number density gradient of plasmopause, considering velocity shear modification
15 p2595 A69-30096

Wave regeneration by resonant particles interaction in inhomogeneous plasma of electrons confined in quadratic potential solved in WKB approximation
15 p2660 A69-30918

Energy absorption by cold nonuniform plasma from externally driven electric field, noting relation between plasma and driving frequencies
15 p2661 A69-30922

Nonlinear wave scattering at plasma particles and weak plasma inhomogeneity effects on plasma current instability
15 p2662 A69-30965

Covariant dispersion relations for relativistic plasma oscillations for many component plasma in external magnetic field
16 p2816 A69-31633

Propagation and linear transformation of HF electrostatic waves in hot magnetoactive radially inhomogeneous plasma, noting wavelength shortening
16 p2816 A69-31638

Temperature gradients effect on ion flute mode in low beta plasma having density gradients in x direction, obtaining instability condition
16 p2819 A69-31689

Polarization characteristics of electromagnetic waves obliquely reflected from inhomogeneous isotropic plane stratified plasma
16 p2752 A69-32391

Nonlinear interaction of plane electromagnetic wave with inhomogeneous plasma layer, noting concentration and electric field discontinuity
17 p2922 A69-33693

Ray methods application to partial differential equations for electromagnetic wave propagation in ionosphere, discussing strongly and weakly anisotropic inhomogeneous plasma
17 p2925 A69-33840

Inhomogeneities time buildup in lower ionosphere weakly ionized plasma during charged particle concentration perturbations and source temperature variations
20 p3525 A69-37658

Radioastronomical investigations of inhomogeneous near solar plasma structure
20 p3606 A69-38017

Distortion of electromagnetic pulse propagating through inhomogeneous plasma medium with linear electron density variation
20 p3496 A69-38030

Nonlinear oscillations of inhomogeneous cold plasma in hybrid resonance region
21 p3672 A69-38588

Thermal effects of resonant coupling hydromagnetic oscillations in inhomogeneous finite-beta plasmas, obtaining equations for coupling modes between Alfvén and magnetosonic waves
21 p3776 A69-38710

NONUNIFORMITY
Orthonormal aspect on vibration modes for nonuniform beams, evaluating normalization for end conditions by using Rayleigh technique
14 p2534 A69-29319

NONVISCIOUS FLOW
U TURBULENT FLOW

NORADRENALINE
Sympathetic nerve liberated noradrenaline increasing melatonin synthesis, using C 14 tracer for monitoring
22 p3871 A69-40051

Noradrenalin release from hearts of open chest dogs given artificial respiration upon occlusion of left descending coronary artery
23 p4092 A69-42053

Spontaneous rhythmic activity and mean vascular tone dependence in isolated helical rat aorta strips on extracellular concentration of noradrenalin
23 p4093 A69-42069

NOREPINEPHRINE
Pharmacological tools in autonomic nervous system research, discussing norepinephrine biosynthesis, storage, release and inactivation in mammals
02 p2000 A69-12722

Brain norepinephrine effect on daily rhythmic changes in activity of tyrosine transaminase in livers of starved adrenalectomized rats
05 p0707 A69-15582

Sympathetic neurohormones measurement in plasma of race car drivers
07 p1067 A69-19424

Norepinephrine, dinitrophenol and dicumaryl effect on brown adipose tissue of cold exposed rats
19 p3258 A69-36294

C 14-tryptophan incorporation into C 14-protein in cultured rat pineals, noting norepinephrine stimulation
22 p3871 A69-40054

Olfactory bulb removal effects on uptake decline of telencephalic norepinephrine, noting use for mapping adrenergic pathways
22 p3871 A69-40055

Pituitary-adrenocortical axis of rats in oxygen atmosphere at low pressure, finding depressed norepinephrine excretion
23 p4087 A69-41790

NORMAL DENSITY FUNCTIONS
Gaussian type microfield formation in plasma by placing constraints on plasma particles displacements
02 p0285 A69-11568

Gaussian summation for ion implantation profile control in semiconductors, describing computer program selecting optimum energies to fit predetermined profiles
11 p1857 A69-24546

Gaussian particle size distribution with porosity and surface irregularity corrections used to determine mean particle size of lunar surface material at Surveyor sites
12 p2158 A69-26371

Energy detection of random processes in colored Gaussian noise, discussing filtering, threshold detection, false alarm, probability distribution and density
13 p2220 A69-27937

Algorithm for calculating recognition error by applying pattern vectors having two multivariate Gaussian distribution to optimum Bayes classifier
15 p2572 A69-31113

Electronic component life test sampling plans based on lognormal distribution and instantaneous failure rate or hazard rate criterion
15 p2630 A69-31137

Double diffused transistor with Gaussian impurity distribution analyzed by power series for carrier density distribution and frequency response
16 p2758 A69-31616

Gaussian amplitude distribution of 1/f noise by oscilloscope display and scanning with movable slit
16 p2752 A69-32383

Stress-strain state of shells under concentrated loading, emphasizing positive Gaussian curvature
18 p3219 A69-34832

Ensembles of random Hermitian cyclic matrices in statistical theory of complex systems energy level spectra, noting Gaussian density function of eigenvalues
20 p3567 A69-36988

Satellite orbit determination errors attributed to Gaussian noise effect on tracking measurements, assuming known Gaussian probability error distribution [AIAA PAPER 69-911]
21 p3807 A69-39343

Gaussian type densities estimated by representing unknown density in terms of convolution expansion of Gaussian probability density and arbitrary distribution, discussing convergence rates
21 p3756 A69-39499

NORMAL FORCE DISTRIBUTION
U FORCE DISTRIBUTION

NORMAL SHOCK WAVES
Particle volume role in normal shockwave structure in gas-particle mixtures, discussing equations of motion formulation
13 p2244 A69-27327

Polychromator measurement of hydrogen plasma electron density produced by normal ionizing shock wave, using Stark broadening study of H beta line
14 p2494 A69-29767

Laboratory plasma produced by electromagnetically generated shock front propagation through unionized hydrogen
17 p2945 A69-33447

Normal and transverse ionizing shock, discussing Alfvénic regime for normal shocks and shunting effect in transverse shocks
18 p3180 A69-34454

Normal ionizing shock waves in H, analyzing shock velocities as function of drive magnetic field using Chapman-Jouguet hypothesis
21 p3691 A69-38332

Flow and thermodynamic variables of Ar-Cs mixture behind normal shock in shock tube at various temperatures and pressures
23 p4150 A69-41335

Hydrogen-air reaction kinetics analyzed using standing wave normal shock noting wall effects, ignition delay and recombination [AIAA PAPER 67-479]
23 p4239 A69-41893

NORMALITY
One dimensional distribution law of random process with arbitrary correlation function, verifying normality hypotheses by integral criterion
08 p1299 A69-21069

One dimensional distribution law of random process with arbitrary correlation function, verifying normality hypotheses by integral criterion
16 p2765 A69-32484

NORMALIZING (STATISTICS)
Renormalization of second order self energy part of photon and lowest order corrections to single photon vertex using Lagrange vector meson density
21 p3775 A69-39468

NORMS
Personality characteristics of jet pilots measured by Edwards Personal Preference Schedule, including percentile norms table
14 p2408 A69-29294

Norms for quantitative vectorcardiography derived from statistical analysis of results from healthy young subjects, emphasizing medical evaluation of flying personnel
24 p4277 A69-43390

P-Q norms generalized inverse concept of matrix derived from extension of Penrose best approximate solution of linear equations
24 p4342 A69-43703

NORTH AMERICA
Magnetic anomalies off Cape Hatteras explained as possible edge effect, discussing ocean and continental magnetic crusts and igneous and magnetic rocks
11 p1879 A69-25405

Optical observations of Geos 1 over North America in short arc reduction to improve tracking stations survey coordinates, discussing dependence on earth gravity and mass
15 p2599 A69-31342

Book on competition in North Atlantic commercial air transport covering passengers, freight and mail from supply, demand and market point of view
16 p2881 A69-31866

Regression generated radiometric and contour height fields of North American Continent using Nimbus 2 IR equivalent black body temperature and geopotential data
24 p4343 A69-42896

NORTH AMERICAN AIRCRAFT
U B- 70 AIRCRAFT
U OV-10 AIRCRAFT
U X- 15 AIRCRAFT

NORTH AMERICAN MILITARY AIRCRAFT
U MILITARY AIRCRAFT

NORTHERN HEMISPHERE
NT ARCTIC REGIONS

Objective layer of maximum wind /LRMW/ analysis technique for Northern Hemisphere jet stream, noting generation of initial guess fields
01 p0110 A69-10689

Geophysical effects observed in Northern Hemisphere during low solar activity, discussing polar auroral intensities and positions
02 p0239 A69-11694

Ionospheric current systems for various selected very quiet and slightly disturbed international quiet days based on Northern Hemisphere observatories data
03 p0423 A69-13518

Acromagnetic profiles across Reykjanas ridge southwest of Iceland, noting magnetic anomalies symmetry and ocean floor spreading since Mesozoic
04 p0592 A69-14660

Meteorological observations of Mars northern polar cap and Southern Hemisphere from northern summer solstice to early autumn
05 p0825 A69-16302

Atmospheric turbidity coefficient distribution in Northern Hemisphere from direct solar radiation measurements, noting application to IQY data
05 p0789 A69-16585

Atmospheric wind velocity in Northern and Southern Hemisphere, noting increase with height
06 p0921 A69-17747

Blocking processes synchronous development involving atmospheric circulation disturbances in Northern and Southern Hemispheres, noting localization in Pacific and Atlantic oceans
13 p2292 A69-27840

Soviet book on temperature regime of free atmosphere above Northern Hemisphere covering aerological data processing, statistical estimates, latitudinal and seasonal variations
13 p2294 A69-27934

Geophysical effects observed in Northern Hemisphere during low solar activity, discussing polar auroral intensities and positions
13 p2258 A69-28725

Low energy electron precipitation data at northern high latitudes obtained from satellite low altitude polar orbit
14 p2512 A69-28964

Temperatures and geopotentials of isobaric surfaces in Northern and Southern Hemispheres compared for summer and winter seasons
14 p2473 A69-29724

Spatial correlation function of Northern Hemisphere geopotential, using model based on random distribution of potential vortex fluctuations for atmospheric circulation
14 p2476 A69-29822

Atmospheric circulation integral characteristics, calculating kinetic energy in Northern Hemisphere
14 p2476 A69-29824

Zonal and meridional components of air circulation in troposphere and lower stratosphere for Northern Hemisphere
14 p2477 A69-29829

Secular fluctuations of atmospheric circulation over Northern Hemisphere analyzed using isobaric and composite-kinematic surface maps, discussing analogies with Southern Hemisphere
14 p2478 A69-29836

Epochs in atmospheric circulation development over Northern Hemisphere, emphasizing solar activity roles in epochs appearances
14 p2478 A69-29837

European geostationary satellite orbit inclination and eccentricity modification for maximum observation time of Northern Hemisphere by high resolution IR radiometer
15 p2650 A69-31389

Direct wind measurement and momentum transport estimates obtained from cyclones and anticyclones daily displacements over Northern Hemisphere, applying results to planetary atmospheres
16 p2780 A69-32306

Zonal flow intensity, velocity and kinetic energy of standing and traveling waves compared for Northern and Southern Hemispheres
17 p2997 A69-33392

Continuum survey at 1415-MHz between declinations of zero and 20 degrees N with radio telescope, noting flux densities and contour maps of sources
18 p3195 A69-34428

Climatological patterns of atmospheric kinetic energy dissipation in free atmosphere derived from upper wind statistics of Northern Hemisphere, using Kolmogoroff functions
18 p3166 A69-34825

Horizontal wind components over U.S.S.R., Western Europe and Northeast Atlantic obtained from satellite photographs of vortex cloud systems
19 p3365 A69-36668

F 2 critical frequency meridional cross sections latitude profiles based on global network ionospheric stations observations, confirming daytime Northern Hemisphere ionization maximum
20 p3526 A69-37661

F 2 region critical frequencies obtained during winter at Northern and Southern Hemisphere stations located in auroral and polar zones, correlating changes with ionization
20 p3526 A69-37665

F 2 layer seasonal anomaly, discussing global distribution observed by network of ionospheric stations
20 p3526 A69-37666

Northern Hemisphere 500-mb height pattern series expansion, using optimal sets of orthonormal functions, obtaining rms error
24 p4346 A69-43157

NORTHROP AIRCRAFT

U F 5 AIRCRAFT

NORTHROP MILITARY AIRCRAFT

U MILITARY AIRCRAFT

NOSE CONES

NT ABLATIVE NOSE CONES

NT ROCKET NOSE CONES

Scaling laws for nose bluntness effects on hypersonic aerodynamics of bodies of revolution
[AIAA PAPER 68-1158] 03 p3362 A69-13566

Flight tests in wide Mach number range of blunt nosed flare stabilized hypersonic reentry nose cone, deducing drag and stability coefficients
[AIAA PAPER 68-1145] 03 p0521 A69-13668

Shock layer microwave radiation measurements during reentry flight of spherical nose cone, determining effective plasma temperature
[AIAA PAPER 69-183] 06 p0865 A69-18201

Transpiration cooling of reentry vehicle nosetips, noting two dimensional aspects of porous wall coolant flow and matrix-coolant energy exchange
[AIAA PAPER 69-96] 06 p1039 A69-18212

Laminar hypersonic roll damping derivatives for 10 degree half angle cone at zero angle of attack for environmental flow conditions of hypersonic wind tunnel
09 p1430 A69-21958

Hypersonic drag and shock wave characteristics of blunt bodies including cones, spherical nose and concave nose bodies
09 p1433 A69-22568

Nose bluntness effect on hypersonic unsteady aerodynamics of flared and conical bodies of revolution
[AIAA PAPER 68-889] 12 p2012 A69-26794

ASTRID high altitude sounding rockets orientation system aligning payload cones to target outside earth atmosphere, discussing software simulation with analog and digital computers, etc
• 17 p3001 A69-33424

Cone boundary layer transition location and Reynolds number as function of nose bluntness combined effect with Ar, air and He mass injection
[AIAA PAPER 67-706] 17 p2955 A69-33476

Nonequilibrium, real gas and nose bluntness effects on hypersonic slender body flows, analyzing similitudes, free stream temperature, velocity and relaxation
[AIAA PAPER 69-708] 17 p2894 A69-33501

Drag measurements for sharp and blunt-nosed bodies shot into wind tunnel supersonic gas counterflows, discussing shock waves for different configurations
19 p3239 A69-36401

Second order differential equations of supersonic flows past bodies at small angles of attack, showing linearized characteristics method applicability for conical nose
24 p4243 A69-42581

Flight tests in wide Mach number range of blunt nosed flare stabilized hypersonic reentry nose cone, deducing drag and stability coefficients
[AIAA PAPER 68-1145] 24 p4394 A69-43250

NOSE WHEELS

Steerable landing gear system consisting of freely castoring corotating wheel nose gear, tiltable axle and main gear skids for lifting body spacecraft
[AIAA PAPER 69-790] 19 p3243 A69-35639

NOSES (FOREBODIES)

NT ABLATIVE NOSE CONES

NT NOSE CONES

NT ROCKET NOSE CONES

ELDO Europa 1 Fairings Jettisoning System and explosive devices, discussing heat shield structure and safety regulations
10 p1635 A69-23027

Nose bluntness effect on hypersonic flow for slender blunt bodies with arbitrarily shaped lateral surfaces at small attack angle
19 p3239 A69-36402

NOTATION

U CODING

NOTCH SENSITIVITY

Impact cyclic loading fatigue tests of smooth and notched duralumin, discussing increased impact strength resulting from initial underloading
07 p1167 A69-19317

Strain concentration design factors for notch effect in low cycle fatigue and crack propagation conditions
07 p1235 A69-19383

Notched members fatigue life prediction from smooth specimen fatigue data and Neuber rule application
10 p1715 A69-23984

Crack behavior and toughness of aluminum alloy parent metal and weldments, noting temperature effect
14 p2462 A69-29003

Oxygen content and grain structure influence on TS5 Ti alloy mechanical properties, notch and crack growth sensitivity at low temperature
15 p2637 A69-30266

NOTCH STRENGTH

Ultrasonic detection and measurement of fatigue cracks in notched cylinders subjected to reversed axial cyclic loading
01 p0078 A69-10113

Plane strain yielding, stresses and fracture about notches and cracks in terms of flow and fracture stresses and crack tip radii
03 p0528 A69-13876

Theoretical buckling load for single edge notched struts, discussing brittleness effects
05 p0837 A69-16064

Elastoplastic stress in notch as cause of decreased lifetime of aircraft components, analyzing stress reversal and displacement during takeoff and landing
09 p1620 A69-22576

Testing system stiffness effect on sheet fracture, discussing notch strength dependence on stiffness
10 p1796 A69-23075

Thickness and drilled holes effects on notch toughness of Charpy V notch bars over wide temperature range
10 p1798 A69-23087

Potential testing methods for corrosion induced changes in materials, discussing mechanical properties, corrosion fatigue and cracking and creep
10 p1713 A69-23822

Notched members fatigue life prediction from smooth specimen fatigue data and Neuber rule application
10 p1715 A69-23984

High strength steels, discussing ductility, austenite to martensite transformation for increased strain hardening rate and elongation and corrosion resistance
12 p2115 A69-26829

Ultrasonic detection and measurement of fatigue cracks in notched cylinders subjected to reversed axial cyclic loading
14 p2445 A69-28882

Titanium alloys fatigue properties at various temperatures using notched and unnotched specimens, considering vibrational fatigue strength and notch sensitivity
15 p2637 A69-30227

Stress conditions of anisotropic plate with soldered in circular isotropic aluminum disk in presence of notches at seam, assuming elastic symmetry of plate
18 p3218 A69-34602

Elastic bodies brittle stability weakened by cut, developing criterion for determining critical cut length
18 p3224 A69-35314

Alloying elements effect on low temperature notch-bend fracture toughness of martensitic high strength steels, noting transition temperature
20 p3556 A69-36952

Low cycle fatigue strength tested on notched and unnotched round steel bars, distinguishing between fatigue lives for crack initiation and propagation
24 p4404 A69-43627

NOTCH TESTS

NT CHARPY IMPACT TEST

Microscopic cleavage strength of high nitrogen steel notched bars determined from critical tensile stress criteria using elastoplastic analysis method
01 p0169 A69-10765

Notch stress procedure to predict low cycle fatigue life of specimens with fabrication flaws, discussing crack initiation and propagation lives effects
[ASME PAPER 68-PVP-15] 03 p0523 A69-12997

Prolonged loading effect on mechanical properties of 18Kh2N4VA steel at low temperature, discussing notched and unnotched specimens
04 p0614 A69-14573

Load carrying capacity of V notched bars under axially symmetric tensile load, verifying influence of distance between two equal notches
04 p0680 A69-15169

Generation of crack propagation data on notched rotating beam specimens by interrupted stressing techniques
[ASME PAPER 68-WA/MET-3] 05 p0838 A69-16148

Fatigue crack growth in notched samples of aluminum alloy subjected to cyclic compressive loading, noting residual tensile strength at notch root
[ASME PAPER 68-WA/MET-16] 05 p0838 A69-16154

Fatigue life reduction in Al alloy specimens with stress concentrations due to notches
05 p0843 A69-16696

Strain near fatigue crack tip in notched steel plates measured by copper electroplating method
06 p1022 A69-17198

Localized microstructural changes and fatigue crack propagation in cantilever type notched specimens of austenitic stainless steel under cyclic bending at constant load
06 p0943 A69-17237

Plastic yielding of tensile V-notched aluminum alloys elements with intermediate thickness and various shoulder ratios, studying thickness effect on yield load
09 p1612 A69-21499

Liquid surface active media /kerosene, water, castor oil/ effect on strength of V notched polymethyl methacrylate specimens
09 p1528 A69-21852

Debonding mechanism role in fatigue crack development in notched aluminum alloy samples using optical and electron microscopy
10 p1710 A69-23076

Notched members fatigue life prediction from smooth specimen fatigue data and Neuber rule application
10 p1715 A69-23984

Crack opening displacements of stationary and running cracks and of inclined stationary cracks in centrally notched plates, noting normal strain fields
12 p2189 A69-27163

Double notch creep rupture tests of Cr-Mo steels, investigating changes in notch profile, dimensions and structure
[ASME PAPER 68-WA/MET-7] 14 p2464 A69-29441

Prolonged loading effect on mechanical properties of 18Kh2N4VA steel at low temperature, discussing notched and unnotched specimens
15 p2638 A69-30274

Fracture toughness of AlZnMgCu alloys, employing sharp notch tension, tear and precracked Charpy impact tests
16 p2800 A69-31780

Brittle toughness determination method compared with Robertson and notch impact tests, evaluating steel susceptibility to brittle failure propagation
16 p2795 A69-32796

Photoelasticity testing of stress gradient factor on notched tensile specimens
17 p3052 A69-32982

Plane strain fracture toughness determined for crack notched bend specimens using standard test procedure for specific metallic material property
17 p2989 A69-33566

Stress distribution in tension specimen notched on one edge obtained photoelastically for several notch depth to specimen width ratios, noting Neuber theory agreement
19 p3447 A69-36859

Fatigue tests with cylindrical samples for observation of macrocrack formation and propagation at bottom of notches, discussing kinetics of fatigue failure
23 p4225 A69-41425

Notch effect on corrosion fatigue behavior of high strength Al alloy under bending and direct stresses
24 p4330 A69-42553

NOTCHED METALS

U NOTCH TESTS

NOTCHED STEEL

U NOTCH TESTS

U STEELS

NOTCHES

Stress distribution in infinite strip with equally spaced identical semicircular notches on one edge and subject to transverse bending
05 p0842 A69-16643

Stresses in finite width infinite elastic isotropic strip with equally spaced identical semicircular notches under uniform tension or pure bending
05 p0843 A69-16644

NOVAE

NT HERCULES NOVA

Spectrum data of Nova Vulpeculae /1968/ summarized concerning dispersion figures
07 p1220 A69-19337

Novas in M 31 on Tautenburger Schmidt photographs
08 p1382 A69-19873

Nine spectra of recurrent Nova T Pyxidis during fifth /1966/ outburst compared to previous outbursts
08 p1391 A69-20396

Photographic observations of Nova Her 1963 in 1967, showing nonreturn to prenova stage
12 p2156 A69-26223

Fine structure of absorption lines of circumstellar Ca ejected from Nova Delphini 1967, determining ejection dates and photospheric radius
13 p2346 A69-27709

General algorithm for eruptive plasma instabilities in fusion plasmas, flares and novae, yielding time behavior and dissipative effects
14 p2499 A69-29850

Nova Delphini 1967 observational data and equipment including Cassegrain spectrograph, reflector telescope and photoelectric photometer
15 p2682 A69-30439

Nova thermal explosion, analyzing hydrogen combustion after penetration from white dwarf shell into degenerate core
15 p2682 A69-30507

Nova outburst dynamics investigation by time dependent hydrodynamics computer program including energy transport by radiation and convection
15 p2692 A69-30769

Nova Vulpeculae 1968 photographic observations analyzed for magnitudes, indicating 16 July 1968 explosion
16 p2855 A69-31659

Galactic novae observational data and theoretical interpretations, considering envelope detachment from star, luminosity, motion and emission line intensities
17 p3032 A69-33103

Forbidden emission transition probabilities in high excitation symbiotic stars, novae, Cygni stars and peculiar binaries
19 p3423 A69-36227

Forbidden lines in slow nova RR Tel spectrum, comparing ionization rate with RR Pic
19 p3423 A69-36230

Photometric evolution of Nova Delphini 1967 /HR Del/ in UPXYZVS seven color intermediate waveband system, showing position on QQ diagram
19 p3425 A69-36563

Nova Delphini 1967 /HR Del/ observations in UPX-YZV photometric system, tabulating color indices
19 p3426 A69-36564

Nova luminosity sources during premaximum, considering stellar shell separation and intense ejection of matter
19 p3426 A69-36574

UBV photoelectric observations of Nova Delphini 1967 at Bologna Observatory
20 p3599 A69-37475

Cosmic ray electron role in energetics of solar flares, stellar flares and explosions, galactic eruptions and quasars
21 p3790 A69-38823

Photoelectric observation of EM Cygni eclipsing binary and old nova
22 p4015 A69-40151

Tabulated photoelectric photometer measurements of Nova Vulpeculae 1968 No. 1
23 p4208 A69-41290

NOXIOUS MATERIALS
U CONTAMINANTS

NOZZLE DESIGN

Interactions between outer and inner jets behind maximum cross section of jet engine nozzle [ONERA-TP-600]
02 p0187 A69-11620

Nozzle geometry influence on argon plasma flow parameters in shock tube, discussing measurement data behind shock wave front
03 p0481 A69-14160

Sublimation solid reaction control, discussing propellants, nozzle performance, sublimation area, power, pressure drop, response and valueless design [AIAA PAPER 68-516]
04 p0552 A69-15322

Injector design based on MHD injector components performance, establishing minimum diffuser nozzle area
06 p0872 A69-17920

Variable geometry intake and convergent-divergent nozzle design for supersonic aircraft, noting subsonic installations
08 p1253 A69-21164

Solid propellant motors nozzle design, analyzing structural and material problems, high temperature exhaust gases effects, thermal insulation, etc
10 p1716 A69-23403

Supersonic nozzle cross section and diffuser throat in MHD generator calculated by continuity equation
11 p1826 A69-25348

Nozzle erosion profile, char penetration and temperature response predicted for nozzle material for 260 SL-3 motor [AIAA PAPER 68-504]
12 p2118 A69-26784

Axisymmetric hypersonic wind tunnel nozzle design by determining inviscid contour and correcting for turbulent boundary layer growth [AIAA PAPER 69-337]
13 p2200 A69-28273

Variational problems associated with supersonic gas flows with foreign particles, considering nozzle designs
14 p2389 A69-28801

Optimum nonequilibrium nozzle performance for hydrogen-fluorine propellant system, considering contour, engine/nozzle weights and recombination kinetics [AIAA PAPER 69-472]
16 p2733 A69-32652

Nozzle throat ablative materials for controlled high regression rates in tactical rocket motors, primarily nylon reinforced thermosetting resins [AIAA PAPER 69-423]
16 p2804 A69-32710

Location effect of power plants on aft-mounted supersonic cruise exhaust nozzles at transonic speeds in flight and wind tunnel [AIAA PAPER 69-427]
16 p2734 A69-32769

Large booster nozzle reuse, discussing design, refurbishment, performance, costs and test evaluation [AIAA PAPER 68-657]
19 p3394 A69-35944

Rocket nozzle control by side forces produced by secondary gas stream injection observed for relationship with inclination angle to nozzle axis
20 p3457 A69-37065

Liquid metal sprayer design including calculation of nozzles for subsonic and supersonic gas outflow
21 p3728 A69-38613

Nitrogen and water vapor effects on hydrogen-oxygen system recombination, using shock tubes for design of exhaust nozzles for hypersonic flow vehicles
21 p3669 A69-38801

Computerized solid rocket motor nozzle design with computer program providing weight, envelope and performance values for vehicle optimization studies [AIAA PAPER 69-975]
22 p3999 A69-40355

Pressure ratio effect on supersonic turbine nozzle performance during off-design regime operation, noting effect of low specific heat gas ratio
23 p4203 A69-42250

Large contoured nozzle fabrication using liquid epoxy as casting material, presenting molding process based on experimental data
24 p4318 A69-42643

NOZZLE EFFICIENCY

Nomogram for nozzle thrust coefficient evaluation
03 p0365 A69-14102

Pumping requirements for nozzle skimmer region of neutral particle nozzle beam source, using two stage mechanical pump
04 p0600 A69-15026

Space flight fuel consumption optimization as function of acceleration of nozzle control
10 p1666 A69-22919

Chemical reaction rate data for propellant systems containing boron or aluminum and hydrogen, chlorine and fluorine, based on finite kinetics expansions [AIAA PAPER 69-182]
11 p1940 A69-24907

Local external flow variations effect on blow-in-door nozzle performance in transonic flight regime [AIAA PAPER 69-428]
16 p2733 A69-32731

Noncavitating and cavitating performance of low area ratio water jet pumps, analyzing efficiency, area ratio, throat length, nozzle spacing and diffuser geometry
18 p3095 A69-35176

Divergence losses of noncircular C-D nozzles based on approximation by spherical source flows
19 p3238 A69-35960

Liquid alumina particles agglomeration in convergent and throat region of nozzle leading to performance decrease by increasing velocity and temperature difference between phases
22 p4001 A69-40929

Pressure ratio effect on supersonic turbine nozzle performance during off-design regime operation, noting effect of low specific heat gas ratio
23 p4203 A69-42250

Tridimensional infrasonic diffuser geometry effects on operational efficiency, considering opening angle, outlet/inlet section fields ratio and diffuser length/hydraulic radius ratio
24 p4243 A69-42560

NOZZLE EXPANSION
U GAS EXPANSION

NOZZLE FLOW

Difference methods in solution of incorrect Cauchy problem simulating ideal gas flow in nozzle
01 p0006 A69-10379

Nozzle separation for thrust vector control with applications to guidance problems
01 p0161 A69-10412

Reactions kinetics contribution to nonequilibrium recombination occurring in supersonic nozzle flow of combustion products of hydrogen in air
02 p0353 A69-12488

Minimum admissible spacing between supersonic jet expelled from VTOL aircraft nozzle and plane surface near nozzle exit
03 p0361 A69-12955

Laval nozzle resistance as result of friction and under expansion of gas, noting flow and pressure recovery coefficients
03 p0361 A69-12967

Chemical rockets theory for case of chemical equilibrium and frozen nozzle expansions
03 p0495 A69-13004

Jet pump head rise deterioration parameter for prediction of cavitation
05 p0745 A69-15791

Turbulent free jet at miniature nozzle exit, analyzing wall attachment fluid amplifier and flow characteristics
05 p0746 A69-16012

Coanda nozzle entrainment and flow augmentation approximating numerical stability by finite differences
05 p0746 A69-16021

Argon flow characteristics in converging nozzle in continuum, slip and free molecular regimes [ASME PAPER 68-WA/FE-9]
05 p0698 A69-16089

Recombination constants of dissociated oxygen and nitrogen flow in supersonic nozzle at high temperatures using modified Bray method
06 p1030 A69-17349

Liquid metal MHD systems efficiency when operating with pressure jump in diffuser nozzle
06 p0872 A69-17921

Condensation and probe interference in planar expansion deflection nozzle measurements [AIAA PAPER 69-170]
06 p0863 A69-18059

Dense gas effects in free piston hypersonic wind tunnel, discussing Longshot facility, free piston cycle, reservoir conditions decay and hypersonic nozzle flow [AIAA PAPER 69-169]
06 p0907 A69-18188

Underexpanded nozzle ejected supersonic turbulent jet off-design behavior, discussing static pressure distribution, boundary layer and Mach number effect
07 p1049 A69-18397

Relaxation equations for oscillatory degrees of freedom of molecular supersonic binary gas flow in Laval nozzle, obtaining population inversion
07 p1118 A69-18540

Optimum profile of supersonic nozzle with nonequilibrium flow
07 p1119 A69-18737

Mixed sub- and supersonic gas flow in plane pressure nozzle free of vortex and neglecting viscosity and heat conduction
07 p1050 A69-18739

Stationary supersonic nonequilibrium plasma source in gas vacuum expansion and nozzle flows
07 p1191 A69-18986

Steady conical compressed flows in nonaxisymmetric ring nozzles characterized by discontinuities
07 p1120 A69-18989

Boundary layer effect on flow coefficient of fluid amplifier feed nozzle, noting flow uniformity, incompressibility, velocity and velocity distribution assumptions
07 p1059 A69-19320

Time dependent procedure for axisymmetric transonic nozzle flows, programming governing equations for high speed computer
09 p1431 A69-21974

Navier-Stokes equations solution applicable to source type low Reynolds number flow through conical nozzles

09 p1482 A69-21976

High enthalpy air flow in hypersonic conical nozzle, calculating chemical and thermodynamic nonequilibrium effects with computer program

09 p1433 A69-22610

Sonic transmission of diatomic nitrogen during nozzle flow, presenting density dependence of natural oscillation energies and temperature

10 p1632 A69-22912

Effect of degree of expansion of ionized gas in nozzle on specific power of MHD generator

10 p1636 A69-23103

Nozzle flow temperature patterns of relaxing combustion gases compared at different temperatures and pressures, using kinetic-chemical calculations [DVL-896]

10 p1809 A69-23644

Size and velocity measurements of particles suspended in gas expanding from nozzle into vacuum simulating cometary two phase flow with evaporation

10 p1674 A69-23686

Asymptotic boundary curves for two dimensional and axisymmetric incompressible irrotational flows into throat of convergent duct

10 p1680 A69-23893

Supersonic nozzle cross section and diffuser throat in MHD generator calculated by continuity equation

11 p1826 A69-25348

Trajectories of particles entrained by gas flow in nozzles for study of erosion damage during passage of gas-particle mixture

11 p1818 A69-25355

Supersonic nozzle design ensuring desirable flow field in inviscid core of viscous gas flow, using boundary layer equations

11 p1820 A69-25473

Mixing zone of plane jet in rectangular nozzle mounted at end of controlled velocity wind tunnel

12 p2062 A69-26287

Difference methods in solution of incorrect Cauchy problem simulating ideal gas flow in nozzle

12 p2012 A69-26671

Internal flows of compressible fluids with heat transfer in accelerating nozzles and constant area ducts, simplifying equations by assuming one dimensional flow

12 p2012 A69-26790

Soviet book on liquid fuel rocket engines design covering gas expansion in nozzles, mixture formation, heat transfer, injectors and supply systems

12 p2148 A69-27078

Thermodynamic atomization in MHD energy conversion through convergent-divergent nozzles, noting nozzle efficiency and droplet size

13 p2245 A69-27477

Air-water and steam-water flows in two phase Laval nozzles, measuring flow rates and temperature and pressure variation

• 13 p2245 A69-27481

Diagnostic measurements in nonequilibrium nozzle flows compared to finite rate expansion calculations, measuring pressure, temperature and density [AIAA PAPER 69-328]

13 p2200 A69-28263

Variational problems associated with supersonic gas flows with foreign particles, considering nozzle designs

14 p2389 A69-28801

Argon flow characteristics in converging nozzle in continuum, slip and free molecular regimes [ASME PAPER 68-WA/FE-9]

14 p2390 A69-29445

Radiating gray gas laminar jet in thermodynamic equilibrium ejected from plane nozzle into wake analyzed using boundary layer, divergence and transfer equations

14 p2432 A69-29612

Gas and polydispersed condensate parameters of nonequilibrium two phase flow in Laval nozzle, considering particle collisions and coagulation, energy exchange and momentum exchange

14 p2391 A69-29621

One dimensional approximation for free jet nozzle flow in perpendicular magnetic field, calculating velocity distributions

14 p2501 A69-29910

Heat release rate during gas combustion products recombination in supersonic nozzle, using graphic interpolation of flow parameters

15 p2717 A69-30987

Stagnation region dimensionless pressure effect on flow pattern, boundary conditions and oscillation mechanism in compressible flow through nozzle in circular duct

15 p2549 A69-31220

Three dimensional laminar jet mixing of incompressible viscous fluid from rectangular cross section nozzle into uniform stream

16 p2768 A69-31687

Turbulent boundary layer laminarization in conical nozzle flow, measuring velocity profiles and friction coefficient [JPL-TR-32-1407]

16 p2732 A69-31894

Maintaining of flow similarity in calibration of nozzle type water meters for study of working processes of pumps

16 p2772 A69-32145

Nonequilibrium initial condition combustion effects on propellant performance for hydrazine/ chlorine pentafluoride and hydrogen/fluorine with equilibrium, kinetic and frozen nozzle flow [AIAA PAPER 69-469]

16 p2832 A69-32659

Free flow field from underexpanded rocket motor nozzle and impingement effects of pressure and heat transfer to flat plate [AIAA PAPER 69-568]

16 p2842 A69-32693

Three dimensional supersonic nozzle flow field calculations using second order numerical method of characteristics and computer programmed for internal flows [AIAA PAPER 69-463]

16 p2734 A69-32766

Pressure and temperature surveys of Mach 27-47 nozzle boundary layer at Ames M-50 He tunnel, determining velocity profiles, wall friction coefficient, etc [AIAA PAPER 69-686]

17 p2953 A69-33441

Time dependent analysis for quasi one dimensional, vibrational and chemical nonequilibrium nozzle flows approaching steady state solution by finite difference technique [AIAA PAPER 69-668]

17 p2893 A69-33491

Preston probe measurement of friction drag on subsonic and supersonic nozzle wall including effects of heat transfer, compressibility and pressure gradient [AIAA PAPER 69-648]

17 p2893 A69-33496

Viscous convergent-divergent nozzle flow slender channel approximations, discussing roles of nozzle geometry, Reynolds number and wall temperature, calculating velocity, enthalpy, etc [AIAA PAPER 69-654]

17 p2894 A69-33502

Jet and compressor noise, discussing noise suppression techniques and engineering applications [AIAA PAPER 68-550]

17 p3022 A69-34019

Pulsating flow analysis in finite and infinite conical nozzles under sinusoidal pressure disturbances [ASME PAPER 69-APM-16]

18 p3214 A69-34392

Shock tunnel steady flow starting process in two dimensional reflection nozzle, using multiple shadowgraphs and interferograms, noting nozzle geometry influences

18 p3085 A69-34471

Vibrational deexcitation shocks in expanding nonequilibrium nozzle flows extended to include embedded adiabatic shock

18 p3089 A69-35386

Flow rate of ideal fluid ejected from swirl injector taking into account radial component of flow velocity at nozzle exit

19 p3297 A69-35820

Divergence losses of noncircular C-D nozzles based on approximation by spherical surface flows

19 p3238 A69-35960

Skimmer interaction influences on nozzle beam production explaining intensity maxima, proposing model assuming normal shock across skimmer mouth

19 p3238 A69-36172

Diverging nozzle flow of gas mixtures containing solid or liquid particles analyzed by one dimensional approximation separately averaging boundary layer and flow core

19 p3298 A69-36389

Relaxation time influence on discharge coefficient of sonic nozzle of revolution, considering expanding polyatomic gas problem

19 p3241 A69-36721

Boundary layer formed in miniature nozzle studied for effect on jet spreading discharged into space at high Mach numbers

19 p3395 A69-36760

Jet efflux from two dimensional symmetric nozzles of arbitrary shape determined using conformal mapping and Riemann-Hilbert solution to mixed boundary value problem
